Early versions of the Langley nuclear fragmentation code NUCFRAG (and a publicly released version called HZEFRG1) assumed straight-line trajectories throughout the interaction. As a consequence, NUCFRAG and HZEFRG1 give unrealistic cross sections for large mass removal from the projectile and target at low energies. A correction for the distortion of the trajectory by the nuclear Coulomb fields is used to derive fragmentation cross sections. A simple energy-loss term is applied to estimate the energy downshifts that greatly alter the Coulomb trajectory at low energy. The results, which are far more realistic than prior versions of the code, should provide the data base for future transport calculations. The systematic behavior of charge-removal cross sections compares favorably with results from low-energy experiments. Author (revised)

OBSERVATIONS OF OPTICAL COUNTERPARTS OF GAMMA-RAY BURSTS Final Technical Report, Dec. 1987 - Mar. 1989

Frederick K. Knight 3 Sep. 1992 4 p
(Grant NAGw-1168)
(NASA-CR-193573; NAS 1.26:193573) Avail: CASI HC A01/MF A01

This is a final report for a contract begun in Dec. 1987 and ended in Mar. 1989 to use the existing Lincoln Laboratory Experimental Test Site in Socorro, NM to search for optical counterparts to gamma-ray bursts. The objective was to develop an autonomous staring system to search for stationary, transient optical flashes. The search was to use an existing 31-inch telescope equipped with a sensitive video detector. The approach for the search was to develop real-time processing software to monitor the video signal from the detector and to record any transient, point-like flashes that occurred in the field of view. The system would have been able to detect fainter flashes (B is approximately 15(sup m) in 1/30 s, delta(m(sub v)) = 0.25(sup m)) than other systems but lacked a large field of view (only 1.2 deg diameter) necessary to give a high probability of detecting a random flash on the sky. As such, the plan was to monitor known gamma-ray burst error boxes and wait for a repetition of an earlier event. The high payoff of good sensitivity with high angular resolution (1 pixel = 10sec) and good time resolution (30 s) to allow post-burst searches warranted funding if the cost was not prohibitive. The contract began in the middle of the three-year cycle for High Energy Astrophysics Gamma-Ray Astronomy Research and Analysis Program. This final report briefly describes the portion of the plan completed under the original contract. Author (revised)

ANALYSIS AND INTERPRETATION OF HIGH ENERGY COSMIC RAYS MEASURED ON SPACELAB-2 Final Technical Report, 1 Jan. 1988 - 31 Dec. 1990

Dietrich Mueller, Peter Meyer, Jacques LHeureux, and Simon Swordy Dec. 1991 5 p
(Grant NAGw-1311)
(NASA-CR-193586; NAS 1.26:193586) Avail: CASI HC A01/MF A01

Under the contract with NASA's Marshall Space Flight Center (NAS8-32828) the University of Chicago designed, built and delivered the CRN instrument for flight in the Spacelab-2 configuration. The instrument was flown from July 29 to August 5, 1985 on the Space Shuttle Challenger. The performance of our experiment was entirely successful and we reached our scientific goals. The contract included funds for the first year of data analysis. Further data analysis was carried out under the grant NAGW-1311 which ran from January 1, 1988 through December 31, 1990, and on which we report. The final products of this grant are the published scientific papers with the results from the experiment. We attach copies of the papers that have been published to date, and which we consider the most important part of this report. However, in order to put them into context we give a brief account of the project as a whole for which the grant covered the final phase. Derived from text

THE NASA LEWIS RESEARCH CENTER SBIR PROGRAM: AN ASSESSMENT

Hubert H. Grimes (Omni Corp., Brook Park, OH.), Marie E. Metzger (Omni Corp., Brook Park, OH.), and Walter S. Kim Jun. 1993 30 p
(RTOP 324-89-00)
(NASA-TM-106205; E-7914; NAS 1.15:106205) Avail: CASI HC A03/MF A01

An assessment was made of the NASA Lewis Small Business Innovation Research (SBIR) Program for the years 1983 to 1989. The assessment was based on the study of 99 Phase 1 contracts and 39 Phase 2 contracts. The overall impact of SBIR was found to be very positive, contributing strongly to many NASA programs. In addition, many successful efforts were commercialized benefiting the small business, federal agencies, and the aerospace industry. The program was evaluated in terms of contract quality, innovativeness, comparison to the state-of-the-art, achievement of goals, difficulty, and impact. Program difficulties were also identified, which could suggest possible program improvements. Much of the information gained in this assessment provided a basis for a SBIR data base which will be updated every year. This data base is computerized and will provide an excellent source of information about past SBIR efforts and company capabilities. Author (revised)

SIXTH ANNUAL WORKSHOP ON SPACE OPERATIONS APPLICATIONS AND RESEARCH (SOAR 1992), VOLUME 2

Kumar Krishen, ed. Feb. 1993 294 p Workshop held in Houston, TX, 4-6 Aug. 1992; sponsored by NASA, Washington, AF, and Houston Univ.
(NASA-CP-3187-Vol-2; S-706-Vol-2; NAS 1.55:3187-Vol-2) Avail: CASI HC A13/MF A03

This document contains papers presented at the Space Operations, Applications, and Research Symposium (SOAR) hosted by the U.S. Air Force (USAF) on 4-6 Aug. 1992. The symposium was cosponsored by the Air Force Material Command and by NASA/JSC. Key technical areas covered during the symposium were robotics and telepresence, automation and intelligent systems, human factors, life sciences, and space maintenance and servicing. The SOAR differed from most other conferences in that it was concerned with Government-sponsored research and development relevant to aerospace operations. Symposium proceedings include papers covering various disciplines presented by experts from NASA, the USAF, universities, and industry. For individual titles, see N94-11528 through N94-11579.

QUANTITATIVE EEG PATTERNS OF DIFFERENTIAL IN-FLIGHT WORKLOAD **c54**

M. B. Sterman, C. A. Mann, and D. A. Kaiser *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 466-473 Prepared in cooperation with California Univ., Los Angeles (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

Four test pilots were instrumented for in-flight EEG recordings using a custom portable recording system. Each flew six, two minute tracking tasks in the Calspan NT-33 experimental trainer at Edwards AFB. With the canopy blacked out, pilots used a HUD display to chase a simulated aircraft through a random flight course. Three configurations of flight controls altered the flight characteristics to achieve low, moderate, and high workload, as determined by normative Cooper-Harper ratings. The test protocol was administered by a command pilot in the back seat. Corresponding EEG and tracking data were compared off-line. Tracking performance was measured as deviation from the target aircraft and combined with control difficulty to achieve an estimate of 'cognitive workload'. Trended patterns of parietal EEG activity at 8-12 Hz were sorted according to this classification. In all cases, high workload produced a significantly greater suppression of 8-12 Hz activity than low workload. Further, a clear differentiation of EEG trend patterns was obtained in 80 percent of the cases. High workload produced a sustained suppression of 8-12 Hz activity, while moderate workload resulted in an initial suppression followed by a gradual increment. Low workload was associated with a modulated pattern lacking any periods of marked or sustained suppression. These findings suggest that quantitative analysis of appropriate EEG measures may provide an objective and reliable in-flight index of cognitive effort that could facilitate workload assessment.

PSYCHOPHYSIOLOGICAL MEASURES OF COGNITIVE WORKLOAD IN LABORATORY AND FLIGHT **c54**

Glenn F. Wilson and Albert Badeau *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 474-481 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

Psychophysiological data have been recorded during different levels of cognitive workload in laboratory and flight settings. Cardiac, eye blink, and brain data have shown meaningful changes as a function of the levels of mental workload. Increased cognitive workload is generally associated with increased heart rates, decreased blink rates and eye closures, and decreased evoked potential amplitudes. However, comparisons of laboratory and flight data show that direct transference of laboratory findings to the flight environment is not possible in many cases. While the laboratory data are valuable, a data base from flight is required so that 'real world' data can be properly interpreted.

TRANSFER OF TRAINING FOR AEROSPACE OPERATIONS: HOW TO MEASURE, VALIDATE, AND IMPROVE IT **c53**

Malcolm M. Cohen *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 482-487 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

It has been a commonly accepted practice to train pilots and astronauts in expensive, extremely sophisticated, high fidelity simulators, with as much of the real-world feel and response as possible. High fidelity and high validity have often been assumed to be inextricably interwoven, although this assumption may not be warranted. The Project Mercury rate-damping task on the Naval Air Warfare Center's Human Centrifuge Dynamic Flight Simulator, the shuttle landing task on the NASA-ARC Vertical Motion Simulator, and the almost complete acceptance by the airline industry of full-up Boeing 767 flight simulators, are just a few examples of this approach. For obvious reasons, the classical models of transfer of training have never been adequately evaluated in aerospace operations, and there have been few, if any, scientifically valid replacements for the classical models. This paper reviews some of the earlier work involving transfer of training in aerospace operations, and discusses some of the methods by which appropriate criteria for assessing the validity of training may be established.

SIGNAL DETECTION THEORY AND METHODS FOR EVALUATING HUMAN PERFORMANCE IN DECISION TASKS **c53**

Kevin OBrien (Lockheed Engineering and Sciences Co., Houston, TX.) and Evan M. Feldman (Rice Univ., Houston, TX.) *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 489-496 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

Signal Detection Theory (SDT) can be used to assess decision making performance in tasks that are not commonly thought of as perceptual. SDT takes into account both the sensitivity and biases in responding when explaining the detection of external events. In the standard SDT tasks, stimuli are selected in order to reveal the sensory capabilities of the observer. SDT can also be used to describe performance when decisions must be made as to the classification of easily and reliably sensed stimuli. Numbers are stimuli that are minimally affected by sensory processing and can belong to meaningful categories that overlap. Multiple studies have shown that the task of categorizing numbers from overlapping normal distributions produces performance predictable by SDT. These findings are particularly interesting in view of the similarity between the task of the categorizing numbers and that of determining the status of a mechanical system based on numerical values that represent sensor readings. Examples of the use of SDT to evaluate performance in decision tasks are reviewed. The methods and assumptions of SDT are shown to be effective in the measurement, evaluation, and prediction of human performance in such tasks.

CRITERIA FOR ASSESSING PROBLEM SOLVING AND DECISION MAKING IN COMPLEX ENVIRONMENTS Abstract Only **c53**

Judith Orasanu *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 497 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

Training crews to cope with unanticipated problems in high-risk, high-stress environments requires models of effective problem solving and decision making. Existing decision theories use the criteria of logical consistency and mathematical optimality to evaluate decision quality. While these approaches are useful under some circumstances, the assumptions underlying these models frequently are not met in dynamic time-pressured operational environments. Also, applying formal decision models is both labor and time intensive, a luxury often lacking in operational environments. Alternate approaches and criteria are needed. Given that operational problem solving and decision making are embedded in ongoing tasks, evaluation criteria must address the relation between those activities and satisfaction of broader task goals. Effectiveness and efficiency become relevant for judging reasoning performance in operational environments. New questions must be addressed: What is the relation between the quality of decisions and overall performance by crews engaged in critical high risk tasks? Are different strategies most effective for different types of decisions? How can various decision types be characterized? A preliminary model of decision types found in air transport environments will be described along with a preliminary performance model based on an analysis of 30 flight crews. The performance analysis examined behaviors that distinguish more and less effective crews (based on performance errors). Implications for training and system design will be discussed. MONITORING COGNITIVE FUNCTION AND NEED WITH THE AUTOMATED NEUROPSYCHOLOGICAL ASSESSMENT METRICS IN DECOMPRESSION SICKNESS (DCS) RESEARCH Abstract Only c53
Thomas E. Nesthus and Sammuel G. Schiflett (Aerospace Medical Research Labs., Brooks AFB, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 498 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

Hypobaric decompression sickness (DCS) research presents the medical monitor with the difficult task of assessing the onset and progression of DCS largely on the basis of subjective symptoms. Even with the introduction of precordial Doppler ultrasound techniques for the detection of venous gas emboli (VGE), correct prediction of DCS can be made only about 65 percent of the time according to data from the Armstrong Laboratory's (AL's) hypobaric DCS database. An AL research protocol concerned with exercise and its effects on denitrogenation efficiency includes implementation of a performance assessment test battery to evaluate cognitive functioning during a 4-h simulated 30,000 ft (9144 m) exposure. Information gained from such a test battery may assist the medical monitor in identifying early signs of DCS and subtle neurologic dysfunction related to cases of asymptomatic, but advanced, DCS. This presentation concerns the selection and integration of a test battery and the timely graphic display of subject test results for the principal investigator and medical monitor. A subset of the Automated Neuropsychological Assessment Metrics (ANAM) developed through the Office of Military Performance Assessment Technology (OMPAT) was selected. The ANAM software provides a library of simple tests designed for precise measurement of processing efficiency in a variety of cognitive domains. For our application and time constraints, two tests requiring high levels of cognitive processing and memory were chosen along with one test requiring fine psychomotor performance. Accuracy, speed, and processing throughout variables as well as RMS error were collected. An automated mood survey provided 'state' information on six scales including anger, happiness, fear, depression, activity, and fatigue. An integrated and interactive LOTUS 1-2-3 macro was developed to import and display past and present task performance and mood-change information.

ANALYZING HUMAN ERRORS IN FLIGHT MISSION OPERATIONS c53
Kristin J. Bruno, Linda L. Welz, G. Michael Barnes (California State Univ., Northridge.), and Josef Sherif *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 499-505 Sponsored by NASA, Washington (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

A long-term program is in progress at JPL to reduce cost and risk of flight mission operations through a defect prevention/error management program. The main thrust of this program is to create an environment in which the performance of the total system, both the human operator and the computer system, is optimized. To this end, 1580 Incident Surprise Anomaly reports (ISA's) from 1977-1991 were analyzed from the Voyager and Magellan projects. A Pareto analysis revealed that 38 percent of the errors were classified as human errors. A preliminary cluster analysis based on the Magellan human errors (204 ISA's) is presented here. The resulting clusters described the underlying relationships among the ISA's. Initial models of human error in flight mission operations are presented. Next, the Voyager ISA's will be scored and included in the analysis. Eventually, these relationships will be used to derive a theoretically motivated and empirically validated model of human error in flight mission operations. Ultimately, this analysis will be used to make continuous process improvements continuous process improvements to end-user applications and training requirements. This Total Quality Management approach will enable the management and prevention of errors in the future. Author (revised)

Avail: CASI HC A01/MF A03

The U.S. Army Aeroflightdynamics Directorate (AFDD) has developed a high-fidelity, full-mission simulation facility for the demonstration and evaluation of advanced helicopter mission equipment. The Crew Station Research and Development Facility (CSRDF) provides the capability to conduct one- or two-crew full-mission simulations in a state-of-the-art helicopter simulator. The CSRDF provides a realistic, full field-of-regard visual environment with simulation of state-of-the-art weapons, sensors, and flight control systems. We are using the CSRDF to evaluate the ability of an obstacle avoidance system (OASYS) to support low altitude flight in cluttered terrain using night vision goggles (NVG). The OASYS uses a laser radar to locate obstacles to safe flight in the aircraft's flight path. A major concern is the detection of wires, which can be difficult to see with NVG, but other obstacles--such as trees, poles or the ground--are also a concern. The OASYS symbology is presented to the pilot on a head-up display mounted on the NVG (NVG-HUD). The NVG-HUD presents head-stabilized symbology to the pilot while allowing him to view the image intensified, out-the-window scene through the HUD. Since interference with viewing through the display is a major concern, OASYS symbology must be designed to present usable obstacle clearance information with a minimum of clutter. Author (revised)

MEASURING HUMAN PERFORMANCE ON NASA'S MICROGRAVITY AIRCRAFT c54
Randy B. Morris and Mihriban Whitmore *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 516-521 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

Measuring human performance in a microgravity environment will aid in identifying the design requirements, human capabilities, safety, and productivity of future astronauts. The preliminary understanding of the microgravity effects on human performance can be achieved through evaluations conducted onboard NASA's KC-135 aircraft. These evaluations can be performed in relation to hardware performance, human-hardware interface, and hardware integration. Measuring human performance in the KC-135 simulated environment will contribute to the efforts of optimizing the human-machine interfaces for future and existing space vehicles. However, there are limitations, such as limited number of qualified subjects, unexpected hardware problems, and miscellaneous plane movements which must be taken into consideration. Examples for these evaluations, the results, and their implications are discussed in the paper. Author (revised)

NOISE LEVELS AND THEIR EFFECTS ON SHUTTLE CREWMEMBERS' PERFORMANCE: OPERATIONAL CONCERNS **c53**

Anton S. Koros (Lockheed Engineering and Sciences Co., Houston, TX.), Susan C. Adam, and Charles D. Wheelwright (Lockheed Engineering and Sciences Co., Houston, TX.) *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 522-528 (For primary document see N94-11527 01-99)
(Contract NAS9-17900)
Avail: CASI HC A02/MF A03

When excessive, noise can result in sleep interference, fatigue, interference with verbal communication, and hearing damage. Shuttle crewmembers are exposed to noise throughout their mission. The contribution of noise to decrements in crew performance over these extended exposure durations was the focus of this study. On the STS-40/SLS-1, mission noise levels were evaluated through the use of a sound level meter and a crew questionnaire. Crewmembers noted that sleep, concentration, and relaxation were negatively impacted by high noise levels. Speech Interference Levels (SIL's), calculated from the sound level measurements, suggested that crewmembers were required to raise their voice in order to be heard. No difficulty detecting caution and warning alarms was noted. The higher than desirable noise levels in Spacelab were attributed to flight specific payloads for which acoustic waivers were granted. It is recommended that current noise levels be reduced in Spacelab and the Orbiter Middeck especially as longer missions are planned for the buildup of Space Station Freedom. Levels of NC 50 are recommended in areas where speech communication is required and NC 40 in sleep areas. These levels are in accordance with the NASA Man-Systems Integration Standards. Measurements proposed for subsequent orbiter missions are discussed. Author (revised)

VISUAL EARTH OBSERVATION PERFORMANCE IN THE SPACE ENVIRONMENT. HUMAN PERFORMANCE MEASUREMENT 4: FLIGHT EXPERIMENTS **c53**

John F. Huth, James D. Whiteley, and John E. Hawker *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 529-539 (For primary document see N94-11527 01-99)
Avail: CASI HC A03/MF A03

A wide variety of secondary payloads have flown on the Space Transportation System (STS) since its first flight in the 1980's. These experiments have typically addressed specific issues unique to the zero-gravity environment. Additionally, the experiments use the experience and skills of the mission and payload specialist crew members to facilitate data collection and ensure successful completion. This paper presents the results of the Terra Scout experiment, which flew aboard STS-44 in November 1991. This unique Earth Observation experiment specifically required a career imagery analyst to operate the Spaceborne Direct-View Optical System (SpaDVOS), a folded optical path telescope system designed to mount inside the shuttle on the overhead aft flight deck windows. Binoculars and a small telescope were used as backup optics. Using his imagery background, coupled with extensive target and equipment training, the payload specialist was tasked with documenting the following: (1) the utility of the equipment; (2) his ability to acquire and track ground targets; (3) the level of detail he could discern; (4) the atmospheric conditions; and (5) other in-situ elements which contributed to or detracted from his ability to analyze targets. Special emphasis was placed on the utility of a manned platform for research and development of future spaceborne sensors. The results and lessons learned from Terra Scout will be addressed including human performance and equipment design issues.

USE OF ULTRASOUND IN ALTITUDE DECOMPRESSION MODELING Abstract Only **c54**

Robert M. Olson and Andrew A. Pilmanis (Aerospace Medical Research Labs., Brooks AFB, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 543 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

A model that predicts the probability of developing decompression sickness (DCS) with various denitrogenation schedules is being developed by the Armstrong Laboratory, using human data from previous exposures. It was noted that refinements are needed to improve the accuracy and scope of the model. A commercially developed ultrasonic echo imaging system is being used in this model development. Using this technique, bubbles images from a subject at altitude can be seen in the gall bladder, hepatic veins, vena cava, and chambers of the heart. As judged by their motion and appearance in the vena cava, venous bubbles near the heart range in size from 30 to 300 M. The larger bubbles skim along the top, whereas the smaller ones appear as faint images near the bottom of the vessel. Images from growing bubbles in a model altitude chamber indicate that they grow rapidly, going from 20 to 100 M in 3 sec near 30,000 ft altitude. Information such as this is valuable in verifying those aspects of the DCS model dealing with bubble size, their growth rate, and their site of origin. Author (revised)

HYPOBARIC DECOMPRESSION PREBREATHE REQUIREMENTS AND BREATHING ENVIRONMENT Abstract Only **c54**

James T. Webb and Andrew A. Pilmanis (Aerospace Medical Research Labs., Brooks AFB, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 544 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

To reduce incidence of decompression sickness (DCS), prebreathing 100 percent oxygen to denitrogenate is required prior to hypobaric decompressions from a sea level pressure breathing environment to pressures lower than 350 mm Hg (20,000 ft; 6.8 psia). The tissue ratio (TR) of such exposures equals or exceeds 1.7; TR being the tissue nitrogen pressure prior to decompression divided by the total pressure after decompression (((0.781)(14.697))/6.758). Designing pressure suits capable of greater pressure differentials, lower TR's, and procedures which limit the potential for DCS occurrence would enhance operational efficiency. The current 10.2 psia stage decompression prior to extravehicular activity (EVA) from the Shuttle in the 100 percent oxygen, 4.3 psia suit, results in a TR of 1.65 and has proven to be relatively free of DCS. Our recent study of zero-prebreathe decompressions to 6.8 psia breathing 100 percent oxygen (TR = 1.66) also resulted in no DCS (N = 10). The level of severe, Spencer Grades 3 or 4, venous gas emboli (VGE) increased from 0 percent at 9.5 psia to 40 percent at 6.8 psia yielding a Probit curve of VGE risk for the 51 male subjects who participated in these recent studies. Earlier, analogous decompressions using a 50 percent oxygen, 50 percent nitrogen breathing mixture resulted in one case of DCS and significantly higher levels of severe VGE, e.g., at 7.8 psia, the mixed gas breathing environment resulted in a 56 percent incidence of severe VGE versus 10 percent with use of 100 percent oxygen. The report of this study recommended use of 100 percent oxygen during zero-prebreathe exposure to 6.8 psia if such a suit could be developed. For future, long-term missions, we suggest study of the effects of decompression over several days to a breathing environment of 150 mmHg O2 and approximately 52 mmHg He as a means of eliminating DCS and VGE hazards during subsequent excursions. Once physiologically adapted to a 4 psia vehicle, base, or space station segment, crew members could use greatly simplified EVA suits with greater mobility and no prebreathe requirement.

JOINT PAIN AND DOPPLER-DETECTABLE BUBBLES IN ALTITUDE (HYPOBARIC) DECOMPRESSION Abstract Only c52

Michael R. Powell *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 546 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

The observation that altitude decompression sickness (DCS) is associated with pain in the lower extremities is not new, although it is not a consistent finding. DCS in divers is generally in the upper body, an effect often attributed to non-loading of the body while immersed. In caisson workers, DCS is reported more in the lower extremities. Surprisingly, many researchers do not mention the location of DCS joint pain, apparently considering it to be random. This is not the case for the tissue ratios encountered in studying decompression associated with simulated EVA. In NASA/JSC tests, altitude DCS generally presented first in either the ankle, knee, or hip (83 percent = 73/88). There was a definite statistical relation between the maximum Spencer precordial Doppler Grade and the incidence of DCS in the extremity, although this is not meant to imply a casual relation between circulating gas bubbles and joint pain. The risk of DCS with Grade 4 was considerably higher than that of Grades 0 to 3. The DCS risk was independent of the 'tissue ratio.' There was a predominance of lower extremity DCS even when exercise was performed with the upper body. The reason for these locations we hypothesize to be attributed to the formation of tissue gas micronuclei from kinetic and tensile forces (stress-assisted nucleation) and are the result of the individuals ambulating in a 1g environment. Additionally, since these showers of Doppler bubbles can persist for hours, it is difficult to imagine that they are emanating solely from tendons and ligaments, the supposed site of joint pain. This follows from Henry's law linking the volume of joint tissue (the solvent) and the solubility coefficient of inert gas; there is volumetrically insufficient connective tissue to produce the prolonged release of gas bubbles. If gas bubbles are spawned and released from connective tissue, their volume is increased by those from muscle tissue. Therefore, the nexus between Doppler-detectable gas bubbles and joint-pain decompression sickness is essentially a statistical, rather than a direct, one. Author (revised)

ARTERIAL GAS EMBOLI IN ALTITUDE-INDUCED DECOMPRESSION SICKNESS Abstract Only c52

Andrew A. Pilmanis and Robert M. Olson (Krug Life Sciences, Inc., San Antonio, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 547 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

Exposure to high altitudes can result in the evolved-gas condition referred to as decompression sickness (DCS). Ultrasonic monitoring techniques have clearly demonstrated the presence of venous gas emboli (VGE) during decompression. Although important to DCS research and our understanding of the physiological mechanisms of this condition, Venus gas emboli have not been considered clinically hazardous, unless in extreme numbers. Arterial gas emboli (AGE), on the other hand, are generally viewed with great concern. Arterial gas emboli can enter the cerebral arterial circulation and arrest blood flow resulting in potentially serious injury. Left ventricular gas emboli were observed with echo imaging in five volunteer subjects during exposure to simulated altitude. These serendipitous findings occurred during altitude exposure under 3 separate research protocols involving 79 subject exposures. The voluntary, fully informed consent of the subjects used in this research was obtained as required by AFR 169-3. A Hewlett-Packard SONOS 1000 Echo Imaging System was used to monitor for precordial gas emboli. The improved resolution of the SONOS 1000 appears to account for these new findings. Four subjects had high incidence DCS and VGE during previous research flights. One subject only had one flight. The altitudes and AGE onset times for the five cases were: (1) 25,500 ft/2:23, (2) 29,000 ft/0:27, (3) 19,500 ft/3:49, (4) 29,500 ft/3:15, and (5) 29,500 ft/1:31. In all five cases, at the time of AGE onset, the VGE scores were high from all monitored locations. Four of the cases were symptomatic at the time of AGE onset (pain and skin mottling). No cerebral manifestations were observed. All subjects were immediately recompressed to ground level and successfully treated with 2 hours of post-breathing or with hyperbaric oxygen therapy. In conclusion, previously undetected AGE were demonstrated--with and without DCS symptoms--during exposure to altitude. It appears that this gas transferred from the venous side to the arterial side via either intracardiac defects or the pulmonary circulation. The clinical and operational implications of this finding are yet to be determined. Author (revised)

TRANSCRANIAL DOPPLER ULTRASOUND AND THE ETIOLOGY OF NEUROLOGIC DECOMPRESSION SICKNESS DURING ALTITUDE DECOMPRESSION c52

W. T. Norfleet, M. R. Powell, K. Vasantha Kumar (Krug Life Sciences, Inc., Houston, TX.), and J. Waligora *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 549-561 (For primary document see N94-11527 01-99)

Avail: CASI HC A03/MF A03

The presence of gas bubbles in the arterial circulation can occur from iatrogenic mishaps, cardiopulmonary bypass devices, or following decompression, e.g., in deep-sea or SCUBA diving or in astronauts during extravehicular activities (EVA). We have examined the pathophysiology of neurological decompression sickness in human subjects who developed a large number of small gas bubbles in the right side of the heart as a result of hypobaric exposures. In one case, gas bubbles were detected in the middle cerebral artery (MCA) and the subject developed neurological symptoms; a 'resting' patent foramen ovalae (PFO) was found upon saline contrast echocardiography. A PFO was also detected in another individual who developed Spencer Grade 4 precordial Doppler ultrasound bubbles, but no evidence was seen of arterialization of bubbles upon insonation of either the MCA or common carotid artery. The reason for this difference in the behavior of intracardiac bubbles in these two individuals is not known. To date, we have not found evidence of right-to-left shunting of bubbles through pulmonary vasculature. The volume of gas bubbles present following decompression is examined and compared with the number arising from saline contrast injection. The estimates are comparable. Author (revised)

A MECHANISM FOR THE REDUCTION IN RISK OF DECOMPRESSION SICKNESS IN MICROGRAVITY ENVIRONMENT Abstract Only c52

Michael R. Powell *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 562 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

There is an apparent reduction in the incidence of decompression sickness reported by astronauts (from both the USA and the USSR) during extravehicular activity (EVA). The expected incidence, based on studies conducted under unit gravity conditions in Earth-based laboratories, is greater than that encountered during EVA. A biophysical explanation has been proposed for this difference based upon the mechanism of stress-assisted nucleation. Since the partial pressure ratio at which this gas phase forms is considerably smaller in living systems that in quiescent in vitro models, it was proposed that mechanical forces are involved. In that the lower extremities of astronautics are not gravitationally loaded in microgravity, it is possible that tissue gas micronuclei are but minimally regenerated. Most likely, gas micronuclei formed on Earth (by ambulation under 1 g conditions) would be eventually depleted. In a crossover study, 20 individuals were decompressed--from 1 ATA to 0.43 ATA for 3 hours--following either being fully ambulatory at unit gravity or following being hypokinetic and adynamic (simulated microgravity of 3-day bed rest). The subjects were monitored for gas phase formation by means of precordial Doppler monitoring. The results indicate a reduction in whole body gas phase formation in individuals who were bed rested as compared with themselves when fully ambulatory ($p = 0.02$). In hypokinetic individuals, the protection conferred was equivalent to an extra 175 minutes of oxygen prebreathe. These results are compatible with a hypothesis relating stress-assisted nucleation to the continual formation of tissue gas micronuclei and their gradual depletion with hypokinesia. Author (revised)

RISK OF DECOMPRESSION SICKNESS IN THE PRESENCE OF CIRCULATING MICROBUBBLES **c52**

K. Vasantha Kumar (Krug Life Sciences, Inc., Houston, TX.) and Michael R. Powell *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 563-567 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

In this study, we examined the association between microbubbles formed in the circulation from a free gas phase and symptoms of altitude decompression sickness (DCS). In a subgroup of 59 males of mean (S.D) age 31.2 (5.8) years who developed microbubbles during exposure to 26.59 kPa (4.3 psi) under simulated extravehicular activities (EVA), symptoms of DCS occurred in 24 (41 percent) individuals. Spencer grade 1 microbubbles occurred in 4 (7 percent), grade 2 in 9 (15 percent), grade 3 in 15 (25 percent), and grade 4 in 31 (53 percent) of subjects. Survival analysis using Cox proportional hazards regression showed that individuals with less than grade 3 CMB showed 2.46 times (95 percent confidence interval = 1.26 to 5.34) higher risk of symptoms. This information is crucial for defining the risk of DCS for inflight Doppler monitoring under space EVA. Altitude decompression sickness (DCS) occurs when there is acute reduction in ambient pressure. The symptoms of DCS are due to the formation of a free gas phase (in the form of gas microbubbles) in tissues during decompression. Musculo-skeletal pain of bends is the commonest form of DCS in altitude exposures. In the space flight environment, there is a risk of DCS when astronauts decompress from the normobaric shuttle pressure into the hypobaric space suit pressure (currently about 29.65 kPa (4.3 psi) for extra-vehicular activities (EVA). This risk is counterbalanced by a judicious combination of prior denitrogenation and staged decompression. Studies of DCS are limited by the duration of the test at reduced pressure. Since only a proportion of subjects tested develop symptoms, the information on DCS is generally incomplete or 'censored'. Many studies employ Doppler ultrasound monitoring of the precordial area for detecting circulating microbubbles (CMB). Although the association between CMB and bends pain is not causal, CMB are frequently monitored during decompression. In this paper, we examine the association between CMB and symptoms of DCS under simulated EVA profiles. Author (revised)

STRATEGIES AND METHODOLOGIES TO DEVELOP TECHNIQUES FOR COMPUTER-ASSISTED ANALYSIS OF GAS PHASE FORMATION DURING ALTITUDE DECOMPRESSION Abstract Only **c52**

Michael R. Powell and W. A. Hall (Krug Life Sciences, Inc., Houston, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 568 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

It would be of operational significance if one possessed a device that would indicate the presence of gas phase formation in the body during hypobaric decompression. Automated analysis of Doppler gas bubble signals has been attempted for 2 decades but with generally unfavorable results, except with surgically implanted transducers. Recently, efforts have intensified with the introduction of low-cost computer programs. Current NASA work is directed towards the development of a computer-assisted method specifically targeted to EVA, and we are most interested in Spencer Grade 4. We note that Spencer Doppler Grades 1 to 3 have increased in the FFT sonogram and spectrogram in the amplitude domain, and the frequency domain is sometimes increased over that created by the normal blood flow envelope. The amplitude perturbations are of very short duration, in both systole and diastole and at random temporal positions. Grade 4 is characteristic in the amplitude domain but with modest increases in the FFT sonogram and spectral frequency power from 2K to 4K over all of the cardiac cycle. Heart valve motion appears to characteristic display signals: (1) the demodulated Doppler signal amplitude is considerably above the Doppler-shifted blow flow signal (even Grade 4); and (2) demodulated Doppler frequency shifts are considerably greater (often several kHz) than the upper edge of the blood flow envelope. Knowledge of these facts will aid in the construction of a real-time, computer-assisted discriminator to eliminate cardiac motion artifacts. There could also exist perturbations in the following: (1) modifications of the pattern of blood flow in accordance with Poiseuille's Law, (2) flow changes with a change in the Reynolds number, (3) an increase in the pulsatility index, and/or (4) diminished diastolic flow or 'runoff.' Doppler ultrasound devices have been constructed with a three-transducer array and a pulsed frequency generator.

Spaceflight carriers run a constant risk of exposure to vacuum. Above 63,000 ft (47 mmHg), the ambient pressure falls below the vapor pressure of water at 37 C, and tissue vaporization (ebullism) begins. Little is know about appropriate resuscitative protocols after such an ebullism exposure. This study identified injury patterns and mortality rates associated with ebullism while verifying effectiveness of traditional pulmonary resuscitative techniques. Male Hartley guinea pigs were exposed to 87,000 ft for periods of 40 to 115 sec. After descent, those animals that did not breathe spontaneously were given artificial ventilation by bag and mask for up to 15 minutes. Those animals surviving were randomly assigned to one of three treatment groups--hyperbaric oxygen (HBO), ground-level oxygen (GLO2), and ground-level air (GLAIR). The HBO group was treated on a standard treatment table 6A while the GLO2 animals received O2 for an equivalent length of time. Those animals in the GLAIR group were observed only. All surviving animals were humanely sacrificed at 48 hours. Inflation of the animal's lungs after the exposure was found to be difficult and, at times, impossible. This may be due to surfactant disruption at the alveolar lining. Electron microscopy identified a disruption of the surfactant layer in animals that did not survive initial exposure. Mortality was found to increase with exposure time: 40 sec--0 percent; 60 sec--6 percent; 70 sec--40 percent; 80 sec--13 percent; 100 sec--38 percent; 110 sec--40 percent; and 115 sec--100 percent. There was no difference in the delayed mortality among the treatment groups (HBO--15 percent, GLO2--11 percent, GLAIR--11 percent). However, since resuscitation was ineffective, the effectiveness of any post-exposure treatment was severely limited. Preliminary results indicate that reuscitation of guinea pigs following ebullism exposure is difficult, and that current techniques (such as traditional CPR) may not be appropriate. Author (revised)

A PROTOTYPE URINE COLLECTION DEVICE FOR FEMALE AIRCREW **c54**

Roger U. Bisson and Karlyna L. Delger *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 570-573 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

Women are gaining increased access to small military cockpits. This shift has stimulated the search for practical urine containment and disposal methods for female aircrew. There are no external urine collection devices (UCD) for women that are comfortable, convenient, and leak free. We describe a prototype UCD that begins to meet this need. Materials used to make custom aviator masks were adapted to mold a perineal mask. First, a perineal cast (negative) was used to make a mold (positive). Next, a perineal mask made of wax was formed to fit the positive mold. Finally, a soft, pliable perineal mask was fabricated using the wax model as a guide. The prototype was tested for comfort, fit, and leakage. In the sitting position, less than 5 cc of urine leakage occurred with each 600 cc of urine collected. Comfort was mostly satisfactory, but ambulation was limited and the outlet design could lead to kinking and obstruction. We concluded that a perineal mask may serve as a comfortable and functional external UCD acceptable for use by females in confined environments. Changes are needed to improve comfort, fit, and urine drainage. Integration into cockpits, pressure suits, chemical defense gear, and environments where access to relief facilities is restricted is planned. Author (revised)

PROMETHAZINE AND ITS USE AS A TREATMENT FOR SPACE MOTION SICKNESS Abstract Only c52

James P. Bagian and Bradley G. Beck *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 574 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

Until Mar. 1989, no effective treatment--either prophylactic or symptomatic--for space motion sickness (SMS) had been discovered. Since Mar. 1989, intramuscular (IM) promethazine (PMZ) has been used in the treatment of SMS with extremely favorably results reported by the crew. A retrospective study was undertaken to quantify the efficacy of IM PMZ since its institution and the incidence of its major anticipated side-effect drowsiness and sedation. The results from a standardized crew medical debriefing conducted immediately after landing and follow-up interviews with the crews were used in establishing the efficacy and incidence of side effects from treatment. Only crews from the first 44 Shuttle flights on their first mission were considered. For a total of 132 crewmembers, 96 exhibited symptoms of SMS; and, of these, 20 were treated with IM PMZ. Ninety percent of those receiving IM PMZ 25-50mg received nearly immediate (less than 2 hours) relief of symptoms and 75 percent required no further treatment through the first 2 days of spaceflight. Those not receiving this treatment did not have any near-term resolution of their symptoms, and 50 percent were still ill through the second day of flight. This represents a significant difference at the $p = 0.46$ level. In stark contrast to the 60 percent to 73 percent incidence of sedation or drowsiness reported in individuals treated with PMZ in terrestrial environment at the doses used here, less than 5 percent reported these symptoms during spaceflight. IM PMZ is an effective therapy for SMS and is associated with minimal incidence of sedation or drowsiness. This combination of efficacy that is absent of significant side effects represents a substantial improvement in the operational situation of crewmembers afflicted with SMS. Studies to understand the mechanisms underlying these observations will be undertaken in the future. Author (revised)

UPDATE ON THE INCIDENCE AND TREATMENT OF SPACE MOTION SICKNESS Abstract Only c52

Bradley G. Beck *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 575 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

Flight surgeons routinely monitor crew symptoms and treatment of space motion sickness (SMS), not only during flight, but also to obtain information postflight from each crewmember. Recent statistics indicate that the incidence of SMS has not changed since STS-26 in Sep. 1988. The percentages of mild, moderate, and severe cases has only changed slightly. However, the treatment of SMS has significantly changed since STS-26. Scopolamine/dexedrine is no longer used as a prophylaxis for SMS symptoms because of evidence of delay in symptoms. Intramuscular promethazine has been used in more than 30 individuals with a reported decrease in symptoms greater than 90 percent. A delay in symptoms has not been reported, and the duration of certain SMS symptoms has decreased due to use of intramuscular promethazine. Case studies will be discussed and several therapeutic options and doses will be demonstrated. Further treatment possibilities will be examined. Author (revised)

BASELINE CHARACTERISTICS OF DIFFERENT STRATA OF ASTRONAUT CORPS Abstract Only c52

Peggy B. Hamm (Krug Life Sciences, Inc., Houston, TX.) and L. J. Pepper *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 577 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

The Longitudinal Study of Astronaut Health (LSAH) is an epidemiological study designed to study the effects of the occupational exposures incurred by astronauts in health outcomes and changes in physiological variables. Between 1959 and 1991, 195 individuals were selected for the program. The medical standards for selection have remained essentially unchanged since the Mercury Program, but the range and stringency of these criteria have been modified. Demographic and physiological variables identified during the selection year are examined for various strata of the Astronaut Corps. Specifically, age, sex, race, education, usual occupation, military affiliation, medical history, family medical history, visual and hearing measurements, physical exam variables, and specific laboratory values are investigated. Differences are examined in astronauts for the following criteria: (1) were selected prior to 1970 ($n = 73$) versus those selected after 1970 ($n = 122$); (2) have flown multiple missions versus those who have flown less than two missions; (3) have walked in space versus all others; (4) have more than 500 hours of mission time versus all others; and (5) have gone to the Moon versus all others. Length of time served in the Astronaut Corps is examined for each of these strata. Author (revised)

Avail: CASI HC A02/MF A03

The Shuttle experiences unique air contamination problems because of microgravity and the closed environment. Contaminant build-up in the closed atmosphere and the lack of a gravitational settling mechanism have produced some concern in previous missions about the amount of solid and volatile airborne contaminants in the Orbiter and Spacelab. Degradation of air quality in the Orbiter/Spacelab environment, through processes such as chemical contamination, high solid-particulate levels, and high microbial levels, may affect crew performance and health. A comprehensive assessment of the Shuttle air quality was undertaken during STS-40 and STS-42 missions, in which a variety of air sampling and monitoring techniques were employed to determine the contaminant load by characterizing and quantitating airborne contaminants. Data were collected on the airborne concentrations of volatile organic compounds, microorganisms, and particulate matter collected on Orbiter/Spacelab air filters. The results showed that STS-40/42 Orbiter/Spacelab air was toxicologically safe to breathe, except during STS-40 when the Orbiter Refrigerator/Freezer unit was releasing noxious gases in the middeck. On STS-40, the levels of airborne bacteria appeared to increase as the mission progressed; however, this trend was not observed for the STS-42 mission. Particulate matter in the Orbiter/Spacelab air filters was chemically analyzed in order to determine the source of particles. Only small amounts of rat hair and food bar (STS-40) and traces of soiless medium (STS-42) were detected in the Spacelab air filters, indicating that containment for Spacelab experiments was effective. DMES, a volatile liquid, is used by NASA to waterproof the Orbiter thermal protective system. During waterproofing operations at the Orbiter Processing Facility at KSC, workers could be exposed to DMES vapor. To assess the toxicity of DMES, acute and subchronic (2-week and 13-week) inhalation studies were conducted with rats. Studies were also conducted to assess the potential of DMES. Inhalation exposure concentrations ranged from 40 ppm to 4000 ppm. No mortality was observed during the studies. Exposures to 2100 ppm produced narcosis and ataxia. Post-exposure recovery from these CNS effects was rapid (less than 1 hr). These effects were concentration-dependent and relatively independent of exposure length. Exposure to 3000 ppm for 2 weeks (5 h/d, 5 d/wk) produced testicular toxicity. The 13-week study yielded similar results. Results from the genotoxicity assays (in vivo/in vitro unscheduled DNA synthesis in rat primary heptaocytes, chromosomal aberrations in rat bone marrow cells; reverse gene mutation in Salmonella typhimurium; and forward mutation in Chinese hamster culture cells) were negative. These studies indicated that DMES is mildly to moderately toxic but not a multagen. Author (revised)

A COMBUSTION PRODUCTS ANALYZER FOR CONTINGENCY USE DURING THERMODEGRADATION EVENTS ON SPACECRAFT **c54**

Steve Wilson (Krug Life Sciences, Inc., Houston, TX.), Thomas F. Limero (Krug Life Sciences, Inc., Houston, TX.), Steve W. Beck (Krug Life Sciences, Inc., Houston, TX.), and John T. James *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 590-596 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

The Toxicology Laboratory at JSC and Exidyne Instrumentation Technologies (EIT) have developed a prototype Combustion Products Analyzer (CPA) to monitor, in real time, combustion products from a thermodegradation event on board spacecraft. The CPA monitors the four gases that are the most hazardous compounds (based on the toxicity potential and quantity produced) likely to be released during thermodegradation of synthetic materials: hydrogen fluoride (HF), hydrogen chloride (HCl), hydrogen cyanide (HCN), and carbon monoxide (CO). The levels of these compounds serve as markers to assist toxicologists in determining when the cabin atmosphere is safe for the crew to breathe following the contingency event. The CPA is a hand-held, battery-operated instrument containing four electrochemical sensors, one for each target gas, and a pump for drawing air across the sensors. The sensors are unique in their small size and zero-g compatibility. The immobilized electrolytes in each sensor permit the instrument to function in space and eliminate the possibility of electrolye leaks. The sample inlet system is equipped with a particulate filter that prevents clogging from airborne particulate matter. The CPA has a large digital display for gas concentrations and warming signals for low flow and low battery conditions. The CPA has flown on 13 missions beginning with STS 41 in Oct. 1990. Current efforts include the development of a microprocessor, an improved carbon monoxide sensor, and a ground-based test program to evaluate the CPA during actual thermodegradation of selected materials. Avail: CASI HC A01/MF A03

There are numerous problems associated with accommodating complex biological systems in microgravity in the flexible laboratory systems installed in the Orbiter cargo bay. This presentation will focus upon some of the lessons learned along the way from the University laboratory to the IML-1 Microgravity Laboratory. The First International Microgravity Laboratory (IML-1) mission contained a large number of specimens, including: 72 million nematodes, US-1; 3 billion yeast cells, US-2; 32 million mouse limb-bud cells, US-3; and 540 oat seeds (96 planted), FOTRAN. All five of the experiments had to undergo significant redevelopment effort in order to allow the investigator's ideas and objectives to be accommodated within the constraints of the IML-1 mission. Each of these experiments were proposed as unique entities rather than part of the mission, and many procedures had to be modified from the laboratory practice to meet IML-1 constraints. After a proposal is accepted by NASA for definition, an interactive process is begun between the Principal Investigator and the developer to ensure a maximum science return. The success of the five SLSPO-managed experiments was the result of successful completion of all preflight biological testing and hardware verification finalized at the KSC Life Sciences Support Facility housed in Hangar L. The ESTEC Biorack facility housed three U.S. experiments (US-1, US-2, and US-3). The U.S. Gravitational Plant Physiology Facility housed GTHRES and FOTRAN. The IML-1 mission (launched from KSC on 22 Jan. 1992, and landed at Dryden Flight Research Facility on 30 Jan. 1992) was an outstanding success--close to 100 percent of the prelaunch anticipated science return was achieved and, in some cases, greater than 100 percent was achieved (because of an extra mission day). PHYSIOLOGIC MECHANISMS OF CIRCULATORY AND BODY FLUID LOSSES IN WEIGHTLESSNESS IDENTIFIED BY MATHEMATICAL MODELING **c52**

K. E. Simanonok, R. S. Srinivasan (Krug Life Sciences, Inc., Houston, TX.), and J. B. Charles (Space Biomedical Research Inst., Houston, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 598-604 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

Central volume expansion due to fluid shifts in weightlessness is believed to activate adaptive reflexes which ultimately result in a reduction of the total circulating blood volume. However, the flight data suggests that a central volume overdistention does not persist, in which case some other factor or factors must be responsible for body fluid losses. We used a computer simulation to test the hypothesis that factors other than central volume overdistention are involved in the loss of blood volume and other body fluid volumes observed in weightlessness and in weightless simulations. Additionally, the simulation was used to identify these factors. The results predict that atrial volumes and pressures return to their prebedrest baseline values within the first day of exposure to head down tilt (HDT) as the blood volume is reduced by an elevated urine formation. They indicate that the mechanisms for large and prolonged body fluid losses in weightlessness is red cell hemoconcentration that elevates blood viscosity and peripheral resistance, thereby lowering capillary pressure. This causes a prolonged alteration of the balance of Starling forces, depressing the extracellular fluid volume until the hematocrit is returned to normal through a reduction of the red cell mass, which also allows some restoration of the plasma volume. We conclude that the red cell mass becomes the physiologic driver for a large 'undershoot' of the body fluid volumes after the normalization of atrial volumes and pressures. Author

Avail: CASI HC A02/MF A03

Crewmembers on missions to the Moon or Mars will be exposed to radiation belts, galactic cosmic rays, and possibly solar particle events. The potential health hazards due to these space radiations must be considered carefully to ensure the success of space exploration. Because there is no human radioepidemiological data for acute and late effects of high-LET (Linear-Energy-Transfer) radiation, the biological risks of energetic charged particles have to be estimated from experimental results on animals and cultured cells. Experimental data obtained to date indicate that charged particle radiation can be much more effective than photons in causing chromosome aberrations, cell killing, mutation, and tumor induction. The relative biological effectiveness (RBE) varies with biological endpoints and depends on the LET of heavy ions. Most lesions induced by low-LET radiation can be repaired in mammalian cells. Energetic heavy ions, however, can produce large complex DNA damages, which may lead to large deletions and are irreparable. For high-LET radiation, therefore, there are less or no dose rate effects. Physical shielding may not be effective in minimizing the biological effects on energetic heavy ions, since fragments of the primary particles can be effective in causing biological effects. At present the uncertainty of biological effects of heavy particles is still very large. With further understanding of the biological effects of space radiation, the career doses can be kept at acceptable levels so that the space radiation environment need not be a barrier to the exploitation of the promise of space. RADIATION CONSIDERATIONS FOR INTERPLANETARY MISSIONS Abstract Only **c18**

Gautam D. Badwar, Patrick M. ONeill (National Aeronautics and Space Administration. Langley Research Center, Hampton, VA.), and Francis A. Cucinotta (National Aeronautics and Space Administration. Langley Research Center, Hampton, VA.) *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 611 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

Galactic cosmic radiation (GCR) poses a serious radiation hazard for long-duration missions. In designing a lunar habitat or Mars transfer vehicle, the worst-case radiation exposure determines shielding thickness and, hence, the weight of spacecraft. Using the spherically symmetric diffusion theory of the solar modulation of GCR, it was possible to use data on the differential energy spectra of hydrogen, helium, oxygen, and iron from 1954 to 1989 to show that the flux at 1 A.U. is determined by the diffusion parameter, K, which is a function of the time in the solar cycle. This analysis also showed that the solar minimum of 1976 to 1977 was the deepest minimum in the last 37 years. Using this theory, we have obtained the GCR spectra for all the nuclei and calculated the depth-dose as a function of aluminum shield thickness. Using the ICRP-26 definition of the quality factor, it is shown that the shielding required to stay below the LEO recommended annual limit of 50 cSv is 17.5 (+8, -3), g/sq cm of aluminum; if the limit is raised to 60 cSv, the required shielding is 9 (5, -1.5) g/sq cm. We also discuss the issues and shielding needs for protection against solar particle events. Author (revised)

LONGITUDINAL STUDY OF ASTRONAUT HEALTH: MORTALITY IN THE YEARS 1959-1991 Abstract Only **c52**

Leif E. Peterson *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 613 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

We conducted a historical cohort study of mortality among 195 astronauts who were exposed to space and medical sources of radiation between 1959 and 1991. Cumulative occupational and medical radiation exposures were obtained from the astronaut radiation exposure history data base. Causes of death were obtained from obligatory death certificates and autopsy reports that were on file in the medical records. A total of 18 deaths occurred during the 32-year follow-up period for which the all-cause standardized mortality ratio (SMR) was 142 (95 percent confidence interval 84 225). There was one cancer death in the buccal cavity and pharynegeal ICD-9 rubric whose occurrence was significantly beyond expectation. Mortality for coronary disease was 59 percent lower than expected (2 deaths; SMR = 41; 95 percent confidence limit 5 147). The crude death rate for 10 occupationally related accidents was 400 deaths per 100,000 person-years, which is an order of magnitude greater than accidental death rates in mining industries. The SMR of 1027 for fatal accidents was significantly beyond expectation (14 deaths; 95 percent confidence limit 561 1723) and was similar to SMRs for accidents among aerial pesticide applications. The 10-year cumulative risk of occupational fatalities based on the exponential, Weibull, Gompertz, and linear-exponential distributions was 10 percent. Mortality from motor vehicle accidents was slightly higher than expected but was not significant (1 death; SMR = 145; 95 percent confidence limit 2 808). Radiation exposures from medical procedures accounted for a majority of cumulative dose when compared with space radiation exposures. The results of the study do not confirm the impression that astronauts are at increased risk of cancer, but this does not obviate the need for further study. Overall, it was found that astronauts are at a health disadvantage as a result of catastrophic accidents. Author (revised)

OPERATIONAL RADIOLOGICAL SUPPORT FOR THE US MANNED SPACE PROGRAM Abstract Only **c54**

Michael J. Golightly, Alva C. Hardy, William Atwell (Rockwell International Corp., Houston, TX.), Mark D. Weyland (Rockwell International Corp., Houston, TX.), John Kern (Rockwell International Corp., Houston, TX.), and Bernard L. Cash (Lockheed Engineering and Sciences Co., Houston, TX.) *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 614 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

Radiological support for the manned space program is provided by the Space Radiation Analysis Group at NASA/JSC. This support ensures crew safety through mission design analysis, real-time space environment monitoring, and crew exposure measurements. Preflight crew exposure calculations using mission design information are used to ensure that crew exposures will remain within established limits. During missions, space environment conditions are continuously monitored from within the Mission Control Center. In the event of a radiation environment enhancement, the impact to crew exposure is assessed and recommendations are provided to flight management. Radiation dosimeters are placed throughout the spacecraft and provided to each crewmember. During a radiation contingency, the crew could be requested to provide dosimeter readings. This information would be used for projecting crew dose enhancements. New instrumentation and computer technology are being developed to improve the support. Improved instruments include tissue equivalent proportional counter (TEPC)-based dosimeters and charged particle telescopes. Data from these instruments will be telemetered and will provide flight controllers with unprecedented information regarding the radiation environment in and around the spacecraft. New software is being acquired and developed to provide 'smart' space environmental data displays for use by flight controllers. Author (revised)

DEVELOPMENT AND EVALUATION OF A PREDICTIVE ALGORITHM FOR TELEROBOTIC TASK COMPLEXITY **c63**

M. L. Gernhardt, R. C. Hunter, J. C. Hedgecock, and A. G. Stephenson *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 616-625 (For primary document see N94-11527 01-99)

Avail: CASI HC A02/MF A03

There is a wide range of complexity in the various telerobotic servicing tasks performed in subsea, space, and hazardous material handling environments. Experience with telerobotic servicing has evolved into a knowledge base used to design tasks to be 'telerobot friendly.' This knowledge base generally resides in a small group of people. Written documentation and requirements are limited in conveying this knowledge base to serviceable equipment designers and are subject to misinterpretation. A mathematical model of task complexity based on measurable task parameters and telerobot performance characteristics would be a valuable tool to designers and operational planners. Oceaneering Space Systems and TRW have performed an independent research and development project to develop such a tool for telerobotic orbital replacement unit (ORU) exchange. This algorithm was developed to predict an ORU exchange degree of difficulty rating (based on the Cooper-Harper rating used to assess piloted operations). It is based on measurable parameters of the ORU, attachment receptacle and quantifiable telerobotic performance characteristics (e.g., link length, joint ranges, positional accuracy, tool lengths, number of cameras, and locations). The resulting algorithm can be used to predict task complexity as the ORU parameters, receptacle parameters, and telerobotic characteristics are varied. Author (revised)

DESIGN FOR TESTABILITY AND DIAGNOSIS AT THE SYSTEM-LEVEL **c38**

William R. Simpson and John W. Sheppard *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 627-632 (For primary document see N94-11527 01-99)

Avail: CASI HC A02/MF A03

The growing complexity of full-scale systems has surpassed the capabilities of most simulation software to provide detailed models or gate-level failure analyses. The process of system-level diagnosis approaches the fault-isolation problem in a manner that differs significantly from the traditional and exhaustive failure mode search. System-level diagnosis is based on a functional representation of the system. For example, one can exercise one portion of a radar algorithm (the Fast Fourier Transform (FFT) function) by injecting several standard input patterns and comparing the results to standardized output results. An anomalous output would point to one of several items (including the FFT circuit) without specifying the gate or failure mode. For system-level repair, identifying an anomalous chip is sufficient. We describe here an information theoretic and dependency modeling approach that discards much of the detailed physical knowledge about the system and analyzes its information flow and functional interrelationships. The approach relies on group and flow associations and, as such, is hierarchical. Its hierarchical nature allows the approach to be applicable to any level of complexity and to any repair level. This approach has been incorporated in a product called STAMP (System Testability and Maintenance Program) which was developed and refined through more than 10 years of field-level applications to complex system diagnosis. The results have been outstanding, even spectacular in some cases. In this paper we describe system-level testability, system-level diagnoses, and the STAMP analysis approach, as well as a few STAMP applications. Author (revised)

During the past decade, both NASA and the DOD have conducted numerous space servicing studies. These studies have shown that fluid resupply of on-orbit spacecraft is feasible and would allow for extended spacecraft utilization. In order to prove that the studies have validity, an on-orbit flight demonstration of automatic fluid resupply is required. To embark on this flight demonstration, the system concepts, operational procedures, and conceptual service and target vehicles must be identified. Hernandez Engineering, Inc. (HEI), under the direction of the Space Servicing System Project Office of the NASA/JSC New Initiatives Office, has conducted a systems engineering and integration study. The study objective was to develop preliminary concepts for a flight demonstration of automatic rendezvous, proximity operations, capture, and fluid transfer utilizing servicer and target vehicles. The results show that a servicer vehicle/target kit can be launched to orbit with an ELV and automatically rendezvous and dock with the explorer platform (EP). The servicer vehicle can then separate from the EP/kit, perform proximity maneuvers, redock with the EP/kit, and perform fluid transfer operations. After the on-orbit flight demonstration is completed, the servicer/kit can be separated from the EP and be deorbited into the Earth's atmosphere. Author (revised)

PRELIMINARY ANALYSIS OF THE BENEFITS DERIVED TO US AIR FORCE SPACECRAFT FROM ON-ORBIT REFUELING **c12**

Scott Smith *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 637-655 (For primary document see N94-11527 01-99)

Avail: CASI HC A03/MF A03

This analysis was undertaken during FY-91 as a preliminary step to identify potential benefits from refueling Air Force satellites on orbit. Both economic and operational benefits were included. Operational benefits were related in economic terms to allow evaluation. All economic comparisons were made using FY-91 costs. An additional purpose of the effort was to identify the preferred mission parameters, for an on-orbit refueling system. A companion study was being concurrently conducted by SSD/XRP and NASA/JPL to develop a hardware concept for an on-orbit refueling system. The mass estimates for refueling missions obtained from the companion study were used in conducting the economic analyses of this benefits study. For this study, on-orbit refueling was based on the concept developed in the companion JPL study. The concept involves launching an S/C carrying fuel that would be transferred to another 'target' S/C which is already in orbit. The two S/C would then rendezvous, dock, and transfer fuel. Another fluid, such as a cryogenic, might be included if needed by the target S/C. The hardware concept for refueling was intended to minimize costs. The re-fueler S/C was designated to be expendable and would contain only the minimal capabilities. It would be launched into the orbit plane and altitude of the target S/C(s). The re-fueler S/C would rendezvous and dock with the target S/C and the fluid transfer would occur. When the refueling mission was completed, the re-fueler S/C would be ejected from the orbit. In order to optimize launch costs, some missions involved launching two re-fueler S/C on the LV. In this case the second re-fueler S/C would be placed in a storage orbit until needed. IN-SPACE OPERATIONS FOR LUNAR AND MARS SPACE TRANSFER VEHICLES **c66**

James L. Raper, Sr. and Rick C. Vargo (McDonnell-Douglas Space Systems Co., Cocoa Beach, FL.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 657-675 Repr. from AIAA/SAE/ASME/ASEE 28th Joint Propulsion Conference (Nashville, TN, AIAA), 1992 (For primary document see N94-11527 01-99)

(Contract NAS10-11400)

Avail: CASI HC A03/MF A03

The objective of this paper is to discuss the in-space operations required to process the lunar and Mars mission vehicles envisioned for the Space Exploration Initiative (SEI). Recent studies, which have examined the degree to which on-orbit operations change as a function of the Earth-to-orbit (ETO) launch vehicle size, identified a common set of on-orbit vehicle processing tasks, and generated functional requirements for in-space processing nodes are summarized in this paper. Timelines for on-orbit processing of two different lunar transfer vehicles (LTV's) were developed to compare a 'current practice,' labor-intensive EVA approach to ones utilizing telerobotics and advanced automation. LTV aerobrake concepts ranging from simple deployment to considerable assembly are compared. Similar timelines for the on-orbit processing of a nuclear Mars transfer vehicle (MTV) are also presented. Aerobrakes can be processed in a timely manner and should not be ruled out for SEI missions. The 'tall pole' time interval for on-orbit vehicle initial processing is the delivery of elements to orbit, not the processing tasks. Author (revised)

IN-SPACE ASSEMBLY-SERVICING REQUIREMENTS c66

Charles E. Cockrell *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 676-689 Repr. from AIAA/SAE/ASME/ASEE 28th Joint Propulsion Conference and Exhibit (Nashville, TN, AIAA), 1992 Previously announced in IAA as A92-38165 (For primary document see N94-11527 01-99)

Avail: CASI HC A03/MF A03

A method for developing the requirements for in-space assembly, servicing, and checkout of the proposed Mars space transfer vehicles is discussed. Required in-space operations and functions are identified in relation to various Earth to Orbit (ETO) vehicles by looking at the manifesting options of baseline Mars Space Transfer Vehicles (STV). Each operation is then reduced to a minimum complexity state resulting in a set of operational primitive functions. These primitive functions are used to assess the tradeoffs between robotic, telerobotic, and EVA operations. The study demonstrates that the complexity of the in-space operations remains stable with ETO vehicle size, and therefore the functions, and ultimately the infrastructure required to support proposed missions, are relatively unaffected by varying the ETO vehicle size within the range considered for this study. FORECASTING THE IMPACT OF VIRTUAL ENVIRONMENT TECHNOLOGY ON MAINTENANCE TRAINING c53

Mark S. Schlager, Duane Boman, Tom Piantanida, and Robert Stephenson (Aerospace Medical Research Labs., Brooks AFB, TX.) *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 691-699 Sponsored in part by AF (For primary document see N94-11527 01-99)

Avail: CASI HC A02/MF A03

To assist NASA and the Air Force in determining how and when to invest in virtual environment (VE) technology for maintenance training, we identified possible roles for VE technology in such training, assessed its cost-effectiveness relative to existing technologies, and formulated recommendations for a research agenda that would address instructional and system development issues involved in fielding a VE training system. In the first phase of the study, we surveyed VE developers to forecast capabilities, maturity, and estimated costs for VE component technologies. We then identified maintenance tasks and their training costs through interviews with maintenance technicians, instructors, and training developers. Ten candidate tasks were selected from two classes of maintenance tasks (seven aircraft maintenance and three space maintenance) using five criteria developed to identify types of tasks most likely to benefit from VE training. Three tasks were used as specific cases for cost-benefit analysis. In formulating research recommendations, we considered three aspects of feasibility: technological considerations, cost-effectiveness, and anticipated R&D efforts. In this paper, we describe the major findings in each of these areas and suggest research efforts that we believe will help achieve the goal of a cost-effective VE maintenance training system by the next decade. ON-ORBIT SERVICING FOR USAF SPACE MISSIONS: A PHASED DEVELOPMENT APPROACH Abstract Only c66

Bill Shanney *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 700 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

On-orbit servicing has been studied for years by the U.S. Air Force Space Systems Division--which recently cosponsored the Space Assembly, Maintenance, and Servicing Study with NASA and SDIO; but an Air force servicing program has yet to emerge. The Air Force has a limited set of servicing requirements, and the practices of 'pipelining' (incremental improvements to a space vehicle series) and orbital sparing provide many similar benefits. It is postulated that an Air Force Program will be initiated in response to a new critical mission requirement that calls for a spacecraft with the operational character of a Servicer, which will evolve into a servicing program. Such a requirement may be emerging. The Air Force organizations charged with on-orbit test safety for the Department of Defense are concerned with the hazard from uncontrolled reentry of low Earth orbit test spacecraft, which are increasing in number. Analysis and observations of actual reentries show that debris reaches the Earth's surface. A phased development of a system to remove these spacecraft from orbit can evolve into a servicing program. ASSURED MISSION SUPPORT SPACE ARCHITECTURE (AMSSA) STUDY Abstract Only c66

Rob Hamon *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 702 (For primary document see N94-11527 01-99)

Avail: CASI HC A01/MF A03

The assured mission support space architecture (AMSSA) study was conducted with the overall goal of developing a long-term requirements-driven integrated space architecture to provide responsive and sustained space support to the combatant commands. Although derivation of an architecture was the focus of the study, there are three significant products from the effort. The first is a philosophy that defines the necessary attributes for the development and operation of space systems to ensure an integrated, interoperable architecture that, by design, provides a high degree of combat utility. The second is the architecture itself; based on an interoperable system-of-systems strategy, it reflects a long-range goal for space that will evolve as user requirements adapt to a changing world environment. The third product is the framework of a process that, when fully developed, will provide essential information to key decision makers for space systems acquisition in order to achieve the AMSSA goal. It is a categorical imperative that military space planners develop space systems that will act as true force multipliers. AMSSA provides the philosophy, process, and architecture that, when integrated with the DOD requirements and acquisition procedures, can yield an assured mission support capability from space to the combatant commanders. An important feature of the AMSSA initiative is the participation by every organization that has a role or interest in space systems development and operation. With continued community involvement, the concept of the AMSSA will become a reality. In summary, AMSSA offers a better way to think about space (philosophy) that can lead to the effective utilization of limited resources (process) with an infrastructure designed to meet the future space needs (architecture) of our combat forces. DEFINITION OF SPACECRAFT STANDARD INTERFACES BY THE NASA SPACE ASSEMBLY AND SERVICING WORKING GROUP (SASWG) c66

Robert Radtke (Tracor Applied Sciences, Inc., Kingwood, TX.), Charles Woolley, and Lana Arnold (Lockheed Engineering and Sciences Co., Houston, TX.) *In its* Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993

p 703-707 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

The purpose of the NASA Space Assembly and Servicing Working Group (SASWG) is to study enabling technologies for on-orbit spacecraft maintenance and servicing. One key technology required for effective space logistics activity is the development of standard spacecraft interfaces, including the 'Basic Set' defined by NASA, the U.S. Space Command, and industry panelists to be the following: (1) navigation aids; (2) grasping, berthing, and docking; and (3) utility connections for power, data, and fluids. Draft standards have been prepared and referred to professional standards organizations, including the AIAA, EIA, and SAE space standards committee. The objective of the SASWG is to support these committees with the technical expertise required to prepare standards, guidelines, and recommended practices which will be accepted by the ANSI and international standards organizations, including the ISO, IEC, and PASC. THE GUIDE TO DESIGN FOR ON-ORBIT SPACECRAFT SERVICING (DFOSS) MANUAL: PRODUCING A CONSENSUS DOCUMENT c82
Janice Nyman *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 708-715 (For primary document see N94-11527 01-99)
Avail: CASI HC A02/MF A03

Increasing interaction and changing economies at the national and international levels have accelerated the call for standardization in space systems design. The benefits of standardization--compatibility, interchangeability, and lower costs--are maximized when achieved through consensus. Reaching consensus in standardization means giving everyone who will be affected by a standard an opportunity to have input into creating that standard. The DFOSS manual was initiated with the goal of developing standards through consensus. The present Proposed Guide derives from work begun by the Space Automation and Robotics Center (SpARC), a NASA Center for the Commercial Development of Space, and has continued as a standards project through the American Institute of Aeronautics and Astronautics (AIAA). The Proposed Guide was released by AIAA in Jan. 1992 for sale during a one-year, trial-use period. DFOSS is a response to the need for one document that contains all the guidelines required by on-orbit spacecraft servicing designers for astronaut extravehicular activity and/or telerobotic servicing. The manual's content is driven by spacecraft design considerations, and its composition has been achieved by interaction and cooperation among government, industry, and research organizations. While much work lies ahead to maximize the potential of DFOSS, the Proposed Guide represents evidence of the benefits of industry-wide consensus, points the way for broader application, and provides an example for similar projects. THE NATIONAL LAUNCH SYSTEM ADVANCED DEVELOPMENT PROGRAM: A BRIEF OVERVIEW c15
J. A. Battenburg *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 716-717 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

A broad-based Advanced Development Program is being conducted to modernize the technological base and support the systems design of the National Launch System. While the principal concentration of efforts has been in propulsion, significant work is being accomplished in all of the disciplinary areas associated with space launch. Tasks are selected that offer reduced costs, increased reliability, and enhanced operability with anticipated task completion times which are consistent with NLS development. Author (revised)

SUPERVISED AUTONOMOUS CONTROL, SHARED CONTROL, AND TELEOPERATION FOR SPACE SERVICING c37
Paul G. Backes *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 720-731 Sponsored by NASA, Washington (For primary document see N94-11527 01-99)
Avail: CASI HC A03/MF A03

A local-remote telerobot system for single- and dual-arm supervised autonomy, shared control, and teleoperation has been demonstrated. The system is composed of two distinct parts: the local site, where the operator resides; and the remote site, where the robots reside. The system could be further separated into dual local sites communicating with a common remote site. This is valuable for potential space missions where a space based robotic system may be controlled either by a space based operator or by a ground based operator. Also, multiple modes of control integrated into a common system are valuable for satisfying different servicing scenarios. The remote site single arm control system is described, and its parameterization for different supervised autonomous control, shared control, and teleoperation tasks are given. Experimental results are also given for selected tasks. The tasks include compliant grasping, orbital replacement unit changeout, bolt seating and turning, electronics card removal and insertion, and door opening. Author (revised)

SPACE STATION MAINTENANCE STUDIES USING PLAID GRAPHICS Abstract Only c61
Mary E. Helm *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 732 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

The Graphics Analysis Facility (GRAF) has been used frequently to study extravehicular activity (EVA) maintenance scenarios on Space Station Freedom. The ability to use 3-dimensional visualization gives one a more accurate estimate of the Space Station environment. Moreover, human EVA and robotic kinematics can be accurately simulated for volumetric reach and collision detection analysis. An animation of this kind was developed for a research group at JSC to study and discover problem areas involved with doing external Space Station maintenance tasks. On the EVA side, it was discovered that items such as handholds and temporary restraint mechanisms should more effectively facilitate EVA movement about the Space Station structure for the suited personnel. Issues concerning CETA cart configuration, PWP storage locations, and locations of EVA storage areas were also identified by use of the animation. In the area of EVA versus robotics, it was found that there is a strong desire to make EVA and robotics interfaces compatible on items such as replacement units and unpressurized logistics carriers. The animation also showed that the use of robotics within an EVA task increases the difficulty and duration of the task setup, leaving less time available for the maintenance task itself. Graphics animation provides a mechanism to simultaneously analyze several mission parameters (i.e., EVA reach, volumetric analysis, and task timelines), and thus, it has proven to be an effective method for mission evaluation. ROBOTIC SERVICING ON EARTH ORBITING SATELLITES Abstract Only c18
Stanford Ollendorf *In* NASA. Johnson Space Center, Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), Volume 2 Feb. 1993 p 733 (For primary document see N94-11527 01-99)
Avail: CASI HC A01/MF A03

An articulated calibration experiment (ACE) concept study was conducted by GSFC to prove the feasibility of instrument calibration by a resident robot on the EOS spacecraft. This study provided a basis for determining the most suitable robot design and operations concepts required to perform accurate instrument calibration on the EOS platform. During the study, the first-order dynamics of robot walking and docking motions as it moves about were evaluated to determine the accelerations and torques imparted into the spacecraft. The major perturbation to the spacecraft was the effect of robot motion and impact on the EOS platform attitude control system. If not carefully controlled, these levels could exceed the maximum allowable levels. As a result of the EOS/ACE feasibility study, a GSFC robotic ground development effort was established. This effort, as described on the paper, will identify the technology required to resolve issues associated with robot in-space servicing dynamics and its impact on spacecraft and designs. Of primary concern are those relating to robot contact loads, docking of robotic systems on space platforms, and basic motion and mobility. Author (revised)

AGARD HIGHLIGHTS 92/2, SEPTEMBER 1992

Sep. 1992 36 p

(AGARD-Highlights-92/2) Avail: CASI HC A03/MF A01

Highlights of the activities of the Advisory Group for Aerospace Research & Development (AGARD) are presented. Articles addressing the award of the von Karman Medal and the Scientific Achievement Award for 1992 are included along with a review of the 'Open Skies' negotiations in Vienna, the role of the Independent European Programme Group (IEPG), and EUCLID (European Cooperation for the Long Term in Defense). NRL REVIEW FOR 1993

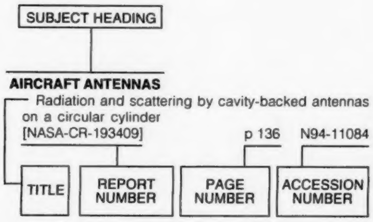
1993 286 p Limited Reproducibility: More than 20% of this document may be affected by microfiche quality

(AD-A265666; NRL/PU/5230-92-235) Avail: CASI HC A13

Recent research projects at NRL are presented: opioid peptides--X-ray characterization of two potent enkephalin analogs; ultrathin magnetic film research at NRL; communicating with chaos; trans-oceanic acoustic propagation and global warming; acoustics--electroacoustic transducer transient suppression--BiKR-A range-dependent, normal-mode reverberation model for bistatic geometries; predicting acoustic signal distortion in shallow water; chemical/biochemical research--development of polyurethane/epoxy based interpenetrating polymer networks for damping applications; ultrafast photochemical processes; chemical adhesion across composite interfaces; nanocapillarity in fullerine tubules; and neuronal patterning. DTIC

SUBJECT INDEX

Typical Subject Index Listing



The subject heading is a key to the subject content of the document. Titles, report numbers, and accession numbers of pertinent documents are provided under each subject heading. When the title is insufficiently descriptive of the document content, a title extension is added, separated from the title by three hyphens. The report number helps to indicate the type of document cited (e.g., NASA report, NASA translation, NASA contractor report). The accession number is the number by which the document abstracts are arranged in this journal and by which the document is sold or requested. The page number helps you locate the citation in the abstract section. The titles, with title extensions if present, are arranged under each subject heading in ascending accession number order. The subject headings have been selected from the latest revision of the *NASA Thesaurus*.

A

A STARS
The abundances of the elements in sharp-lined early type stars [NASA-CR-194055] p 424 N94-12573

AEROACOUSTICS

Control of jet noise
[NASA-CR-193612] p 358 N94-11176

Direct numerical simulation of hot jets
p 156 N94-12295

AEROASSIST

Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930

AERODYNAMIC CHARACTERISTICS

Aerodynamic and aerothermal challenges for the design of the Hermes spaceplane p 3 N94-10423

Experimental results in aerodynamic stability and control of a TSTO configuration p 3 N94-10424

In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427

Planetary entry vehicle design for planned and potential ESA missions to Titan, Mars, and Earth return (FGE TN 51/92) p 4 N94-10428

Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics: CFD Workshop on GK Airfoil and ONERA M5 Geometry
[NAL-SP-20] p 10 N94-10466

Description of 2D problem: Aerodynamic analysis of Garabedian-Korn 75-06-12 airfoil p 10 N94-10467

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-2] p 10 N94-10468

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-3] p 10 N94-10469

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Computation using q-omega 2 equation turbulence model
[PAPER-2D-4] p 10 N94-10470

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoils: Computation using Baldwin-Lomax turbulence model
[PAPER-2D-5] p 11 N94-10471

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft
[PAPER-2D-7] p 11 N94-10472

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-8] p 11 N94-10473

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-9] p 11 N94-10474

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Compendium of results p 11 N94-10475

Description of 3D problem: Flow analysis around ONERA model M5 configuration p 11 N94-10476

Flow analysis around ONERA model M5 configuration
[PAPER-3D-1] p 11 N94-10477

Flow analysis around ONERA model M5 configuration
[PAPER-3D-2] p 12 N94-10478

Flow analysis around ONERA model M5 configuration
[PAPER-3D-3] p 12 N94-10479

Flow analysis around ONERA model M5 configuration
[PAPER-3D-4] p 12 N94-10480

Flow analysis around ONERA model M5 configuration
[PAPER-3D-5] p 12 N94-10481

Flow analysis around ONERA model M5 configuration: Compendium of results p 12 N94-10482

Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820

New aerodynamic information obtained from the solution of the inverse problem for aerofoils
[NAL-TR-1172] p 14 N94-10860

Nonlinear and dynamic analysis of flight
p 32 N94-11496

AERODYNAMIC DRAG

Method of reducing drag in aerodynamic systems
[NASA-CASE-LEW-14791-1] p 12 N94-10672

Simulated and experimental aerodynamic characteristics of tapered annular wings
[NAL-TR-1157] p 13 N94-10856

AERODYNAMIC HEAT TRANSFER

Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431

AERODYNAMIC HEATING

Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820

Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930

Depletions of sulfur and/or zinc in IDPs: Are they reliable indicators of atmospheric entry heating?
p 433 N94-12261

AERODYNAMIC INTERFERENCE

Wall interference correction based on interface measurements in subsonic wind tunnel testing
p 15 N94-11154

Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615

AERODYNAMIC LOADS

Nonlinear aspects of transonic aeroelasticity
p 2 N94-10357

NASTRAN modeling of flight test components for UH-60A airloads program test configuration
[NASA-CR-193614] p 186 N94-10937

Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity
[DE93-011597] p 263 N94-11173

Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499

Nonlinear aspects of transonic aeroelasticity
[UTIAS-RN-345] p 15 N94-11857

General aviation aircraft-normal acceleration data analysis and collection project
[AD-A265055] p 26 N94-11858

AERODYNAMIC NOISE

Direct numerical simulation of hot jets
p 156 N94-12295

AERODYNAMIC STABILITY

Experimental results in aerodynamic stability and control of a TSTO configuration p 3 N94-10424

Extraction of stability and control derivatives from orbiter flight data
[NASA-TM-4500] p 13 N94-10707

Physics of forebody flow control
[NASA-CR-193626] p 15 N94-11195

Stability in Aerospace Systems
[AGARD-R-789] p 31 N94-11489

Stability analysis and aerospace vehicle dynamics
p 31 N94-11491

On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances
p 31 N94-11492

X-29: Longitudinal instability at high angle-of-attack
p 33 N94-11504

AERODYNAMIC STALLING

Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889

AERODYNAMICS

Aeronautical engineering: A continuing bibliography with indexes (supplement 293)
[NASA-SP-7037(293)] p 1 N94-10420

Summary of research in progress at ICASE
[NASA-CR-191481] p 318 N94-11198

Flight Dynamics Directorate (FDD) Historically Black Colleges and Universities (HBCU's) database managment system: A user's guide
[AD-A264947] p 419 N94-11288

Experimental software engineering: Seventeen years of lessons in the SEL p 328 N94-11423

Nonlinear and dynamic analysis of flight
p 32 N94-11496

Stability model of the atmosphere p 32 N94-11500

Aeronautical engineering: A continuing bibliography with indexes (supplement 289)
[NASA-SP-7037(289)] p 1 N94-11687

Aeronautical engineering: A continuing bibliography with indexes (supplement 291)
[NASA-SP-7037(291)] p 1 N94-11690

Aeronautical engineering: A continuing bibliography with indexes (supplement 290)
[NASA-SP-7037(290)] p 1 N94-11691

Computational methods for problems in aerodynamics using parallel and vector architectures
[AD-A265626] p 16 N94-12377

AEROELASTICITY

Nonlinear aspects of transonic aeroelasticity
p 2 N94-10357

Determining XV-15 aeroelastic modes from flight data with frequency-domain methods
[NASA-TP-3330] p 25 N94-10935

Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing
[NASA-TM-104269] p 26 N94-11233

Computational algorithms or identification of distributed parameter systems
[AD-A265252] p 331 N94-11680

Nonlinear aspects of transonic aeroelasticity
[UTIAS-RN-345] p 15 N94-11857

AEROEMBOLISM

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543

AEROGELS

Effects of aqueous solution compositions on Aerocapacitor energy density
[DE93-013431] p 140 N94-10309

AERONAUTICAL ENGINEERING

Analysis of the cost evaluation of ESA programmes and comparable national and international programmes
[GTS-92063] p 416 N94-10145

Aeronautical engineering: A continuing bibliography with indexes (supplement 293)
[NASA-SP-7037(293)] p 1 N94-10420

Aeronautical engineering: A continuing bibliography with indexes (supplement 289)
[NASA-SP-7037(289)] p 1 N94-11687

Aeronautical engineering: A continuing bibliography with indexes (supplement 291)
[NASA-SP-7037(291)] p 1 N94-11690

Aeronautical engineering: A continuing bibliography with indexes (supplement 290)
[NASA-SP-7037(290)] p 1 N94-11691

AERONAUTICS

AGARD highlights 92/2, September 1992
[AGARD-HIGHLIGHTS-92/2] p 497 N94-11820

AEROSERVOELASTICITY

Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing
[NASA-TM-104269] p 26 N94-11233

AEROSOLS

Aerosol sampling models survey
[AD-A265903] p 75 N94-10337

User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016

Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359

Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres
[DE93-012236] p 266 N94-11671

A statistical method to determine aerosol path radiance and its application to atmospheric correction for CZCS imagery p 191 N94-11897

Distribution of mineral aerosols over the North Pacific
p 204 N94-11976

Study of climatic effects of cloud-aerosol interaction
p 204 N94-11977

Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978

Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235

AEROSPACE ENGINEERING

Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938

Theoretical investigation of 3-D shock wave turbulent boundary layer interactions
[AD-A265275] p 150 N94-11014

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 17: A comparison of the technical communication practices of Dutch and US aerospace engineers and scientists
[NASA-TM-108987] p 419 N94-11352

AGARD highlights 92/2, September 1992
[AGARD-HIGHLIGHTS-92/2] p 497 N94-11820

NRL review for 1993
[AD-A265666] p 497 N94-12334

AEROSPACE ENVIRONMENTS

Preliminary system design of a Three Arm Capture Mechanism (TACM) flight demonstration article
[NASA-CR-192573] p 177 N94-10341

Fractography handbook of spaceflight metals
[NASA-RP-1291] p 81 N94-10504

The properties of perfluoropolyethers used for space applications
[NASA-TM-106275] p 88 N94-10864

Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350

Effects of solar cell environment on contact integrity
p 49 N94-11387

Investigation of the radiation resistance of triple-junction a-Si:H alloy solar cells irradiated with 1.00 MeV protons
p 50 N94-11391

Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546
An investigation of the near Earth space environments
[AD-A265295] p 278 N94-11828
Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178
Lessons learned from the Long Duration Exposure Facility
[AD-A266026] p 44 N94-12394
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Devices related for thermal control systems used in microgravity p 162 N94-12553
Research and development of cold plate for two phase fluid loop thermal control system p 162 N94-12555

AEROSPACE INDUSTRY
Analysis of the cost evaluation of ESA programmes and comparable national and international programmes
[GTS-92063] p 416 N94-10145
The NASA Lewis Research Center SBIR program: An assessment
[NASA-TM-106205] p 485 N94-10356
Health and safety issues for aerospace workers in the use of advanced materials p 21 N94-10795

AEROSPACE MEDICINE
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375)
[NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376)
[NASA-SP-7011(376)] p 303 N94-10399
Motion and spatial disorientation systems: Special research capabilities
[AD-A265155] p 303 N94-11097
Exercise countermeasures for bed-rest deconditioning
[NASA-TM-103987] p 300 N94-11191
Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235
Promethazine and its use as a treatment for space motion sickness p 312 N94-11550
Update on the incidence and treatment of space motion sickness p 312 N94-11551
Operational radiological support for the US manned space program p 318 N94-11561
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374)
[NASA-SP-7011(374)] p 304 N94-11689
Use of telescience for biomedical research during space flight p 305 N94-11791
Medical care delivery in the US space program p 307 N94-11806
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995
Glycerol-induced hyperhydration p 309 N94-11996
Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998
Fitness, autonomic regulation and orthostatic tolerance p 310 N94-11999
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004
Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

AEROSPACE PLANES
High temperature materials for hypersonic transport p 56 N94-10003
Aerodynamic and aerothermal challenges for the design of the Hermes spaceplane p 3 N94-10423
National Aero-Space Plane: A need for program direction and funding decisions
[GAO/NSIAD-93-207] p 416 N94-10910

AEROSPACE SAFETY
Achievements and challenges of Space Station Freedom's safety review process
[NASA-TM-106199] p 40 N94-10640
Extraction of stability and control derivatives from orbiter flight data
[NASA-TM-4500] p 13 N94-10707

AEROSPACE SYSTEMS
An analysis of the modes and states for generic avionics
[NASA-CR-188253] p 27 N94-10664
The magnitude of impact damage on LDEF materials
[NASA-CR-188258] p 43 N94-10666
On possible applications of smart structures to control of space systems p 45 N94-11342
Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350
Stability in Aerospace Systems
[AGARD-R-789] p 31 N94-11489
Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527
Transfer of training for aerospace operations: How to measure, validate, and improve it p 314 N94-11530
On-orbit servicing for USAF space missions: A phased development approach p 348 N94-11571
Assured Mission Support Space Architecture (AMSSA) study p 348 N94-11573
The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document p 421 N94-11575

AEROSPACE TECHNOLOGY TRANSFER
Solving the essentials of an innovative tennis racket product: Functionality, simplicity, and super-lightweight technology p 65 N94-10068
Considerations for future regional space cooperation p 35 N94-10678

AEROSPACE VEHICLES
A CFD validation roadmap for hypersonic flows p 5 N94-10439
Stability analysis and aerospace vehicle dynamics p 31 N94-11491

AEROTHERMOCHEMISTRY
Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446

AEROTHERMODYNAMICS
Planetary entry vehicle design for planned and potential ESA missions to Titan, Mars, and Earth return (FGE TN 51/92) p 4 N94-10428
Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446
Thermodynamic model of air in chemical equilibrium p 7 N94-10448
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method p 7 N94-10449
Numerical methods for aerothermodynamic design of hypersonic space transport vehicles p 9 N94-10459
Local aerothermal problems during Hermes re-entry p 10 N94-10464
Exergy decrease in shock waves and boundary layers of space launch vehicles
[AD-A265272] p 42 N94-10493
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820
Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930
Computation of hypersonic nosetip heat transfer rates for an M829-like projectile
[AD-A263226] p 16 N94-11870

AFRICAN RIFT SYSTEM
Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya p 281 N94-12073
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya: Petrogenesis p 281 N94-12074
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Petrogenesis p 281 N94-12075
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times p 281 N94-12076

AGE FACTOR
Aviation accident risk for airmen with aphakia and artificial lens implants
[DOT/FAA/AM-93/11] p 303 N94-10813

AGGLOMERATION
Columbus proto-planetesimal dust aggregation experiment p 123 N94-10236

AGGLUTINATION
The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110

AGGREGATES
Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles p 429 N94-12098

AGING
Ar-39 - Ar-40 ages of acapulcoites and lodranites: Evidence for early parent body heating p 281 N94-12083

AGING (BIOLOGY)
The aging military aviator: A review and annotated bibliography
[AD-A265341] p 311 N94-12423

AGING (MATERIALS)
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168

AGING (METALLURGY)
Welding tritium aged stainless steel
[DE93-011782] p 181 N94-11228

AGRICULTURE
The use of ERS-1 SAR data to study surface states p 247 N94-12480
Preliminary ERS-1 assessment for Canadian agriculture and forestry applications p 248 N94-12486
Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490

AIR
Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224

AIR BREATHING ENGINES
A CFD validation roadmap for hypersonic flows p 5 N94-10439
An environmental study of the National Aerospace Plane
[AD-A266071] p 25 N94-10945
Advanced control for airbreathing engines, volume 1: Pratt and Whitney
[NASA-CR-189203] p 29 N94-12270
Advanced control for airbreathing engines, volume 2: General Electric aircraft engines
[NASA-CR-189204] p 29 N94-12271
Advanced controls for airbreathing engines, volume 3: Allison gas turbine
[NASA-CR-189205] p 29 N94-12272

AIR CUSHION LANDING SYSTEMS
Landing Craft Air Cushion (LCAC) crew selection system manual
[AD-A265158] p 313 N94-11098

AIR FILTERS
Spacelab J air filter debris analysis
[NASA-CR-192569] p 301 N94-11201
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553

AIR FLOW
A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study
[AD-A264805] p 152 N94-11519
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616

AIR JETS
Atomization characteristics of a prefilming airblast atomizer
[NAL-TM-644] p 148 N94-10727

AIR LAND INTERACTIONS
The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940

AIR NAVIGATION
National Airspace System operational concept
[DOT/FAA/SE-93/1] p 23 N94-10933

AIR POLLUTION
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016
Control of jet noise
[NASA-CR-193612] p 358 N94-11176
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers
[PB93-181592] p 266 N94-11471
Renewable energy sources 1991, part 3
[DE93-605594] p 263 N94-11505
A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study
[AD-A264805] p 152 N94-11519
A combustion products analyzer for contingency use during thermodegradation events on spacecraft p 318 N94-11555
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE93-014093] p 272 N94-12783

AIR QUALITY
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553

AIR SAMPLING
Aerosol sampling models survey [AD-A265903] p 75 N94-10337
Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers [PB93-181592] p 266 N94-11471
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553

AIR SEA ICE INTERACTIONS
Sea ice: A climate component p 232 N94-11705
Air-sea-ice interactions in the Weddell Sea p 239 N94-11753
Waves and mesoscale features in the marginal ice zone p 240 N94-11757
The seasonal Sea Ice Monitoring and Modelling Site (SIMMS): Using ERS-1 in climate research p 240 N94-11758
Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

AIR TRAFFIC
FAA air traffic activity [AD-A266043] p 22 N94-12397

AIR TRAFFIC CONTROL
National Airspace System operational concept [DOT/FAA/SE-93/1] p 23 N94-10933
Impact of shutting down en route primary radars within CONUS interior [DOT-VNTSC-FAA-93-1] p 23 N94-11626
Evaluation of the capacity and delay benefits of terminal air traffic control automation [AD-A265323] p 24 N94-11863
FAA air traffic activity [AD-A266043] p 22 N94-12397
SATORI: Situation Assessment Through the Re-creation of Incidents [DOT/FAA/AM-93/12] p 38 N94-12567

AIR TRANSPORTATION
A real-time spoken-language system for interactive problem solving [AD-A266046] p 324 N94-11104
Federal Aviation Administration aviation forecasts [AD-A265611] p 2 N94-12578

AIR WATER INTERACTIONS
Preliminary results on backscattering strength from a wind generated bubbly ocean surface [AD-A265006] p 287 N94-10490
ERS-1 studies at the Department of Oceanography from Space, IFREMER/Brest (France) p 233 N94-11712
Latent and sensible heat flux estimated from ERS-1 data p 244 N94-11783
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894
Remote sensing and the air-sea boundary layers p 191 N94-11896
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918
Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919
A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves p 195 N94-11922
Sea surface heat flux in the beginning of the Kuroshio p 195 N94-11923
Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924
Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925
The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940
Air-sea interaction: Fluxes, a review p 201 N94-11955
The Pacific responses exhibited by an OGCM to various wind fields p 202 N94-11964
On the error characteristics of the sea surface temperature observed by satellite p 216 N94-12690
Study on air-sea interactions in the OMLET (Ocean Mixed Layer Experiment) area using satellite remote sensing p 220 N94-12710
Variability of the mixed layer depth in the North Pacific Ocean as calculated by a 3-D semi-analytical mixed layer remote sensing model p 221 N94-12718
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742
Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

AIRBORNE EQUIPMENT
Global monitoring of atmospheric properties by the EOS MODIS [NASA-TM-109237] p 231 N94-11485
The ERS-1/CV 580 SAR cross-calibration experiment: Sault Ste Marie, October 26 - November 2, 1991 p 236 N94-11729
Calibration results for the ERS-1, AIRSAR, and PHARS p 236 N94-11731

AIRBORNE/SPACEBORNE COMPUTERS
Data processing units for eight magnetospheric particle and field sensors [AD-A264403] p 276 N94-11463

AIRCRAFT ACCIDENT INVESTIGATION
Aircraft Accident/Incident Summary Report: Loss of control. Business Express, Inc., Beechcraft 1900C N811BE near Block Island, Rhode Island, December 28, 1991 [PB93-910405] p 22 N94-11044

AIRCRAFT ACCIDENTS
Development and analysis of insulation constructions for aerospace wiring applications p 21 N94-10791
Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813
Aircraft Accident/Incident Summary Report: Loss of control. Business Express, Inc., Beechcraft 1900C N811BE near Block Island, Rhode Island, December 28, 1991 [PB93-910405] p 22 N94-11044

AIRCRAFT ANTENNAS
Radiation and scattering by cavity-backed antennas on a circular cylinder [NASA-CR-193409] p 136 N94-11084

AIRCRAFT COMPARTMENTS
Applications of continuous fiber reinforced thermoplastics in aircraft interiors p 18 N94-10775
Future material development trends for commercial airplane interiors p 21 N94-10792
Future needs in the development of materials for aircraft interiors and equipment p 21 N94-10794
Analytical method for water vapor collection and analysis in aircraft cabin fires [DOT/FAA/CT-TN93/33] p 22 N94-12575

AIRCRAFT CONFIGURATIONS
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics: CFD Workshop on GK Airfoil and ONERA M5 Geometry [NAL-SP-20] p 10 N94-10466
Description of 3D problem: Flow analysis around ONERA model M5 configuration p 11 N94-10476
Flow analysis around ONERA model M5 configuration [PAPER-3D-1] p 11 N94-10477
Flow analysis around ONERA model M5 configuration [PAPER-3D-2] p 12 N94-10478
Flow analysis around ONERA model M5 configuration [PAPER-3D-3] p 12 N94-10479
Flow analysis around ONERA model M5 configuration [PAPER-3D-5] p 12 N94-10481
Flow analysis around ONERA model M5 configuration: Compendium of results p 12 N94-10482
NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937
SAUNA: A system for grid generation and flow simulation using hybrid structured/unstructured grids [ARA-MEMO-370] p 154 N94-11859
Evaluation of the C/EC/KC-135 ground collision avoidance system (GCAS), Study 2 [AD-A265193] p 24 N94-11879
The modelling of aerodynamic flows by solution of the Euler equations on mixed polyhedral grids [ARA-84] p 16 N94-11888

AIRCRAFT CONSTRUCTION MATERIALS
Application of composite materials for production nacelle structures p 56 N94-10006
The application of advanced materials to aircraft nacelle structures p 57 N94-10011
Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023
Cost effectiveness of structural applications of fibre reinforced thermoplastics p 60 N94-10032
Structural material, manufacture, and design requirements for high-temperature fasteners for space plane technologies p 63 N94-10055
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [DOT/FAA/CT-93/3] p 17 N94-10766
New thermoplastic laminating adhesives for the aircraft industry with low heat release and low smoke emission p 17 N94-10767
A new low smoke, low heat release structural foam p 17 N94-10768
Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769
A polyimide foam for advanced fire resistant aircraft applications p 17 N94-10770
A repair patching system for aircraft cargo liners p 17 N94-10771
Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772
A new FR water resistant acoustic insulation material for aircraft p 18 N94-10773
New technology for effective control of flammability in polyolefin fiber/textiles p 18 N94-10774
Advanced phenolic systems for aircraft interiors p 18 N94-10776
The fire properties of insulation bags, as installed and after aircraft operations p 19 N94-10778
Computer-aided molecular design of fire resistant aircraft materials p 19 N94-10779
A non-halogenated, flame retarded polycarbonate p 19 N94-10781
An investigation into aircraft fuselage fire hardening p 19 N94-10782
The OSU heat release rate test using the oxygen consumption principle p 20 N94-10784
Fire resistance and mechanical properties for phenolic prepregs p 20 N94-10786
Developments needed to expand the role of fire modeling in material fire hazard assessment p 20 N94-10787
Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788
Factors that affect OSU thermal performance of aircraft interior materials p 20 N94-10789
Aircraft material fire testing and the creation of an international working group p 21 N94-10790
Future material development trends for commercial airplane interiors p 21 N94-10792
Future needs in the development of materials for aircraft interiors and equipment p 21 N94-10794
Health and safety issues for aerospace workers in the use of advanced materials p 21 N94-10795
Advanced aircraft materials research and development plan p 22 N94-10796
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers [AD-A264079] p 89 N94-11107
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [AD-A266057] p 22 N94-12384
Fatigue in single crystal nickel superalloys [AD-A266116] p 85 N94-12418

AIRCRAFT CONTROL
In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734
Specification and testing for power by wire aircraft [NASA-TM-106232] p 46 N94-10765
Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft [NASA-TP-3356] p 30 N94-11134
Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195
Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251
Stability in Aerospace Systems [AGARD-R-789] p 31 N94-11489
Stability analysis and aerospace vehicle dynamics p 31 N94-11491
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492
Nonlinear and dynamic analysis of flight p 32 N94-11496
Decoupling of aircraft responses p 32 N94-11497
Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499
Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501
Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502
Toward intelligent flight control p 33 N94-11503
X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504
Further studies using matched filter theory and stochastic simulation for gust loads prediction [NASA-TM-109010] p 26 N94-11587

AIRCRAFT DESIGN
High temperature materials for hypersonic transport p 56 N94-10003
Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023
Structural material, manufacture, and design requirements for high-temperature fasteners for space plane technologies p 63 N94-10055

Applications of continuous fiber reinforced thermoplastics in aircraft interiors p 18 N94-10775

Progress in multidisciplinary design optimization at NASA Langley [NASA-TM-107754] p 318 N94-10814

Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft [NASA-TP-3356] p 30 N94-11134

Supersonic airplane study and design [NASA-CR-193219] p 25 N94-11150

Smart structures: A technology for next generation aircraft p 27 N94-11318

The impact of active controls technology on the structural integrity of aeronautical vehicles p 27 N94-11341

Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers [NASA-CR-193569] p 23 N94-11525

Idea of underground airplane p 27 N94-12630

AIRCRAFT DETECTION

Improved Many-On-Many ROUTE software description [DE93-013961] p 334 N94-12608

AIRCRAFT ENGINES

A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience [AGARD-LS-190] p 28 N94-11022

Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251

Advanced control for airbreathing engines, volume 1: Pratt and Whitney [NASA-CR-189203] p 29 N94-12270

Advanced control for airbreathing engines, volume 2: General Electric aircraft engines [NASA-CR-189204] p 29 N94-12271

Advanced controls for airbreathing engines, volume 3: Allison gas turbine [NASA-CR-189205] p 29 N94-12272

AIRCRAFT EQUIPMENT

The radar eye blinded: The USAF and electronic warfare, 1945-1955 [AD-A265494] p 132 N94-10497

Method of reducing drag in aerodynamic systems [NASA-CASE-LEW-14791-1] p 12 N94-10672

AIRCRAFT FUELS

Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels [DE93-009798] p 98 N94-11366

A novel test method for fuel thermal stability [AD-A265853] p 99 N94-12275

Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282

AIRCRAFT GUIDANCE

Toward intelligent flight control p 33 N94-11503

AIRCRAFT HAZARDS

Lee waves: Benign and malignant [NASA-CR-186024] p 283 N94-10725

Practical hazard assessment: An approach to the fire safety p 20 N94-10785

Developments needed to expand the role of fire modeling in material fire hazard assessment p 20 N94-10787

Analytical method for water vapor collection and analysis in aircraft cabin fires [DOT/FAA/CT-TN93/33] p 22 N94-12575

AIRCRAFT ICING

A preliminary study on ice shape tracing with a laser light sheet [NASA-TM-105964] p 174 N94-11132

AIRCRAFT INSTRUMENTS

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

AIRCRAFT LANDING

The Memphis Precision Runway Monitor Program Instrument Landing System final approach study [AD-A266035] p 23 N94-11103

Active landing gear control for improved ride quality during ground roll p 27 N94-11345

AIRCRAFT MAINTENANCE

Environmentally Safe and Effective Processes for Paint Removal [AGARD-R-791] p 126 N94-10613

Paint removal activities in the US Navy p 126 N94-10614

Paint removal activities in Canada p 126 N94-10615

Procedures without danger to the environment and efficiency (PSDEE) for the removal of paint. Point on the French activities concerning the removal of paint p 126 N94-10616

Paint removal activities in Germany p 126 N94-10617

The development of alternative paint removal techniques in the RAF p 126 N94-10618

Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services p 126 N94-10619

Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620

German Air Forces experiences with plastic media blasting and future requirements p 127 N94-10621

Plastic media blasting activities at Hill Air Force Base p 127 N94-10622

Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process p 127 N94-10623

Automated Laser Paint Stripping (ALPS) update p 127 N94-10624

Aquastrip (tm): An innovative paint removal technology p 127 N94-10625

Paint removal and surface cleaning using ice particles p 128 N94-10626

Paint removal using wheat starch blast media p 128 N94-10627

IATA taskforce: Paintstripping p 128 N94-10628

Selectively strippable paint schemes p 128 N94-10629

A repair patching system for aircraft cargo liners p 17 N94-10771

A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience [AGARD-LS-190] p 28 N94-11022

Smart structures: A technology for next generation aircraft p 27 N94-11318

In-flight aircraft structure health monitoring based on smart structures technology p 22 N94-11333

AIRCRAFT MANEUVERS

Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195

Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

A comparison of head-up and head-down display formats during instrument flying tasks [AD-A266140] p 316 N94-11642

AIRCRAFT MODELS

NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937

On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492

Nonlinear and dynamic analysis of flight p 32 N94-11496

Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

Lift enhancement of a wing/strake using pneumatic blowing [AD-A265074] p 26 N94-11872

AIRCRAFT NOISE

Perpendicular blade vortex interaction and its implications for helicopter noise prediction: Wave-number frequency spectra in a trailing vortex for BWI noise prediction [NASA-CR-193623] p 357 N94-10752

AIRCRAFT PERFORMANCE

Nonlinear stability and control study of highly maneuverable high performance aircraft [NASA-CR-193480] p 25 N94-10344

Progress in multidisciplinary design optimization at NASA Langley [NASA-TM-107754] p 318 N94-10814

The Memphis Precision Runway Monitor Program Instrument Landing System final approach study [AD-A266035] p 23 N94-11103

Preliminary supersonic flight test evaluation of performance seeking control [NASA-TM-4494] p 28 N94-11205

Comparing aircraft agility using mahalanobis distances [PB93-175446] p 26 N94-11464

Decoupling of aircraft responses p 32 N94-11497

Stability model of the atmosphere p 32 N94-11500

AIRCRAFT PILOTS

Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813

Correlation of HGU-56/P aircrew helmet fitting with head anthropometric measurements [AD-A264988] p 315 N94-11291

A prototype urine collection device for female aircrew p 317 N94-11549

Aviators, air combat, and combat stress: An Air F orce commander's primer [AD-A265083] p 313 N94-11867

US civil airmen statistics for calendar year 1991 [AD-A266085] p 2 N94-12412

The aging military aviator: A review and annotated bibliography [AD-A265341] p 311 N94-12423

AIRCRAFT SAFETY

Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [DOT/FAA/CT-93/3] p 17 N94-10766

An investigation into aircraft fuselage fire hardening p 19 N94-10782

Practical hazard assessment: An approach to the fire safety p 20 N94-10785

Aircraft material fire testing and the creation of an international working group p 21 N94-10790

Development of a hypermedia knowledge base of aircraft fire safety regulations p 21 N94-10793

Advanced aircraft materials research and development plan p 22 N94-10796

The future of aircraft cabin fire safety p 22 N94-10797

Aircraft Accident/Incident Summary Report: Loss of control. Business Express, Inc., Beechcraft 1900C N811BE near Block Island, Rhode Island, December 28, 1991 [PB93-910405] p 22 N94-11044

Impact of shutting down en route primary radars within CONUS interior [DOT-VNTSC-FAA-93-1] p 23 N94-11626

Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [AD-A266057] p 22 N94-12384

Analytical method for water vapor collection and analysis in aircraft cabin fires [DOT/FAA/CT-TN93/33] p 22 N94-12575

AIRCRAFT STABILITY

Nonlinear stability and control study of highly maneuverable high performance aircraft [NASA-CR-193480] p 25 N94-10344

Aerodynamic model identification of quiet STOL experimental aircraft ASKA from dynamic flight test data [DE93-767967] p 25 N94-10728

Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195

Stability in Aerospace Systems [AGARD-R-789] p 31 N94-11489

Stability analysis and aerospace vehicle dynamics p 31 N94-11491

On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492

Decoupling of aircraft responses p 32 N94-11497

Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499

Stability model of the atmosphere p 32 N94-11500

X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504

AIRCRAFT STRUCTURES

The application of advanced materials to aircraft nacelle structures p 57 N94-10011

Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023

Smart Structures for Aircraft and Spacecraft [AGARD-CP-531] p 68 N94-11317

Smart structures: A technology for next generation aircraft p 27 N94-11318

In-flight aircraft structure health monitoring based on smart structures technology p 22 N94-11333

Structural health monitoring using embedded fibre optic sensors p 22 N94-11334

Fiber-optic sensor systems for measuring strain and the detection of acoustic emissions in smart structures p 71 N94-11337

Aircraft smart structures research in the USAF Wright Laboratory p 72 N94-11343

AIRCRAFT WAKES

Simulated wake characteristics of tapered annular wings by a discrete vortex method [NAL-TR-1156] p 13 N94-10855

AIRFOILS

Nonlinear aspects of transonic aeroelasticity p 2 N94-10357

Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics: CFD Workshop on GK Airfoil and ONERA M5 Geometry [NAL-SP-20] p 10 N94-10466

Description of 2D problem: Aerodynamic analysis of Garabedian-Korn 75-06-12 airfoil p 10 N94-10467

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-2] p 10 N94-10468

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-3] p 10 N94-10469

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Computation using q-omega 2 equation turbulence model [PAPER-2D-4] p 10 N94-10470

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoils: Computation using Baldwin-Lomax turbulence model [PAPER-2D-5] p 11 N94-10471
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft [PAPER-2D-7] p 11 N94-10472
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-8] p 11 N94-10473
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-9] p 11 N94-10474
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Compendium of results p 11 N94-10475
Description of 3D problem: Flow analysis around ONERA model M5 configuration p 11 N94-10476
New aerodynamic information obtained from the solution of the inverse problem for aerofoils [NAL-TR-1172] p 14 N94-10860
Nonlinear aspects of transonic aeroelasticity [UTIAS-RN-345] p 15 N94-11857
Unsteady flow past a NACA 0012 airfoil pitching at constant rates [AD-A265159] p 16 N94-11889

AIRLINE OPERATIONS
A real-time spoken-language system for interactive problem solving [AD-A266046] p 324 N94-11104
Federal Aviation Administration aviation forecasts [AD-A265611] p 2 N94-12578

AIRPORTS
The Memphis Precision Runway Monitor Program Instrument Landing System final approach study [AD-A266035] p 23 N94-11103
Federal Aviation Administration aviation forecasts [AD-A265611] p 2 N94-12578

ALASKA
Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology p 254 N94-12528

ALBEDO
Studies of the net surface radiative flux from satellite radiances during FIFE [NASA-CR-193150] p 230 N94-10953
A simple model of clastic sediments on Mars p 460 N94-12155
Spectral mixing models of S-Type asteroids p 431 N94-12164
Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244

ALCOHOLS
Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels [NASA-TM-106259] p 90 N94-11257

ALERTNESS
Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness [AD-A265657] p 302 N94-12441

ALGAE
An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900
Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution p 214 N94-12677
Mapping of high density area of benthic diatom in Ariake Sea p 222 N94-12720

ALGEBRA
Finite state machine microarchitecture transformations described with relational algebra [MEMO-INF-92-63] p 319 N94-10278
An algebraic approach to incomparable families of formal languages [MEMO-INF-92-82] p 342 N94-10279
Generating function for Clebsch-Gordan coefficients of the SU(sub q)(2) quantum algebra [DE93-613093] p 349 N94-10633
Three-dimensional N = 4 extended supersymmetrical quantum mechanics [DE93-621421] p 412 N94-11164

ALGORITHMS
A reliable stability test for exponential polynomials [MEMO-COSOR-92-48] p 341 N94-10168
Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182
A simplicial approach to integer programming [REPT-93-06] p 322 N94-10355
Object recognition in industrial environment by means of tactile sensor [ITN-93-85200] p 178 N94-10393
Algorithms for the maximum clique problem [MEMO-1101] p 322 N94-10419
Unsupervised splitting rules for neural tree classifiers [AD-A264961] p 338 N94-10487
Optimization algorithms for integer networks with side constraints for application in routing and scheduling [AD-A265254] p 322 N94-10492
A window least squares algorithm for statistical noise smoothing of 2D-ACAR data [DE93-613828] p 395 N94-10537
A new HMM learning algorithm for continuous speech recognition [NHK-SERIAL-413] p 132 N94-10560
Sensor abstractions to support many-robot systems [AD-A265907] p 180 N94-10803
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter [DE93-617741] p 364 N94-10837
Stability by linear processes [NASA-CR-194131] p 323 N94-10862
Finding minimum-quotient cuts in planar graphs [DE93-011675] p 344 N94-10961
Time scale algorithms for an inhomogeneous group of atomic clocks p 356 N94-10998
Fast trigger algorithm for B-events selection [DE93-621452] p 365 N94-11089
Object oriented implementation of adaptive mesh refinement algorithms [DE93-011885] p 325 N94-11112
Node assignment in heterogeneous computing [NASA-CR-4534] p 142 N94-11131
A formally verified algorithm for interactive consistency under a hybrid fault model [NASA-CR-4527] p 326 N94-11188
Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197
Optimisation methods for solving separable nonlinear least squares problems [ISVR-TR-219] p 345 N94-11217
Fuzzification of ASAT's rule based aimpoint selection [AD-A266068] p 43 N94-11223
An improved material interface reconstruction algorithm for Eulerian codes [DE93-011679] p 326 N94-11226
Resolution for Lanczos and Paige-Saunders inverses in tomography [DE93-012312] p 327 N94-11240
Adaptive algorithms for use with digital filters in vibration control p 71 N94-11338
Development and evaluation of a predictive algorithm for telerobotic task complexity p 341 N94-11562
Computational algorithms or identification of distributed parameter systems [AD-A265252] p 331 N94-11680
Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724
An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900
Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973
Atmospheric correction plans for SeaWiFS p 204 N94-11975
Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978
The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981
A new heuristic for set covering problems [INPE-5471-TDI/502] p 333 N94-12358
An optoelectronic graphics display processor [AD-A266011] p 171 N94-12391
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663
Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675
The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713
Optimum selection of spectral channels in the problem of remote sensing of phytoplankton concentration in ocean water p 223 N94-12726
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752
The algorithm of primary production determination p 228 N94-12761
Non-image visible polarization remote sensing of the ocean p 229 N94-12762

ALIGNMENT
Analysis of the alignment of a Schlieren system for tele-operation p 111 N94-10140

ALKALI METALS
Alkali metal for ultraviolet band-pass filter [NASA-CASE-NPO-18433-1-CU] p 381 N94-10657

ALKALIES
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214

ALKALINE BATTERIES
Aluminum based alkaline battery [AD-D015775] p 140 N94-10390

ALKYLATION
Studies in bioorganic chemistry [AD-A265532] p 55 N94-12011

ALLOYING
The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy [DE93-013221] p 84 N94-11488

ALLOYS
Solidification in immiscible systems: The influence of processing conditions on resulting microstructures p 112 N94-10174
Coupled growth of cells and bubbles in directional solidification of succinonitrile-acetone alloys p 118 N94-10206

ALLUVIUM
Classification of Martian deltas p 470 N94-12207

ALPHA DECAY
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres [DE93-012236] p 266 N94-11671

ALPHA PARTICLES
Helium transport scaling law studies [DE93-013487] p 393 N94-11513

ALTERNATING CURRENT
Power losses of a type 2 superconducting slab of arbitrary thickness in the presence of alternating current conductors [DE93-617892] p 396 N94-10716
Large amplitude shape oscillations in a mercury drop using a drop tower [DE93-767972] p 125 N94-10730

ALTERNATING DIRECTION IMPLICIT METHODS
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-9] p 11 N94-10474
Flow analysis around ONERA model M5 configuration [PAPER-3D-1] p 11 N94-10477
Flow analysis around ONERA model M5 configuration [PAPER-3D-5] p 12 N94-10481

ALTIMETERS
Using transponders with the ERS-1 altimeter to measure orbit altitude to +/- 3 cm p 244 N94-11785
Use of ERS-1 wind and wave products in operational meteorology p 250 N94-12502

ALTIMETRY
Removal of orbital error and the local geoid effects from ERS-1 altimeter data p 242 N94-11770
ERS-1 precise orbits and altimetry analysis p 242 N94-11771
Characteristics of arachnoids from Magellan data p 469 N94-12204

ALTITUDE
A method for calculating exact geodetic latitude and altitude [AD-A265783] p 229 N94-10417
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543

ALTITUDE SIMULATION
Use of ultrasound in altitude decompression modeling p 317 N94-11540
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543

ALUMINIDES
The microstructure and mechanical properties of hot worked FeAl intermetallic alloys p 58 N94-10020
Interface reactions of (Ni3Al) ribbons/Al-MMC in ground preparation as preliminary test for microgravity experiments p 123 N94-10237
Hydrogen partitioning and transport in titanium aluminides [NASA-CR-194117] p 76 N94-10713
Production of reactive sintered nickel aluminide [DE93-014434] p 83 N94-11127
Processing, properties, and wear resistance of aluminides [DE93-012186] p 83 N94-11141

ALUMINUM
Interface reactions of (Ni3Al) ribbons/Al-MMC in ground preparation as preliminary test for microgravity experiments p 123 N94-10237
Enhanced stability of magic clusters: A case study of icosahedric Al(sub 12)X, X=B, Al, Ga, C, Si, Ge, Ti, As [DE93-613644] p 395 N94-10386
Aluminum based alkaline battery [AD-D015775] p 140 N94-10390
Dimensional scaling for impact cratering and perforation [NASA-CR-188259] p 42 N94-10665
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials [DE93-008717] p 88 N94-10891

Aluminum and membrane channels
[AD-A265241] p 300 N94-11020

Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199

Aluminum-phosphorus chemistry: Preparation and structural characterization of (Et2AlP(SiMe3)2)2, Et(Cl)2Al(dot)P(SiMe3)3, and i-Bu2(Cl)Al(dot)P(SiMe3)3
[AD-A265268] p 78 N94-11683

Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178

ALUMINUM ALLOYS

Spinforming characteristics of a net shape forming process p 56 N94-10004

Comparison of Al-Fe alloys produced by PFC and USGA techniques p 58 N94-10019

Aluminium-lithium forgings: Properties and potential satellite applications p 58 N94-10021

Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022

Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023

SPF/DB: A manufacturing technique for lightweight structures p 59 N94-10026

Aluminum-beryllium alloys for aerospace applications
p 60 N94-10029

Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it
p 61 N94-10037

Spin-rolling, welding, and heat treatment of aluminium 2219 for Ariane 5 GAM high pressure vessel liners
p 62 N94-10045

Stress relaxation forming of Ariane 5 front skirt outer skin panels p 62 N94-10046

Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063

TEM study of a space processed Al-Al2O3 metallic composite p 75 N94-10186

EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199

On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys
[DE93-617200] p 82 N94-10842

High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition
[DE93-013977] p 398 N94-11115

NiAl alloys for structural uses
[NASA-CR-194113] p 85 N94-12447

ALUMINUM CARBIDES

The reaction between titanium carbide and aluminium carbide in liquid aluminium; a microgravity study
p 123 N94-10238

ALUMINUM COATINGS

Space environmental effects on the integrity of chromic acid anodized coatings
[NASA-CR-191468] p 55 N94-10947

ALUMINUM COMPOUNDS

Aluminum and membrane channels
[AD-A265241] p 300 N94-11020

ALUMINUM ISOTOPES

Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

ALUMINUM NITRIDES

High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition
[DE93-013977] p 398 N94-11115

ALUMINUM OXIDES

New processes for lightweight ceramic matrix composites p 61 N94-10043

Particle attraction effects on the centrifugal casting and extrusion of alumina
[DE93-011559] p 82 N94-10957

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

Prediction of alumina penetration
[DE93-014017] p 95 N94-12610

ALUMINUM SILICATES

Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039

In-situ crystallization of silicate glass films deposited on alpha- Al2O3
[DE93-012969] p 95 N94-12596

ALUMINUM 26

Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022

ALUMINUM 27

Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

ALVEOLI

Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548

AMBIENCE

Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349

AMINES

Resist materials design: Base-catalyzed chemical amplification
[AD-A265286] p 145 N94-11819

AMINO ACIDS

A reexamination of amino acids in lunar soil
p 452 N94-12109

AMORPHOUS MATERIALS

An ultralight carbon-carbon composite with amorphous matrix p 61 N94-10042

Radiation-induced aperiodicity in irradiated ceramics
[DE93-013335] p 91 N94-11698

Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055

Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374

The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase
[AD-A265799] p 94 N94-12381

AMORPHOUS SILICON

Thermal-optical switching of a silicon based interference filter
[AD-A265152] p 174 N94-11095

Polyimide based amorphous silicon solar modules
p 49 N94-11390

Measurement and modeling of the stability of hydrogenated amorphous silicon solar cells and films after intense illumination p 263 N94-11638

AMPLIFICATION

Method and apparatus for polarization-maintaining fiber optical amplification with orthogonal polarization output
[AD-D015756] p 374 N94-10372

Photon number amplification/duplication through parametric conversion p 376 N94-10572

Multiple laser beam combining and phasing using closed-loop control
[DE93-009830] p 175 N94-11283

Development of microstrip gas chambers with multi-chip technology
[DE93-753169] p 367 N94-11509

Resist materials design: Base-catalyzed chemical amplification
[AD-A265286] p 145 N94-11819

AMPLIFIER DESIGN

Wide band 140 GHz TWTA p 132 N94-10514

AMPLITUDE DISTRIBUTION ANALYSIS

Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers
[NASA-CR-193569] p 23 N94-11525

AMPLITUDES

Decay interaction of bulk and surface Langmuir waves
[DE93-617843] p 393 N94-11477

AMPOULES

Concept and design of ampoule for melt growth of gallium arsenide in first mission of space flyer unit
p 107 N94-10115

ANALOG CIRCUITS

Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision
[AD-A265065] p 331 N94-11652

Superconducting SQUID amplifiers for IR detectors and other applications, phase 2
[AD-A265447] p 145 N94-12333

ANALOG TO DIGITAL CONVERTERS

GaAs sigma-delta modulator modeling for Analog to Digital Converters (ADC's)
[AD-A263419] p 144 N94-11516

ANALOGIES

Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids
[DE93-012673] p 412 N94-11162

ANALYTIC FUNCTIONS

The structure of Hilbert flag varieties
[MEMO-1095] p 348 N94-10272

Operator substitution
[MEMO-COSOR-92-51] p 343 N94-10867

ANALYTICAL CHEMISTRY

Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780

ANEMOMETERS

Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

ANGLE OF ATTACK

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-8] p 11 N94-10473

Physics of forebody flow control
[NASA-CR-193626] p 15 N94-11195

Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499

Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

X-29: Longitudinal instability at high angle-of-attack
p 33 N94-11504

Lift enhancement of a wing/strake using pneumatic blowing
[AD-A265074] p 26 N94-11872

ANGLES (GEOMETRY)

Needs for super-smooth surfaces
[DE93-012482] p 382 N94-11242

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment
[NASA-CR-194030] p 139 N94-12778

ANGULAR ACCELERATION

SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523

ANGULAR CORRELATION

Convergent close-coupling calculations of electron-hydrogen scattering
[DE93-610049] p 360 N94-10328

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data
[DE93-613828] p 395 N94-10537

ANGULAR DISTRIBUTION

Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837

ANGULAR MOMENTUM

Calculation of spin-dependent observables in electron-sodium scattering using the coupled-channel optical method
[DE93-610050] p 360 N94-10329

Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method
[DE93-610073] p 360 N94-10331

On local frame fields and fermion dynamics in space with nontrivial topologies
[DE93-617657] p 349 N94-10548

Quantum entropy and uncertainty for two-mode squeezed, coherent and intelligent spin states
p 377 N94-10586

Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603

Accretion disk viscosity and internal waves in disks
p 153 N94-11615

ANGULAR RESOLUTION

The superresolution effect observed through a random medium p 136 N94-11069

ANGULAR VELOCITY

Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837

Instantaneous engine frictional torque: Its components and piston assembly friction
[DE93-011639] p 182 N94-11625

Precession of Uranus and Neptune and their magnetic field p 473 N94-12222

Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

ANHYDRIDES

Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles
p 429 N94-12098

ANISOTROPIC PLATES

Ultrasonic wave interaction with advanced complex materials for nondestructive evaluation applications
[AD-A265704] p 74 N94-12401

ANISOTROPY

From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535

Texture analysis of high Tc superconductors
p 399 N94-11314

Elastic deformations and sound in anisotrope superconductors near critical temperature
[DE93-620636] p 188 N94-11364

Stability and dynamics of spatio-temporal structures
[DE93-011374] p 401 N94-11610

Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism
[DE93-010738] p 401 N94-11646

The physics of pattern formation of liquid interfaces
[DE93-013333] p 154 N94-11814

Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5) [DE93-011359] p 403 N94-12363

Examination of the surface second harmonic response at infrared wavelengths [AD-A265206] p 403 N94-12371

Polar mesospheric waves and structure [AD-A265360] p 279 N94-12561

ANNEALING

Kinetics of high concentration arsenic deactivation at moderate to low temperatures [DE93-013349] p 395 N94-10516

The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation [DE93-617201] p 397 N94-10843

Radiation defect production in InAs crystals under electron irradiation [DE93-617202] p 397 N94-10845

A detailed study of the photo-injection annealing of thermally diffused InP solar cells p 48 N94-11381

High temperature annealing of minority carrier traps in irradiated MOCVD n(+)p InP solar cell junctions p 48 N94-11382

Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells p 50 N94-11392

Chondrite thermal histories from Low-CA pyroxene microstructures: Autometamorphism versus prograde metamorphism revisited p 429 N94-12105

Diffusion length damage coefficient and annealing studies in proton-irradiated InP [NASA-TM-106262] p 404 N94-12430

ANNIHILATION REACTIONS

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data [DE93-613828] p 395 N94-10537

Squeezed colour states in gluon jet p 379 N94-10599

Creation and annihilation of solitons in nonlinear integrable systems [DE93-621379] p 365 N94-11078

ANNUAL VARIATIONS

Statistical study on the regional and seasonal distribution of fog in the far east region by using GMS imagery p 190 N94-11082

Greenland Sea observations p 239 N94-11752

Sea ice radar signatures from ERS-1 SAR during late Summer and Fall in the Beaufort and Chukchi Seas p 240 N94-11756

The seasonal Sea Ice Monitoring and Modelling Site (SIMMS): Using ERS-1 in climate research p 240 N94-11758

One-year mooring of an ADCP in the central region of the Kuroshio west of Okinawa p 194 N94-11913

Seasonal changes of phytoplankton distributions in the Northwest Pacific detected by Coastal Zone Color Scanner p 200 N94-11948

Particle dynamics in the western subarctic Pacific: Implications from CZCS imagery p 200 N94-11950

Availability of wind field over the North Pacific derived from data on ships-of-opportunity and analysis of long-term variabilities p 202 N94-11962

Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990

SSMI wind speed variability over the Pacific Ocean p 207 N94-12637

Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

Pacific rim sea ice as observed with the NIMBUS-7 SMMR p 210 N94-12651

The seasonal change of phytoplankton size distribution using optical fiber sensor p 210 N94-12656

Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658

The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660

A study of front dynamics off northeastern Taiwan based on the NOAA-AVHRR satellite remote sensing data p 215 N94-12684

Satellite thermal variations of Kuroshio in relation to storm floods p 215 N94-12685

Observation of cold coastal water with high turbidity around the southwestern tip of Korean Peninsula p 216 N94-12689

Seasonal variability of surface ocean color in the Omura Bay using multitemporal LANDSAT-5 TM data p 218 N94-12698

Estimation of areal evapotranspiration using LANDSAT TM data: Kitami City, Hokkaido, Japan p 219 N94-12703

Coastal upwelling monitored by satellite data: Methodologies and results p 220 N94-12712

High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

Model of Kuroshio region circulation p 229 N94-12765

ANNULAR FLOW

Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes [NASA-TP-3383] p 15 N94-11133

ANODES

Aluminum based alkaline battery [AD-D015775] p 140 N94-10390

ANODIZING

Space environmental effects on the integrity of chromic acid anodized coatings [NASA-CR-191468] p 55 N94-10947

ANOMALIES

On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822

Special investigation report: Commercial space launch incident, launch procedure anomaly orbital sciences corporation PEGASUS/SCD-1, 80 nautical miles east of Cape Canaveral, Florida, February 9, 1993 [PB93-917003] p 40 N94-11893

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

ANOMALOUS TEMPERATURE ZONES

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

ANTARCTIC OCEAN

Comparisons of ERS-1 altimeter height data and the Fine Resolution Antarctic Model (FRAM) p 235 N94-11725

ANTARCTIC REGIONS

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200

Signatures of Antarctic firn by means of ERS-1 AMI and by field measurements p 237 N94-11737

Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738

Some results of the derivation of ice sheet elevations in Antarctica from ERS-1 altimeter data p 237 N94-11739

Utilisation of ERS-1 data for mapping of Antarctica p 237 N94-11740

Preliminary evaluation of ERS-1 altimetry over Filchner-Ronne Ice Shelf, Antarctica p 238 N94-11742

Validating the UK-PAF land ice product surface elevation p 244 N94-11780

A new carbon-rich phase (COPS) in Antarctic micrometeorites p 432 N94-12233

Facts about the US Antarctic program [NSF-92-134] p 279 N94-12568

ANTENNA ARRAYS

An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008

Multiple Antenna Implementation System (MAntIS) [DE93-012515] p 131 N94-10270

Wideband beamforming for a sparse nonuniform spaced sensor array [AD-A265909] p 133 N94-10660

Radiation and scattering by cavity-backed antennas on a circular cylinder [NASA-CR-193409] p 136 N94-11084

Sampling and position effects in the Electronically Steered Thinned Array Radiometer (ESTAR) [NASA-TM-108998] p 245 N94-12432

ANTENNA COMPONENTS

An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008

Multiple Antenna Implementation System (MAntIS) [DE93-012515] p 131 N94-10270

ANTENNA DESIGN

Multiple Antenna Implementation System (MAntIS) [DE93-012515] p 131 N94-10270

The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587

Design of a matching network for dipole antennas [AD-A265115] p 136 N94-11158

Magnetic Earth Ionosphere Resonant Frequencies (MEIRF) project [NASA-CR-193182] p 276 N94-11355

Conversion of the four-strap array in D3-D to a tunable traveling wave antenna [DE93-012085] p 137 N94-11453

PO/PTD diffraction synthesis of array-fed reflector antennas for satellite and radar applications p 137 N94-11636

Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument [NASA-CR-194376] p 427 N94-12566

ANTENNA RADIATION PATTERNS

Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers [NASA-CR-193569] p 23 N94-11525

ERS-1 preliminary antenna elevation pattern measured by ground-receivers p 235 N94-11727

Design of a continuous resistively loaded monopole antenna [AD-A265852] p 138 N94-12281

ANTENNAS

An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008

Universal adjustable mould for antenna reflectors p 59 N94-10027

Linear antenna of an arbitrary orientation and position in cylindric screen [DE93-621353] p 134 N94-11035

Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130

ANTHROPOMETRY

Head and face anthropometry of adult US civilians [DOT/FAA/AM-93/10] p 315 N94-10806

Correlation of HGU-56/P aircrew helmet fitting with head anthropometric measurements [AD-A264988] p 315 N94-11291

ANTIFERROMAGNETISM

The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3 [DE93-617882] p 395 N94-10525

ANTIMISSILE MISSILES

Fuzzification of ASAT's rule based aimpoint selection [AD-A266068] p 43 N94-11223

ANTINEUTRINOS

On parity conservation and the question of the missing, right-handed neutrino [DE93-613092] p 361 N94-10414

ANTIPROTONS

Indication on the existence of the bound state in the p anti p-system [DE92-641575] p 361 N94-10532

ANTIREFLECTION COATINGS

UV testing of solar cells: Effects of antireflective coating, prior irradiation, and UV source p 53 N94-11408

Preparation of stable photopatternable polymeric materials for non-linear optics [AD-A265359] p 95 N94-12577

APEXES

Finding minimum-quotient cuts in planar graphs [DE93-011675] p 344 N94-10961

Finding a covering triangulation whose maximum angle is provably small [DE93-010691] p 334 N94-12593

APOLLO ASTEROIDS

The 1.2 to 3.5 microns observations of asteroid 4179 Toutatis p 430 N94-12111

APOLLO 17 FLIGHT

Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas p 464 N94-12179

APPALACHIAN MOUNTAINS (NORTH AMERICA)

On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822

APPLICATION SPECIFIC INTEGRATED CIRCUITS

Flexible high-speed CODEC [NASA-CR-191169] p 146 N94-12433

APPLICATIONS PROGRAMS (COMPUTERS)

Massively parallel multifrontal methods for finite element analysis on MIMD computer systems [DE93-009838] p 335 N94-10257

CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels [DE93-012835] p 152 N94-11371

Reuse: A knowledge-based approach p 329 N94-11430

The role of plasma rotation on MHD instabilities in tokamaks [DE93-013486] p 393 N94-11512

Crew chief p 335 N94-11564

Disturbance Impact Assessment System (DIAS), version 2.0. System design document
[AD-A265251] p 138 N94-11883

Transportable Applications Environment (TAE) Tenth Users' Conference
[NASA-CP-3225] p 333 N94-12448

Three-dimensional finite element analysis of explosive safety facilities: A technology assessment
[AD-A265700] p 35 N94-12562

The 1991 version of the plume impingement computer program. Volume 2: User's input guide
[NASA-CR-194191] p 166 N94-12774

The 1991 version of the plume impingement computer program. Volume 1: Description
[NASA-CR-194192] p 166 N94-12775

VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades
[CUED/A-TURBO/TR.128] p 166 N94-12777

VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation
[CUED/A-TURBO/TR.129] p 166 N94-12779

APPROACH CONTROL

Helicopter approach capability using the differential Global Positioning System
[NASA-CR-177618] p 24 N94-12355

APPROPRIATIONS

National Aero-Space Plane: A need for program direction and funding decisions
[GAO/NSIAD-93-207] p 416 N94-10910

APPROXIMATION

A method for calculating exact geodetic latitude and altitude
[AD-A265783] p 229 N94-10417

The Nehari problem for the Pritchard-Salamon class of infinite-dimensional linear systems: A direct approach
[CS-9216] p 344 N94-10905

Finding a covering triangulation whose maximum angle is provably small
[DE93-010691] p 334 N94-12593

Summation by parts, projections, and stability
[NASA-CR-194290] p 346 N94-12776

APTITUDE

Basic attributes test (BAT): Operational pre-implementation analysis and score equating
[AD-A265885] p 314 N94-12276

AQUATIC PLANTS

High-reflectance water mass in Off-Sanriku area observed by CZCS p 200 N94-11951

AQUEOUS SOLUTIONS

Effects of aqueous solution compositions on Aerocapacitor energy density
[DE93-013431] p 140 N94-10309

Studies in bioorganic chemistry
[AD-A265532] p 55 N94-12011

Electrode potential-induced reconstruction of Au(100): Effect of chemisorption on nanoscale dynamics as probed by the in-situ scanning tunneling microscopy
[AD-A265900] p 404 N94-12388

Corrosion and passivation of high temperature superconductors
[AD-A265402] p 405 N94-12586

AQUICULTURE

Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture
p 217 N94-12697

ARABIAN SEA

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

ARAMID FIBERS

Factors that affect OSU thermal performance of aircraft interior materials p 20 N94-10789

ARC HEATING

The upgrading of the arc heated wind tunnel of the DLR (LBK) with respect to its effects on the material testing
p 4 N94-10432

ARC JET ENGINES

Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700

A soft-start circuit for arcjet ignition
[NASA-TM-106287] p 180 N94-10760

Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930

A study of DC-DC converters with MCTs for arcjet power supplies
[NASA-CR-193457] p 142 N94-10931

Development of a high specific 1.5 to 5 kW thermal arcjet
[NASA-CR-193133] p 47 N94-11354

ARC WELDING

Welding tritium aged stainless steel
[DE93-011782] p 181 N94-11228

ARCHITECTURE

Technical Conference on Tropical Urban Climates: Extended Abstracts
[WMO/TD-538] p 283 N94-10561

ARCHITECTURE (COMPUTERS)

Layering techniques for development of parallel systems: An algebraic approach
[MEMO-INF-92-62] p 335 N94-10277

Finite state machine microarchitecture transformations described with relational algebra
[MEMO-INF-92-63] p 319 N94-10278

Optimization algorithms for integer networks with side constraints for application in routing and scheduling
[AD-A265254] p 322 N94-10492

Bringing theory to practice: The reality of interprocessor communication
[DE93-012346] p 336 N94-10738

Efficient partitioning and assignment on programs for multiprocessor execution
[NASA-CR-193458] p 324 N94-10942

Node assignment in heterogeneous computing
[NASA-CR-4534] p 142 N94-11131

Summary of research in progress at ICASE
[NASA-CR-191481] p 318 N94-11198

Neural network model selection using asymptotic jackknife estimator and cross-validation method
[AD-A264960] p 339 N94-11289

Scalable concurrent programming project
[AD-A266097] p 328 N94-11295

Spatial light rebroadcaster architecture study
[AD-A266102] p 382 N94-11421

An introduction to chordal graphs and clique trees
[DE93-012508] p 332 N94-11695

High-performance distributed systems architecture
[AD-A265297] p 337 N94-11829

The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874

Distributed real-time system design: Theoretical concepts and applications
[AD-A265199] p 337 N94-11881

An optoelectronic graphics display processor
[AD-A266011] p 171 N94-12391

ARCTIC OCEAN

Arctic coastal polynya observations with ERS-1 SAR and DMSP SSM/I p 239 N94-11748

ARCTIC REGIONS

Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714

Energy flow in an Arctic aquatic ecosystem
[DE93-013178] p 267 N94-11697

Investigations of Arctic ice-sheets and glaciers using ERS-1 SAR p 238 N94-11743

Summer Arctic ice concentrations and characteristics from SAR and SSM/I data p 241 N94-11762

Arctic geodynamics: Continental shelf and deep ocean geophysics. ERS-1 satellite altimetry: A first look
p 243 N94-11776

ARGON

Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850

ARGON ISOTOPES

Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407

Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021

Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051

Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082

Ar-39 - Ar-40 ages of acapulcoites and lodranites: Evidence for early parent body heating
p 281 N94-12083

Age of Popigai impact event using the Ar-40 - Ar-39 method p 282 N94-12093

On the origin of (4)He and (40)Ar in natural gold
p 87 N94-12240

ARGON PLASMA

Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850

ARIANE LAUNCH VEHICLE

Stress relaxation forming of Ariane 5 front skirt outer skin panels p 62 N94-10046

ARMED FORCES (UNITED STATES)

The radar eye blinded: The USAF and electronic warfare, 1945-1955
[AD-A265494] p 132 N94-10497

Assured Mission Support Space Architecture (AMSSA) study p 348 N94-11573

ARROYOS

Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit
p 281 N94-12084

ARSENIC

Kinetics of high concentration arsenic deactivation at moderate to low temperatures
[DE93-013349] p 395 N94-10516

ARTERIES

Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543

Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

ARTIFICIAL INTELLIGENCE

Functional reasoning, explanation, and analysis
[DE92-526832] p 313 N94-10251

System monitoring and diagnosis with qualitative models
[NASA-CR-193812] p 323 N94-10711

Enhancements to the Engine Data Interpretation System (EDIS)
[NASA-CR-192593] p 180 N94-10815

The development of an interactive synthesis tool for intelligent controllers of modular, reconfigurable robots
p 339 N94-10898

Functional approximation using artificial neural networks in structural mechanics
[NASA-TM-105820] p 188 N94-11254

A recent Cleanroom success story: The Redwing project p 39 N94-11433

Toward intelligent flight control p 33 N94-11503

The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874

Thermal error compensation feasibility study using artificial intelligence
[AD-A266084] p 340 N94-12411

Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session)
[DE93-013470] p 340 N94-12428

Qualitative reasoning about the physical world
[AD-A266117] p 340 N94-12537

ARTIFICIAL SATELLITES

Aluminium-lithium forgings: Properties and potential satellite applications p 58 N94-10021

Satellite situation report, volume 32, no. 1
[NASA-TM-109233] p 42 N94-10562

Satellite situation report, volume 32, no. 2
[NASA-TM-109234] p 42 N94-10563

Satellite situation report, volume 31, no. 4
[NASA-TM-109232] p 39 N94-10659

Maximizing reuse: Applying common sense and discipline p 329 N94-11429

ASCENT

Aerodynamic and aerothermal challenges for the design of the Hermes spaceplane p 3 N94-10423

ASHES

Overwater atmospheric dispersion of volcanic smokes from Mt. Sakurajima observed in NOAA-AVHRR data
p 205 N94-11979

ASIA

Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676

Current status of space activities in Asia Pacific region
p 35 N94-10677

Considerations for future regional space cooperation
p 35 N94-10678

Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694

ASPECT RATIO

Marangoni flows in open cavities with differentially heated end walls p 104 N94-10097

ASSEMBLY LANGUAGE

Simulation of a parallel computer
[NAL-TR-1154] p 335 N94-10368

ASSESSMENTS

Report on Subgroup on Data Banks for Risk Assessment
[DE93-012150] p 418 N94-10646

Computer models used to support cleanup decision-making at hazardous and radioactive waste sites
[PB93-183333] p 274 N94-10698

ASSIMILATION

Assimilation in lunar basalts and volcanic glasses: Implications for a heterogenous mantle source region
p 478 N94-12250

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother
p 209 N94-12648

ASTEROID BELTS

On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance
p 426 N94-11596

Collision lifetimes and impact statistics of near-Earth asteroids p 429 N94-12092

How diverse is the asteroid belt? p 430 N94-12124

Cratering on Gaspra p 459 N94-12147
First results of the seven-color asteroid survey p 430 N94-12162
ASTEROIDS
On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance p 426 N94-11596
Collision lifetimes and impact statistics of near-Earth asteroids p 429 N94-12092
Identification of cometary and asteroidal particles in stratospheric IDP collections p 430 N94-12115
How diverse is the asteroid belt? p 430 N94-12124
Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157
First results of the seven-color asteroid survey p 430 N94-12162
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163
Spectral mixing models of S-Type asteroids p 431 N94-12164
Olivine-rich asteroids, pallasitic olivine and olivine-metal mixtures: Comparisons of reflectance spectra p 431 N94-12171
Deviations from the straight line: Bumps (and grinds) in the collisionally evolved size distribution of asteroids p 431 N94-12201
A method to determine asteroid poles p 431 N94-12205
Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244
ASTRIONICS
An analysis of the modes and states for generic avionics
[NASA-CR-188253] p 27 N94-10664
ASTROMETRY
Statistical description of tectonic motions
[NASA-CR-193701] p 275 N94-10950
Pulsar astrometry by using VLBI (PSR0329 between Kashima 26mPhi and Usuda 64mPhi) p 351 N94-10968
Tropospheric and ionospheric effects on differential astrometry with a ground-space based VLBI array p 136 N94-11070
ASTRONAUT PERFORMANCE
Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539
ASTRONAUT TRAINING
Transfer of training for aerospace operations: How to measure, validate, and improve it p 314 N94-11530
ASTRONAUTS
Measuring human performance on NASA's microgravity aircraft p 317 N94-11537
A mechanism for the reduction in risk of decompression sickness in microgravity environment p 312 N94-11545
Baseline characteristics of different strata of astronaut corps p 312 N94-11552
Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560
ASTRONOMICAL INTERFEROMETRY
Propagation Effects in Space VLBI p 134 N94-11060
Generalization of Dyson criterion for the amplitude-phase fluctuations case and for the system of interferometers p 135 N94-11067
The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068
An interferometric spectral mapper for the Cassini mission to Saturn and Titan
[NASA-CR-193805] p 482 N94-12429
ASTRONOMICAL MODELS
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507
Planck scale effects on the Majoron
[DE93-613120] p 410 N94-10545
On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance p 426 N94-11596
Deviations from the straight line: Bumps (and grinds) in the collisionally evolved size distribution of asteroids p 431 N94-12201
A method to determine asteroid poles p 431 N94-12205
ASTRONOMICAL PHOTOMETRY
Physical studies of planetary and satellite surfaces
[NASA-CR-193545] p 434 N94-10817
A method to determine asteroid poles p 431 N94-12205
Disk-resolved spectral characteristics of Saturn's medium-sized satellites p 471 N94-12213
ASTRONOMICAL POLARIMETRY
Dust in the Martian atmosphere: Polarimetric sensing p 473 N94-12223
ASTRONOMICAL SPECTROSCOPY
A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053
Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244
ASTRONOMY
Advanced statistical methods for improved data analysis of NASA astrophysics missions
[NASA-CR-193514] p 425 N94-10943
Project TIMS (Teaching Integrated Math/Science)
[NASA-CR-194288] p 416 N94-11599
ASTROPHYSICS
Advanced statistical methods for improved data analysis of NASA astrophysics missions
[NASA-CR-193514] p 425 N94-10943
VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066
ASYMPTOTIC METHODS
Asymptotic expressions for regular Green functions of a round cylindrical screen
[DE93-621356] p 134 N94-11038
ASYMPTOTIC SERIES
On the possible unobservability of the Wu-Yang phase factor in curved space
[DE93-617645] p 411 N94-10831
Applications of multivariate analysis
[AD-A265250] p 347 N94-11882
ATLANTIC OCEAN
ERS-1 radar altimetry over the North Atlantic p 242 N94-11772
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918
ATMOSPHERIC ATTENUATION
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750
ATMOSPHERIC BOUNDARY LAYER
Development of a balloon-borne stabilized platform for measuring radiative flux profiles in the atmospheric boundary layer
[DE93-013186] p 274 N94-10323
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer
[DE93-011950] p 275 N94-11052
Large eddy simulations of the atmospheric boundary layer east of the Colorado Rockies p 277 N94-11465
The impact of vegetation on the atmospheric boundary layer and convective storms p 277 N94-11480
Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment
[NASA-CR-193829] p 285 N94-11598
An atmospheric boundary layer stability estimator for urban areas
[AD-A265189] p 279 N94-12422
Estimations of the surface fluxes from satellite observations of boundary layer and the surface p 252 N94-12513
ATMOSPHERIC CHEMISTRY
Review of SHARC 2.0 O3 kinetics and spectroscopy
[AD-A265481] p 274 N94-10496
Environmental Sciences Division
[DE93-013865] p 264 N94-10650
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016
The Air Force Interactive Meteorological System: A research tool for satellite meteorology
[AD-A265957] p 284 N94-11113
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
Global monitoring of atmospheric properties by the EOS MODIS
[NASA-TM-109237] p 231 N94-11485
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres
[DE93-012236] p 266 N94-11671
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246
DMS emissions from Sphagnum-dominated wetlands p 271 N94-12466
Emissions of biogenic sulfur gases from northern bogs and fens p 271 N94-12467
Sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12470
Stratospheric aircraft exhaust plume and wake chemistry
[NASA-CR-191495] p 279 N94-12572
ATMOSPHERIC CIRCULATION
Preliminary validation of the low frequency variability of tropospheric temperature and circulation simulated for the AMIP by the ECMWF model
[DE93-012382] p 284 N94-10739
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer
[DE93-011950] p 275 N94-11052
A toolkit for building Earth system models
[DE93-012147] p 276 N94-11138
The impact of vegetation on the atmospheric boundary layer and convective storms p 277 N94-11480
Stability model of the atmosphere p 32 N94-11500
An overview of intertropical convergence and intertropical discontinuity
[DE93-619229] p 277 N94-11603
Wind system documentation
[DE93-010381] p 285 N94-11664
Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044
A study of the Merritt Island, Florida sea breeze flow regimes and their effect on surface heat and moisture fluxes
[NASA-CR-4537] p 286 N94-12580
ATMOSPHERIC COMPOSITION
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-193189] p 274 N94-10701
Satellite observation of atmospheric tracer components: JEM/POP p 130 N94-11836
Study of climatic effects of cloud-aerosol interaction p 204 N94-11977
An observational search for CO2 ice clouds on Mars p 441 N94-12054
Geomorphology of Triton's polar materials p 466 N94-12185
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
Studies of dynamical processes affecting the distribution of stratospheric ozone
[NASA-CR-193477] p 279 N94-12560
ATMOSPHERIC CORRECTION
Atmospheric correction of AVIRIS data in ocean waters
[AD-A264931] p 288 N94-11287
A statistical method to determine aerosol path radiance and its application to atmospheric correction for CZCS imagery p 191 N94-11897
Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898
Atmospheric correction plans for SeaWiFS p 204 N94-11975
Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978
The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981
Validation of the ATSR/M microwave radiometer data p 252 N94-12511
ATSR correlative skin measurements of sea surface temperature p 252 N94-12514
A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750
ATMOSPHERIC DIFFUSION
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016
ATMOSPHERIC EFFECTS
Scattering of modulated Ultra-Relativistic Electron Beam (UREB) by atmospheric plasma
[DE93-620987] p 387 N94-10558
Tropospheric and ionospheric effects on differential astrometry with a ground-space based VLBI array p 136 N94-11070
Elimination of the influence of the atmosphere on the accuracy of solutions to astrometric problems by means of a ground-space VLBI network p 136 N94-11071
Pre-operation analysis of ERS-1 tracking and operation, part 2-F
[NASDA-CNT-930002-PT-2-F] p 230 N94-11130
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918
Distribution of mineral aerosols over the North Pacific p 204 N94-11976
ATMOSPHERIC ENTRY
Planetary entry vehicle design for planned and potential ESA missions to Titan, Mars, and Earth return (FGE TN 51/92) p 4 N94-10428
Identification of cometary and asteroidal particles in stratospheric IDP collections p 430 N94-12115

Organic matter on the early surface of Mars: An assessment of the contribution by interplanetary dust
p 480 N94-12259
Trace element content of chondritic cosmic dust: Volatile enrichments, thermal alterations, and the possibility of contamination p 433 N94-12260
Depletions of sulfur and/or zinc in IDPs: Are they reliable indicators of atmospheric entry heating?
p 433 N94-12261

ATMOSPHERIC GENERAL CIRCULATION EXPERIMENT
Design of a global soil moisture initialization procedure for the simple biosphere model
[NASA-TM-104590] p 284 N94-10940

ATMOSPHERIC GENERAL CIRCULATION MODELS
Sandia ocean modeling system programmer's guide and user's manual
[DE93-007427] p 287 N94-10153
The impact of horizontal resolution on moist processes in the ECMWF model
[DE93-011718] p 276 N94-11227
A modeling perspective on cloud radiative forcing
[DE93-012383] p 276 N94-11241
Large eddy simulations of the atmospheric boundary layer east of the Colorado Rockies p 277 N94-11465
An observational search for CO2 ice clouds on Mars
p 441 N94-12054

ATMOSPHERIC HEATING
Trace element content of chondritic cosmic dust: Volatile enrichments, thermal alterations, and the possibility of contamination p 433 N94-12260

ATMOSPHERIC IONIZATION
Results from a year-long auroral-E measurement campaign
[AD-A265059] p 278 N94-11871

ATMOSPHERIC LASERS
Laser system design for the generation of a sodium-layer laser guide star
[DE93-014127] p 176 N94-12784

ATMOSPHERIC MODELS
AMIP: The Atmospheric Model Intercomparison Project
[DE93-007400] p 273 N94-10151
AMIP: The Atmospheric Model Intercomparison Project
[DE93-007413] p 273 N94-10152
The cloud radiative feedback of a midlatitude squall line system and implication for climate study
[DE93-010511] p 283 N94-10290
Preliminary validation of the low frequency variability of tropospheric temperature and circulation simulated for the AMIP by the ECMWF model
[DE93-012382] p 284 N94-10739
Photochemical modelling of Venus clouds using Pioneer Venus data
[NASA-CR-194108] p 434 N94-10823
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016
A toolkit for building Earth system models
[DE93-012147] p 276 N94-11138
Numerical simulations on the redistribution of atmospheric trace chemicals through cloud processes
p 265 N94-11189
A modeling perspective on cloud radiative forcing
[DE93-012383] p 276 N94-11241
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances
p 31 N94-11492
Stability model of the atmosphere p 32 N94-11500
Development of a graphical user interface and graphics display for the WIND system
[DE93-011780] p 285 N94-11614
Wind system documentation
[DE93-010381] p 285 N94-11664
Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685
Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars
p 169 N94-12044
A new data collection system for ionospheric modelling and related topics
[AD-A265893] p 278 N94-12277
An atmospheric boundary layer stability estimator for urban areas
[AD-A265189] p 279 N94-12422
Comments on possible causes of recent global warming
[DE93-010501] p 272 N94-12592
Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

ATMOSPHERIC MOISTURE
Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-193627] p 274 N94-10726
Photochemical modelling of Venus clouds using Pioneer Venus data
[NASA-CR-194108] p 434 N94-10823
Studies of the net surface radiative flux from satellite radiances during FIFE
[NASA-CR-193150] p 230 N94-10953
The impact of horizontal resolution on moist processes in the ECMWF model
[DE93-011718] p 276 N94-11227
Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment
[NASA-CR-193829] p 285 N94-11598
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851
Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919
Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184
An examination of the evolution of radiation and advection fogs
[AD-A266127] p 286 N94-12539
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663
Cloud liquid water content over the Pacific Ocean tropical zone derived from ship microwave radiometric measurement p 225 N94-12743

ATMOSPHERIC PHYSICS
Environmental Sciences Division
[DE93-013865] p 264 N94-10650
The Air Force Interactive Meteorological System: A research tool for satellite meteorology
[AD-A265957] p 284 N94-11113

ATMOSPHERIC PRESSURE
The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs
p 445 N94-12071
Martian particle size based on thermal inertia corrected for elevation-dependent atmospheric properties
p 430 N94-12107

ATMOSPHERIC RADIATION
Development of a balloon-borne stabilized platform for measuring radiative flux profiles in the atmospheric boundary layer
[DE93-013186] p 274 N94-10323
Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714

ATMOSPHERIC SCATTERING
A statistical method to determine aerosol path radiance and its application to atmospheric correction for CZCS imagery p 191 N94-11897
Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978

ATMOSPHERIC SOUNDING
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-193189] p 274 N94-10701
Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-193627] p 274 N94-10726
Effects of energetic particle events on VLF/LF propagation parameters/1989
[AD-A265266] p 275 N94-11013
TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991
[INPE-5497-TDI/512] p 230 N94-11179
Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment
[NASA-CR-193829] p 285 N94-11598
Satellite observation of atmospheric tracer components: JEM/POP p 130 N94-11836
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851
Estimations of the surface fluxes from satellite observations of boundary layer and the surface
p 252 N94-12513
Cloud liquid water content over the Pacific Ocean tropical zone derived from ship microwave radiometric measurement p 225 N94-12743

ATMOSPHERIC TEMPERATURE
Preliminary validation of the low frequency variability of tropospheric temperature and circulation simulated for the AMIP by the ECMWF model
[DE93-012382] p 284 N94-10739
On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822
Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685
An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander
[AD-A265116] p 289 N94-11868
Study of climatic effects of cloud-aerosol interaction
p 204 N94-11977
Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988
Galileo/NIMS near-infrared thermal imagery of the surface of Venus p 457 N94-12139
Estimations of the surface fluxes from satellite observations of boundary layer and the surface
p 252 N94-12513

ATMOSPHERIC TURBULENCE
Lee waves: Benign and malignant
[NASA-CR-186024] p 283 N94-10725
Characteristic scales and vortex features of mesoscale vortices observed by the satellites during the winter
p 199 N94-11943
Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars
p 169 N94-12044
Turbulence modeling and compressibility
p 163 N94-12614

ATMOSPHERICS
Telescience capability for the Sondre Stromfjord, Greenland, incoherent-scatter radar facility
[NASA-CR-193683] p 136 N94-11206

ATOMIC CLOCKS
Comparison of GPS and GLONASS common-view time transfers p 24 N94-10967
An ensemble pulsar time p 351 N94-10969
Experimental comparison of time synchronization techniques by means of light signals and clock transport on the rotating earth p 351 N94-10970
Possible applications of atomic frequency standards with an internal high resolution digital synthesizer
p 353 N94-10979
CAFS: A Cesium Atomic Frequency Standard for GPS block IIR p 353 N94-10980
Time scale algorithms for an inhomogeneous group of atomic clocks p 356 N94-10998

ATOMIC COLLISIONS
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV
[DE93-610180] p 359 N94-10312
Calculation of spin-dependent observables in electron-sodium scattering using the coupled-channel optical method
[DE93-610050] p 360 N94-10329
Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method
[DE93-610073] p 360 N94-10331
Collision-induced squeezing in a harmonic oscillator
p 379 N94-10597
Filamentation instability of hot quark-gluon plasma with hard jet
[DE93-617679] p 388 N94-10882
Structural and electronic properties of atomic chains
[DE93-617758] p 366 N94-11349
Compilation of excitation cross sections for He atoms by electron impact
[DE93-753246] p 367 N94-11580
Final state interactions and inclusive nuclear collisions
[NASA-TP-3353] p 373 N94-12435

ATOMIC ENERGY LEVELS
Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method
[DE93-610073] p 360 N94-10331
A phaseonium magnetometer: A new optical magnetometer based on index enhanced media
p 375 N94-10565
Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603
Dynamics of charge-transfer excited states relevant to photochemical energy conversion
[DE93-013981] p 263 N94-11116

Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids
[AD-A264689] p 399 N94-11263

ATOMIC EXCITATIONS
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854
Dynamics of charge-transfer excited states relevant to photochemical energy conversion
[DE93-013981] p 263 N94-11116
Theoretical atomic physics for fusion
[DE93-013872] p 366 N94-11172
Electronic excitation of ground state atoms by collision with heavy gas particles
[NASA-CR-193364] p 366 N94-11360
Compilation of excitation cross sections for He atoms by electron impact
[DE93-753246] p 367 N94-11580
Atomic processes relevant to polarization plasma spectroscopy
[DE93-753240] p 393 N94-11594

ATOMIC INTERACTIONS
Interatomic interactions in BCC and FCC lattices of transition metals
[DE93-621541] p 398 N94-11090

ATOMIC PHYSICS
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Radiative properties of strongly magnetized plasmas
[DE93-014098] p 389 N94-11118
Wide Band-Gap Semiconductors. 1991 Materials Research Society Symposium proceedings
[AD-A263418] p 401 N94-11515
Atomic processes relevant to polarization plasma spectroscopy
[DE93-753240] p 393 N94-11594

ATOMIC STRUCTURE
Satellite structure of the xenon valence shell by electron momentum spectroscopy
[DE93-609993] p 360 N94-10327
Calculation of spin-dependent observables in electron-sodium scattering using the coupled-channel optical method
[DE93-610050] p 360 N94-10329
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
Recent advances in electron momentum spectroscopy
[DE93-610149] p 361 N94-10333
Enhanced stability of magic clusters: A case study of icosahedric Al(sub 12)X, X=B, Al, Ga, C, Si, Ge, Ti, As
[DE93-613644] p 395 N94-10386
Structure of s - p bonded metal clusters with 8, 20 and 40 valence electrons
[DE93-613643] p 361 N94-10503
Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637
Atomic structures and compositions of internal interfaces
[DE93-014840] p 363 N94-10750
Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684
Publications/Patents/Presentations/Honors/Student eport
[AD-A265136] p 78 N94-11873
Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time
[AD-A265530] p 403 N94-12010
Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379
Electrode potential-induced reconstruction of Au(100): Effect of chemisorption on nanoscale dynamics as probed by the in-situ scanning tunneling microscopy
[AD-A265900] p 404 N94-12388
Corrosion control by vitreous films on aluminum and high T(sub c) superconductors
[AD-A266016] p 85 N94-12393
Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534

ATOMIZERS
Atomization characteristics of a prefilming airblast atomizer
[NAL-TM-644] p 148 N94-10727
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234

ATOMIZING
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions
[NASA-CR-193339] p 152 N94-11526

ATOMS
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662

ATTACK AIRCRAFT
Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

ATTENTION
Vigilance problems in orbiter processing
p 314 N94-11536

ATTENUATION COEFFICIENTS
Photostimulated attenuation of hypersound in superlattice
[DE93-611231] p 357 N94-10408
Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970

ATTENUATORS
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673

ATTITUDE (INCLINATION)
Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366
Safety of high speed ground transportation systems: X2000 US demonstration vehicle dynamics trials, preliminary test report, October 1992 - January 1993
[PB93-194645] p 422 N94-10736

AUDIO EQUIPMENT
Sensing glass transitions in thin polymer films on acoustic wave microsensors
[DE93-010805] p 87 N94-10295

AUDIO SIGNALS
Underwater hydrophone location survey
p 290 N94-10975

AUGER SPECTROSCOPY
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713

AURORAS
Analysis of geophysical measurements and spacecraft interactions
[AD-A266064] p 43 N94-10944
Studies of electrostatic waves and VLF-wave particle interaction in the ionosphere
[AD-A266013] p 278 N94-12392

AUSTRALIA
Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717

AUSTRALIAN SPACE PROGRAM
National space program in Australia
p 37 N94-10691

AUSTRALITES
Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211

AUTOCATALYSIS
Chemical pattern formation under microgravity
p 121 N94-10227

AUTOCORRELATION
Study of the surface circulation to the North of Bransfield Strait, Antarctica
[INPE-5472-TDI/503] p 288 N94-11200

AUTOIONIZATION
Progress in zirconium resonance ionization spectroscopy
[DE93-011881] p 76 N94-11075

AUTOMATA THEORY
Lattice gas hydrodynamics: Theory and simulations
[DE93-013297] p 147 N94-10320
Acting to gain information
[NASA-CR-193399] p 418 N94-10515
Evaluation of the capacity and delay benefits of terminal air traffic control automation
[AD-A265323] p 24 N94-11863

AUTOMATIC CONTROL
AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141
Stability analysis and aerospace vehicle dynamics
p 31 N94-11491
Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577
The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874

AUTOMATIC FLIGHT CONTROL
Flight simulator experiment of the cockpit advisory system
[NAL-TR-1151] p 33 N94-10733

AUTOMATIC PILOTS
The Memphis Precision Runway Monitor Program Instrument Landing System final approach study
[AD-A266035] p 23 N94-11103

AUTOMATIC WEATHER STATIONS
Development of a buoy system for monitoring marine weather and marine life abundance p 217 N94-12694

AUTOMATION
Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620
Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process
p 127 N94-10623
Reuse: A knowledge-based approach
p 329 N94-11430

AUTOMOBILE FUELS
Business fleet refueling assessment
[PB93-189892] p 98 N94-11017

AUTOMOBILES
Business fleet refueling assessment
[PB93-189892] p 98 N94-11017
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles
[DE93-010770] p 182 N94-11438
Electric and hybrid vehicle site operators program: Thinking of the future
[DE93-011231] p 144 N94-11609
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666

AUTOMORPHISMS
The modular group and super-KMS functionals
[DE93-613029] p 349 N94-10632

AUTONOMIC NERVOUS SYSTEM
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991

AUTONOMOUS NAVIGATION
Sensor abstractions to support many-robot systems
[AD-A265907] p 180 N94-10803

AUTONOMY
The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874

AUXILIARY POWER SOURCES
Investigation of alternate power source for Space Shuttle Orbiter hydraulic system
[NASA-CR-193229] p 46 N94-10911

AVALANCHES
Evolution of steep Martian slopes p 434 N94-11184
Scalloped margin domes: What are the processes responsible and how do they operate?
p 454 N94-12120

AVIATION METEOROLOGY
Stability model of the atmosphere p 32 N94-11500

AVIONICS
An analysis of the modes and states for generic avionics
[NASA-CR-188253] p 27 N94-10664

AXIAL FLOW
Laboratory study on the natural modes of a rotating two-phase fluid system subject to axial excitation
p 106 N94-10106
Development of passive superconducting bearings. Phase 3
[AD-A266050] p 180 N94-10706

AXIAL LOADS
Numerical simulation and experimental results of filament wound CFRP tubes tested under biaxial load
p 58 N94-10015
Analytical prediction and test verification of the multiaxial behaviour of high-strength steel for lightweight structures
p 58 N94-10016
Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083
Design and development of a miniature column-based interface (MCBI) stress gage
[AD-A266054] p 170 N94-10873
Nonlinear response of a clamped-clamped beam with internal resonance under sinusoidal excitation
p 186 N94-10897

AXISYMMETRIC FLOW
Stability of hypersonic boundary-layer flows with chemistry p 7 N94-10451

AZIDES (INORGANIC)
Polymers for microelectronics
[AD-A266036] p 94 N94-12396

AZIDES (ORGANIC)
A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker
[AD-A265998] p 93 N94-12353
Polymers for microelectronics
[AD-A266036] p 94 N94-12396

AZO COMPOUNDS
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A265797] p 93 N94-12380

NMR characterization of polymers formed in diazotizing mixtures of luminol and 3-amino-L-tyrosine [AD-A266093] p 94 N94-12536

B

B STARS

The abundances of the elements in sharp-lined early type stars [NASA-CR-194055] p 424 N94-12573

B-52 AIRCRAFT

The radar eye blinded: The USAF and electronic warfare, 1945-1955 [AD-A265494] p 132 N94-10497

Special investigation report: Commercial space launch incident, launch procedure anomaly orbital sciences corporation PEGASUS/SCD-1, 80 nautical miles east of Cape Canaveral, Florida, February 9, 1993 [PB93-917003] p 40 N94-11893

BABOONS

Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995

BACILLUS

Microbiological test results using three urine pretreatment regimes with 316L stainless steel [NASA-CR-192568] p 299 N94-10360

BACKGROUND NOISE

A multi-variance analysis in the time domain p 146 N94-10999

BACKGROUND RADIATION

The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds p 426 N94-11582

Search for structures in the cosmic microwave background radiation [INPE-5491-TDI/508] p 484 N94-12357

HEAO-1 analysis of Low Energy Detectors (LED) [NASA-CR-194087] p 424 N94-12574

BACKSCATTERING

Preliminary results on backscattering strength from a wind generated bubbly ocean surface [AD-A265006] p 287 N94-10490

Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems [DE93-015079] p 76 N94-10854

Enhancement effects in polarimetric radar returns: Phase difference statistics [NASA-CR-193408] p 231 N94-11309

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

Signatures of Antarctic firn by means of ERS-1 AMI and by field measurements p 237 N94-11737

Spatial patterns in backscatter strength across the Greenland Ice Sheet p 238 N94-11744

C-band SAR backscatter from ice on shallow tundra lakes: Observations and modelling p 240 N94-11755

The effect of rain on ERS-1 altimeter data p 243 N94-11773

Effect of species structure and dielectric constant on C-band forest backscatter [NASA-TM-109219] p 245 N94-11885

Ocean wave detection by SAR p 197 N94-11932

On the determination of the SAR ocean surface scattering patch size p 197 N94-11933

Physical processes of microwave backscattering from laboratory wind-wave surfaces p 200 N94-11952

Experiment and results of the Italian activity in the field of ocean microwave backscattering p 200 N94-11953

The microwave backscattering from wind waves p 201 N94-11959

Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970

Geology and surface characteristics of Bell Regio, Venus p 457 N94-12136

Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290

Snow and glacier investigations by ERS-1 SAR: First results p 247 N94-12481

Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site p 248 N94-12491

Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests p 249 N94-12494

Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam p 177 N94-12722

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778

BACKWARD FACING STEPS

Direct numerical simulation of turbulent flow over a backward-facing step p 156 N94-12296

BACKWARD WAVE TUBES

On the stability of stationary regimes in a distributed autovibration system with external feedback [DE93-620979] p 141 N94-10543

To the theory of irregular auto modulation in electron beam-backward electromagnetic wave dynamic system [DE93-620982] p 133 N94-11030

Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay [DE93-620976] p 143 N94-11365

BACTERIA

Conversion of acetic acid to methane by thermophiles [DE93-014433] p 300 N94-10652

Biogeochemical factors which regulate the formation and fate of sulfide in wetlands p 270 N94-12464

The effects of acid deposition on sulfate reduction and methane production in peatlands p 270 N94-12465

BAFFLES

Flow visualization of shock propagation in baffle systems [DE93-013312] p 147 N94-10307

A theory of membrane absorbers [ISVR-TR-217] p 76 N94-11216

BALL BEARINGS

Application of powder metallurgy techniques to produce improved bearing elements for liquid rocket engines [NASA-CR-193731] p 82 N94-10804

BALLISTIC MISSILES

Estimation with multisensor/multiscan detection fusion [AD-A265673] p 138 N94-12338

BALLISTIC TRAJECTORIES

Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044

BALLISTICS

Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563

BALLOON-BORNE INSTRUMENTS

Development of a balloon-borne stabilized platform for measuring radiative flux profiles in the atmospheric boundary layer [DE93-013186] p 274 N94-10323

BALLOONING MODES

Kinetic approach to long wave length modes in rotating plasmas [DE93-771286] p 388 N94-10807

BALTIC SEA

Finnish ERS-1 Baltic Sea ice experiment in Winter 1992 p 239 N94-11750

BANACH SPACE

Convergence theorems for a class of nonlinear maps in uniformly smooth Banach spaces [DE92-641347] p 343 N94-10531

BANDPASS FILTERS

Alkali metal for ultraviolet band-pass filter [NASA-CASE-NPO-18433-1-CU] p 381 N94-10657

Continued development of an ultra-narrow bandpass filter for solar research [NASA-CR-194169] p 381 N94-10735

BANDWIDTH

Limited bandwidth microwave filter [AD-D015744] p 145 N94-12322

BARENTS SEA

Ice studies in the Barents Sea by ERS-1 SAR during SIZEX 92 p 238 N94-11745

Ice studies in the Barents Sea by ERS-1 during SIZEX 1992 p 210 N94-12653

BARIUM COMPOUNDS

Grain boundaries in complex oxides [DE93-013986] p 398 N94-11012

BARIUM OXIDES

Grain boundaries in complex oxides [DE93-013986] p 398 N94-11012

BARORECEPTORS

Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992

BARRED GALAXIES

The IR properties of ringed galaxies and the IRAS database [NASA-CR-194286] p 426 N94-11590

BARS (LANDFORMS)

Coastal processes due to nearshore current around an upheaving island p 199 N94-11942

Study of growing processes of a tombolo using an air photograph p 218 N94-12702

BARYONS

Development of deterministic transport methods for low energy neutrons for shielding in space [NASA-CR-194172] p 366 N94-11199

A generalized Bethe-Weizsaecker mass formula for strange hadronic matter [DE93-011010] p 368 N94-11620

BASALT

The Lathrop Wells Volcanic Center: Status of field and geochronology studies [DE93-008917] p 273 N94-10285

Radiogenic age and isotopic studies [DE93-610548] p 274 N94-10407

In situ secondary ion mass spectrometry analysis [DE93-012185] p 76 N94-11140

Cold press sintering of simulated lunar basalt p 131 N94-12026

Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036

Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072

Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya p 281 N94-12073

Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya: Petrogenesis p 281 N94-12074

Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times p 281 N94-12076

Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079

Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173

The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208

Assimilation in lunar basalts and volcanic glasses: Implications for a heterogeneous mantle source region p 478 N94-12250

BASE PRESSURE

An experimental investigation of high-speed water-entry for full-size and scale-model pointed nose vehicles [DE93-008491] p 147 N94-10252

BATHYMETERS

An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander [AD-A265116] p 289 N94-11868

Mapping bathymetric slopes from bathymetry data [AD-A265923] p 290 N94-12350

SAR imaging of geology and bathymetry: Kent coastal area - southern North Sea p 254 N94-12527

BATHYTHERMOGRAPHS

The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992 [AD-A264922] p 289 N94-11853

An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander [AD-A265116] p 289 N94-11868

BAYES THEOREM

Bayesian reliability analysis with imprecise prior probabilities [MEMO-COSOR-92-50] p 183 N94-10170

The theory for, and demonstration of, information theory applied to radar target identification [DE93-006393] p 132 N94-10315

Imprecise highest density regions related to intervals of measures [MEMO-COSOR-92-54] p 347 N94-10876

Introduction to Bayesian image analysis [DE93-012628] p 347 N94-11006

Bayesian model for pictorial data fusion of satellite image [INPE-5457-TDI/499] p 345 N94-11193

Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485

BAYS (STRUCTURAL UNITS)

Analysis of the characteristic and mechanism of suspended matter transportation in Huanghe delta sea area using remote sensing techniques p 197 N94-11930

BAYS (TOPOGRAPHIC FEATURES)

Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan [PB93-191633] p 267 N94-11864

Exchange of bay water with ocean current monitored by the NOAA satellite p 193 N94-11908

The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931

The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

Optical characteristics in Tokyo Bay p 204 N94-11972
Validation test system for sea surface temperature detected by satellites in Mutsu Bay p 213 N94-12670
Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683

BCH CODES
Flexible high-speed CODEC
[NASA-CR-191169] p 146 N94-12433

BEAM CURRENTS
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode
[DE93-620977] p 387 N94-10541
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles
[DE93-620980] p 362 N94-10649
Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron
[DE93-754288] p 363 N94-10720

BEAM INJECTION
An experimental program for collective acceleration of ions using intense relativistic electron beams
[DE93-612205] p 371 N94-10316
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211

BEAM INTERACTIONS
Scattering of modulated Ultra-Relativistic Electron Beam (UREB) by atmospheric plasma
[DE93-620987] p 387 N94-10558

BEAM SPLITTERS
A compact, four-way image splitter
[AD-A266107] p 382 N94-11656

BEAMFORMING
Wideband beamforming for a sparse nonuniform spaced sensor array
[AD-A265909] p 133 N94-10660

BEAMS (SUPPORTS)
Payload sensitivity in coupled bending and torsional vibrations in flexible beams
[MEMO-1102] p 184 N94-10161
Nonlinear response of a clamped-clamped beam with internal resonance under sinusoidal excitation p 186 N94-10897

BEARING ALLOYS
Application of powder metallurgy techniques to produce improved bearing elements for liquid rocket engines
[NASA-CR-193731] p 82 N94-10804

BEARINGS
Dynamic tester for rotor seals and bearings
[NASA-CASE-MFS-28493-1] p 33 N94-10669
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732

BEAUFORT SEA (NORTH AMERICA)
Sea ice deformation observed with ERS-1 SAR p 239 N94-11749

BED REST
Exercise countermeasures for bed-rest deconditioning
[NASA-TM-103987] p 300 N94-11191
Glycerol-induced hyperhydration p 309 N94-11996
Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004

BEHAVIOR
Effect of double density caging during Space Shuttle transport of laboratory rats
[NASA-CR-193228] p 300 N94-11180

BENARD CELLS
Experimental analysis of Benard-convection by the combined application of liquid crystals and PIV p 106 N94-10109

BEND TESTS
Evaluation of test specimen shape effects on the flexural fatigue of CFRP laminates
[NAL-TR-1159] p 65 N94-10857
Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218

BENDING
Payload sensitivity in coupled bending and torsional vibrations in flexible beams
[MEMO-1102] p 184 N94-10161
Test specifications, specimen design and instrumentation test data interpretation
[DE93-012338] p 188 N94-11367

BENDING FATIGUE
Evaluation of test specimen shape effects on the flexural fatigue of CFRP laminates
[NAL-TR-1159] p 65 N94-10857
Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor
[DE93-005428] p 187 N94-11169
Failure prediction of thin beryllium sheets used in spacecraft structures
[NASA-CR-194164] p 187 N94-11190

BENDING MOMENTS
Imperfection sensitivity of the Brazier effect for orthotropic cylindrical shells
[LR-687] p 186 N94-10879

BENDING THEORY
Flexure and the role of inplane force around coronae on Venus p 452 N94-12112

BENZENE
Site dependence of the apparent shape of a molecule in STM images: Benzene on Pt(111)
[AD-A263488] p 365 N94-11093

BERYLLIUM
Failure prediction of thin beryllium sheets used in spacecraft structures
[NASA-CR-194164] p 187 N94-11190
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099

BERYLLIUM ALLOYS
Aluminum-beryllium alloys for aerospace applications p 60 N94-10029

BERYLLIUM ISOTOPES
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

BESSEL FUNCTIONS
An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions p 349 N94-10573

BETA PARTICLES
The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point
[DE93-012655] p 361 N94-10349
On parity conservation and the question of the missing, right-handed neutrino
[DE93-613092] p 361 N94-10414
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837
Review of betavoltaic energy conversion p 53 N94-11407

BETATRONS
Ion shaking in the 200 MeV XLS-ring
[DE93-014057] p 374 N94-12782

BETHE-SALPETER EQUATION
Fermion-boson scattering in ladder approximation
[DE93-613111] p 368 N94-11581

BIAS
The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153
Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722
Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338

BIBLIOGRAPHIES
Bibliography on Hot Isostatic Pressing (HIP) technology
[AD-A265668] p 81 N94-10297
Aeronautical engineering: A continuing bibliography with indexes (supplement 293)
[NASA-SP-7037(293)] p 1 N94-10420
Bibliographic notes on Voronoi diagrams
[PB93-189298] p 343 N94-10825
Biscayne bay: A bibliography of the marine environment
[PB93-184802] p 266 N94-11451
Aeronautical engineering: A continuing bibliography with indexes (supplement 289)
[NASA-SP-7037(289)] p 1 N94-11687
Aeronautical engineering: A continuing bibliography with indexes (supplement 291)
[NASA-SP-7037(291)] p 1 N94-11690
Aeronautical engineering: A continuing bibliography with indexes (supplement 290)
[NASA-SP-7037(290)] p 1 N94-11691

BIDIRECTIONAL REFLECTANCE
Global monitoring of atmospheric properties by the EOS MODIS
[NASA-TM-109237] p 231 N94-11485
Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971

BINARY ALLOYS
Ground results of the Mephisto program: Benefits and space experiments orientation p 86 N94-10197
Ripening of immiscible liquid droplets in microgravity with constrained Marangoni drift p 117 N94-10200
A study of the quasibinary Al-W-Mo system. Part 1: Preliminary investigations and preparation for microgravity experiments p 119 N94-10211
A study of the quasibinary Al-Mo-W system. Part 2: A physico-mechanical investigation of the system fabricated under the gravitylessness conditions p 119 N94-10212
Atomic structures and compositions of internal interfaces
[DE93-014840] p 363 N94-10750

BINARY MIXTURES
Stability and dynamics of spatio-temporal structures
[DE93-011374] p 401 N94-11610

BINARY SYSTEMS (MATERIALS)
Laboratory study on the natural modes of a rotating two-phase fluid system subject to axial excitation p 106 N94-10106

BINOCULAR VISION
A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element
[AD-A265490] p 339 N94-11049

BIOASSAY
Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556
Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780

BIOASTRONAUTICS
Echocardiography in the flight program p 309 N94-11993
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994

BIOCHEMISTRY
Conversion of acetic acid to methane by thermophiles
[DE93-014433] p 300 N94-10652
Aluminum and membrane channels
[AD-A265241] p 300 N94-11020
Studies in bioorganic chemistry
[AD-A265532] p 55 N94-12011
The role of certain infauna and vascular plants in the mediation of redox reactions in marine sediments p 268 N94-12454
Emissions of biogenic sulfur gases from Alaskan tundra p 268 N94-12455
Acetate concentrations and oxidation in salt marsh sediments p 269 N94-12459

BIOCOMPATIBILITY
Compatibility tests for biological specimens to on-board experiments in the Space Shuttle flight
[NASDA-CNT-930003] p 301 N94-12278

BIOCONVERSION
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector
[PB93-194165] p 267 N94-11845
The effects of acid deposition on sulfate reduction and methane production in peatlands p 270 N94-12465

BIODEGRADATION
Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

BIOELECTRICITY
Aluminum and membrane channels
[AD-A265241] p 300 N94-11020
Role of spatially distributed ion channels in single neuron computation
[AD-A265972] p 79 N94-12351

BIOGEOCHEMISTRY
Terminal Decomposition and Gaseous Sulfur Release from Tidal Wetlands
[NASA-CR-193466] p 267 N94-12451
Sulfate reduction and other sedimentary biogeochemistry in a northern New England salt marsh p 268 N94-12453
Biogeochemical factors which regulate the formation and fate of sulfide in wetlands p 270 N94-12464
The effects of acid deposition on sulfate reduction and methane production in peatlands p 270 N94-12465
DMS emissions from Sphagnum-dominated wetlands p 271 N94-12466
Emissions of biogenic sulfur gases from northern bogs and fens p 271 N94-12467
Elevated acetate concentrations in the rhizosphere of Spartina alterniflora and potential influences on sulfate reduction p 271 N94-12468
Factors controlling sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12469
Sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12470

BIOGRAPHY
Basic attributes test (BAT): Operational pre-implementation analysis and score equating [AD-A265885] p 314 N94-12276
BIOINSTRUMENTATION
Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks [AD-A265528] p 87 N94-10510
BIOLOGICAL EFFECTS
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375) [NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376) [NASA-SP-7011(376)] p 303 N94-10399
Proceedings of the Symposium on Radiation Research in Life Science [DE93-754137] p 300 N94-10888
A proposed performance index for galactic cosmic ray shielding materials [NASA-TM-4444] p 484 N94-11278
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374) [NASA-SP-7011(374)] p 304 N94-11689
BIOLOGICAL EVOLUTION
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
BIOLOGICAL MODELS (MATHEMATICS)
Plant architecture, growth and radiative transfer for terrestrial and space environments [NASA-CR-193476] p 302 N94-12559
BIOMASS
Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber [NASA-TM-109188] p 315 N94-11258
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector [PB93-194165] p 267 N94-11845
Automatic classification system for zooplankton p 203 N94-11969
Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site p 248 N94-12491
Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests p 249 N94-12494
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660
Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661
Study on sea water purification using a substratum of marine organisms p 217 N94-12696
Acoustic estimation of plankton biomass p 218 N94-12699
The algorithm of primary production determination p 228 N94-12761
BIOMASS ENERGY PRODUCTION
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector [PB93-194165] p 267 N94-11845
BIOPHYSICS
Extended ecosystem signatures with application to Eos synergism requirements [NASA-CR-193398] p 266 N94-11374
BIOPOLYMERS
Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides [AD-A264851] p 88 N94-10863
BIOPROCESSING
Design of multisample, multistep phase partitioning apparatus for use on Space Shuttle Spacelab, and Spacelab missions p 108 N94-10120
Compatibility tests for biological specimens to on-board experiments in the Space Shuttle flight [NASDA-CNT-930003] p 301 N94-12278
BIOSPHERE
Design of a global soil moisture initialization procedure for the simple biosphere model [NASA-TM-104590] p 284 N94-10940
BIOTECHNOLOGY
Design of multisample, multistep phase partitioning apparatus for use on Space Shuttle Spacelab, and Spacelab missions p 108 N94-10120
Environmental Sciences Division [DE93-013865] p 264 N94-10650
BISMALEIMIDE
An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276
BISMUTH
Alkali metal for ultraviolet band-pass filter [NASA-CASE-NPO-18433-1-CU] p 381 N94-10657
BISMUTH ALLOYS
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205
BISMUTH OXIDES
Processing and transport properties of high J(sub c) silver clad Bi-2223 tapes and coils [DE93-010674] p 398 N94-11073
BISPHENOLS
New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers) [NASA-CR-193190] p 55 N94-10513
BIT ERROR RATE
An optoelectronic graphics display processor [AD-A266011] p 171 N94-12391
BLACK HOLES (ASTRONOMY)
Two fluid plasmas in the vicinity of a Schwarzschild black hole [DE93-610264] p 385 N94-10284
BLADE-VORTEX INTERACTION
Perpendicular blade vortex interaction and its implications for helicopter noise prediction: Wave-number frequency spectra in a trailing vortex for BWI noise prediction [NASA-CR-193623] p 357 N94-10752
Simulated wake characteristics of tapered annular wings by a discrete vortex method [NAL-TR-1156] p 13 N94-10855
Lift enhancement of a wing/strake using pneumatic blowing [AD-A265074] p 26 N94-11872
BLAST LOADS
Design and development of a miniature column-based interface (MCBI) stress gage [AD-A266054] p 170 N94-10873
BLOCK COPOLYMERS
Interfacial modification through end group complexation in polymer blends [AD-A265887] p 93 N94-12340
BLOOD
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts p 311 N94-12005
BLOOD CIRCULATION
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995
Physiological water model development p 316 N94-12367
BLOOD FLOW
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543
Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547
Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity p 310 N94-12001
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts p 311 N94-12005
BLOOD PLASMA
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998
BLOOD PRESSURE
Echocardiography in the flight program p 309 N94-11993
Valsalva maneuver: Insights into baroreflex modulation of human sympathetic activity p 310 N94-12000
Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006
BLOOD VOLUME
Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts p 311 N94-12005
BLOWING
Lift enhancement of a wing/strake using pneumatic blowing [AD-A265074] p 26 N94-11872
DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613
BLUNT BODIES
Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment p 7 N94-10447
Stability of hypersonic flow over a blunt body p 7 N94-10450
Studies of hypersonic viscous flows p 8 N94-10454
BODY CENTERED CUBIC LATTICES
Monte Carlo simulations of phase transformations in Fe-Cr alloys [DE93-013847] p 81 N94-10522
Interatomic interactions in BCC and FCC lattices of transition metals [DE93-621541] p 398 N94-11090
BODY FLUIDS
Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557
Glycerol-induced hyperhydration p 309 N94-11996
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998
Fluid compartment and renal function alterations in the rat during 7 and 14 day head down tilt p 310 N94-12002
Local fluid shifts and edema in humans during simulated microgravity p 311 N94-12003
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004
Physiological water model development p 316 N94-12367
BODY KINEMATICS
Position and force control of a vehicle with two or more steerable drive wheels [DE93-012512] p 177 N94-10269
BODY TEMPERATURE
Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats [AD-A265309] p 301 N94-11861
BODY-WING CONFIGURATIONS
In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427
BOILING
Two-phase flow heat transfer and hydrodynamics in an electric field p 103 N94-10093
Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243
Boiling heat-transfer processes and their application in the cooling of high heat flux devices [AD-A266086] p 413 N94-12535
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549
BOLIDES
Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions p 282 N94-12149
BOLTZMANN TRANSPORT EQUATION
Development of deterministic transport methods for low energy neutrons for shielding in space [NASA-CR-194172] p 366 N94-11199
Chaos, entropy, and reversibility: A simple example p 31 N94-11495
BONDED JOINTS
A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints [NASA-TM-108418] p 188 N94-11275
BONDING
Joints between dissimilar metallic and ceramic materials p 63 N94-10052
Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites [AD-A265177] p 92 N94-11876
BONES
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields [AD-A264251] p 311 N94-12364
BOOMS (EQUIPMENT)
In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT) [NAL-TR-1165] p 43 N94-10859
BORN APPROXIMATION
Integrated cross sections for the ionisation of atomic hydrogen by electron impact [DE93-610179] p 359 N94-10311
Distorted-wave calculation of He(e,2e) including core-exchange [DE93-610072] p 360 N94-10330
BOROSILICATE GLASS
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
BOSONS
Aharonov-Bohm effect in Luttinger liquid [DE93-613818] p 408 N94-10148
Top and Higgs masses in a composite boson model [DE93-010874] p 359 N94-10302

The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point [DE93-012655] p 361 N94-10349

On thermodynamic properties of heavy fermion systems in magnetic field [DE93-613819] p 409 N94-10403

Nonunitary and unitary approach to Eigenvalue problem of Boson operators and squeezed coherent states p 350 N94-10595

Exact solutions of a many-anyon problem [DE93-617646] p 411 N94-10832

Fermion-boson scattering in ladder approximation [DE93-613111] p 368 N94-11581

Future high precision experiments and new physics beyond Standard Model [DE93-011004] p 373 N94-11618

Top quark search in D(O) from the lepton + jets mode [DE93-014027] p 370 N94-12781

BOUNDARIES

Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217

Finding a covering triangulation whose maximum angle is provably small [DE93-010691] p 334 N94-12593

BOUNDARY CONDITIONS

Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550

Quantum processes in resonators with moving walls p 380 N94-10612

Quasi-relativistic effects in barrier-penetration processes [DE93-617730] p 410 N94-10721

On the possible unobservability of the Wu-Yang phase factor in curved space [DE93-617645] p 411 N94-10831

Distribution of charged particles near the plasma boundary in the presence of external electric field [DE93-617862] p 389 N94-10886

The searchlight problem for neutrons in a semi-infinite medium [DE93-010796] p 365 N94-10952

High order accurate solutions of viscous problems [NASA-TM-106267] p 151 N94-11253

On temperature distribution in non-participating medium with radiation boundary condition [DE93-619375] p 153 N94-11604

Duality twisted boundary conditions in n-sta te Potts models [DE93-619724] p 346 N94-11811

Summation by parts, projections, and stability [NASA-CR-194290] p 346 N94-12776

BOUNDARY ELEMENT METHOD

Boundary element method for eigenvalue problems of thin plates [ITN-93-85199] p 343 N94-10392

The solving of equations by the method of boundary elements p 326 N94-11182

BOUNDARY INTEGRAL METHOD

Ultrasonic inspection, material noise and surface roughness [DE93-011560] p 183 N94-11110

Boundary integral solution to the electromagnetic scattering from coated surfaces containing edges, gaps, and periodic gratings p 137 N94-11639

BOUNDARY LAYER CONTROL

Method of reducing drag in aerodynamic systems [NASA-CASE-LEW-14791-1] p 12 N94-10672

Receptivity in parallel flows: An adjoint approach p 157 N94-12301

Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition [NAL-SP-18] p 163 N94-12611

DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves p 165 N94-12627

BOUNDARY LAYER FLOW

Experimental, analytical, and computational methods applied to hypersonic compression ramp flows p 6 N94-10444

Stability of hypersonic boundary-layer flows with chemistry p 7 N94-10451

On the instability of hypersonic flow past a pointed cone: Comparison of theoretical and experimental results at Mach 8 p 8 N94-10453

Exergy decrease in shock waves and boundary layers of space launch vehicles [AD-A265272] p 42 N94-10493

The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058

High order accurate solutions of viscous problems [NASA-TM-106267] p 151 N94-11253

CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels [DE93-012835] p 152 N94-11371

BOUNDARY LAYER PLASMAS

Results from the D3-D advanced divertor program [DE93-015472] p 393 N94-11514

BOUNDARY LAYER SEPARATION

Unsteady flow past a NACA 0012 airfoil pitching at constant rates [AD-A265159] p 16 N94-11889

BOUNDARY LAYER STABILITY

An atmospheric boundary layer stability estimator for urban areas [AD-A265189] p 279 N94-12422

Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition [NAL-SP-18] p 163 N94-12611

Nonlinear stability calculations of pipe flow p 163 N94-12612

DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

Turbulence modeling and compressibility p 163 N94-12614

Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615

Experiment on a high Reynolds number turbulent boundary layer p 164 N94-12617

On the wake behind a high speed train p 164 N94-12618

Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620

On the formation process of Karman vortex street p 16 N94-12621

Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow p 164 N94-12622

Curvature effects in three-dimensional boundary layers p 164 N94-12623

Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624

A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625

Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626

Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves p 165 N94-12627

Coherent structure in near wall turbulence with riblets p 165 N94-12628

Instability around an isolated roughness element p 165 N94-12629

Idea of underground airplane p 27 N94-12630

Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631

Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632

Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder p 17 N94-12633

Boundary conditions and bifurcations in plane Poiseuille flow p 166 N94-12634

BOUNDARY LAYER TRANSITION

Estimation of the direct acoustic radiation from turbulent spots using boundary layer velocity measurements p 357 N94-10358

Theoretical and Experimental Methods in Hypersonic Flows [AGARD-CP-514] p 2 N94-10421

Control effectiveness at hypersonic speeds p 3 N94-10426

Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431

On the instability of hypersonic flow past a pointed cone: Comparison of theoretical and experimental results at Mach 8 p 8 N94-10453

Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results [NASA-TM-4499] p 13 N94-10820

A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades [NASA-TM-106278] p 151 N94-11256

Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498

Topics in pattern formation and chaotic systems [AD-A265922] p 161 N94-12342

Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition [NAL-SP-18] p 163 N94-12611

Nonlinear stability calculations of pipe flow p 163 N94-12612

DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

Turbulence modeling and compressibility p 163 N94-12614

Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615

Experiment on a high Reynolds number turbulent boundary layer p 164 N94-12617

On the wake behind a high speed train p 164 N94-12618

Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620

On the formation process of Karman vortex street p 16 N94-12621

Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow p 164 N94-12622

Curvature effects in three-dimensional boundary layers p 164 N94-12623

Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624

A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625

Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626

Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves p 165 N94-12627

Coherent structure in near wall turbulence with riblets p 165 N94-12628

Instability around an isolated roughness element p 165 N94-12629

Idea of underground airplane p 27 N94-12630

Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631

Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632

Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder p 17 N94-12633

Boundary conditions and bifurcations in plane Poiseuille flow p 166 N94-12634

BOUNDARY LAYERS

Thermocapillary migration of bubbles: A semi-analytical solution for large Marangoni numbers p 104 N94-10095

Coupled thermogravitational and thermocapillary convection in a two-layer fluid system p 105 N94-10101

Sandia ocean modeling system programmer's guide and user's manual [DE93-007427] p 287 N94-10153

On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173

Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218

Exergy decrease in shock waves and boundary layers of space launch vehicles [AD-A265272] p 42 N94-10493

Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014

Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow [DE93-011590] p 14 N94-11111

CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels [DE93-012835] p 152 N94-11371

Integral equation methods for mixed boundary problem of fracture mechanics p 188 N94-11617

Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

Reynolds stress closure modeling in wall-bounded flows p 157 N94-12298

Receptivity in parallel flows: An adjoint approach p 157 N94-12301

Generation of internal waves near the shelf boundary p 229 N94-12763

BOUNDARY LUBRICATION

Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump [NAL-TR-1155] p 178 N94-10369

BOUNDARY VALUE PROBLEMS

PANACEA user's manual for PANACEA version 2.0 [DE93-012502] p 321 N94-10263

Complex functions in queueing theory [CWI-BS-R9219] p 342 N94-10352

Boundary of Fatou sets of hyperbolic rational maps or degree two [DE93-613031] p 348 N94-10412
Numerical method of singular problems on singular integrals [DE93-613654] p 343 N94-10546
Improvements for obtaining iterative solutions of large linear systems [DE93-767968] p 343 N94-10729
Regular tensor Green functions of the round waveguide [DE93-621354] p 345 N94-11036
Integral equation methods for mixed boundary problem of fracture mechanics p 188 N94-11617
Summation by parts, projections, and stability [NASA-CR-194290] p 346 N94-12776

BOUSSINESQ APPROXIMATION
Model of convective motion under low gravity p 103 N94-10088
Uni-directional waves over slowly varying bottom. Part 1: Derivation of a KdV-type of equation [MEMO-1098] p 147 N94-10275

BOW WAVES
Exergy decrease in shock waves and boundary layers of space launch vehicles [AD-A265272] p 42 N94-10493

BOXES (CONTAINERS)
Surface-tension driven convection in finite-size containers p 103 N94-10090

BRACKETS
Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it p 61 N94-10037

BRAIN
Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529
Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness [AD-A265657] p 302 N94-12441

BRAIN CIRCULATION
Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557

BRANCHING (MATHEMATICS)
Intermittency following a Hopf bifurcation [W-9301] p 344 N94-10907

BRANCHING (PHYSICS)
Boundary conditions and bifurcations in plane Poiseuille flow p 166 N94-12634

BRASSES
Damping measurements for ultra-high carbon steel/brass laminates [DE93-011886] p 82 N94-11076

BRAZIL
TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991 [INPE-5497-TDI/512] p 230 N94-11179

BRAZING
Ceramic technology project database [DE93-012432] p 91 N94-11673

BREADBOARD MODELS
Continued development of an ultra-narrow bandpass filter for solar research [NASA-CR-194169] p 381 N94-10735
Dry in-line thermoplastic matrix impregnation, phase 1 [AD-A265016] p 67 N94-11221

BREAKING
The formation and breakage of liquid bridges under microgravity p 100 N94-10071

BREAKWATERS
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942
Study on sea water purification using a substratum of marine organisms p 217 N94-12696

BREATHING
Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

BRECCIA
Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa) p 281 N94-12032
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core p 281 N94-12056
Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104
The EET87513 clast N: A CM2 fragment in an HED polymict breccia p 453 N94-12117
Post-impact alteration of the Manson impact structure p 282 N94-12188
The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197

BREMSSTRAHLUNG
Workshop on NN Bremsstrahlung and Polarization Observables [DE93-010181] p 361 N94-10334
Atomic processes relevant to polarization plasma spectroscopy [DE93-753240] p 393 N94-11594

BREWSTER ANGLE
An analytic model for calculating pump-induced wavefront distortions in laser slabs [DE93-011953] p 174 N94-11126

BRICKS
General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027

BRIDGMAN METHOD
The effect of gravitational modulation on convection in vertical Bridgman growth p 113 N94-10178
Flow transitions in a 2D directional solidification model p 114 N94-10183
TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements p 114 N94-10184
Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185
Effect of experimental procedure on pattern formation and array disorder in cellular solidification p 117 N94-10203

BRIGHTNESS TEMPERATURE
Dependence of oceanic microwave emission on wind direction p 201 N94-11957
Validation of ATSR-1 using aircraft radiometer measurements over the South Atlantic p 252 N94-12515
On the error characteristics of the sea surface temperature observed by satellite p 216 N94-12690

BRILLOUIN EFFECT
Limitations to the quality of optical phase conjugation by stimulated Brillouin scattering [AD-A266006] p 383 N94-12389

BRINES
Hygroscopic absorption to falling films: The effects of the concentration level [ITN-93-85198] p 148 N94-10391
Chemical weathering on Mars: Rate of oxidation of iron dissolved in brines p 455 N94-12128

BRITTLENESS
Particle attraction effects on the centrifugal casting and extrusion of alumina [DE93-011559] p 82 N94-10957
Production of reactive sintered nickel aluminide [DE93-014434] p 83 N94-11127
DBTT measurement by use of Small Punch (SP) test [DE93-753188] p 183 N94-11168

BROADBAND
Wideband beamforming for a sparse nonuniform spaced sensor array [AD-A265909] p 133 N94-10660

BROADCASTING
Building penetration loss measurements for DAB signals at 211 MHz [BBC-RD-1992/14] p 133 N94-11024

BROKEN SYMMETRY
Effective action in the gauged Nambu-Jona-Lasinio model [DE93-617654] p 409 N94-10405
Standard model status (in search of new physics) [DE93-013288] p 410 N94-10528
Planck scale effects on the Majoron [DE93-613120] p 410 N94-10545
Spontaneous symmetry breaking in QCD [DE93-753080] p 396 N94-10645
Proceedings of the Workshop on New Aspects of Quantum Field Theories [DE93-754136] p 411 N94-10887
Dissipative phase transitions in field theory models with spontaneous symmetry violation [DE93-621382] p 412 N94-11039
Cosmological restrictions on conformally-invariant SU(5) GUT models [DE93-619770] p 412 N94-11047
Quark and lepton masses [DE93-012308] p 370 N94-12787

BROWNIAN MOVEMENTS
Infinite-mode squeezed coherent states and non-equilibrium statistical mechanics (phase-space-picture approach) [LBL-32695] p 380 N94-10608
Chaos, entropy, and reversibility: A simple example p 31 N94-11495

BRUDERHEIM METEORITE
Separation of spallation and terrestrial C-14 in chondrites p 431 N94-12183

BSCCO SUPERCONDUCTORS
Development of commercially viable high-T(sub c) Bi-2223 superconductor tapes [DE93-009966] p 142 N94-10951
Texture analysis of high Tc superconductors p 399 N94-11314

BUBBLES
Thermocapillary migration of bubbles: A semi-analytical solution for large Marangoni numbers p 104 N94-10095
Bubbles and drops behaviour under low-gravity: A space experiment for the IML-2 mission p 104 N94-10098
Thermocapillary slug flow in a capillary tube p 105 N94-10104
Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107
Coupled growth of cells and bubbles in directional solidification of succinonitrile-acetone alloys p 118 N94-10206
Study of vapor bubble growth in a supersaturated liquid p 122 N94-10232
Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243
VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066
Acoustics of bubbly sediments [AD-A263726] p 288 N94-11299
Use of ultrasound in altitude decompression modeling p 317 N94-11540
Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542
Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546
Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547

BUCKLING
Design evaluation of GLARE laminate lay-ups p 63 N94-10051
Perforated plates for thin-walled structures p 63 N94-10056
Hydrostatic testing of thick laminated composite cylinders for performance model validation [DE93-012728] p 184 N94-10264
Imperfection sensitivity of the Brazier effect for orthotropic cylindrical shells [LR-687] p 186 N94-10879

BUILDINGS
Building penetration loss measurements for DAB signals at 211 MHz [BBC-RD-1992/14] p 133 N94-11024
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres [DE93-012236] p 266 N94-11671

BUOYANCY
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
Calculation of the effects of magnetic field damping in fluid flow: Comparison of magnetohydrodynamic models of different complexity p 103 N94-10089
Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092
Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108
Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221
The kinematics of buoyancy induced mixing p 123 N94-10239
Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287

BUOYS
Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200
Development of a buoy system for monitoring marine weather and marine life abundance p 217 N94-12694

BURGER EQUATION
Application of incremental unknowns to the Burgers equation p 156 N94-12293

BURNERS
Distributed combustion in solid propellants [AD-A265727] p 99 N94-12564

BURNING RATE
Methanol pan fires in an enclosed space: Effect of pressure and oxygen concentration [AD-A266108] p 79 N94-12415

BURNTHROUGH (FAILURE)
Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769
A new FR water resistant acoustic insulation material for aircraft p 18 N94-10773

An investigation into aircraft fuselage fire hardening p 19 N94-10782

BY-PRODUCTS
Feature association without a motion estimate [AD-A265162] p 138 N94-11891

C

C BAND
A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711
A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715
Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719
Assessment of ERS-1 SAR data for soil moisture estimation p 249 N94-12492
Mapping of sea bottom topography with ERS-1 C-band SAR p 254 N94-12525

C++ (PROGRAMMING LANGUAGE)
Object oriented implementation of adaptive mesh refinement algorithms [DE93-011885] p 325 N94-11112

CABIN ATMOSPHERES
A combustion products analyzer for contingency use during thermodegradation events on spacecraft p 318 N94-11555

CADMIUM SELENIDES
Synthesis and electronic properties of nanophase semiconductor materials [AD-A265287] p 146 N94-12584

CADMIUM TELLURIDES
CdTe crystal growth in the Soviet facility zona 4 p 106 N94-10111
CdTe crystal growth by THM with a rotating magnetic field p 107 N94-10116
Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139
Flexible polycrystalline thin-film photovoltaics for space applications p 50 N94-11393

CALCITE
Dynamic studies of crystal growth using the AFM [DE93-009549] p 399 N94-11268

CALCIUM
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

CALCIUM SILICATES
In-situ crystallization of silicate glass films deposited on alpha- Al2O3 [DE93-012969] p 95 N94-12596

CALCULUS
Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675
The algorithm of primary production determination p 228 N94-12761

CALDERAS
Giant radiating dyke swarms on Earth and Venus p 283 N94-12236

CALIBRATING
Calibration of accelerometers on drop tower Bremen p 108 N94-10121
Particle image velocimetry technique: Calibration tests p 111 N94-10137
An overview of the Defence Research Agency photovoltaic programme p 53 N94-11412
Robotic servicing on Earth orbiting satellites p 45 N94-11579
Calibration and validation of the ERS-1 wind scatterometer p 232 N94-11706
Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707
The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708
Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710
ERS-1 studies at the Department of Oceanography from Space, IFREMER/Brest (France) p 233 N94-11712
Calibration of ERS-1 altimetry over the North Sea p 234 N94-11716
ERS-1 SAR calibration strategy p 235 N94-11726
ERS-1 preliminary antenna elevation pattern measured by ground-receivers p 235 N94-11727
Preliminary results of the experiment I-7 p 235 N94-11728
The ERS-1/CV 580 SAR cross-calibration experiment: Sault Ste Marie, October 26 - November 2, 1991 p 236 N94-11729
Calibration of the ERS-1 SAR fast-delivery images p 236 N94-11730
Calibration results for the ERS-1, AIRSAR, and PHARS p 236 N94-11731
The use of active devices in the ERS-1 radiometric calibration p 236 N94-11732
An experiment for the radiometric calibration of the ERS-1 SAR p 236 N94-11733
The height calibration of the ERS-1 radar altimeter p 241 N94-11764
Validating the UK-PAF land ice product surface elevation p 244 N94-11780
Global wave height climatologies from ERS-1 altimeter data, and comparisons with those from GEOSAT p 244 N94-11781
A determination of the external forces required to move the benchmark active controls testing model in pure plunge and pure pitch [NASA-TM-107743] p 16 N94-12421
Validation of the ATSR/M microwave radiometer data p 252 N94-12511
Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

CALLISTO
Theoretical studies of the radar properties of the icy Galilean moons of Jupiter [NASA-CR-193407] p 434 N94-11361

CALORIMETERS
A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114
Experimental approach to non-contact calorimetry in space p 112 N94-10143
Relativistic heavy ion research [DE93-013127] p 367 N94-11373
Theory of elementary particles and accelerator theory. Task C: Experimental high energy physics [DE93-013139] p 368 N94-11696
Calorimetric thermometry of meteoritic troilite: A feasibility study p 428 N94-12025
Experimental particle physics at the University of Pittsburgh [DE93-013326] p 369 N94-12546
Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber [NASA-TP-3380] p 55 N94-12569
Upgraded D(O) calorimeter electronics for short Tevatron bunch space and the effect of pile-up on the W mass measurement [DE93-013566] p 146 N94-12603
Pion correlations and calorimeter design for high energy heavy ion collisions [DE93-013861] p 373 N94-12607

CAMERAS
Design of CCD camera system for use inside electron beam furnace [DE93-009525] p 170 N94-11267
An indium gallium arsenide charge-coupled device (CCD) for 1-3 micron imaging [AD-A266134] p 401 N94-11476
Ultraviolet plume instrument description and plume data reduction methodology [AD-A266141] p 54 N94-11643

CANADA
Radiogenic age and isotopic studies [DE93-610548] p 274 N94-10407
Paint removal activities in Canada p 126 N94-10615
Wind and surface features in SAR images: The Canadian program p 234 N94-11718

CANADIAN SPACE PROGRAM
Canada's longterm space plan and ISY activities p 37 N94-10692

CANADIAN SPACECRAFT
Satellite observations of red tide events: Plans for EESI p 191 N94-11899

CANARD CONFIGURATIONS
X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504

CANCER
Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

CANONICAL FORMS
On output linearization of observable dynamics [MEMO-1105] p 341 N94-10276

CANOPIES (VEGETATION)
Plant architecture, growth and radiative transfer for terrestrial and space environments [NASA-CR-193476] p 302 N94-12559

CAPACITANCE
New experimental techniques for solar cells p 52 N94-11403

CAPACITORS
Effects of aqueous solution compositions on Aerocapacitor energy density [DE93-013431] p 140 N94-10309
Lightweight linear alternators with and without capacitive tuning [NASA-CR-185273] p 140 N94-10505

CAPILLARY FLOW
Thermocapillary convection instability in microgravity crystal growth p 112 N94-10172
Vibrational-thermocapillary parallel flows and stability p 120 N94-10220

CAPILLARY TUBES
Thermocapillary slug flow in a capillary tube p 105 N94-10104

CAPILLARY WAVES
Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745
Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746
Radar observation of internal waves field in the north-west Pacific p 226 N94-12747

CAPTURE EFFECT
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

CARBOHYDRATES
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660

CARBON
An experimental program for collective acceleration of ions using intense relativistic electron beams [DE93-612205] p 371 N94-10316
Electrochemical process and product therefrom [AD-D015767] p 75 N94-10380
Preparation of carbon monoliths having tailored pore structure from porous polymer precursors [DE93-011576] p 89 N94-10958
Ionization potentials of small carbon clusters [AD-A264379] p 67 N94-11260
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds p 426 N94-11582
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697
Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099

CARBON CYCLE
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697

CARBON DIOXIDE
Transport of heat and mass in near-critical fluids p 122 N94-10230
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities [DE93-771423] p 387 N94-10662
Allowable exposure limits for carbon dioxide during extravehicular activity [NASA-TM-103832] p 315 N94-11375
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector [PB93-194165] p 267 N94-11845
An observational search for CO2 ice clouds on Mars p 441 N94-12054
Spatial variation in the seasonal south polar cap of Mars as observed by Mariner 7 p 456 N94-12134
Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173

CARBON DIOXIDE CONCENTRATION
Modeling present and future river runoff using global atmospheric models [AD-A265274] p 285 N94-11685

CARBON DIOXIDE LASERS
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic [DE93-012782] p 173 N94-10160
Controlling chaotic behavior in CO2 and other lasers [AD-A264811] p 174 N94-10870
Controlling chaotic behavior in a CO2 and other lasers [AD-A265458] p 176 N94-12372

CARBON FIBER REINFORCED PLASTICS
Lightweight CFRP frame structures for a Rotex-derived manipulator system p 56 N94-10005
Design and development of a CFRP central cylinder for satellites p 56 N94-10007
An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008
Low cost and thermally stable sandwich design for FIRST p 57 N94-10009
Design and manufacturing of filament wound thrust cylinder p 57 N94-10010
Numerical simulation and experimental results of filament wound CFRP tubes tested under biaxial load p 58 N94-10015
Development of a fatigue analysis approach for CFRP structures under acoustic loading p 58 N94-10018
Design and manufacturing of CFRP rings by RTM p 59 N94-10025
Cost effectiveness of structural applications of fibre reinforced thermoplastics p 60 N94-10032

Development tests for a high stability optical bench p 62 N94-10047
Fibre optic strain and temperature measurement in composite materials: A review of the OSTIC programme p 65 N94-10066
Evaluation of test specimen shape effects on the flexural fatigue of CFRP laminates [NAL-TR-1159] p 65 N94-10857
Fibre reinforced polymer matrix composites: Microstructure and mechanical properties [DLR-FB-92-28] p 66 N94-11085

CARBON FIBERS
Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012
Distortions and stresses in thin shells due to anisotropic thermal expansion p 57 N94-10014
Numerical simulation and experimental results of filament wound CFRP tubes tested under biaxial load p 58 N94-10015
Mechanical properties of magnesium/carbon composites developed by hot pressing under medium pressure p 59 N94-10024
Hydrostatic testing of thick laminated composite cylinders for performance model validation [DE93-012728] p 184 N94-10264
Strain measurement of carbon/epoxy composite with fibre optics white light quasi distributed polarimetric sensor p 69 N94-11328

CARBON ISOTOPES
Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029
The carbon isotopic composition of Novo Urei diamonds p 433 N94-12255

CARBON MONOXIDE
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities [DE93-771423] p 387 N94-10662

CARBON STEELS
Damping measurements for ultra-high carbon steel/brass laminates [DE93-011886] p 82 N94-11076

CARBON 12
Carbon and nitrogen in Type 2 supernova diamonds p 431 N94-12166

CARBON 13
The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase [AD-A265799] p 94 N94-12381
Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658

CARBON 14
Separation of spallation and terrestrial C-14 in chondrites p 431 N94-12183

CARBON-CARBON COMPOSITES
Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012
Distortions and stresses in thin shells due to anisotropic thermal expansion p 57 N94-10014
An ultralight carbon-carbon composite with amorphous matrix p 61 N94-10042
Advanced methods of permanently joining carbon materials p 63 N94-10057
High temperature composites in Aerospatiale activities p 64 N94-10062
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices [DE93-621609] p 66 N94-11143

CARBON-PHENOLIC COMPOSITES
An ultralight carbon-carbon composite with amorphous matrix p 61 N94-10042
Level 3 material characterization of NARC HRPF, HRHU, HRHF, and HRPU [NASA-CR-192579] p 65 N94-10812

CARBONACEOUS CHONDRITES
Mineralogy versus bulk composition of the carbonaceous chondrite clast Kaidun 2 p 429 N94-12101
Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104
SXRF determination of trace elements in chondrule rims in the unequilibrated CO3 chondrite, ALH A77307 p 429 N94-12106
The EET87513 clast N: A CM2 fragment in an HED polymict breccia p 453 N94-12117
Volatiles in fourteen interplanetary dust particles: A comparison with CI and CM chondrites p 430 N94-12132
Distribution of vanadium and melting of opaque assemblages in Efremovka CAI's p 282 N94-12141
The Th and U abundances in chondritic meteorites p 430 N94-12151
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163
Separation of spallation and terrestrial C-14 in chondrites p 431 N94-12183
Anomalous REE patterns in unequilibrated enstatite chondrites: Evidence and implications p 431 N94-12191
Cathodoluminescence properties of components in enstatite chondrites p 432 N94-12206
The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208
A new carbon-rich phase (COPS) in Antarctic micrometeorites p 432 N94-12233
On possibility of diamond formations in radiation process p 433 N94-12254
The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256
Cronstedtite and iron sulfide mineralogy of CM-type carbonaceous chondrites from cryogenic Moessbauer spectra p 433 N94-12257

CARBONACEOUS MATERIALS
A reexamination of amino acids in lunar soil p 452 N94-12109
Mass and spatial distribution of carbonaceous component in Comet Halley p 433 N94-12263

CARBONACEOUS METEORITES
A new carbon-rich phase (COPS) in Antarctic micrometeorites p 432 N94-12233

CARDIAC OUTPUT
Echocardiography in the flight program p 309 N94-11993
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994

CARDIOLOGY
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994

CARDIOVASCULAR SYSTEM
Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992
Echocardiography in the flight program p 309 N94-11993
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995
Glycerol-induced hyperhydration p 309 N94-11996
Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997
Fitness, autonomic regulation and orthostatic tolerance p 310 N94-11999
Valsalva maneuver: Insights into baroreflex modulation of human sympathetic activity p 310 N94-12000
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts p 311 N94-12005
Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006
Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

CARRIAGES
Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

CARRIER DENSITY (SOLID STATE)
Organometallic chemical vapor deposition and characterization of ZnGe(1-x)Si(x)P2-Ge alloys on GaP substrates p 400 N94-11443

CARRIER LIFETIME
Response of silicon solar cell to pulsed laser illumination p 51 N94-11396

CARRIER MOBILITY
Kinetics of high concentration arsenic deactivation at moderate to low temperatures [DE93-013349] p 395 N94-10516

CARTESIAN COORDINATES
A spectral nodal method for discrete ordinates problems in x,y geometry [DE93-610128] p 342 N94-10283

CASCADE FLOW
Solving the inverse problem for incompressible potential flow through two-dimensional cascades [NAL-TR-1162] p 147 N94-10365
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes [NASA-TP-3383] p 15 N94-11133

CASSINI MISSION
An interferometric spectral mapper for the Cassini mission to Saturn and Titan [NASA-CR-193805] p 482 N94-12429

CASTING
Comparison of Al-Fe alloys produced by PFC and USGA techniques p 58 N94-10019
Marangoni motion during melting of a hypermonotectic alloy: Numerical simulations for the D2 experiment IHF04 p 113 N94-10177
Bibliography on Hot Isostatic Pressing (HIP) technology [AD-A265668] p 81 N94-10297
Physical properties of injection molded liquid crystal polymers and high temperature engineering polymers [AD-A264912] p 87 N94-10508

CASUALTIES
Aviators, air combat, and combat stress: An Air F orce commander's primer [AD-A265083] p 313 N94-11867

CATALOGS (PUBLICATIONS)
Satellite situation report, volume 32, no. 1 [NASA-TM-109233] p 42 N94-10562
Satellite situation report, volume 32, no. 2 [NASA-TM-109234] p 42 N94-10563
Satellite situation report, volume 31, no. 4 [NASA-TM-109232] p 39 N94-10659
Venus small volcano classification and description p 438 N94-12037
The Magellan volcanic and magmatic feature catalog p 467 N94-12193

CATALYSIS
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces [DE93-012767] p 77 N94-11370
Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472

CATALYSTS
Charge distribution analysis of catalysts under simulated reaction conditions [DE93-013604] p 78 N94-11699
Resist materials design: Base-catalyzed chemical amplification [AD-A265286] p 145 N94-11819
Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes [DE93-013282] p 405 N94-12599

CATALYTIC ACTIVITY
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces [DE93-012767] p 77 N94-11370

CATARACTS
Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813

CATHODES
Dynamics of ion acceleration in electron flux by a virtual cathode potential [DE93-620978] p 371 N94-10542

CATHODOLUMINESCENCE
Cathodoluminescence properties of components in enstatite chondrites p 432 N94-12206

CAUCHY PROBLEM
Spline approximation for system of n-th order nonlinear ordinary differential equations [DE93-608188] p 346 N94-11507

CAVITIES
On the Sobolev systems with ellipsoid cavities [DE92-641290] p 148 N94-10530
Smoothly deformed light p 375 N94-10566
Quantum processes in resonators with moving walls p 380 N94-10612
Controlling chaotic behavior in CO2 and other lasers [AD-A264811] p 174 N94-10870
On the coupling of electromagnetic radiation into cavities [DE93-011406] p 137 N94-11621
Nonlinear analysis of a magnicon output cavity [AD-A265342] p 145 N94-12424

CAVITY FLOW
Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290

CAVITY RESONATORS
Semiconductor ring lasers [DE93-012386] p 174 N94-11005
Performance characteristics of the INS 25.5-MHz split coaxial RFQ [DE93-753168] p 144 N94-11508
On the coupling of electromagnetic radiation into cavities [DE93-011406] p 137 N94-11621
Three-cavity circuit studies of the Maryland gyroklystron [DE93-010173] p 145 N94-11645

CD-ROM
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921

CELESTIAL BODIES
The magnetic field of rotating bodies [DE93-619769] p 427 N94-11812

CELESTIAL MECHANICS

Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

CELLS (BIOLOGY)

Aluminum and membrane channels
[AD-A265241] p 300 N94-11020

CEMENTS

Mechanical interaction between synthetic fiber and cement base matrix in FRC composites
[AD-A265310] p 73 N94-11686

CENTER OF GRAVITY

Accuracy and repeatability of the standard automated mass properties measurement system
[AD-A265897] p 316 N94-12346

CENTER OF MASS

Venus' center of mass - center of figure displacement and implications p 444 N94-12067

Accuracy and repeatability of the standard automated mass properties measurement system
[AD-A265897] p 316 N94-12346

CENTRAL NERVOUS SYSTEM

Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts
p 311 N94-12005

Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006

CENTRIFUGAL CASTING

Particle attraction effects on the centrifugal casting and extrusion of alumina
[DE93-011559] p 82 N94-10957

CENTRIFUGAL FORCE

Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083

Kinetic approach to long wave length modes in rotating plasmas
[DE93-771286] p 388 N94-10807

CERAMIC COATINGS

Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431

Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials
[DE93-008717] p 88 N94-10891

CERAMIC FIBERS

High temperature composites in Aerospatiale activities
p 64 N94-10062

Damping mechanisms in chemically vapor deposited SiC fibers
[NASA-TM-106334] p 66 N94-11135

Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites
[AD-A265177] p 92 N94-11876

CERAMIC MATRIX COMPOSITES

High temperature materials for hypersonic transport
p 56 N94-10003

Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012

Fibre-reinforced ceramic components by filament winding for intermediate temperature applications
p 61 N94-10041

New processes for lightweight ceramic matrix composites p 61 N94-10043

Ceramic matrix composites: High performance materials for space application p 62 N94-10044

Joints between dissimilar metallic and ceramic materials p 63 N94-10052

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites
[AD-A265153] p 187 N94-11096

Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques
[NASA-TM-106121] p 67 N94-11237

Creep deformation and mechanical properties of sintered glass and polycrystalline matrix composites
p 67 N94-11315

High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment
[DE93-012430] p 72 N94-11368

The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite
[DE93-011690] p 73 N94-11612

Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites
[AD-A265177] p 92 N94-11876

CERAMICS

Study of the tribological behavior of SiC and Si3N4 ceramic couples in terms of temperature: The reality
p 64 N94-10061

Zerodur polishing process for high surface quality and high efficiency
[DE93-012596] p 87 N94-10271

Fracture behavior of surface-modified ceramics
[DE93-013707] p 88 N94-10710

Development and testing of a superconducting link for an IR detector
[NASA-CR-193674] p 170 N94-10948

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites
[AD-A265153] p 187 N94-11096

Low-expansion ceramics initiative
[DE93-011860] p 89 N94-11106

Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques
[NASA-TM-106121] p 67 N94-11237

A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints
[NASA-TM-108418] p 188 N94-11275

Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281

Heat flux measurements on ceramics with thin film thermocouples
[NASA-TM-106305] p 170 N94-11310

High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment
[DE93-012430] p 72 N94-11368

The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite
[DE93-011690] p 73 N94-11612

Ceramics technology project database
[DE93-012431] p 91 N94-11672

Ceramic technology project database
[DE93-012432] p 91 N94-11673

Radiation-induced aperiodicity in irradiated ceramics
[DE93-013335] p 91 N94-11698

Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings
[AD-A265072] p 92 N94-11866

Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers
[AD-D015747] p 93 N94-12330

Prediction of alumina penetration
[DE93-014017] p 95 N94-12610

CEREBRAL CORTEX

Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness
[AD-A265657] p 302 N94-12441

CEREBROSPINAL FLUID

Effects of CSF hormones and ionic composition on salt/water metabolism
[NASA-CR-193232] p 300 N94-11045

CERENKOV COUNTERS

Post-launch analysis of data from the High Energy Astrophysical Observatory Heavy Nuclei Experiment (HEAO-C3)
[NASA-CR-193513] p 484 N94-11486

CERTIFICATION

GRISET certification package
[DE93-011783] p 327 N94-11246

CESIUM

A laser-cooled cesium fountain frequency standard and a measurement of the frequency shift due to ultra-cold collisions p 352 N94-10976

CAFS: A Cesium Atomic Frequency Standard for GPS block IIR p 353 N94-10980

Time scale algorithms for an inhomogeneous group of atomic clocks p 356 N94-10998

CHALCOGENIDES

Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes
[DE93-013282] p 405 N94-12599

CHANGE DETECTION

Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734

Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928

Segmentation and change detection in ERS-1 images over East Anglia p 248 N94-12487

Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests
p 249 N94-12494

Study of growing processes of a tombolo using an air photograph p 218 N94-12702

CHANNEL FLOW

An ancient inner lake in Maadim Vallis
p 456 N94-12133

Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287

A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288

Large-eddy simulation of turbulent flow with a surface-mounted two-dimensional obstacle
p 156 N94-12291

Reynolds stress closure modeling in wall-bounded flows p 157 N94-12298

DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616

Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system
p 165 N94-12624

CHANNELS

Rates of fluvio-thermal erosion on Mars
p 435 N94-12018

Thermal studies of Martian channels and valleys using Termoskan data p 443 N94-12064

CHANNELS (DATA TRANSMISSION)

Formal specification of the plain UCN layer in LOTOS
[MEMO-INF-92-83] p 131 N94-10280

Microwave multiplexer with channels of varying fractional bandwidths
[AD-D015754] p 140 N94-10389

Controller of serial multiplex communication channel
[DE92-641157] p 336 N94-10544

Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349

CHAOS

The kinematics of buoyancy induced mixing
p 123 N94-10239

The uncertainty principle and quantum chaos
p 379 N94-10602

Controlling chaotic behavior in CO2 and other lasers
[AD-A264811] p 174 N94-10870

Intermittency following a Hopf bifurcation
[W-9301] p 344 N94-10907

Stability in Aerospace Systems
[AGARD-R-789] p 31 N94-11489

Chaotic time series analysis p 31 N94-11490

Chaos, entropy, and reversibility: A simple example
p 31 N94-11495

NRL review for 1993
[AD-A265666] p 497 N94-12334

Topics in pattern formation and chaotic systems
[AD-A265922] p 161 N94-12342

Controlling chaotic behavior in a CO2 and other lasers
[AD-A265458] p 176 N94-12372

Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder
p 17 N94-12633

CHARACTERIZATION

Material characterization and modeling with shearography
[NASA-CR-192576] p 185 N94-10342

Characterization of an excimer laser-ablated plasma and applications p 392 N94-11450

CHARGE CARRIERS

Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117

Charge distribution analysis of catalysts under simulated reaction conditions
[DE93-013604] p 78 N94-11699

CHARGE COUPLED DEVICES

Design of CCD camera system for use inside electron beam furnace
[DE93-009525] p 170 N94-11267

An indium gallium arsenide charge-coupled device (CCD) for 1-3 micron imaging
[AD-A266134] p 401 N94-11476

CHARGE DISTRIBUTION

Charge distribution analysis of catalysts under simulated reaction conditions
[DE93-013604] p 78 N94-11699

CHARGE TRANSFER

Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637

Dynamics of charge-transfer excited states relevant to photochemical energy conversion
[DE93-013981] p 263 N94-11116

Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117

Ionization potentials of small carbon clusters
[AD-A264379] p 67 N94-11260

CHARGED PARTICLES

Aharonov-Bohm effect in Luttinger liquid
[DE93-613818] p 408 N94-10148

New squeezed landau states p 379 N94-10601

Solar wind channels for MeV particles
[DE93-012648] p 482 N94-10741

Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD
[DE93-013593] p 363 N94-10748

The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
Distribution of charged particles near the plasma boundary in the presence of external electric field
[DE93-617862] p 389 N94-10886
Fast trigger algorithm for B-events selection
[DE93-621452] p 365 N94-11089
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Relativistic heavy ion research
[DE93-013127] p 367 N94-11373
Experimental particle physics at the University of Pittsburgh
[DE93-013326] p 369 N94-12546

CHEBYSHEV APPROXIMATION
Improvements for obtaining iterative solutions of large linear systems
[DE93-767968] p 343 N94-10729

CHEMICAL ANALYSIS
Synthesis, characterization, and modification of poly(organophosphazenes), that bear both 2,2,2-trifluoroethoxy and phenoxy groups
[AD-A264913] p 92 N94-11847
Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099
Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104
Determining the relative extent of alteration in CM chondrites p 430 N94-12114
Distribution of vanadium and melting of opaque assemblages in Efremovka CAI's p 282 N94-12141
The Xe-Q in lodranites and a hint for Xe-L. FRO90011 another lodranite? p 432 N94-12239
On the origin of (4)He and (40)Ar in natural gold
p 87 N94-12240
Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE93-014093] p 272 N94-12783

CHEMICAL BONDS
Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate
[DE93-012498] p 399 N94-11243
A new decomposition strategy for parallel bonded molecular dynamics
[DE93-009839] p 366 N94-11284
TAB interconnects for space concentrator solar cell arrays p 51 N94-11400
The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes
[AD-A265623] p 404 N94-12376

CHEMICAL CLEANING
Ellipsometry studies of semiconductors surface cleaning
[AD-A265150] p 142 N94-11094

CHEMICAL CLOUDS
Numerical simulations on the redistribution of atmospheric trace chemicals through cloud processes
p 265 N94-11189

CHEMICAL COMPOSITION
Thermodynamic model of air in chemical equilibrium
p 7 N94-10448
Improving reservoir conformance using gelled polymer systems
[DE93-014532] p 88 N94-10749
Numerical simulations on the redistribution of atmospheric trace chemicals through cloud processes
p 265 N94-11189
Organometallic chemical vapor deposition and characterization of ZnGe(1-x)Si(x)P2-Ge alloys on GaP substrates p 400 N94-11443
Weld overlay coatings for erosion control
[DE93-013592] p 84 N94-11816
Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity
p 310 N94-12001
Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
Sources of Na for the Io atmosphere
p 455 N94-12127
Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165
Trace element distributions in primitive achondrites
p 431 N94-12200
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Trace element content of chondritic cosmic dust: Volatile enrichments, thermal alterations, and the possibility of contamination p 433 N94-12260
Depletions of sulfur and/or zinc in IDPs: Are they reliable indicators of atmospheric entry heating?
p 433 N94-12261
New low-Ni (igneous?) particles among the C and C? types of cosmic dust p 433 N94-12262
Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780

CHEMICAL EFFECTS
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation
[DE93-617173] p 397 N94-10830

CHEMICAL ENGINEERING
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

CHEMICAL EQUILIBRIUM
The upgrading of the arc heated wind tunnel of the DLR (LBK) with respect to its effects on the material testing
p 4 N94-10432
Thermodynamic model of air in chemical equilibrium
p 7 N94-10448
Combustion chamber analysis code
[NASA-CR-192585] p 46 N94-10934

CHEMICAL EVOLUTION
Nuclear astrophysics
[DE93-010569] p 425 N94-10292
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life
p 283 N94-12210

CHEMICAL FRACTIONATION
Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159
The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256

CHEMICAL INDICATORS
Depletions of sulfur and/or zinc in IDPs: Are they reliable indicators of atmospheric entry heating?
p 433 N94-12261

CHEMICAL PROPERTIES
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

CHEMICAL REACTIONS
Numerical simulation of the flow through a scramjet engine p 3 N94-10425
Thermodynamic model of air in chemical equilibrium
p 7 N94-10448
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method
p 7 N94-10449
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016
KIVA-3: A KIVA program with block-structured mesh for complex geometries
[DE93-011986] p 77 N94-11249
Size dependence of chemical reactivity of gaseous metal clusters: A new mechanistic probe
[AD-A264690] p 77 N94-11264
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
Aluminum-phosphorus chemistry: Preparation and structural characterization of (Et2AlP(SiMe3)2)2, Et(Cl)2Al(dot)P(SiMe3)3, and i-Bu2(Cl)Al(dot)P(SiMe3)3
[AD-A265268] p 78 N94-11683
Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time
[AD-A265530] p 403 N94-12010
The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246
Theories of turbulent combustion in high speed flows
[AD-A265735] p 79 N94-12403
Mid-latitude ionospheric response to active experiments
[NASA-CR-193549] p 280 N94-12583

CHEMICAL REACTORS
Design of a CVD reactor for the deposition of diamond in a microgravity environment p 109 N94-10127

CHEMICAL VAPOR INFILTRATION
New processes for lightweight ceramic matrix composites p 61 N94-10043

CHEMICAL WARFARE
Tandem mass spectrometric analysis of phosphate esters
[AD-A265483] p 78 N94-12009

CHEMILUMINESCENCE
NMR characterization of polymers formed in diazotizing mixtures of luminol and 3-amino-L-tyrosine
[AD-A266093] p 94 N94-12536

CHEMISORPTION
Electrode potential-induced reconstruction of Au(100): Effect of chemisorption on nanoscale dynamics as probed by the in-situ scanning tunneling microscopy
[AD-A265900] p 404 N94-12388

CHINA
International Space Year in China p 36 N94-10680

CHIPS (ELECTRONICS)
RF vacuum microelectronics
[AD-A266066] p 142 N94-10818
Development of microstrip gas chamber and application to imaging gamma-ray detector
[DE93-754294] p 34 N94-11041
A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element
[AD-A265490] p 339 N94-11049
Programmable logic devices
[DE93-013117] p 144 N94-11479
Development of microstrip gas chambers with multi-chip technology
[DE93-753169] p 367 N94-11509
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773

CHIRAL DYNAMICS
Quenched chiral logarithms
[DE93-010195] p 346 N94-11663

CHLORINE
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

CHLOROPHYLLS
The use of CZCS for primary production estimate in the Pacific p 199 N94-11946
CZCS derived chlorophyll distribution in Antarctic water during austral summer p 199 N94-11947
The development of phytoplankton sensing system with optical fiber p 203 N94-11967
Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660
Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan
p 211 N94-12661
The algorithm of primary production determination
p 228 N94-12761
Non-image visible polarization remote sensing of the ocean p 229 N94-12762

CHLOROSILANES
The adsorption and surface reaction of SiCl4 on Si(100)-(2x1)
[AD-A266124] p 79 N94-12538

CHONDRITES
Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020
Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021
Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022
Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035
Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045
The great 8 MA event and the structure of the H-chondrite parent body p 429 N94-12058
Metallographic cooling rates of L-group ordinary chondrites p 429 N94-12061
Alkali-granitoids as fragments within the ordinary chondrite Adzhi-Bogdo: Evidence for highly fractionated, alkali-granitic liquids on asteroids p 429 N94-12069
Preliminary results of Mn partitioning experiments on Murchison analogues p 281 N94-12081
Ar-39 - Ar-40 ages of acapulcoites and lodranites: Evidence for early parent body heating
p 281 N94-12083
Chondrite thermal histories from Low-CA pyroxene microstructures: Autometamorphism versus prograde metamorphism revisited p 429 N94-12105
Cathodoluminescence properties of components in enstatite chondrites p 432 N94-12206
The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208
A CM chondrite cluster and CM streams
p 432 N94-12215
On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation
p 432 N94-12226
Primordial lightning: Evidence preserved in chondrites
p 432 N94-12230

Micro-zoning in minerals of a Landes silicate inclusion p 432 N94-12231
Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244
Diamond thermoluminescence properties of different chondrites p 433 N94-12252
The unusual metallic particles in Krymka LL3.0 chondrite p 433 N94-12253

CHONDRULE
Chondrule formation by clumpy accretion onto the solar nebula p 448 N94-12089
SXRF determination of trace elements in chondrule rims in the unequilibrated CO3 chondrite, ALH A77307 p 429 N94-12106
The experimental production of matrix lumps within chondrules: Evidence of post-formational processes p 431 N94-12176
Flash melting of chondrule precursors in excess of 1600 C. Series 1: Type 2 (B1) chondrule composition experiments p 431 N94-12177
Primordial lightning: Evidence preserved in chondrites p 432 N94-12230
The unusual metallic particles in Krymka LL3.0 chondrite p 433 N94-12253

CHROMATES
Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

CHROMIC ACID
Space environmental effects on the integrity of chromic acid anodized coatings
[NASA-CR-191468] p 55 N94-10947

CHROMIUM ALLOYS
Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204
Monte Carlo simulations of phase transformations in Fe-Cr alloys
[DE93-013847] p 81 N94-10522
In situ XANES studies of the passive film on Fe and Fe-26Cr
[DE93-010869] p 84 N94-11459

CHROMIUM STEELS
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168

CHRONOLOGY
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
The Th and U abundances in chondritic meteorites p 430 N94-12151

CHRONOMETERS
Studies of the release of radiogenic Xe-129 from Bjurboele: Evidence against simple diffusion models p 430 N94-12125

CHUTES
Evolution of steep Martian slopes p 434 N94-11184

CIRCADIAN RHYTHMS
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A266113] p 301 N94-12417

CIRCUIT DIAGRAMS
Direct current transducer
[DE92-644548] p 141 N94-10533

CIRCUITS
Continuous-time adaptive learning circuit
[AD-D015773] p 140 N94-10384
A soft-start circuit for arcjet ignition
[NASA-TM-106287] p 180 N94-10760
Tin whiskers in electronic circuits
[AD-A265917] p 146 N94-12565

CIRCULAR CYLINDERS
Radiation and scattering by cavity-backed antennas on a circular cylinder
[NASA-CR-193409] p 136 N94-11084
Vortex-induced forces on oscillating bluff cylinders
[AD-A265056] p 154 N94-11865

CIRCULAR PLATES
Failure prediction of thin beryllium sheets used in spacecraft structures
[NASA-CR-194164] p 187 N94-11190

CIRCULAR POLARIZATION
Models of Neptune's smooth recurrent radio emission
[NASA-CR-193283] p 484 N94-11312

CIRCULATION CONTROL AIRFOILS
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover
[NASA-CR-4532] p 13 N94-10758

CIRCULATION DISTRIBUTION
Circulation of North Pacific Intermediate Water p 206 N94-11985
SOFAR float tracking in the Shikoku basin p 206 N94-11986

CIRRUS CLOUDS
Characteristic scales and vortex features of mesoscale vortices observed by the satellites during the winter p 199 N94-11943

CITIES
Technical Conference on Tropical Urban Climates: Extended Abstracts
[WMO/TD-538] p 283 N94-10561

CIVIL AVIATION
FAA air traffic activity
[AD-A266043] p 22 N94-12397
US civil airmen statistics for calendar year 1991
[AD-A266085] p 2 N94-12412
Federal Aviation Administration aviation forecasts
[AD-A265611] p 2 N94-12578

CLADDING
Short wavelength crystal fiber devices
[AD-A265716] p 176 N94-12402

CLASSICAL MECHANICS
Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space p 350 N94-10600
Non-barrier tunneling in presence of dissipations
[DE93-621381] p 412 N94-11086
Absorption spectrum calculations using mixed quantum-gaussian wave packet dynamics
[AD-A265179] p 413 N94-11877

CLASSIFICATIONS
Unsupervised splitting rules for neural tree classifiers
[AD-A264961] p 338 N94-10487
Automatic classification system for zooplankton p 203 N94-11969
How diverse is the asteroid belt? p 430 N94-12124
First results of the seven-color asteroid survey p 430 N94-12162
Classification of Martian deltas p 470 N94-12207
Guidelines for the establishment and operation of an RFP (Request for proposal) library
[AD-A265894] p 417 N94-12360
Radarmap of Germany: First mosaic and classification p 246 N94-12477
Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation p 219 N94-12704
A method to minimize reference data in classifying satellite remote sensing data into land cover classes p 219 N94-12705

CLASSIFIERS
Unsupervised splitting rules for neural tree classifiers
[AD-A264961] p 338 N94-10487

CLAYS
Reflectance spectra of sulfate-and carbonate-bearing Fe(3+)-doped montmorillonites as Mars soil analogs p 445 N94-12070
Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091

CLEANING
Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services p 126 N94-10619
Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620
German Air Forces experiences with plastic media blasting and future requirements p 127 N94-10621
Plastic media blasting activities at Hill Air Force Base p 127 N94-10622
Paint removal and surface cleaning using ice particles p 128 N94-10626

CLEANLINESS
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732

CLEBSCH-GORDAN COEFFICIENTS
Generating function for Clebsch-Gordan coefficients of the SU(sub q)(2) quantum algebra
[DE93-613093] p 349 N94-10633

CLIMATE
AMIP: The Atmospheric Model Intercomparison Project
[DE93-007400] p 273 N94-10151
AMIP: The Atmospheric Model Intercomparison Project
[DE93-007413] p 273 N94-10152
The cloud radiative feedback of a midlatitude squall line system and implication for climate study
[DE93-010511] p 283 N94-10290
Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699
Preliminary validation of the low frequency variability of tropospheric temperature and circulation simulated for the AMIP by the ECMWF model
[DE93-012382] p 284 N94-10739
A toolkit for building Earth system models
[DE93-012147] p 276 N94-11138
Development of a graphical user interface and graphics display for the WIND system
[DE93-011780] p 285 N94-11614
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674
Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685
Sea ice: A climate component p 232 N94-11705
Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust p 462 N94-12168
Comments on possible causes of recent global warming
[DE93-010501] p 272 N94-12592
Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

CLIMATE CHANGE
Space program in Indonesia p 36 N94-10681
Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699
Global monitoring of atmospheric properties by the EOS MODIS
[NASA-TM-109237] p 231 N94-11485
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674
The seasonal Sea Ice Monitoring and Modelling Site (SIMMS): Using ERS-1 in climate research p 240 N94-11758
Study of climatic effects of cloud-aerosol interaction p 204 N94-11977
Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

CLIMATOLOGY
AMIP: The Atmospheric Model Intercomparison Project
[DE93-007400] p 273 N94-10151
AMIP: The Atmospheric Model Intercomparison Project
[DE93-007413] p 273 N94-10152
Database blending for the climatology of cloud statistics program
[AD-A265034] p 283 N94-10336
Technical Conference on Tropical Urban Climates: Extended Abstracts
[WMO/TD-538] p 283 N94-10561
Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699
Estimating Photosynthetically Available Radiation (PAR) at the Earth's surface from satellite observations p 230 N94-10955
A toolkit for building Earth system models
[DE93-012147] p 276 N94-11138
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674
Study of climatic effects of cloud-aerosol interaction p 204 N94-11977
Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

CLINICAL MEDICINE
National Institute of Health Almanac, 1992
[PB93-183556] p 303 N94-10828
The Department of Clinical Investigation, reports control symbol MED-300(R-1)
[AD-A264969] p 304 N94-11649
International Telemedicine/Disaster Medicine Conference: Papers and Presentations
[NASA-NP-207] p 304 N94-11787
Medical informatics and telemedicine: A vision p 305 N94-11788
Telemedicine and international disaster response: Medical consultation to Armenia and Russia via a telemedicine spacebridge p 305 N94-11790
Clinical aspects of telemedicine p 306 N94-11795
New technology applied to telemedicine p 306 N94-11796
Linking medical records to an expert system p 306 N94-11797
Commercial applications of telemedicine p 306 N94-11798
The use of communication technology in medicine p 306 N94-11800

CLOCKS
Disciplined rubidium oscillator with GPS selective availability p 353 N94-10977
TimeSet: A computer program that accesses five atomic time services on two continents p 334 N94-10985

RighTime: A real time clock correcting program for MS-DOS-based computer systems p 334 N94-10986
Measurement methods and algorithms for comparison of local and remote clocks p 354 N94-10987
Advances in time-scale algorithms p 334 N94-10988
The limit of frequency estimation p 356 N94-11001

CLOSED ECOLOGICAL SYSTEMS
Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber [NASA-TM-109188] p 315 N94-11258
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553
Space Life Support Engineering Program [NASA-CR-193474] p 316 N94-12365
Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369

CLOUD COVER
Database blending for the climatology of cloud statistics program [AD-A265034] p 283 N94-10336
A modeling perspective on cloud radiative forcing [DE93-012383] p 276 N94-11241
Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926
Study of climatic effects of cloud-aerosol interaction p 204 N94-11977
Incident shortwave and longwave radiations over the western North Pacific and the Sea of Okhotsk derived from GMS-WEFAX images p 205 N94-11982
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725

CLOUD PHYSICS
Numerical simulations on the redistribution of atmospheric trace chemicals through cloud processes p 265 N94-11189
Global monitoring of atmospheric properties by the EOS MODIS [NASA-TM-109237] p 231 N94-11485
Central Equatorial Pacific Experiment (CEPEX) [DE93-011656] p 190 N94-11674

CLOUDS (METEOROLOGY)
The impact of horizontal resolution on moist processes in the ECMWF model [DE93-011718] p 276 N94-11227
Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926
Study of climatic effects of cloud-aerosol interaction p 204 N94-11977
Incident shortwave and longwave radiations over the western North Pacific and the Sea of Okhotsk derived from GMS-WEFAX images p 205 N94-11982
Cloud studies using ATSR data p 253 N94-12517
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725

CLUSTER ANALYSIS
Analyzing human errors in flight mission operations p 314 N94-11534
Mass and spatial distribution of carbonaceous component in Comet Halley p 433 N94-12263

CLUSTERS
Enhanced stability of magic clusters: A case study of icosahedric Al(sub 12)X, X=B, Al, Ga, C, Si, Ge, Ti, As [DE93-613644] p 395 N94-10386
Structure of s - p bonded metal clusters with 8, 20 and 40 valence electrons [DE93-613643] p 361 N94-10503
Atomic structures and compositions of internal interfaces [DE93-014840] p 363 N94-10750
Ionization potentials of small carbon clusters [AD-A264379] p 67 N94-11260
Size dependence of chemical reactivity of gaseous metal clusters: A new mechanistic probe [AD-A264690] p 77 N94-11264

CMOS
Radiation hardened nonvolatile memory for space and strategic applications [DE93-000746] p 319 N94-10146
Investigation of soft errors in MOS RAM under influence of heavy ions [DE92-644554] p 484 N94-10534
Relationship between IBICC imaging and SEU in CMOS ICs [DE93-009854] p 143 N94-11285

COAL DERIVED LIQUIDS
Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282

COALESCING
A method of influence regions in the theory of vacancy swelling of metals [DE93-620579] p 83 N94-11363

COASTAL CURRENTS
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720
SAR imaging of dynamical features in the English Channel p 234 N94-11721
Kuroshio observations by the HF ocean radar p 192 N94-11904
Statistical study of HF ocean radar echo p 139 N94-11905
Groundwave HF ocean surface radar p 139 N94-11906
One-year mooring of an ADCP in the central region of the Kuroshio west of Okinawa p 194 N94-11913
Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914
Sea surface heat flux in the beginning of the Kuroshio p 195 N94-11923
Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924
Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925
Analysis of the characteristic and mechanism of suspended matter transportation in Huanghe delta sea area using remote sensing techniques p 197 N94-11930
Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936
Appearance, behavior, and oceanic structures of warm streamers in the Kuroshio Oyashio frontal region p 198 N94-11937
Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938
The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942
SOFAR float tracking in the Shikoku basin p 206 N94-11986
On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987
Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639
Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649
Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650
Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658
Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673
Satellite observations of the northeast monsoon coastal current p 214 N94-12678
Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679
Statistical features of mesoscale eddies at the Kuroshio front p 215 N94-12682
Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683
A study of front dynamics off northeastern Taiwan based on the NOAA-AVHRR satellite remote sensing data p 215 N94-12684
Satellite thermal variations of Kuroshio in relation to storm floods p 215 N94-12685
ADCP evidence for upper layer circulation in northeast of the South China Sea p 215 N94-12686
Frontal zones in Pacific Ocean: Satellite and ship data analysis p 216 N94-12687
The circulation near Luzon p 219 N94-12707
Current variability on the shelf break northeast of Taiwan p 219 N94-12708
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709
Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data p 220 N94-12711
The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713
Satellite and moored buoy observations of polar frontal system over the Yamato Rise in the Japan Sea p 221 N94-12715
Variability of the Kuroshio observed from satellite thermal imagery p 221 N94-12717
Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724
Influence of the Kuroshio warm-core rings on hydrographic and fishery conditions off southern Kuril Islands p 224 N94-12737
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752
Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754
Model of Kuroshio region circulation p 229 N94-12765

COASTAL ECOLOGY
Arctic coastal polynya observations with ERS-1 SAR and DMSP SSM/I p 239 N94-11748
Automatic classification system for zooplankton p 203 N94-11969

COASTAL PLAINS
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697

COASTAL WATER
Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970
Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis p 254 N94-12523
ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526
Observation of wave crests by satellite remote sensed data p 207 N94-12638
Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664
Remote sensing of polluting focal points and coastal disturbances in the Gulf of Arauco and adjacent bays, central Chile p 217 N94-12695
Study on sea water purification using a substratum of marine organisms p 217 N94-12696
Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709
Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714
Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744
A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing p 228 N94-12757
High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758
Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759

COASTAL ZONE COLOR SCANNER
A statistical method to determine aerosol path radiance and its application to atmospheric correction for CZCS imagery p 191 N94-11897
The use of CZCS for primary production estimate in the Pacific p 199 N94-11946
CZCS derived chlorophyll distribution in Antarctic water during austral summer p 199 N94-11947
Seasonal changes of phytoplankton distributions in the Northwest Pacific detected by Coastal Zone Color Scanner p 200 N94-11948
Satellite-derived oceanic features p 200 N94-11949
Particle dynamics in the western subarctic Pacific: Implications from CZCS imagery p 200 N94-11950
High-reflectance water mass in Off-Sanriku area observed by CZCS p 200 N94-11951
Atmospheric correction plans for SeaWiFS p 204 N94-11975
Distribution of mineral aerosols over the North Pacific p 204 N94-11976
Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978

COASTS
Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846
Biscayne bay: A bibliography of the marine environment [PB93-184802] p 266 N94-11451
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697
Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524

Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology
p 254 N94-12528
Study of growing processes of a tombolo using an air photograph p 218 N94-12702
Model of Kuroshio region circulation
p 229 N94-12765

COATING
Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL
[DE93-013430] p 95 N94-12602
Performance aspects of de Laval spray-forming nozzles
[DE93-013671] p 163 N94-12604

COATINGS
Formulating infrared coatings for defence applications
[MRL-RR-1-93] p 90 N94-11302
Boundary integral solution to the electromagnetic scattering from coated surfaces containing edges, gaps, and periodic gratings p 137 N94-11639
Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL
[DE93-013430] p 95 N94-12602

COAXIAL FLOW
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions
[NASA-CR-193339] p 152 N94-11526

COBALT ALLOYS
Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202

COBALT OXIDES
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527

COBALT 60
Demonstration prototype gamma-ray hodoscope alternative to CARGOSCAN for rocket stage monitoring
[DE93-006908] p 169 N94-10326

COCKPIT SIMULATORS
Flight simulator experiment of the cockpit advisory system
[NAL-TR-1151] p 33 N94-10733
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

CODE DIVISION MULTIPLE ACCESS
Two way time transfer results at NRL and USNO
p 353 N94-10983

CODE DIVISION MULTIPLEXING
A fiber optic network system with low crosstalk using code-division multiplexing
[AD-D015763] p 374 N94-10376

CODERS
Flexible high-speed CODEC
[NASA-CR-191169] p 146 N94-12433

CODING
STGT program: Ada coding and architecture lessons learned p 330 N94-11437

COEFFICIENT OF FRICTION
Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves
p 165 N94-12627

COEFFICIENTS
Low cost and thermally stable sandwich design for FIRST p 57 N94-10009

COGNITION
Qualitative reasoning about the physical world
[AD-A266117] p 340 N94-12537

COGNITIVE PSYCHOLOGY
Vigilance problems in orbiter processing
p 314 N94-11536
Cognitive engineering models: A prerequisite to the design of human-computer interaction in complex dynamic systems
[NASA-CR-193472] p 320 N94-12558

COHERENT LIGHT
Smoothly deformed light p 375 N94-10566
LCLS optics: Selected technological issues and scientific opportunities
[DE93-010953] p 175 N94-11468

COHERENT RADIATION
Coherence effects in radiometry and in spectroscopy
[DE93-013437] p 75 N94-10519
Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567
Spatial coherence of soft x ray lasers
[DE93-012497] p 176 N94-12590

COLD ACCLIMATIZATION
Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats
[AD-A265309] p 301 N94-11861

COLD BOKKEVELD METEORITE
Determining the relative extent of alteration in CM chondrites p 430 N94-12114

COLD FLOW TESTS
Space nuclear thermal propulsion nuclear element tests at Sandia National Laboratories
[DE93-002301] p 45 N94-10282

COLD FRONTS
On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822

COLD PRESSING
Cold press sintering of simulated lunar basalt
p 131 N94-12026

COLLAPSE
Finite element simulation of the 2D collapse of a polyelectrolyte gel disk
[DE93-010693] p 91 N94-11665

COLLIMATION
Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

COLLISION AVOIDANCE
Preliminary system design of a Three Arm Capture Mechanism (TACM) flight demonstration article
[NASA-CR-192573] p 177 N94-10341
Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers
[NASA-CR-193569] p 23 N94-11525
Evaluation of the C/EC/KC-135 ground collision avoidance system (GCAS), Study 2
[AD-A265193] p 24 N94-11879

COLLISION PARAMETERS
Collision-induced squeezing in a harmonic oscillator
p 379 N94-10597
Collision lifetimes and impact statistics of near-Earth asteroids p 429 N94-12092
Deviations from the straight line: Bumps (and grinds) in the collisionally evolved size distribution of asteroids
p 431 N94-12201

COLLISION RATES
Collision lifetimes and impact statistics of near-Earth asteroids p 429 N94-12092

COLLISIONAL PLASMAS
Scattering of modulated Ultra-Relativistic Electron Beam (UREB) by atmospheric plasma
[DE93-620987] p 387 N94-10558
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211

COLLISIONLESS PLASMAS
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119

COLLOIDS
Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels
[NASA-TM-106259] p 90 N94-11257
The physics of pattern formation of liquid interfaces
[DE93-013333] p 154 N94-11814

COLOR
Squeezed colour states in gluon jet
p 379 N94-10599

COLOR TELEVISION
Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

COLOR-COLOR DIAGRAM
The controlling parameters of the integrated flux of a stellar population p 426 N94-11187

COLUMBUS SPACE STATION
Columbus proto-planetesimal dust aggregation experiment p 123 N94-10236

COMBAT
Assured Mission Support Space Architecture (AMSSA) study p 348 N94-11573
Aviators, air combat, and combat stress: An Air F orce commander's primer
[AD-A265083] p 313 N94-11867

COMBINATORIAL ANALYSIS
Algorithms for the maximum clique problem
[MEMO-1101] p 322 N94-10419
Bounding the Vapnik-Chervonenkis dimension of concept classes parameterized by real numbers
[DE93-011600] p 331 N94-11611

COMBUSTIBLE FLOW
The evolution equation for the flame surface density in turbulent premixed combustion p 81 N94-12316
Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317
Generation of two-dimensional vortices in a cross-flow
p 160 N94-12318

COMBUSTION
Some aspects of combustion modelling by low and normal gravity p 124 N94-10244
Microgravity combustion of dust suspension in a spherical chamber p 80 N94-10248
Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788
Preprints of the 13th Hydrogen Energy System Symposium
[DE93-781115] p 99 N94-11444

COMBUSTION CHAMBERS
External combustion engine having a combustion expansion chamber
[AD-D015761] p 178 N94-10375
Heat regenerative external combustion engine
[AD-D015765] p 178 N94-10378
Axisymmetric single shear element combustion instability experiment
[NASA-TM-106327] p 46 N94-10763
Combustion chamber analysis code
[NASA-CR-192585] p 46 N94-10934
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
On the combustion of a laminar spray
[NASA-TM-106210] p 28 N94-11238
A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints
[NASA-TM-108418] p 188 N94-11275
Preprints of the 13th Hydrogen Energy System Symposium
[DE93-781115] p 99 N94-11444

COMBUSTION CHEMISTRY
The intensity of knock in an internal combustion engine: An experimental and modeling study
[DE93-013089] p 177 N94-10322
Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317
Distributed combustion in solid propellants
[AD-A265727] p 99 N94-12564

COMBUSTION CONTROL
Shear flow control of gas jets in liquids
[AD-A264673] p 152 N94-11448

COMBUSTION EFFICIENCY
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234

COMBUSTION PHYSICS
Some aspects of combustion modelling by low and normal gravity p 124 N94-10244
Microgravity combustion of dust suspension in a spherical chamber p 80 N94-10248
Summary of research in progress at ICASE
[NASA-CR-191481] p 318 N94-11198
KIVA-3: A KIVA program with block-structured mesh for complex geometries
[DE93-011986] p 77 N94-11249
Mapping closures for turbulent combustion
[AD-A265671] p 79 N94-12378
Distributed combustion in solid propellants
[AD-A265727] p 99 N94-12564

COMBUSTION PRODUCTS
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
Pulsed plasma processing for control of diesel engine emissions
[DE93-011884] p 181 N94-11247
High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment
[DE93-012430] p 72 N94-11368
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces
[DE93-012767] p 77 N94-11370
A combustion products analyzer for contingency use during thermodegradation events on spacecraft
p 318 N94-11555
Analytical method for water vapor collection and analysis in aircraft cabin fires
[DOT/FAA/CT-TN93/33] p 22 N94-12575
Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution
p 214 N94-12677

COMBUSTION STABILITY
Axisymmetric single shear element combustion instability experiment
[NASA-TM-106327] p 46 N94-10763

COMBUSTION TEMPERATURE
The pyrene laser induced fluorescence technique as a diagnostic tool for combustion thermometry in microgravity p 107 N94-10113

COMET RENDEZVOUS ASTEROID FLYBY MISSION

Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument [NASA-CR-194376] p 427 N94-12566

COMETS

Origins of Solar Systems Workshop: The Origin, Evolution, and Detectability of Short Period Comets [NASA-CR-194255] p 427 N94-11628

The long-term dynamical behavior of short-period comets p 427 N94-11629

Identification of cometary and asteroidal particles in stratospheric IDP collections p 430 N94-12115

COMMAND AND CONTROL

In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT) [NAL-TR-1165] p 43 N94-10859

High-performance distributed systems architecture [AD-A265297] p 337 N94-11829

Special investigation report: Commercial space launch incident, launch procedure anomaly orbital sciences corporation PEGASUS/SCD-1, 80 nautical miles east of Cape Canaveral, Florida, February 9, 1993 [PB93-917003] p 40 N94-11893

COMMERCE

Business fleet refueling assessment [PB93-189892] p 98 N94-11017

Pattern of federal procurement from minority and women-owned small business [PB93-189355] p 417 N94-11844

COMMINUTION

Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159

COMMITTEE ON SPACE RESEARCH

Pakistan Space and Upper Atmosphere Research Commission p 37 N94-10693

COMMUNICATION

Correspondence standards [NHB-1450.10B] p 420 N94-11589

COMMUNICATION NETWORKS

Potential markets for advanced satellite communications [NASA-CR-191145] p 41 N94-10512

PARTNERS p 38 N94-10695

Design and analysis of an optical interface message processor [AD-A266079] p 381 N94-10697

An investigation of error characteristics and coding performance [NASA-CR-193620] p 324 N94-10932

Time signal distribution in communication networks based on synchronous digital hierarchy p 139 N94-10989

Telescience capability for the Sondre Stromfjord, Greenland, incoherent-scatter radar facility [NASA-CR-193683] p 136 N94-11206

Use of telescience for biomedical research during space flight p 305 N94-11791

Asynchronous Transfer Mode (ATM) technology: An overview [AD-A266087] p 383 N94-12413

The DOE Program in High-Performance Computing and Communications (HPCC) [DE93-013813] p 334 N94-12606

COMMUNICATION SATELLITES

Preliminary system design of a Three Arm Capture Mechanism (TACM) flight demonstration article [NASA-CR-192573] p 177 N94-10341

COMMUNICATIONS TECHNOLOGY SATELLITE

Overview of KITSAT p 36 N94-10683

PARTNERS p 38 N94-10695

COMMUTER AIRCRAFT

Aircraft Accident/Incident Summary Report: Loss of control. Business Express, Inc., Beechcraft 1900C N811BE near Block Island, Rhode Island, December 28, 1991 [PB93-910405] p 22 N94-11044

COMPACTING

Dynamic high-pressure shock compaction of diamond powders [AD-A266004] p 93 N94-12354

COMPARISON

An intercomparison of the radium mass standards of the UK and the USSR: 2 [NPL-RSA(EXT)-34] p 359 N94-10266

COMPATIBILITY

The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document p 421 N94-11575

COMPENSATORS

A wide-band fiber optic frequency distribution system employing thermally controlled phase compensation p 355 N94-10995

Project of an attitude control system (three axis) of a satellite using the LQG/LTR methodology [INPE-5473-TDI/504] p 44 N94-12356

COMPILERS

Scalable concurrent programming project [AD-A266097] p 328 N94-11295

Avoidance and suppression of compensation code in a trace scheduling compiler [AD-A265612] p 333 N94-12439

COMPLEX SYSTEMS

Symbolic dynamics and description of complexity [DE93-613030] p 418 N94-10485

Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556

Design for testability and diagnosis at the system-level p 184 N94-11563

Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems [AD-A265075] p 382 N94-11653

Cognitive engineering models: A prerequisite to the design of human-computer interaction in complex dynamic systems [NASA-CR-193472] p 320 N94-12558

COMPLEXITY

Symbolic dynamics and description of complexity [DE93-613030] p 418 N94-10485

COMPONENT RELIABILITY

Tin whiskers in electronic circuits [AD-A265917] p 146 N94-12565

COMPOSITE MATERIALS

The EUREKA project portfolio in new materials p 56 N94-10002

Application of composite materials for production nacelle structures p 56 N94-10006

Numerical simulation and experimental results of filament wound CFRP tubes tested under biaxial load p 58 N94-10015

Special problems of 3-D ultrasonic QNDI techniques and applications to composites aerospace structures p 61 N94-10036

Material advances for lightweight TPS p 62 N94-10049

Joints between dissimilar metallic and ceramic materials p 63 N94-10052

A new and efficient way to join composite pipes p 63 N94-10054

High temperature composites in Aerospatiale activities p 64 N94-10062

Fibre optic strain and temperature measurement in composite materials: A review of the OSTIC programme p 65 N94-10066

The Satellite Attack Warning and Assessment Flight Experiment (SAWAFE) p 45 N94-11323

Optical fibre techniques for structural monitoring in composites p 69 N94-11324

Smart processing of composite materials for enhanced performance and properties p 69 N94-11325

On the stability of shape memory materials and their properties in static and dynamic applications p 69 N94-11329

Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone) [AD-A266027] p 91 N94-11487

Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347

Ultrasonic wave interaction with advanced complex materials for nondestructive evaluation applications [AD-A265704] p 74 N94-12401

COMPOSITE PROPELLANTS

Time-temperature shift factors for gun propellants [AD-A264979] p 97 N94-10489

COMPOSITE STRUCTURES

Application of composite materials for production nacelle structures p 56 N94-10006

The application of advanced materials to aircraft nacelle structures p 57 N94-10011

Development of a fatigue analysis approach for CFRP structures under acoustic loading p 58 N94-10018

Quantifying disbond area p 61 N94-10038

A new and efficient way to join composite pipes p 63 N94-10054

Fibre reinforced structures with glass matrix p 64 N94-10064

LAMINV: A computer code for creating laminates having prescribed properties p 65 N94-10069

Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620

Computational simulation of hot composite structures [NASA-TM-106200] p 186 N94-10762

Fiber optic sensing for composite smart structures p 69 N94-11327

Adaptive structure design employing shape memory actuators p 70 N94-11331

Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347

COMPOSITION (PROPERTY)

Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097

COMPRESSED AIR

An investigation on the effectiveness of the piping interference removal system for STOL aircraft wind tunnel tests [NAL-TM-647] p 2 N94-10350

COMPRESSED GAS

Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844

A picosecond high pressure gas switch [DE93-011897] p 142 N94-11050

COMPRESSIBILITY

Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters [DE93-011952] p 150 N94-11026

Cold press sintering of simulated lunar basalt p 131 N94-12026

Theories of turbulent combustion in high speed flows [AD-A265735] p 79 N94-12403

COMPRESSIBILITY EFFECTS

Turbulence modeling and compressibility p 163 N94-12614

COMPRESSIBLE FLOW

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft [PAPER-2D-7] p 11 N94-10472

Large eddy simulation of shock turbulence interaction p 155 N94-12289

Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

Turbulence modeling and compressibility p 163 N94-12614

COMPRESSIBLE FLUIDS

Acoustics of bubbly sediments [AD-A263726] p 288 N94-11299

COMPRESSING

Quantum noise and squeezing in optical parametric oscillator with arbitrary output coupling p 375 N94-10568

Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576

Generalised squeezing and information theory approach to quantum entanglement p 377 N94-10580

Completeness properties of the minimum uncertainty states p 349 N94-10581

Squeezed spin states: Squeezing the spin uncertainty relations p 377 N94-10585

Squeezed states of electrons and transitions of the density of states p 370 N94-10593

Collision-induced squeezing in a harmonic oscillator p 379 N94-10597

Non-stationary and non-linear dispersive medium as external field which generates the squeezed states p 380 N94-10605

Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607

Quantum processes in resonators with moving walls p 380 N94-10612

COMPRESSION TESTS

Level 3 material characterization of NARC HRPF, HRHU, HRHF, and HRPU [NASA-CR-192579] p 65 N94-10812

COMPRESSORS

Method of reducing drag in aerodynamic systems [NASA-CASE-LEW-14791-1] p 12 N94-10672

Cooled spool piston compressor [NASA-CASE-MSC-22020-1] p 179 N94-10674

Theoretical evaluation of R22 and R502 alternatives [DE93-014767] p 411 N94-10853

Accelerated screening methods for predicting lubricant performance in refrigerant compressors [DE93-014773] p 89 N94-11146

COMPULSATORS

Investigation of multiphase railgun systems p 40 N94-11637

COMPUTATION

Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179

Heterogeneous SuperConcurrent Parallelism (HeSCP) [AD-A265004] p 336 N94-11293

Alleviating memory contention in matrix computations on large-scale shared-memory multiprocessors [AD-A265009] p 320 N94-11294

COMPUTATIONAL ASTROPHYSICS

Acceleration of positrons in supernova shocks [NASA-CR-193713] p 425 N94-10511

COMPUTATIONAL CHEMISTRY

Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment p 7 N94-10447

A new decomposition strategy for parallel bonded molecular dynamics [DE93-009839] p 366 N94-11284

COMPUTATIONAL FLUID DYNAMICS

Large time-step stability of explicit one-dimensional advection schemes [NASA-TM-106203] p 342 N94-10362

Simulation of a parallel computer [NAL-TR-1154] p 335 N94-10368

Theoretical and Experimental Methods in Hypersonic Flows [AGARD-CP-514] p 2 N94-10421

CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422

Numerical simulation of the flow through a scramjet engine p 3 N94-10425

In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427

A CFD validation roadmap for hypersonic flows p 5 N94-10439

Synthesis of the Workshop on Hypersonic Flows for ReEntry Problems p 5 N94-10440

Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441

Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction p 6 N94-10443

Joint computational and experimental aerodynamic research on a hypersonic vehicle p 6 N94-10445

Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446

Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment p 7 N94-10447

On the instability of hypersonic flow past a pointed cone: Comparison of theoretical and experimental results at Mach 8 p 8 N94-10453

Studies of hypersonic viscous flows p 8 N94-10454

Calculations of viscous nonequilibrium flows in nozzles p 8 N94-10455

Nonequilibrium hypersonic flow in a wind-tunnel nozzle p 8 N94-10456

Some experimental study and numerical simulation in wind tunnel flow p 8 N94-10457

A CFD-based aerodynamic design procedure for hypersonic wind-tunnel nozzles p 9 N94-10458

Numerical methods for aerothermodynamic design of hypersonic space transport vehicles p 9 N94-10459

Hypersonic flow computations around re-entry vehicles p 9 N94-10461

On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462

A comparison of high resolution upwind solvers on 3-D inviscid hypersonic flows p 10 N94-10463

Local aerothermal problems during Hermes re-entry p 10 N94-10464

Thermal and chemical non equilibrium hypersonic flow computations p 10 N94-10465

Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics: CFD Workshop on GK Airfoil and ONERA M5 Geometry [NAL-SP-20] p 10 N94-10466

Description of 2D problem: Aerodynamic analysis of Garabedian-Korn 75-06-12 airfoil p 10 N94-10467

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-2] p 10 N94-10468

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-3] p 10 N94-10469

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Computation using q-omega 2 equation turbulence model [PAPER-2D-4] p 10 N94-10470

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoils: Computation using Baldwin-Lomax turbulence model [PAPER-2D-5] p 11 N94-10471

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft [PAPER-2D-7] p 11 N94-10472

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-8] p 11 N94-10473

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-9] p 11 N94-10474

Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Compendium of results p 11 N94-10475

Description of 3D problem: Flow analysis around ONERA model M5 configuration p 11 N94-10476

Flow analysis around ONERA model M5 configuration [PAPER-3D-1] p 11 N94-10477

Flow analysis around ONERA model M5 configuration [PAPER-3D-2] p 12 N94-10478

Flow analysis around ONERA model M5 configuration [PAPER-3D-3] p 12 N94-10479

Flow analysis around ONERA model M5 configuration [PAPER-3D-4] p 12 N94-10480

Flow analysis around ONERA model M5 configuration [PAPER-3D-5] p 12 N94-10481

Flow analysis around ONERA model M5 configuration: Compendium of results p 12 N94-10482

Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover [NASA-CR-4532] p 13 N94-10758

A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct [NASA-TM-106250] p 39 N94-10764

Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations [NASA-CR-191161] p 28 N94-10816

Development of a Delaunay-based adaption scheme with applications to complex three-dimensional rotational flows p 149 N94-10824

New aerodynamic information obtained from the solution of the inverse problem for aerofoils [NAL-TR-1172] p 14 N94-10860

Numerical wind tunnel project and computational fluid dynamics at National Aerospace Laboratory, Japan [NAL-TM-648T] p 149 N94-10861

Generation and analysis of hybrid structured/unstructured grids [ARA-MEMO-365] p 324 N94-10893

Combustion chamber analysis code [NASA-CR-192585] p 46 N94-10934

New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939

FORCE2: A state-of-the-art two-phase code for hydrodynamic calculations [DE93-010661] p 150 N94-11072

Turbulent wall jet in blast wave precursor [DE93-011955] p 151 N94-11144

Supersonic airplane study and design [NASA-CR-193219] p 25 N94-11150

Summary of research in progress at ICASE [NASA-CR-191481] p 318 N94-11198

Looking for O(N) Navier-Stokes solutions on non-structured meshes [NASA-CR-191472] p 345 N94-11277

Viscous analysis of three-dimensional rotor flows using a multigrid method [NASA-TM-106266] p 152 N94-11481

Massively parallel hydrodynamics on unstructured grids [DE93-007325] p 153 N94-11601

Modelling quasi-two-dimensional turbulent shear flow p 153 N94-11616

Turbulence modeling for thrust reverser flow field prediction methods [AD-A266139] p 154 N94-11641

Transactions of the 10th Army Conference on Applied Mathematics and Computing [AD-A265098] p 318 N94-11678

SAUNA: A system for grid generation and flow simulation using hybrid structured/unstructured grids [ARA-MEMO-370] p 154 N94-11859

Computation of hypersonic nosetip heat transfer rates for an M829-like projectile [AD-A263226] p 16 N94-11870

The modelling of aerodynamic flows by solution of the Euler equations on mixed polyhedral grids [ARA-84] p 16 N94-11888

Annual Research Briefs, 1992 [NASA-CR-194389] p 155 N94-12284

A local dynamic model for large eddy simulation p 155 N94-12285

Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

Regeneration of near-wall turbulence structures p 158 N94-12308

The three-dimensional evolution of a plane wake p 159 N94-12310

Mixing in a stratified shear flow: Energetics and sampling p 159 N94-12311

Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320

Computational methods for problems in aerodynamics using parallel and vector architectures [AD-A265626] p 16 N94-12377

A determination of the external forces required to move the benchmark active controls testing model in pure plunge and pure pitch [NASA-TM-107743] p 16 N94-12421

Towards a cell-vertex Navier-Stokes algorithm for three-dimensional structured/unstructured meshes [ARA-MEMO-366] p 161 N94-12437

Hypersonic, nonequilibrium flow over a cylindrically blunted 6 deg wedge [NASA-TM-108994] p 162 N94-12571

Modeling void growth and movement with phase change in thermal energy storage canisters [NASA-TM-106288] p 163 N94-12576

Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition [NAL-SP-18] p 163 N94-12611

VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades [CUED/A-TURBO/TR.128] p 166 N94-12777

COMPUTATIONAL GEOMETRY

Bibliographic notes on Voronoi diagrams [PB93-189298] p 343 N94-10825

Transactions of the 10th Army Conference on Applied Mathematics and Computing [AD-A265098] p 318 N94-11678

COMPUTATIONAL GRIDS

A grid generation method to calculate the flow field in a three-dimensional cascade of blades [NAL-TR-1158] p 147 N94-10364

CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422

Hypersonic flow computations around re-entry vehicles p 9 N94-10461

Viscous flow simulation using an upwind method for hexahedral based adaptive meshes [AD-A265901] p 148 N94-10703

Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations [NASA-CR-191161] p 28 N94-10816

Generation and analysis of hybrid structured/unstructured grids [ARA-MEMO-365] p 324 N94-10893

A dynamically adaptive mesh method for internal flows p 149 N94-10896

New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939

DILUTE: A code for studying beam evolution under RF noise [DE93-011605] p 133 N94-10960

Object oriented implementation of adaptive mesh refinement algorithms [DE93-011885] p 325 N94-11112

An improved material interface reconstruction algorithm for Eulerian codes [DE93-011679] p 326 N94-11226

Quality factors and local adaption (with applications in Eulerian hydrodynamics) [DE93-010502] p 151 N94-11272

Viscous analysis of three-dimensional rotor flows using a multigrid method [NASA-TM-106266] p 152 N94-11481

Grid optimization and multigrid techniques for fluid flow and transport problems p 154 N94-11824

SAUNA: A system for grid generation and flow simulation using hybrid structured/unstructured grids [ARA-MEMO-370] p 154 N94-11859

The modelling of aerodynamic flows by solution of the Euler equations on mixed polyhedral grids [ARA-84] p 16 N94-11888

A local dynamic model for large eddy simulation p 155 N94-12285

Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287

A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288

Large eddy simulation of shock turbulence interaction p 155 N94-12289

Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290

Hypersonic, nonequilibrium flow over a cylindrically blunted 6 deg wedge [NASA-TM-108994] p 162 N94-12571

COMPUTER AIDED DESIGN

Numerical methods for aerothermodynamic design of hypersonic space transport vehicles p 9 N94-10459

Computer-aided molecular design of fire resistant aircraft materials p 19 N94-10779

Multilevel computer-aided optimum design of structural systems using multiple basis vectors p 187 N94-11055

Blading models for TURBAN and CSPAN turbomachine design codes
[NASA-CR-191164] p 15 N94-11203
Large project experiences with object-oriented methods and reuse p 329 N94-11431
Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501
RAMCAD (reliability, availability, and maintainability in computer-aided design)
[AD-A265143] p 331 N94-11679

COMPUTER AIDED MANUFACTURING
The graphical library for technological process automatization
[DE93-621316] p 324 N94-11031

COMPUTER AIDED MAPPING
Analysis of IRAS solar system dust data
[NASA-CR-193704] p 483 N94-10949

COMPUTER AIDED TOMOGRAPHY
Resolution for Lanczos and Paige-Saunders inverses in tomography
[DE93-012312] p 327 N94-11240
Potential techniques for non-destructive evaluation of cable materials
[DE93-008350] p 183 N94-11586

COMPUTER ANIMATION
Subroutine functions for generating animation data
[DE93-767973] p 313 N94-10731
Animating engineering science results using AVS
[DE93-011591] p 325 N94-11123
Visualization and simulation of a real physical problem based on physical modeling with the use of computer animation
[INPE-5492-TDI/509] p 325 N94-11166

COMPUTER DESIGN
Optimal cube-connected cube multiprocessors
[NASA-CR-191463] p 337 N94-11308

COMPUTER GRAPHICS
Virtual sound for virtual reality
[DE93-010519] p 321 N94-10291
The graphical library for technological process automatization
[DE93-621316] p 324 N94-11031
Using a private SMDS/ATM network to provide long-haul supercomputing visualization services
[DE93-010692] p 325 N94-11109
Animating engineering science results using AVS
[DE93-011591] p 325 N94-11123
Visualization and simulation of a real physical problem based on physical modeling with the use of computer animation
[INPE-5492-TDI/509] p 325 N94-11166
A heterogeneous graphics procedure for visualization of massively parallel solutions
[DE93-009628] p 336 N94-11270
Space Station maintenance studies using plaid graphics p 335 N94-11578
Development of a graphical user interface and graphics display for the WIND system
[DE93-011760] p 285 N94-11614
Development and implementation of a general purpose x-windows display program
[AD-A265306] p 332 N94-11860
The 1991 version of the plume impingement computer program. Volume 1: Description
[NASA-CR-194192] p 166 N94-12775

COMPUTER INFORMATION SECURITY
Using a private SMDS/ATM network to provide long-haul supercomputing visualization services
[DE93-010692] p 325 N94-11109
An alternative to sneakernet
[DE93-012130] p 419 N94-11137

COMPUTER NETWORKS
Practical authorization in large heterogeneous distributed systems
[DE93-013192] p 335 N94-10324
A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484
Optimization algorithms for integer networks with side constraints for application in routing and scheduling
[AD-A265254] p 322 N94-10492
Optimal routing of IP packets to multi-homed servers
[DE93-010949] p 133 N94-10709
Distributed simulation using a real-time shared memory network
[NASA-TM-106239] p 319 N94-10724
Timing in private digital telecommunication networks
p 139 N94-10991
SONET synchronization: What's happening
p 355 N94-10992
A distributed version of the NASA Engine Performance Program
[NASA-TM-106208] p 327 N94-11231
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL)
[NASA-TM-106238] p 327 N94-11232
High-performance distributed systems architecture
[AD-A265297] p 337 N94-11829
Distributed real-time system design: Theoretical concepts and applications
[AD-A265199] p 337 N94-11881
Analysis of the Army's installation support modules with the private sector's open information systems
[AD-A265667] p 421 N94-12579
Networks of real-time processes
[DE93-013049] p 338 N94-12597

COMPUTER PROGRAMMING
Sandia ocean modeling system programmer's guide and user's manual
[DE93-007427] p 287 N94-10153
System engineering concept demonstration, trade studies, volume 6
[AD-A265472] p 323 N94-10495
An investigation of error characteristics and coding performance
[NASA-CR-193620] p 324 N94-10932
The 1987 RIACS annual report
[NASA-CR-193220] p 324 N94-11046
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL)
[NASA-TM-106238] p 327 N94-11232
Proceedings of the Seventeenth Annual Software Engineering Workshop
[NASA-TM-109245] p 328 N94-11422
Experimental software engineering: Seventeen years of lessons in the SEL p 328 N94-11423
The experience factory: Can it make you a 5? or what is its relationship to other quality and improvement concepts? p 328 N94-11424
Impacts of object-oriented technologies: Seven years of SEL studies p 329 N94-11425
Maximizing reuse: Applying common sense and discipline p 329 N94-11429
Analysis and guidelines for reusable Ada software
[AD-A264918] p 332 N94-11850
Development and implementation of a general purpose x-windows display program
[AD-A265306] p 332 N94-11860
System engineering concept demonstration, process model, volume 3
[AD-A265469] p 333 N94-12008
Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320
Avoidance and suppression of compensation code in a trace scheduling compiler
[AD-A265612] p 333 N94-12439

COMPUTER PROGRAMS
LAMINV: A computer code for creating laminates having prescribed properties p 65 N94-10069
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain
[DE93-013309] p 185 N94-10306
Software usability assessment guide
[AD-A265017] p 321 N94-10335
Techniques, processes, and measures for software safety and reliability
[DE93-012379] p 322 N94-10347
Numerical simulation of sidebands in free electron laser oscillators
[DE93-612675] p 173 N94-10483
Application of parallel processing to a surface patch/wire junction EFIE code
[AD-A264965] p 336 N94-10488
Computer models used to support cleanup decision-making at hazardous and radioactive waste sites
[PB93-183333] p 274 N94-10698
NASA Marshall Space Flight Center solar observatory report, January - June 1993
[NASA-TM-108417] p 423 N94-10866
An investigation of error characteristics and coding performance
[NASA-CR-193620] p 324 N94-10932
Efficient partitioning and assignment on programs for multiprocessor execution
[NASA-CR-193458] p 324 N94-10942
RighTime: A real time clock correcting program for MS-DOS-based computer systems p 334 N94-10986
The graphical library for technological process automatization
[DE93-621316] p 324 N94-11031
FORCE2: A state-of-the-art two-phase code for hydrodynamic calculations
[DE93-010661] p 150 N94-11072
Landing Craft Air Cushion (LCAC) crew selection system manual
[AD-A265158] p 313 N94-11098
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli
[AD-A265168] p 324 N94-11099
An alternative to sneakernet
[DE93-012130] p 419 N94-11137
A toolkit for building Earth system models
[DE93-012147] p 276 N94-11138
ACARA user's manual
[NASA-TM-106277] p 183 N94-11167
Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199
P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1
[AD-A266072] p 304 N94-11224
Development of generic field classes for finite element and finite difference problems
[DE93-011678] p 345 N94-11225
A distributed version of the NASA Engine Performance Program
[NASA-TM-106208] p 327 N94-11231
GRISET certification package
[DE93-011783] p 327 N94-11246
Computational mechanics needs study
[NASA-CR-193712] p 327 N94-11279
GRAFTED (GRAphical Fault Tree EDitor): A fault tree description program for target vulnerability/survivability analysis
[AD-A264078] p 328 N94-11301
The role of metrics and measurements in a software intensive total quality management environment
p 329 N94-11428
Maximizing reuse: Applying common sense and discipline p 329 N94-11429
Development and application of an acceptance testing model p 330 N94-11432
STGT program: Ada coding and architecture lessons learned p 330 N94-11437
Software management guide
[DE93-012034] p 330 N94-11452
Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems
[AD-A265075] p 382 N94-11653
Wind system documentation
[DE93-010381] p 285 N94-11664
COSMIC monthly progress report
[NASA-CR-194400] p 332 N94-11688
NASCAP programmer's reference manual
[NASA-CR-191044] p 278 N94-11702
Linking medical records to an expert system
p 306 N94-11797
Analysis and guidelines for reusable Ada software
[AD-A264918] p 332 N94-11850
FFTSCAN: A program for spectral smoothing using Fourier transforms
[AD-A264921] p 278 N94-11852
The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874
Avoidance and suppression of compensation code in a trace scheduling compiler
[AD-A265612] p 333 N94-12439
Transportable Applications Environment (TAE) Tenth Users' Conference
[NASA-CP-3225] p 333 N94-12448
TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498
Prediction of alumina penetration
[DE93-014017] p 95 N94-12610
Migration of operational ice analysis and forecasting to a workstation platform at the Joint Ice Center
p 212 N94-12666
Simple and low cost image processing system for satellite remote sensing data p 212 N94-12669

COMPUTER STORAGE DEVICES
Holographic multiplexing for 3D optical memory
[AD-A266099] p 171 N94-11420

COMPUTER SYSTEMS DESIGN
Finite state machine microarchitecture transformations described with relational algebra
[MEMO-INF-92-63] p 319 N94-10278
Distributed real-time system design: Theoretical concepts and applications
[AD-A265199] p 337 N94-11881
The instrumentation of the multimodel and multilingual user interface
[AD-A265444] p 333 N94-12332
Transportable Applications Environment (TAE) Tenth Users' Conference
[NASA-CP-3225] p 333 N94-12448
Analysis of the Army's installation support modules with the private sector's open information systems
[AD-A265667] p 421 N94-12579
Simple and low cost image processing system for satellite remote sensing data p 212 N94-12669

COMPUTER SYSTEMS PERFORMANCE
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems
[DE93-009838] p 335 N94-10257
A formally verified algorithm for interactive consistency under a hybrid fault model
[NASA-CR-4527] p 326 N94-11188
Reliability analysis for FDDI dual homing networks
[AD-A266133] p 337 N94-11475
COMPUTER SYSTEMS PROGRAMS
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems
[DE93-009838] p 335 N94-10257
The super vectorfield package for REDUCE. Version 1.0
[MEMO-1099] p 321 N94-10265
Wait-free linearization with an assertional proof
[CS-9208] p 323 N94-10878
A recent Cleanroom success story: The Redwing project p 39 N94-11433
Applying reliability models to the maintenance of Space Shuttle software p 330 N94-11434
The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874
COMPUTER SYSTEMS SIMULATION
Node assignment in heterogeneous computing
[NASA-CR-4534] p 142 N94-11131
COMPUTER TECHNIQUES
The 2nd Annual Meeting of the Society for Research on Biological Rhythms
[AD-A264869] p 303 N94-10872
The 1987 RIACS annual report
[NASA-CR-193220] p 324 N94-11046
Summary of research in progress at ICASE
[NASA-CR-191481] p 318 N94-11198
Computational mechanics needs study
[NASA-CR-193712] p 327 N94-11279
Experimental software engineering: Seventeen years of lessons in the SEL p 328 N94-11423
Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547
COMPUTER VISION
Model-based recognition of 3-D objects by geometric hashing technique
[DE93-612916] p 322 N94-10410
A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element
[AD-A265490] p 339 N94-11049
A summary of image segmentation techniques
[NASA-TM-104022] p 327 N94-11274
Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision
[AD-A265065] p 331 N94-11652
Experiments in mobile robot navigation and range imaging
[DE93-013280] p 341 N94-12598
COMPUTERIZED SIMULATION
Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030
Solving the essentials of an innovative tennis racket product: Functionality, simplicity, and super-lightweight technology p 65 N94-10068
Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080
Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087
Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134
Marangoni motion during melting of a hypermonotectic alloy: Numerical simulations for the D2 experiment IHF04 p 113 N94-10177
Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182
Conductive-radiative model for predicting the shape of Hgl2 crystal grown in the LTVG furnace
p 117 N94-10201
Simulations of D3-D divertor biasing with the LEDGE code
[DE93-010500] p 385 N94-10262
Survey to determine the value of DYNA
[DE93-012390] p 321 N94-10267
A spectral nodal method for discrete ordinates problems in x,y geometry
[DE93-610128] p 342 N94-10283
A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications
[DE93-013248] p 273 N94-10319
A parallel implementation of particle tracking with space charge effects on an Intel iPSC/860
[DE93-012307] p 335 N94-10340
Studies and simulations of the DigiCipher system
[NASA-CR-193470] p 321 N94-10343
Theoretical and Experimental Methods in Hypersonic Flows
[AGARD-CP-514] p 2 N94-10421
Synthesis of the Workshop on Hypersonic Flows for ReEntry Problems p 5 N94-10440
Joint computational and experimental aerodynamic research on a hypersonic vehicle p 6 N94-10445
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method
p 7 N94-10449
Hypersonic multi block flow simulations around space vehicles including non-equilibrium chemistry
p 9 N94-10460
Numerical simulation of sidebands in free electron laser oscillators
[DE93-612675] p 173 N94-10483
A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484
Acceleration of positrons in supernova shocks
[NASA-CR-193713] p 425 N94-10511
Computer models used to support cleanup decision-making at hazardous and radioactive waste sites
[PB93-183333] p 274 N94-10698
Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700
Viscous flow simulation using an upwind method for hexahedral based adaptive meshes
[AD-A265901] p 148 N94-10703
System monitoring and diagnosis with qualitative models
[NASA-CR-193812] p 323 N94-10711
Distributed simulation using a real-time shared memory network
[NASA-TM-106239] p 319 N94-10724
Computational simulation of hot composite structures
[NASA-TM-106200] p 186 N94-10762
Computer-aided molecular design of fire resistant aircraft materials p 19 N94-10779
Fully coupled neutronic and hydrodynamic analysis of space nuclear reactor reentry accidents
[DE93-005459] p 372 N94-10890
Advanced statistical methods for improved data analysis of NASA astrophysics missions
[NASA-CR-193514] p 425 N94-10943
The time keeping system for GPS block IIR
p 24 N94-10964
Development of a cryogenic hydrogen maser at the NPL p 176 N94-10982
FORCE2: A state-of-the-art two-phase code for hydrodynamic calculations
[DE93-010661] p 150 N94-11072
Animating engineering science results using AVS
[DE93-011591] p 325 N94-11123
Visualization and simulation of a real physical problem based on physical modeling with the use of computer animation
[INPE-5492-TDI/509] p 325 N94-11166
Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity
[DE93-011597] p 263 N94-11173
Numerical simulations on the redistribution of atmospheric trace chemicals through cloud processes
p 265 N94-11189
Summary of research in progress at ICASE
[NASA-CR-191481] p 318 N94-11198
A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors
[NASA-TM-106279] p 29 N94-11255
Computational mechanics needs study
[NASA-CR-193712] p 327 N94-11279
A new decomposition strategy for parallel bonded molecular dynamics
[DE93-009839] p 366 N94-11284
Approaches to solar cell design for pulsed laser power receivers p 51 N94-11397
Further studies using matched filter theory and stochastic simulation for gust loads prediction
[NASA-TM-109010] p 26 N94-11587
A molecular dynamics simulation code ISIS
[DE93-753187] p 368 N94-11592
Model reference adaptive control (MRAC) with applications to robotics p 339 N94-11640
Grid optimization and multigrid techniques for fluid flow and transport problems p 154 N94-11824
The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944
An application of reduced gravity model to mesoscale eddies p 199 N94-11945
Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971
Remote sensing for numerical modelling of radiative transfer processes in ocean environment
p 204 N94-11973
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method
p 205 N94-11980
The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981
The origin of Venusian channels: Modelling of thermal erosion by lava p 456 N94-12131
The giant impact produced a precipitated Moon
p 430 N94-12135
A local dynamic model for large eddy simulation
p 155 N94-12285
Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
Large eddy simulation of shock turbulence interaction
p 155 N94-12289
Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290
Large-eddy simulation of turbulent flow with a surface-mounted two-dimensional obstacle
p 156 N94-12291
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number
p 156 N94-12292
Regeneration of near-wall turbulence structures
p 158 N94-12308
Mixing in a stratified shear flow: Energetics and sampling p 159 N94-12311
Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320
Space Life Support Engineering Program
[NASA-CR-193474] p 316 N94-12365
Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369
The DOE Program in High-Performance Computing and Communications (HPCC)
[DE93-013813] p 334 N94-12606
Improved Many-On-Many ROUTE software description
[DE93-013961] p 334 N94-12608
A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665
Generation of internal waves near the shelf boundary
p 229 N94-12763
Model of Kuroshio region circulation
p 229 N94-12765
COMPUTERS
System engineering concept demonstration, technology assessments, volume 5
[AD-A265471] p 323 N94-10494
System engineering concept demonstration, trade studies, volume 6
[AD-A265472] p 323 N94-10495
The 1987 RIACS annual report
[NASA-CR-193220] p 324 N94-11046
CONCATENATED CODES
An investigation of error characteristics and coding performance
[NASA-CR-193620] p 324 N94-10932
CONCENTRATION (COMPOSITION)
Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108
On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173
TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements
p 114 N94-10184
In situ observation of temperature dependence of concentration field during growth of KB5 crystals by holographic interferometry p 115 N94-10187
Hygroscopic absorption to falling films: The effects of the concentration level
[ITN-93-85198] p 148 N94-10391
Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends
[DE93-013140] p 89 N94-11007
A combustion products analyzer for contingency use during thermodegradation events on spacecraft
p 318 N94-11555

CONCENTRATORS
Recent developments in refractive concentrators for space photovoltaic power systems p 52 N94-11402

CONCRETE STRUCTURES
Study on sea water purification using a substratum of marine organisms p 217 N94-12696

CONCRETES
Cold press sintering of simulated lunar basalt
p 131 N94-12026
Three-dimensional finite element analysis of explosive safety facilities: A technology assessment
[AD-A265700] p 35 N94-12562

CONCURRENT PROCESSING
An object-oriented model for extensible concurrent systems: The composition-filters approach
[MEMO-INF-92-87] p 320 N94-10166
Heterogeneous SuperConcurrent Parallelism (HeSCP)
[AD-A265004] p 336 N94-11293
Scalable concurrent programming project
[AD-A266097] p 328 N94-11295
Networks of real-time processes
[DE93-013049] p 338 N94-12597

CONDENSATION
New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation
p 432 N94-12226

CONDENSED MATTER PHYSICS
STARDUST: A simulation experiment of cosmic dust analogues production in microgravity conditions
p 113 N94-10175
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
Recent advances in electron momentum spectroscopy
[DE93-610149] p 361 N94-10333
Singularity spectrum of self-organized criticality
[DE93-613820] p 348 N94-10404

CONDENSING
Two-phase flow heat transfer and hydrodynamics in an electric field p 103 N94-10093

CONDITIONING (LEARNING)
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli
[AD-A265168] p 324 N94-11099

CONDUCTING FLUIDS
The effect of a uniform magnetic field on the onset of steady Marangoni convection in a layer of conducting fluid p 120 N94-10222
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221

CONDUCTING POLYMERS
X ray absorption spectroscopy of electrochemically generated species
[AD-A264749] p 77 N94-11265
Smart polymeric system for electromechanical transduction p 70 N94-11330

CONDUCTION BANDS
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819

CONDUCTION ELECTRONS
Effect of a distribution of exchange parameters within a simple localized-itinerant model
[DE93-610314] p 395 N94-10314

CONDUCTIVE HEAT TRANSFER
Heat analysis of thermoplastic components during the initial stages of manufacturing: A probabilistic approach
p 60 N94-10031
Conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace
p 117 N94-10201
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840

CONES (VOLCANOES)
Venus small volcano classification and description
p 438 N94-12037
Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190

CONFERENCES
Advanced Materials for Lightweight Structures
[ESA-SP-336] p 56 N94-10001
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1
[ESA-SP-333-VOL-1] p 99 N94-10070
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2
[ESA-SP-333-VOL-2] p 112 N94-10171
An account of Sandia's research booth at Supercomputing 1992: A collaborative effort in high-performance computing and networking
[DE93-012397] p 319 N94-10268
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics: CFD Workshop on GK Airfoil and ONERA M5 Geometry
[NAL-SP-20] p 10 N94-10466
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
Technical Conference on Tropical Urban Climates: Extended Abstracts
[WMO/TD-538] p 283 N94-10561
The Second International Workshop on Squeezed States and Uncertainty Relations
[NASA-CP-3219] p 375 N94-10564
Environmentally Safe and Effective Processes for Paint Removal
[AGARD-R-791] p 126 N94-10613
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694
Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors
[DE93-754285] p 371 N94-10719
The First Text Retrieval Conference (TREC-1)
[PB93-191641] p 419 N94-10829
Proceedings of the Workshop on New Aspects of Quantum Field Theories
[DE93-754136] p 411 N94-10887
Preprints of the 13th Hydrogen Energy System Symposium
[DE93-781115] p 99 N94-11444
Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527
Transactions of the 10th Army Conference on Applied Mathematics and Computing
[AD-A265098] p 318 N94-11678
The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research
[AD-A265278] p 313 N94-11701
Proceedings of First ERS-1 Symposium on Space at the Service of Our Environment, volume 1
[ESA-SP-359-VOL-1] p 232 N94-11704
Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings
[AD-A265072] p 92 N94-11866
Computing science and statistics, Volume 24: Graphics and visualization
[AD-A265181] p 332 N94-11878
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1
[JTN-93-80418] p 191 N94-11894
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials
[AD-A266057] p 22 N94-12384
National SBIR Phase 3 Commercialization Conference
[AD-A266083] p 417 N94-12410
Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session)
[DE93-013470] p 340 N94-12428
Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices
[AD-A265685] p 405 N94-12442
Transportable Applications Environment (TAE) Tenth Users' Conference
[NASA-CP-3225] p 333 N94-12448
Proceedings of 1st ERS-1 Symposium on Space at the Service of Our Environment, Volume 2
[ESA-SP-359-VOL-2] p 245 N94-12471
Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2
[JTN-93-80419] p 207 N94-12635

CONFIDENCE LIMITS
Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

CONFINEMENT
Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB
[DE93-010742] p 97 N94-10294
Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578
Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747
Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas
[DE93-613910] p 396 N94-10800
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119

CONFORMAL MAPPING
From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535

CONGRESSIONAL REPORTS
National Aero-Space Plane: A need for program direction and funding decisions
[GAO/NSIAD-93-207] p 416 N94-10910
NASA procurement: Proposed changes to the Jet Propulsion Laboratory contract. Report to Congressional Requesters
[GAO/NSIAD-93-178] p 416 N94-10941
From red tape to results: Creating a government that works better and costs less p 422 N94-11351
From red tape to results: Creating a government that works better and costs less. Executive summary
p 422 N94-11353
The DOE Program in High-Performance Computing and Communications (HPCC)
[DE93-013813] p 334 N94-12606

CONICAL BODIES
On the instability of hypersonic flow past a pointed cone: Comparison of theoretical and experimental results at Mach 8 p 8 N94-10453

CONICS
Quantized conic sections; quantum gravity
[DE93-010950] p 411 N94-10956

CONIFERS
Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests
p 249 N94-12494

CONJUGATE GRADIENT METHOD
Improvements for obtaining iterative solutions of large linear systems
[DE93-767968] p 343 N94-10729
Statistical and optimization methods to expedite neural network training for transient identification
[DE93-009985] p 340 N94-11644

CONJUGATES
Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576

CONNECTIVE TISSUE
Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

CONNECTORS
Fabrication and analysis of a special optical connector containing a 1/4-inch-long optical fiber for DOI tests
[DE93-013115] p 381 N94-10647

CONSERVATION EQUATIONS
Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700

CONSERVATION LAWS
New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations
[NASA-TM-106226] p 150 N94-10939
On cell entropy inequality for discontinuous Galerkin methods
[NASA-CR-191493] p 345 N94-11280

CONSISTENCY
A formally verified algorithm for interactive consistency under a hybrid fault model
[NASA-CR-4527] p 326 N94-11188

CONSOLIDATION
Dynamic high-pressure shock compaction of diamond powders
[AD-A266004] p 93 N94-12354

CONSTITUTIVE EQUATIONS
A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity
[NASA-TM-106122] p 188 N94-11482

CONSTRAINTS
Multilevel computer-aided optimum design of structural systems using multiple basis vectors p 187 N94-11055
CONSTRUCTION
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012220] p 129 N94-11670
CONSULTING
Telemedicine and international disaster response: Medical consultation to Armenia and Russia via a telemedicine spacebridge p 305 N94-11790
Tropical medicine: Telecommunications and technology transfer p 305 N94-11793
US-USSR telemedicine consultation spacebridge to Armenia and Ufa p 308 N94-11809
CONTACTORS
An investigation of conducted and radiated emissions from a hollow-cathode plasma contactor [NASA-CR-191172] p 386 N94-10346
CONTAINERLESS MELTS
Protein, glass, aerosol research, containerless processing and diagnostics technology for microgravity application p 106 N94-10112
Gas film levitator for containerless processing of glasses in microgravity conditions: Early concept and technology demonstration p 108 N94-10122
TEMPUS: An electromagnetic levitation facility for containerless processing under micro-g in Spacelab p 109 N94-10125
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129
Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131
Solidification in immiscible systems: The influence of processing conditions on resulting microstructures p 112 N94-10174
Thermophysical properties of undercooled liquid metals p 86 N94-10190
Non-equilibrium solidification in undercooled Ni-B alloys p 86 N94-10196
Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205
Memory effects in the organometallic chemical beam epitaxy of compound semiconductors [NASA-CR-193106] p 399 N94-11439
CONTAINMENT
A prototype urine collection device for female aircrew p 317 N94-11549
CONTAMINANTS
Wave generation by contaminant ions [NASA-CR-193558] p 364 N94-10946
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer [DE93-011950] p 275 N94-11052
Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers [PB93-181592] p 266 N94-11471
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553
Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring [DE93-014093] p 272 N94-12783
CONTAMINATION
Presentations to the Mexican Physics Society on Environmental Contamination [DE93-009565] p 264 N94-10256
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films [DE93-767974] p 82 N94-10732
Immediate response to free product discovery [PB93-182970] p 265 N94-11015
Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472
Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE) [NASA-CR-192572] p 73 N94-11484
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553
KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161
The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774
CONTINENTAL SHELVES
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720
Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709
High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758
Generation of internal waves near the shelf boundary p 229 N94-12763
CONTINUOUS RADIATION
Semiconductor ring lasers [DE93-012386] p 174 N94-11005
CONTINUOUS SPECTRA
Disk-resolved spectral characteristics of Saturn's medium-sized satellites p 471 N94-12213
CONTINUOUS WAVE RADAR
HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902
Measurement of wave parameters by HF ocean radar p 192 N94-11903
Kuroshio observations by the HF ocean radar p 192 N94-11904
Statistical study of HF ocean radar echo p 139 N94-11905
CONTINUUM MECHANICS
Research in computing and applied mathematics [AD-A266137] p 331 N94-11657
CONTINUUM MODELING
Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044
Explicit 3D continuum fracture modeling with smooth particle hydrodynamics p 429 N94-12062
CONTINUUMS
Generalized spin systems and sigma-models [DE93-613981] p 410 N94-10802
CONTRACT MANAGEMENT
Federal contractors in appalachia [PB93-188779] p 416 N94-11473
Guidelines for the establishment and operation of an RFP (Request for proposal) library [AD-A265894] p 417 N94-12360
Financial management: NASA's financial reports are based on unreliable data [AD-A265690] p 418 N94-12443
CONTRACT NEGOTIATION
NASA procurement: Proposed changes to the Jet Propulsion Laboratory contract. Report to Congressional Requesters [GAO/NSIAD-93-178] p 416 N94-10941
CONTRACTION
Finite element simulation of the 2D collapse of a polyelectrolyte gel disk [DE93-010693] p 91 N94-11665
CONTRACTORS
The NASA Lewis Research Center SBIR program: An assessment [NASA-TM-106205] p 485 N94-10356
Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Incorporated [DE93-012509] p 420 N94-11369
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012181] p 129 N94-11456
Federal contractors in appalachia [PB93-188779] p 416 N94-11473
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012220] p 129 N94-11670
Guidelines for the establishment and operation of an RFP (Request for proposal) library [AD-A265894] p 417 N94-12360
National SBIR Phase 3 Commercialization Conference [AD-A266083] p 417 N94-12410
Financial management: NASA's financial reports are based on unreliable data [AD-A265690] p 418 N94-12443
CONTRACTS
Landsat as a commercial enterprise [INPE-5477-TAE/019] p 232 N94-11524
Guidelines for the establishment and operation of an RFP (Request for proposal) library [AD-A265894] p 417 N94-12360
CONTRAILS
Stratospheric aircraft exhaust plume and wake chemistry [NASA-CR-191495] p 279 N94-12572
CONTRAST
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli [AD-A265168] p 324 N94-11099
CONTROL EQUIPMENT
A portable controller for unmanned ground vehicles [AD-A264963] p 181 N94-11290
Decoupling of aircraft responses p 32 N94-11497
Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501
An optoelectronic graphics display processor [AD-A266011] p 171 N94-12391
CONTROL RODS
GRISET certification package [DE93-011783] p 327 N94-11246
CONTROL SIMULATION
Mechanical analysis of parallel manipulators with simulation, design, and control applications [ISBN-0-315-72013-1] p 181 N94-11156
CONTROL STABILITY
Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195
Stability in Aerospace Systems [AGARD-R-789] p 31 N94-11489
Stability analysis and aerospace vehicle dynamics p 31 N94-11491
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492
CONTROL SURFACES
Underwing compression vortex attenuation device [NASA-CASE-LAR-14744-1] p 12 N94-10673
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233
CONTROL SYSTEMS DESIGN
Position and force control of a vehicle with two or more steerable drive wheels [DE93-012512] p 177 N94-10269
Telerobotic control of a mobile coordinated robotic server [NASA-CR-193465] p 338 N94-10345
Telerobot control system [NASA-CASE-NPO-18116-1-CU] p 179 N94-10670
Momentum management in redundant manipulators for vibration suppression [NASA-CR-194112] p 180 N94-10821
AD100/ADSIM, ACSL, and MATLAB output comparisons using frequency-response analysis [DE93-009640] p 47 N94-11122
Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft [NASA-TP-3356] p 30 N94-11134
Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195
Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251
Adaptive structures for spacecraft: A USAF perspective p 45 N94-11319
Dynamic tests on the NASA Langley CSI evolutionary model p 45 N94-11320
Adaptive structure design employing shape memory actuators p 70 N94-11331
Multidimensional intelligent control for superlight air vehicles p 27 N94-11347
Shear flow control of gas jets in liquids [AD-A264673] p 152 N94-11448
Stability in Aerospace Systems [AGARD-R-789] p 31 N94-11489
Stability analysis and aerospace vehicle dynamics p 31 N94-11491
Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501
Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502
Toward intelligent flight control p 33 N94-11503
X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504
Discrete Kalman filtering equations of second-order form for control-structure interaction simulations [NASA-CR-193723] p 331 N94-11522
Airborne optical tracking control system design study [DE93-009515] p 382 N94-11662
Microgravity vibration isolation technology: Development to demonstration [NASA-TM-106320] p 1 N94-11703
Galileo EM-2 contributions to the lunar control network p 468 N94-12198
Advanced control for airbreathing engines, volume 1: Pratt and Whitney [NASA-CR-189203] p 29 N94-12270
Advanced control for airbreathing engines, volume 2: General Electric aircraft engines [NASA-CR-189204] p 29 N94-12271
Project of an attitude control system (three axis) of a satellite using the LQG/LTR methodology [INPE-5473-TDI/504] p 44 N94-12356
CONTROL THEORY
Acting to gain information [NASA-CR-193399] p 418 N94-10515
Intelligent structures: A technology overview and assessment p 68 N94-11322

On possible applications of smart structures to control of space systems p 45 N94-11342

A regional inverse eigenvalue problem: Solution with application in control theory [DE93-619666] p 339 N94-11630

Receptivity in parallel flows: An adjoint approach p 157 N94-12301

Control of large space structures with varying configuration [AD-A265764] p 44 N94-12387

CONTROL VALVES

Dual valve plate two-way pressure relief valve [AD-D015766] p 178 N94-10379

CONTROLLED ATMOSPHERES

Wide Band-Gap Semiconductors. 1991 Materials Research Society Symposium proceedings [AD-A263418] p 401 N94-11515

CONTROLLED FUSION

High-energy density physics at Los Alamos [DE93-010271] p 371 N94-10260

Multiple Antenna Implementation System (MAntIS) [DE93-012515] p 131 N94-10270

CONTROLLERS

Telerobotic control of a mobile coordinated robotic server [NASA-CR-193465] p 338 N94-10345

Controller of serial multiplex communication channel [DE92-641157] p 336 N94-10544

Telerobot control system [NASA-CASE-NPO-18116-1-CU] p 179 N94-10670

In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734

Sample-data and discrete-time H2 optimal control [MEMO-COSOR-92-53] p 339 N94-10869

The development of an interactive synthesis tool for intelligent controllers of modular, reconfigurable robots p 339 N94-10898

Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251

A portable controller for unmanned ground vehicles [AD-A264963] p 181 N94-11290

Sine and random vibration program evaluation on vibration control systems [DE93-011974] p 188 N94-11460

Ballistic electron transport studies using BEEM [AD-A266029] p 369 N94-12395

CONVECTION

Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081

Space and temporal behavior and control of the residual convection in microgravity p 104 N94-10099

The effect of gravity modulation on thermosolutal convection p 105 N94-10103

Chemical pattern formation under microgravity p 121 N94-10227

Some aspects of combustion modelling by low and normal gravity p 124 N94-10244

Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity [DE93-617852] p 388 N94-10840

Transmantle flux tectonics p 283 N94-12249

Phase transitions and 2D spherical convection in a large icy satellite p 433 N94-12265

Topics in pattern formation and chaotic systems [AD-A265922] p 161 N94-12342

Observing and modelling F-region ionospheric dynamics using the (O2) 7320A emission [AD-A265407] p 279 N94-12419

A numerical study of deep convection at high latitudes p 210 N94-12652

CONVECTION CELLS

Marangoni instability in a liquid layer with two free surfaces [NASA-TM-106166] p 152 N94-11376

CONVECTION CLOUDS

Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment [NASA-CR-193829] p 285 N94-11598

CONVECTION CURRENTS

Large eddy simulations of the atmospheric boundary layer east of the Colorado Rockies p 277 N94-11465

An investigation of the near Earth space environments [AD-A265295] p 278 N94-11628

CONVECTION-DIFFUSION EQUATION

Concept and design of ampoule for melt growth of gallium arsenide in first mission of space flyer unit p 107 N94-10115

New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939

CONVECTIVE FLOW

Model of convective motion under low gravity p 103 N94-10088

Coupled thermogravitational and thermocapillary convection in a two-layer fluid system p 105 N94-10101

Flow transitions in a 2D directional solidification model p 114 N94-10183

TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements p 114 N94-10184

The kinematics of buoyancy induced mixing p 123 N94-10239

Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287

A numerical study of deep convection at high latitudes p 210 N94-12652

CONVECTIVE HEAT TRANSFER

Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107

Simulations of D3-D divertor biasing with the LEDGE code [DE93-010500] p 385 N94-10262

On temperature distribution in non-participating medium with radiation boundary condition [DE93-619375] p 153 N94-11604

Why convective heat transport in the solar nebula was inefficient p 458 N94-12143

Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217

Phase transitions and 2D spherical convection in a large icy satellite p 433 N94-12265

Hypersonic, nonequilibrium flow over a cylindrically blunted 6 deg wedge [NASA-TM-108994] p 162 N94-12571

CONVERGENCE

Convergence of exponentially convex functions on foundation semigroups [DE93-619665] p 342 N94-10325

Convergence theorems for a class of nonlinear maps in uniformly smooth Banach spaces [DE92-641347] p 343 N94-10531

Computational algorithms or identification of distributed parameter systems [AD-A265252] p 331 N94-11680

CONVERGENT NOZZLES

Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912

CONVERGENT-DIVERGENT NOZZLES

Nonequilibrium hypersonic flow in a wind-tunnel nozzle p 8 N94-10456

CONVEXITY

Bibliographic notes on Voronoi diagrams [PB93-189298] p 343 N94-10825

COOLERS

The Second Workshop on Refrigerating System Utilization Onboard the JEM [NASDA-CON-930001] p 129 N94-11831

Development of space refrigerator p 129 N94-11833

Studies on refrigerator sensors and cooling section interface p 129 N94-11834

Trend of miniature refrigerator utilization in earth observation area p 130 N94-11835

Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837

Refrigerator utilization in infrared astronomy p 130 N94-11838

Study on various cryogenic refrigeration cycles using all purpose refrigerators p 130 N94-11839

Development test on 2 K cooling systems p 130 N94-11840

Generation of superfluid He by G-M cycle cryogenic refrigerator p 130 N94-11841

Development of 4 K refrigerator using highly efficient heat accumulating reservoir p 130 N94-11842

Utilization of superconductivity in the area of space p 131 N94-11843

COOLING

Measurements of heat capacity in undercooled metals p 87 N94-10231

Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241

Titanium alloys milling assistance by high pressure lubricoolant jet [DE93-013302] p 82 N94-11008

Metallographic cooling rates of L-group ordinary chondrites p 429 N94-12061

Chondrite thermal histories from Low-CA pyroxene microstructures: Autometamorphism versus prograde metamorphism revisited p 429 N94-12105

COOLING SYSTEMS

Experiments in ultracold collisions [DE93-012110] p 365 N94-11029

The Second Workshop on Refrigerating System Utilization Onboard the JEM [NASDA-CON-930001] p 129 N94-11831

Summary of the pre-AO of the JEM onboard scientific and engineering experiments for refrigerator utilization p 129 N94-11832

Development of space refrigerator p 129 N94-11833

Studies on refrigerator sensors and cooling section interface p 129 N94-11834

Trend of miniature refrigerator utilization in earth observation area p 130 N94-11835

Satellite observation of atmospheric tracer components: JEM/POP p 130 N94-11836

Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837

Refrigerator utilization in infrared astronomy p 130 N94-11838

Study on various cryogenic refrigeration cycles using all purpose refrigerators p 130 N94-11839

Development test on 2 K cooling systems p 130 N94-11840

Generation of superfluid He by G-M cycle cryogenic refrigerator p 130 N94-11841

Development of 4 K refrigerator using highly efficient heat accumulating reservoir p 130 N94-11842

Utilization of superconductivity in the area of space p 131 N94-11843

A unique facility to support cryogenic wind tunnel operations [ARA-MEMO-377] p 34 N94-12436

COOPERATION

National Aero-Space Plane: A need for program direction and funding decisions [GAO/NSIAD-93-207] p 416 N94-10910

COORDINATE TRANSFORMATIONS

On output linearization of observable dynamics [MEMO-1105] p 341 N94-10276

Subroutine functions for generating animation data [DE93-767973] p 313 N94-10731

COORDINATES

Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space p 350 N94-10600

COPOLYMERS

The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase [AD-A265799] p 94 N94-12381

COPPER

Grain boundary creep in copper [DE93-610974] p 84 N94-12361

Corrosion behavior of metal matrix composites [AD-A265352] p 85 N94-12404

COPPER ALLOYS

New mechanism of Ostwald ripening in Lorentz-force stabilized Cu-Pb dispersions p 116 N94-10192

Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202

A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints [NASA-TM-108418] p 188 N94-11275

CORAL REEFS

Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668

CORE FLOW

Appearance, behavior, and oceanic structures of warm streamers in the Kuroshio Oyashio frontal region p 198 N94-11937

Satellite observations of the northeast monsoon coastal current p 214 N94-12678

Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683

Influence of the Kuroshio warm-core rings on hydrographic and fishery conditions off southern Kuril Islands p 224 N94-12737

CORE SAMPLING

Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa) p 281 N94-12032

Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050

Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core p 281 N94-12056

Strontium and oxygen isotope study of M-1, M-3 and M-4 drill core samples from the Manson impact structure, Iowa: Comparison with Haitian K-T impact glasses p 281 N94-12080

Post-impact alteration of the Manson impact structure p 282 N94-12188

CORES

Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050

CORIOLIS EFFECT

Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631

CORNER FLOW

Corner vortex suppressor [AD-D015772] p 147 N94-10383

The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058

CORNERS

Applications of a model to predict flame spread over interior finish materials in a compartment p 19 N94-10783

CORONAS

Flexure and the role of inplane force around coronae on Venus p 452 N94-12112

CORRECTION

Sea surface temperature difference between NOAA/AVHRR and in-situ observation p 215 N94-12680

CORRELATION

Stationary spectra in a finite-pressure current-carrying plasma [DE93-617848] p 387 N94-10538

Completeness properties of the minimum uncertainty states p 349 N94-10581

Geometric aspects of uncertainty and correlation p 349 N94-10588

Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results [NASA-TM-4499] p 13 N94-10820

The heat transfer by radiation between two media [DE93-617820] p 149 N94-10838

The Langevin's approach to the statistical theory of bounded plasma [DE93-617842] p 388 N94-10839

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

Fractal dimensions of rampart impact craters on Mars p 460 N94-12154

Basic attributes test (BAT): Operational pre-implementation analysis and score equating [AD-A265885] p 314 N94-12276

CORRELATION COEFFICIENTS

Correlated states of a quantum oscillator acted by short pulses p 380 N94-10609

Comparison of GEOSAT sea surface height and model-simulated surface dynamic height p 208 N94-12644

CORROSION

Heavy-section steel technology program [DE93-009222] p 184 N94-10155

Report of the IAEA Consultants' Meeting on Real-Time Nondestructive Monitoring of Wear and Corrosion Using the Thin Layer Activation Technique [DE93-617422] p 183 N94-10847

A survey of techniques for corrosion monitoring [DE93-012131] p 83 N94-11250

High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment [DE93-012430] p 72 N94-11368

Corrosion and passivation of high temperature superconductors [AD-A265402] p 405 N94-12586

CORROSION PREVENTION

Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials [DE93-008717] p 88 N94-10891

Experimental proof of the new IR-induced mechanism of crevice corrosion and its consequences regarding protection schemes p 83 N94-11316

Corrosion control by vitreous films on aluminum and high T(sub c) superconductors [AD-A266016] p 85 N94-12393

Corrosion behavior of metal matrix composites [AD-A265352] p 85 N94-12404

CORROSION RESISTANCE

Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106

Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use [ARL-TR-27] p 90 N94-11311

Weld overlay coatings for erosion control [DE93-013592] p 84 N94-11816

Corrosion behavior of metal matrix composites [AD-A265352] p 85 N94-12404

CORROSION TESTS

Report of the IAEA Consultants' Meeting on Real-Time Nondestructive Monitoring of Wear and Corrosion Using the Thin Layer Activation Technique [DE93-617422] p 183 N94-10847

Facility for stress corrosion cracking test of irradiated material in high temperature water [DE93-753189] p 84 N94-11593

COSMIC BACKGROUND EXPLORER SATELLITE

A theoretical kinematical study of the gradient of any cosmic scalar field [DE92-644731] p 425 N94-11136

COSMIC DUST

STARDUST: A simulation experiment of cosmic dust analogues production in microgravity conditions p 113 N94-10175

Columbus proto-planetesimal dust aggregation experiment p 123 N94-10236

COSMIC RAYS

Post-launch analysis of data from the High Energy Astrophysical Observatory Heavy Nuclei Experiment (HEAO-C3) [NASA-CR-193513] p 484 N94-11486

Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020

Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021

Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022

Natural thermoluminescence profiles in lunar cores and implications for meteorites p 443 N94-12060

Are cosmic rays effective for ionization of the solar nebula? p 472 N94-12220

Search for structures in the cosmic microwave background radiation [INPE-5491-TDI/508] p 484 N94-12357

Analysis and interpretation of high energy cosmic rays measured on Spacelab-2 [NASA-CR-193586] p 485 N94-12771

COSMOCHEMISTRY

Midplane temperatures in the solar nebula p 448 N94-12088

COSMOLOGY

The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point [DE93-012655] p 361 N94-10349

Cosmological gamma-ray burst model [NASA-CR-193368] p 484 N94-10507

Planck scale effects on the Majoron [DE93-613120] p 410 N94-10545

Cosmological restrictions on conformally-invariant SU(5) GUT models [DE93-619770] p 412 N94-11047

The solutions of cosmic string loop equation in expanding universe [DE93-619717] p 427 N94-11692

Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

COST ANALYSIS

Analysis of the cost evaluation of ESA programmes and comparable national and international programmes [GTS-92063] p 416 N94-10145

Space Station Redesign Team: Final report to the Advisory Committee on the Redesign of the Space Station [NASA-TM-109241] p 42 N94-10663

Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844

ACARA user's manual [NASA-TM-106277] p 183 N94-11167

Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles [DE93-010770] p 182 N94-11438

Information resources management long-range plan, FY1994 [DE93-013898] p 420 N94-11588

Analysis of the economics of DC arc CVD diamond [AD-A265688] p 403 N94-12339

ESA Costing Software (ECOS) introduction [ESA-F-28] p 333 N94-12383

COST EFFECTIVENESS

Advanced Materials for Lightweight Structures [ESA-SP-336] p 56 N94-10001

Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity [DE93-010010] p 262 N94-10258

Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844

Engineering performance metrics [DE93-012084] p 128 N94-11028

From red tape to results: Creating a government that works better and costs less p 422 N94-11351

From red tape to results: Creating a government that works better and costs less. Executive summary p 422 N94-11353

Forecasting the impact of virtual environment technology on maintenance training p 314 N94-11570

More sense for less cents: Cost effective servicing of remote sensing satellites p 348 N94-11572

Polymer electrolyte fuel cells: Potential transportation and stationary applications [DE93-010734] p 264 N94-11666

COST ESTIMATES

The MERMAID project p 329 N94-11426

Evaluation of the capacity and delay benefits of terminal air traffic control automation [AD-A265323] p 24 N94-11863

COST REDUCTION

Space Station redesign option A: Modular buildup concept [NASA-TM-108415] p 43 N94-10808

From red tape to results: Creating a government that works better and costs less p 422 N94-11351

The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document p 421 N94-11575

Evaluation of the capacity and delay benefits of terminal air traffic control automation [AD-A265323] p 24 N94-11863

COSTS

NASA procurement: Proposed changes to the Jet Propulsion Laboratory contract. Report to Congressional Requesters [GAO/NSIAD-93-178] p 416 N94-10941

Fracture behavior of ionomers and ionomeric blends [AD-A265379] p 94 N94-12407

Defense: Health care [AD-A265914] p 421 N94-12445

Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument [NASA-CR-194376] p 427 N94-12566

COUETTE FLOW

Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

COULOMB COLLISIONS

Particle transport analysis in torsatron configurations [DE93-621640] p 390 N94-11120

Momentum and heat frictions between fast ions and thermal plasma species [DE93-771240] p 390 N94-11149

Coulomb effects in low-energy nuclear fragmentation [NASA-TP-3352] p 485 N94-12434

COULOMB POTENTIAL

Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials [DE93-617650] p 349 N94-10547

Exact solution of the N-dimensional generalized Dirac-Coulomb equation [DE93-617649] p 411 N94-10834

COUNTER ROTATION

AGBT advanced counter-rotating gearbox detailed design report [NASA-CR-180883] p 179 N94-10400

COUNTERMEASURES

Exercise countermeasures for bed-rest deconditioning [NASA-TM-103987] p 300 N94-11191

Dynamic loading in manufacturing and service: Australia's shock testing capability p 128 N94-11304

COUNTERS

An optoelectronic graphics display processor [AD-A266011] p 171 N94-12391

COUPLED MODES

Macroscopic behaviour and discrete dynamo of RFP plasma in high theta discharge [DE93-771408] p 392 N94-11239

Decoupling of aircraft responses p 32 N94-11497

COUPLING

Coupled thermogravitational and thermocapillary convection in a two-layer fluid system p 105 N94-10101

Transient effects in the Benard instabilities: Coupling between capillary and gravity effects p 119 N94-10216

COUPLING COEFFICIENTS

Receptivity in parallel flows: An adjoint approach p 157 N94-12301

COVALENT BONDS

A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy [AD-A265797] p 93 N94-12380

Fracture behavior of ionomers and ionomeric blends [AD-A265379] p 94 N94-12407

Glucose electrodes based on cross-linked (Os(bpy)2Ci)(sup +/2+) complexed poly(1-vinylimidazole) films [AD-A265404] p 94 N94-12425

COVARIANCE

Application of normalized gray-scale correlation [DE93-013765] p 141 N94-10521

On local frame fields and fermion dynamics in space with nontrivial topologies [DE93-617657] p 349 N94-10548

Estimating the instabilities of N clocks by means of comparison measurements p 356 N94-10997

Optimal hemicube sampling [DE93-010499] p 334 N94-12591

CRACK ARREST

Crack suppression in GaInSb buffer layers initially under tensile stress [DE93-012839] p 396 N94-10745

CRACK GEOMETRY

Elastic plastic fracture mechanics methodology for surface cracks [NASA-CR-194129] p 185 N94-10712

CRACK INITIATION

Fatigue-life behavior and matrix fatigue crack spacing in unnotched SCS-6/Timetal 21S metal matrix composites [NASA-CR-191467] p 185 N94-10715

Microstructure-based fatigue life prediction methods for naval steel structures [AD-A265429] p 85 N94-12426

Proposed framework for thermomechanical life modeling of metal matrix composites [NASA-TP-3320] p 74 N94-12449

Isothermal fatigue mechanisms in Ti-based metal matrix composites [NASA-CR-191181] p 74 N94-12594

CRACK PROPAGATION

Potential change in flaw geometry during pressurized-thermal-shock transients [DE93-009709] p 184 N94-10288

Fracture behavior of surface-modified ceramics [DE93-013707] p 88 N94-10710

Elastic plastic fracture mechanics methodology for surface cracks [NASA-CR-194129] p 185 N94-10712

Combustion-induced crack propagation process in a solid-propellant crack cavity p 98 N94-10901

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites [AD-A265153] p 187 N94-11096

Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor [DE93-005428] p 187 N94-11169

Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity [DE93-011597] p 263 N94-11173

Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218

The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite [DE93-011690] p 73 N94-11612

Microstructure-based fatigue life prediction methods for naval steel structures [AD-A265429] p 85 N94-12426

CRACKS

Heavy-section steel technology program [DE93-009222] p 184 N94-10155

Extensions of some guidelines for the mechanical design of coaxial compression pin seals [DE93-012385] p 177 N94-10348

Test specifications, specimen design and instrumentation test data interpretation [DE93-012338] p 188 N94-11367

The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite [DE93-011690] p 73 N94-11612

Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites [AD-A265177] p 92 N94-11876

CRASHES

Aircraft Accident/Incident Summary Report: Loss of control. Business Express, Inc., Beechcraft 1900C N811BE near Block Island, Rhode Island, December 28, 1991 [PB93-910405] p 22 N94-11044

CRATERING

Dimensional scaling for impact cratering and perforation [NASA-CR-188259] p 42 N94-10665

Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036

Cratering on Gaspra p 459 N94-12147

Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181

CRATERS

Dimensional scaling for impact cratering and perforation [NASA-CR-188259] p 42 N94-10665

Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045

Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063

Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079

A structural origin for the cantaloupe terrain of Triton p 449 N94-12095

A structural and petrographic investigation of the pretoria saltpan impact structure p 282 N94-12102

Geophysical signature of the Pretoria saltpan impact structure and a possible satellite crater p 282 N94-12103

CRAY COMPUTERS

Using a private SMDS/ATM network to provide long-haul supercomputing visualization services [DE93-010692] p 325 N94-11109

CREEP PROPERTIES

Constitutive laws for describing the service relevant creep behaviour of metallic materials p 64 N94-10060

Particle attraction effects on the centrifugal casting and extrusion of alumina [DE93-011559] p 82 N94-10957

Creep deformation and mechanical properties of sintered glass and polycrystalline matrix composites p 67 N94-11315

A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity [NASA-TM-106122] p 188 N94-11482

Porosity and the ecology of icy satellites p 431 N94-12186

Grain boundary creep in copper [DE93-610974] p 84 N94-12361

CREEP STRENGTH

Interface considerations in Al2O3/NiAl composite [NASA-CR-191167] p 66 N94-11202

Effect of powder processing on slip casting parameters and sintering of Si3N4-Y2O3-SiO2 [AD-A264474] p 83 N94-11445

NiAl alloys for structural uses [NASA-CR-194113] p 85 N94-12447

CREEP TESTS

Grain boundary creep in copper [DE93-610974] p 84 N94-12361

CRETACEOUS-TERTIARY BOUNDARY

Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa) p 281 N94-12032

Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit p 281 N94-12084

K/T spherules from Haiti and Wyoming: Origin, diagenesis, and similarity to some microtektites p 281 N94-12085

Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091

Age of Popigai impact event using the Ar-40 - Ar-39 method p 282 N94-12093

Stratigraphy and sedimentology of the K/T boundary deposit in Haiti p 282 N94-12138

Oxygen isotopes as tracers of tektite source rocks: An example from the Ivory Coast tektites and Lake Bosumtwi Crater p 430 N94-12146

Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions p 282 N94-12149

KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161

Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238

CREW PROCEDURES (INFLIGHT)

Flight simulator experiment of the cockpit advisory system [NAL-TR-1151] p 33 N94-10733

CRITERIA

Calculation of Mercier stability criterium in stellarators [DE93-621599] p 389 N94-11091

Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620

CRITICAL POINT

A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114

Studies of critical point phenomena of fluids: Bulk fluids, fluids in pores, and at interfaces p 80 N94-10228

Transport of heat and mass in near-critical fluids p 122 N94-10230

Phase separation at gas-liquid critical points p 122 N94-10233

The critical facility on IML-1 p 44 N94-10250

CRITICAL TEMPERATURE

Elastic deformations and sound in anisotrope superconductors near critical temperature [DE93-620636] p 188 N94-11364

CRITICAL VELOCITY

Analysis of geophysical measurements and spacecraft interactions [AD-A266064] p 43 N94-10944

CROP GROWTH

Land cover monitoring with multi-temporal ERS-1 SAR observations in the Netherlands p 246 N94-12473

Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485

ERS-1 SAR crop monitoring experiment in East Anglia, UK p 248 N94-12488

CROP IDENTIFICATION

Land cover monitoring with multi-temporal ERS-1 SAR observations in the Netherlands p 246 N94-12473

Preliminary ERS-1 assessment for Canadian agriculture and forestry applications p 248 N94-12486

CROSS CORRELATION

General renormalized statistical approach with finite cross-field correlations [DE93-617846] p 386 N94-10396

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721

CROSS FLOW

Theoretical evaluation of R22 and R502 alternatives [DE93-014767] p 411 N94-10853

On nonlinear Tollmien-Schlichting/vortex interaction in three-dimensional boundary layers [NASA-TM-106184] p 152 N94-11377

Generation of two-dimensional vortices in a cross-flow p 160 N94-12318

CROSS POLARIZATION

Enhancement effects in polarimetric radar returns: Phase difference statistics [NASA-CR-193408] p 231 N94-11309

CROSSED FIELDS

Simulations of D3-D divertor biasing with the LEDGE code [DE93-010500] p 385 N94-10262

General renormalized statistical approach with finite cross-field correlations [DE93-617846] p 386 N94-10396

Stationary spectra in a magnetized current-carrying plasma [DE93-617847] p 386 N94-10397

Stationary spectra in a plasma with a shear (renormalized statistical approach with non-zero eigenfrequencies) [DE93-617851] p 386 N94-10523

Stationary spectra in a finite-pressure current-carrying plasma [DE93-617848] p 387 N94-10538

Stationary spectra in a quasi neutral current-carrying plasma [DE93-617849] p 387 N94-10539

CROSSLINKING

Improving reservoir conformance using gelled polymer systems [DE93-014532] p 88 N94-10749

Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides [AD-A264851] p 88 N94-10863

X ray absorption spectroscopy of electrochemically generated species [AD-A264749] p 77 N94-11265

The synthesis of photocrosslinkable chalcone-bearing polyphosphazenes [AD-A264915] p 92 N94-11849

Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers [AD-D015747] p 93 N94-12330

A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker [AD-A265998] p 93 N94-12353

A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy [AD-A265797] p 93 N94-12380

Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films [AD-A265404] p 94 N94-12425

CROSSTALK

A fiber optic network system with low crosstalk using code-division multiplexing [AD-D015763] p 374 N94-10376

CRRES (SATELLITE)

Chemical release and radiation effects (CRRES) data directory [NASA-CR-192551] p 279 N94-12581

CRUDE OIL

Improving reservoir conformance using gelled polymer systems [DE93-014532] 88 N94-10749

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C
[PB93-190304] p 265 N94-11018

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9
[PB93-190312] p 265 N94-11019

Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers
[PB93-181592] p 266 N94-11471

Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution
p 214 N94-12677

CRUSTAL FRACTURES

Statistical description of tectonic motions
[NASA-CR-193701] p 275 N94-10950

CRYOGENIC COOLING

The superfluid Stirling refrigerator, a new method for cooling below 0.5 K
[DE93-012672] p 128 N94-11161

The Second Workshop on Refrigerating System Utilization Onboard the JEM
[NASDA-CON-930001] p 129 N94-11831

Summary of the pre-AO of the JEM onboard scientific and engineering experiments for refrigerator utilization
p 129 N94-11832

Trend of miniature refrigerator utilization in earth observation area p 130 N94-11835

Study on various cryogenic refrigeration cycles using all purpose refrigerators p 130 N94-11839

Development test on 2 K cooling systems
p 130 N94-11840

Generation of superfluid He by G-M cycle cryogenic refrigerator p 130 N94-11841

Development of 4 K refrigerator using highly efficient heat accumulating reservoir p 130 N94-11842

Utilization of superconductivity in the area of space
p 131 N94-11843

CRYOGENIC EQUIPMENT

The superfluid Stirling refrigerator, a new method for cooling below 0.5 K
[DE93-012672] p 128 N94-11161

The Second Workshop on Refrigerating System Utilization Onboard the JEM
[NASDA-CON-930001] p 129 N94-11831

Development of space refrigerator
p 129 N94-11833

Trend of miniature refrigerator utilization in earth observation area p 130 N94-11835

Study on various cryogenic refrigeration cycles using all purpose refrigerators p 130 N94-11839

Generation of superfluid He by G-M cycle cryogenic refrigerator p 130 N94-11841

Development of 4 K refrigerator using highly efficient heat accumulating reservoir p 130 N94-11842

CRYOGENIC FLUIDS

SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523

CRYOGENIC WIND TUNNELS

A unique facility to support cryogenic wind tunnel operations
[ARA-MEMO-377] p 34 N94-12436

CRYOGENICS

Preliminary analysis of the benefits derived to US Air Force spacecraft from on-orbit refueling
p 38 N94-11567

CRYSTAL DEFECTS

Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819

Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845

Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate
[DE93-012498] p 399 N94-11243

CRYSTAL DISLOCATIONS

Workshop on Heteroepitaxial InP Solar Cells
p 54 N94-11414

CRYSTAL FIELD THEORY

Effect of a distribution of exchange parameters within a simple localized-itinerant model
[DE93-610314] p 395 N94-10314

CRYSTAL GROWTH

Instability of thermocapillary convection in floating zones p 101 N94-10076

CdTe crystal growth in the Soviet facility zona 4
p 106 N94-10111

Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135

Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139

Microgravity experiments using TR-1A rocket
p 112 N94-10142

Thermocapillary convection instability in microgravity crystal growth p 112 N94-10172

On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173

Flow transitions in a 2D directional solidification model
p 114 N94-10183

Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185

In situ observation of temperature dependence of concentration field during growth of KB5 crystals by holographic interferometry p 115 N94-10187

Wetting effects on nylon spheres engulfment in ice
p 115 N94-10189

Crystal growth from low temperature vapour phase
p 115 N94-10191

Conductive-radiative model for predicting the shape of Hgl2 crystal grown in the LTVG furnace
p 117 N94-10201

Effect of gravity on the dissolution and liquid phase epitaxial growth processes in a horizontal sandwich system p 118 N94-10208

THM-growth of III-V-semiconductors in the magnetic field p 118 N94-10209

Crystallization of zeolites in the microgravity environment of space p 119 N94-10210

Crystal growth in the Zone Melting Facility (ZMF)
p 119 N94-10213

The International Microgravity Laboratory, a Spacelab for materials and life sciences p 125 N94-10249

Dynamic studies of crystal growth using the AFM
[DE93-009549] p 399 N94-11268

An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651

The experimental production of matrix lumps within chondrules: Evidence of post-formational processes
p 431 N94-12176

Flash melting of chondrule precursors in excess of 1600 C. Series 1: Type 2 (B1) chondrule composition experiments p 431 N94-12177

Short wavelength crystal fiber devices
[AD-A265716] p 176 N94-12402

Tin whiskers in electronic circuits
[AD-A265917] p 146 N94-12565

Process modelling for materials preparation experiments
[NASA-CR-193556] p 56 N94-12588

CRYSTAL LATTICES

A lattice gas model for enzyme kinetics with alternate interactions
[DE93-613027] p 395 N94-10411

The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3
[DE93-617882] p 395 N94-10525

A lattice gas model for enzyme kinetics with next-nearest neighbor interactions
[DE93-613026] p 410 N94-10631

Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819

Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010

Structural and electronic properties of atomic chains
[DE93-617758] p 366 N94-11349

Lattice-matched heteroepitaxy of wide gap ternary compound semiconductors p 400 N94-11441

CRYSTAL OPTICS

Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576

CRYSTAL OSCILLATORS

Performance of low-cost commercial fiber-optic transceivers for reference frequency distribution
p 355 N94-10993

CRYSTAL STRUCTURE

Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180

Conductive-radiative model for predicting the shape of Hgl2 crystal grown in the LTVG furnace
p 117 N94-10201

Organometallic chemical vapor deposition and characterization of ZnGeP2/GaP multiple heterostructures on GaP substrates p 400 N94-11442

The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682

Micro-zoning in minerals of a Landes silicate inclusion
p 432 N94-12231

Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

CRYSTAL SURFACES

Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals
[AD-A263566] p 401 N94-11518

The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682

CRYSTALLINITY

Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry
[DE93-010871] p 394 N94-10301

Monte Carlo simulations of a two-dimensional hard dimer system
[DE93-613535] p 361 N94-10502

Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone)
[AD-A266027] p 91 N94-11487

The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase
[AD-A265799] p 94 N94-12381

CRYSTALLITES

Preparation of carbon monoliths having tailored pore structure from porous polymer precursors
[DE93-011576] p 89 N94-10958

CRYSTALLIZATION

Advanced protein, crystallization facility and associated new developments p 39 N94-10119

Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2
[ESA-SP-333-VOL-2] p 112 N94-10171

New mechanism of Ostwald ripening in Lorentz-force stabilized Cu-Pb dispersions p 116 N94-10192

Effects of a microgravity environment on the crystallization of biological macromolecules
p 117 N94-10198

Ripening of immiscible liquid droplets in microgravity with constrained Marangoni drift p 117 N94-10200

Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202

Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204

Crystallization of zeolites in the microgravity environment of space p 119 N94-10210

Synthesis of molecular sieves from clear solution
p 124 N94-10245

Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels
[NASA-TM-106259] p 90 N94-11257

Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281

Aluminum-phosphorus chemistry: Preparation and structural characterization of (Et2AIP(SiMe3)2)2, Et(Cl)2Al(dot)P(SiMe3)3, and i-Bu2(Cl)Al(dot)P(SiMe3)3
[AD-A265268] p 78 N94-11683

Chromatographic assessment of hydrogen-bond donating ability
[AD-A265292] p 369 N94-11826

In-situ crystallization of silicate glass films deposited on alpha- Al2O3
[DE93-012969] p 95 N94-12596

CRYSTALLOGRAPHY

HRTEM in protein crystallography
[DE93-610322] p 395 N94-10406

Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles
p 429 N94-12098

Crystal-chemistry and partitioning of REE in whitlockite
p 408 N94-12174

The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197

Deformation mechanisms in tungsten single crystals in ballistic impact experiments
[AD-A265701] p 405 N94-12563

CRYSTALS

Experimental efforts and results in finding new heavy scintillators
[DE93-010406] p 371 N94-10156

Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567

Second and third order nonlinear optical properties of crystalline inorganic/organic complexes
[DE93-011883] p 173 N94-10755

Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves
[DE93-613827] p 398 N94-11025

Dynamic studies of crystal growth using the AFM
[DE93-009549] p 399 N94-11268

Energy transfer dynamics and impact sensitivity
[DE93-009551] p 98 N94-11269

Crystal-chemistry and partitioning of REE in whitlockite
p 408 N94-12174

A 1.94 micron laser apparatus, system, and method using a thulium-doped yttrium-lithium-fluoride laser crystal pumped with a diode laser
[AD-D015740] p 176 N94-12321

Short wavelength crystal fiber devices
[AD-A265716] p 176 N94-12402

CURING

Application of the infrared photoacoustic spectroscopy to the study of the cure mechanisms of structural epoxy adhesives p 61 N94-10040

Smart processing of composite materials for enhanced performance and properties p 69 N94-11325

CURRENT DENSITY

Stationary spectra in a sheared plasma (linear limit)
[DE93-617850] p 387 N94-10540

Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles
[DE93-620980] p 362 N94-10649

Development of commercially viable high-T(sub c) Bi-2223 superconductor tapes
[DE93-009966] p 142 N94-10951

Elementary mechanism of electron beam dissipative instability development
[DE93-621653] p 391 N94-11209

Experimental and theoretical investigations of Cs-Ba vapor tacitron inverter for power conditioning in space power systems
[DE93-012971] p 48 N94-11372

Assessment of the impact of HTSC's on superconducting fault-current limiters
[DE93-009986] p 143 N94-11454

High frequency behavior of long and small junctions
[AD-A265670] p 403 N94-12336

CURVATURE

Curvature effects in three-dimensional boundary layers
p 164 N94-12623

CURVE FITTING

General aviation aircraft-normal acceleration data analysis and collection project
[AD-A265055] p 26 N94-11858

CURVES (GEOMETRY)

Homoclinic intermittency
[W-9302] p 344 N94-10908

CUTTING

Performance characteristics of the INS 25.5-MHz split coaxial RFQ
[DE93-753168] p 144 N94-11508

CYANOGEN

The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds
p 426 N94-11582

CYCLES

Cycles through particular subgraphs of claw-free graphs
[MEMO-1097] p 341 N94-10274

CYCLIC HYDROCARBONS

Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles
p 431 N94-12167

CYCLOGENESIS

On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822

CYCLONES

On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822

Updated forecast of Atlantic seasonal hurricane activity for 1993 p 285 N94-11194

CYCLOPROPANE

Vibrational overtone activation of methylcyclopropene
[AD-A265588] p 79 N94-12373

CYCLOTRON FREQUENCY

Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p))
[DE93-621654] p 391 N94-11210

CYCLOTRON RADIATION

Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880

CYCLOTRON RESONANCE

Gyrosheath near the tokamak edge
[DE93-012191] p 390 N94-11142

Ionization potentials of small carbon clusters
[AD-A264379] p 67 N94-11260

Conversion of the four-strap array in D3-D to a tunable traveling wave antenna
[DE93-012085] p 137 N94-11453

Wide Band-Gap Semiconductors. 1991 Materials Research Society Symposium proceedings
[AD-A263418] p 401 N94-11515

An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651

Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880

CYCLOTRON RESONANCE DEVICES

Characterization of high-power RF structures using time-domain field codes
[DE93-013416] p 132 N94-10518

CYCLOTRONS

Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578

Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848

CYLINDRICAL BODIES

Variations of the temperature profile in the gradient furnace GFQ within a cylindrical sample used for directional solidification p 114 N94-10181

Vortex-induced forces on oscillating bluff cylinders
[AD-A265056] p 154 N94-11865

The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944

Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632

CYLINDRICAL SHELLS

Hydrostatic testing of thick laminated composite cylinders for performance model validation
[DE93-012728] p 184 N94-10264

D

DAMAGE ASSESSMENT

Dimensional scaling for impact cratering and perforation
[NASA-CR-188259] p 42 N94-10665

The magnitude of impact damage on LDEF materials
[NASA-CR-188258] p 43 N94-10666

Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity
[DE93-011597] p 263 N94-11173

Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques
[NASA-TM-106121] p 67 N94-11237

Disturbance Impact Assessment System (DIAS), version 2.0. System design document
[AD-A265251] p 138 N94-11883

DAMPING

The use of magnetic fields for damping unsteady Marangoni convection in GaAs floating zones under microgravity p 100 N94-10073

Calculation of the effects of magnetic field damping in fluid flow: Comparison of magnetohydrodynamic models of different complexity p 103 N94-10089

Check valve with poppet damping mechanism
[NASA-CASE-MSC-21903-1] p 179 N94-10655

Damping measurements for ultra-high carbon steel/brass laminates
[DE93-011886] p 82 N94-11076

Damping mechanisms in chemically vapor deposited SiC fibers
[NASA-TM-106334] p 66 N94-11135

Elastic deformations and sound in anisotrope superconductors near critical temperature
[DE93-620636] p 188 N94-11364

Improvement of method for experimental determination of flutter speed by parameter identification
[NASA-CR-193555] p 33 N94-12769

DARK MATTER

The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153

DATA ACQUISITION

A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484

The 2nd Annual Meeting of the Society for Research on Biological Rhythms
[AD-A264869] p 303 N94-10872

A real-time spoken-language system for interactive problem solving
[AD-A266046] p 324 N94-11104

User's manual for the DAD-1 data acquisition daughter board for the SuperCard-2
[DE93-012153] p 325 N94-11139

Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539

The effect of rain on ERS-1 altimeter data
p 243 N94-11773

Groundwave HF ocean surface radar
p 139 N94-11906

Venus small volcano classification and description
p 438 N94-12037

A new data collection system for ionospheric modelling and related topics
[AD-A265893] p 278 N94-12277

A hybrid neural network and feature extraction technique for target recognition
[AD-D015732] p 333 N94-12386

Use of SAR-wave, altimeter, and wind-scatterometer data in an operational swell forecasting system
p 250 N94-12503

Experimental particle physics at the University of Pittsburgh
[DE93-013326] p 369 N94-12546

A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657

The structure of hydrophysical measuring systems of vertical sounding and self-contained stations
p 227 N94-12751

DATA BASE MANAGEMENT SYSTEMS

PANACEA user's manual for PANACEA version 2.0
[DE93-012502] p 321 N94-10263

Report on Subgroup on Data Banks for Risk Assessment
[DE93-012150] p 418 N94-10646

Environmental Sciences Division
[DE93-013865] p 264 N94-10650

Database computing in HEP
[DE93-011765] p 419 N94-11105

Flight Dynamics Directorate (FDD) Historically Black Colleges and Universities (HBCU's) database managment system: A user's guide
[AD-A264947] p 419 N94-11288

The relational-to-object-oriented cross-model accessing capability in a multi-model and multi-lingual database system
[AD-A264911] p 420 N94-11846

Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan
[PB93-191633] p 267 N94-11864

The instrumentation of the multimodel and multilingual user interface
[AD-A265444] p 333 N94-12332

Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session)
[DE93-013470] p 340 N94-12428

DATA BASES

Database blending for the climatology of cloud statistics program
[AD-A265034] p 283 N94-10336

Review of SHARC 2.0 O3 kinetics and spectroscopy
[AD-A265481] p 274 N94-10496

Report on Subgroup on Data Banks for Risk Assessment
[DE93-012150] p 418 N94-10646

The First Text Retrieval Conference (TREC-1)
[PB93-191641] p 419 N94-10829

Database computing in HEP
[DE93-011765] p 419 N94-11105

Pre-operation analysis of ERS-1 tracking and operation, part 2-A
[NASDA-CNT-930001-PT-2-A] p 230 N94-11129

Flight Dynamics Directorate (FDD) Historically Black Colleges and Universities (HBCU's) database managment system: A user's guide
[AD-A264947] p 419 N94-11288

Biscayne bay: A bibliography of the marine environment
[PB93-184802] p 266 N94-11451

Design issues for high performance engineering information systems
[AD-A264839] p 420 N94-11520

Ceramics technology project database
[DE93-012431] p 91 N94-11672

Ceramic technology project database
[DE93-012432] p 91 N94-11673

RAMCAD (reliability, availability, and maintainability in computer-aided design)
[AD-A265143] p 331 N94-11679

Medical informatics and telemedicine: A vision
p 305 N94-11788

Directory of IAEA databases
[DE93-622837] p 420 N94-11818

The relational-to-object-oriented cross-model accessing capability in a multi-model and multi-lingual database system
[AD-A264911] p 420 N94-11846

General aviation aircraft-normal acceleration data analysis and collection project
[AD-A265055] p 26 N94-11858

Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928

Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session)
[DE93-013470] p 340 N94-12428

DATA COMPRESSION
Subband/transform functions for image processing [NASA-TM-106183] p 323 N94-10639

DATA FLOW ANALYSIS
PANACEA user's manual for PANACEA version 2.0 [DE93-012502] p 321 N94-10263
Node assignment in heterogeneous computing [NASA-CR-4534] p 142 N94-11131

DATA INTEGRATION
Bayesian model for pictorial data fusion of satellite image [INPE-5457-TDI/499] p 345 N94-11193
Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490

DATA LINKS
Development of a hypermedia knowledge base of aircraft fire safety regulations p 21 N94-10793
PTTI-aided ephemeris calculation and rapid data link acquisition for manned space flight p 42 N94-10974

DATA MANAGEMENT
A proof-of-concept implementation of persistence in a hierarchical storage system [DE93-009959] p 319 N94-10318
A browse facility for Earth science remote sensing data: Center director's discretionary fund final report [NASA-TM-108413] p 419 N94-10723
The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113
Analysis and guidelines for reusable Ada software [AD-A264918] p 332 N94-11850
Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan [PB93-191633] p 267 N94-11864
An integrated approach to total end-to-end quality control of ocean data in the real-time environment p 211 N94-12662
Simple and low cost image processing system for satellite remote sensing data p 212 N94-12669

DATA PROCESSING
A correct and efficient interface for logical query languages with complex objects [MEMO-INF-93-01] p 320 N94-10167
Virtual sound for virtual reality [DE93-010519] p 321 N94-10291
Database blending for the climatology of cloud statistics program [AD-A265034] p 283 N94-10336
A flexible modelling software for data acquisition [DE93-612915] p 322 N94-10484
Processing proper nouns in machine translation for English news [NHK-SERIAL-414] p 418 N94-10559
Subband/transform functions for image processing [NASA-TM-106183] p 323 N94-10639
Advanced statistical methods for improved data analysis of NASA astrophysics missions [NASA-CR-193514] p 425 N94-10943
Analysis of IRAS solar system dust data [NASA-CR-193704] p 483 N94-10949
Overview of training seminar for the use of Japanese Earth Resources Satellite-1 (JERS-1) data p 190 N94-11083
The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113
Optimisation methods for solving separable nonlinear least squares problems [ISVR-TR-219] p 345 N94-11217
Proceedings of First ERS-1 Symposium on Space at the Service of Our Environment, volume 1 [ESA-SP-359-VOL-1] p 232 N94-11704
Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722
Preliminary geophysical investigation with ERS-1 35-day altimeter data p 243 N94-11775
Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems [AD-A265161] p 313 N94-11890
Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320
TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498
The 1991 version of the plume impingement computer program. Volume 1: Description [NASA-CR-194192] p 166 N94-12775

DATA PROCESSING EQUIPMENT
The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113
Data processing units for eight magnetospheric particle and field sensors [AD-A264403] p 276 N94-11463
A user appraisal of ATSR near-real-time products p 252 N94-12516

DATA RECORDING
Low power digital recorder development [AD-A265921] p 170 N94-10704
Some results with the new digital ionosonde in San Diego [AD-A265178] p 275 N94-11101

DATA REDUCTION
A browse facility for Earth science remote sensing data: Center director's discretionary fund final report [NASA-TM-108413] p 419 N94-10723
NASA Marshall Space Flight Center solar observatory report, January - June 1993 [NASA-TM-108417] p 423 N94-10866
Advanced statistical methods for improved data analysis of NASA astrophysics missions [NASA-CR-193514] p 425 N94-10943
Overview of training seminar for the use of Japanese Earth Resources Satellite-1 (JERS-1) data p 190 N94-11083
Test specifications, specimen design and instrumentation test data interpretation [DE93-012338] p 188 N94-11367
Ultraviolet plume instrument description and plume data reduction methodology [AD-A266141] p 54 N94-11643
A consideration on principal component analysis of satellite IR data p 193 N94-11909
The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934
Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973
Atmospheric correction plans for SeaWiFS p 204 N94-11975
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere p 226 N94-12749
The structure of hydrophysical measuring systems of vertical sounding and self-contained stations p 227 N94-12751
The algorithm of primary production determination p 228 N94-12761
Non-image visible polarization remote sensing of the ocean p 229 N94-12762

DATA RETRIEVAL
A correct and efficient interface for logical query languages with complex objects [MEMO-INF-93-01] p 320 N94-10167

DATA SAMPLING
Sample-data and discrete-time H2 optimal control [MEMO-COSOR-92-53] p 339 N94-10869

DATA STORAGE
A proof-of-concept implementation of persistence in a hierarchical storage system [DE93-009959] p 319 N94-10318
Holographic multiplexing for 3D optical memory [AD-A266099] p 171 N94-11420

DATA STRUCTURES
Wait-free linearization with an assertional proof [CS-9208] p 323 N94-10878
Object oriented implementation of adaptive mesh refinement algorithms [DE93-011885] p 325 N94-11112

DATA SYSTEMS
An analysis of the modes and states for generic avionics [NASA-CR-188253] p 27 N94-10664
Enhancements to the Engine Data Interpretation System (EDIS) [NASA-CR-192593] p 180 N94-10815
Pre-operation analysis of ERS-1 tracking and operation, part 2-A [NASDA-CNT-930001-PT-2-A] p 230 N94-11129
Simple and low cost image processing system for satellite remote sensing data p 212 N94-12669
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere p 226 N94-12749

DATA TRANSFER (COMPUTERS)
Variable rate transfer of optical information [AD-D015758] p 418 N94-10374

DATA TRANSMISSION
Formal specification of the plain UCN layer in LOTOS [MEMO-INF-92-83] p 131 N94-10280
Controller of serial multiplex communication channel [DE92-641157] p 336 N94-10544
The Zipcode message-passing system [DE93-011958] p 336 N94-11027
An alternative to sneakernet [DE93-012130] p 419 N94-11137
The PVM systems: An in-depth analysis and documenting study. Concise edition [DE93-011959] p 336 N94-11248
Use of telescience for biomedical research during space flight p 305 N94-11791
Study on color video pictures transmission by digital acoustic signal p 139 N94-11917
Asynchronous Transfer Mode (ATM) technology: An overview [AD-A266087] p 383 N94-12413

DEACTIVATION
Kinetics of high concentration arsenic deactivation at moderate to low temperatures [DE93-013349] p 395 N94-10516

DEATH
Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

DEBONDING (MATERIALS)
Quantifying disbond area p 61 N94-10038
Isothermal fatigue mechanisms in Ti-based metal matrix composites [NASA-CR-191181] p 74 N94-12594

DEBRIS
Spacelab J air filter debris analysis [NASA-CR-192569] p 301 N94-11201
Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit p 281 N94-12084
Scalloped margin domes: What are the processes responsible and how do they operate? p 454 N94-12120

DECARBOXYLATION
Resist materials design: Base-catalyzed chemical amplification [AD-A265286] p 145 N94-11819
Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid) [AD-A265288] p 95 N94-12585

DECISION MAKING
The applicability of neural nets for decision support [MEMO-COSOR-92-49] p 338 N94-10169
A comparison of high and low-impact reports of investigation on adjudicators' decision making: A pilot study [AD-A265747] p 416 N94-10298
Computer models used to support cleanup decision-making at hazardous and radioactive waste sites [PB93-183333] p 274 N94-10698
An advisor module for tactical and strategic state-oriented planning systems with an application in manpower planning [MEMO-COSOR-92-57] p 416 N94-10868
P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1 [AD-A266072] p 304 N94-11224
Signal detection theory and methods for evaluating human performance in decision tasks p 314 N94-11531
Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532
Intergovernmental decisionmaking for environmental protection and public works [PB93-176824] p 266 N94-11584
The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research [AD-A265278] p 313 N94-11701

DECISION THEORY
The applicability of neural nets for decision support [MEMO-COSOR-92-49] p 338 N94-10169
Neural network model selection using asymptotic jackknife estimator and cross-validation method [AD-A264960] p 339 N94-11289
Signal detection theory and methods for evaluating human performance in decision tasks p 314 N94-11531

DECODERS
Flexible high-speed CODEC [NASA-CR-191169] p 146 N94-12433

DECOMPOSITION
A new decomposition strategy for parallel bonded molecular dynamics [DE93-009839] p 366 N94-11284
Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282
The helical decomposition and the instability assumption p 158 N94-12306
Terminal Decomposition and Gaseous Sulfur Release from Tidal Wetlands [NASA-CR-193466] p 267 N94-12451

DECOMPRESSION SICKNESS
Project ARGO: Gas phase formation in simulated microgravity [NASA-TM-104762] p 125 N94-11235
Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533

Use of ultrasound in altitude decompression modeling p 317 N94-11540
Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541
Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543
Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544
A mechanism for the reduction in risk of decompression sickness in microgravity environment p 312 N94-11545
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546

DECONDITIONING
Exercise countermeasures for bed-rest deconditioning [NASA-TM-103987] p 300 N94-11191
Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity p 310 N94-12001
Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006
Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

DECOUPLING
Decoupling of aircraft responses p 32 N94-11497

DEEP SPACE NETWORK
Ultrastable reference frequency distribution utilizing a fiber optic link p 355 N94-10994

DEEP WATER
SOFAR float tracking in the Shikoku basin p 206 N94-11986
On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987
A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining p 224 N94-12733
Bottom currents and possibilities for near bottom layer environmental investigations in the Pacific by means of self contained bottom stations p 224 N94-12734
Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735
Convective and dynamic instability in meridional trenches p 225 N94-12739
Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746
Radar observation of internal waves field in the north-west Pacific p 226 N94-12747

DEFECTS
Imperfection sensitivity of the Brazier effect for orthotropic cylindrical shells [LR-687] p 186 N94-10879
Fibre reinforced polymer matrix composites: Microstructure and mechanical properties [DLR-FB-92-28] p 66 N94-11085
Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor [DE93-005428] p 187 N94-11169
Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate [DE93-012498] p 399 N94-11243
Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids [AD-A264689] p 399 N94-11263
Effect of switched-bias bakes on the postirradiation electrical response of MOS devices [DE93-009629] p 143 N94-11271

DEFENSE PROGRAM
Assured Mission Support Space Architecture (AMSSA) study p 348 N94-11573
Assessing the adequacy of the industrial base [AD-A264954] p 417 N94-11856
Defense: Health care [AD-A265914] p 421 N94-12445

DEFLECTION
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135

DEFORESTATION
International Space Year in China p 36 N94-10680

DEFORMATION
Low cost and thermally stable sandwich design for FIRST p 57 N94-10009
Experimental study of axisymmetric thermocapillary flows p 100 N94-10072
Smoothly deformed light p 375 N94-10566
Global organization of tectonic deformation on Venus p 444 N94-12066
Tectonics on Triton p 466 N94-12187
Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196
NiAl alloys for structural uses [NASA-CR-194113] p 85 N94-12447
Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563

DEGRADATION
DBTT measurement by use of Small Punch (SP) test [DE93-753188] p 183 N94-11168
UV testing of solar cells: Effects of antireflective coating, prior irradiation, and UV source p 53 N94-11408
The UoSAT-5 solar cell experiment: First year in orbit p 53 N94-11409
Results of thermal vacuum tests for the PASP+ flight modules p 53 N94-11410
Potential techniques for non-destructive evaluation of cable materials [DE93-008350] p 183 N94-11586
Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282

DEHYDRATION
Glycerol-induced hyperhydration p 309 N94-11996
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368

DELAY LINES
Variable rate transfer of optical information [AD-D015758] p 418 N94-10374

DELINEATION
Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484

DELTA MODULATION
GaAs sigma-delta modulator modeling for Analog to Digital Converters (ADC's) [AD-A263419] p 144 N94-11516

DELTA WINGS
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363
Control effectiveness at hypersonic speeds p 3 N94-10426
A comparison of high resolution upwind solvers on 3-D inviscid hypersonic flows p 10 N94-10463
Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499

DELTAS
Classification of Martian deltas p 470 N94-12207

DEMOGRAPHY
Baseline characteristics of different strata of astronaut corps p 312 N94-11552

DEMULTIPLEXING
An efficient medium access control strategy for high speed WDM multiaccess networks [MEMO-INF-92-74] p 131 N94-10165
Analysis of the eastern range multiplexed fiber optic IRIG B120 distribution system p 139 N94-10996
Holographic multiplexing for 3D optical memory [AD-A266099] p 171 N94-11420

DENDRITIC CRYSTALS
Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194
Non-equilibrium solidification in undercooled Ni-B alloys p 86 N94-10196

DENITROGENATION
Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533
Use of ultrasound in altitude decompression modeling p 317 N94-11540

DENSE PLASMAS
Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field [DE93-613723] p 386 N94-10387
Characterization of an excimer laser-ablated plasma and applications p 392 N94-11450

DENSIFICATION
Processing, properties, and wear resistance of aluminides [DE93-012186] p 83 N94-11141

DENSITY (MASS/VOLUME)
Measurement of viscosity, density and gas solubility of refrigerant blends [DE93-014772] p 89 N94-11145
Wave structure in planetary rings p 434 N94-11185
The Pacific Subarctic Frontal Zone: Structure and dynamics p 223 N94-12731

DENSITY DISTRIBUTION
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
Nonlinear space charge effect of bunched beam in linac [DE93-612176] p 371 N94-10409
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles [DE93-620980] p 362 N94-10649
Imprecise highest density regions related to intervals of measures [MEMO-COSOR-92-54] p 347 N94-10876
Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends [DE93-013140] p 89 N94-11007
Analysis of interstellar fragmentation structure based on IRAS images [NASA-CR-193518] p 428 N94-12767

DEOXYRIBONUCLEIC ACID
Studies in bioorganic chemistry [AD-A265532] p 55 N94-12011

DEPLETION
On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance p 426 N94-11596
Depletions of sulfur and/or zinc in IDPs: Are they reliable indicators of atmospheric entry heating? p 433 N94-12261

DEPOSITION
The surface plasmon spectroscopy as diagnostic technique in microgravity experiments p 110 N94-10133
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels [DE93-009798] p 98 N94-11366
Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238
The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes [AD-A265623] p 404 N94-12376
Performance aspects of de Laval spray-forming nozzles [DE93-013671] p 163 N94-12604
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709

DEPOSITS
Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079
Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit p 281 N94-12084
Geomorphology of Triton's polar materials p 466 N94-12185
A novel test method for fuel thermal stability [AD-A265853] p 99 N94-12275

DEPTH MEASUREMENT
The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931

DERIVATION
ISAR motion compensation using the burst derivative measure as a focal quality indicator [AD-A265647] p 138 N94-12440

DESERTS
International Space Year in China p 36 N94-10680

DESIGN ANALYSIS
Design and development of a CFRP central cylinder for satellites p 56 N94-10007
Introducing SMaSE: An aide memoire on structural materials and space engineering p 63 N94-10053
Structural material, manufacture, and design requirements for high-temperature fasteners for space plane technologies p 63 N94-10055
In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427
Conceptual design report for the SDC barrel and intermediate muon detectors based on a jet-type drift chamber [DE93-753173] p 367 N94-11510

DESORPTION
Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles p 431 N94-12167

DESTRUCTIVE TESTS
DBTT measurement by use of Small Punch (SP) test [DE93-753188] p 183 N94-11168

DESULFURIZING
Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes [DE93-013282] p 405 N94-12599

DETECTION
Sensing glass transitions in thin polymer films on acoustic wave microsensors [DE93-010805] p 87 N94-10295

DETONABLE GAS MIXTURES

A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces
[DE93-012767] p 77 N94-11370

DETONATION WAVES

Turbulent wall jet in blast wave precursor
[DE93-011955] p 151 N94-11144

Computational methods for problems in aerodynamics using parallel and vector architectures
[AD-A265626] p 16 N94-12377

DEUTERIUM

MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects
[DE93-012682] p 384 N94-10158

High-energy density physics at Los Alamos
[DE93-010271] p 371 N94-10260

Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287

DEUTERIUM COMPOUNDS

Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287

DEUTERONS

Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

DEVELOPING NATIONS

Communications infrastructure requirements for telemedicine/telehealth in the context of planning for and responding to natural disasters: Considering the need for shared regional networks p 307 N94-11804

DIAMAGNETISM

MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects
[DE93-012682] p 384 N94-10158

DIAMOND FILMS

Design of a CVD reactor for the deposition of diamond in a microgravity environment p 109 N94-10127

Wide Band-Gap Semiconductors. 1991 Materials Rese arch Society Symposium proceedings
[AD-A263418] p 401 N94-11515

Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time
[AD-A265530] p 403 N94-12010

DIAMONDS

Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time
[AD-A265530] p 403 N94-12010

Carbon and nitrogen in Type 2 supernova diamonds
p 431 N94-12166

Diamond thermoluminescence properties of different chondrites p 433 N94-12252

Analysis of the economics of DC arc CVD diamond
[AD-A265688] p 403 N94-12339

Dynamic high-pressure shock compaction of diamond powders
[AD-A266004] p 93 N94-12354

DIASTOLE

Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547

DIATOMIC MOLECULES

Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287

DICARBOXYLIC ACIDS

Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

DICTIONARIES

Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Incorporated
[DE93-012509] p 420 N94-11369

DIELECTRIC POLARIZATION

Charge distribution analysis of catalysts under simulated reaction conditions
[DE93-013604] p 78 N94-11699

DIELECTRIC PROPERTIES

Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone)
[AD-A266027] p 91 N94-11487

Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880

DIELECTRICS

Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075

Non-stationary and non-linear dispersive medium as external field which generates the squeezed states
p 380 N94-10605

Dielectric resonator
[US-PATENT-4,580,116] p 141 N94-10668

Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010

Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves
[DE93-613827] p 398 N94-11025

Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents
[AD-A265149] p 143 N94-11160

Charge distribution analysis of catalysts under simulated reaction conditions
[DE93-013604] p 78 N94-11699

Dielectric breakdown and its influence on ignition
[AD-A264925] p 78 N94-11855

Effect of species structure and dielectric constant on C-band forest backscatter
[NASA-TM-109219] p 245 N94-11885

DIESEL ENGINES

Low-expansion ceramics initiative
[DE93-011860] p 89 N94-11106

Pulsed plasma processing for control of diesel engine emissions
[DE93-011884] p 181 N94-11247

Instantaneous engine frictional torque: Its components and piston assembly friction
[DE93-011639] p 182 N94-11625

DIETHYL ETHER

Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

DIFFERENTIAL EQUATIONS

Deformations and recursion operators for evolution equations
[MEMO-1104] p 341 N94-10163

System monitoring and diagnosis with qualitative models
[NASA-CR-193812] p 323 N94-10711

The nonlinear evolution of modes on unstable stratified shear layers
[NASA-CR-191492] p 149 N94-10810

A symmetrical form for equations of a nonlinear spiral magnetic
[DE93-621350] p 344 N94-11033

Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494

Nonlinear and dynamic analysis of flight
p 32 N94-11496

Spline approximation for system of n-th order nonlinear ordinary differential equations
[DE93-608188] p 346 N94-11507

DIFFERENTIAL GEOMETRY

S(sup 1) x S(sup 2) as a bag membrane and its Einstein-Weyl geometry
[DE93-613149] p 410 N94-10635

Non-Euclidean space for local hidden variables
[DE93-621341] p 344 N94-11032

Computational gearing mechanics
[NASA-CR-193666] p 181 N94-11157

DIFFRACTION PATTERNS

Surface and near-surface atom imaging with photoelectron holography
[DE93-013197] p 169 N94-10526

Study of Einstein-Podolsky-Rosen state for space-time variables in a two photon interference experiment
p 370 N94-10582

Organometallic chemical vapor deposition and characterization of ZnGeP2/GaP multiple heterostructures on GaP substrates p 400 N94-11442

DIFFRACTOMETERS

Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data
[DE93-012740] p 363 N94-10743

DIFFUSE RADIATION

Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049

DIFFUSION

On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173

Chemical pattern formation under microgravity
p 121 N94-10227

Hygroscopic absorption to falling films: The effects of the concentration level
[ITN-93-85198] p 148 N94-10391

DILUTE: A code for studying beam evolution under RF noise
[DE93-011605] p 133 N94-10960

Wind system documentation
[DE93-010381] p 285 N94-11664

Overwater atmospheric dispersion of volcanic smokes from Mt. Sakurajima observed in NOAA-AVHRR data
p 205 N94-11979

Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211

Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759

Mixing of drifter ensemble by mesoscale currents
p 228 N94-12760

DIFFUSION COEFFICIENT

DILUTE: A code for studying beam evolution under RF noise
[DE93-011605] p 133 N94-10960

Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425

DIFFUSION FLAMES

Influence of gravity and ambient pressure variations on the behavior of buoyant laminar diffusion flames
p 123 N94-10240

Theories of turbulent combustion in high speed flows
[AD-A265735] p 79 N94-12403

DIFFUSION LENGTH

Measurement of the minority carrier diffusion length and edge surface-recombination velocity in InP
p 49 N94-11388

Diffusion length damage coefficient and annealing studies in proton-irradiated InP
[NASA-TM-106262] p 404 N94-12430

DIFFUSION WELDING

SPF/DB: A manufacturing technique for lightweight structures p 59 N94-10026

High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition
[DE93-013977] p 398 N94-11115

DIFFUSIVITY

Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319

DIFLUORIDES

Production of electronic grade lunar silicon by disproportionation of silicon difluoride
p 435 N94-12017

DIGITAL DATA

User's manual for the DAD-1 data acquisition daughter board for the SuperCard-2
[DE93-012153] p 325 N94-11139

DIGITAL FILTERS

Adaptive algorithms for use with digital filters in vibration control p 71 N94-11338

DIGITAL RADAR SYSTEMS

Rainfall-runoff estimation using digital radar
[AD-A265390] p 286 N94-12408

DIGITAL SIMULATION

Solving the inverse problem for incompressible potential flow through two-dimensional cascades
[NAL-TR-1162] p 147 N94-10365

Numerical calculation of scramjet inlet flow
[NAL-TR-1174T] p 27 N94-10370

Aerodynamic model identification of quiet STOL experimental aircraft ASKA from dynamic flight test data
[DE93-767967] p 25 N94-10728

Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition
[NAL-SP-18] p 163 N94-12611

Nonlinear stability calculations of pipe flow
p 163 N94-12612

DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

Turbulence modeling and compressibility
p 163 N94-12614

Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615

Experiment on a high Reynolds number turbulent boundary layer p 164 N94-12617

On the wake behind a high speed train
p 164 N94-12618

Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620

On the formation process of Karman vortex street
p 16 N94-12621

Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow
p 164 N94-12622

Curvature effects in three-dimensional boundary layers
p 164 N94-12623

Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system
p 165 N94-12624

A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625

Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626

Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves
p 165 N94-12627

Coherent structure in near wall turbulence with riblets
p 165 N94-12628

Instability around an isolated roughness element p 165 N94-12629
Idea of underground airplane p 27 N94-12630
Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631
Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632
Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder p 17 N94-12633
Boundary conditions and bifurcations in plane Poiseuille flow p 166 N94-12634

DIGITAL SYSTEMS
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
Preliminary supersonic flight test evaluation of performance seeking control
[NASA-TM-4494] p 28 N94-11205
Transactions of the 10th Army Conference on Applied Mathematics and Computing
[AD-A265098] p 318 N94-11678

DIGITAL TELEVISION
Studies and simulations of the DigiCipher system
[NASA-CR-193470] p 321 N94-10343

DIMENSIONAL ANALYSIS
Dimensional scaling for impact cratering and perforation
[NASA-CR-188259] p 42 N94-10665
A version of superstring with four space-time dimensions
[DE93-608196] p 412 N94-11163

DIMENSIONAL MEASUREMENT
A preliminary study on ice shape tracing with a laser light sheet
[NASA-TM-105964] p 174 N94-11132

DIMENSIONS
Generalized Mandelbrot rule for fractal sections
[AD-A266010] p 347 N94-12390

DIMERS
Monte Carlo simulations of a two-dimensional hard dimer system
[DE93-613535] p 361 N94-10502
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation
[DE93-617173] p 397 N94-10830
Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684

DIMETHYL COMPOUNDS
Application of static and dynamic enclosures in determining DMS and OCS fluxes in Sphagnum peatlands p 269 N94-12460
Environmental factors controlling fluxes of dimethyl sulfide in a New Hampshire fen p 270 N94-12462
DMS emissions from Sphagnum-dominated wetlands p 271 N94-12466
Factors controlling sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12469

DIPOLE ANTENNAS
Design of a matching network for dipole antennas
[AD-A265115] p 136 N94-11158
Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument
[NASA-CR-194376] p 427 N94-12566

DIPOLE MOMENTS
Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551

DIPOLES
Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010

DIRAC EQUATION
On parity conservation and the question of the missing, right-handed neutrino
[DE93-613092] p 361 N94-10414
Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials
[DE93-617650] p 349 N94-10547
On local frame fields and fermion dynamics in space with nontrivial topologies
[DE93-617657] p 349 N94-10548
A new approach to the I/N-expansion for the Dirac equation
[DE93-617647] p 349 N94-10833
Exact solution of the N-dimensional generalized Dirac-Coulomb equation
[DE93-617649] p 411 N94-10834

DIRECT BROADCAST SATELLITES
Potential markets for advanced satellite communications
[NASA-CR-191145] p 41 N94-10512

DIRECT CURRENT
Direct current transducer
[DE92-644548] p 141 N94-10533

DIRECTIONAL SOLIDIFICATION (CRYSTALS)
The effect of gravity modulation on thermosolutal convection p 105 N94-10103
AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141
Solidification in immiscible systems: The influence of processing conditions on resulting microstructures p 112 N94-10174
Solidification from supercooled melt under microgravity p 113 N94-10176
The effect of gravitational modulation on convection in vertical Bridgman growth p 113 N94-10178
Variations of the temperature profile in the gradient furnace GFQ within a cylindrical sample used for directional solidification p 114 N94-10181
Flow transitions in a 2D directional solidification model p 114 N94-10183
TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements p 114 N94-10184
Pulsatile instability in rapid directional solidification: Strongly-nonlinear analysis p 115 N94-10188
EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199
Effect of experimental procedure on pattern formation and array disorder in cellular solidification p 117 N94-10203
Coupled growth of cells and bubbles in directional solidification of succinonitrile-acetone alloys p 118 N94-10206

DIRECTORIES
Directory of IAEA databases
[DE93-622837] p 420 N94-11818

DISASTERS
Telemedicine and international disaster response: Medical consultation to Armenia and Russia via a telemedicine spacebridge p 305 N94-11790
Global considerations for implementation of telemedicine p 305 N94-11792
Tropical medicine: Telecommunications and technology transfer p 305 N94-11793
Applications of the INTELSAT system to remote health care p 306 N94-11794
The National Disaster Medical System p 307 N94-11801
Communications infrastructure requirements for telemedicine/telehealth in the context of planning for and responding to natural disasters: Considering the need for shared regional networks p 307 N94-11804
International disaster research p 307 N94-11805
Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989

DISCOLORATION
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016

DISCONTINUITY
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

DISCRETE FUNCTIONS
Vectorizing matrix operations arising from PDE discretization on 9-point stencils
[CWI-NM-R9221] p 342 N94-10351

DISORDERS
Effect of experimental procedure on pattern formation and array disorder in cellular solidification p 117 N94-10203

DISORIENTATION
Motion and spatial disorientation systems: Special research capabilities
[AD-A265155] p 303 N94-11097

DISPERSING
Non-stationary and non-linear dispersive medium as external field which generates the squeezed states p 380 N94-10605
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer
[DE93-011950] p 275 N94-11052
Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243

DISPERSIONS
Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182
New mechanism of Ostwald ripening in Lorentz-force stabilized Cu-Pb dispersions p 116 N94-10192
Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202
Overwater atmospheric dispersion of volcanic smokes from Mt. Sakurajima observed in NOAA-AVHRR data p 205 N94-11979

DISPLACEMENT
Improving reservoir conformance using gelled polymer systems
[DE93-014532] p 88 N94-10749
Venus' center of mass - center of figure displacement and implications p 444 N94-12067

DISPLACEMENT MEASUREMENT
An electro-optical system for the measurement of strains p 186 N94-10900
Sea ice deformation observed with ERS-1 SAR p 239 N94-11749
Physical processes of microwave backscattering from laboratory wind-wave surfaces p 200 N94-11952

DISPLAY DEVICES
Automaticity of processing location versus identity information in brief visual displays
[AD-A265013] p 418 N94-10491
Measurement of display transfer characteristics using test pictures
[BBC-RD-1992/13] p 133 N94-11023
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli
[AD-A265168] p 324 N94-11099
Perceptual response to visual noise and display media
[NASA-CR-193406] p 313 N94-11511
Development of a graphical user interface and graphics display for the WIND system
[DE93-011780] p 285 N94-11614
Wind system documentation
[DE93-010381] p 285 N94-11664
Development and implementation of a general purpose x-windows display program
[AD-A265306] p 332 N94-11860

DISRUPTING
Aircraft windscreens enhance visual search disruption produced by laser glare
[AD-A265167] p 26 N94-11892

DISSIPATION
Nonlinear MHD-waves in a dissipative plasma with hall currents
[DE93-617844] p 386 N94-10395
Dissipation in a squeezed-state environment p 370 N94-10584
Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves
[DE93-621656] p 392 N94-11212
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730

DISSOCIATION
Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684

DISSOLVING
Effect of gravity on the dissolution and liquid phase epitaxial growth processes in a horizontal sandwich system p 118 N94-10208
Dynamic studies of crystal growth using the AFM
[DE93-009549] p 399 N94-11268

DISTORTION
An analytic model for calculating pump-induced wavefront distortions in laser slabs
[DE93-011953] p 174 N94-11126

DISTRIBUTED PARAMETER SYSTEMS
Computational algorithms or identification of distributed parameter systems
[AD-A265252] p 331 N94-11680
Control of large space structures with varying configuration
[AD-A265764] p 44 N94-12387

DISTRIBUTED PROCESSING
Practical authorization in large heterogeneous distributed systems
[DE93-013192] p 335 N94-10324
Low latency messages on distributed memory multiprocessors
[NASA-CR-191479] p 323 N94-10643
Distributed simulation using a real-time shared memory network
[NASA-TM-106239] p 319 N94-10724
The Zipcode message-passing system
[DE93-011958] p 336 N94-11027
A formally verified algorithm for interactive consistency under a hybrid fault model
[NASA-CR-4527] p 326 N94-11188
Flexible language constructs for large parallel programs
[NASA-CR-191478] p 326 N94-11196
A distributed version of the NASA Engine Performance Program
[NASA-TM-106208] p 327 N94-11231
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL)
[NASA-TM-106238] p 327 N94-11232
High-performance distributed systems architecture
[AD-A265297] p 337 N94-11829

Distributed real-time system design: Theoretical concepts and applications
[AD-A265199] p 337 N94-11881

DISTRIBUTION (PROPERTY)
Effect of experimental procedure on pattern formation and array disorder in cellular solidification
p 117 N94-10203

DISTRIBUTION FUNCTIONS
On a class of two-dimensional nearest neighboring random walks
[CWI-BS-R9220] p 347 N94-10353
The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Wave generation by contaminant ions
[NASA-CR-193558] p 364 N94-10946
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Power-law confusion: You say incremental, I say differential p 347 N94-12175

DIURNAL VARIATIONS
Selected upper-air wind speed distributions
[AD-A264822] p 284 N94-10871
One-year mooring of an ADCP in the central region of the Kuroshio west of Okinawa p 194 N94-11913
Current variability on the shelf break northeast of Taiwan p 219 N94-12708

DIVERTERS
Simulations of D3-D divertor biasing with the LEDGE code
[DE93-010500] p 385 N94-10262
Physics and modelling of scrape-off layer transport
[DE93-010510] p 385 N94-10289
Physics of tokamak scrape-off layer confinement
[DE93-011949] p 390 N94-11125
Experimental approach to the physics of the high density divertor
[DE93-009149] p 391 N94-11170
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215
Results from the D3-D advanced divertor program
[DE93-015472] p 393 N94-11514

DMSP SATELLITES
Preliminary analysis of the benefits derived to US Air Force spacecraft from on-orbit refueling
p 38 N94-11567

DOCUMENTS
Correspondence standards
[NHB-1450.10B] p 420 N94-11589

DOMES (GEOLOGY)
Scalloped margin domes: What are the processes responsible and how do they operate?
p 454 N94-12120

DOMES (STRUCTURAL FORMS)
Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031

DONOR MATERIALS
Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010
Chromatographic assessment of hydrogen-bond donating ability
[AD-A265292] p 369 N94-11826

DOPED CRYSTALS
Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845
Grain boundaries in complex oxides
[DE93-013986] p 398 N94-11012
Activation energy and capture cross section of majority carrier traps in Zn doped InP p 49 N94-11386
Measurement of the minority carrier diffusion length and edge surface-recombination velocity in InP
p 49 N94-11388
Experimental studies of the structure of grain boundaries
[DE93-013979] p 402 N94-11700
Polaronic charge separation in mixed-halide MX solids
[AD-A266073] p 403 N94-12345
Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5)
[DE93-011359] p 403 N94-12363
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A265797] p 93 N94-12380
Diffusion length damage coefficient and annealing studies in proton-irradiated InP
[NASA-TM-106262] p 404 N94-12430

DOPPLER RADAR
Groundwave HF ocean surface radar
p 139 N94-11906

DOWNLINKING
An investigation of error characteristics and coding performance
[NASA-CR-193620] p 324 N94-10932
Real-time tomography mooring
[AD-A264923] p 289 N94-11854

DOWNWASH
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover
[NASA-CR-4532] p 13 N94-10758

DRAG REDUCTION
Method of reducing drag in aerodynamic systems
[NASA-CASE-LEW-14791-1] p 12 N94-10672
Supersonic airplane study and design
[NASA-CR-193219] p 25 N94-11150
Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves
p 165 N94-12627

DRAINAGE
Design of a global soil moisture initialization procedure for the simple biosphere model
[NASA-TM-104590] p 284 N94-10940
Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685
Rainfall-runoff estimation using digital radar
[AD-A265390] p 286 N94-12408

DRILLING
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C
[PB93-190304] p 265 N94-11018
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9
[PB93-190312] p 265 N94-11019
Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa)
p 281 N94-12032

DROP SIZE
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions
[NASA-CR-193339] p 152 N94-11526

DROP TESTS
Gas-liquid jets under reduced gravity conditions
p 103 N94-10091
Measurement of the thermal conductivity of molten InSb in a drop shaft p 105 N94-10102
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205

DROP TOWERS
Calibration of accelerometers on drop tower Bremen
p 108 N94-10121
Undercooled W-Re and Mo-Re drops in an ultra high vacuum drop tube p 86 N94-10195
Large amplitude shape oscillations in a mercury drop using a drop tower
[DE93-767972] p 125 N94-10730

DROPS (LIQUIDS)
Marangoni instability induced convection in an evaporating liquid droplet p 104 N94-10094
Bubbles and drops behaviour under low-gravity: A space experiment for the IML-2 mission p 104 N94-10098
Thermocapillary slug flow in a capillary tube
p 105 N94-10104
Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131
Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182
Single-electron tunneling
[DE93-013337] p 396 N94-10648
Large amplitude shape oscillations in a mercury drop using a drop tower
[DE93-767972] p 125 N94-10730
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851
A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663

DROUGHT
International Space Year in China p 36 N94-10680

DRY FRICTION
Study of the tribological behavior of SiC and Si3N4 ceramic couples in terms of temperature: The reality
p 64 N94-10061

DUAL THRUST NOZZLES
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement
[NASA-CR-193292] p 150 N94-10912

DUCTED FLOW
A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct
[NASA-TM-106250] p 39 N94-10764
Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow
p 164 N94-12622

DUCTILITY
Design with high strength steel: A case of failure and its implications p 58 N94-10017
Material removal processes: Engineering mechanics consideration
[DE93-010733] p 126 N94-10293
Extensions of some guidelines for the mechanical design of coaxial compression pin seals
[DE93-012385] p 177 N94-10348
Particle attraction effects on the centrifugal casting and extrusion of alumina
[DE93-011559] p 82 N94-10957
Production of reactive sintered nickel aluminide
[DE93-014434] p 83 N94-11127
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168
NiAl alloys for structural uses
[NASA-CR-194113] p 85 N94-12447

DUMMIES
Mass properties test procedure for manikin headforms and helmet systems
[AD-A265654] p 315 N94-10296

DUST
Microgravity combustion of dust suspension in a spherical chamber p 80 N94-10248
Turbulent wall jet in blast wave precursor
[DE93-011955] p 151 N94-11144
Distribution of mineral aerosols over the North Pacific
p 204 N94-11976
A simple model of clastic sediments on Mars
p 460 N94-12155
Dust in the Martian atmosphere: Polarimetric sensing
p 473 N94-12223
Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235

DUST STORMS
Dust in the Martian atmosphere: Polarimetric sensing
p 473 N94-12223

DYE LASERS
Progress in zirconium resonance ionization spectroscopy
[DE93-011881] p 76 N94-11075
Thermal-optical switching of a silicon based interference filter
[AD-A265152] p 174 N94-11095

DYNAMIC CHARACTERISTICS
Comprehensive dynamic analysis of a bladed disk-turborotor-bearing system
[ISBN-0-315-73646-1] p 180 N94-11155
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves
p 195 N94-11922
Lava flows on Venus: Analysis of motion and cooling
p 457 N94-12137

DYNAMIC CONTROL
Mechanical analysis of parallel manipulators with simulation, design, and control applications
[ISBN-0-315-72013-1] p 181 N94-11156
Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494

DYNAMIC LOADS
Design and development of a miniature column-based interface (MCBI) stress gage
[AD-A266054] p 170 N94-10873
Response of composite laminates to dynamic surface loads p 66 N94-10902

DYNAMIC MODELS
Topex orbit determination using GPS tracking system
p 38 N94-10359
Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

Mechanical analysis of parallel manipulators with simulation, design, and control applications [ISBN-0-315-72013-1] p 181 N94-11156

Visualization and simulation of a real physical problem based on physical modeling with the use of computer animation [INPE-5492-TDI/509] p 325 N94-11166

Trajectory pattern inverse dynamics and control of nonlinear dynamics systems with application to flexible structures p 181 N94-11219

A local dynamic model for large eddy simulation p 155 N94-12285

Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287

A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288

Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290

Large-eddy simulation of turbulent flow with a surface-mounted two-dimensional obstacle p 156 N94-12291

Physiological water model development p 316 N94-12367

Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

DYNAMIC PRESSURE

Dynamic tester for rotor seals and bearings [NASA-CASE-MFS-28493-1] p 33 N94-10669

Improvement of method for experimental determination of flutter speed by parameter identification [NASA-CR-193555] p 33 N94-12769

DYNAMIC RESPONSE

Dynamic tests on the NASA Langley CSI evolutionary model p 45 N94-11320

Project of an attitude control system (three axis) of a satellite using the LQG/LTR methodology [INPE-5473-TDI/504] p 44 N94-12356

Ultrasonic wave interaction with advanced complex materials for nondestructive evaluation applications [AD-A265704] p 74 N94-12401

Space truss zero gravity dynamics [AD-A266130] p 44 N94-12541

Three-dimensional finite element analysis of explosive safety facilities: A technology assessment [AD-A265700] p 35 N94-12562

DYNAMIC STABILITY

Convective and dynamic instability in meridional trenches p 225 N94-12739

DYNAMIC STRUCTURAL ANALYSIS

Comprehensive dynamic analysis of a bladed disk-turborotor-bearing system [ISBN-0-315-73646-1] p 180 N94-11155

The impact of active controls technology on the structural integrity of aeronautical vehicles p 27 N94-11341

Discrete Kalman filtering equations of second-order form for control-structure interaction simulations [NASA-CR-193723] p 331 N94-11522

Space truss zero gravity dynamics [AD-A266130] p 44 N94-12541

Three-dimensional finite element analysis of explosive safety facilities: A technology assessment [AD-A265700] p 35 N94-12562

DYNAMIC TESTS

Dynamic tester for rotor seals and bearings [NASA-CASE-MFS-28493-1] p 33 N94-10669

Safety of high speed ground transportation systems: X2000 US demonstration vehicle dynamics trials, preliminary test report, October 1992 - January 1993 [PB93-194645] p 422 N94-10736

Dynamic tests on the NASA Langley CSI evolutionary model p 45 N94-11320

Reduced gravity multibody dynamics testing [NASA-CR-192589] p 125 N94-11483

Three-dimensional finite element analysis of explosive safety facilities: A technology assessment [AD-A265700] p 35 N94-12562

DYNAMICAL SYSTEMS

On output linearization of observable dynamics [MEMO-1105] p 341 N94-10276

A group-theoretic approach to the study of small oscillations of a dynamical system with a known symmetry [DE93-612971] p 409 N94-10402

Symbolic dynamics and description of complexity [DE93-613030] p 418 N94-10485

The uncertainty principle and quantum chaos p 379 N94-10602

Intermittency following a Hopf bifurcation [W-9301] p 344 N94-10907

To the complexity of dynamic system problem [DE93-621355] p 134 N94-11037

Stability analysis and aerospace vehicle dynamics p 31 N94-11491

DYNAMO THEORY

Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219

Are cosmic rays effective for ionization of the solar nebula? p 472 N94-12220

Precession of Uranus and Neptune and their magnetic field p 473 N94-12222

E

EARTH ATMOSPHERE

A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer [DE93-011950] p 275 N94-11052

A modeling perspective on cloud radiative forcing [DE93-012383] p 276 N94-11241

FFTSCAN: A program for spectral smoothing using Fourier transforms [AD-A264921] p 278 N94-11852

Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157

EARTH CORE

Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217

EARTH CRUST

Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS [AD-A265959] p 275 N94-11102

EARTH ENVIRONMENT

Space Activities in the Asia Pacific Region [JTN-93-80421] p 35 N94-10676

Russian space system for the Earth remote sensing p 37 N94-10688

Sun-synchronous and geo-synchronous satellite data utilization for environmental studies p 37 N94-10689

Remote sensing and global environment p 191 N94-11895

EARTH GRAVITATION

The Earth's gravity model for the ERS-1 commissioning phase p 243 N94-11778

EARTH IONOSPHERE

Magnetic Earth Ionosphere Resonant Frequencies (MEIRF) project [NASA-CR-193182] p 276 N94-11355

Construction and testing of a space ready rectenna [NASA-CR-193310] p 137 N94-11357

One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere [DE93-009517] p 137 N94-11466

An investigation of the near Earth space environments [AD-A265295] p 278 N94-11828

A new data collection system for ionospheric modelling and related topics [AD-A265893] p 278 N94-12277

Mid-latitude ionospheric response to active experiments [NASA-CR-193549] p 280 N94-12583

EARTH MAGNETOSPHERE

A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications [DE93-013249] p 273 N94-10305

A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications [DE93-013248] p 273 N94-10319

Imaging of magnetospheric dynamics using low energy neutral atom detection [DE93-012656] p 275 N94-10742

A study on the magnetospheric activity using the AE, ap, and Dst geomagnetic indices [INPE-5470-TDI/501] p 276 N94-11165

An investigation of the near Earth space environments [AD-A265295] p 278 N94-11828

EARTH MANTLE

Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS [AD-A265959] p 275 N94-11102

A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585

Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210

Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217

Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219

EARTH MOVEMENTS

Analysis of gravity, magnetic, and seismic reflection data from Tibet and neighboring regions of China [NASA-CR-193405] p 278 N94-11886

EARTH OBSERVATIONS (FROM SPACE)

Landsat as a commercial enterprise [INPE-5477-TAE/019] p 232 N94-11524

Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539

More sense for less cents: Cost effective servicing of remote sensing satellites p 348 N94-11572

EARTH ORBITAL ENVIRONMENTS

The magnitude of impact damage on LDEF materials [NASA-CR-188258] p 43 N94-10666

Space environmental effects on the integrity of chromic acid anodized coatings [NASA-CR-191468] p 55 N94-10947

Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE) [NASA-CR-192572] p 73 N94-11484

Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539

Operational radiological support for the US manned space program p 318 N94-11561

On-orbit refueling p 38 N94-11565

On-orbit refueling p 38 N94-11566

Use of low orbital satellite communications systems for humanitarian programs p 308 N94-11808

Molecular properties of polymeric materials for space applications [NASA-CR-194370] p 94 N94-12450

EARTH ORBITS

Satellite situation report, volume 32, no. 1 [NASA-TM-109233] p 42 N94-10562

Satellite situation report, volume 32, no. 2 [NASA-TM-109234] p 42 N94-10563

Satellite situation report, volume 31, no. 4 [NASA-TM-109232] p 39 N94-10659

EOL performance comparison of GaAs/Ge and Si BSF/R solar arrays p 51 N94-11398

Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556

Robotic servicing on Earth orbiting satellites p 45 N94-11579

EARTH PLANETARY STRUCTURE

Landscape and geomorphic survey of Zhamanshin area, Northern Kazakhstan: Preliminary report on 1992 field trip data p 282 N94-12123

Stratigraphy and sedimentology of the K/T boundary deposit in Haiti p 282 N94-12138

EARTH RADIATION BUDGET

Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714

Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

EARTH RADIATION BUDGET EXPERIMENT

Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714

Radiometer offsets and count conversion coefficients for the Earth Radiation Budget Experiment (ERBE) spacecraft for the years 1987, 1988, and 1989 [NASA-CR-191489] p 286 N94-12772

EARTH RESOURCES

Space Activities in the Asia Pacific Region [JTN-93-80421] p 35 N94-10676

Status of remote sensing and Geographic Information System (GIS) applications in the Environment and Natural Resources (ENR) sector p 36 N94-10687

Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694

The use of remote sensing data for coastal zone management and environment in Indonesia p 196 N94-11927

Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928

EARTH ROTATION

Statistical description of tectonic motions [NASA-CR-193701] p 275 N94-10950

Plans to improve the experimental limit in the comparison of the east-west and west-east one-way light propagation times on the rotating earth p 351 N94-10971

EARTH SCIENCES

Environmental Sciences Division [DE93-013865] p 264 N94-10650

A browse facility for Earth science remote sensing data: Center director's discretionary fund final report [NASA-TM-108413] p 419 N94-10723

Facts about the US Antarctic program [NSF-92-134] p 279 N94-12568

EARTH SURFACE

Satellite-derived photosynthetically available and total solar irradiance at the surface during FIFE's intensive field campaigns p 230 N94-10954

Estimating Photosynthetically Available Radiation (PAR) at the Earth's surface from satellite observations p 230 N94-10955

Comparison of the distribution of large magmatic centers on Earth, Venus, and Mars p 467 N94-12192

Giant radiating dyke swarms on Earth and Venus p 283 N94-12236
A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245

EARTH TIDES
High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

EARTH-MOON SYSTEM
The giant impact produced a precipitated Moon p 430 N94-12135
Preliminary report of lunar observations by the Near-Infrared Mapping Spectrometer (NIMS) during the second Galileo Earth-Moon encounter p 425 N94-12140

EARTHQUAKES
Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735

ECHO SOUNDING
Measurement of the surface layer current averaged vertically using Multipaths Inverted Echosounder p 194 N94-11915
Acoustic characteristics of side scan sonar and sub-bottom profiler for 10,000 m class ROV p 172 N94-11916
Acoustic estimation of plankton biomass p 218 N94-12699

ECHOCARDIOGRAPHY
Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991
Echocardiography in the flight program p 309 N94-11993

ECOLOGY
Porosity and the ecology of icy satellites p 431 N94-12186

ECONOMIC ANALYSIS
Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity [DE93-010010] p 262 N94-10258
Survey to determine the value of DYNA [DE93-012390] p 321 N94-10267
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles [DE93-010770] p 182 N94-11438
Analysis of the economics of DC arc CVD diamond [AD-A265688] p 403 N94-12339
Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697

ECONOMIC FACTORS
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C [PB93-190304] p 265 N94-11018
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9 [PB93-190312] p 265 N94-11019
Landsat as a commercial enterprise [INPE-5477-TAE/019] p 232 N94-11524
Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697

ECONOMIC IMPACT
Renewable energy sources 1991, part 3 [DE93-605594] p 263 N94-11505
Renewable energy sources 1991, part 2 [DE93-605634] p 263 N94-11506
Evaluation of the capacity and delay benefits of terminal air traffic control automation [AD-A265323] p 24 N94-11863

ECONOMICS
Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844

ECOSYSTEMS
Environmental Sciences Division [DE93-013865] p 264 N94-10650
Extended ecosystem signatures with application to Eos synergism requirements [NASA-CR-193398] p 266 N94-11374
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697
TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497
TREES project: Overview and status of the ERS-1 SAR contribution p 250 N94-12499

EDDY CURRENTS
Quantifying disbond area p 61 N94-10038

EDDY VISCOSITY
A Galilean and tensorial invariant k-epsilon model for near wall turbulence [NASA-TM-106263] p 151 N94-11192
A local dynamic model for large eddy simulation p 155 N94-12285
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
The helical decomposition and the instability assumption p 158 N94-12306

EDEMA
Local fluid shifts and edema in humans during simulated microgravity p 311 N94-12003

EDGE DETECTION
Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675
Observation of warm current at the boundary from north equatorial current to Kuroshio by NOAA/AVHRR p 214 N94-12676
Frontal zones in Pacific Ocean: Satellite and ship data analysis p 216 N94-12687
Observation of cold coastal water with high turbidity around the southwestern tip of Korean Peninsula p 216 N94-12689
Variability of the Kuroshio observed from satellite thermal imagery p 221 N94-12717
The method of investigation of the horizontal structure of the thermal fronts p 222 N94-12723
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724
The Pacific Subarctic Frontal Zone: Structure and dynamics p 223 N94-12731
Influence of the Kuroshio warm-core rings on hydrographic and fishery conditions off southern Kuril Islands p 224 N94-12737
Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744

EDGE DISLOCATIONS
A method of influence regions in the theory of vacancy swelling of metals [DE93-620579] p 83 N94-11363

EDGES
Boundary integral solution to the electromagnetic scattering from coated surfaces containing edges, gaps, and periodic gratings p 137 N94-11639

EDUCATION
Space program in Indonesia p 36 N94-10681
Overview of training seminar for the use of Japanese Earth Resources Satellite-1 (JERS-1) data p 190 N94-11083
Large project experiences with object-oriented methods and reuse p 329 N94-11431
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012181] p 129 N94-11456
A summer program in mathematics and computer science for academically oriented student [AD-A263467] p 415 N94-11517
Project TIMS (Teaching Integrated Math/Science) [NASA-CR-194288] p 416 N94-11599
Tropical medicine: Telecommunications and technology transfer p 305 N94-11793
The revitalization of health and education in Rural America Act of 1992 p 308 N94-11810
Career Information in the Mathematical Sciences (CIMS) [DE93-013780] p 318 N94-11817
The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929
Marslink p 438 N94-12034

EFFICIENCY
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129

EFFLUENTS
Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664

EFFUSIVES
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243

EIGENVALUES
Boundary element method for eigenvalue problems of thin plates [ITN-93-85199] p 343 N94-10392
Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials [DE93-617650] p 349 N94-10547
An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions p 349 N94-10573
Nonunitary and unitary approach to Eigenvalue problem of Boson operators and squeezed coherent states p 350 N94-10595
Floquet operator as integral of motion p 380 N94-10610
Creation and annihilation of solitons in nonlinear integrable systems [DE93-621379] p 365 N94-11078
A regional inverse eigenvalue problem: Solution with application in control theory [DE93-619666] p 339 N94-11630

EIGENVECTORS
Disturbance, the uncertainty principle and quantum optics p 375 N94-10569
Harmonic oscillator interaction with squeezed radiation p 376 N94-10571
An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions p 349 N94-10573
Geometric aspects of uncertainty and correlation p 349 N94-10588
Nonunitary and unitary approach to Eigenvalue problem of Boson operators and squeezed coherent states p 350 N94-10595

EINSTEIN EQUATIONS
Dimensional transition of the space-time at the minimum action near the planck scale [DE93-754192] p 410 N94-10718
Explorations in quantum gravity: From one loop effective actions to two-dimensional theories p 413 N94-11822

EJECTA
Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa) p 281 N94-12032
Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036
Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit p 281 N94-12084
K/T spherules from Haiti and Wyoming: Origin, diagenesis, and similarity to some microtektites p 281 N94-12085
A two-stage (turbulent-drainage) mechanism for the emplacement of impact crater outflows on Venus p 458 N94-12145
Fractal dimensions of rampart impact craters on Mars p 460 N94-12154
Post-impact alteration of the Manson impact structure p 282 N94-12188
Projectile-target mixing in melted ejecta formed during a hypervelocity impact cratering event p 432 N94-12241
Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

EJECTION
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243

EL NINO
The 1992 El Nino viewed by ERS-1 altimetry p 244 N94-11784
Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911
Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

ELASTIC DEFORMATION
Elastic deformations and sound in anisotrope superconductors near critical temperature [DE93-620636] p 188 N94-11364

ELASTIC PROPERTIES
Potential change in flaw geometry during pressurized-thermal-shock transients [DE93-009709] p 184 N94-10288
Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides [AD-A264851] p 88 N94-10863
Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106
Elastic deformations and sound in anisotrope superconductors near critical temperature [DE93-620636] p 188 N94-11364
Ceramic technology project database [DE93-012432] p 91 N94-11673
Ceramic actuators for smart materials [AD-A265664] p 93 N94-12331
Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347

ELASTIC SCATTERING
Workshop on NN Bremsstrahlung and Polarization Observables [DE93-010181] p 361 N94-10334
Indication on the existence of the bound state in the p anti p-system [DE92-641575] p 361 N94-10532
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550

Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551
Logarithmically rising cross section and the ratio sigma(sub el)/sigma(sub t)
[DE93-617694] p 362 N94-10553
Detecting the odderon
[DE93-617695] p 362 N94-10554
Fine structure of the Pomeron and the real part of the elastic scattering amplitude
[DE93-617696] p 362 N94-10555
The determination of nucleon-nucleon scattering phases by the phase functions method
[DE93-617729] p 362 N94-10557
Phasing operator for two oscillators in classical field
p 370 N94-10579
Structural and electronic properties of atomic chains
[DE93-617758] p 366 N94-11349

ELASTIC WAVES
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement
[NASA-CR-193292] p 150 N94-10912

ELASTODYNAMICS
Boundary element method for eigenvalue problems of thin plates
[ITN-93-85199] p 343 N94-10392
Response of composite laminates to dynamic surface loads p 66 N94-10902

ELASTOMERS
Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides
[AD-A264851] p 88 N94-10863
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A264914] p 92 N94-11848

ELASTOPLASTICITY
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain
[DE93-013309] p 185 N94-10306
Elastic plastic fracture mechanics methodology for surface cracks
[NASA-CR-194129] p 185 N94-10712

ELECTRIC BATTERIES
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416
Electromechanical batteries and the electric locomotive
[DE93-013311] p 142 N94-11009
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles
[DE93-010770] p 182 N94-11438
Research development and demonstration of a fuel cell/battery powered bus system
[DE93-013778] p 182 N94-12605
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773

ELECTRIC CHARGE
Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181

ELECTRIC CONDUCTORS
High-field conductor testing at the FENIX facility
[DE93-012318] p 387 N94-10737

ELECTRIC CONNECTORS
Optoelectronic technology consortium
[AD-A265691] p 383 N94-12444

ELECTRIC CURRENT
Nonlinear MHD-waves in a dissipative plasma with hall currents
[DE93-617844] p 386 N94-10395
Stationary spectra in a magnetized current-carrying plasma
[DE93-617847] p 386 N94-10397
Stationary spectra in a finite-pressure current-carrying plasma
[DE93-617848] p 387 N94-10538
Stationary spectra in a quasi neutral current-carrying plasma
[DE93-617849] p 387 N94-10539
A thermal ionization model for the sustaining phase of lock-on in GaAs
[DE93-011558] p 144 N94-11624

ELECTRIC DISCHARGES
Analysis of geophysical measurements and spacecraft interactions
[AD-A266064] p 43 N94-10944

ELECTRIC FIELDS
Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075
Two-phase flow heat transfer and hydrodynamics in an electric field p 103 N94-10093
Gravity and electric field effects on pool boiling heat transfer p 121 N94-10226
Electron runaway in RF discharges
[DE93-771407] p 363 N94-10661
Power losses of a type 2 superconducting slab of arbitrary thickness in the presence of alternating current conductors
[DE93-617892] p 396 N94-10716
Large amplitude shape oscillations in a mercury drop using a drop tower
[DE93-767972] p 125 N94-10730
Distribution of charged particles near the plasma boundary in the presence of external electric field
[DE93-617862] p 389 N94-10886
Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves
[DE93-613827] p 398 N94-11025
Linear antenna of an arbitrary orientation and position in cylindric screen
[DE93-621353] p 134 N94-11035
A picosecond high pressure gas switch
[DE93-011897] p 142 N94-11050
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Gyrosheath near the tokamak edge
[DE93-012191] p 390 N94-11142
Performance characteristics of the INS 25.5-MHz split coaxial RFQ
[DE93-753168] p 144 N94-11508

ELECTRIC GENERATORS
Lightweight linear alternators with and without capacitive tuning
[NASA-CR-185273] p 140 N94-10505

ELECTRIC HYBRID VEHICLES
Research development and demonstration of a fuel cell/battery powered bus system
[DE93-013778] p 182 N94-12605

ELECTRIC MOTOR VEHICLES
Electromechanical batteries and the electric locomotive
[DE93-013311] p 142 N94-11009
Electric and hybrid vehicle site operators program: Thinking of the future
[DE93-011231] p 144 N94-11609
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666
Research development and demonstration of a fuel cell/battery powered bus system
[DE93-013778] p 182 N94-12605

ELECTRIC NETWORKS
ENSAFE fireset flex circuit analysis
[DE93-013106] p 144 N94-11478

ELECTRIC POTENTIAL
Effect of effective mass differences on the tunneling current-voltage behaviour of a resonant diode in the presence of space charge build-up
[DE93-613817] p 142 N94-10799
A picosecond high pressure gas switch
[DE93-011897] p 142 N94-11050
Pulsed plasma processing for control of diesel engine emissions
[DE93-011884] p 181 N94-11247
Experimental proof of the new IR-induced mechanism of crevice corrosion and its consequences regarding protection schemes p 83 N94-11316
New experimental techniques for solar cells
p 52 N94-11403
High frequency behavior of long and small junctions
[AD-A265670] p 403 N94-12336
Spatial light modulator having photosensitive and ferroelectric layers
[AD-D015731] p 404 N94-12400
Ion shaking in the 200 MeV XLS-ring
[DE93-014057] p 374 N94-12782

ELECTRIC POWER PLANTS
Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714

ELECTRIC PROPULSION
A soft-start circuit for arcjet ignition
[NASA-TM-106287] p 180 N94-10760

ELECTRIC PULSES
Characterization of the pulse transformer
[AD-A263414] p 143 N94-11298

ELECTRIC SPARKS
Inexpensive capillary discharge x-ray laser driver
[AD-A265932] p 176 N94-12382

ELECTRIC WELDING
Welding tritium aged stainless steel
[DE93-011782] p 181 N94-11228

ELECTRIC WIRE
Specification and testing for power by wire aircraft
[NASA-TM-106232] p 46 N94-10765

ELECTRICAL FAULTS
Assessment of the impact of HTSC's on superconducting fault-current limiters
[DE93-009986] p 143 N94-11454
Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone)
[AD-A266027] p 91 N94-11487
Dielectric breakdown and its influence on ignition
[AD-A264925] p 78 N94-11855

ELECTRICAL IMPEDANCE
Design of a matching network for dipole antennas
[AD-A265115] p 136 N94-11158
Polar mesospheric waves and structure
[AD-A265360] p 279 N94-12561

ELECTRICAL INSULATION
Development and analysis of insulation constructions for aerospace wiring applications p 21 N94-10791
Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone)
[AD-A266027] p 91 N94-11487
Potential techniques for non-destructive evaluation of cable materials
[DE93-008350] p 183 N94-11586

ELECTRICAL MEASUREMENT
Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks
[AD-A265528] p 87 N94-10510
Experimental proof of the new IR-induced mechanism of crevice corrosion and its consequences regarding protection schemes p 83 N94-11316

ELECTRICAL PROPERTIES
Experimental measurement of the plasma conductivity of Z93 and Z93P thermal control paint
[NASA-TM-106284] p 43 N94-10756
Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone)
[AD-A266027] p 91 N94-11487
Synthesis and electronic properties of nanophase semiconductor materials
[AD-A265287] p 146 N94-12584

ELECTRICAL RESISTIVITY
Kinetics of high concentration arsenic deactivation at moderate to low temperatures
[DE93-013349] p 395 N94-10516
A survey of techniques for corrosion monitoring
[DE93-012131] p 83 N94-11250
Corrosion and passivation of high temperature superconductors
[AD-A265402] p 405 N94-12586
Resistivity and radar void detectors for tunneling machines p 140 N94-12706

ELECTRICITY
US areal wind resource assessment
[DE93-011905] p 262 N94-11051

ELECTRO-OPTICS
Controlling chaotic behavior in CO2 and other lasers
[AD-A264811] p 174 N94-10870
An electro-optical system for the measurement of strains p 186 N94-10900
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
An optoelectronic graphics display processor
[AD-A266011] p 171 N94-12391
Optoelectronic technology consortium
[AD-A265691] p 383 N94-12444
Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577

ELECTROACOUSTIC TRANSDUCERS
NRL review for 1993
[AD-A265666] p 497 N94-12334

ELECTROCHEMICAL CELLS
Effects of aqueous solution compositions on Aerocapacitor energy density
[DE93-013431] p 140 N94-10309

ELECTROCHEMICAL CORROSION
Experimental proof of the new IR-induced mechanism of crevice corrosion and its consequences regarding protection schemes p 83 N94-11316
Corrosion behavior of metal matrix composites
[AD-A265352] p 85 N94-12404

ELECTROCHEMISTRY
Electrochemical process and product therefrom
[AD-D015767] p 75 N94-10380
Aluminum and membrane channels
[AD-A265241] p 300 N94-11020
A survey of techniques for corrosion monitoring
[DE93-012131] p 83 N94-11250
X ray absorption spectroscopy of electrochemically generated species
[AD-A264749] p 77 N94-11265
Electrochemical characterization of p(+)n and n(+)p diffused InP structures p 49 N94-11385
Real-space formation and dissipation dynamics of hexagonal reconstruction on Au(100) in aqueous media as explored by potentiodynamic scanning tunneling microscopy
[AD-A266138] p 368 N94-11658

Publications/Patents/Presentations/Honors/Student eport
[AD-A265136] p 78 N94-11873

ELECTRODE MATERIALS
Aluminum based alkaline battery
[AD-D015775] p 140 N94-10390
Thin film preparation and interfacial reaction study of solid oxide fuel cell materials p 263 N94-11313

ELECTRODEPOSITION
Plating under reduced pressure
[DE93-011896] p 84 N94-11668
The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes
[AD-A265623] p 404 N94-12376
Synthesis and electronic properties of nanophase semiconductor materials
[AD-A265287] p 146 N94-12584
Corrosion and passivation of high temperature superconductors
[AD-A265402] p 405 N94-12586

ELECTRODES
Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117
Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals
[AD-A263566] p 401 N94-11518
The laser ablation of gold films at the electrode surface of a quartz crystal microbalance
[AD-A265535] p 175 N94-12012
A vibrational spectroscopic study of the structure of electroactive self-assembled monolayers of viologen derivatives
[AD-A265705] p 78 N94-12273
Ceramic actuators for smart materials
[AD-A265664] p 93 N94-12331
Examination of the surface second harmonic response at infrared wavelengths
[AD-A265206] p 403 N94-12371
The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes
[AD-A265623] p 404 N94-12376
Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425
Ion shaking in the 200 MeV XLS-ring
[DE93-014057] p 374 N94-12782

ELECTROENCEPHALOGRAPHY
Quantitative EEG patterns of differential in-flight workload p 317 N94-11528

ELECTROHYDRODYNAMICS
Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075
Electrohydrodynamic effects in continuous flow electrophoresis observations on Earth and in microgravity p 122 N94-10234

ELECTROLESS DEPOSITION
Plating under reduced pressure
[DE93-011896] p 84 N94-11668
Corrosion and passivation of high temperature superconductors
[AD-A265402] p 405 N94-12586

ELECTROLYTE METABOLISM
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts
p 311 N94-12005

ELECTROLYTES
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416
Particle attraction effects on the centrifugal casting and extrusion of alumina
[DE93-011559] p 82 N94-10957
A combustion products analyzer for contingency use during thermodegradation events on spacecraft
p 318 N94-11555
Finite element simulation of the 2D collapse of a polyelectrolyte gel disk
[DE93-010693] p 91 N94-11665
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004
Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534

ELECTROLYTIC CELLS
Technical Update: Johnson Space Center system using a solid electrolytic cell in a remote location to measure oxygen fugacities in CO/CO2 controlled-atmosphere furnaces
[NASA-TM-104774] p 423 N94-11183
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666

ELECTROMAGNETIC ABSORPTION
Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845
Thermographic properties of eight blue-emitting phosphors
[DE93-011459] p 78 N94-11622

ELECTROMAGNETIC COMPATIBILITY
An investigation of conducted and radiated emissions from a hollow-cathode plasma contactor
[NASA-CR-191172] p 386 N94-10346

ELECTROMAGNETIC COUPLING
On the coupling of electromagnetic radiation into cavities
[DE93-011406] p 137 N94-11621
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370

ELECTROMAGNETIC FIELDS
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129
Multiple Antenna Implementation System (MAntIS)
[DE93-012515] p 131 N94-10270
Wave function collapse: An unnecessary condition for the dynamical description of the Zeno and partial Zeno effect
[DE93-612970] p 132 N94-10401
Smoothly deformed light p 375 N94-10566
Non classical effects in planar waveguides
p 376 N94-10574
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light
p 376 N94-10575
Phasing operator for two oscillators in classical field
p 370 N94-10579
Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603
Quantum processes in resonators with moving walls
p 380 N94-10612
Kinetic approach to long wave length modes in rotating plasmas
[DE93-771286] p 388 N94-10807
The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Elementary mechanism of electron beam dissipative instability development
[DE93-621653] p 391 N94-11209
On the coupling of electromagnetic radiation into cavities
[DE93-011406] p 137 N94-11621
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields
[AD-A264251] p 311 N94-12364

ELECTROMAGNETIC INTERACTIONS
Effective action in the gauged Nambu-Jona-Lasinio model
[DE93-617654] p 409 N94-10405
Future high precision experiments and new physics beyond Standard Model
[DE93-011004] p 373 N94-11618

ELECTROMAGNETIC INTERFERENCE
An investigation of conducted and radiated emissions from a hollow-cathode plasma contactor
[NASA-CR-191172] p 386 N94-10346
Specification and testing for power by wire aircraft
[NASA-TM-106232] p 46 N94-10765
Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers
[NASA-CR-193569] p 23 N94-11525

ELECTROMAGNETIC NOISE
Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems
[AD-A265161] p 313 N94-11890

ELECTROMAGNETIC PROPULSION
Investigation of multiphase railgun systems
p 40 N94-11637

ELECTROMAGNETIC PULSES
One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere
[DE93-009517] p 137 N94-11466
Research on acoustic coupling to electromagnetic pulses in tissue
[AD-A264764] p 301 N94-11583

ELECTROMAGNETIC RADIATION
Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field
[DE93-613723] p 386 N94-10387
General renormalized statistical approach with finite cross-field correlations
[DE93-617846] p 386 N94-10396
Characterization of high-power RF structures using time-domain field codes
[DE93-013416] p 132 N94-10518
Harmonic oscillator interaction with squeezed radiation
p 376 N94-10571
Phasing operator for two oscillators in classical field
p 370 N94-10579
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay
[DE93-620976] p 143 N94-11365
On the coupling of electromagnetic radiation into cavities
[DE93-011406] p 137 N94-11621
On the theory of phonoriton in cubic semiconductors with a degenerate valence band
[DE93-613539] p 402 N94-11660

ELECTROMAGNETIC SCATTERING
Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-193627] p 274 N94-10726
Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers
[NASA-CR-193569] p 23 N94-11525
Boundary integral solution to the electromagnetic scattering from coated surfaces containing edges, gaps, and periodic gratings p 137 N94-11639
Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049

ELECTROMAGNETIC SPECTRA
Stationary spectra in a plasma with a shear (renormalized statistical approach with non-zero eigenfrequencies)
[DE93-617851] p 386 N94-10523

ELECTROMAGNETIC WAVE TRANSMISSION
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
Research on acoustic coupling to electromagnetic pulses in tissue
[AD-A264764] p 301 N94-11583

ELECTROMAGNETISM
New tests of the equivalence principle using non-metric couplings of electromagnetism and gravitation
p 413 N94-11821
Explorations in quantum gravity: From one loop effective actions to two-dimensional theories p 413 N94-11822

ELECTROMAGNETS
Application of parallel processing to a surface patch/wire junction EFIE code
[AD-A264965] p 336 N94-10488

ELECTROMECHANICS
Electromechanical batteries and the electric locomotive
[DE93-013311] p 142 N94-11009
Smart polymeric system for electromechanical transduction p 70 N94-11330
Recent developments in piezoelectric and electrostrictive sensors and actuators for smart structures p 70 N94-11332

ELECTRON ACCELERATORS
Research results
[DE93-753403] p 372 N94-11595

ELECTRON AFFINITY
Photodetachment studies on few-electron atomic negative ions
[DE93-008474] p 358 N94-10154

ELECTRON BEAMS
The electron beam furnace: A new facility for materials science research p 109 N94-10126
Nonlinear space charge effect of bunched beam in linac
[DE93-612176] p 371 N94-10409
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode
[DE93-620977] p 387 N94-10541
Dynamics of ion acceleration in electron flux by a virtual cathode potential
[DE93-620978] p 371 N94-10542
On the stability of stationary regimes in a distributed autovibration system with external feedback
[DE93-620979] p 141 N94-10543
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles
[DE93-620980] p 362 N94-10649
The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter
[DE93-620984] p 364 N94-10875

DILUTE: A code for studying beam evolution under RF noise
[DE93-011605] p 133 N94-10960
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Elementary mechanism of electron beam dissipative instability development
[DE93-621653] p 391 N94-11209
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh)
[DE93-621658] p 392 N94-11213
Design of CCD camera system for use inside electron beam furnace
[DE93-009525] p 170 N94-11267
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay
[DE93-620976] p 143 N94-11365
LCLS optics: Selected technological issues and scientific opportunities
[DE93-010953] p 175 N94-11468
Research results
[DE93-753403] p 372 N94-11595
Low voltage electron beam lithography
[AD-A265358] p 145 N94-12405
Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole
[DE93-014474] p 374 N94-12786

ELECTRON CAPTURE
Distorted-wave calculation of He(e,2e) including core-exchange
[DE93-610072] p 360 N94-10330
Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637

ELECTRON CYCLOTRON HEATING
Characterization of high-power RF structures using time-domain field codes
[DE93-013416] p 132 N94-10518

ELECTRON DENSITY (CONCENTRATION)
Radiowaves propagation through inhomogeneous interstellar plasma p 134 N94-11061
Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
Polar mesospheric waves and structure
[AD-A265360] p 279 N94-12561

ELECTRON DIFFRACTION
HRTEM in protein crystallography
[DE93-610322] p 395 N94-10406
Surface and near-surface atom imaging with photoelectron holography
[DE93-013197] p 169 N94-10526
Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals
[AD-A263566] p 401 N94-11518
Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045

ELECTRON DIFFUSION
Measurement of the minority carrier diffusion length and edge surface-recombination velocity in InP
p 49 N94-11388
Grain boundary creep in copper
[DE93-610974] p 84 N94-12361
Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425

ELECTRON DISTRIBUTION
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

ELECTRON EMISSION
Submicrosecond, synchronizable x ray source
[AD-D015745] p 176 N94-12337

ELECTRON ENERGY
MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects
[DE93-012682] p 384 N94-10158
Limitation and suppression of hot electron fluctuations in submicron semiconductor structures
[DE93-613911] p 396 N94-10801
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214
Short pulse lasers for generation of fields exceeding 100 MG
[DE93-013346] p 369 N94-11815

ELECTRON IMPACT
Integrated cross sections for the ionisation of atomic hydrogen by electron impact
[DE93-610179] p 359 N94-10311
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV
[DE93-610180] p 359 N94-10312
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662
Theoretical atomic physics for fusion
[DE93-013872] p 366 N94-11172
Compilation of excitation cross sections for He atoms by electron impact
[DE93-753246] p 367 N94-11580
Tandem mass spectrometric analysis of phosphate esters
[AD-A265483] p 78 N94-12009

ELECTRON IRRADIATION
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845
Radiation effects in Ga(0.47)In(0.53)As solar cells
p 52 N94-11404
UV testing of solar cells: Effects of antireflective coating, prior irradiation, and UV source p 53 N94-11408

ELECTRON MASS
Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578

ELECTRON MICROSCOPES
Single-electron tunneling
[DE93-013337] p 396 N94-10648
Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379

ELECTRON MICROSCOPY
TEM study of a space processed Al-Al2O3 metallic composite p 75 N94-10186
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527
Single-electron tunneling
[DE93-013337] p 396 N94-10648

ELECTRON MOBILITY
Short pulse lasers for generation of fields exceeding 100 MG
[DE93-013346] p 369 N94-11815

ELECTRON PHONON INTERACTIONS
Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas
[DE93-613910] p 396 N94-10800

ELECTRON PLASMA
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p))
[DE93-621654] p 391 N94-11210
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

ELECTRON PRECIPITATION
A new data collection system for ionospheric modelling and related topics
[AD-A265893] p 278 N94-12277

ELECTRON RADIATION
Molecular properties of polymeric materials for space applications
[NASA-CR-194370] p 94 N94-12450

ELECTRON SCATTERING
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV
[DE93-610180] p 359 N94-10312
Convergent close-coupling calculations of electron-hydrogen scattering
[DE93-610049] p 360 N94-10328
Calculation of spin-dependent observables in electron-sodium scattering using the coupled-channel optical method
[DE93-610050] p 360 N94-10329
Distorted-wave calculation of He(e,2e) including core-exchange
[DE93-610072] p 360 N94-10330
Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method
[DE93-610073] p 360 N94-10331
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837
Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065
Theoretical atomic physics for fusion
[DE93-013872] p 366 N94-11172
Structural and electronic properties of atomic chains
[DE93-617758] p 366 N94-11349

ELECTRON SOURCES
Thin-film edge field emitter device and method of manufacture therefore
[AD-D015764] p 140 N94-10377
Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379

ELECTRON SPECTROSCOPY
Satellite structure of the xenon valence shell by electron momentum spectroscopy
[DE93-609993] p 360 N94-10327
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
Recent advances in electron momentum spectroscopy
[DE93-610149] p 361 N94-10333
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854
Corrosion control by vitreous films on aluminum and high T(sub c) superconductors
[AD-A266016] p 85 N94-12393
Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument
[NASA-CR-194376] p 427 N94-12566

ELECTRON SPIN
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV
[DE93-610180] p 359 N94-10312
Calculation of spin-dependent observables in electron-sodium scattering using the coupled-channel optical method
[DE93-610050] p 360 N94-10329
Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method
[DE93-610073] p 360 N94-10331

ELECTRON STATES
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637
Electronic excitation of ground state atoms by collision with heavy gas particles
[NASA-CR-193364] p 366 N94-11360

ELECTRON TRANSFER
Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637
Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010
Ballistic electron transport studies using BEEM
[AD-A266029] p 369 N94-12395
Solvent dynamical effects in electron transfer: Molecular dynamics simulations of reactions in methanol
[AD-A266061] p 369 N94-12420

ELECTRON TRANSITIONS
Squeezed states of electrons and transitions of the density of states p 370 N94-10593

ELECTRON TUNNELING
Single-electron tunneling
[DE93-013337] p 396 N94-10648
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents
[AD-A265149] p 143 N94-11160
High frequency behavior of long and small junctions
[AD-A265670] p 403 N94-12336
ELECTRON-POSITRON PAIRS
Proceedings of the Second KEK Topical Conference on e(sup +)e(sup -) collision physics
[DE93-754139] p 364 N94-10889
ELECTRONIC COUNTERMEASURES
The radar eye blinded: The USAF and electronic warfare, 1945-1955
[AD-A265494] p 132 N94-10497
ELECTRONIC EQUIPMENT
Extensions of some guidelines for the mechanical design of coaxial compression pin seals
[DE93-012385] p 177 N94-10348
The radar eye blinded: The USAF and electronic warfare, 1945-1955
[AD-A265494] p 132 N94-10497
Proton transport methods for satellite shield modeling
[DE93-013602] p 42 N94-10520
Application of normalized gray-scale correlation
[DE93-013765] p 141 N94-10521
Liquid Cooled Heat Sink with through Vias (LCHS)
[AD-A266008] p 73 N94-12344
ELECTRONIC MODULES
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773
ELECTRONIC PACKAGING
RF vacuum microelectronics
[AD-A266066] p 142 N94-10818
ELECTRONIC WARFARE
The radar eye blinded: The USAF and electronic warfare, 1945-1955
[AD-A265494] p 132 N94-10497
ELECTRONS
Dynamics of ion acceleration in electron flux by a virtual cathode potential
[DE93-620978] p 371 N94-10542
Electron runaway in RF discharges
[DE93-771407] p 363 N94-10661
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854
The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter
[DE93-620984] p 364 N94-10875
The response of an electron in a biased double well to a strong laser: Delocalization and low frequency generation
[AD-A265169] p 366 N94-11100
Absorption spectrum calculations using mixed quantum-gaussian wave packet dynamics
[AD-A265179] p 413 N94-11877
ELECTROPHORESIS
Electrohydrodynamic effects in continuous flow electrophoresis observations on Earth and in microgravity p 122 N94-10234
Compatibility tests for biological specimens to on-board experiments in the Space Shuttle flight
[NASDA-CNT-930003] p 301 N94-12278
ELECTROPHYSIOLOGY
Role of spatially distributed ion channels in single neuron computation
[AD-A265972] p 79 N94-12351
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A266113] p 301 N94-12417
ELECTROPLATING
Tin whiskers in electronic circuits
[AD-A265917] p 146 N94-12565
ELECTROSTATIC WAVES
Studies on the parametric decay of waves in fusion plasmas
[DE93-621659] p 390 N94-11148
Studies of electrostatic waves and VLF-wave particle interaction in the ionosphere
[AD-A266013] p 278 N94-12392
ELECTROSTATICS
NASCAP programmer's reference manual
[NASA-CR-191044] p 278 N94-11702
Dielectric breakdown and its influence on ignition
[AD-A264925] p 78 N94-11855
ELECTROSTRICTION
Ceramic actuators for smart materials
[AD-A265664] p 93 N94-12331
ELEMENTARY EXCITATIONS
Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism
[DE93-010738] p 401 N94-11646
On the theory of phonoriton in cubic semiconductors with a degenerate valence band
[DE93-613539] p 402 N94-11660
ELEMENTARY PARTICLE INTERACTIONS
Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199
ELEMENTARY PARTICLES
Searches for strangelets and other exotics at the AGS
[DE93-013341] p 359 N94-10308
Quasi-relativistic effects in barrier-penetration processes
[DE93-617730] p 410 N94-10721
Theory of elementary particles and accelerator theory. Task C: Experimental high energy physics
[DE93-013139] p 368 N94-11696
Elementary particle physics and high energy phenomena
[DE93-013971] p 370 N94-12609
ELEVATION
Relation between ages and elevations of Martian channels p 472 N94-12216
ELEVATION ANGLE
ERS-1 preliminary antenna elevation pattern measured by ground-receivers p 235 N94-11727
ELLIPSOIDS
On the Sobolev systems with ellipsoid cavities
[DE92-641290] p 148 N94-10530
The effect of pressure and quadrupolar interactions on the nematic-isotropic transition properties: Numerical results for a system of prolate ellipsoids including second and fourth rank orientational order parameters
[DE93-613540] p 410 N94-10536
ELLIPSOMETERS
Ellipsometry studies of semiconductors surface cleaning
[AD-A265150] p 142 N94-11094
ELLIPSOMETRY
Ellipsometry studies of semiconductors surface cleaning
[AD-A265150] p 142 N94-11094
Applications of spectroscopic ellipsometry to microelectronics
[AD-A265148] p 143 N94-11159
An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651
Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880
ELLIPTICAL GALAXIES
The controlling parameters of the integrated flux of a stellar population p 426 N94-11187
ELONGATION
A method for determination of the elongational viscosity of viscoelastic fluids without body forces
p 124 N94-10247
EMBEDDING
Factors affecting the embedding of optical fibre sensors in advanced composite structures p 70 N94-11336
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields
[AD-A264251] p 311 N94-12364
EMBRITTLEMENT
Heavy-section steel technology program
[DE93-009222] p 184 N94-10155
Experimental studies of the structure of grain boundaries
[DE93-013979] p 402 N94-11700
EMERGENCIES
The National Disaster Medical System
p 307 N94-11801
International disaster research p 307 N94-11805
US-USSR telemedicine consultation spacebridge to Armenia and Ufa p 308 N94-11809
EMISSION
Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers
[PB93-181592] p 266 N94-11471
Emissions of sulfur gases from wetlands
p 269 N94-12458
EMISSION SPECTRA
FFTSCAN: A program for spectral smoothing using Fourier transforms
[AD-A264921] p 278 N94-11852
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces
p 81 N94-12156
Olivine-rich asteroids, pallasitic olivine and olivine-metal mixtures: Comparisons of reflectance spectra
p 431 N94-12171
Molecular properties of polymeric materials for space applications
[NASA-CR-194370] p 94 N94-12450
Emissions of sulfur gases from marine and freshwater wetlands of the Florida Everglades: Rates and extrapolation using remote sensing p 269 N94-12457
HEAO-1 analysis of Low Energy Detectors (LED)
[NASA-CR-194087] p 424 N94-12574
EMISSIVITY
Formulating infrared coatings for defence applications
[MRL-RR-1-93] p 90 N94-11302
Measurement of the sea surface emissivity
p 213 N94-12672
EMITTANCE
A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source
[DE93-009795] p 75 N94-10338
Experiments with energetic (mu)d and (mu)t emitted from solid hydrogen
[DE93-010252] p 373 N94-12542
EMITTERS
Thin-film edge field emitter device and method of manufacture therefore
[AD-D015764] p 140 N94-10377
High efficiency direct thermal to electric energy conversion from radioisotope decay using selective emitters and spectrally tuned solar cells
[NASA-TM-106227] p 47 N94-11307
ENAMELS
Ceramics technology project database
[DE93-012431] p 91 N94-11672
ENCAPSULATING
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
ENCLOSURES
Effect of double density caging during Space Shuttle transport of laboratory rats
[NASA-CR-193228] p 300 N94-11180
END-TO-END DATA SYSTEMS
An integrated approach to total end-to-end quality control of ocean data in the real-time environment
p 211 N94-12662
ENERGETIC PARTICLES
Nonperturbative methods in HZE ion transport
[NASA-TP-3363] p 484 N94-10759
Effects of energetic particle events on VLF/LF propagation parameters/1989
[AD-A265266] p 275 N94-11013
Potential health effects of space radiation
p 312 N94-11558
Experiments with energetic (mu)d and (mu)t emitted from solid hydrogen
[DE93-010252] p 373 N94-12542
ENERGY ABSORPTION FILMS
PM technology and mechanical properties of metallic foams p 64 N94-10059
ENERGY BUDGETS
Energy flow in an Arctic aquatic ecosystem
[DE93-013178] p 267 N94-11697
An observational search for CO2 ice clouds on Mars
p 441 N94-12054
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2
[JTN-93-80419] p 207 N94-12635
Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643
The thermodynamics of the nonlinear shear flows
p 169 N94-12728
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730
ENERGY CONSERVATION
Exergy decrease in shock waves and boundary layers of space launch vehicles
[AD-A265272] p 42 N94-10493
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369
ENERGY CONSUMPTION
The physics of pattern formation of liquid interfaces
[DE93-013333] p 154 N94-11814
Gallium arsenide dynamic random access memory support circuitry
[AD-A265176] p 320 N94-11875
ENERGY CONVERSION
Review of betavoltaic energy conversion
p 53 N94-11407
ENERGY CONVERSION EFFICIENCY
Polyimide based amorphous silicon solar modules
p 49 N94-11390

InGaAs concentrator cells for laser power converters and tandem cells p 50 N94-11394
The efficiency of photovoltaic cells exposed to pulsed laser light p 50 N94-11395
Response of silicon solar cell to pulsed laser illumination p 51 N94-11396
Approaches to solar cell design for pulsed laser power receivers p 51 N94-11397
Review of betavoltaic energy conversion p 53 N94-11407
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411
NASDA activities in space solar power system research, development and applications p 54 N94-11413
Workshop summary: New silicon cells p 54 N94-11417
Measurement and modeling of the stability of hydrogenated amorphous silicon solar cells and films after intense illumination p 263 N94-11638

ENERGY DISSIPATION
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter [DE93-617741] p 364 N94-10837
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems [DE93-015079] p 76 N94-10854
Pulsed plasma processing for control of diesel engine emissions [DE93-011884] p 181 N94-11247
Probability density distribution of velocity differences at high Reynolds numbers p 158 N94-12304

ENERGY DISTRIBUTION
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter [DE93-617741] p 364 N94-10837

ENERGY GAPS (SOLID STATE)
Invariance of the mobility edge in anodic titanium oxides [DE92-642136] p 394 N94-10281
Review of betavoltaic energy conversion p 53 N94-11407
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411
Multi-band gap and new solar cell options workshop p 54 N94-11418
Wide Band-Gap Semiconductors. 1991 Materials Rese arch Society Symposium proceedings [AD-A263418] p 401 N94-11515

ENERGY LEVELS
Harmonic oscillator interaction with squeezed radiation p 376 N94-10571
Floquet operator as integral of motion p 380 N94-10610
The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter [DE93-620984] p 364 N94-10875
Interatomic interactions in BCC and FCC lattices of transition metals [DE93-621541] p 398 N94-11090
Nuclear structure models: Applications and development [DE93-012934] p 368 N94-11813

ENERGY METHODS
Summation by parts, projections, and stability [NASA-CR-194290] p 346 N94-12776

ENERGY OF FORMATION
Interatomic interactions in BCC and FCC lattices of transition metals [DE93-621541] p 398 N94-11090

ENERGY POLICY
Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844

ENERGY SOURCES
Renewable energy sources 1991, part 3 [DE93-605594] p 263 N94-11505

ENERGY SPECTRA
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic [DE93-012782] p 173 N94-10160
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles [DE93-620980] p 362 N94-10649
Monochromator SP-017. The results of the first experiments [DE93-617463] p 372 N94-10849
Radiation considerations for interplanetary missions p 45 N94-11559
Analysis and interpretation of high energy cosmic rays measured on Spacelab-2 [NASA-CR-193586] p 485 N94-12771

ENERGY STORAGE
Effects of aqueous solution compositions on Aerocapacitor energy density [DE93-013431] p 140 N94-10309
A picosecond high pressure gas switch [DE93-011897] p 142 N94-11050
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411

ENERGY TECHNOLOGY
High-energy density physics at Los Alamos [DE93-010271] p 371 N94-10260
Japan's Sunshine Project [DE93-767980] p 262 N94-10498
Technology transfer at Lawrence Berkeley Laboratory [DE93-010460] p 423 N94-11059
Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106
Renewable energy sources 1991, part 3 [DE93-605594] p 263 N94-11505
Renewable energy sources 1991, part 2 [DE93-605634] p 263 N94-11506

ENERGY TRANSFER
Review of SHARC 2.0 O3 kinetics and spectroscopy [AD-A265481] p 274 N94-10496
Development of deterministic transport methods for low energy neutrons for shielding in space [NASA-CR-194172] p 366 N94-11199
Energy transfer dynamics and impact sensitivity [DE93-009551] p 98 N94-11269
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay [DE93-620976] p 143 N94-11365
The ideal Kolmogorov inertial range and constant p 158 N94-12305
The helical decomposition and the instability assumption p 158 N94-12306

ENGINE AIRFRAME INTEGRATION
A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct [NASA-TM-106250] p 39 N94-10764

ENGINE CONTROL
Preliminary supersonic flight test evaluation of performance seeking control [NASA-TM-4494] p 28 N94-11205
Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251
Advanced control for airbreathing engines, volume 1: Pratt and Whitney [NASA-CR-189203] p 29 N94-12270
Advanced control for airbreathing engines, volume 2: General Electric aircraft engines [NASA-CR-189204] p 29 N94-12271
Advanced controls for airbreathing engines, volume 3: Allison gas turbine [NASA-CR-189205] p 29 N94-12272

ENGINE DESIGN
External combustion engine having a combustion expansion chamber [AD-D015761] p 178 N94-10375
Heat regenerative external combustion engine [AD-D015765] p 178 N94-10378
Arcjet space thrusters [NASA-CR-193191] p 46 N94-10700
Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844
A distributed version of the NASA Engine Performance Program [NASA-TM-106208] p 327 N94-11231
Advanced control for airbreathing engines, volume 2: General Electric aircraft engines [NASA-CR-189204] p 29 N94-12271
Advanced controls for airbreathing engines, volume 3: Allison gas turbine [NASA-CR-189205] p 29 N94-12272
Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber [NASA-TP-3380] p 55 N94-12569

ENGINE INLETS
Numerical calculation of scramjet inlet flow [NAL-TR-1174T] p 27 N94-10370

ENGINE MONITORING INSTRUMENTS
Enhancements to the Engine Data Interpretation System (EDIS) [NASA-CR-192593] p 180 N94-10815

ENGINE PARTS
Probabilistic evaluation of uncertainties and risks in aerospace components [NASA-TM-105603] p 185 N94-10361
Instantaneous engine frictional torque: Its components and piston assembly friction [DE93-011639] p 182 N94-11625

ENGINE STARTERS
A soft-start circuit for arcjet ignition [NASA-TM-106287] p 180 N94-10760

ENGINE TESTS
Characterization of in-flight performance of ion propulsion systems [NASA-TM-106283] p 46 N94-10761
Preprints of the 13th Hydrogen Energy System Symposium [DE93-781115] p 99 N94-11444

ENGINEERING
Technology transfer at Lawrence Berkeley Laboratory [DE93-010460] p 423 N94-11059
Qualitative reasoning about the physical world [AD-A266117] p 340 N94-12537

ENGINEERING DRAWINGS
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012181] p 129 N94-11456
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012220] p 129 N94-11670

ENGINEERING MANAGEMENT
National Airspace System operational concept [DOT/FAA/SE-93/1] p 23 N94-10933
Engineering performance metrics [DE93-012084] p 128 N94-11028

ENGINEERS
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 17: A comparison of the technical communication practices of Dutch and US aerospace engineers and scientists [NASA-TM-108987] p 419 N94-11352

ENGLISH CHANNEL
SAR imaging of dynamical features in the English Channel p 234 N94-11721

ENGLISH LANGUAGE
Processing proper nouns in machine translation for English news [NHK-SERIAL-414] p 418 N94-10559

ENSTATITE
Anomalous REE patterns in unequilibrated enstatite chondrites: Evidence and implications p 431 N94-12191
Cathodoluminescence properties of components in enstatite chondrites p 432 N94-12206

ENTHALPY
The high enthalpy facilities HEG and TH 2 in Germany p 4 N94-10430
The upgrading of the arc heated wind tunnel of the DLR (LBK) with respect to its effects on the material testing p 4 N94-10432

ENTRAINMENT
Shear flow control of gas jets in liquids [AD-A264673] p 152 N94-11448

ENTROPY
Canonical operator formulation of nonequilibrium thermodynamics [DE93-613028] p 409 N94-10388
Exergy decrease in shock waves and boundary layers of space launch vehicles [AD-A265272] p 42 N94-10493
Quantum entropy and uncertainty for two-mode squeezed, coherent and intelligent spin states p 377 N94-10586
Information entrophy via Glauber's Q-representation p 378 N94-10592
Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids [DE93-012673] p 412 N94-11162
Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197
On cell entropy inequality for discontinuous Galerkin methods [NASA-CR-191493] p 345 N94-11280
Chaos, entropy, and reversibility: A simple example p 31 N94-11495
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369
ISAR motion compensation using the burst derivative measure as a focal quality indicator [AD-A265647] p 138 N94-12440
The thermodynamics of the nonlinear shear flows p 169 N94-12728

ENVIRONMENT EFFECTS
Environmental Protection Agency's life cycle methodology: Guidelines for use in development of packaging [PB93-194199] p 265 N94-10841
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C [PB93-190304] p 265 N94-11018

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9 [PB93-190312] p 265 N94-11019

Renewable energy sources 1991, part 2 [DE93-605634] p 263 N94-11506

The use of remote sensing data for coastal zone management and environment in Indonesia p 196 N94-11927

Study of climatic effects of cloud-aerosol interaction p 204 N94-11977

Factors controlling fluxes of volatile sulfur compounds in Sphagnum peatlands p 268 N94-12456

Comments on possible causes of recent global warming [DE93-010501] p 272 N94-12592

ENVIRONMENT MANAGEMENT

International Space Year in China p 36 N94-10680

Intergovernmental decisionmaking for environmental protection and public works [PB93-176824] p 266 N94-11584

Remote sensing and global environment p 191 N94-11895

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

ENVIRONMENT MODELS

Design of a global soil moisture initialization procedure for the simple biosphere model [NASA-TM-104590] p 284 N94-10940

Extended ecosystem signatures with application to Eos synergism requirements [NASA-CR-193398] p 266 N94-11374

ENVIRONMENT POLLUTION

Presentations to the Mexican Physics Society on Environmental Contamination [DE93-009565] p 264 N94-10256

International Space Year in China p 36 N94-10680

Immediate response to free product discovery [PB93-182970] p 265 N94-11015

Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668

Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution p 214 N94-12677

ENVIRONMENT PROTECTION

Environmentally Safe and Effective Processes for Paint Removal [AGARD-R-791] p 126 N94-10613

Paint removal activities in the US Navy p 126 N94-10614

Procedures without danger to the environment and efficiency (PSDEE) for the removal of paint. Point on the French activities concerning the removal of paint p 126 N94-10616

Paint removal activities in Germany p 126 N94-10617

The development of alternative paint removal techniques in the RAF p 126 N94-10618

Health and safety issues for aerospace workers in the use of advanced materials p 21 N94-10795

Environmental Protection Agency's life cycle methodology: Guidelines for use in development of packaging [PB93-194199] p 265 N94-10841

Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846

Some environmental aspects of the application of fibre reinforced plastics in structures [LM-998] p 88 N94-10877

Immediate response to free product discovery [PB93-182970] p 265 N94-11015

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C [PB93-190304] p 265 N94-11018

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9 [PB93-190312] p 265 N94-11019

Intergovernmental decisionmaking for environmental protection and public works [PB93-176824] p 266 N94-11584

ENVIRONMENT SIMULATION

Molecular properties of polymeric materials for space applications [NASA-CR-194370] p 94 N94-12450

ENVIRONMENTAL CHEMISTRY

Environmental factors controlling fluxes of dimethyl sulfide in a New Hampshire fen p 270 N94-12462

Sulfur transformations in the sediments of a New Hampshire salt marsh p 270 N94-12463

Quality assurance for environmental chemistry: 1991, volume 2 [DE93-011792] p 272 N94-12780

ENVIRONMENTAL CONTROL

Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366

An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369

ENVIRONMENTAL ENGINEERING

Technical Conference on Tropical Urban Climates: Extended Abstracts [WMO/TD-538] p 283 N94-10561

ENVIRONMENTAL MONITORING

Presentations to the Mexican Physics Society on Environmental Contamination [DE93-009565] p 264 N94-10256

Space Activities in the Asia Pacific Region [JTN-93-80421] p 35 N94-10676

Current status of space activities in Asia Pacific region p 35 N94-10677

Space research and remote sensing programmes in Bangladesh p 35 N94-10679

International Space Year in China p 36 N94-10680

National space programmes and application of the remote sensing data in Mongolia p 36 N94-10686

Status of remote sensing and Geographic Information System (GIS) applications in the Environment and Natural Resources (ENR) sector p 36 N94-10687

Russian space system for the Earth remote sensing p 37 N94-10688

Sun-synchronous and geo-synchronous satellite data utilization for environmental studies p 37 N94-10689

Thailand ISY activities p 37 N94-10690

Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694

An environmental study of the National Aerospace Plane [AD-A266071] p 25 N94-10945

Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber [NASA-TM-109188] p 315 N94-11258

Remote surface water monitoring radio based telemetry system [DE93-009643] p 41 N94-11282

Biscayne bay: A bibliography of the marine environment [PB93-184802] p 266 N94-11451

Operational radiological support for the US manned space program p 318 N94-11561

Satellite, environmental, and medical information applied to epidemiological monitoring p 307 N94-11802

Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan [PB93-191633] p 267 N94-11864

Remote sensing and global environment p 191 N94-11895

An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900

Remote sensing of the suspended matter distribution with high concentration in China Sea p 192 N94-11901

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983

Terminal Decomposition and Gaseous Sulfur Release from Tidal Wetlands [NASA-CR-193466] p 267 N94-12451

Proceedings of 1st ERS-1 Symposium on Space at the Service of Our Environment, Volume 2 [ESA-SP-359-VOL-2] p 245 N94-12471

Monitoring of snowcover in high mountain terrain with ERS-1 SAR p 247 N94-12482

Geoecological monitoring of an agricultural area p 248 N94-12489

The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496

TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497

TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498

TREES project: Overview and status of the ERS-1 SAR contribution p 250 N94-12499

A user appraisal of ATSR near-real-time products p 252 N94-12516

ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526

Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology p 254 N94-12528

Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668

Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution p 214 N94-12677

Development of a buoy system for monitoring marine weather and marine life abundance p 217 N94-12694

Remote sensing of polluting focal points and coastal disturbances in the Gulf of Arauco and adjacent bays, central Chile p 217 N94-12695

Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714

DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere p 226 N94-12749

Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755

Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756

ENVIRONMENTAL SURVEYS

An environmental study of the National Aerospace Plane [AD-A266071] p 25 N94-10945

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C [PB93-190304] p 265 N94-11018

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9 [PB93-190312] p 265 N94-11019

ENVIRONMENTAL TESTS

Investigation of the radiation resistance of triple-junction a-Si:H alloy solar cells irradiated with 1.00 MeV protons p 50 N94-11391

Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells p 50 N94-11392

An overview of the Defence Research Agency photovoltaic programme p 53 N94-11412

Factors controlling fluxes of volatile sulfur compounds in Sphagnum peatlands p 268 N94-12456

ENZYMES

A lattice gas model for enzyme kinetics with alternate interactions [DE93-613027] p 395 N94-10411

Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks [AD-A265528] p 87 N94-10510

A lattice gas model for enzyme kinetics with next-nearest neighbor interactions [DE93-613026] p 410 N94-10631

Studies in bioorganic chemistry [AD-A265532] p 55 N94-12011

Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films [AD-A265404] p 94 N94-12425

EPHEMERIDES

Analysis of geophysical measurements and spacecraft interactions [AD-A266064] p 43 N94-10944

Precision GPS ephemerides and baselines [NASA-CR-194171] p 23 N94-11177

EPHEMERIS TIME

PTTI-aided ephemeris calculation and rapid data link acquisition for manned space flight p 42 N94-10974

EPIDEMIOLOGY

Baseline characteristics of different strata of astronaut corps p 312 N94-11552

Satellite, environmental, and medical information applied to epidemiological monitoring p 307 N94-11802

EPITAXY

Heteroepitaxial InP, and ultrathin, directly glassed, GaAs 3-5 solar cells p 52 N94-11406

Workshop on Heteroepitaxial InP Solar Cells p 54 N94-11414

Lattice-matched heteroepitaxy of wide gap ternary compound semiconductors p 400 N94-11441

Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time [AD-A265530] p 403 N94-12010

EPOXY COMPOUNDS

Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks [AD-A265528] p 87 N94-10510

EPOXY MATRIX COMPOSITES

Application of the infrared photoacoustic spectroscopy to the study of the cure mechanisms of structural epoxy adhesives p 61 N94-10040

Strain measurement of carbon/epoxy composite with fibre optics white light quasi distributed polarimetric sensor p 69 N94-11328

Strain concentration assessment of laminates subjected to low velocity impact [AD-A264497] p 73 N94-11446

Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE)
[NASA-CR-192572] p 73 N94-11484

EPOXY RESINS

Application of the infrared photoacoustic spectroscopy to the study of the cure mechanisms of structural epoxy adhesives p 61 N94-10040

Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks
[AD-A265528] p 87 N94-10510

EQUATIONS OF MOTION

Stationary spectra in a quasi neutral current-carrying plasma
[DE93-617849] p 387 N94-10539

Floquet operator as integral of motion
p 380 N94-10610

Generalized spin systems and sigma-models
[DE93-613981] p 410 N94-10802

Trajectory pattern inverse dynamics and control of nonlinear dynamics systems with application to flexible structures p 181 N94-11219

On possible applications of smart structures to control of space systems p 45 N94-11342

A molecular dynamics simulation code ISIS
[DE93-753187] p 368 N94-11592

Nonlinear analysis of a magnicon output cavity
[AD-A265342] p 145 N94-12424

Improvement of method for experimental determination of flutter speed by parameter identification
[NASA-CR-193555] p 33 N94-12769

EQUATIONS OF STATE

Monte Carlo simulations of a two-dimensional hard dimer system
[DE93-613535] p 361 N94-10502

Polymer-polymer interactions
[AD-A265304] p 91 N94-11830

EQUATORIAL REGIONS

Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911

Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990

Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234

EQUIPMENT SPECIFICATIONS

Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180

Head and face anthropometry of adult US civilians
[DOT/FAA/AM-93/10] p 315 N94-10806

An interferometric spectral mapper for the Cassini mission to Saturn and Titan
[NASA-CR-193805] p 482 N94-12429

Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument
[NASA-CR-194376] p 427 N94-12566

EROSION

Weld overlay coatings for erosion control
[DE93-013592] p 84 N94-11816

Rates of fluvio-thermal erosion on Mars
p 435 N94-12018

Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042

The origin of Venusian channels: Modelling of thermal erosion by lava p 456 N94-12131

ERROR ANALYSIS

Particle image velocimetry technique: Calibration tests
p 111 N94-10137

Topex orbit determination using GPS tracking system
p 38 N94-10359

Investigation of soft errors in MOS RAM under influence of heavy ions
[DE92-644554] p 484 N94-10534

An investigation of error characteristics and coding performance
[NASA-CR-193620] p 324 N94-10932

Pre-operation analysis of ERS-1 tracking and operation, part 2-F
[NASDA-CNT-930002-PT-2-F] p 230 N94-11130

Model reference adaptive control (MRAC) with applications to robotics p 339 N94-11640

Theory and oceanographic applications of satellite altimeter measurements p 208 N94-12641

Analysis of collinear passes of satellite altimeter data
p 208 N94-12642

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother
p 209 N94-12648

On the error characteristics of the sea surface temperature observed by satellite p 216 N94-12690

ERROR CORRECTING CODES

Task planning with uncertainty for robotic systems
[NASA-CR-193253] p 338 N94-10638

Development of a Delaunay-based adaption scheme with applications to complex three-dimensional rotational flows p 149 N94-10624

Measurement methods and algorithms for comparison of local and remote clocks p 354 N94-10987

ERROR CORRECTING DEVICES

Flexible high-speed CODEC
[NASA-CR-191169] p 146 N94-12433

ERROR SIGNALS

Airborne optical tracking control system design study
[DE93-009515] p 382 N94-11662

ERRORS

AMIP: The Atmospheric Model Intercomparison Project
[DE93-007400] p 273 N94-10151

AMIP: The Atmospheric Model Intercomparison Project
[DE93-007413] p 273 N94-10152

The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter

Segmented land use classification of multitemporal ERS-1 SAR data using a majority filter
p 245 N94-12472

Land cover monitoring with multi-temporal ERS-1 SAR observations in the Netherlands p 246 N94-12473

Mapping a dynamic playa surface using multitemporal ERS-1 SAR data: First results p 246 N94-12474

ERS-1 altimetry of inland water and land
p 246 N94-12475

Preliminary studies on the application of ERS-1 data to topographic mapping p 246 N94-12476

Radarmap of Germany: First mosaic and classification
p 246 N94-12477

Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea
p 246 N94-12478

Example of SPOT/ERS-1 complementarity
p 247 N94-12479

The use of ERS-1 SAR data to study surface states p 247 N94-12480
Snow and glacier investigations by ERS-1 SAR: First results p 247 N94-12481
Monitoring of snowcover in high mountain terrain with ERS-1 SAR p 247 N94-12482
Application of ERS-1 SAR data to snow mapping p 247 N94-12483
Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484
Preliminary ERS-1 assessment for Canadian agriculture and forestry applications p 248 N94-12486
Segmentation and change detection in ERS-1 images over East Anglia p 248 N94-12487
ERS-1 SAR crop monitoring experiment in East Anglia, UK p 248 N94-12488
Geoecological monitoring of an agricultural area p 248 N94-12489
Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490
Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site p 248 N94-12491
Assessment of ERS-1 SAR data for soil moisture estimation p 249 N94-12492
Temporal monitoring of soil moisture using ERS-1 SAR data p 249 N94-12493
Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests p 249 N94-12494
Seeing the Black Forest by ERS-1 and AIRSAR: A comparison p 249 N94-12495
The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496
TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497
TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498
TREES project: Overview and status of the ERS-1 SAR contribution p 250 N94-12499
Impact of ERS-1 wind/wave/ice data on operational ocean forecasting p 250 N94-12500
Use of ERS-1 wind and wave products in operational meteorology p 250 N94-12502
Validation of ATSR-1 using aircraft radiometer measurements over the South Atlantic p 252 N94-12515
A user appraisal of ATSR near-real-time products p 252 N94-12516
Cloud studies using ATSR data p 253 N94-12517
Preliminary validation of ATSR sea surface temperatures near the Faeroes p 253 N94-12519
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR p 253 N94-12520
Ship traffic monitoring using the ERS-1 SAR p 253 N94-12521
Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis p 254 N94-12523
Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524
Mapping of sea bottom topography with ERS-1 C-band SAR p 254 N94-12525
ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526
Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology p 254 N94-12528
Comparison of ERS-1 SAR images of the Western Mediterranean to in situ oceanographic data: PRIM-1 Cruise (May 1992) p 255 N94-12529
Regional orbit precision in the Mediterranean area p 39 N94-12530
Topography of the Western Mediterranean from the ERS-1 altimeter p 255 N94-12531

ESA SATELLITES
ESA/ESOC: 25 years
[ESA-BR-90] p 485 N94-11379

ESA SPACECRAFT
ESA/ESOC: 25 years
[ESA-BR-90] p 485 N94-11379

ESCARPMENTS
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

ESSENTIALLY NON-OSCILLATORY SCHEMES
Large eddy simulation of shock turbulence interaction p 155 N94-12289
Computational methods for problems in aerodynamics using parallel and vector architectures
[AD-A265626] p 16 N94-12377

ESTERS
Tandem mass spectrometric analysis of phosphate esters
[AD-A265483] p 78 N94-12009

ESTIMATES
US areal wind resource assessment
[DE93-011905] p 262 N94-11051
Feature association without a motion estimate
[AD-A265162] p 138 N94-11891

ESTIMATING
Advances in time-scale algorithms p 334 N94-10988
Confidence of the three-point estimator of frequency drift p 357 N94-11003
Neural network model selection using asymptotic jackknife estimator and cross-validation method
[AD-A264960] p 339 N94-11289
Discrete Kalman filtering equations of second-order form for control-structure interaction simulations
[NASA-CR-193723] p 331 N94-11522
Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926

ESTUARIES
Summary of implementation and demonstration projects in bays and estuaries
[PB93-194637] p 265 N94-10846
Biscayne bay: A bibliography of the marine environment
[PB93-184802] p 266 N94-11451
Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan
[PB93-191633] p 267 N94-11864

ETALONS
Continued development of an ultra-narrow bandpass filter for solar research
[NASA-CR-194169] p 381 N94-10735

ETCHING
Electrochemical process and product therefrom
[AD-D015767] p 75 N94-10380
Dynamic studies of crystal growth using the AFM
[DE93-009549] p 399 N94-11268
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A264914] p 92 N94-11848
Low voltage electron beam lithography
[AD-A265358] p 145 N94-12405

ETHERS
New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513
The properties of perfluoropolyethers used for space applications
[NASA-TM-106275] p 88 N94-10864
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

ETHYL COMPOUNDS
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

ETHYLENEDIAMINETETRAACETIC ACIDS
In situ secondary ion mass spectrometry analysis
[DE93-012185] p 76 N94-11140

ETIOLOGY
Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

EULER BUCKLING
Nonlinear response of a clamped-clamped beam with internal resonance under sinusoidal excitation p 186 N94-10897

EULER EQUATIONS OF MOTION
Hypersonic flow computations around re-entry vehicles p 9 N94-10461
A comparison of high resolution upwind solvers on 3-D inviscid hypersonic flows p 10 N94-10463
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-191161] p 28 N94-10816
An improved material interface reconstruction algorithm for Eulerian codes
[DE93-011679] p 326 N94-11226
Looking for O(N) Navier-Stokes solutions on non-structured meshes
[NASA-CR-191472] p 345 N94-11277
The modelling of aerodynamic flows by solution of the Euler equations on mixed polyhedral grids
[ARA-84] p 16 N94-11888

EULER-LAGRANGE EQUATION
Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936

EURECA (ESA)
Results of mission preparation support to microgravity experiments on board of Eureca 1 p 111 N94-10138

EUROPA
Theoretical studies of the radar properties of the icy Galilean moons of Jupiter
[NASA-CR-193407] p 434 N94-11361

EUROPE
Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490

EUROPEAN AIRBUS
Future needs in the development of materials for aircraft interiors and equipment p 21 N94-10794

EUROPEAN SPACE AGENCY
Analysis of the cost evaluation of ESA programmes and comparable national and international programmes
[GTS-92063] p 416 N94-10145
ESA/ESOC: 25 years
[ESA-BR-90] p 485 N94-11379
Spain: Success story in space
[ESA-BR-81] p 38 N94-11461
ESRO's first scientific satellite programme, 1961 - 1966
[ESA-HSR-2] p 44 N94-11462
Mission to the Moon: An ESA study on future exploration p 460 N94-12153
ESA Costing Software (ECOS) introduction
[ESA-F-28] p 333 N94-12383

EUROPEAN SPACE PROGRAMS
ESA/ESOC: 25 years
[ESA-BR-90] p 485 N94-11379

EUROPIUM COMPOUNDS
A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source
[DE93-009795] p 75 N94-10338

EUTECTIC ALLOYS
Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194
EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199

EUTECTICS
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527

EUTROPHICATION
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

EVALUATION
A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657

EVAPORATION
Evaporation under microgravity conditions p 102 N94-10086
Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243
Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation p 432 N94-12226
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549

EVAPORATION RATE
Marangoni instability induced convection in an evaporating liquid droplet p 104 N94-10094

EVAPORATIVE COOLING
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851

EVAPORATORS
Theoretical evaluation of R22 and R502 alternatives
[DE93-014767] p 411 N94-10853
Ballistic electron transport studies using BEEM
[AD-A266029] p 369 N94-12395

EVAPOTRANSPIRATION
Design of a global soil moisture initialization procedure for the simple biosphere model
[NASA-TM-104590] p 284 N94-10940
Estimation of areal evapotranspiration using LANDSAT TM data: Kitami City, Hokkaido, Japan p 219 N94-12703

EVERGLADES (FL)
Emissions of sulfur gases from marine and freshwater wetlands of the Florida Everglades: Rates and extrapolation using remote sensing p 269 N94-12457

EXCIMER LASERS
Characterization of an excimer laser-ablated plasma and applications p 392 N94-11450

EXCIMERS
Dynamics of charge-transfer excited states relevant to photochemical energy conversion [DE93-013981] p 263 N94-11116
EXCITATION
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light p 376 N94-10575
Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578
Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves [DE93-613827] p 398 N94-11025
About excitation of round waveguide by a point current source [DE93-621352] p 133 N94-11034
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering [DE93-012324] p 77 N94-11359
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay [DE93-620976] p 143 N94-11365
EXCITONS
Dynamics of charge-transfer excited states relevant to photochemical energy conversion [DE93-013981] p 263 N94-11116
Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids [AD-A264689] p 399 N94-11263
The additional contribution caused by Coulomb interaction to the exciton dispersion in multiple quantum wells and superlattices for direct band gap cubic semiconductors [DE93-613538] p 402 N94-11659
EXERCISE PHYSIOLOGY
Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity p 310 N94-12001
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368
EXHAUST EMISSION
Pulsed plasma processing for control of diesel engine emissions [DE93-011884] p 181 N94-11247
EXHAUST GASES
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912
Pulsed plasma processing for control of diesel engine emissions [DE93-011884] p 181 N94-11247
Results from the D3-D advanced divertor program [DE93-015472] p 393 N94-11514
Ultraviolet plume instrument description and plume data reduction methodology [AD-A266141] p 54 N94-11643
Stratospheric aircraft exhaust plume and wake chemistry [NASA-CR-191495] p 279 N94-12572
The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774
EXOBIOLOGY
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375) [NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376) [NASA-SP-7011(376)] p 303 N94-10399
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374) [NASA-SP-7011(374)] p 304 N94-11689
Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991
EXPERIMENT DESIGN
Bubbles and drops behaviour under low-gravity: A space experiment for the IML-2 mission p 104 N94-10098
CdTe crystal growth by THM with a rotating magnetic field p 107 N94-10116
Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128
Microgravity experiments using TR-1A rocket p 112 N94-10142
Theoretical and Experimental Methods in Hypersonic Flows [AGARD-CP-514] p 2 N94-10421
A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience [AGARD-LS-190] p 28 N94-11022
Gas-Grain Simulation Facility (GGSF). Volume 2: Conceptual design definition [NASA-CR-177613] p 423 N94-11229
Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment [NASA-CR-193829] p 285 N94-11598
EXPERT SYSTEMS
Enhancements to the Engine Data Interpretation System (EDIS) [NASA-CR-192593] p 180 N94-10815
A tool for generation of expert system shells [INPE-5493-TDI/510] p 325 N94-11181
An expert system shell for inferring vegetation characteristics: Prototype help system (Task 1) [NASA-CR-193411] p 231 N94-11236
Toward intelligent flight control p 33 N94-11503
Design, development, and testing of an automated knowledge-acquisition tool to aid problem solving, decision making, and planning [DE93-010239] p 417 N94-11661
Linking medical records to an expert system p 306 N94-11797
Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session) [DE93-013470] p 340 N94-12428
EXPLOSIONS
Turbulent wall jet in blast wave precursor [DE93-011955] p 151 N94-11144
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243
Three-dimensional finite element analysis of explosive safety facilities: A technology assessment [AD-A265700] p 35 N94-12562
EXPLOSIVES
The solubility of epsilon-CL-20 in selected materials [DE93-009304] p 77 N94-11602
EXPONENTIAL FUNCTIONS
Convergence of exponentially convex functions on foundation semigroups [DE93-619665] p 342 N94-10325
EXPOSURE
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554
EXTERNAL COMBUSTION ENGINES
External combustion engine having a combustion expansion chamber [AD-D015761] p 178 N94-10375
Heat regenerative external combustion engine [AD-D015765] p 178 N94-10378
EXTERNAL TANKS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-57 [NASA-TM-107562] p 40 N94-10805
EXTINCTION
Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions p 282 N94-12149
EXTRACTION
Production of electronic grade lunar silicon by disproportionation of silicon difluoride p 435 N94-12017
EXTRAGALACTIC RADIO SOURCES
Intraday variability and the compactness of extragalactic radio sources p 135 N94-11064
Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065
EXTRATERRESTRIAL ENVIRONMENTS
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243
EXTRATERRESTRIAL RADIATION
Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560
Operational radiological support for the US manned space program p 318 N94-11561
Coulomb effects in low-energy nuclear fragmentation [NASA-TP-3352] p 485 N94-12434
EXTRAVEHICULAR ACTIVITY
Allowable exposure limits for carbon dioxide during extravehicular activity [NASA-TM-103832] p 315 N94-11375
A mechanism for the reduction in risk of decompression sickness in microgravity environment p 312 N94-11545
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546
In-space assembly-servicing requirements p 348 N94-11569
Space Station maintenance studies using plaid graphics p 335 N94-11578
EXTREMELY HIGH FREQUENCIES
Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778
EXTRUDING
Particle attraction effects on the centrifugal casting and extrusion of alumina [DE93-011559] p 82 N94-10957
EYE (ANATOMY)
Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813
Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529
Aircraft windscreens enhance visual search disruption produced by laser glare [AD-A265167] p 26 N94-11892
EYE MOVEMENTS
Visual psychophysics of egomotion [AD-A265253] p 304 N94-11681

F

F REGION
Some results with the new digital ionosonde in San Diego [AD-A265178] p 275 N94-11101
Observing and modelling F-region ionospheric dynamics using the (O2) 7320A emission [AD-A265407] p 279 N94-12419
F-15 AIRCRAFT
Decoupling of aircraft responses p 32 N94-11497
F-16 AIRCRAFT
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233
Decoupling of aircraft responses p 32 N94-11497
FABRICATION
Fibre reinforced structures with glass matrix p 64 N94-10064
Technique to prepare high-reflectance optical fiber bragg gratings with single exposure in-line on fiber draw tower [AD-D015757] p 374 N94-10373
Thin-film edge field emitter device and method of manufacture therefore [AD-D015764] p 140 N94-10377
Fabrication and analysis of a special optical connector containing a 1/4-inch-long optical fiber for DOI tests [DE93-013115] p 381 N94-10647
Method for producing a hybridization of detector array and integrated circuit for readout [NASA-CASE-NPO-18062-1-CU] p 141 N94-10656
Alkali metal for ultraviolet band-pass filter [NASA-CASE-NPO-18433-1-CU] p 381 N94-10657
Sensor abstractions to support many-robot systems [AD-A265907] p 180 N94-10803
Application of powder metallurgy techniques to produce improved bearing elements for liquid rocket engines [NASA-CR-193731] p 82 N94-10804
Development of commercially viable high-T(sub c) Bi-2223 superconductor tapes [DE93-009966] p 142 N94-10951
Processing and transport properties of high J(sub c) silver clad Bi-2223 tapes and coils [DE93-010674] p 398 N94-11073
A history of tungsten- and molybdenum-base alloys [DE93-010283] p 82 N94-11108
Dry in-line thermoplastic matrix impregnation, phase 1 [AD-A265016] p 67 N94-11221
A prototype urine collection device for female aircrew p 317 N94-11549
The physics of pattern formation of liquid interfaces [DE93-013333] p 154 N94-11814
High frequency behavior of long and small junctions [AD-A265670] p 403 N94-12336
Liquid Cooled Heat Sink with through Vias (LCHS) [AD-A266008] p 73 N94-12344
Dynamic high-pressure shock compaction of diamond powders [AD-A266004] p 93 N94-12354
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems [AD-A265599] p 404 N94-12375
Performance aspects of de Laval spray-forming nozzles [DE93-013671] p 163 N94-12604
FABRICS
On the mechanical development of the Flexible External Insulation (FEI) for Hermes spaceplane p 62 N94-10048
FABRY-PEROT INTERFEROMETERS
Continued development of an ultra-narrow bandpass filter for solar research [NASA-CR-194169] p 381 N94-10735

Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013

FACE CENTERED CUBIC LATTICES

Interatomic interactions in BCC and FCC lattices of transition metals [DE93-621541] p 398 N94-11090

Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds [DE93-010687] p 400 N94-11457

FACTORIZATION

Balancing of the normalized right coprime factorization of a nonlinear system [MEMO-1096] p 341 N94-10273

Vectorizing matrix operations arising from PDE discretization on 9-point stencils [CWI-NM-R9221] p 342 N94-10351

Improvements for obtaining iterative solutions of large linear systems [DE93-767968] p 343 N94-10729

FAILURE

Hydrostatic testing of thick laminated composite cylinders for performance model validation [DE93-012728] p 184 N94-10264

Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB [DE93-010742] p 97 N94-10294

Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity [DE93-011597] p 263 N94-11173

Scalloped margin domes: What are the processes responsible and how do they operate? p 454 N94-12120

FAILURE ANALYSIS

Probabilistic evaluation of uncertainties and risks in aerospace components [NASA-TM-105603] p 185 N94-10361

Fractography handbook of spaceflight metals [NASA-RP-1291] p 81 N94-10504

ACARA user's manual [NASA-TM-106277] p 183 N94-11167

Failure prediction of thin beryllium sheets used in spacecraft structures [NASA-CR-194164] p 187 N94-11190

An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276

ENSAFE fireset flex circuit analysis [DE93-013106] p 144 N94-11478

Design for testability and diagnosis at the system-level p 184 N94-11563

Isothermal fatigue mechanisms in Ti-based metal matrix composites [NASA-CR-191181] p 74 N94-12594

FAILURE MODES

Design for testability and diagnosis at the system-level p 184 N94-11563

FAR FIELDS

Research on acoustic coupling to electromagnetic pulses in tissue [AD-A264764] p 301 N94-11583

Plane mixing layer vortical structure kinematics p 159 N94-12313

FAR INFRARED RADIATION

Atmospheric and spectroscopic research in the far infrared [NASA-CR-193551] p 280 N94-12582

FARM CROPS

Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber [NASA-TM-109188] p 315 N94-11258

ERS-1 SAR crop monitoring experiment in East Anglia, UK p 248 N94-12488

Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490

FAST FOURIER TRANSFORMATIONS

FFT-based methods for nonlinear image restoration in confocal microscopy [CS-9301] p 174 N94-10904

Design for testability and diagnosis at the system-level p 184 N94-11563

FASTENERS

Structural material, manufacture, and design requirements for high-temperature fasteners for space plane technologies p 63 N94-10055

Self locking set screw [AD-D015774] p 178 N94-10385

FATIGUE (MATERIALS)

Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites [AD-A265153] p 187 N94-11096

FATIGUE LIFE

Fatigue-life behavior and matrix fatigue crack spacing in unnotched SCS-6/Timetal 21S metal matrix composites [NASA-CR-191467] p 185 N94-10715

Computational simulation of hot composite structures [NASA-TM-106200] p 186 N94-10762

Structural health monitoring using embedded fibre optic sensors p 22 N94-11334

The impact of active controls technology on the structural integrity of aeronautical vehicles p 27 N94-11341

Microstructure-based fatigue life prediction methods for naval steel structures [AD-A265429] p 85 N94-12426

Proposed framework for thermomechanical life modeling of metal matrix composites [NASA-TP-3320] p 74 N94-12449

Isothermal fatigue mechanisms in Ti-based metal matrix composites [NASA-CR-191181] p 74 N94-12594

FATIGUE TESTS

Fatigue-life behavior and matrix fatigue crack spacing in unnotched SCS-6/Timetal 21S metal matrix composites [NASA-CR-191467] p 185 N94-10715

Evaluation of test specimen shape effects on the flexural fatigue of CFRP laminates [NAL-TR-1159] p 65 N94-10857

Fiber-optic sensor systems for measuring strain and the detection of acoustic emissions in smart structures p 71 N94-11337

General aviation aircraft-normal acceleration data analysis and collection project [AD-A265055] p 26 N94-11858

FAULT DETECTION

Fault location in structures using neural networks p 70 N94-11335

FAULT TOLERANCE

A formally verified algorithm for interactive consistency under a hybrid fault model [NASA-CR-4527] p 326 N94-11188

FAULT TREES

Techniques, processes, and measures for software safety and reliability [DE93-012379] p 322 N94-10347

GRAFTED (GRAphical Fault Tree EDitor): A fault tree description program for target vulnerability/survivability analysis [AD-A264078] p 328 N94-11301

FAYALITE

On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225

FEASIBILITY

Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity [DE93-010010] p 262 N94-10258

FEASIBILITY ANALYSIS

A proof-of-concept implementation of persistence in a hierarchical storage system [DE93-009959] p 319 N94-10318

A feasibility study regarding the addition of a fifth control to a rotorcraft in-flight simulator [NASA-CR-193240] p 30 N94-10895

Investigation of alternate power source for Space Shuttle Orbiter hydraulic system [NASA-CR-193229] p 46 N94-10911

Thermal error compensation feasibility study using artificial intelligence [AD-A266084] p 340 N94-12411

FEDERAL BUDGETS

From red tape to results: Creating a government that works better and costs less p 422 N94-11351

From red tape to results: Creating a government that works better and costs less. Executive summary p 422 N94-11353

Assessing the adequacy of the industrial base [AD-A264954] p 417 N94-11856

Financial management: NASA's financial reports are based on unreliable data [AD-A265690] p 418 N94-12443

FEEDBACK

The cloud radiative feedback of a midlatitude squall line system and implication for climate study [DE93-010511] p 283 N94-10290

On the stability of stationary regimes in a distributed autovibration system with external feedback [DE93-620979] p 141 N94-10543

Magnetohydrodynamic computation of feedback stabilization of resistive-shell instabilities in the reversed field pinch [DE93-013466] p 388 N94-10852

Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay [DE93-620976] p 143 N94-11365

FEEDBACK CONTROL

In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734

Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251

Multiple laser beam combining and phasing using closed-loop control [DE93-009830] p 175 N94-11283

Decoupling of aircraft responses p 32 N94-11497

Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501

A regional inverse eigenvalue problem: Solution with application in control theory [DE93-619666] p 339 N94-11630

Model reference adaptive control (MRAC) with applications to robotics p 339 N94-11640

An adaptive and robust control for motion coordination of two-cooperating robot manipulators p 340 N94-11825

Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics [DE93-012823] p 340 N94-12543

FEEDFORWARD CONTROL

In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734

FELDSPARS

Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214

FEMALES

A prototype urine collection device for female aircrew p 317 N94-11549

Pattern of federal procurement from minority and women-owned small business [PB93-189355] p 417 N94-11844

FERMI LIQUIDS

Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids [DE93-012673] p 412 N94-11162

FERMIONS

Top and Higgs masses in a composite boson model [DE93-010874] p 359 N94-10302

On thermodynamic properties of heavy fermion systems in magnetic field [DE93-613819] p 409 N94-10403

On local frame fields and fermion dynamics in space with nontrivial topologies [DE93-617657] p 349 N94-10548

Exact solutions of a many-anyon problem [DE93-617646] p 411 N94-10832

Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids [DE93-012673] p 412 N94-11162

Fermion-boson scattering in ladder approximation [DE93-613111] p 368 N94-11581

FERRITES

Nonlinear effects in ferrite tuned cavities [DE93-014136] p 374 N94-12785

FERROELECTRICITY

Materials for adaptive structural acoustic control, volume 3 [AD-A264621] p 358 N94-11262

Spatial light modulator having photosensitive and ferroelectric layers [AD-D015731] p 404 N94-12400

FERROMAGNETIC MATERIALS

Effect of a distribution of exchange parameters within a simple localized-itinerant model [DE93-610314] p 395 N94-10314

A lattice gas model for enzyme kinetics with alternate interactions [DE93-613027] p 395 N94-10411

FERROMAGNETISM

Magnetization reversal by nucleation [DE93-610313] p 350 N94-10313

FIBER COMPOSITES

The application of advanced materials to aircraft nacelle structures p 57 N94-10011

Hybrid materials for use at elevated temperatures p 57 N94-10013

Distortions and stresses in thin shells due to anisotropic thermal expansion p 57 N94-10014

Mechanical properties of magnesium/carbon composites developed by hot pressing under medium pressure p 59 N94-10024
Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030
Cost effectiveness of structural applications of fibre reinforced thermoplastics p 60 N94-10032
Application of advanced thermoplastics p 60 N94-10033
Low cost thermoplastic composites for structural applications: Design concepts using new materials and processes p 60 N94-10034
New x ray scanning topographic approaches to nondestructive evaluation of composites p 61 N94-10039
Fibre-reinforced ceramic components by filament winding for intermediate temperature applications p 61 N94-10041
New processes for lightweight ceramic matrix composites p 61 N94-10043
Introducing SMaSE: An aide memoire on structural materials and space engineering p 63 N94-10053
Fibre reinforced structures with glass matrix p 64 N94-10064
Silicon-based elementary particle tracking system: Materials science and mechanical engineering design [DE93-012630] p 65 N94-10740
Interface considerations in Al2O3/NiAl composite [NASA-CR-191167] p 66 N94-11202
Dry in-line thermoplastic matrix impregnation, phase 1 [AD-A265016] p 67 N94-11221
An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276
Factors affecting the embedding of optical fibre sensors in advanced composite structures p 70 N94-11336
The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite [DE93-011690] p 73 N94-11612
Mechanical interaction between synthetic fiber and cement base matrix in FRC composites [AD-A265310] p 73 N94-11686
Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites [AD-A265177] p 92 N94-11876
Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013
Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347
Proposed framework for thermomechanical life modeling of metal matrix composites [NASA-TP-3320] p 74 N94-12449

FIBER OPTICS
Multiplexed and distributed optical fibre sensors p 64 N94-10065
Fibre optic strain and temperature measurement in composite materials: A review of the OSTIC programme p 65 N94-10066
Method and apparatus for polarization-maintaining fiber optical amplification with orthogonal polarization output [AD-D015756] p 374 N94-10372
A fiber optic network system with low crosstalk using code-division multiplexing [AD-D015763] p 374 N94-10376
NASA's first in-space optical gyroscope: A technology experiment on the X ray Timing Explorer spacecraft [NASA-TM-109242] p 170 N94-10667
Design and analysis of an optical interface message processor [AD-A266079] p 381 N94-10697
Performance of low-cost commercial fiber-optic transceivers for reference frequency distribution p 355 N94-10993
Ultrastable reference frequency distribution utilizing a fiber optic link p 355 N94-10994
A wide-band fiber optic frequency distribution system employing thermally controlled phase compensation p 355 N94-10995
Analysis of the eastern range multiplexed fiber optic IRIG B120 distribution system p 139 N94-10996
Optical fibre techniques for structural monitoring in composites p 69 N94-11324
Fiber optic sensing for composite smart structures p 69 N94-11327
Fiber-optic sensor systems for measuring strain and the detection of acoustic emissions in smart structures p 71 N94-11337
Fiber-optic interferometric strain gauge for smart structures applications: First flight tests p 71 N94-11340
Reliability analysis for FDDI dual homing networks [AD-A266133] p 337 N94-11475
Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013
Improved super luminescent light source specification [AD-D015746] p 176 N94-12329
Short wavelength crystal fiber devices [AD-A265716] p 176 N94-12402

FIELD COILS
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields [AD-A264251] p 311 N94-12364

FIELD EFFECT TRANSISTORS
A study of DC-DC converters with MCTs for arcjet power supplies [NASA-CR-193457] p 142 N94-10931
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents [AD-A265149] p 143 N94-11160
GaAs sigma-delta modulator modeling for Analog to Digital Converters (ADC's) [AD-A263419] p 144 N94-11516
Gallium arsenide dynamic random access memory support circuitry [AD-A265176] p 320 N94-11875

FIELD EMISSION
Thin-film edge field emitter device and method of manufacture therefore [AD-D015764] p 140 N94-10377

FIELD OF VIEW
Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems [AD-A265075] p 382 N94-11653

FIELD THEORY (PHYSICS)
From the Weyl theory to a theory of locally anisotropic space-time [DE92-644734] p 410 N94-10535
Supersqueezed states from squeezed states p 378 N94-10591
All possible electroweak models from Z orbifold [DE93-617656] p 411 N94-10880
Dissipative phase transitions in field theory models with spontaneous symmetry violation [DE93-621382] p 412 N94-11039
A theoretical kinematical study of the gradient of any cosmic scalar field [DE92-644731] p 425 N94-11136
One-loop quantum gravity on de Sitter space [DE92-641349] p 425 N94-11152
Duality twisted boundary conditions in n-sta te Potts models [DE93-619724] p 346 N94-11811

FIGHTER AIRCRAFT
Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft [NASA-TP-3356] p 30 N94-11134

FIGURE OF MERIT
Advanced control for airbreathing engines, volume 2: General Electric aircraft engines [NASA-CR-189204] p 29 N94-12271
Advanced controls for airbreathing engines, volume 3: Allison gas turbine [NASA-CR-189205] p 29 N94-12272

FILAMENT WINDING
Lightweight CFRP frame structures for a Rotex-derived manipulator system p 56 N94-10005
Design and manufacturing of filament wound thrust cylinder p 57 N94-10010
Tape winding of thermoplastic composites p 60 N94-10035
Fibre-reinforced ceramic components by filament winding for intermediate temperature applications p 61 N94-10041

FILM COOLING
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies [NASA-TM-106281] p 47 N94-11252

FILM THICKNESS
The surface plasmon spectroscopy as diagnostic technique in microgravity experiments p 110 N94-10133
Polymers for microelectronics [AD-A266036] p 94 N94-12396

FILMS
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099

FINANCIAL MANAGEMENT
Analysis of the cost evaluation of ESA programmes and comparable national and international programmes [GTS-92063] p 416 N94-10145
National patterns of R and D resources, 1992 [NSF-92-330] p 422 N94-11186
Financial management: NASA's financial reports are based on unreliable data [AD-A265690] p 418 N94-12443

FINE STRUCTURE
Fine structure of the Pomeron and the real part of the elastic scattering amplitude [DE93-617696] p 362 N94-10555
X ray and gamma ray spectroscopy of solids under pressure [DE93-014847] p 76 N94-10653
X ray absorption spectroscopy of electrochemically generated species [AD-A264749] p 77 N94-11265
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS [DE93-010861] p 400 N94-11458

FINITE DIFFERENCE THEORY
Finite difference schemes for long-time integration [NASA-CR-191471] p 343 N94-10642
Viscous flow simulation using an upwind method for hexahedral based adaptive meshes [AD-A265901] p 148 N94-10703
Combustion chamber analysis code [NASA-CR-192585] p 46 N94-10934
New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939
Development of generic field classes for finite element and finite difference problems [DE93-011678] p 345 N94-11225
Application of incremental unknowns to the Burgers equation p 156 N94-12293
Direct numerical simulation of turbulent flow over a backward-facing step p 156 N94-12296
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
Summation by parts, projections, and stability [NASA-CR-194290] p 346 N94-12776

FINITE ELEMENT METHOD
Lightweight CFRP frame structures for a Rotex-derived manipulator system p 56 N94-10005
Numerical simulation and experimental results of filament wound CFRP tubes tested under biaxial load p 58 N94-10015
Development of a fatigue analysis approach for CFRP structures under acoustic loading p 58 N94-10018
Solving the essentials of an innovative tennis racket product: Functionality, simplicity, and super-lightweight technology p 65 N94-10068
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems [DE93-009838] p 335 N94-10257
Survey to determine the value of DYNA [DE93-012390] p 321 N94-10267
NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937
New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939
Failure prediction of thin beryllium sheets used in spacecraft structures [NASA-CR-194164] p 187 N94-11190
Development of generic field classes for finite element and finite difference problems [DE93-011678] p 345 N94-11225
A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints [NASA-TM-108418] p 188 N94-11275
Computational mechanics needs study [NASA-CR-193712] p 327 N94-11279
On cell entropy inequality for discontinuous Galerkin methods [NASA-CR-191493] p 345 N94-11280
Fault location in structures using neural networks p 70 N94-11335
Structural analysis and optimization of adaptive structures by use of the finite element method p 71 N94-11339
ENSAFE fireset flex circuit analysis [DE93-013106] p 144 N94-11478
Stability of viscoelastic flow: Physical and numerical considerations p 31 N94-11493
Massively parallel hydrodynamics on unstructured grids [DE93-007325] p 153 N94-11601
Finite element simulation of the 2D collapse of a polyelectrolyte gel disk [DE93-010693] p 91 N94-11665
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
Three-dimensional finite element analysis of explosive safety facilities: A technology assessment [AD-A265700] p 35 N94-12562
Model of Kuroshio region circulation p 229 N94-12765

FINITE VOLUME METHOD
Calculations of viscous nonequilibrium flows in nozzles p 8 N94-10455
Hypersonic multi block flow simulations around space vehicles including non-equilibrium chemistry p 9 N94-10460
Flow analysis around ONERA model M5 configuration [PAPER-3D-2] p 12 N94-10478
Flow analysis around ONERA model M5 configuration [PAPER-3D-4] p 12 N94-10480
A dynamically adaptive mesh method for internal flows p 149 N94-10896
Massively parallel hydrodynamics on unstructured grids [DE93-007325] p 153 N94-11601
Modeling void growth and movement with phase change in thermal energy storage canisters [NASA-TM-106288] p 163 N94-12576
FINS
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
FIRE DAMAGE
Applications of a model to predict flame spread over interior finish materials in a compartment p 19 N94-10783
FIRE PREVENTION
Applications of continuous fiber reinforced thermoplastics in aircraft interiors p 18 N94-10775
An investigation into aircraft fuselage fire hardening p 19 N94-10782
Practical hazard assessment: An approach to the fire safety p 20 N94-10785
Developments needed to expand the role of fire modeling in material fire hazard assessment p 20 N94-10787
Aircraft material fire testing and the creation of an international working group p 21 N94-10790
Future needs in the development of materials for aircraft interiors and equipment p 21 N94-10794
Advanced aircraft materials research and development plan p 22 N94-10796
The future of aircraft cabin fire safety p 22 N94-10797
FIRES
Developments needed to expand the role of fire modeling in material fire hazard assessment p 20 N94-10787
Development of a hypermedia knowledge base of aircraft fire safety regulations p 21 N94-10793
Methanol pan fires in an enclosed space: Effect of pressure and oxygen concentration [AD-A266108] p 79 N94-12415
Analytical method for water vapor collection and analysis in aircraft cabin fires [DOT/FAA/CT-TN93/33] p 22 N94-12575
FISHERIES
Application of the airborne ocean color imager for commercial fishing [NASA-TM-103986] p 231 N94-11378
Satellite derived sea surface temperature applications for Indian Ocean resources development p 193 N94-11907
The use of remote sensing data for coastal zone management and environment in Indonesia p 196 N94-11927
Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938
Application of NOAA AVHRR data to fisheries p 215 N94-12681
Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688
Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697
FISHES
Satellite derived sea surface temperature applications for Indian Ocean resources development p 193 N94-11907
Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938
Application of NOAA AVHRR data to fisheries p 215 N94-12681
Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688
A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing p 228 N94-12757
FISHING
Application of NOAA AVHRR data to fisheries p 215 N94-12681
Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688
FITTING
Correlation of HGU-56/P aircrew helmet fitting with head anthropometric measurements [AD-A264988] p 315 N94-11291
FLAME CALORIMETERS
Computer-aided molecular design of fire resistant aircraft materials p 19 N94-10779
FLAME PROPAGATION
Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224
Some aspects of combustion modelling by low and normal gravity p 124 N94-10244
Applications of a model to predict flame spread over interior finish materials in a compartment p 19 N94-10783
Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788
On the combustion of a laminar spray [NASA-TM-106210] p 28 N94-11238
Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319
FLAME RETARDANTS
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [DOT/FAA/CT-93/3] p 17 N94-10766
A polyimide foam for advanced fire resistant aircraft applications p 17 N94-10770
New technology for effective control of flammability in polyolefin fiber/textiles p 18 N94-10774
Uralane (tm) 5774-A/B: Ciba-Geigy's advanced urethane adhesive for the aircraft industry p 18 N94-10777
The fire properties of insulation bags, as installed and after aircraft operations p 19 N94-10778
Fire-resistant hydrolytically stable poly(arylene phosphine oxide) material systems p 19 N94-10780
A non-halogenated, flame retarded polycarbonate p 19 N94-10781
Advanced aircraft materials research and development plan p 22 N94-10796
FLAMES
The pyrene laser induced fluorescence technique as a diagnostic tool for combustion thermometry in microgravity p 107 N94-10113
On the combustion of a laminar spray [NASA-TM-106210] p 28 N94-11238
Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317
Distributed combustion in solid propellants [AD-A265727] p 99 N94-12564
FLAMMABILITY
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [DOT/FAA/CT-93/3] p 17 N94-10766
New thermoplastic laminating adhesives for the aircraft industry with low heat release and low smoke emission p 17 N94-10767
A new low smoke, low heat release structural foam p 17 N94-10768
Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769
A polyimide foam for advanced fire resistant aircraft applications p 17 N94-10770
A repair patching system for aircraft cargo liners p 17 N94-10771
Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772
New technology for effective control of flammability in polyolefin fiber/textiles p 18 N94-10774
Uralane (tm) 5774-A/B: Ciba-Geigy's advanced urethane adhesive for the aircraft industry p 18 N94-10777
The fire properties of insulation bags, as installed and after aircraft operations p 19 N94-10778
Fire-resistant hydrolytically stable poly(arylene phosphine oxide) material systems p 19 N94-10780
A non-halogenated, flame retarded polycarbonate p 19 N94-10781
The OSU heat release rate test using the oxygen consumption principle p 20 N94-10784
Practical hazard assessment: An approach to the fire safety p 20 N94-10785
Fire resistance and mechanical properties for phenolic prepregs p 20 N94-10786
Developments needed to expand the role of fire modeling in material fire hazard assessment p 20 N94-10787
Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788
Factors that affect OSU thermal performance of aircraft interior materials p 20 N94-10789
Development and analysis of insulation constructions for aerospace wiring applications p 21 N94-10791
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials [AD-A266057] p 22 N94-12384
FLAPERONS
Determining XV-15 aeroelastic modes from flight data with frequency-domain methods [NASA-TP-3330] p 25 N94-10935
FLAT PLATES
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615
FLATNESS
New aerodynamic information obtained from the solution of the inverse problem for aerofoils [NAL-TR-1172] p 14 N94-10860
FLAVOR (PARTICLE PHYSICS)
Solar neutrinos with three flavor mixings [DE93-011006] p 483 N94-11619
FLEXIBLE BODIES
Payload sensitivity in coupled bending and torsional vibrations in flexible beams [MEMO-1102] p 184 N94-10161
Trajectory pattern inverse dynamics and control of nonlinear dynamics systems with application to flexible structures p 181 N94-11219
Reduced gravity multibody dynamics testing [NASA-CR-192589] p 125 N94-11483
Computational algorithms or identification of distributed parameter systems [AD-A265252] p 331 N94-11680
Control of large space structures with varying configuration [AD-A265764] p 44 N94-12387
FLEXIBLE WINGS
Multidimensional intelligent control for superlight air vehicles p 27 N94-11347
FLEXING
Evaluation of test specimen shape effects on the flexural fatigue of CFRP laminates [NAL-TR-1159] p 65 N94-10857
Flexure and the role of inplane force around coronae on Venus p 452 N94-12112
FLIGHT CHARACTERISTICS
Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft [NASA-TP-3356] p 30 N94-11134
Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251
Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft [NASA-TM-104008] p 30 N94-11259
Comparing aircraft agility using mahalanobis distances [PB93-175446] p 26 N94-11464
Decoupling of aircraft responses p 32 N94-11497
FLIGHT CLOTHING
Correlation of HGU-56/P aircrew helmet fitting with head anthropometric measurements [AD-A264988] p 315 N94-11291
FLIGHT CONDITIONS
Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles [NAL-TR-1149] p 27 N94-10367
Parametric analysis of atmospheric processes [NASA-CR-192523] p 347 N94-10757
Fiber-optic interferometric strain gauge for smart structures applications: First flight tests p 71 N94-11340
FLIGHT CONTROL
Experimental results in aerodynamic stability and control of a TSTO configuration p 3 N94-10424
Extraction of stability and control derivatives from orbiter flight data [NASA-TM-4500] p 13 N94-10707
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results [NASA-TM-4499] p 13 N94-10820
A feasibility study regarding the addition of a fifth control to a rotorcraft in-flight simulator [NASA-CR-193240] p 30 N94-10895
Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft [NASA-TP-3356] p 30 N94-11134
Preliminary supersonic flight test evaluation of performance seeking control [NASA-TM-4494] p 28 N94-11205

Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft [NASA-TM-106265] p 30 N94-11251
Stability in Aerospace Systems [AGARD-R-789] p 31 N94-11489
Stability analysis and aerospace vehicle dynamics p 31 N94-11491
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492
Nonlinear and dynamic analysis of flight p 32 N94-11496
Decoupling of aircraft responses p 32 N94-11497
Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499
Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501
Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502
Toward intelligent flight control p 33 N94-11503
X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

FLIGHT CREWS
Correlation of HGU-56/P aircrew helmet fitting with head anthropometric measurements [AD-A264988] p 315 N94-11291
Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532
In-space assembly-servicing requirements p 348 N94-11569
Aviators, air combat, and combat stress: An Air F orce commander's primer [AD-A265083] p 313 N94-11867

FLIGHT ENVELOPES
Extraction of stability and control derivatives from orbiter flight data [NASA-TM-4500] p 13 N94-10707

FLIGHT OPERATIONS
Analyzing human errors in flight mission operations p 314 N94-11534

FLIGHT PATHS
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

FLIGHT SAFETY
Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813

FLIGHT SIMULATION
Nonlinear stability and control study of highly maneuverable high performance aircraft [NASA-CR-193480] p 25 N94-10344
Aerodynamic model identification of quiet STOL experimental aircraft ASKA from dynamic flight test data [DE93-767967] p 25 N94-10728
Flight simulator experiment of the cockpit advisory system [NAL-TR-1151] p 33 N94-10733
In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734
Advanced rotorcraft flight simulation: Model development, validation and parallel implementation p 25 N94-11056
Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

FLIGHT SIMULATORS
A feasibility study regarding the addition of a fifth control to a rotorcraft in-flight simulator [NASA-CR-193240] p 30 N94-10895

FLIGHT TESTS
Characterization of in-flight performance of ion propulsion systems [NASA-TM-106283] p 46 N94-10761
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results [NASA-TM-4499] p 13 N94-10820
Determining XV-15 aeroelastic modes from flight data with frequency-domain methods [NASA-TP-3330] p 25 N94-10935
Performance and rotor loads measurements of the Lynx XZ170 helicopter with rectangular blades [NASA-TM-104000] p 1 N94-10936
NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937
An environmental study of the National Aerospace Plane [AD-A266071] p 25 N94-10945
Preliminary supersonic flight test evaluation of performance seeking control [NASA-TM-4494] p 28 N94-11205
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233
Fiber-optic interferometric strain gauge for smart structures applications: First flight tests p 71 N94-11340
Workshop on Solar Electric Propulsion p 54 N94-11416
Reduced gravity multibody dynamics testing [NASA-CR-192589] p 125 N94-11483
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492
X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504
On-orbit refueling p 38 N94-11566
Helicopter approach capability using the differential Global Positioning System [NASA-CR-177618] p 24 N94-12355
Improvement of method for experimental determination of flutter speed by parameter identification [NASA-CR-193555] p 33 N94-12769

FLOAT ZONES
Experimental study of axisymmetric thermocapillary flows p 100 N94-10072
The use of magnetic fields for damping unsteady Marangoni convection in GaAs floating zones under microgravity p 100 N94-10073
Instability of thermocapillary convection in floating zones p 101 N94-10076
Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080
Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system) p 101 N94-10082
On shape of single crystals grown by FZM in microgravity p 102 N94-10084
Liquid bridges and floating zones p 102 N94-10085
Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087
Marangoni motion during melting of a hypermonotectic alloy: Numerical simulations for the D2 experiment IHF04 p 113 N94-10177
Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193

FLOATS
Mixing of drifter ensemble by mesoscale currents p 228 N94-12760

FLOCCULATING
Particle attraction effects on the centrifugal casting and extrusion of alumina [DE93-011559] p 82 N94-10957

FLOOD DAMAGE
Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989

FLOOD PREDICTIONS
Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989

FLOODS
International Space Year in China p 36 N94-10680
Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624

FLOQUET THEOREM
The effect of gravity modulation on thermosolutal convection p 105 N94-10103
The effect of gravitational modulation on convection in vertical Bridgman growth p 113 N94-10178
Floquet operator as integral of motion p 380 N94-10610

FLOW CHARACTERISTICS
Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction p 6 N94-10443
Proceedings of the 10th NAL Symposium on Aircraft Computational Aerodynamics: CFD Workshop on GK Airfoil and ONERA M5 Geometry [NAL-SP-20] p 10 N94-10466
Description of 2D problem: Aerodynamic analysis of Garabedian-Korn 75-06-12 airfoil p 10 N94-10467
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Compendium of results p 11 N94-10475
Description of 3D problem: Flow analysis around ONERA model M5 configuration p 11 N94-10476
Flow analysis around ONERA model M5 configuration [PAPER-3D-1] p 11 N94-10477
Flow analysis around ONERA model M5 configuration [PAPER-3D-2] p 12 N94-10478
Flow analysis around ONERA model M5 configuration [PAPER-3D-3] p 12 N94-10479
Flow analysis around ONERA model M5 configuration [PAPER-3D-4] p 12 N94-10480
Flow analysis around ONERA model M5 configuration [PAPER-3D-5] p 12 N94-10481
Flow analysis around ONERA model M5 configuration: Compendium of results p 12 N94-10482
Viscous flow simulation using an upwind method for hexahedral based adaptive meshes [AD-A265901] p 148 N94-10703
Improvement of the flow quality in the ARA transonic tunnel by means of a long cell honeycomb [ARA-MEMO-375] p 34 N94-10894
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes [NASA-TP-3383] p 15 N94-11133
The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940
Superfluid turbulence p 158 N94-12307

FLOW DISTORTION
A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct [NASA-TM-106250] p 39 N94-10764
The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058

FLOW DISTRIBUTION
Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity p 101 N94-10079
Marangoni flows in open cavities with differentially heated end walls p 104 N94-10097
The kinematics of buoyancy induced mixing p 123 N94-10239
A grid generation method to calculate the flow field in a three-dimensional cascade of blades [NAL-TR-1158] p 147 N94-10364
Numerical calculation of scramjet inlet flow [NAL-TR-1174T] p 27 N94-10370
CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422
The upgrading of the arc heated wind tunnel of the DLR (LBK) with respect to its effects on the material testing p 4 N94-10432
Flow development in a circular pipe in the UTIAS/RPI M = 8.3 gun tunnel p 6 N94-10442
Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446
Stability of hypersonic flow over a blunt body p 7 N94-10450
Nonequilibrium hypersonic flow in a wind-tunnel nozzle p 8 N94-10456
A CFD-based aerodynamic design procedure for hypersonic wind-tunnel nozzles p 9 N94-10458
On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-3] p 10 N94-10469
Lee waves: Benign and malignant [NASA-CR-186024] p 283 N94-10725
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover [NASA-CR-4532] p 13 N94-10758
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations [NASA-CR-191161] p 28 N94-10816
New aerodynamic information obtained from the solution of the inverse problem for aerofoils [NAL-TR-1172] p 14 N94-10860
Laser velocimeter measurements of the flow field generated by a forward-swept propfan during flutter [NASA-TM-106195] p 14 N94-10892
A dynamically adaptive mesh method for internal flows p 149 N94-10896
Flowfield structure of swept shock wave/turbulent boundary-layer interactions p 149 N94-10899
Wall interference correction based on interface measurements in subsonic wind tunnel testing p 15 N94-11154
A Galilean and tensorial invariant k-epsilon model for near wall turbulence [NASA-TM-106263] p 151 N94-11192
Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies [NASA-TM-106281] p 47 N94-11252
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions [NASA-CR-193339] p 152 N94-11526

Turbulence modeling for thrust reverser flow field prediction methods [AD-A266139] p 154 N94-11641
Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936
Appearance, behavior, and oceanic structures of warm streamers in the Kuroshio Oyashio frontal region p 198 N94-11937
Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938
The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944
Lava flows on Venus: Analysis of motion and cooling p 457 N94-12137
Suppression of the near wall burst process of a fully developed turbulent pipe flow [AD-A265995] p 161 N94-12352
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
On the wake behind a high speed train p 164 N94-12618
Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624
Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664
Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673
Observation of warm current at the boundary from north equatorial current to Kuroshio by NOAA/AVHRR p 214 N94-12676
Satellite thermal variations of Kuroshio in relation to storm floods p 215 N94-12685
ADCP evidence for upper layer circulation in northeast of the South China Sea p 215 N94-12686
The WOCE/TOGA Surface Velocity Programme (SVP) p 216 N94-12691
The circulation near Luzon p 219 N94-12707
Current variability on the shelf break northeast of Taiwan p 219 N94-12708
Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data p 220 N94-12711
Variability of the Kuroshio observed from satellite thermal imagery p 221 N94-12717
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724
The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729
A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining p 224 N94-12733
Bottom currents and possibilities for near bottom layer environmental investigations in the Pacific by means of self contained bottom stations p 224 N94-12734
Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752
Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754
Mixing of drifter ensemble by mesoscale currents p 228 N94-12760
Model of Kuroshio region circulation p 229 N94-12765
The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774
The 1991 version of the plume impingement computer program. Volume 1: Description [NASA-CR-194192] p 166 N94-12775

FLOW EQUATIONS
Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320

FLOW MEASUREMENT
Pressure and force measurements on models set in hypersonic flows: A review p 5 N94-10435
Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441
Experimental, analytical, and computational methods applied to hypersonic compression ramp flows p 6 N94-10444
Studies of hypersonic viscous flows p 8 N94-10454
Perpendicular blade vortex interaction and its implications for helicopter noise prediction: Wave-number frequency spectra in a trailing vortex for BWI noise prediction [NASA-CR-193623] p 357 N94-10752
An experimental investigation of the sources of propeller noise due to turbulence ingestion p 358 N94-11057
Relativistic heavy ion research [DE93-013127] p 367 N94-11373
Overview of the 1989 Wind Tunnel Calibration Workshop [NASA-TP-3393] p 34 N94-11869
One-year mooring of an ADCP in the central region of the Kuroshio west of Okinawa p 194 N94-11913
Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914
Measurement of the surface layer current averaged vertically using Multipaths Inverted Echosounder p 194 N94-11915
Quantifying the effect of rheology on plan-view shapes of lava flows p 282 N94-12116
An overview of the capabilities of ARA for the measurement of nozzle discharge and thrust [ARA-MEMO-378] p 55 N94-12283
Experiments on near-wall structure of three-dimensional boundary layers p 159 N94-12309
Development of the one-component diode-array velocimeter [AD-A265552] p 171 N94-12533
Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624
The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729

FLOW RESISTANCE
SWIRL as a means of liquid management in low gravity [NASA-CR-4545] p 412 N94-11523

FLOW STABILITY
Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075
Instability of thermocapillary convection in floating zones p 101 N94-10076
Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries p 101 N94-10077
Stability of liquid bridges between parallel plates p 101 N94-10078
Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083
Liquid bridges and floating zones p 102 N94-10085
The effect of gravity modulation on thermosolutal convection p 105 N94-10103
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2 [ESA-SP-333-VOL-2] p 112 N94-10171
Thermocapillary convection instability in microgravity crystal growth p 112 N94-10172
Pulsatile instability in rapid directional solidification: Strongly-nonlinear analysis p 115 N94-10188
Ground results of the Mephisto program: Benefits and space experiments orientation p 86 N94-10197
Transient effects in the Benard instabilities: Coupling between capillary and gravity effects p 119 N94-10216
Numerical investigations on Marangoni-Benard instability in multi layer systems p 120 N94-10217
Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218
Vibrational-thermocapillary parallel flows and stability p 120 N94-10220
Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221
The combined influence of anticonvective and thermocapillary mechanisms on the stability of systems with interface p 121 N94-10223
Large time-step stability of explicit one-dimensional advection schemes [NASA-TM-106203] p 342 N94-10362
Stability of hypersonic flow over a blunt body p 7 N94-10450
Stability of hypersonic boundary-layer flows with chemistry p 7 N94-10451
On the instability of hypersonic flow past a pointed cone: Comparison of theoretical and experimental results at Mach 8 p 8 N94-10453
Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow [DE93-011590] p 14 N94-11111
Stability in Aerospace Systems [AGARD-R-789] p 31 N94-11489
Stability of viscoelastic flow: Physical and numerical considerations p 31 N94-11493
Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498
Stability model of the atmosphere p 32 N94-11500
The role of plasma rotation on MHD instabilities in tokamaks [DE93-013486] p 393 N94-11512
A simple model of melt fracture [AD-A265311] p 92 N94-11862
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292
Direct numerical simulation of hot jets p 156 N94-12295
Receptivity in parallel flows: An adjoint approach p 157 N94-12301
Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314
The Third Workshop on Two Phase Fluid Experiment in the Space Environment [NASDA-CON-930002] p 161 N94-12547
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Research on two phase flow in microgravity p 162 N94-12554
Nonlinear stability calculations of pipe flow p 163 N94-12612
Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow p 164 N94-12622
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724

FLOW VELOCITY
Comparison of hydrodynamic and semi-kinetic treatments for plasma flow along closed field lines [NASA-CR-193589] p 387 N94-10641
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes [NASA-TP-3383] p 15 N94-11133
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions [NASA-CR-193339] p 152 N94-11526
Kuroshio observations by the HF ocean radar p 192 N94-11904
Groundwave HF ocean surface radar p 139 N94-11906
Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911
One-year mooring of an ADCP in the central region of the Kuroshio west of Okinawa p 194 N94-11913
Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914
Measurement of the surface layer current averaged vertically using Multipaths Inverted Echosounder p 194 N94-11915
Suppression of the near wall burst process of a fully developed turbulent pipe flow [AD-A265995] p 161 N94-12352
Rainfall-runoff estimation using digital radar [AD-A265390] p 286 N94-12408
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673
The circulation near Luzon p 219 N94-12707
Current variability on the shelf break northeast of Taiwan p 219 N94-12708
Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721
The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752
Mixing of drifter ensemble by mesoscale currents p 228 N94-12760

FLOW VISUALIZATION
Experimental study of axisymmetric thermocapillary flows p 100 N94-10072
Experimental analysis of Benard-convection by the combined application of liquid crystals and PIV p 106 N94-10109
Flow visualization of shock propagation in baffle systems [DE93-013312] p 147 N94-10307
Control effectiveness at hypersonic speeds p 3 N94-10426
Flow visualization and spectroscopy in hypersonic flows: New trends p 5 N94-10437
Joint computational and experimental aerodynamic research on a hypersonic vehicle p 6 N94-10445
Schlieren photographs and internal pressure distributions for three-dimensional sidewall-compression scramjet inlets at a Mach number of 6 in CF4 [NASA-TM-4479] p 148 N94-10644
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912
SAUNA: A system for grid generation and flow simulation using hybrid structured/unstructured grids [ARA-MEMO-370] p 154 N94-11859
The evolution of whole field optical diagnostics for external transonic testing [ARA-MEMO-379] p 383 N94-11887

Experiments on near-wall structure of three-dimensional boundary layers p 159 N94-12309
Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition [NAL-SP-18] p 163 N94-12611
Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder p 17 N94-12633

FLUE GASES
High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment [DE93-012430] p 72 N94-11368

FLUENCE
Proton transport methods for satellite shield modeling [DE93-013602] p 42 N94-10520
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation [DE93-617201] p 397 N94-10843
Momentum induced by laser-tissue interaction [DE93-010737] p 301 N94-11667

FLUID BOUNDARIES
The combined influence of anticonvective and thermocapillary mechanisms on the stability of systems with interface p 121 N94-10223

FLUID DYNAMICS
Non-linear liquid bridge dynamics p 100 N94-10074
Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity p 101 N94-10079
Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087
Protein, glass, aerosol research, containerless processing and diagnostics technology for microgravity application p 106 N94-10112
Description of the liquid structure facility architecture and experimental demonstration of the diagnostic capabilities p 39 N94-10118
The advanced fluid physics module: How to achieve scientific goals for Spacelab D2 p 39 N94-10136
The kinematics of buoyancy induced mixing p 123 N94-10239
Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494
Stability model of the atmosphere p 32 N94-11500
Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows p 281 N94-12041

FLUID FILMS
Fluid-fluid interfacial instabilities induced by gravity p 121 N94-10229
Hygroscopic absorption to falling films: The effects of the concentration level [ITN-93-85198] p 148 N94-10391
Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends [DE93-013140] p 89 N94-11007

FLUID FLOW
Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080
Thermocapillary slug flow in a capillary tube p 105 N94-10104
Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107
Vibrational-thermocapillary parallel flows and stability p 120 N94-10220
Grid optimization and multigrid techniques for fluid flow and transport problems p 154 N94-11824
A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983
Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows p 281 N94-12041
Quantifying the effect of rheology on plan-view shapes of lava flows p 282 N94-12116
Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes p 467 N94-12195

FLUID MANAGEMENT
SWIRL as a means of liquid management in low gravity [NASA-CR-4545] p 412 N94-11523

FLUID MECHANICS
The International Microgravity Laboratory, a Spacelab for materials and life sciences p 125 N94-10249
On the Sobolev systems with ellipsoid cavities [DE92-641290] p 148 N94-10530
Summary of research in progress at ICASE [NASA-CR-191481] p 318 N94-11198
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces [DE93-012767] p 77 N94-11370
Research in computing and applied mathematics [AD-A266137] p 331 N94-11657

FLUIDIZED BED PROCESSORS
Granular instability in fluidized beds: A small-over-large instability p 122 N94-10235

FLUORESCENCE
Dynamics of charge-transfer excited states relevant to photochemical energy conversion [DE93-013981] p 263 N94-11116
The development of phytoplankton sensing system with optical fiber p 203 N94-11967
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

FLUORINE
An experimental program for collective acceleration of ions using intense relativistic electron beams [DE93-612205] p 371 N94-10316
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094

FLUOROSILICATES
Production of electronic grade lunar silicon by disproportionation of silicon difluoride p 435 N94-12017

FLUTTER
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233

FLUTTER ANALYSIS
Nonlinear aspects of transonic aeroelasticity p 2 N94-10357
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363
Laser velocimeter measurements of the flow field generated by a forward-swept propfan during flutter [NASA-TM-106195] p 14 N94-10892
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233
Nonlinear aspects of transonic aeroelasticity [UTIAS-RN-345] p 15 N94-11857
Improvement of method for experimental determination of flutter speed by parameter identification [NASA-CR-193555] p 33 N94-12769
VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

FLUX (RATE)
Dynamics of ion acceleration in electron flux by a virtual cathode potential [DE93-620978] p 371 N94-10542
Photochemical modelling of Venus clouds using Pioneer Venus data [NASA-CR-194108] p 434 N94-10823
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation [DE93-617173] p 397 N94-10830
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves p 195 N94-11922
Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643

FLUX DENSITY
Dynamics of ion acceleration in electron flux by a virtual cathode potential [DE93-620978] p 371 N94-10542
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles [DE93-620980] p 362 N94-10649
Intraday variability and the compactness of extragalactic radio sources p 135 N94-11064
Short pulse lasers for generation of fields exceeding 100 MG [DE93-013346] p 369 N94-11815
Probability density distribution of velocity differences at high Reynolds numbers p 158 N94-12304
The ideal Kolmogorov inertial range and constant p 158 N94-12305

FLUX VECTOR SPLITTING
On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462

FLUXES
Advanced soldering processes [DE93-009856] p 129 N94-11606

FLY BY WIRE CONTROL
Specification and testing for power by wire aircraft [NASA-TM-106232] p 46 N94-10765

FOAMS
A new low smoke, low heat release structural foam p 17 N94-10768
Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769
A polyimide foam for advanced fire resistant aircraft applications p 17 N94-10770

FOCAL PLANE DEVICES
Superconducting SQUID amplifiers for IR detectors and other applications, phase 2 [AD-A265447] p 145 N94-12333
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems [AD-A265599] p 404 N94-12375

FOG
Statistical study on the regional and seasonal distribution of fog in the far east region by using GMS imagery p 190 N94-11082
An examination of the evolution of radiation and advection fogs [AD-A266127] p 286 N94-12539

FOKKER-PLANCK EQUATION
Momentum and heat frictions between fast ions and thermal plasma species [DE93-771240] p 390 N94-11149

FOLDS (GEOLOGY)
Global organization of tectonic deformation on Venus p 444 N94-12066

FORBIDDEN BANDS
Surface-enhanced raman spectroscopy of electroactive films of C60 and an Ir-C60 complex on gold: Symmetry lowering, electron localization, and counteraction effects [AD-A265934] p 396 N94-10705

FORCED VIBRATION
Vortex-induced forces on oscillating bluff cylinders [AD-A265056] p 154 N94-11865

FOREBODIES
Physics of forebody flow control [NASA-CR-193626] p 15 N94-11195

FORECASTING
Forecasting the impact of virtual environment technology on maintenance training p 314 N94-11570
HF-OTH radar performance results [AD-A266106] p 138 N94-11655
Disturbance Impact Assessment System (DIAS), version 2.0. System design document [AD-A265251] p 138 N94-11883
Impact of ERS-1 wind/wave/ice data on operational ocean forecasting p 250 N94-12500
Federal Aviation Administration aviation forecasts [AD-A265611] p 2 N94-12578

FOREST FIRE DETECTION
A method to minimize reference data in classifying satellite remote sensing data into land cover classes p 219 N94-12705

FOREST MANAGEMENT
International Space Year in China p 36 N94-10680
Satellite inventory of Minnesota forest resources [NASA-CR-193565] p 231 N94-11521
The use of remote sensing data for coastal zone management and environment in Indonesia p 196 N94-11927
Preliminary ERS-1 assessment for Canadian agriculture and forestry applications p 248 N94-12486

FORESTS
Effect of species structure and dielectric constant on C-band forest backscatter [NASA-TM-109219] p 245 N94-11885
Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484
Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests p 249 N94-12494
Seeing the Black Forest by ERS-1 and AIRSAR: A comparison p 249 N94-12495
Properties of spectral reflectance of crown and crown structure of mangrove species in Okinawa p 218 N94-12700

FORM FACTORS
Optimal hemicube sampling [DE93-010499] p 334 N94-12591

FORMALISM
An algebraic approach to incomparable families of formal languages [MEMO-INF-92-82] p 342 N94-10279
On a Lagrange-Hamilton formalism describing position and momentum uncertainties p 349 N94-10583
Observables, measurements and phase operators from a Bohmian perspective p 378 N94-10589
Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088

FORMAT
Correspondence standards [NHB-1450.10B] p 420 N94-11589

FORMING TECHNIQUES
SPF/DB: A manufacturing technique for lightweight structures p 59 N94-10026
Application of advanced thermoplastics p 60 N94-10033

FORTRAN
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels [DE93-012835] p 152 N94-11371
Avoidance and suppression of compensation code in a trace scheduling compiler [AD-A265612] p 333 N94-12439

FORWARD SCATTERING
Indication on the existence of the bound state in the p anti p-system [DE92-641575] p 361 N94-10532
Fermion-boson scattering in ladder approximation [DE93-613111] p 368 N94-11581
Light scattering from a spherical particle on a conducting plane. Part 1: Normal incidence [AD-A265920] p 383 N94-12341

FOSSIL FUELS
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector [PB93-194165] p 267 N94-11845

FOUR-WAVE MIXING
Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567
Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576

FOURIER ANALYSIS
Finite difference schemes for long-time integration [NASA-CR-191471] p 343 N94-10642
The role of plasma rotation on MHD instabilities in tokamaks [DE93-013486] p 393 N94-11512
Spectrum analysis in beam diagnostics [DE93-013401] p 373 N94-12601

FOURIER TRANSFORMATION
Ionization potentials of small carbon clusters [AD-A264379] p 67 N94-11260
Presort processor — optical filtering [AD-A263872] p 382 N94-11300
FFTSCAN: A program for spectral smoothing using Fourier transforms [AD-A264921] p 278 N94-11852
Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030
A novel test method for fuel thermal stability [AD-A265853] p 99 N94-12275

FOURIER-BESSEL TRANSFORMATIONS
The searchlight problem for neutrons in a semi-infinite medium [DE93-010796] p 365 N94-10952

FRACTALS
Singularity spectrum of self-organized criticality [DE93-613820] p 348 N94-10404
To the complexity of dynamic system problem [DE93-621355] p 134 N94-11037
On a p-adic metrical dimension of space [DE93-621374] p 345 N94-11077
Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984
Fractal dimensions of rampart impact craters on Mars p 460 N94-12154
Generalized Mandelbrot rule for fractal sections [AD-A266010] p 347 N94-12390

FRACTIONATION
LEW88516 and SNC meteorites p 430 N94-12150
Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199
The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208
Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

FRACTOGRAPHY
Fractography handbook of spaceflight metals [NASA-RP-1291] p 81 N94-10504

FRACTURE MECHANICS
Design with high strength steel: A case of failure and its implications p 58 N94-10017
Heavy-section steel technology program [DE93-009222] p 184 N94-10155
Potential change in flaw geometry during pressurized-thermal-shock transients [DE93-009709] p 184 N94-10288
Fracture behavior of surface-modified ceramics [DE93-013707] p 88 N94-10710
Elastic plastic fracture mechanics methodology for surface cracks [NASA-CR-194129] p 185 N94-10712
Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites [AD-A265153] p 187 N94-11096
DBTT measurement by use of Small Punch (SP) test [DE93-753188] p 183 N94-11168
Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor [DE93-005428] p 187 N94-11169
Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218
Integral equation methods for mixed boundary problem of fracture mechanics p 188 N94-11617
Explicit 3D continuum fracture modeling with smooth particle hydrodynamics p 429 N94-12062
Fracture behavior of ionomers and ionomeric blends [AD-A265379] p 94 N94-12407
Fatigue in single crystal nickel superalloys [AD-A266116] p 85 N94-12418

FRACTURE STRENGTH
Extensions of some guidelines for the mechanical design of coaxial compression pin seals [DE93-012385] p 177 N94-10348
Elastic plastic fracture mechanics methodology for surface cracks [NASA-CR-194129] p 185 N94-10712
Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites [AD-A265153] p 187 N94-11096
Interface considerations in Al2O3/NiAl composite [NASA-CR-191167] p 66 N94-11202
NiAl alloys for structural uses [NASA-CR-194113] p 85 N94-12447

FRACTURES (MATERIALS)
Damage thresholds of fluoride multilayers at 355 nm [DE93-009523] p 90 N94-11230
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields [AD-A264251] p 311 N94-12364

FRACTURING
Fracture behavior of surface-modified ceramics [DE93-013707] p 88 N94-10710
Test specifications, specimen design and instrumentation test data interpretation [DE93-012338] p 188 N94-11367
The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy [DE93-013221] p 84 N94-11488
Ceramic technology project database [DE93-012432] p 91 N94-11673
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields [AD-A264251] p 311 N94-12364
Fracture behavior of ionomers and ionomeric blends [AD-A265379] p 94 N94-12407

FRAGMENTATION
Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036
Analysis of interstellar fragmentation structure based on IRAS images [NASA-CR-193518] p 428 N94-12767

FRAGMENTS
Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

FRAMES (DATA PROCESSING)
Formal specification of the plain UCN layer in LOTOS [MEMO-INF-92-83] p 131 N94-10280

FREE ATMOSPHERE
Free-air and Bouguer gravity anomalies and the Martian crustal dichotomy p 481 N94-12267
New Mars free-air and Bouguer gravity: Correlation with topography, geology and large impact basins p 481 N94-12268

FREE BOUNDARIES
Marangoni flows in open cavities with differentially heated end walls p 104 N94-10097
Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108
Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179
Convective motion in a multi-layered system with a free surface p 120 N94-10219

FREE CONVECTION
Solidification from supercooled melt under microgravity p 113 N94-10176
The effect of gravitational modulation on convection in vertical Bridgman growth p 113 N94-10178
Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185
Effect of gravity on the dissolution and liquid phase epitaxial growth processes in a horizontal sandwich system p 118 N94-10208
Marangoni instability in a liquid layer with two free surfaces [NASA-TM-106166] p 152 N94-11376
Numerical simulations of thermal convection in rapidly rotating spherical fluid shells p 153 N94-11635

FREE ELECTRON LASERS
Numerical simulation of sidebands in free electron laser oscillators [DE93-612675] p 173 N94-10483
The efficiency of photovoltaic cells exposed to pulsed laser light p 50 N94-11395
LCLS optics: Selected technological issues and scientific opportunities [DE93-010953] p 175 N94-11468

FREE ENERGY
Atomic structures and compositions of internal interfaces [DE93-014840] p 363 N94-10750

FREE FLIGHT
Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498

FREE FLOW
Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616

FRENKEL DEFECTS
Grain boundaries in complex oxides [DE93-013986] p 398 N94-11012

FREQUENCIES
Coherent states and uncertainty relations for the damped harmonic oscillator with time-dependent frequency p 380 N94-10611
The 2nd Annual Meeting of the Society for Research on Biological Rhythms [AD-A264869] p 303 N94-10872

FREQUENCY CONVERTERS
A study of DC-DC converters with MCTs for arcjet power supplies [NASA-CR-193457] p 142 N94-10931

FREQUENCY DISCRIMINATORS
Status of local oscillators for operating ultra-high resolution frequency discriminators as frequency standards p 353 N94-10981

FREQUENCY DISTRIBUTION
Performance of low-cost commercial fiber-optic transceivers for reference frequency distribution p 355 N94-10993
Ultrastable reference frequency distribution utilizing a fiber optic link p 355 N94-10994
A wide-band fiber optic frequency distribution system employing thermally controlled phase compensation p 355 N94-10995
Venus small volcano classification and description p 438 N94-12037

FREQUENCY MEASUREMENT
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993 [PB93-196228] p 485 N94-10850
A laser-cooled cesium fountain frequency standard and a measurement of the frequency shift due to ultra-cold collisions p 352 N94-10976
Measurement methods and algorithms for comparison of local and remote clocks p 354 N94-10987
Spacecraft signal sources portable test system p 139 N94-11000
The limit of frequency estimation p 356 N94-11001
A new method of time difference measurement: The time difference method by dual phase coincidence points detection p 357 N94-11002

FREQUENCY MODULATION
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh) [DE93-621658] p 392 N94-11213

FREQUENCY RANGES
Design of a matching network for dipole antennas [AD-A265115] p 136 N94-11158
Improvement of method for experimental determination of flutter speed by parameter identification [NASA-CR-193555] p 33 N94-12769

FREQUENCY RESPONSE
AD100/ADSIM, ACSL, and MATLAB output comparisons using frequency-response analysis [DE93-009640] p 47 N94-11122

FREQUENCY SHIFT
A laser-cooled cesium fountain frequency standard and a measurement of the frequency shift due to ultra-cold collisions p 352 N94-10976
Confidence of the three-point estimator of frequency drift p 357 N94-11003

FREQUENCY STABILITY
Possible applications of atomic frequency standards with an internal high resolution digital synthesizer p 353 N94-10979
Status of local oscillators for operating ultra-high resolution frequency discriminators as frequency standards p 353 N94-10981
Estimating the instabilities of N clocks by means of comparison measurements p 356 N94-10997

A multi-variance analysis in the time domain
p 146 N94-10999
Spacecraft signal sources portable test system
p 139 N94-11000
The limit of frequency estimation p 356 N94-11001

FREQUENCY STANDARDS
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3218] p 350 N94-10963
A laser-cooled cesium fountain frequency standard and a measurement of the frequency shift due to ultra-cold collisions p 352 N94-10976
A precise GPS-based time and frequency system
p 353 N94-10978
Possible applications of atomic frequency standards with an internal high resolution digital synthesizer
p 353 N94-10979
CAFS: A Cesium Atomic Frequency Standard for GPS block IIR p 353 N94-10980
Status of local oscillators for operating ultra-high resolution frequency discriminators as frequency standards p 353 N94-10981
Development of a cryogenic hydrogen maser at the NPL p 176 N94-10982
Performance of low-cost commercial fiber-optic transceivers for reference frequency distribution
p 355 N94-10993
Ultrastable reference frequency distribution utilizing a fiber optic link p 355 N94-10994
Estimating the instabilities of N clocks by means of comparison measurements p 356 N94-10997
Time scale algorithms for an inhomogeneous group of atomic clocks p 356 N94-10998
Spacecraft signal sources portable test system
p 139 N94-11000

FREQUENCY SYNTHESIZERS
Possible applications of atomic frequency standards with an internal high resolution digital synthesizer
p 353 N94-10979

FRESNEL LENSES
Recent developments in refractive concentrators for space photovoltaic power systems p 52 N94-11402

FRICTION
Titanium alloys milling assistance by high pressure lubricoolant jet
[DE93-013302] p 82 N94-11008
Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010
Momentum and heat frictions between fast ions and thermal plasma species
[DE93-771240] p 390 N94-11149
Instantaneous engine frictional torque: Its components and piston assembly friction
[DE93-011639] p 182 N94-11625
Ceramics technology project database
[DE93-012431] p 91 N94-11672
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300
Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374

FRICTION FACTOR
Instantaneous engine frictional torque: Its components and piston assembly friction
[DE93-011639] p 182 N94-11625

FRICTION MEASUREMENT
Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump
[NAL-TR-1155] p 178 N94-10369
Tribological characteristics of hot-pressed self-lubricating composites
[NAL-TR-1160] p 66 N94-10858

FRONTAL WAVES
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720

FROST
Spatial variation in the seasonal south polar cap of Mars as observed by Mariner 7 p 456 N94-12134

FROUDE NUMBER
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number
p 156 N94-12292

FUEL CELL POWER PLANTS
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666

FUEL CELLS
Thin film preparation and interfacial reaction study of solid oxide fuel cell materials p 263 N94-11313
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles
[DE93-010770] p 182 N94-11438
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666
Research development and demonstration of a fuel cell/battery powered bus system
[DE93-013778] p 182 N94-12605

FUEL COMBUSTION
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
On the combustion of a laminar spray
[NASA-TM-106210] p 28 N94-11238
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles
[DE93-010770] p 182 N94-11438

FUEL INJECTION
Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252
Shear flow control of gas jets in liquids
[AD-A264673] p 152 N94-11448

FUEL PRODUCTION
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028

FUEL SPRAYS
Atomization characteristics of a prefilming airblast atomizer
[NAL-TM-644] p 148 N94-10727
On the combustion of a laminar spray
[NASA-TM-106210] p 28 N94-11238

FUEL TANKS
Propellant management in surface tension tanks
p 106 N94-10110

FUEL TESTS
A novel test method for fuel thermal stability
[AD-A265853] p 99 N94-12275

FULL SCALE TESTS
An experimental investigation of high-speed water-entry for full-size and scale-model pointed nose vehicles
[DE93-008491] p 147 N94-10252

FULLERENES
Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637
Surface-enhanced raman spectroscopy of electroactive films of C60 and an Ir-C60 complex on gold: Symmetry lowering, electron localization, and counteraction effects
[AD-A265934] p 396 N94-10705
Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds
[DE93-010687] p 400 N94-11457

FUNCTION SPACE
One-loop quantum gravity on de Sitter space
[DE92-641349] p 425 N94-11152
Divergences in the moduli space integral and accumulating handles in the infinite-genus limit
[DE93-619722] p 346 N94-11693

FUNCTIONAL ANALYSIS
Functional reasoning, explanation, and analysis
[DE92-526832] p 313 N94-10251
Applications of cut polyhedra
[CWI-BS-R9221] p 347 N94-10354
Functional approximation using artificial neural networks in structural mechanics
[NASA-TM-105820] p 188 N94-11254
Comparison of multiresolution techniques for digital signal processing
[AD-A265364] p 138 N94-12406

FUNCTIONALS
The modular group and super-KMS functionals
[DE93-613029] p 349 N94-10632

FUNCTIONS (MATHEMATICS)
Complex functions in queueing theory
[CWI-BS-R9219] p 342 N94-10352

FURNACES
The electron beam furnace: A new facility for materials science research p 109 N94-10126
Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128
MUZO: The programmable multi zone furnace for gas payloads and sounding rockets p 110 N94-10132
AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141
Variations of the temperature profile in the gradient furnace GFQ within a cylindrical sample used for directional solidification p 114 N94-10181
Design of CCD camera system for use inside electron beam furnace
[DE93-009525] p 170 N94-11267

FUSELAGES
An investigation into aircraft fuselage fire hardening
p 19 N94-10782

FUSION REACTORS
Looking beyond ITER: Toroidal concept improvement
[DE93-012762] p 388 N94-10744
Applying design principles to fusion reactor configurations for propulsion in space
[NASA-TM-106247] p 47 N94-11053
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices
[DE93-621609] p 66 N94-11143
Experimental approach to the physics of the high density divertor
[DE93-009149] p 391 N94-11170
Intense neutron sources for fusion materials studies
[DE93-009782] p 391 N94-11171
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230

FUZZY SYSTEMS
Telerobotic control of a mobile coordinated robotic server
[NASA-CR-193465] p 338 N94-10345
Task planning with uncertainty for robotic systems
[NASA-CR-193253] p 338 N94-10638
Fuzzification of ASAT's rule based aimpoint selection
[AD-A266068] p 43 N94-11223

G

GALACTIC CLUSTERS
The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153

GALACTIC COSMIC RAYS
Acceleration of positrons in supernova shocks
[NASA-CR-193713] p 425 N94-10511
Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199
A proposed performance index for galactic cosmic ray shielding materials
[NASA-TM-4444] p 484 N94-11278
Potential health effects of space radiation
p 312 N94-11558
Radiation considerations for interplanetary missions
p 45 N94-11559
Final state interactions and inclusive nuclear collisions
[NASA-TP-3353] p 373 N94-12435

GALACTIC EVOLUTION
Nuclear astrophysics
[DE93-010569] p 425 N94-10292
The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153

GALACTIC HALOS
ADP study of the structure of the IUE halo
[NASA-CR-194374] p 428 N94-12595

GALACTIC ROTATION
ADP study of the structure of the IUE halo
[NASA-CR-194374] p 428 N94-12595

GALACTIC STRUCTURE
The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153
The morphologies of distant radio galaxies
p 426 N94-11597

GALAXIES
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507

GALERKIN METHOD
On cell entropy inequality for discontinuous Galerkin methods
[NASA-CR-191493] p 345 N94-11280
Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494

GALILEO PROJECT
Galileo EM-2 contributions to the lunar control network p 468 N94-12198

GALLIUM ANTIMONIDES
Crack suppression in GaInSb buffer layers initially under tensile stress
[DE93-012839] p 396 N94-10745

GALLIUM ARSENIDES
The use of magnetic fields for damping unsteady Marangoni convection in GaAs floating zones under microgravity p 100 N94-10073
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
Concept and design of ampoule for melt growth of gallium arsenide in first mission of space flyer unit
p 107 N94-10115
Method for producing a hybridization of detector array and integrated circuit for readout
[NASA-CASE-NPO-18062-1-CU] p 141 N94-10656

Investigation of ZnSe-coated silicon substrates for GaAs solar cells p 52 N94-11405

GaAs sigma-delta modulator modeling for Analog to Digital Converters (ADC's) [AD-A263419] p 144 N94-11516

GaAs PCSS: High gain switching and device reliability [DE93-009851] p 401 N94-11605

A thermal ionization model for the sustaining phase of lock-on in GaAs [DE93-011558] p 144 N94-11624

Gallium arsenide dynamic random access memory support circuitry [AD-A265176] p 320 N94-11875

Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons [NASA-CR-194235] p 146 N94-12773

GALLIUM PHOSPHIDES

Remote plasma enhanced chemical vapor deposition of GaP with in situ generation of phosphine precursors p 399 N94-11440

GALVANOMAGNETIC EFFECTS

The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation [DE93-617201] p 397 N94-10843

GAME THEORY

Marginal allocations in the core of minimal chain-games [MEMO-1103] p 348 N94-10162

GAMMA RAY ASTRONOMY

Data analysis tasks: BATSE [NASA-CR-192598] p 483 N94-12427

Observations of optical counterparts of Gamma-Ray bursts [NASA-CR-193573] p 485 N94-12589

GAMMA RAY BURSTS

Cosmological gamma-ray burst model [NASA-CR-193368] p 484 N94-10507

Data analysis tasks: BATSE [NASA-CR-192598] p 483 N94-12427

Observations of optical counterparts of Gamma-Ray bursts [NASA-CR-193573] p 485 N94-12589

GAMMA RAY OBSERVATORY

Data analysis tasks: BATSE [NASA-CR-192598] p 483 N94-12427

GAMMA RAY SPECTRA

Cosmological gamma-ray burst model [NASA-CR-193368] p 484 N94-10507

The multiplicity spectra of the (169)Tm(n, gamma) reaction [DE93-617733] p 364 N94-10835

GAMMA RAY TELESCOPES

Observations of optical counterparts of Gamma-Ray bursts [NASA-CR-193573] p 485 N94-12589

GAMMA RAYS

Demonstration prototype gamma-ray hodoscope alternative to CARGOSCAN for rocket stage monitoring [DE93-006908] p 169 N94-10326

A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source [DE93-009795] p 75 N94-10338

On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys [DE93-617200] p 82 N94-10842

Development of microstrip gas chamber and application to imaging gamma-ray detector [DE93-754294] p 34 N94-11041

GANYMEDE

Theoretical studies of the radar properties of the icy Galilean moons of Jupiter [NASA-CR-193407] p 434 N94-11361

GAPS

Boundary integral solution to the electromagnetic scattering from coated surfaces containing edges, gaps, and periodic gratings p 137 N94-11639

GAS ANALYSIS

Separation of spallation and terrestrial C-14 in chondrites p 431 N94-12183

Geomorphology of Triton's polar materials p 466 N94-12185

The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256

A preliminary study of the variability and magnitude of the flux of biogenic sulfur gases from a New Hampshire salt marsh p 267 N94-12452

Analytical method for water vapor collection and analysis in aircraft cabin fires [DOT/FAA/CT-TN93/33] p 22 N94-12575

The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774

GAS ATOMIZATION

Comparison of Al-Fe alloys produced by PFC and USGA techniques p 58 N94-10019

GAS COMPOSITION

A combustion products analyzer for contingency use during thermodegradation events on spacecraft p 318 N94-11555

GAS DETECTORS

Development of microstrip gas chambers with multi-chip technology [DE93-753169] p 367 N94-11509

GAS DISSOCIATION

Dynamics of dissociation versus ionization in strong laser fields [DE93-009261] p 173 N94-10287

The high enthalpy facilities HEG and TH 2 in Germany p 4 N94-10430

Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment p 7 N94-10447

Electronic excitation of ground state atoms by collision with heavy gas particles [NASA-CR-193364] p 366 N94-11360

GAS DYNAMICS

Lattice gas hydrodynamics: Theory and simulations [DE93-013297] p 147 N94-10320

Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446

GAS EXCHANGE

Emissions of biogenic sulfur gases from northern bogs and fens p 271 N94-12467

Factors controlling sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12469

Sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12470

GAS FLOW

The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774

GAS HEATING

Pulsed plasma processing for control of diesel engine emissions [DE93-011884] p 181 N94-11247

GAS IONIZATION

Detection of accreting circumstellar gas around weak emission-line Herbig Ae/Be stars [NASA-TM-108256] p 424 N94-11306

Are cosmic rays effective for ionization of the solar nebula? p 472 N94-12220

GAS JETS

Gas-liquid jets under reduced gravity conditions p 103 N94-10091

Preprints of the 13th Hydrogen Energy System Symposium [DE93-781115] p 99 N94-11444

Shear flow control of gas jets in liquids [AD-A264673] p 152 N94-11448

GAS MIXTURES

Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224

Thermodynamic model of air in chemical equilibrium p 7 N94-10448

Gas-Grain Simulation Facility (GGSF). Volume 2: Conceptual design definition [NASA-CR-177613] p 423 N94-11229

GAS PRESSURE

Effect of powder processing on slip casting parameters and sintering of Si3N4-Y2O3-SiO2 [AD-A264474] p 83 N94-11445

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

Instantaneous engine frictional torque: Its components and piston assembly friction [DE93-011639] p 182 N94-11625

Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243

GAS STREAMS

Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912

GAS TUNGSTEN ARC WELDING

Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it p 61 N94-10037

GAS TURBINE ENGINES

Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106

Icing of turbine intake louvers [AD-A265714] p 29 N94-12274

GAS TURBINES

Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors [DE93-754285] p 371 N94-10719

Preprints of the 13th Hydrogen Energy System Symposium [DE93-781115] p 99 N94-11444

Advanced controls for airbreathing engines, volume 3: Allison gas turbine [NASA-CR-189205] p 29 N94-12272

GAS VISCOSITY

Gluon gas viscosity in nonperturbative region [DE93-617680] p 397 N94-10883

GAS-LIQUID INTERACTIONS

Gas-liquid jets under reduced gravity conditions p 103 N94-10091

Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215

Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218

Studies of critical point phenomena of fluids: Bulk fluids, fluids in pores, and at interfaces p 80 N94-10228

Transport of heat and mass in near-critical fluids p 122 N94-10230

Phase separation at gas-liquid critical points p 122 N94-10233

Granular instability in fluidized beds: A small-over-large instability p 122 N94-10235

Hygroscopic absorption to falling films: The effects of the concentration level [ITN-93-85198] p 148 N94-10391

GAS-SOLID INTERACTIONS

The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246

GASEOUS ROCKET PROPELLANTS

Shear coaxial injector atomization phenomena for combusting and non-combusting conditions [NASA-CR-193339] p 152 N94-11526

GAUGE INVARIANCE

Discrete space-time symmetries [DE93-010199] p 341 N94-10259

Effective action in the gauged Nambu-Jona-Lasinio model [DE93-617654] p 409 N94-10405

Standard model status (in search of new physics) [DE93-013288] p 410 N94-10528

From the Weyl theory to a theory of locally anisotropic space-time [DE92-644734] p 410 N94-10535

Non-gauge phase transformations in quantum transition amplitudes p 378 N94-10596

Principles of gauge theory of real hadrons [DE93-613094] p 362 N94-10634

All possible electroweak models from Z orbifold [DE93-617656] p 411 N94-10880

Gauge independence of the A(sub 0)-condensate [DE93-617681] p 397 N94-10884

Cosmological restrictions on conformally-invariant SU(5) GUT models [DE93-619770] p 412 N94-11047

Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088

One-loop quantum gravity on de Sitter space [DE92-641349] p 425 N94-11152

GAUGE THEORY

Principles of gauge theory of real hadrons [DE93-613094] p 362 N94-10634

Gauge independence of the A(sub 0)-condensate [DE93-617681] p 397 N94-10884

GAUSS EQUATION

Optimisation methods for solving separable nonlinear least squares problems [ISVR-TR-219] p 345 N94-11217

GEAR TEETH

Computational gearing mechanics [NASA-CR-193666] p 181 N94-11157

GEARS

AGBT advanced counter-rotating gearbox detailed design report [NASA-CR-180883] p 179 N94-10400

Computational gearing mechanics [NASA-CR-193666] p 181 N94-11157

GELATION

Improving reservoir conformance using gelled polymer systems [DE93-014532] p 88 N94-10749

GELS

Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks [AD-A265528] p 87 N94-10510

Improving reservoir conformance using gelled polymer systems [DE93-014532] p 88 N94-10749

Low temperature synthesis of monolithic transparent Ta2O5 gels from hydrolysis of metal alkoxide [NASA-TM-106246] p 89 N94-11204

Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels [NASA-TM-106259] p 90 N94-11257

Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281
Smart polymeric system for electromechanical transduction p 70 N94-11330
Finite element simulation of the 2D collapse of a polyelectrolyte gel disk
[DE93-010693] p 91 N94-11665

GENE EXPRESSION
Studies in bioorganic chemistry
[AD-A265532] p 55 N94-12011

GENERAL AVIATION AIRCRAFT
General aviation aircraft-normal acceleration data analysis and collection project
[AD-A265055] p 26 N94-11858
Federal Aviation Administration aviation forecasts
[AD-A265611] p 2 N94-12578

GEOCHEMISTRY
Environmental Sciences Division
[DE93-013865] p 264 N94-10650
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091
Mineralogy versus bulk composition of the carbonaceous chondrite clast Kaidun 2 p 429 N94-12101
Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173
Post-impact alteration of the Manson impact structure p 282 N94-12188
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232

GEOCHRONOLOGY
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Age of Popigai impact event using the Ar-40 - Ar-39 method p 282 N94-12093
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094
Modern shelf ice, equatorial Aeolis Quadrangle, Mars p 450 N94-12100
A structural and petrographic investigation of the pretoria saltpan impact structure p 282 N94-12102
Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182
Relation between ages and elevations of Martian channels p 472 N94-12216
Re-Os dating of 3AB iron meteorites p 432 N94-12237

GEODESY
A method for calculating exact geodetic latitude and altitude
[AD-A265783] p 229 N94-10417
Toward 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-193184] p 229 N94-10702
Removal of orbital error and the local geoid effects from ERS-1 altimeter data p 242 N94-11770

GEODETIC ACCURACY
Statistical description of tectonic motions
[NASA-CR-193701] p 275 N94-10950
Removal of orbital error and the local geoid effects from ERS-1 altimeter data p 242 N94-11770

GEODETIC SURVEYS
A method for calculating exact geodetic latitude and altitude
[AD-A265783] p 229 N94-10417

GEODYNAMICS
Toward 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-193184] p 229 N94-10702
Precision GPS ephemerides and baselines
[NASA-CR-194171] p 23 N94-11177
Arctic geodynamics: Continental shelf and deep ocean geophysics. ERS-1 satellite altimetry: A first look p 243 N94-11776

GEOGRAPHIC INFORMATION SYSTEMS
Status of remote sensing and Geographic Information System (GIS) applications in the Environment and Natural Resources (ENR) sector p 36 N94-10687

GEOIDS
First results for the simultaneous estimation of the geoid and the sea surface topography by ERS-1 altimeter data p 241 N94-11765
Separation of geoid and sea surface topography in shallow water regions: A first ERS-1 radar altimeter data evaluation p 242 N94-11766
Removal of orbital error and the local geoid effects from ERS-1 altimeter data p 242 N94-11770
Preliminary geophysical investigation with ERS-1 35-day altimeter data p 243 N94-11775
Can weak crust explain the correlation of geoid and topography on Venus? p 453 N94-12118

GEOLOGICAL FAULTS
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Global organization of tectonic deformation on Venus p 444 N94-12066
Fault geometries and extension in the Valles Marineris, Mars p 458 N94-12144
Tectonics on Triton p 466 N94-12187
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

GEOLOGICAL SURVEYS
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407
Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa) p 281 N94-12032
Russia's contribution to regional geologic mapping of Venus p 454 N94-12122
Landscape and geomorphic survey of Zhamanshin area, Northern Kazakhstan: Preliminary report on 1992 field trip data p 282 N94-12123
An ancient inner lake in Maadim Vallis p 456 N94-12133
Geologic history of central Chryse Planitia and the Viking 1 landing site, Mars p 465 N94-12180
Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes p 467 N94-12195

GEOLOGY
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
Tectonics on Triton p 466 N94-12187
Synthesis of global thematic mapping, Venus: Geologic correlations/questions for the Magellan gravity mission p 467 N94-12194
Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis p 254 N94-12523
SAR imaging of geology and bathymetry: Kent coastal area - southern North Sea p 254 N94-12527

GEOMAGNETISM
Analysis of geophysical measurements and spacecraft interactions
[AD-A266064] p 43 N94-10944
A study on the magnetospheric activity using the AE, ap, and Dst geomagnetic indices
[INPE-5470-TDI/501] p 276 N94-11165
Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221

GEOMETRICAL THEORY OF DIFFRACTION
PO/PTD diffraction synthesis of array-fed reflector antennas for satellite and radar applications p 137 N94-11636

GEOMETRY
Geometric aspects of uncertainty and correlation p 349 N94-10588
On a p-adic metrical dimension of space
[DE93-621374] p 345 N94-11077
The completion homomorphism in equivariant elliptic cohomology
[DE93-619672] p 346 N94-11631

GEOMORPHOLOGY
Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023
Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust p 462 N94-12168
Geomorphology of Triton's polar materials p 466 N94-12185
Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190
Classification of Martian deltas p 470 N94-12207
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Relation between ages and elevations of Martian channels p 472 N94-12216
Morphotectonics of Venus p 478 N94-12248
Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis p 254 N94-12523
Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology p 254 N94-12528

GEOPHYSICS
Sandia ocean modeling system programmer's guide and user's manual
[DE93-007427] p 287 N94-10153
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407
Analysis of geophysical measurements and spacecraft interactions
[AD-A266064] p 43 N94-10944
The Air Force Interactive Meteorological System: A research tool for satellite meteorology
[AD-A265957] p 284 N94-11113
Theoretical studies of the radar properties of the icy Galilean moons of Jupiter
[NASA-CR-193407] p 434 N94-11361
Finnish ERS-1 Baltic Sea ice experiment in Winter 1992 p 239 N94-11750
Arctic sea ice microwave signature and geophysical processes study p 240 N94-11754
Preliminary geophysical investigation with ERS-1 35-day altimeter data p 243 N94-11775
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
Geophysical signature of the Pretoria saltpan impact structure and a possible satellite crater p 282 N94-12103
Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment
[NASA-CR-194030] p 139 N94-12778

GEOSAT SATELLITES
Global wave height climatologies from ERS-1 altimeter data, and comparisons with those from GEOSAT p 244 N94-11781

GERMANY
Radarmap of Germany: First mosaic and classification p 246 N94-12477

GIBBS FREE ENERGY
Monte Carlo simulations of a two-dimensional hard dimer system
[DE93-613535] p 361 N94-10502

GIOTTO MISSION
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

GLACIERS
Investigations of Arctic ice-sheets and glaciers using ERS-1 SAR p 238 N94-11743
Snow and glacier investigations by ERS-1 SAR: First results p 247 N94-12481
Disintegrating ice front of Shirase Glacier, East Antarctica p 210 N94-12654

GLARE
Aircraft windscreens enhance visual search disruption produced by laser glare
[AD-A265167] p 26 N94-11892

GLASS
Gas film levitator for containerless processing of glasses in microgravity conditions: Early concept and technology demonstration p 108 N94-10122
Sensing glass transitions in thin polymer films on acoustic wave microsensors
[DE93-010805] p 87 N94-10295
Extensions of some guidelines for the mechanical design of coaxial compression pin seals
[DE93-012385] p 177 N94-10348
Orbital glass in HTSC
[DE93-613988] p 395 N94-10415
Radiation-induced aperiodicity in irradiated ceramics
[DE93-013335] p 91 N94-11698
Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites
[AD-A265177] p 92 N94-11876
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Shock transformations in quartzite p 97 N94-12040
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars p 281 N94-12055
Strontium and oxygen isotope study of M-1, M-3 and M-4 drill core samples from the Manson impact structure, Iowa: Comparison with Haitian K-T impact glasses p 281 N94-12080
K/T spherules from Haiti and Wyoming: Origin, diagenesis, and similarity to some microtektites p 281 N94-12085
Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles p 429 N94-12098

Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159
Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160
KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161
Anomalous REE patterns in unequilibrated enstatite chondrites: Evidence and implications p 431 N94-12191
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238
In-situ crystallization of silicate glass films deposited on alpha- Al2O3
[DE93-012969] p 95 N94-12596

GLASS FIBER REINFORCED PLASTICS
Vectra insulative support structures within spacecraft p 62 N94-10050
Fibre reinforced structures with glass matrix p 64 N94-10064
Fibre optic strain and temperature measurement in composite materials: A review of the OSTIC programme p 65 N94-10066
Some environmental aspects of the application of fibre reinforced plastics in structures
[LM-998] p 88 N94-10877
Strain concentration assessment of laminates subjected to low velocity impact
[AD-A264497] p 73 N94-11446

GLASS FIBERS
Material advances for lightweight TPS p 62 N94-10049
Technique to prepare high-reflectance optical fiber bragg gratings with single exposure in-line on fiber draw tower
[AD-D015757] p 374 N94-10373

GLASS LASERS
Short pulse lasers for generation of fields exceeding 100 MG
[DE93-013346] p 369 N94-11815

GLASS TRANSITION TEMPERATURE
Sensing glass transitions in thin polymer films on acoustic wave microsensors
[DE93-010805] p 87 N94-10295

GLAUBER THEORY
Information entropy via Glauber's Q-representation p 378 N94-10592

GLIDE PATHS
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492
Helicopter approach capability using the differential Global Positioning System
[NASA-CR-177618] p 24 N94-12355

GLOBAL POSITIONING SYSTEM
Topex orbit determination using GPS tracking system p 38 N94-10359
Toward 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-193184] p 229 N94-10702
Statistical description of tectonic motions
[NASA-CR-193701] p 275 N94-10950
The time keeping system for GPS block IIR p 24 N94-10964
Progress on GPS standardization p 24 N94-10965
US Coast Guard GPS Information Center (GPSIC) and its function within the Civil GPS Service (CGS) p 24 N94-10966
Comparison of GPS and GLONASS common-view time transfers p 24 N94-10967
PTTI-aided ephemeris calculation and rapid data link acquisition for manned space flight p 42 N94-10974
Disciplined rubidium oscillator with GPS selective availability p 353 N94-10977
A precise GPS-based time and frequency system p 353 N94-10978
CAFS: A Cesium Atomic Frequency Standard for GPS block IIR p 353 N94-10980
Precision GPS ephemerides and baselines
[NASA-CR-194171] p 23 N94-11177
Real-time tomography mooring
[AD-A264923] p 289 N94-11854
Helicopter approach capability using the differential Global Positioning System
[NASA-CR-177618] p 24 N94-12355

GLOBAL WARMING
NRL review for 1993
[AD-A265666] p 497 N94-12334
Comments on possible causes of recent global warming
[DE93-010501] p 272 N94-12592

GLOW DISCHARGES
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230

GLUCOSE
Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425

GLUONS
Searches for strangelets and other exotics at the AGS
[DE93-013341] p 359 N94-10308
Squeezed colour states in gluon jet p 379 N94-10599
Filamentation instability of hot quark-gluon plasma with hard jet
[DE93-617679] p 388 N94-10882
Gluon gas viscosity in nonperturbative region
[DE93-617680] p 397 N94-10883
Gauge independence of the A(sub 0)-condensate
[DE93-617681] p 397 N94-10884
Experiments to measure the gluon helicity distribution in protons
[DE93-011756] p 368 N94-11613

GOERTLER INSTABILITY
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620
Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631

GOLD
Surface-enhanced raman spectroscopy of electroactive films of C60 and an Ir-C60 complex on gold: Symmetry lowering, electron localization, and counteraction effects
[AD-A265934] p 396 N94-10705
Real-space formation and dissipation dynamics of hexagonal reconstruction on Au(100) in aqueous media as explored by potentiodynamic scanning tunneling microscopy
[AD-A266138] p 368 N94-11658
The laser ablation of gold films at the electrode surface of a quartz crystal microbalance
[AD-A265535] p 175 N94-12012
The solubility of gold in silicate melts: First results p 87 N94-12086
Electrode potential-induced reconstruction of Au(100): Effect of chemisorption on nanoscale dynamics as probed by the in-situ scanning tunneling microscopy
[AD-A265900] p 404 N94-12388

GOLD ISOTOPES
On the origin of (4)He and (40)Ar in natural gold p 87 N94-12240

GOVERNMENT PROCUREMENT
NASA procurement: Proposed changes to the Jet Propulsion Laboratory contract. Report to Congressional Requesters
[GAO/NSIAD-93-178] p 416 N94-10941
Federal contractors in appalachia
[PB93-188779] p 416 N94-11473
Pattern of federal procurement from minority and women-owned small business
[PB93-189355] p 417 N94-11844
Assessing the adequacy of the industrial base
[AD-A264954] p 417 N94-11856
National SBIR Phase 3 Commercialization Conference
[AD-A266083] p 417 N94-12410

GOVERNMENT/INDUSTRY RELATIONS
Landsat as a commercial enterprise
[INPE-5477-TAE/019] p 232 N94-11524

GOVERNMENTS
National Institute of Health Almanac, 1992
[PB93-183556] p 303 N94-10828
From red tape to results: Creating a government that works better and costs less p 422 N94-11351
From red tape to results: Creating a government that works better and costs less. Executive summary p 422 N94-11353

GRAIN BOUNDARIES
Atomic structures and compositions of internal interfaces
[DE93-014840] p 363 N94-10750
Grain boundaries in complex oxides
[DE93-013986] p 398 N94-11012
Experimental studies of the structure of grain boundaries
[DE93-013979] p 402 N94-11700
Grain boundary creep in copper
[DE93-610974] p 84 N94-12361

GRAIN SIZE
Synthesis and properties of nanophase materials
[DE93-011757] p 397 N94-10962
Processing, properties, and wear resistance of aluminides
[DE93-012186] p 83 N94-11141
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458
Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles p 429 N94-12098
Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159

GRAMMARS
An algebraic approach to incomparable families of formal languages
[MEMO-INF-92-82] p 342 N94-10279
Symbolic dynamics and description of complexity
[DE93-613030] p 418 N94-10485

GRAND UNIFIED THEORY
Supersqueezed states from squeezed states p 378 N94-10591
Cosmological restrictions on conformally-invariant SU(5) GUT models
[DE93-619770] p 412 N94-11047

GRANITE
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214

GRAPH THEORY
Cycles through particular subgraphs of claw-free graphs
[MEMO-1097] p 341 N94-10274
Algorithms for the maximum clique problem
[MEMO-1101] p 322 N94-10419
The d-edge shortest-path problem for a Monge graph
[DE93-009828] p 343 N94-10708
Finding minimum-quotient cuts in planar graphs
[DE93-011675] p 344 N94-10961
An introduction to chordal graphs and clique trees
[DE93-012508] p 332 N94-11695
Finding a covering triangulation whose maximum angle is provably small
[DE93-010691] p 334 N94-12593

GRAPHICAL USER INTERFACE
A tool for generation of expert system shells
[INPE-5493-TDI/510] p 325 N94-11181
GRAFTED (GRAphical Fault Tree EDitor): A fault tree description program for target vulnerability/survivability analysis
[AD-A264078] p 328 N94-11301
A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus p 455 N94-12126

GRAPHITE
Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors
[DE93-754285] p 371 N94-10719
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices
[DE93-621609] p 66 N94-11143
Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029
Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173

GRAPHITE-EPOXY COMPOSITES
Response of composite laminates to dynamic surface loads p 66 N94-10902

GRAPHS (CHARTS)
An introduction to chordal graphs and clique trees
[DE93-012508] p 332 N94-11695

GRATINGS (SPECTRA)
Technique to prepare high-reflectance optical fiber bragg gratings with single exposure in-line on fiber draw tower
[AD-D015757] p 374 N94-10373
Boundary integral solution to the electromagnetic scattering from coated surfaces containing edges, gaps, and periodic gratings p 137 N94-11639
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375

GRAVITATION
Dimensional transition of the space-time at the minimum action near the planck scale
[DE93-754192] p 410 N94-10718
Classical gravity coupled to Liouville theory
[DE93-613049] p 275 N94-10798
Quantized conic sections; quantum gravity
[DE93-010950] p 411 N94-10956
Explorations in quantum gravity: From one loop effective actions to two-dimensional theories p 413 N94-11822

GRAVITATION THEORY
On the generalized Jordan-Brans-Dicke theory
[DE93-613051] p 409 N94-10499

From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535
Planck scale effects on the Majoron
[DE93-613120] p 410 N94-10545
One-loop quantum gravity on de Sitter space
[DE92-641349] p 425 N94-11152
New tests of the equivalence principle using non-metric couplings of electromagnetism and gravitation
p 413 N94-11821

GRAVITATIONAL EFFECTS
Evaporation under microgravity conditions
p 102 N94-10086
Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092
Coupled thermogravitational and thermocapillary convection in a two-layer fluid system
p 105 N94-10101
The effect of gravity modulation on thermosolutal convection p 105 N94-10103
Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness
p 105 N94-10105
Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107
CdTe crystal growth in the Soviet facility zona 4
p 106 N94-10111
The effect of gravitational modulation on convection in vertical Bridgman growth p 113 N94-10178
TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements
p 114 N94-10184
TEM study of a space processed Al-Al2O3 metallic composite p 75 N94-10186
Effect of gravity on the dissolution and liquid phase epitaxial growth processes in a horizontal sandwich system p 118 N94-10208
Transient effects in the Benard instabilities: Coupling between capillary and gravity effects
p 119 N94-10216
Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224
Influence of gravity and ambient pressure variations on the behavior of buoyant laminar diffusion flames
p 123 N94-10240
Planck scale effects on the Majoron
[DE93-613120] p 410 N94-10545
Wave structure in planetary rings p 434 N94-11185
SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523
Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152

GRAVITATIONAL FIELDS
Gravity and electric field effects on pool boiling heat transfer p 121 N94-10226
Fluid-fluid interfacial instabilities induced by gravity
p 121 N94-10229
Interferometry with particles of non-zero rest mass
[DE93-613518] p 409 N94-10501
On the possible unobservability of the Wu-Yang phase factor in curved space
[DE93-617645] p 411 N94-10831
An analysis of the gravity field in the Norwegian Sea and mapping of the ice cap of Greenland using ERS-1 altimeter measurements p 242 N94-11768
Arctic geodynamics: Continental shelf and deep ocean geophysics. ERS-1 satellite altimetry: A first look
p 243 N94-11776
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152

GRAVITATIONAL PHYSIOLOGY
Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235
A mechanism for the reduction in risk of decompression sickness in microgravity environment
p 312 N94-11545
Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556
Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures
p 308 N94-11992
Echocardiography in the flight program
p 309 N94-11993
Pulmonary function in microgravity: KC-135 experience
p 309 N94-11994
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995
Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

GRAVITATIONAL WAVE ANTENNAS
The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587

GRAVITATIONAL WAVES
The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587

GRAVITONS
On the generalized Jordan-Brans-Dicke theory
[DE93-613051] p 409 N94-10499

GRAVITY ANOMALIES
Geophysical signature of the Pretoria saltpan impact structure and a possible satellite crater
p 282 N94-12103
Flexure and the role of inplane force around coronae on Venus p 452 N94-12112
Free-air and Bouguer gravity anomalies and the Martian crustal dichotomy p 481 N94-12267
New Mars free-air and Bouguer gravity: Correlation with topography, geology and large impact basins
p 481 N94-12268
Pseudo magnetic anomaly derived from satellite altimetry and its application to the tectonics in the North Fuji Basin p 208 N94-12645

GRAVITY WAVES
Lee waves: Benign and malignant
[NASA-CR-186024] p 283 N94-10725
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves
p 195 N94-11922
Polar mesospheric waves and structure
[AD-A265360] p 279 N94-12561

GRAY SCALE
Application of normalized gray-scale correlation
[DE93-013765] p 141 N94-10521
Development and implementation of a general purpose x-windows display program
[AD-A265306] p 332 N94-11860

GRAZING INCIDENCE
Needs for super-smooth surfaces
[DE93-012482] p 382 N94-11242
Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049
Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment
[NASA-CR-194030] p 139 N94-12778

GREEN'S FUNCTIONS
A spectral nodal method for discrete ordinates problems in x,y geometry
[DE93-610128] p 342 N94-10283
A spectral nodal method for the solution of the Sn equations in x, y geometry for highly absorbing deep penetration problems
[DE93-613520] p 349 N94-10636
Nonperturbative methods in HZE ion transport
[NASA-TP-3363] p 484 N94-10759
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819
Regular tensor Green functions of the round waveguide
[DE93-621354] p 345 N94-11036
Asymptotic expressions for regular Green functions of a round cylindrical screen
[DE93-621356] p 134 N94-11038
Radiation and scattering by cavity-backed antennas on a circular cylinder
[NASA-CR-193409] p 136 N94-11084

GREENHOUSE EFFECT
An observational search for CO2 ice clouds on Mars
p 441 N94-12054

GREENLAND
Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738
Monitoring of the Greenland Ice Sheet using ERS-1 synthetic aperture radar imagery p 237 N94-11741
Spatial patterns in backscatter strength across the Greenland Ice Sheet p 238 N94-11744
Use of ERS-1 SAR to measure ice flux in the East Greenland current p 238 N94-11746
An analysis of the gravity field in the Norwegian Sea and mapping of the ice cap of Greenland using ERS-1 altimeter measurements p 242 N94-11768

GRID GENERATION (MATHEMATICS)
A grid generation method to calculate the flow field in a three-dimensional cascade of blades
[NAL-TR-1158] p 147 N94-10364
Numerical methods for aerothermodynamic design of hypersonic space transport vehicles p 9 N94-10459
Development of a Delaunay-based adaption scheme with applications to complex three-dimensional rotational flows p 149 N94-10824
Generation and analysis of hybrid structured/unstructured grids
[ARA-MEMO-365] p 324 N94-10893
A dynamically adaptive mesh method for internal flows
p 149 N94-10896
Object oriented implementation of adaptive mesh refinement algorithms
[DE93-011885] p 325 N94-11112
KIVA-3: A KIVA program with block-structured mesh for complex geometries
[DE93-011986] p 77 N94-11249
Quality factors and local adaption (with applications in Eulerian hydrodynamics)
[DE93-010502] p 151 N94-11272
SAUNA: A system for grid generation and flow simulation using hybrid structured/unstructured grids
[ARA-MEMO-370] p 154 N94-11859
Direct numerical simulation of turbulent flow over a backward-facing step p 156 N94-12296
Towards a cell-vertex Navier-Stokes algorithm for three-dimensional structured/unstructured meshes
[ARA-MEMO-366] p 161 N94-12437

GROUND BASED CONTROL
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134
Helicopter approach capability using the differential Global Positioning System
[NASA-CR-177618] p 24 N94-12355

GROUND EFFECT (AERODYNAMICS)
Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft
[NASA-TM-104008] p 30 N94-11259
Turbulence modeling for thrust reverser flow field prediction methods
[AD-A266139] p 154 N94-11641

GROUND SUPPORT EQUIPMENT
Results of mission preparation support to microgravity experiments on board of Eureca 1 p 111 N94-10138
Pre-operation analysis of ERS-1 tracking and operation, part 2-F
[NASDA-CNT-930002-PT-2-F] p 230 N94-11130
Using transponders with the ERS-1 altimeter to measure orbit altitude to +/- 3 cm p 244 N94-11785

GROUND SUPPORT SYSTEMS
Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139
Pre-operation analysis of ERS-1 tracking and operation, part 2-A
[NASDA-CNT-930001-PT-2-A] p 230 N94-11129
Pre-operation analysis of ERS-1 tracking and operation, part 2-F
[NASDA-CNT-930002-PT-2-F] p 230 N94-11130
Maximizing reuse: Applying common sense and discipline p 329 N94-11429

GROUND TESTS
Experimental approach to non-contact calorimetry in space p 112 N94-10143
Interface reactions of (Ni3Al) ribbons/Al-MMC in ground preparation as preliminary test for microgravity experiments p 123 N94-10237
An investigation of conducted and radiated emissions from a hollow-cathode plasma contactor
[NASA-CR-191172] p 386 N94-10346
Characterization of in-flight performance of ion propulsion systems
[NASA-TM-106283] p 46 N94-10761
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing
[NASA-TM-104269] p 26 N94-11233

GROUND TRUTH
Ice studies in the Barents Sea by ERS-1 SAR during SIZEX 92 p 238 N94-11745
ERS-1 SAR crop monitoring experiment in East Anglia, UK p 248 N94-12488
Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site
p 248 N94-12491
Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524

Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology
p 254 N94-12528

GROUND WATER
Immediate response to free product discovery
[PB93-182970] p 265 N94-11015
Catalytic oxidation of organics in vapor streams at remediation sites
[PB93-182962] p 266 N94-11472
The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars
p 463 N94-12169
The thermodynamic case for a water-rich Mars
p 463 N94-12170

GROUP THEORY
The structure of Hilbert flag varieties
[MEMO-1095] p 348 N94-10272
Convergence of exponentially convex functions on foundation semigroups
[DE93-619665] p 342 N94-10325
A group-theoretic approach to the study of small oscillations of a dynamical system with a known symmetry
[DE93-612971] p 409 N94-10402
Uncertainty relations, zero point energy and the linear canonical group p 378 N94-10590
The modular group and super-KMS functionals
[DE93-613029] p 349 N94-10632

GUANIDINES
Solid-state structures of guanidinium methane, ethane, and trifluoromethanesulfonate
[AD-A265293] p 402 N94-11654

GUINEA PIGS
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548

GULF OF ALASKA
SAR ocean imaging in the Gulf of Alaska
p 235 N94-11723

GULF OF MEXICO
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C
[PB93-190304] p 265 N94-11018
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9
[PB93-190312] p 265 N94-11019
KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161

GULF STREAM
Space and time variability of the Gulf Stream using ERS-1 ALT-OPR02 data p 242 N94-11769
Ocean circulation revealed by altimeter data
p 245 N94-11786
An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander
[AD-A265116] p 289 N94-11868
Measurement of the surface layer current averaged vertically using Multipaths Inverted Echosounder
p 194 N94-11915
ERS-1 and Almaz SAR ocean wave imaging over the Gulf Stream and the Grand Banks p 251 N94-12505

GUN PROPELLANTS
Time-temperature shift factors for gun propellants
[AD-A264979] p 97 N94-10489

GUST LOADS
Further studies using matched filter theory and stochastic simulation for gust loads prediction
[NASA-TM-109010] p 26 N94-11587

GYROFREQUENCY
Stationary spectra in a finite-pressure current-carrying plasma
[DE93-617848] p 387 N94-10538
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p))
[DE93-621654] p 391 N94-11210
Studies of electrostatic waves and VLF-wave particle interaction in the ionosphere
[AD-A266013] p 278 N94-12392

GYROSCOPIC STABILITY
Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

H

H-60 HELICOPTER
NASTRAN modeling of flight test components for UH-60A airloads program test configuration
[NASA-CR-193614] p 186 N94-10937

HABITATS
Terminal Decomposition and Gaseous Sulfur Release from Tidal Wetlands
[NASA-CR-193466] p 267 N94-12451
Emissions of biogenic sulfur gases from Alaskan tundra p 268 N94-12455

HADRONS
Some new/old approaches to QCD
[DE93-010451] p 408 N94-10261
Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551
Squeezed colour states in gluon jet
p 379 N94-10599
Principles of gauge theory of real hadrons
[DE93-613094] p 362 N94-10634
Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron
[DE93-754288] p 363 N94-10720
A review of two photon production of jets at PEP and PETRA energies
[DE93-011742] p 364 N94-10754
Relativistic heavy-ion collisions
[DE93-014844] p 366 N94-11147
Lecture note on circuit technology for high energy physics experiment
[DE93-771422] p 372 N94-11245

HALF LIFE
A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source
[DE93-009795] p 75 N94-10338

HALF SPACES
Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space
p 350 N94-10600

HALL EFFECT
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843

HALLEY'S COMET
Mass and spatial distribution of carbonaceous component in Comet Halley p 433 N94-12263
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

HAMILTONIAN FUNCTIONS
Aharonov-Bohm effect in Luttinger liquid
[DE93-613818] p 408 N94-10148
Cycles through particular subgraphs of claw-free graphs
[MEMO-1097] p 341 N94-10274
Uni-directional waves over slowly varying bottom. Part 1: Derivation of a KdV-type of equation
[MEMO-1098] p 147 N94-10275
Effect of a distribution of exchange parameters within a simple localized-itinerant model
[DE93-610314] p 395 N94-10314
Wave function collapse: An unnecessary condition for the dynamical description of the Zeno and partial Zeno effect
[DE93-612970] p 132 N94-10401
On a Lagrange-Hamilton formalism describing position and momentum uncertainties p 349 N94-10583
Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space
p 350 N94-10600
Non-stationary and non-linear dispersive medium as external field which generates the squeezed states
p 380 N94-10605
On the possible unobservability of the Wu-Yang phase factor in curved space
[DE93-617645] p 411 N94-10831
Cosmological restrictions on conformally-invariant SU(5) GUT models
[DE93-619770] p 412 N94-11047
Superfield description of N = 2 extended one-dimensional supersymmetric quantum mechanics
[DE93-621420] p 412 N94-11087
Radiative properties of strongly magnetized plasmas
[DE93-014098] p 389 N94-11118
Three-dimensional N = 4 extended supersymmetrical quantum mechanics
[DE93-621421] p 412 N94-11164
Duality twisted boundary conditions in n-sta te Potts models
[DE93-619724] p 346 N94-11811

HAND (ANATOMY)
Head and face anthropometry of adult US civilians
[DOT/FAA/AM-93/10] p 315 N94-10806

HANDBOOKS
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012181] p 129 N94-11456
Correspondence standards
[NHB-1450.10B] p 420 N94-11589
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012220] p 129 N94-11670

HANKEL FUNCTIONS
Balancing of the normalized right coprime factorization of a nonlinear system
[MEMO-1096] p 341 N94-10273
The Nehari problem for the Pritchard-Salamon class of infinite-dimensional linear systems: A direct approach
[CS-9216] p 344 N94-10905

HARDENING (MATERIALS)
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168

HARDNESS
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system
[DE93-011879] p 143 N94-11273
Ceramic technology project database
[DE93-012432] p 91 N94-11673

HARDNESS TESTS
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168

HARMONIC ANALYSIS
Spectral analysis of the gravity and topography of Mars p 444 N94-12065

HARMONIC EXCITATION
Nonlinear response of a clamped-clamped beam with internal resonance under sinusoidal excitation
p 186 N94-10897
Examination of the surface second harmonic response at infrared wavelengths
[AD-A265206] p 403 N94-12371

HARMONIC GENERATIONS
Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field
[DE93-613723] p 386 N94-10387
High-order harmonic conversion efficiency in helium
[DE93-011714] p 364 N94-10753
The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity
[DE93-013102] p 389 N94-11114
Elementary mechanism of electron beam dissipative instability development
[DE93-621653] p 391 N94-11209
Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate
[DE93-012498] p 399 N94-11243
Examination of the surface second harmonic response at infrared wavelengths
[AD-A265206] p 403 N94-12371
Controlling chaotic behavior in a CO2 and other lasers
[AD-A265458] p 176 N94-12372
Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534
Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577

HARMONIC OSCILLATORS
Smoothly deformed light p 375 N94-10566
One dimensional representations in quantum optics
p 375 N94-10570
Harmonic oscillator interaction with squeezed radiation
p 376 N94-10571
Phasing operator for two oscillators in classical field
p 370 N94-10579
On a Lagrange-Hamilton formalism describing position and momentum uncertainties p 349 N94-10583
Supersqueezed states from squeezed states
p 378 N94-10591
Collision-induced squeezing in a harmonic oscillator
p 379 N94-10597
Relation of squeezed states between damped harmonic and simple harmonic oscillators p 380 N94-10606
Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607
Correlated states of a quantum oscillator acted by short pulses p 380 N94-10609
Coherent states and uncertainty relations for the damped harmonic oscillator with time-dependent frequency
p 380 N94-10611
Quantum processes in resonators with moving walls
p 380 N94-10612
Exact solutions of a many-anyon problem
[DE93-617646] p 411 N94-10832

HARMONIC RADIATION
High-order harmonic conversion efficiency in helium
[DE93-011714] p 364 N94-10753

HARRIER AIRCRAFT
Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft
[NASA-TM-104008] p 30 N94-11259

HARTREE APPROXIMATION

Satellite structure of the xenon valence shell by electron momentum spectroscopy [DE93-609993] p 360 N94-10327

Recent advances in electron momentum spectroscopy [DE93-610149] p 361 N94-10333

Spontaneous symmetry breaking in QCD [DE93-753060] p 396 N94-10645

Radiative properties of strongly magnetized plasmas [DE93-014098] p 389 N94-11118

Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids [AD-A264689] p 399 N94-11263

HAWAII

Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows p 281 N94-12041

Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars p 281 N94-12055

HAZARDS

Achievements and challenges of Space Station Freedom's safety review process [NASA-TM-106199] p 40 N94-10640

HAZE

Dust in the Martian atmosphere: Polarimetric sensing p 473 N94-12223

HEAD (ANATOMY)

Mass properties test procedure for manikin headforms and helmet systems [AD-A265654] p 315 N94-10296

HEAD DOWN TILT

Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557

Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992

Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997

Fluid compartment and renal function alterations in the rat during 7 and 14 day head down tilt p 310 N94-12002

Local fluid shifts and edema in humans during simulated microgravity p 311 N94-12003

Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004

HEAD-UP DISPLAYS

Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

A comparison of head-up and head-down display formats during instrument flying tasks [AD-A266140] p 316 N94-11642

HEALING

Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides [AD-A264851] p 88 N94-10863

Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields [AD-A264251] p 311 N94-12364

HEALTH

National Institute of Health Almanac, 1992 [PB93-183556] p 303 N94-10828

Baseline characteristics of different strata of astronaut corps p 312 N94-11552

The Department of Clinical Investigation, reports control symbol MED-300(R-1) [AD-A264969] p 304 N94-11649

Medical care delivery in the US space program p 307 N94-11806

HEALTH PHYSICS

Potential health effects of space radiation p 312 N94-11558

HEAO 1

HEAO-1 analysis of Low Energy Detectors (LED) [NASA-CR-194087] p 424 N94-12574

HEARING

Noise levels and their effects on Shuttle crewmembers' performance: Operational concerns p 314 N94-11538

HEART FUNCTION

Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991

Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997

Fitness, autonomic regulation and orthostatic tolerance p 310 N94-11999

Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006

HEART RATE

Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529

Echocardiography in the flight program p 309 N94-11993

Valsalva maneuver: Insights into baroreflex modulation of human sympathetic activity p 310 N94-12000

Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

HEART VALVES

Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547

HEAT ACCLIMATIZATION

P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1 [AD-A266072] p 304 N94-11224

Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368

HEAT BALANCE

Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919

Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924

Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925

Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926

HEAT BUDGET

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894

Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924

Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925

Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926

Study on air-sea interactions in the OMLET (Ocean Mixed Layer Experiment) area using satellite remote sensing p 220 N94-12710

Variability of the mixed layer depth in the North Pacific Ocean as calculated by a 3-D semi-analytical mixed layer remote sensing model p 221 N94-12718

HEAT ENGINES

Heat regenerative external combustion engine [AD-D015765] p 178 N94-10378

HEAT EXCHANGERS

Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors [DE93-754285] p 371 N94-10719

Theoretical evaluation of R22 and R502 alternatives [DE93-014767] p 411 N94-10853

HEAT FLUX

Transient effects in the Benard instabilities: Coupling between capillary and gravity effects p 119 N94-10216

High heat flux components and plasma surface interactions [DE93-008786] p 385 N94-10253

Physics and modelling of scrape-off layer transport [DE93-010510] p 385 N94-10289

Thermal flux measurements in hypersonic flows: A review p 5 N94-10438

The OSU heat release rate test using the oxygen consumption principle p 20 N94-10784

Design of CCD camera system for use inside electron beam furnace [DE93-009525] p 170 N94-11267

Heat flux measurements on ceramics with thin film thermocouples [NASA-TM-106305] p 170 N94-11310

Latent and sensible heat flux estimated from ERS-1 data p 244 N94-11783

Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918

Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919

Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921

Sea surface heat flux in the beginning of the Kuroshio p 195 N94-11923

Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924

Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990

Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217

Estimations of the surface fluxes from satellite observations of boundary layer and the surface p 252 N94-12513

Study on air-sea interactions in the OMLET (Ocean Mixed Layer Experiment) area using satellite remote sensing p 220 N94-12710

HEAT MEASUREMENT

Experimental approach to non-contact calorimetry in space p 112 N94-10143

The OSU heat release rate test using the oxygen consumption principle p 20 N94-10784

Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788

Heat flux measurements on ceramics with thin film thermocouples [NASA-TM-106305] p 170 N94-11310

HEAT OF DISSOCIATION

Tandem mass spectrometric analysis of phosphate esters [AD-A265483] p 78 N94-12009

HEAT PUMPS

Theoretical evaluation of R22 and R502 alternatives [DE93-014767] p 411 N94-10853

HEAT RADIATORS

The Third Workshop on Two Phase Fluid Experiment in the Space Environment [NASDA-CON-930002] p 161 N94-12547

Summary of studies on JEM utilization experiment projects p 161 N94-12548

Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552

Devices related for thermal control systems used in microgravity p 162 N94-12553

Research and development of cold plate for two phase fluid loop thermal control system p 162 N94-12555

HEAT RESISTANT ALLOYS

Weld overlay coatings for erosion control [DE93-013592] p 84 N94-11816

Fatigue in single crystal nickel superalloys [AD-A266116] p 85 N94-12418

NiAl alloys for structural uses [NASA-CR-194113] p 85 N94-12447

HEAT SHIELDING

Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012

HEAT SINKS

Liquid Cooled Heat Sink with through Vias (LCHS) [AD-A266008] p 73 N94-12344

Research and development of cold plate for two phase fluid loop thermal control system p 162 N94-12555

HEAT STORAGE

Modeling void growth and movement with phase change in thermal energy storage canisters [NASA-TM-106288] p 163 N94-12576

HEAT TOLERANCE

P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1 [AD-A266072] p 304 N94-11224

HEAT TRANSFER

Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity p 101 N94-10079

Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080

Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092

Two-phase flow heat transfer and hydrodynamics in an electric field p 103 N94-10093

Gravity and electric field effects on pool boiling heat transfer p 121 N94-10226

Transport of heat and mass in near-critical fluids p 122 N94-10230

Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243

Control effectiveness at hypersonic speeds p 3 N94-10426

Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction p 6 N94-10443

Real gas and surface transpiration effects upon swept leading edge high speed flow including transition p 8 N94-10452

Studies of hypersonic viscous flows p 8 N94-10454

New thermoplastic laminating adhesives for the aircraft industry with low heat release and low smoke emission p 17 N94-10767

A new low smoke, low heat release structural foam p 17 N94-10768

The OSU heat release rate test using the oxygen consumption principle p 20 N94-10784

Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851
Theoretical evaluation of R22 and R502 alternatives
[DE93-014767] p 411 N94-10853
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades
[NASA-TM-106278] p 151 N94-11256
Establishing baseline data for an experimental appratus that measures heat transfer under conditions of oscillating pressure and flow
[NASA-CR-193772] p 413 N94-12343
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368
Boiling heat-transfer processes and their application in the cooling of high heat flux devices
[AD-A266086] p 413 N94-12535
Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber
[NASA-TP-3380] p 55 N94-12569

HEAT TRANSFER COEFFICIENTS
Developmental research of thermal control system in space environment p 162 N94-12551
Research on two phase flow in microgravity p 162 N94-12554

HEAT TRANSMISSION
Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926
Liquid Cooled Heat Sink with through Vias (LCHS)
[AD-A266008] p 73 N94-12344
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549
Condensation phenomena p 162 N94-12550
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Devices related for thermal control systems used in microgravity p 162 N94-12553
Research on two phase flow in microgravity p 162 N94-12554
Research and development of cold plate for two phase fluid loop thermal control system p 162 N94-12555
Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556

HEAT TREATMENT
Heat analysis of thermoplastic components during the initial stages of manufacturing: A probabilistic approach p 60 N94-10031
Spin-rolling, welding, and heat treatment of aluminium 2219 for Ariane 5 GAM high pressure vessel liners p 62 N94-10045
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107
Cold press sintering of simulated lunar basalt p 131 N94-12026

HEATING
Ar-39 - Ar-40 ages of acapulcoites and lodranites: Evidence for early parent body heating p 281 N94-12083
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163
The 1991 version of the plume impingement computer program. Volume 2: User's input guide
[NASA-CR-194191] p 166 N94-12774

HEATING EQUIPMENT
Boiling heat-transfer processes and their application in the cooling of high heat flux devices
[AD-A266086] p 413 N94-12535

HEAVY IONS
Production of strange clusters in relativistic heavy ion collisions
[DE93-010876] p 359 N94-10303
Investigation of soft errors in MOS RAM under influence of heavy ions
[DE92-644554] p 484 N94-10534
Heavy ion fusion at sub-barrier energies: Progress and questions
[DE93-011764] p 372 N94-11124
Relativistic heavy-ion collisions
[DE93-014844] p 366 N94-11147
Relativistic heavy ion research
[DE93-013127] p 367 N94-11373
Potential health effects of space radiation p 312 N94-11558
Pion correlations and calorimeter design for high energy heavy ion collisions
[DE93-013861] p 373 N94-12607
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

HEAVY NUCLEI
Post-launch analysis of data from the High Energy Astrophysical Observatory Heavy Nuclei Experiment (HEAO-C3)
[NASA-CR-193513] p 484 N94-11486
Analysis and interpretation of high energy cosmic rays measured on Spacelab-2
[NASA-CR-193586] p 485 N94-12771

HEAVY WATER REACTORS
Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor
[DE93-005428] p 187 N94-11169

HEIGHT
Spatial scales of wave height p 244 N94-11782

HEISENBERG THEORY
The Second International Workshop on Squeezed States and Uncertainty Relations
[NASA-CP-3219] p 375 N94-10564
Disturbance, the uncertainty principle and quantum optics p 375 N94-10569
Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576
The legacy of uncertainty p 376 N94-10577
Completeness properties of the minimum uncertainty states p 349 N94-10581
The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587
Geometric aspects of uncertainty and correlation p 349 N94-10588
Information entropy via Glauber's Q-representation p 378 N94-10592
Positive phase space distributions and uncertainty relations p 379 N94-10598
The uncertainty principle and quantum chaos p 379 N94-10602
Relation of squeezed states between damped harmonic and simple harmonic oscillators p 380 N94-10606

HELICAL FLOW
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208

HELICAL WINDINGS
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214

HELICOPTER CONTROL
A feasibility study regarding the addition of a fifth control to a rotorcraft in-flight simulator
[NASA-CR-193240] p 30 N94-10895

HELICOPTER DESIGN
NASTRAN modeling of flight test components for UH-60A airloads program test configuration
[NASA-CR-193614] p 186 N94-10937

HELICOPTER PERFORMANCE
Performance and rotor loads measurements of the Lynx XZ170 helicopter with rectangular blades
[NASA-TM-104000] p 1 N94-10936

HELICOPTER WAKES
Perpendicular blade vortex interaction and its implications for helicopter noise prediction: Wave-number frequency spectra in a trailing vortex for BWI noise prediction
[NASA-CR-193623] p 357 N94-10752

HELICOPTERS
Performance and rotor loads measurements of the Lynx XZ170 helicopter with rectangular blades
[NASA-TM-104000] p 1 N94-10936
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

HELIOS A
Experimental particle physics at the University of Pittsburgh
[DE93-013326] p 369 N94-12546

HELIOTRONS
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Probability of particle trapping/detrapping in torsatrons
[DE93-621641] p 390 N94-11121

HELIUM
High-order harmonic conversion efficiency in helium
[DE93-011714] p 364 N94-10753
Helium transport scaling law studies
[DE93-013487] p 393 N94-11513
Compilation of excitation cross sections for He atoms by electron impact
[DE93-753246] p 367 N94-11580

HELIUM ISOTOPES
Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020
Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082
On the origin of (4)He and (40)Ar in natural gold p 87 N94-12240

HELMET MOUNTED DISPLAYS
Accuracy and repeatability of the standard automated mass properties measurement system
[AD-A265897] p 316 N94-12346

HELMETS
Mass properties test procedure for manikin headforms and helmet systems
[AD-A265654] p 315 N94-10296
Correlation of HGU-56/P aircrew helmet fitting with head anthropometric measurements
[AD-A264988] p 315 N94-11291
Accuracy and repeatability of the standard automated mass properties measurement system
[AD-A265897] p 316 N94-12346

HELMHOLTZ RESONATORS
A theory of membrane absorbers
[ISVR-TR-217] p 76 N94-11216

HEMATITE
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars p 281 N94-12055

HEMATOCRIT
Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557

HEMODYNAMICS
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995

HERMES MANNED SPACEPLANE
On the mechanical development of the Flexible External Insulation (FEI) for Hermes spaceplane p 62 N94-10048
Material advances for lightweight TPS p 62 N94-10049
Structural material, manufacture, and design requirements for high-temperature fasteners for space plane technologies p 63 N94-10055

HERMITIAN POLYNOMIAL
On renormalization group flow in matrix model
[DE93-613050] p 409 N94-10413

HETEROCYCLIC COMPOUNDS
Ring-opening polymerization of phosphazenes
[AD-A265000] p 90 N94-11292

HETERODYNING
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732

HETEROGENEITY
A heterogeneous graphics procedure for visualization of massively parallel solutions
[DE93-009628] p 336 N94-11270
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211

HETEROJUNCTIONS
Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas
[DE93-613910] p 396 N94-10800
Memory effects in the organometallic chemical beam epitaxy of compound semiconductors
[NASA-CR-193106] p 399 N94-11439
Organometallic chemical vapor deposition and characterization of ZnGeP2/GaP multiple heterostructures on GaP substrates p 400 N94-11442
Preliminary surface-emitting laser logic device evaluation
[AD-A266111] p 383 N94-12416
Electronic and total energy properties of ternary and quaternary semiconductor compounds, alloys and superlattices
[NASA-CR-192905] p 405 N94-12570

HEURISTIC METHODS
Enhancements to the Engine Data Interpretation System (EDIS)
[NASA-CR-192593] p 180 N94-10815
Efficient partitioning and assignment on programs for multiprocessor execution
[NASA-CR-193458] p 324 N94-10942
A surrogate heuristic for set covering problems
[INPE-5462-PRE/1770] p 325 N94-11178
A new heuristic for set covering problems
[INPE-5471-TDI/502] p 333 N94-12358

HIGH DEFINITION TELEVISION

Studies and simulations of the DigiCipher system [NASA-CR-193470] p 321 N94-10343

HIGH ENERGY INTERACTIONS

Report of the Workshop on Light Particle-Induced Reactions [DE93-752300] p 360 N94-10317

Development of deterministic transport methods for low energy neutrons for shielding in space [NASA-CR-194172] p 366 N94-11199

Lecture note on circuit technology for high energy physics experiment [DE93-771422] p 372 N94-11245

Conceptual design report for the SDC barrel and intermediate muon detectors based on a jet-type drift chamber [DE93-753173] p 367 N94-11510

Future high precision experiments and new physics beyond Standard Model [DE93-011004] p 373 N94-11618

Theory of elementary particles and accelerator theory. Task C: Experimental high energy physics [DE93-013139] p 368 N94-11696

Final state interactions and inclusive nuclear collisions [NASA-TP-3353] p 373 N94-12435

Experimental particle physics at the University of Pittsburgh [DE93-013326] p 369 N94-12546

Experimental and theoretical high energy physics program [DE93-013336] p 373 N94-12600

Elementary particle physics and high energy phenomena [DE93-013971] p 370 N94-12609

HIGH FREQUENCIES

HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

Measurement of wave parameters by HF ocean radar p 192 N94-11903

Kuroshio observations by the HF ocean radar p 192 N94-11904

Statistical study of HF ocean radar echo p 139 N94-11905

Groundwave HF ocean surface radar p 139 N94-11906

High frequency behavior of long and small junctions [AD-A265670] p 403 N94-12336

HIGH GAIN

Force reflection with compliance control [NASA-CASE-NPO-18668-1-CU] p 179 N94-10654

Development of microstrip gas chamber and application to imaging gamma-ray detector [DE93-754294] p 34 N94-11041

Demonstration designs for optical-field-ionized plasma x-ray lasers [DE93-009227] p 175 N94-11266

GaAs PCSS: High gain switching and device reliability [DE93-009851] p 401 N94-11605

HIGH LEVEL LANGUAGES

Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320

HIGH POLYMERS

Ring-opening polymerization of phosphazenes [AD-A265000] p 90 N94-11292

The synthesis of photocrosslinkable chalcone-bearing polyphosphazenes [AD-A264915] p 92 N94-11849

Molecular properties of polymeric materials for space applications [NASA-CR-194370] p 94 N94-12450

HIGH POWER LASERS

Start-up imprinting and shock dynamics in laser-target interaction [DE93-008051] p 172 N94-10150

Multiple laser beam combining and phasing using closed-loop control [DE93-009830] p 175 N94-11283

HIGH PRESSURE

High-energy density physics at Los Alamos [DE93-010271] p 371 N94-10260

X ray and gamma ray spectroscopy of solids under pressure [DE93-014847] p 76 N94-10653

Titanium alloys milling assistance by high pressure lubricoolant jet [DE93-013302] p 82 N94-11008

A picosecond high pressure gas switch [DE93-011897] p 142 N94-11050

HIGH RESOLUTION

Status of local oscillators for operating ultra-high resolution frequency discriminators as frequency standards p 353 N94-10981

High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA [DE93-011892] p 393 N94-11677

HIGH REYNOLDS NUMBER

Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction p 6 N94-10443

Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292

Local isotropy in high Reynolds number turbulent shear flows p 157 N94-12302

An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers p 157 N94-12303

Probability density distribution of velocity differences at high Reynolds numbers p 158 N94-12304

Superfluid turbulence p 158 N94-12307

Experiment on a high Reynolds number turbulent boundary layer p 164 N94-12617

HIGH SPEED

Flexible high-speed CODEC [NASA-CR-191169] p 146 N94-12433

Turbulence modeling and compressibility p 163 N94-12614

On the wake behind a high speed train p 164 N94-12618

HIGH STRENGTH ALLOYS

A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints [NASA-TM-108418] p 188 N94-11275

Advances in low carbon, high strength ferrous alloys [AD-A265264] p 85 N94-12532

HIGH STRENGTH STEELS

Analytical prediction and test verification of the multiaxial behaviour of high-strength steel for lightweight structures p 58 N94-10016

Design with high strength steel: A case of failure and its implications p 58 N94-10017

Microstructure-based fatigue life prediction methods for naval steel structures [AD-A265429] p 85 N94-12426

Advances in low carbon, high strength ferrous alloys [AD-A265264] p 85 N94-12532

HIGH TEMPERATURE

Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128

High temperature processing and diagnostic technologies for microgravity applications p 110 N94-10130

MUZO: The programmable multi zone furnace for gas payloads and sounding rockets p 110 N94-10132

High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition [DE93-013977] p 398 N94-11115

The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214

On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225

HIGH TEMPERATURE AIR

Electronic excitation of ground state atoms by collision with heavy gas particles [NASA-CR-193364] p 366 N94-11360

HIGH TEMPERATURE ENVIRONMENTS

High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment [DE93-012430] p 72 N94-11368

Potential techniques for non-destructive evaluation of cable materials [DE93-008350] p 183 N94-11586

Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282

HIGH TEMPERATURE GAS COOLED REACTORS

Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors [DE93-754285] p 371 N94-10719

HIGH TEMPERATURE LUBRICANTS

Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures [NASA-TM-106078] p 55 N94-11362

HIGH TEMPERATURE PLASMAS

Nonlinear MHD-waves in a dissipative plasma with hall currents [DE93-617844] p 386 N94-10395

Filamentation instability of hot quark-gluon plasma with hard jet [DE93-617679] p 388 N94-10882

Submicrosecond, synchronizable x ray source [AD-D015745] p 176 N94-12337

Inexpensive capillary discharge x-ray laser driver [AD-A265932] p 176 N94-12382

HIGH TEMPERATURE SUPERCONDUCTORS

Orbital glass in HTSC [DE93-613988] p 395 N94-10415

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data [DE93-613828] p 395 N94-10537

Development and testing of a superconducting link for an IR detector [NASA-CR-193674] p 170 N94-10948

Processing and transport properties of high J(sub c) silver clad Bi-2223 tapes and coils [DE93-010674] p 398 N94-11073

Elastic deformations and sound in anisotrope superconductors near critical temperature [DE93-620636] p 188 N94-11364

Large array SQUID magnetometer for NDE [AD-A264799] p 304 N94-11449

Assessment of the impact of HTSC's on superconducting fault-current limiters [DE93-009986] p 143 N94-11454

Improvement of azimuthal homogeneity in permanent-magnet bearing rotors [DE93-009954] p 144 N94-11607

Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism [DE93-010738] p 401 N94-11646

Corrosion control by vitreous films on aluminum and high T(sub c) superconductors [AD-A266016] p 85 N94-12393

HIGH TEMPERATURE TESTS

Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment p 7 N94-10447

Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors [DE93-754285] p 371 N94-10719

Development and analysis of insulation constructions for aerospace wiring applications p 21 N94-10791

Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use [ARL-TR-27] p 90 N94-11311

Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures [NASA-TM-106078] p 55 N94-11362

HIGH VACUUM

Design of CCD camera system for use inside electron beam furnace [DE93-009525] p 170 N94-11267

HIGH VOLTAGES

A study of DC-DC converters with MCTs for arcjet power supplies [NASA-CR-193457] p 142 N94-10931

HIGHLANDS

Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas p 464 N94-12179

HIGHLY MANEUVERABLE AIRCRAFT

Nonlinear stability and control study of highly maneuverable high performance aircraft [NASA-CR-193480] p 25 N94-10344

HILBERT SPACE

The structure of Hilbert flag varieties [MEMO-1095] p 348 N94-10272

Geometric aspects of uncertainty and correlation p 349 N94-10588

HISTOCHEMICAL ANALYSIS

Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats [AD-A265309] p 301 N94-11861

HISTOGRAMS

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data [DE93-613828] p 395 N94-10537

HISTORIES

The legacy of uncertainty p 376 N94-10577

A history of tungsten- and molybdenum-base alloys [DE93-010283] p 82 N94-11108

ESRO's first scientific satellite programme, 1961 - 1966 [ESA-HSR-2] p 44 N94-11462

Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

HODOSCOPES

Demonstration prototype gamma-ray hodoscope alternative to CARGOSCAN for rocket stage monitoring [DE93-006908] p 169 N94-10326

HOLE MOBILITY

Invariance of the mobility edge in anodic titanium oxides [DE92-642136] p 394 N94-10281

HOLES (ELECTRON DEFICIENCIES)

Polaronic charge separation in mixed-halide MX solids [AD-A266073] p 403 N94-12345

HOLMIUM

X-ray and neutron scattering studies of magnetic critical fluctuations in holmium [DE93-010873] p 400 N94-11467

HOLOGRAPHIC INTERFEROMETRY

The sensitivity of an optical fiber holographic interferometer p 107 N94-10117

Holographic interferometry for microgravity applications p 108 N94-10123

In situ observation of temperature dependence of concentration field during growth of KB5 crystals by holographic interferometry p 115 N94-10187

HOLOGRAPHY

Surface and near-surface atom imaging with photoelectron holography [DE93-013197] p 169 N94-10526

Holographic multiplexing for 3D optical memory [AD-A266099] p 171 N94-11420

The evolution of whole field optical diagnostics for external transonic testing [ARA-MEMO-379] p 383 N94-11887

HOMEOSTASIS

Fluid compartment and renal function alterations in the rat during 7 and 14 day head down tilt p 310 N94-12002

HOMOGENEITY

Analytical details of the instability threshold of the laser-Lorenz model [DE93-619707] p 175 N94-11634

Remanent magnetism of HED meteorites: Implications for their evolution and ancient magnetic fields p 431 N94-12172

HOMOGENEOUS TURBULENCE

Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292

HOMOJUNCTIONS

Progress in p(+)n InP solar cells fabricated by thermal diffusion p 48 N94-11384

Heteroepitaxial InP, and ultrathin, directly glassed, GaAs 3-5 solar cells p 52 N94-11406

HOMOLOGY

Deformations and recursion operators for evolution equations [MEMO-1104] p 341 N94-10163

The completion homomorphism in equivariant elliptic cohomology [DE93-619672] p 346 N94-11631

HOMOMORPHISMS

The completion homomorphism in equivariant elliptic cohomology [DE93-619672] p 346 N94-11631

HONEYCOMB STRUCTURES

Computer-aided molecular design of fire resistant aircraft materials p 19 N94-10779

Improvement of the flow quality in the ARA transonic tunnel by means of a long cell honeycomb [ARA-MEMO-375] p 34 N94-10894

HORIZONTAL FLIGHT

Advanced rotorcraft flight simulation: Model development, validation and parallel implementation p 25 N94-11056

HORIZONTAL TAIL SURFACES

A feasibility study regarding the addition of a fifth control to a rotorcraft in-flight simulator [NASA-CR-193240] p 30 N94-10895

HOSES

An investigation on the effectiveness of the piping interference removal system for STOL aircraft wind tunnel tests [NAL-TM-647] p 2 N94-10350

HOSPITALS

National Institute of Health Almanac, 1992 [PB93-183556] p 303 N94-10828

HOT ELECTRONS

Limitation and suppression of hot electron fluctuations in submicron semiconductor structures [DE93-613911] p 396 N94-10801

Short pulse lasers for generation of fields exceeding 100 MG [DE93-013346] p 369 N94-11815

HOT ISOSTATIC PRESSING

Bibliography on Hot Isostatic Pressing (HIP) technology [AD-A265668] p 81 N94-10297

Processing, properties, and wear resistance of aluminides [DE93-012186] p 83 N94-11141

Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites [AD-A265177] p 92 N94-11876

HOT PRESSING

Mechanical properties of magnesium/carbon composites developed by hot pressing under medium pressure p 59 N94-10024

HOT WORKING

The microstructure and mechanical properties of hot worked FeAl intermetallic alloys p 58 N94-10020

HOT-FILM ANEMOMETERS

Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder p 17 N94-12633

HOT-WIRE ANEMOMETERS

On the wake behind a high speed train p 164 N94-12618

Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632

HOVERING

Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover [NASA-CR-4532] p 13 N94-10758

HUBBLE SPACE TELESCOPE

Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189

HUBS

A grid generation method to calculate the flow field in a three-dimensional cascade of blades [NAL-TR-1158] p 147 N94-10364

HUDSON BAY (CANADA)

Wind and surface features in SAR images: The Canadian program p 234 N94-11718

HUMAN BEINGS

Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

HUMAN BODY

Physiological water model development p 316 N94-12367

Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368

HUMAN FACTORS ENGINEERING

Mass properties test procedure for manikin headforms and helmet systems [AD-A265654] p 315 N94-10296

Software usability assessment guide [AD-A265017] p 321 N94-10335

Head and face anthropometry of adult US civilians [DOT/FAA/AM-93/10] p 315 N94-10806

Allowable exposure limits for carbon dioxide during extravehicular activity [NASA-TM-103832] p 315 N94-11375

Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2 [NASA-CP-3187-VOL-2] p 486 N94-11527

Vigilance problems in orbiter processing p 314 N94-11536

A comparison of head-up and head-down display formats during instrument flying tasks [AD-A266140] p 316 N94-11642

The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research [AD-A265278] p 313 N94-11701

Cognitive engineering models: A prerequisite to the design of human-computer interaction in complex dynamic systems [NASA-CR-193472] p 320 N94-12558

HUMAN PERFORMANCE

P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1 [AD-A266072] p 304 N94-11224

Signal detection theory and methods for evaluating human performance in decision tasks p 314 N94-11531

Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532

Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533

Noise levels and their effects on Shuttle crewmembers' performance: Operational concerns p 314 N94-11538

Crew chief p 335 N94-11564

Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness [AD-A265657] p 302 N94-12441

HUMAN REACTIONS

Effects of CSF hormones and ionic composition on salt/water metabolism [NASA-CR-193232] p 300 N94-11045

Evaluation of the C/EC/KC-135 ground collision avoidance system (GCAS), Study 2 [AD-A265193] p 24 N94-11879

Valsalva maneuver: Insights into baroreflex modulation of human sympathetic activity p 310 N94-12000

HUMAN RESOURCES

National patterns of R and D resources, 1992 [NSF-92-330] p 422 N94-11186

HUMAN TOLERANCES

Allowable exposure limits for carbon dioxide during extravehicular activity [NASA-TM-103832] p 315 N94-11375

HUMIDITY

The impact of horizontal resolution on moist processes in the ECMWF model [DE93-011718] p 276 N94-11227

Effects of solar cell environment on contact integrity p 49 N94-11387

Estimations of the surface fluxes from satellite observations of boundary layer and the surface p 252 N94-12513

HURRICANES

The effect of rain on ERS-1 altimeter data p 243 N94-11773

HYBRID CIRCUITS

Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point [AD-A265164] p 145 N94-11884

HYDRATION

Glycerol-induced hyperhydration p 309 N94-11996

HYDRAULIC EQUIPMENT

Investigation of alternate power source for Space Shuttle Orbiter hydraulic system [NASA-CR-193229] p 46 N94-10911

HYDRAULIC JETS

Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process p 127 N94-10623

Aquastrip (tm): An innovative paint removal technology p 127 N94-10625

Titanium alloys milling assistance by high pressure lubricoolant jet [DE93-013302] p 82 N94-11008

HYDRAZINE ENGINES

Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles [NAL-TR-1149] p 27 N94-10367

HYDROBALLISTICS

An experimental investigation of high-speed water-entry for full-size and scale-model pointed nose vehicles [DE93-008491] p 147 N94-10252

HYDROCARBON FUELS

The pyrene laser induced fluorescence technique as a diagnostic tool for combustion thermometry in microgravity p 107 N94-10113

Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472

HYDROCARBONS

Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282

HYDRODYNAMICS

Evaporation under microgravity conditions p 102 N94-10086

Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182

Lattice gas hydrodynamics: Theory and simulations [DE93-013297] p 147 N94-10320

Comparison of hydrodynamic and semi-kinetic treatments for plasma flow along closed field lines [NASA-CR-193589] p 387 N94-10641

On the doubling of hydrodynamic theorems in relativistic theory of superfluidity [DE93-617895] p 148 N94-10717

Gluon gas viscosity in nonperturbative region [DE93-617680] p 397 N94-10883

Fully coupled neutronic and hydrodynamic analysis of space nuclear reactor reentry accidents [DE93-005459] p 372 N94-10890

FORCE2: A state-of-the-art two-phase code for hydrodynamic calculations [DE93-010661] p 150 N94-11072

Electron temperature measurements of x ray laser plasmas [DE93-011874] p 389 N94-11074

An improved material interface reconstruction algorithm for Eulerian codes [DE93-011679] p 326 N94-11226

Quality factors and local adaption (with applications in Eulerian hydrodynamics) [DE93-010502] p 151 N94-11272

Massively parallel hydrodynamics on unstructured grids [DE93-007325] p 153 N94-11601

Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036

Explicit 3D continuum fracture modeling with smooth particle hydrodynamics p 429 N94-12062

Initiating solar system formation through stellar shock waves p 448 N94-12090

An ancient inner lake in Maadim Vallis p 456 N94-12133

The giant impact produced a precipitated Moon p 430 N94-12135

Modeling void growth and movement with phase change in thermal energy storage canisters
[NASA-TM-106288] p 163 N94-12576

HYDROELECTRICITY
Renewable energy sources 1991, part 2
[DE93-605634] p 263 N94-11506

HYDROGEN
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces
[DE93-012767] p 77 N94-11370
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions
[NASA-CR-193339] p 152 N94-11526
Experiments with energetic (mu)d and (mu)t emitted from solid hydrogen
[DE93-010252] p 373 N94-12542

HYDROGEN BONDS
Solid-state structures of guanidinium methane, ethane, and trifluoromethanesulfonate
[AD-A265293] p 402 N94-11654
Chromatographic assessment of hydrogen-bond donating ability
[AD-A265292] p 369 N94-11826
Hydrogen-bond polymorphs of guanidinium 4-biphenylsulfonate
[AD-A265294] p 402 N94-11827
Polymer-polymer interactions
[AD-A265304] p 91 N94-11830
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

HYDROGEN EMBRITTLEMENT
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713

HYDROGEN ENGINES
Preprints of the 13th Hydrogen Energy System Symposium
[DE93-781115] p 99 N94-11444

HYDROGEN FUELS
An environmental study of the National Aerospace Plane
[AD-A266071] p 25 N94-10945
Preprints of the 13th Hydrogen Energy System Symposium
[DE93-781115] p 99 N94-11444

HYDROGEN IONS
Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287
Size dependence of chemical reactivity of gaseous metal clusters: A new mechanistic probe
[AD-A264690] p 77 N94-11264

HYDROGEN MASERS
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3218] p 350 N94-10963
Experimental comparison of time synchronization techniques by means of light signals and clock transport on the rotating earth p 351 N94-10970
Development of a cryogenic hydrogen maser at the NPL p 176 N94-10982
Ultrastable reference frequency distribution utilizing a fiber optic link p 355 N94-10994
Time scale algorithms for an inhomogeneous group of atomic clocks p 356 N94-10998

HYDROGEN OXYGEN ENGINES
Axisymmetric single shear element combustion instability experiment
[NASA-TM-106327] p 46 N94-10763
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252

HYDROGRAPHY
The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992
[AD-A264922] p 289 N94-11853

HYDROLOGICAL CYCLE
Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919

HYDROLOGY
Rainfall-runoff estimation using digital radar
[AD-A265390] p 286 N94-12408
The use of ERS-1 SAR data to study surface states p 247 N94-12480
Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis p 254 N94-12523

HYDROLYSIS
Low temperature synthesis of monolithic transparent Ta2O5 gels from hydrolysis of metal alkoxide
[NASA-TM-106246] p 89 N94-11204
Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281

HYDROPHONES
Underwater hydrophone location survey p 290 N94-10975
Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349

HYDROSTATICS
Hydrostatic testing of thick laminated composite cylinders for performance model validation
[DE93-012728] p 184 N94-10264

HYDROXYL RADICALS
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-193189] p 274 N94-10701

HYGROSCOPICITY
Hygroscopic absorption to falling films: The effects of the concentration level
[ITN-93-85198] p 148 N94-10391
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres
[DE93-012236] p 266 N94-11671

HYPERBOLIC DIFFERENTIAL EQUATIONS
Summation by parts, projections, and stability
[NASA-CR-194290] p 346 N94-12776

HYPERBOLIC FUNCTIONS
Boundary of Fatou sets of hyperbolic rational maps or degree two
[DE93-613031] p 348 N94-10412

HYPERCUBE MULTIPROCESSORS
A heterogeneous graphics procedure for visualization of massively parallel solutions
[DE93-009628] p 336 N94-11270
Optimal cube-connected cube multiprocessors
[NASA-CR-191463] p 337 N94-11308

HYPERNUCLEI
Double-lambda compound nucleus and the formation of double hypernuclei
[DE93-754289] p 365 N94-11040
A generalized Bethe-Weizsaecker mass formula for strange hadronic matter
[DE93-011010] p 368 N94-11620

HYPERONS
Production of strange clusters in relativistic heavy ion collisions
[DE93-010876] p 359 N94-10303
Strangeness production with protons and pions
[DE93-010879] p 359 N94-10304

HYPERPLANES
Vectorizing matrix operations arising from PDE discretization on 9-point stencils
[CWI-NM-R9221] p 342 N94-10351

HYPERSONIC BOUNDARY LAYER
Stability of hypersonic boundary-layer flows with chemistry p 7 N94-10451
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300

HYPERSONIC FLIGHT
In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427
Extraction of stability and control derivatives from orbiter flight data
[NASA-TM-4500] p 13 N94-10707
Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

HYPERSONIC FLOW
Theoretical and Experimental Methods in Hypersonic Flows
[AGARD-CP-514] p 2 N94-10421
CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422
Numerical simulation of the flow through a scramjet engine p 3 N94-10425
New hypersonic test methods developed at ONERA: The R5 and F4 wind tunnels p 4 N94-10429
The high enthalpy facilities HEG and TH 2 in Germany p 4 N94-10430
Local measurement of temperatures and concentrations: A review for hypersonic flows p 4 N94-10434
Velocity measurements in hypersonic flows: A review p 5 N94-10436
Flow visualization and spectroscopy in hypersonic flows: New trends p 5 N94-10437
Thermal flux measurements in hypersonic flows: A review p 5 N94-10438
A CFD validation roadmap for hypersonic flows p 5 N94-10439
Synthesis of the Workshop on Hypersonic Flows for ReEntry Problems p 5 N94-10440
Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441
Flow development in a circular pipe in the UTIAS/RPI M = 8.3 gun tunnel p 6 N94-10442
Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction p 6 N94-10443
Experimental, analytical, and computational methods applied to hypersonic compression ramp flows p 6 N94-10444
Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method p 7 N94-10449
Stability of hypersonic flow over a blunt body p 7 N94-10450
On the instability of hypersonic flow past a pointed cone: Comparison of theoretical and experimental results at Mach 8 p 8 N94-10453
Studies of hypersonic viscous flows p 8 N94-10454
Nonequilibrium hypersonic flow in a wind-tunnel nozzle p 8 N94-10456
Some experimental study and numerical simulation in wind tunnel flow p 8 N94-10457
Hypersonic multi block flow simulations around space vehicles including non-equilibrium chemistry p 9 N94-10460
Hypersonic flow computations around re-entry vehicles p 9 N94-10461
On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462
A comparison of high resolution upwind solvers on 3-D inviscid hypersonic flows p 10 N94-10463
Thermal and chemical non equilibrium hypersonic flow computations p 10 N94-10465
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions
[AD-A265275] p 150 N94-11014
Hypersonic, nonequilibrium flow over a cylindrically blunted 6 deg wedge
[NASA-TM-108994] p 162 N94-12571

HYPERSONIC HEAT TRANSFER
Computation of hypersonic nosetip heat transfer rates for an M829-like projectile
[AD-A263226] p 16 N94-11870

HYPERSONIC NOZZLES
Theoretical and Experimental Methods in Hypersonic Flows
[AGARD-CP-514] p 2 N94-10421
A CFD-based aerodynamic design procedure for hypersonic wind-tunnel nozzles p 9 N94-10458

HYPERSONIC REENTRY
Synthesis of the Workshop on Hypersonic Flows for ReEntry Problems p 5 N94-10440
Local aerothermal problems during Hermes re-entry p 10 N94-10464

HYPERSONIC SPEED
Experimental results in aerodynamic stability and control of a TSTO configuration p 3 N94-10424
Control effectiveness at hypersonic speeds p 3 N94-10426
Schlieren photographs and internal pressure distributions for three-dimensional sidewall-compression scramjet inlets at a Mach number of 6 in CF4
[NASA-TM-4479] p 148 N94-10644
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300

HYPERSONIC TEST APPARATUS
Recommendations for future research in hypersonic instrumentation p 4 N94-10433
Velocity measurements in hypersonic flows: A review p 5 N94-10436
Flow visualization and spectroscopy in hypersonic flows: New trends p 5 N94-10437

HYPERSONIC VEHICLES
High temperature materials for hypersonic transport p 56 N94-10003
Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441
Joint computational and experimental aerodynamic research on a hypersonic vehicle p 6 N94-10445
Numerical methods for aerothermodynamic design of hypersonic space transport vehicles p 9 N94-10459

HYPERSONIC WIND TUNNELS
Experimental results in aerodynamic stability and control of a TSTO configuration p 3 N94-10424
New hypersonic test methods developed at ONERA: The R5 and F4 wind tunnels p 4 N94-10429

Pressure and force measurements on models set in hypersonic flows: A review p 5 N94-10435

Calculations of viscous nonequilibrium flows in nozzles p 8 N94-10455

Some experimental study and numerical simulation in wind tunnel flow p 8 N94-10457

HYPERSONICS

Recommendations for future research in hypersonic instrumentation p 4 N94-10433

Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820

An environmental study of the National Aerospace Plane
[AD-A266071] p 25 N94-10945

HYPERVELOCITY FLOW

Real gas and surface transpiration effects upon swept leading edge high speed flow including transition p 8 N94-10452

HYPERVELOCITY IMPACT

Dimensional scaling for impact cratering and perforation
[NASA-CR-188259] p 42 N94-10665

The magnitude of impact damage on LDEF materials
[NASA-CR-188258] p 43 N94-10666

Explicit 3D continuum fracture modeling with smooth particle hydrodynamics p 429 N94-12062

Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063

Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181

Projectile-target mixing in melted ejecta formed during a hypervelocity impact cratering event p 432 N94-12241

HYPERVELOCITY PROJECTILES

Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063

HYPERVOLEMIA

Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992

HYPOKINESIA

Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235

HYPOTENSION

Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992

HYPOTHERMIA

Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats
[AD-A265309] p 301 N94-11861

HYPOVOLEMIA

Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992

HYSTERESIS

A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114

The High Precision Thermostat HPT-HYDRA p 109 N94-10124

I

ICE

Wetting effects on nylon spheres engulfment in ice p 115 N94-10189

Paint removal and surface cleaning using ice particles p 128 N94-10626

A preliminary study on ice shape tracing with a laser light sheet
[NASA-TM-105964] p 174 N94-11132

Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O
[DE93-013590] p 76 N94-11244

Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738

Some results of the derivation of ice sheet elevations in Antarctica from ERS-1 altimeter data p 237 N94-11739

An observational search for CO2 ice clouds on Mars p 441 N94-12054

Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust p 462 N94-12168

The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars p 463 N94-12169

Porosity and the ecology of icy satellites p 431 N94-12186

ICE CLOUDS

An observational search for CO2 ice clouds on Mars p 441 N94-12054

ICE ENVIRONMENTS

Facts about the US Antarctic program
[NSF-92-134] p 279 N94-12568

ICE FLOES

Use of ERS-1 SAR to measure ice flux in the East Greenland current p 238 N94-11746

Ocean circulation revealed by ice floe tracking p 240 N94-11759

Modern shelf ice, equatorial Aeolis Quadrangle, Mars p 450 N94-12100

Ice studies in the Barents Sea by ERS-1 during SIZEX 1992 p 210 N94-12653

Disintegrating ice front of Shirase Glacier, East Antarctica p 210 N94-12654

ICE FORMATION

Icing of turbine intake louvers
[AD-A265714] p 29 N94-12274

ICE MAPPING

Utilisation of ERS-1 data for mapping of Antarctica p 237 N94-11740

Finnish ERS-1 Baltic Sea ice experiment in Winter 1992 p 239 N94-11750

Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology p 254 N94-12528

Pacific rim sea ice as observed with the NIMBUS-7 SMMR p 210 N94-12651

Ice studies in the Barents Sea by ERS-1 during SIZEX 1992 p 210 N94-12653

Disintegrating ice front of Shirase Glacier, East Antarctica p 210 N94-12654

Migration of operational ice analysis and forecasting to a workstation platform at the Joint Ice Center p 212 N94-12666

ICE PREVENTION

Icing of turbine intake louvers
[AD-A265714] p 29 N94-12274

ICE REPORTING

Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738

Preliminary evaluation of ERS-1 altimetry over Filchner-Ronne Ice Shelf, Antarctica p 238 N94-11742

Use of ERS-1 SAR to measure ice flux in the East Greenland current p 238 N94-11746

Greenland Sea observations p 239 N94-11752

Arctic sea ice microwave signature and geophysical processes study p 240 N94-11754

C-band SAR backscatter from ice on shallow tundra lakes: Observations and modelling p 240 N94-11755

Sea ice radar signatures from ERS-1 SAR during late Summer and Fall in the Beaufort and Chukchi Seas p 240 N94-11756

The seasonal Sea Ice Monitoring and Modelling Site (SIMMS): Using ERS-1 in climate research p 240 N94-11758

Ocean circulation revealed by ice floe tracking p 240 N94-11759

Preliminary evaluation of ERS-1 SAR data for operational use in the Canadian sea ice monitoring program p 241 N94-11760

Sea ice feature and type identification in merged ERS-1 SAR and LANDSAT Thematic Mapper imagery p 241 N94-11761

Summer Arctic ice concentrations and characteristics from SAR and SSM/I data p 241 N94-11762

Evaluating ERS-1 ice motion and classification products p 241 N94-11763

Pacific rim sea ice as observed with the NIMBUS-7 SMMR p 210 N94-12651

Ice studies in the Barents Sea by ERS-1 during SIZEX 1992 p 210 N94-12653

Migration of operational ice analysis and forecasting to a workstation platform at the Joint Ice Center p 212 N94-12666

ICOSAHEDRONS

Enhanced stability of magic clusters: A case study of icosahedric Al(sub 12)X, X=B, Al, Ga, C, Si, Ge, Ti, As
[DE93-613644] p 395 N94-10386

ICY SATELLITES

Porosity and the ecology of icy satellites p 431 N94-12186

Phase transitions and 2D spherical convection in a large icy satellite p 433 N94-12265

IDEAL FLUIDS

On the Sobolev systems with ellipsoid cavities
[DE92-641290] p 148 N94-10530

Discrete vortex representation of magnetohydrodynamics
[DE93-012190] p 393 N94-11669

The thermodynamics of the nonlinear shear flows p 169 N94-12728

IDENTIFYING

A hybrid neural network and feature extraction technique for target recognition
[AD-D015732] p 333 N94-12386

IGNEOUS ROCKS

Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga p 473 N94-12228

Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264

IGNITION

The intensity of knock in an internal combustion engine: An experimental and modeling study
[DE93-013089] p 177 N94-10322

A soft-start circuit for arcjet ignition
[NASA-TM-106287] p 180 N94-10760

Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788

A study of DC-DC converters with MCTs for arcjet power supplies
[NASA-CR-193457] p 142 N94-10931

Dielectric breakdown and its influence on ignition
[AD-A264925] p 78 N94-11855

IGNITION SYSTEMS

A soft-start circuit for arcjet ignition
[NASA-TM-106287] p 180 N94-10760

ILLUMINATING

Measurement and modeling of the stability of hydrogenated amorphous silicon solar cells and films after intense illumination p 263 N94-11638

Spatial light modulator having photosensitive and ferroelectric layers
[AD-D015731] p 404 N94-12400

ILMENITE

Thermodynamics of lunar ilmenite reduction p 415 N94-12028

Alkali-granitoids as fragments within the ordinary chondrite Adzhi-Bogdo: Evidence for highly fractionated, alkali-granitic liquids on asteroids p 429 N94-12069

Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247

IMAGE ANALYSIS

Particle image velocimetry technique: Calibration tests p 111 N94-10137

Introduction to Bayesian image analysis
[DE93-012628] p 347 N94-11006

Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539

Arctic coastal polynya observations with ERS-1 SAR and DMSP SSM/I p 239 N94-11748

Experiences from the Swedish sea ice programme during BEERS-1992 p 239 N94-11751

Preliminary evaluation of ERS-1 SAR data for operational use in the Canadian sea ice monitoring program p 241 N94-11760

Evaluating ERS-1 ice motion and classification products p 241 N94-11763

A consideration on principal component analysis of satellite IR data p 193 N94-11909

The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934

Automatic classification system for zooplankton p 203 N94-11969

Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048

Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097

Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234

Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

Preliminary studies on the application of ERS-1 data to topographic mapping p 246 N94-12476

Segmentation and change detection in ERS-1 images over East Anglia p 248 N94-12487

Further study of the Non-Regression-Coefficient SST retrieval method p 213 N94-12674

Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675

Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679

Application of NOAA AVHRR data to fisheries p 215 N94-12681

Remote sensing of polluting focal points and coastal disturbances in the Gulf of Arauco and adjacent bays, central Chile p 217 N94-12695

Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697

The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713

Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714

Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746

Radar observation of internal waves field in the north-west Pacific p 226 N94-12747

Analysis of interstellar fragmentation structure based on IRAS images [NASA-CR-193518] p 428 N94-12767

IMAGE CLASSIFICATION

Satellite inventory of Minnesota forest resources [NASA-CR-193565] p 231 N94-11521

Sea ice feature and type identification in merged ERS-1 SAR and LANDSAT Thematic Mapper imagery p 241 N94-11761

IMAGE CONTRAST

Measurement of display transfer characteristics using test pictures [BBC-RD-1992/13] p 133 N94-11023

IMAGE ENHANCEMENT

Oil spill detection using satellite-based SAR: Experience from a field experiment p 253 N94-12522

IMAGE FILTERS

Segmented land use classification of multitemporal ERS-1 SAR data using a majority filter p 245 N94-12472

IMAGE INTENSIFIERS

Characterization of a scannerless LADAR system [DE93-011582] p 174 N94-10959

Perceptual response to visual noise and display media [NASA-CR-193406] p 313 N94-11511

IMAGE MOTION COMPENSATION

ISAR motion compensation using the burst derivative measure as a focal quality indicator [AD-A265647] p 138 N94-12440

IMAGE PROCESSING

Physical optics modelling of Soft X ray Projection Lithography (SXPL) imaging experiments [DE93-011556] p 374 N94-10339

Model-based recognition of 3-D objects by geometric hashing technique [DE93-612916] p 322 N94-10410

Surface and near-surface atom imaging with photoelectron holography [DE93-013197] p 169 N94-10526

Test of a method for phase retrieval in HRTEM [DE93-612641] p 170 N94-10630

Subband/transform functions for image processing [NASA-TM-106183] p 323 N94-10639

A browse facility for Earth science remote sensing data: Center director's discretionary fund final report [NASA-TM-108413] p 419 N94-10723

Subroutine functions for generating animation data [DE93-767973] p 313 N94-10731

FFT-based methods for nonlinear image restoration in confocal microscopy [CS-9301] p 174 N94-10904

Introduction to Bayesian image analysis [DE93-012628] p 347 N94-11006

A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element [AD-A265490] p 339 N94-11049

Meteorological Satellite Center [MSC-TN-26] p 190 N94-11079

Fine tuning of stretched-VISSR image mapping p 190 N94-11080

A tool for generation of expert system shells [INPE-5493-TDI/510] p 325 N94-11181

Bayesian model for pictorial data fusion of satellite image [INPE-5457-TDI/499] p 345 N94-11193

Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197

A summary of image segmentation techniques [NASA-TM-104022] p 327 N94-11274

Atmospheric correction of AVIRIS data in ocean waters [AD-A264931] p 288 N94-11287

Spaceborne SAR study: LDRD 1992 [DE93-011485] p 232 N94-11623

Visual psychophysics of egomotion [AD-A265253] p 304 N94-11681

Sea ice feature and type identification in merged ERS-1 SAR and LANDSAT Thematic Mapper imagery p 241 N94-11761

A consideration on principal component analysis of satellite IR data p 193 N94-11909

Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934

Automatic classification system for zooplankton p 203 N94-11969

Atmospheric correction plans for SeaWiFS p 204 N94-11975

Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030

A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus p 455 N94-12126

A hybrid neural network and feature extraction technique for target recognition [AD-D015732] p 333 N94-12386

TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498

Simple and low cost image processing system for satellite remote sensing data p 212 N94-12669

Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675

Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679

Application of NOAA AVHRR data to fisheries p 215 N94-12681

Remote sensing of polluting focal points and coastal disturbances in the Gulf of Arauco and adjacent bays, central Chile p 217 N94-12695

Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697

The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713

Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714

Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738

Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746

Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753

IMAGE RECONSTRUCTION

FFT-based methods for nonlinear image restoration in confocal microscopy [CS-9301] p 174 N94-10904

Introduction to Bayesian image analysis [DE93-012628] p 347 N94-11006

The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068

Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753

IMAGE RESOLUTION

Characterization of a scannerless LADAR system [DE93-011582] p 174 N94-10959

A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element [AD-A265490] p 339 N94-11049

On resolution of underwater stereo photogrammetry p 172 N94-11966

Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189

Comparison of multiresolution techniques for digital signal processing [AD-A265364] p 138 N94-12406

IMAGERY

Integrating the services' imagery architectures [AD-A265487] p 171 N94-12335

IMAGES

Site dependence of the apparent shape of a molecule in STM images: Benzene on Pt(111) [AD-A263488] p 365 N94-11093

IMAGING SPECTROMETERS

SMM x ray polychromator [NASA-CR-193282] p 483 N94-11048

Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097

Galileo/NIMS near-infrared thermal imagery of the surface of Venus p 457 N94-12139

Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234

Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235

IMAGING TECHNIQUES

Particle image velocimetry technique: Calibration tests p 111 N94-10137

Physical optics modelling of Soft X ray Projection Lithography (SXPL) imaging experiments [DE93-011556] p 374 N94-10339

HRTEM in protein crystallography [DE93-610322] p 395 N94-10406

Interferometric and optical tests of water window imaging x ray microscopes [NASA-CR-193369] p 375 N94-10506

Wavelength considerations in soft x ray projection lithography [DE93-014115] p 381 N94-10651

Subroutine functions for generating animation data [DE93-767973] p 313 N94-10731

Imaging of magnetospheric dynamics using low energy neutral atom detection [DE93-012656] p 275 N94-10742

An electro-optical system for the measurement of strains p 186 N94-10900

Development of microstrip gas chamber and application to imaging gamma-ray detector [DE93-754294] p 34 N94-11041

Basic experiment on an ultrasonic method of localization [DE93-754295] p 358 N94-11042

A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element [AD-A265490] p 339 N94-11049

The superresolution effect observed through a random medium p 136 N94-11069

Design of CCD camera system for use inside electron beam furnace [DE93-009525] p 170 N94-11267

Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system [DE93-011879] p 143 N94-11273

A summary of image segmentation techniques [NASA-TM-104022] p 327 N94-11274

Relationship between IBICC imaging and SEU in CMOS ICs [DE93-009854] p 143 N94-11285

Use of ultrasound in altitude decompression modeling p 317 N94-11540

Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543

A compact, four-way image splitter [AD-A266107] p 382 N94-11656

High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA [DE93-011892] p 393 N94-11677

Feature association without a motion estimate [AD-A265162] p 138 N94-11891

Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295 [AD-A265674] p 369 N94-12379

ISAR motion compensation using the burst derivative measure as a focal quality indicator [AD-A265647] p 138 N94-12440

Development of the one-component diode-array velocimeter [AD-A265552] p 171 N94-12533

Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid) [AD-A265288] p 95 N94-12585

The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713

IMPACT DAMAGE

Dimensional scaling for impact cratering and perforation [NASA-CR-188259] p 42 N94-10665

The magnitude of impact damage on LDEF materials [NASA-CR-188258] p 43 N94-10666

Strain concentration assessment of laminates subjected to low velocity impact [AD-A264497] p 73 N94-11446

Giant impact-induced atmospheric blow-off p 435 N94-12019

Geophysical signature of the Pretoria saltpan impact structure and a possible satellite crater p 282 N94-12103

Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157

Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178

Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563

Prediction of alumina penetration
[DE93-014017] p 95 N94-12610

IMPACT LOADS
The 1991 version of the plume impingement computer program. Volume 2: User's input guide
[NASA-CR-194191] p 166 N94-12774

IMPACT MELTS
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
Strontium and oxygen isotope study of M-1, M-3 and M-4 drill core samples from the Manson impact structure, Iowa: Comparison with Haitian K-T impact glasses p 281 N94-12080
Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091
Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159
Post-impact alteration of the Manson impact structure p 282 N94-12188
The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197

IMPACT PREDICTION
Prediction of alumina penetration
[DE93-014017] p 95 N94-12610

IMPACT RESISTANCE
Energy transfer dynamics and impact sensitivity
[DE93-009551] p 98 N94-11269
Prediction of alumina penetration
[DE93-014017] p 95 N94-12610

IMPACT TESTS
An experimental investigation of high-speed water-entry for full-size and scale-model pointed nose vehicles
[DE93-008491] p 147 N94-10252
Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218

IMPACTORS
Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178

IMPEDANCE MATCHING
Design of a matching network for dipole antennas
[AD-A265115] p 136 N94-11158

IMPEDANCE MEASUREMENT
Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds
[DE93-010687] p 400 N94-11457

IMPINGEMENT
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement
[NASA-CR-193292] p 150 N94-10912
Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178
The 1991 version of the plume impingement computer program. Volume 2: User's input guide
[NASA-CR-194191] p 166 N94-12774
The 1991 version of the plume impingement computer program. Volume 1: Description
[NASA-CR-194192] p 166 N94-12775

IMPLOSIONS
Start-up imprinting and shock dynamics in laser-target interaction
[DE93-008051] p 172 N94-10150
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch
[DE93-012674] p 384 N94-10157
High-energy density physics at Los Alamos
[DE93-010271] p 371 N94-10260
Advanced concepts theory annual report 1992
[AD-A266132] p 393 N94-11474

IMPREGNATING
Dry in-line thermoplastic matrix impregnation, phase 1
[AD-A265016] p 67 N94-11221

IMPULSES
Momentum induced by laser-tissue interaction
[DE93-010737] p 301 N94-11667

IMPURITIES
Unsupervised splitting rules for neural tree classifiers
[AD-A264961] p 338 N94-10487
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Helium transport scaling law studies
[DE93-013487] p 393 N94-11513

IN SITU MEASUREMENT
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-193189] p 274 N94-10701
Localized and distributed fiber-optic strain sensors embedded in composite materials
[UTIAS-346] p 73 N94-12013

IN-FLIGHT MONITORING
In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427
Smart structures: A technology for next generation aircraft p 27 N94-11318
Smart materials for helicopter rotor active control p 27 N94-11321
The Satellite Attack Warning and Assessment Flight Experiment (SAWAFE) p 45 N94-11323
In-flight aircraft structure health monitoring based on smart structures technology p 22 N94-11333
Structural health monitoring using embedded fibre optic sensors p 22 N94-11334
Factors affecting the embedding of optical fibre sensors in advanced composite structures p 70 N94-11336
Aircraft smart structures research in the USAF Wright Laboratory p 72 N94-11343
Use of telescience for biomedical research during space flight p 305 N94-11791

INCIDENT RADIATION
Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576

INCINERATORS
High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment
[DE93-012430] p 72 N94-11368

INCLUSIONS
Creep deformation and mechanical properties of sintered glass and polycrystalline matrix composites p 67 N94-11315
The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052
Distribution of vanadium and melting of opaque assemblages in Efremovka CAI's p 282 N94-12141
The experimental production of matrix lumps within chondrules: Evidence of post-formational processes p 431 N94-12176
Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212
Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224
Micro-zoning in minerals of a Landes silicate inclusion p 432 N94-12231

INCOHERENT SCATTER RADAR
Telescience capability for the Sondre Stromfjord, Greenland, incoherent-scatter radar facility
[NASA-CR-193683] p 136 N94-11206

INCOHERENT SCATTERING
The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068

INCOMPRESSIBLE BOUNDARY LAYER
On nonlinear Tollmien-Schlichting/vortex interaction in three-dimensional boundary layers
[NASA-TM-106184] p 152 N94-11377

INCOMPRESSIBLE FLOW
Solving the inverse problem for incompressible potential flow through two-dimensional cascades
[NAL-TR-1162] p 147 N94-10365
The three-dimensional evolution of a plane wake p 159 N94-12310

INCOMPRESSIBLE FLUIDS
Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030
Uni-directional waves over slowly varying bottom. Part 1: Derivation of a KdV-type of equation
[MEMO-1098] p 147 N94-10275
Lee waves: Benign and malignant
[NASA-CR-186024] p 283 N94-10725

INDEXES (DOCUMENTATION)
Aeronautical engineering: A continuing bibliography with indexes (supplement 293)
[NASA-SP-7037(293)] p 1 N94-10420
Aeronautical engineering: A continuing bibliography with indexes (supplement 289)
[NASA-SP-7037(289)] p 1 N94-11687
Aeronautical engineering: A continuing bibliography with indexes (supplement 291)
[NASA-SP-7037(291)] p 1 N94-11690
Aeronautical engineering: A continuing bibliography with indexes (supplement 290)
[NASA-SP-7037(290)] p 1 N94-11691
Directory of IAEA databases
[DE93-622837] p 420 N94-11818

INDIAN OCEAN
Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719
Satellite derived sea surface temperature applications for Indian Ocean resources development p 193 N94-11907
Acoustic waveguide characteristics of the Indian Ocean north of equator p 193 N94-11912

INDIUM ANTIMONIDES
Measurement of the thermal conductivity of molten InSb in a drop shaft p 105 N94-10102
Crack suppression in GaInSb buffer layers initially under tensile stress
[DE93-012839] p 396 N94-10745
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843

INDIUM ARSENIDES
Crack suppression in GaInSb buffer layers initially under tensile stress
[DE93-012839] p 396 N94-10745
Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845

INDIUM GALLIUM ARSENIDES
Crack suppression in GaInSb buffer layers initially under tensile stress
[DE93-012839] p 396 N94-10745
InGaAs concentrator cells for laser power converters and tandem cells p 50 N94-11394
An indium gallium arsenide charge-coupled device (CCD) for 1-3 micron imaging
[AD-A266134] p 401 N94-11476

INDIUM PHOSPHIDES
Radiation effects in heteroepitaxial InP solar cells p 48 N94-11383
Progress in p(+)n InP solar cells fabricated by thermal diffusion p 48 N94-11384
Electrochemical characterization of p(+)n and n(+)p diffused InP structures p 49 N94-11385
Surface passivation of InP solar cells with InAlAs layers p 49 N94-11389
Heteroepitaxial InP, and ultrathin, directly glassed, GaAs 3-5 solar cells p 52 N94-11406
The UoSAT-5 solar cell experiment: First year in orbit p 53 N94-11409
Workshop on Heteroepitaxial InP Solar Cells p 54 N94-11414
Diffusion length damage coefficient and annealing studies in proton-irradiated InP
[NASA-TM-106262] p 404 N94-12430

INDONESIA
The use of remote sensing data for coastal zone management and environment in Indonesia p 196 N94-11927
Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989

INDONESIAN SPACE PROGRAM
Space program in Indonesia p 36 N94-10681

INDUCTANCE
Assessment of the impact of HTSC's on superconducting fault-current limiters
[DE93-009986] p 143 N94-11454

INDUSTRIAL MANAGEMENT
Integrating the services' imagery architectures
[AD-A265487] p 171 N94-12335

INDUSTRIAL PLANTS
Toxic chemical release inventory reporting Form R and instructions. Revised 1992 version. Section 313 of the Emergency Planning and Community Right-to-Know Act
[PB93-194140] p 264 N94-10836
Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point
[AD-A265164] p 145 N94-11884

INDUSTRIAL SAFETY
Health and safety issues for aerospace workers in the use of advanced materials p 21 N94-10795

INDUSTRIAL WASTES
Toxic chemical release inventory reporting Form R and instructions. Revised 1992 version. Section 313 of the Emergency Planning and Community Right-to-Know Act
[PB93-194140] p 264 N94-10836

INDUSTRIES
Survey to determine the value of DYNA
[DE93-012390] p 321 N94-10267
Pattern of federal procurement from minority and women-owned small business
[PB93-189355] p 417 N94-11844
Optoelectronic technology consortium
[AD-A265691] p 383 N94-12444

INEQUALITIES
On cell entropy inequality for discontinuous Galerkin methods
[NASA-CR-191493] p 345 N94-11280
Bounding the Vapnik-Chervonenkis dimension of concept classes parameterized by real numbers
[DE93-011600] p 331 N94-11611

INERTIA
Martian particle size based on thermal inertia corrected for elevation-dependent atmospheric properties
p 430 N94-12107

INERTIAL CONFINEMENT FUSION
High-energy density physics at Los Alamos
[DE93-010271] p 371 N94-10260

INFECTIOUS DISEASES
Tropical medicine: Telecommunications and technology transfer p 305 N94-11793

INFORMATION DISSEMINATION
Performances of a date dissemination code on telephone lines using commercial modems
p 139 N94-10984
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 17: A comparison of the technical communication practices of Dutch and US aerospace engineers and scientists
[NASA-TM-108987] p 419 N94-11352
Marslink p 438 N94-12034
An integrated approach to total end-to-end quality control of ocean data in the real-time environment
p 211 N94-12662

INFORMATION FLOW
PANACEA user's manual for PANACEA version 2.0
[DE93-012502] p 321 N94-10263
Design for testability and diagnosis at the system-level
p 184 N94-11563

INFORMATION MANAGEMENT
Software management guide
[DE93-012034] p 330 N94-11452
Information resources management long-range plan, FY1994
[DE93-013898] p 420 N94-11588
COSMIC monthly progress report
[NASA-CR-194400] p 332 N94-11688
Information resources management plan of the Federal Government
[ISBN-0-16-037895-8] p 421 N94-12014
Defense: Health care
[AD-A265914] p 421 N94-12445
An integrated approach to total end-to-end quality control of ocean data in the real-time environment
p 211 N94-12662
Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780

INFORMATION PROCESSING (BIOLOGY)
Functional reasoning, explanation, and analysis
[DE92-526832] p 313 N94-10251
Automaticity of processing location versus identity information in brief visual displays
[AD-A265013] p 418 N94-10491

INFORMATION RETRIEVAL
The First Text Retrieval Conference (TREC-1)
[PB93-191641] p 419 N94-10829

INFORMATION SYSTEMS
Software usability assessment guide
[AD-A265017] p 321 N94-10335
Acting to gain information
[NASA-CR-193399] p 418 N94-10515
US Coast Guard GPS Information Center (GPSIC) and its function within the Civil GPS Service (CGS)
p 24 N94-10966
A real-time spoken-language system for interactive problem solving
[AD-A266046] p 324 N94-11104
Design issues for high performance engineering information systems
[AD-A264839] p 420 N94-11520
Information resources management long-range plan, FY1994
[DE93-013898] p 420 N94-11588
COSMIC monthly progress report
[NASA-CR-194400] p 332 N94-11688
Medical informatics and telemedicine: A vision
p 305 N94-11788
Use of satellite telecommunications for telemedicine
p 308 N94-11807
Directory of IAEA databases
[DE93-622837] p 420 N94-11818
Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928
Information resources management plan of the Federal Government
[ISBN-0-16-037895-8] p 421 N94-12014
Marslink p 438 N94-12034
Defense: Health care
[AD-A265914] p 421 N94-12445

INFORMATION THEORY
The theory for, and demonstration of, information theory applied to radar target identification
[DE93-006393] p 132 N94-10315
Symbolic dynamics and description of complexity
[DE93-613030] p 418 N94-10485
Acting to gain information
[NASA-CR-193399] p 418 N94-10515
Generalised squeezing and information theory approach to quantum entanglement p 377 N94-10580
Information entrophy via Glauber's Q-representation
p 378 N94-10592
Automatic word categorization: An information-theoretic approach
[CS-9209] p 419 N94-10903
Design for testability and diagnosis at the system-level
p 184 N94-11563
Bounding the Vapnik-Chervonenkis dimension of concept classes parameterized by real numbers
[DE93-011600] p 331 N94-11611

INFORMATION TRANSFER
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 17: A comparison of the technical communication practices of Dutch and US aerospace engineers and scientists
[NASA-TM-108987] p 419 N94-11352

INFRARED ASTRONOMY
Refrigerator utilization in infrared astronomy
p 130 N94-11838
First results of the seven-color asteroid survey
p 430 N94-12162
Analysis of interstellar fragmentation structure based on IRAS images
[NASA-CR-193518] p 428 N94-12767
Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

INFRARED ASTRONOMY SATELLITE
Analysis of IRAS solar system dust data
[NASA-CR-193704] p 483 N94-10949
Analysis of interstellar fragmentation structure based on IRAS images
[NASA-CR-193518] p 428 N94-12767

INFRARED DETECTORS
Development and testing of a superconducting link for an IR detector
[NASA-CR-193674] p 170 N94-10948
Trouble areas in the IRT measurement of the Earth surface temperature p 193 N94-11910
Superconducting SQUID amplifiers for IR detectors and other applications, phase 2
[AD-A265447] p 145 N94-12333
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375
An interferometric spectral mapper for the Cassini mission to Saturn and Titan
[NASA-CR-193805] p 482 N94-12429

INFRARED IMAGERY
Fine tuning of stretched-VISSR image mapping
p 190 N94-11080
Simulation of images of water vapor channel and infrared split channel p 190 N94-11081
Atmospheric correction of AVIRIS data in ocean waters
[AD-A264931] p 288 N94-11287
An indium gallium arsenide charge-coupled device (CCD) for 1-3 micron imaging
[AD-A266134] p 401 N94-11476
The morphologies of distant radio galaxies
p 426 N94-11597
A consideration on principal component analysis of satellite IR data p 193 N94-11909
Thermal studies of Martian channels and valleys using Termoskan data p 443 N94-12064
Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097
Galileo/NIMS near-infrared thermal imagery of the surface of Venus p 457 N94-12139
The relationship between skin and bulk sea surface temperatures p 221 N94-12716
Mapping of high density area of benthic diatom in Ariake Sea p 222 N94-12720
Analysis of interstellar fragmentation structure based on IRAS images
[NASA-CR-193518] p 428 N94-12767
Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

INFRARED INSTRUMENTS
An indium gallium arsenide charge-coupled device (CCD) for 1-3 micron imaging
[AD-A266134] p 401 N94-11476

INFRARED RADIATION
The morphologies of distant radio galaxies
p 426 N94-11597
A consideration on principal component analysis of satellite IR data p 193 N94-11909

INFRARED RADIOMETERS
Proceedings of 1st ERS-1 Symposium on Space at the Service of Our Environment, Volume 2
[ESA-SP-359-VOL-2] p 245 N94-12471
ATSR correlative skin measurements of sea surface temperature p 252 N94-12514
Validation of ATSR-1 using aircraft radiometer measurements over the South Atlantic
p 252 N94-12515
A user appraisal of ATSR near-real-time products
p 252 N94-12516
Cloud studies using ATSR data p 253 N94-12517
A comparison of ATSR and shipboard radiometer SST measurements along transects between the UK and the Antarctic p 253 N94-12518
Preliminary validation of ATSR sea surface temperatures near the Faeroes p 253 N94-12519
Statistical features of mesoscale eddies at the Kuroshio front p 215 N94-12682

INFRARED REFLECTION
A vibrational spectroscopic study of the structure of electroactive self-assembled monolayers of viologen derivatives
[AD-A265705] p 78 N94-12273

INFRARED SCANNERS
METEOSAT second generation programme SEVIRI: An enhanced visible and IR radiometer for meteorology
p 212 N94-12667

INFRARED SPECTRA
On renormalization group flow in matrix model
[DE93-613050] p 409 N94-10413
The IR properties of ringed galaxies and the IRAS database
[NASA-CR-194286] p 426 N94-11590
Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030
A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053
The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs
p 445 N94-12071
Spatial variation in the seasonal south polar cap of Mars as observed by Mariner 7 p 456 N94-12134
Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234
A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245
A vibrational spectroscopic study of the structure of electroactive self-assembled monolayers of viologen derivatives
[AD-A265705] p 78 N94-12273
Examination of the surface second harmonic response at infrared wavelengths
[AD-A265206] p 403 N94-12371
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A265797] p 93 N94-12380
Atmospheric and spectroscopic research in the far infrared
[NASA-CR-193551] p 280 N94-12582

INFRARED SPECTROMETERS
Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234

INFRARED SPECTROSCOPY
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces
p 81 N94-12156
Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184
Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235
A novel test method for fuel thermal stability
[AD-A265853] p 99 N94-12275
Atmospheric and spectroscopic research in the far infrared
[NASA-CR-193551] p 280 N94-12582
Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756

INFRARED TELESCOPES
An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008
Refrigerator utilization in infrared astronomy
p 130 N94-11838

INJECTION
Titanium alloys milling assistance by high pressure lubricoolant jet
[DE93-013302] p 82 N94-11008

INJECTION MOLDING
Physical properties of injection molded liquid crystal polymers and high temperature engineering polymers
[AD-A264912] p 87 N94-10508

INJECTORS
Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938
Shear coaxial injector atomization phenomena for combusting and non-combusting conditions
[NASA-CR-193339] p 152 N94-11526
INLAND WATERS
ERS-1 altimetry of inland water and land
p 246 N94-12475
Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744
INLET FLOW
A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct
[NASA-TM-106250] p 39 N94-10764
INORGANIC CHEMISTRY
Publications/Patents/Presentations/Honors/Student eport
[AD-A265136] p 78 N94-11873
INSECTS
HRTEM in protein crystallography
[DE93-610322] p 395 N94-10406
INSOLATION
Satellite-derived photosynthetically available and total solar irradiance at the surface during FIFE's intensive field campaigns p 230 N94-10954
INSPECTION
Special problems of 3-D ultrasonic QNDI techniques and applications to composites aerospace structures
p 61 N94-10036
Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it
p 61 N94-10037
A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience
[AGARD-LS-190] p 28 N94-11022
Vigilance problems in orbiter processing
p 314 N94-11536
INSTANTONS
Generalized spin systems and sigma-models
[DE93-613981] p 410 N94-10802
INSTRUCTORS
Career Information in the Mathematical Sciences (CIMS)
[DE93-013780] p 318 N94-11817
INSTRUMENT APPROACH
The Memphis Precision Runway Monitor Program Instrument Landing System final approach study
[AD-A266035] p 23 N94-11103
A comparison of head-up and head-down display formats during instrument flying tasks
[AD-A266140] p 316 N94-11642
FAA air traffic activity
[AD-A266043] p 22 N94-12397
INSTRUMENT ERRORS
Particle image velocimetry technique: Calibration tests
p 111 N94-10137
INSTRUMENT FLIGHT RULES
A comparison of head-up and head-down display formats during instrument flying tasks
[AD-A266140] p 316 N94-11642
INSTRUMENT LANDING SYSTEMS
The Memphis Precision Runway Monitor Program Instrument Landing System final approach study
[AD-A266035] p 23 N94-11103
Evaluation of the C/EC/KC-135 ground collision avoidance system (GCAS), Study 2
[AD-A265193] p 24 N94-11879
INSULATION
On the mechanical development of the Flexible External Insulation (FEI) for Hermes spaceplane
p 62 N94-10048
Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431
The fire properties of insulation bags, as installed and after aircraft operations p 19 N94-10778
INTAKE SYSTEMS
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions
[AD-A265275] p 150 N94-11014
INTEGRAL EQUATIONS
Numerical method of singular problems on singular integrals
[DE93-613654] p 343 N94-10546
The nonlinear evolution of modes on unstable stratified shear layers
[NASA-CR-191492] p 149 N94-10810
Design of a continuous resistively loaded monopole antenna
[AD-A265852] p 138 N94-12281
INTEGRALS
Floquet operator as integral of motion
p 380 N94-10610
Divergences in the moduli space integral and accumulating handles in the infinite-genus limit
[DE93-619722] p 346 N94-11693
INTEGRATED CIRCUITS
Continuous-time adaptive learning circuit
[AD-D015773] p 140 N94-10384
Method for producing a hybridization of detector array and integrated circuit for readout
[NASA-CASE-NPO-18062-1-CU] p 141 N94-10656
Semiconductor ring lasers
[DE93-012386] p 174 N94-11005
Lecture note on circuit technology for high energy physics experiment
[DE93-771422] p 372 N94-11245
Relationship between IBICC imaging and SEU in CMOS ICs
[DE93-009854] p 143 N94-11285
ENSAFE fireset flex circuit analysis
[DE93-013106] p 144 N94-11478
Programmable logic devices
[DE93-013117] p 144 N94-11479
An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651
Resist materials design: Base-catalyzed chemical amplification
[AD-A265286] p 145 N94-11819
Gallium arsenide dynamic random access memory support circuitry
[AD-A265176] p 320 N94-11875
Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point
[AD-A265164] p 145 N94-11884
Limited bandwidth microwave filter
[AD-D015744] p 145 N94-12322
An optoelectronic graphics display processor
[AD-A266011] p 171 N94-12391
Optoelectronic technology consortium
[AD-A265691] p 383 N94-12444
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773
INTEGRATED OPTICS
Spatial light rebroadcaster architecture study
[AD-A266102] p 382 N94-11421
INTEGRATORS
Continuous-time adaptive learning circuit
[AD-D015773] p 140 N94-10384
INTELLIGENCE
Integrating the services' imagery architectures
[AD-A265487] p 171 N94-12335
INTELSAT SATELLITES
Applications of the INTELSAT system to remote health care p 306 N94-11794
INTERACTIONAL AERODYNAMICS
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover
[NASA-CR-4532] p 13 N94-10758
Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626
VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation
[CUED/A-TURBO/TR.129] p 166 N94-12779
INTERATOMIC FORCES
Non-empirical interatomic potentials for transition metals
[DE93-013705] p 365 N94-11011
Interatomic interactions in BCC and FCC lattices of transition metals
[DE93-621541] p 398 N94-11090
A new decomposition strategy for parallel bonded molecular dynamics
[DE93-009839] p 366 N94-11284
INTERCALATION
Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds
[DE93-010687] p 400 N94-11457
INTERFACE STABILITY
Fluid-fluid interfacial instabilities induced by gravity
p 121 N94-10229
INTERFACES
The combined influence of anticonvective and thermocapillary mechanisms on the stability of systems with interface p 121 N94-10223
INTERFACIAL TENSION
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1
[ESA-SP-333-VOL-1] p 99 N94-10070
The formation and breakage of liquid bridges under microgravity p 100 N94-10071
Non-linear liquid bridge dynamics p 100 N94-10074
Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075
Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries
p 101 N94-10077
Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity
p 101 N94-10079
Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system)
p 101 N94-10082
Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083
Liquid bridges and floating zones p 102 N94-10085
Surface-tension driven convection in finite-size containers p 103 N94-10090
Gas-liquid jets under reduced gravity conditions
p 103 N94-10091
Coupled thermogravitational and thermocapillary convection in a two-layer fluid system
p 105 N94-10101
Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108
Solidification in immiscible systems: The influence of processing conditions on resulting microstructures
p 112 N94-10174
Thermophysical properties of undercooled liquid metals p 86 N94-10190
Marangoni-driven solitary waves p 119 N94-10214
Surface tension and adsorption kinetics in immiscible liquid systems at microgravity p 121 N94-10225
Marangoni instability in a liquid layer with two free surfaces
[NASA-TM-106166] p 152 N94-11376
Interfacial modification through end group complexation in polymer blends
[AD-A265887] p 93 N94-12340
INTERFERENCE
Interference photocathode
[AD-D015770] p 132 N94-10382
INTERFERENCE GRATING
Analysis of the alignment of a Schlieren system for tele-operation p 111 N94-10140
INTERFEROMETERS
A fiber optic network system with low crosstalk using code-division multiplexing
[AD-D015763] p 374 N94-10376
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems
[AD-A265075] p 382 N94-11653
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851
An interferometric spectral mapper for the Cassini mission to Saturn and Titan
[NASA-CR-193805] p 482 N94-12429
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732
INTERFEROMETRY
Interferometry with particles of non-zero rest mass
[DE93-613518] p 409 N94-10501
Interferometric and optical tests of water window imaging x ray microscopes
[NASA-CR-193369] p 375 N94-10506
An electro-optical system for the measurement of strains p 186 N94-10900
Fiber-optic interferometric strain gauge for smart structures applications: First flight tests
p 71 N94-11340
Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734
SAR interferometry experiments with ERS-1
p 237 N94-11735
SAR-interferometry applying ERS-1: Some preliminary test results p 237 N94-11736
The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496
INTERMETALLICS
The microstructure and mechanical properties of hot worked FeAl intermetallic alloys p 58 N94-10020
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205
Bibliography on Hot Isostatic Pressing (HIP) technology
[AD-A265668] p 81 N94-10297
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713

Production of reactive sintered nickel aluminide
[DE93-014434] p 83 N94-11127
Interface considerations in Al2O3/NiAl composite
[NASA-CR-191167] p 66 N94-11202
X ray absorption spectroscopy of electrochemically generated species
[AD-A264749] p 77 N94-11265
Experimental studies of the structure of grain boundaries
[DE93-013979] p 402 N94-11700
NiAl alloys for structural uses
[NASA-CR-194113] p 85 N94-12447

INTERMITTENCY
Homoclinic intermittency
[W-9302] p 344 N94-10908

INTERMOLECULAR FORCES
Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010

INTERNAL COMBUSTION ENGINES
The intensity of knock in an internal combustion engine: An experimental and modeling study
[DE93-013089] p 177 N94-10322
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles
[DE93-010770] p 182 N94-11438
Ceramics technology project database
[DE93-012431] p 91 N94-11672
Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

INTERNAL PRESSURE
Schlieren photographs and internal pressure distributions for three-dimensional sidewall-compression scramjet inlets at a Mach number of 6 in CF4
[NASA-TM-4479] p 148 N94-10644

INTERNAL WAVES
Submarine internal waves
[MRL-GD-0049] p 98 N94-11303
Accretion disk viscosity and internal waves in disks
p 153 N94-11615
Shear, strain and thermohaline vertical fine structure in the upper ocean
[AD-A265961] p 289 N94-12348
Radar observation of internal waves field in the north-west Pacific p 226 N94-12747
Generation of internal waves near the shelf boundary
p 229 N94-12763
Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

INTERNATIONAL COOPERATION
Considerations for future regional space cooperation
p 35 N94-10678
International Space Year in China p 36 N94-10680
PARTNERS p 38 N94-10695
International disaster research p 307 N94-11805
AGARD highlights 92/2, September 1992
[AGARD-HIGHLIGHTS-92/2] p 497 N94-11820
ESA Costing Software (ECOS) introduction
[ESA-F-28] p 333 N94-12383

INTERNATIONAL RELATIONS
Landsat as a commercial enterprise
[INPE-5477-TAE/019] p 232 N94-11524

INTERNATIONAL SPACE YEAR
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
Current status of space activities in Asia Pacific region
p 35 N94-10677
Considerations for future regional space cooperation
p 35 N94-10678
Space research and remote sensing programmes in Bangladesh p 35 N94-10679
International Space Year in China p 36 N94-10680
Space program in Indonesia p 36 N94-10681
Japanese space activities p 36 N94-10682
Thailand ISY activities p 37 N94-10690
National space program in Australia
p 37 N94-10691
Canada's longterm space plan and ISY activities
p 37 N94-10692
Pakistan Space and Upper Atmosphere Research Commission p 37 N94-10693
PARTNERS p 38 N94-10695

INTERPLANETARY DUST
Analysis of IRAS solar system dust data
[NASA-CR-193704] p 483 N94-10949
Detection of dust impacts by the Voyager planetary radio astronomy experiment
[NASA-CR-193281] p 423 N94-11305
Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045
Using solar flare track densities to determine the origin of interplanetary dust particles p 429 N94-12078
Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles
p 429 N94-12098
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099
Volatiles in fourteen interplanetary dust particles: A comparison with CI and CM chondrites
p 430 N94-12132
Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles
p 431 N94-12167
Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199
Organic matter on the early surface of Mars: An assessment of the contribution by interplanetary dust
p 480 N94-12259
Trace element content of chondritic cosmic dust: Volatile enrichments, thermal alterations, and the possibility of contamination p 433 N94-12260
Depletions of sulfur and/or zinc in IDPs: Are they reliable indicators of atmospheric entry heating?
p 433 N94-12261
New low-Ni (igneous?) particles among the C and C? types of cosmic dust p 433 N94-12262

INTERPLANETARY MEDIUM
The influence of the propagation medium on the sensitivity and resolution of meter wavelength aperture synthesis systems p 134 N94-11062
The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068

INTERPOLATION
A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study
[AD-A264805] p 152 N94-11519

INTERPROCESSOR COMMUNICATION
Bringing theory to practice: The reality of interprocessor communication
[DE93-012346] p 336 N94-10738
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL)
[NASA-TM-106238] p 327 N94-11232

INTERSTELLAR GAS
Radiowaves propagation through inhomogeneous interstellar plasma p 134 N94-11061
Interstellar scattering and the selection of extragalactic radiosources with highly compact components
p 134 N94-11063
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds
p 426 N94-11582
ADP study of the structure of the IUE halo
[NASA-CR-194374] p 428 N94-12595

INTERSTELLAR MAGNETIC FIELDS
Are cosmic rays effective for ionization of the solar nebula? p 472 N94-12220

INTERSTELLAR MATTER
Intraday variability and the compactness of extragalactic radio sources p 135 N94-11064
Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065
VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066
Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029
Identification of cometary and asteroidal particles in stratospheric IDP collections p 430 N94-12115

INTERSTITIALS
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819

INVARIANCE
On parity conservation and the question of the missing, right-handed neutrino
[DE93-613092] p 361 N94-10414

INVENTORIES
Satellite inventory of Minnesota forest resources
[NASA-CR-193565] p 231 N94-11521

INVERSE KINEMATICS
Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics
[DE93-012823] p 340 N94-12543

INVERSE SCATTERING
P-matrix description of the two-particle interaction
[DE93-617690] p 361 N94-10549

INVERTERS
Experimental and theoretical investigations of Cs-Ba vapor tacitron inverter for power conditioning in space power systems
[DE93-012971] p 48 N94-11372

INVISCID FLOW
Numerical simulation of the flow through a scramjet engine p 3 N94-10425
On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462
A comparison of high resolution upwind solvers on 3-D inviscid hypersonic flows p 10 N94-10463
High order accurate solutions of viscous problems
[NASA-TM-106267] p 151 N94-11253
Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314
Computational methods for problems in aerodynamics using parallel and vector architectures
[AD-A265626] p 16 N94-12377

IO
Sources of Na for the Io atmosphere
p 455 N94-12127

IODIDES
Conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace
p 117 N94-10201

IODINE COMPOUNDS
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation
[DE93-617173] p 397 N94-10830

IODINE ISOTOPES
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation
[DE93-617173] p 397 N94-10830
Studies of the release of radiogenic Xe-129 from Bjurboele: Evidence against simple diffusion models
p 430 N94-12125

ION ACCELERATORS
An experimental program for collective acceleration of ions using intense relativistic electron beams
[DE93-612205] p 371 N94-10316
Report of the third Seminar on Nuclear Physics at the Energy Region of the JAERI Tandem-Booster Accelerator
[DE93-754330] p 372 N94-11043
Performance characteristics of the INS 25.5-MHz split coaxial RFQ
[DE93-753168] p 144 N94-11508

ION BEAMS
Photodetachment studies on few-electron atomic negative ions
[DE93-008474] p 358 N94-10154
An experimental program for collective acceleration of ions using intense relativistic electron beams
[DE93-612205] p 371 N94-10316
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode
[DE93-620977] p 387 N94-10541
Dynamics of ion acceleration in electron flux by a virtual cathode potential
[DE93-620978] p 371 N94-10542
Comparison of hydrodynamic and semi-kinetic treatments for plasma flow along closed field lines
[NASA-CR-193589] p 387 N94-10641
Nonperturbative methods in HZE ion transport
[NASA-TP-3363] p 484 N94-10759
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848
Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849
Wave generation by contaminant ions
[NASA-CR-193558] p 364 N94-10946
Short wavelength crystal fiber devices
[AD-A265716] p 176 N94-12402
Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL
[DE93-013430] p 95 N94-12602
Ion shaking in the 200 MeV XLS-ring
[DE93-014057] p 374 N94-12782

ION CONCENTRATION
Size dependence of chemical reactivity of gaseous metal clusters: A new mechanistic probe
[AD-A264690] p 77 N94-11264

ION CYCLOTRON RADIATION
Ionization potentials of small carbon clusters
[AD-A264379] p 67 N94-11260
Conversion of the four-strap array in D3-D to a tunable traveling wave antenna
[DE93-012085] p 137 N94-11453

ION DENSITY (CONCENTRATION)
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232

ION ENGINES
Characterization of in-flight performance of ion propulsion systems
[NASA-TM-106283] p 46 N94-10761

ION EXCHANGING
Aluminum and membrane channels
[AD-A265241] p 300 N94-11020

ION MICROSCOPES
Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379

ION MOTION
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848

ION PROPULSION
Characterization of in-flight performance of ion propulsion systems
[NASA-TM-106283] p 46 N94-10761
ION SCATTERING
Theoretical atomic physics for fusion
[DE93-013872] p 366 N94-11172
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232
IONIC COLLISIONS
Photodetachment studies on few-electron atomic negative ions
[DE93-008474] p 358 N94-10154
Production of strange clusters in relativistic heavy ion collisions
[DE93-010876] p 359 N94-10303
Relativistic heavy-ion collisions
[DE93-014844] p 366 N94-11147
Momentum and heat frictions between fast ions and thermal plasma species
[DE93-771240] p 390 N94-11149
Theoretical atomic physics for fusion
[DE93-013872] p 366 N94-11172
Relativistic heavy ion research
[DE93-013127] p 367 N94-11373
Pion correlations and calorimeter design for high energy heavy ion collisions
[DE93-013861] p 373 N94-12607
IONIZATION
Integrated cross sections for the ionisation of atomic hydrogen by electron impact
[DE93-610179] p 359 N94-10311
Theoretical atomic physics for fusion
[DE93-013872] p 366 N94-11172
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
A thermal ionization model for the sustaining phase of lock-on in GaAs
[DE93-011558] p 144 N94-11624
IONIZATION CHAMBERS
Post-launch analysis of data from the High Energy Astrophysical Observatory Heavy Nuclei Experiment (HEAO-C3)
[NASA-CR-193513] p 484 N94-11486
IONIZATION CROSS SECTIONS
Integrated cross sections for the ionisation of atomic hydrogen by electron impact
[DE93-610179] p 359 N94-10311
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV
[DE93-610180] p 359 N94-10312
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662
Progress in zirconium resonance ionization spectroscopy
[DE93-011881] p 76 N94-11075
Electronic excitation of ground state atoms by collision with heavy gas particles
[NASA-CR-193364] p 366 N94-11360
IONIZATION POTENTIALS
Ionization potentials of small carbon clusters
[AD-A264379] p 67 N94-11260
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
IONIZING RADIATION
Nonperturbative methods in HZE ion transport
[NASA-TP-3363] p 484 N94-10759
IONOGRAMS
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
IONOSONDES
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
IONOSPHERIC CURRENTS
Observing and modelling F-region ionospheric dynamics using the (O2) 7320A emission
[AD-A265407] p 279 N94-12419
IONOSPHERIC DISTURBANCES
Effects of energetic particle events on VLF/LF propagation parameters/1989
[AD-A265266] p 275 N94-11013
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
IONOSPHERIC ION DENSITY
Observing and modelling F-region ionospheric dynamics using the (O2) 7320A emission
[AD-A265407] p 279 N94-12419
IONOSPHERIC PROPAGATION
Some results with the new digital ionosonde in San Diego
[AD-A265178] p 275 N94-11101
One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere
[DE93-009517] p 137 N94-11466
IONS
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode
[DE93-620977] p 387 N94-10541
Dynamics of ion acceleration in electron flux by a virtual cathode potential
[DE93-620978] p 371 N94-10542
Wave generation by contaminant ions
[NASA-CR-193558] p 364 N94-10946
Tandem mass spectrometric analysis of phosphate esters
[AD-A265483] p 78 N94-12009
Role of spatially distributed ion channels in single neuron computation
[AD-A265972] p 79 N94-12351
Ion shaking in the 200 MeV XLS-ring
[DE93-014057] p 374 N94-12782
IOWA
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core
p 281 N94-12056
IRAN
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation
p 219 N94-12704
IRIDIUM
Surface-enhanced raman spectroscopy of electroactive films of C60 and an Ir-C60 complex on gold: Symmetry lowering, electron localization, and counteraction effects
[AD-A265934] p 396 N94-10705
IRON
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Chemical weathering on Mars: Rate of oxidation of iron dissolved in brines p 455 N94-12128
Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations
p 476 N94-12242
IRON ALLOYS
Comparison of Al-Fe alloys produced by PFC and USGA techniques p 58 N94-10019
The microstructure and mechanical properties of hot worked FeAl intermetallic alloys p 58 N94-10020
Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204
Monte Carlo simulations of phase transformations in Fe-Cr alloys
[DE93-013847] p 81 N94-10522
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168
In situ XANES studies of the passive film on Fe and Fe-26Cr
[DE93-010869] p 84 N94-11459
NiAl alloys for structural uses
[NASA-CR-194113] p 85 N94-12447
IRON COMPOUNDS
Measuring and distinguishing compositional and maturity properties of lunar soils by remote VIS-NIR spectroscopy p 478 N94-12251
IRON ISOTOPES
Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199
IRON METEORITES
Calorimetric thermometry of meteoritic troilite: A feasibility study p 428 N94-12025
Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182
Trace element distributions in primitive achondrites
p 431 N94-12200
Re-Os dating of 3AB iron meteorites
p 432 N94-12237
Cronstedtite and iron sulfide mineralogy of CM-type carbonaceous chondrites from cryogenic Moessbauer spectra p 433 N94-12257
IRON OXIDES
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055
Cathodoluminescence properties of components in enstatite chondrites p 432 N94-12206
IRRADIANCE
Studies of the net surface radiative flux from satellite radiances during FIFE
[NASA-CR-193150] p 230 N94-10953
Satellite-derived photosynthetically available and total solar irradiance at the surface during FIFE's intensive field campaigns p 230 N94-10954
Optical characteristics in Tokyo Bay
p 204 N94-11972
IRRADIATION
On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys
[DE93-617200] p 82 N94-10842
The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity
[DE93-013102] p 389 N94-11114
Effect of switched-bias bakes on the postirradiation electrical response of MOS devices
[DE93-009629] p 143 N94-11271
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system
[DE93-011879] p 143 N94-11273
A detailed study of the photo-injection annealing of thermally diffused InP solar cells p 48 N94-11381
High temperature annealing of minority carrier traps in irradiated MOCVD n(+)p InP solar cell junctions
p 48 N94-11382
Radiation effects in heteroepitaxial InP solar cells
p 48 N94-11383
Development of plastic capsule for research reactor irradiation
[DE93-753186] p 372 N94-11591
Radiation-induced aperiodicity in irradiated ceramics
[DE93-013335] p 91 N94-11698
Natural thermoluminescence profiles in lunar cores and implications for meteorites p 443 N94-12060
NMR characterization of polymers formed in diazotizing mixtures of luminol and 3-amino-L-tyrosine
[AD-A266093] p 94 N94-12536
ISING MODEL
The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3
[DE93-617882] p 395 N94-10525
ISLANDS
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942
A new data collection system for ionospheric modelling and related topics
[AD-A265893] p 278 N94-12277
ISOCHORIC PROCESSES
A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114
ISOMERIZATION
Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577
ISOTHERMS
Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984
ISOTONICITY
Exercise countermeasures for bed-rest deconditioning
[NASA-TM-103987] p 300 N94-11191
ISOTOPES
A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source
[DE93-009795] p 75 N94-10338
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850
Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035
Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya p 281 N94-12073
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya: Petrogenesis
p 281 N94-12074
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Petrogenesis
p 281 N94-12075
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times
p 281 N94-12076
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212
ISOTROPY
Advanced Materials for Lightweight Structures
[ESA-SP-336] p 56 N94-10001
The searchlight problem for neutrons in a semi-infinite medium
[DE93-010796] p 365 N94-10952
Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism
[DE93-010738] p 401 N94-11646
Remanent magnetism of HED meteorites: Implications for their evolution and ancient magnetic fields
p 431 N94-12172
Local isotropy in high Reynolds number turbulent shear flows p 157 N94-12302

ITERATIVE SOLUTION
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems
[DE93-009838] p 335 N94-10257
Convergence theorems for a class of nonlinear maps in uniformly smooth Banach spaces
[DE92-641347] p 343 N94-10531
Improvements for obtaining iterative solutions of large linear systems
[DE93-767968] p 343 N94-10729
Stability by linear processes
[NASA-CR-194131] p 323 N94-10862
FFT-based methods for nonlinear image restoration in confocal microscopy
[CS-9301] p 174 N94-10904
Necessary conditions for the optimality of variable rate residual vector quantizers
[NASA-CR-193730] p 326 N94-11197
Resolution for Lanczos and Paige-Saunders inverses in tomography
[DE93-012312] p 327 N94-11240
Parallel molecular dynamics with the embedded atom method
[DE93-010683] p 367 N94-11455
Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030

IUE
The abundances of the elements in sharp-lined early type stars
[NASA-CR-194055] p 424 N94-12573
ADP study of the structure of the IUE halo
[NASA-CR-194374] p 428 N94-12595

J

JAMMING
Improved Many-On-Many ROUTE software description
[DE93-013961] p 334 N94-12608

JAPAN
Processing proper nouns in machine translation for English news
[NHK-SERIAL-414] p 418 N94-10559
Insights into software development in Japan
p 330 N94-11435
The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

JAPANESE SPACE PROGRAM
Japanese space activities p 36 N94-10682

JAPANESE SPACECRAFT
Japanese space activities p 36 N94-10682
Flight data analysis of Japanese Earth Resources Satellite-1 (JERS-1)
[NASDA-CNT-930004] p 245 N94-12279
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Significance and scenarios of lunar and planetary exploration missions p 482 N94-12324
Unmanned lunar exploration mission
p 482 N94-12325
Manned lunar exploration missions
p 482 N94-12326
Mars exploration missions p 482 N94-12327
Technical problems on lunar an planetary exploration mission p 482 N94-12328
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Summary of studies on JEM utilization experiment projects p 161 N94-12548

JET AIRCRAFT NOISE
Control of jet noise
[NASA-CR-193612] p 358 N94-11176

JET CONTROL
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820

JET ENGINE FUELS
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels
[DE93-009798] p 98 N94-11366
A novel test method for fuel thermal stability
[AD-A265853] p 99 N94-12275
Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels
[AD-A265842] p 99 N94-12282

JET EXHAUST
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234

JET FLOW
Gas-liquid jets under reduced gravity conditions
p 103 N94-10091
Direct numerical simulation of hot jets
p 156 N94-12295

JET IMPINGEMENT
Turbulence modeling for thrust reverser flow field prediction methods
[AD-A266139] p 154 N94-11641

JFET
Lecture note on circuit technology for high energy physics experiment
[DE93-771422] p 372 N94-11245

JOINTS (JUNCTIONS)
Joints between dissimilar metallic and ceramic materials p 63 N94-10052
Advanced methods of permanently joining carbon materials p 63 N94-10057
Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458

JOSEPHSON JUNCTIONS
High frequency behavior of long and small junctions
[AD-A265670] p 403 N94-12336

JUDGMENTS
A comparison of high and low-impact reports of investigation on adjudicators' decision making: A pilot study
[AD-A265747] p 416 N94-10298

JUNCTION DIODES
Effect of effective mass differences on the tunneling current-voltage behaviour of a resonant diode in the presence of space charge build-up
[DE93-613817] p 142 N94-10799

K

K-EPSILON TURBULENCE MODEL
A Galilean and tensorial invariant k-epsilon model for near wall turbulence
[NASA-TM-106263] p 151 N94-11192
Turbulence modeling for thrust reverser flow field prediction methods
[AD-A266139] p 154 N94-11641

KALMAN FILTERS
Discrete Kalman filtering equations of second-order form for control-structure interaction simulations
[NASA-CR-193723] p 331 N94-11522
First results for the simultaneous estimation of the geoid and the sea surface topography by ERS-1 altimeter data
p 241 N94-11765
Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338
Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother
p 209 N94-12648

KAONS
Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD
[DE93-013593] p 363 N94-10748

KAPOETA ACHONDRITE
Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104
Remanent magnetism of HED meteorites: Implications for their evolution and ancient magnetic fields
p 431 N94-12172

KARMAN VORTEX STREET
On the formation process of Karman vortex street
p 16 N94-12621
Visual structure of Karman vortex streets in a route to chaotic states excited by oscillation of a circular cylinder
p 17 N94-12633

KELVIN-HELMHOLTZ INSTABILITY
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312

KENYA
Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya p 281 N94-12073
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya: Petrogenesis
p 281 N94-12074
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Petrogenesis
p 281 N94-12075
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times
p 281 N94-12076

KERNEL FUNCTIONS
Scalable spin locks for multiprogrammed systems
[AD-A265007] p 337 N94-11650

KETONES
New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513

KIDNEYS
Physiological water model development
p 316 N94-12367

KINEMATICS
The kinematics of buoyancy induced mixing
p 123 N94-10239
A theoretical kinematical study of the gradient of any cosmic scalar field
[DE92-644731] p 425 N94-11136
Plane mixing layer vortical structure kinematics
p 159 N94-12313

KINETIC ENERGY
Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157
Reynolds stress closure modeling in wall-bounded flows p 157 N94-12298
An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers
p 157 N94-12303
Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643
The thermodynamics of the nonlinear shear flows
p 169 N94-12728
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730

KINETIC EQUATIONS
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Statistical approach to LHCD modeling using the wave kinetic equation
[DE93-012831] p 394 N94-12545

KINETIC HEATING
Studies of hypersonic viscous flows p 8 N94-10454

KINETICS
Surface tension and adsorption kinetics in immiscible liquid systems at microgravity p 121 N94-10225

KLEIN-GORDON EQUATION
Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials
[DE93-617650] p 349 N94-10547

KLYSTRONS
Three-cavity circuit studies of the Maryland gyroklystron
[DE93-010173] p 145 N94-11645

KNOWLEDGE BASED SYSTEMS
Reuse: A knowledge-based approach
p 329 N94-11430
Design, development, and testing of an automated knowledge-acquisition tool to aid problem solving, decision making, and planning
[DE93-010239] p 417 N94-11661
Linking medical records to an expert system
p 306 N94-11797

KNOWLEDGE BASES (ARTIFICIAL INTELLIGENCE)
Development of a hypermedia knowledge base of aircraft fire safety regulations p 21 N94-10793
Design, development, and testing of an automated knowledge-acquisition tool to aid problem solving, decision making, and planning
[DE93-010239] p 417 N94-11661

KOLMOGOROV THEORY
An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers
p 157 N94-12303
The ideal Kolmogorov inertial range and constant
p 158 N94-12305

KORTEWEG-DEVRIES EQUATION
Marangoni-driven solitary waves p 119 N94-10214
Uni-directional waves over slowly varying bottom. Part 1: Derivation of a KdV-type of equation
[MEMO-1098] p 147 N94-10275
Generation of internal waves near the shelf boundary
p 229 N94-12763

KREEP
Assimilation in lunar basalts and volcanic glasses: Implications for a heterogenous mantle source region
p 478 N94-12250

L

LABORATORIES
Technology transfer at Lawrence Berkeley Laboratory
[DE93-010460] p 423 N94-11059

LABORATORY EQUIPMENT
Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556
LAGRANGIAN FUNCTION
Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197
Quality factors and local adaption (with applications in Eulerian hydrodynamics) [DE93-010502] p 151 N94-11272
LAGUERRE FUNCTIONS
Convergent close-coupling calculations of electron-hydrogen scattering [DE93-610049] p 360 N94-10328
LAKE ICE
C-band SAR backscatter from ice on shallow tundra lakes: Observations and modelling p 240 N94-11755
LAKES
Sandia ocean modeling system programmer's guide and user's manual [DE93-007427] p 287 N94-10153
LAMINAR BOUNDARY LAYER
Estimation of the direct acoustic radiation from turbulent spots using boundary layer velocity measurements p 357 N94-10358
Joint computational and experimental aerodynamic research on a hypersonic vehicle p 6 N94-10445
Method of reducing drag in aerodynamic systems [NASA-CASE-LEW-14791-1] p 12 N94-10672
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels [DE93-012835] p 152 N94-11371
LAMINAR FLOW
Influence of gravity and ambient pressure variations on the behavior of buoyant laminar diffusion flames p 123 N94-10240
Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles [NAL-TR-1149] p 27 N94-10367
On the combustion of a laminar spray [NASA-TM-106210] p 28 N94-11238
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades [NASA-TM-106278] p 151 N94-11256
On temperature distribution in non-participating medium with radiation boundary condition [DE93-619375] p 153 N94-11604
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
LAMINATES
Hybrid materials for use at elevated temperatures p 57 N94-10013
Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022
Special problems of 3-D ultrasonic QNDI techniques and applications to composites aerospace structures p 61 N94-10036
Design evaluation of GLARE laminate lay-ups p 63 N94-10051
LAMINV: A computer code for creating laminates having prescribed properties p 65 N94-10069
Hydrostatic testing of thick laminated composite cylinders for performance model validation [DE93-012728] p 184 N94-10264
New thermoplastic laminating adhesives for the aircraft industry with low heat release and low smoke emission p 17 N94-10767
A new low smoke, low heat release structural foam p 17 N94-10768
Advanced phenolic systems for aircraft interiors p 18 N94-10776
Response of composite laminates to dynamic surface loads p 66 N94-10902
Damping measurements for ultra-high carbon steel/brass laminates [DE93-011886] p 82 N94-11076
Materials for adaptive structural acoustic control, volume 3 [AD-A264621] p 358 N94-11262
An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276
Strain concentration assessment of laminates subjected to low velocity impact [AD-A264497] p 73 N94-11446
Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013
LAND
ERS-1 altimetry of inland water and land p 246 N94-12475
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation p 219 N94-12704
A method to minimize reference data in classifying satellite remote sensing data into land cover classes p 219 N94-12705
LAND ICE
Signatures of Antarctic firn by means of ERS-1 AMI and by field measurements p 237 N94-11737
Utilisation of ERS-1 data for mapping of Antarctica p 237 N94-11740
Preliminary evaluation of ERS-1 altimetry over Filchner-Ronne Ice Shelf, Antarctica p 238 N94-11742
Validating the UK-PAF land ice product surface elevation p 244 N94-11780
Modern shelf ice, equatorial Aeolis Quadrangle, Mars p 450 N94-12100
Microwave radiometry of ice cover in polar regions p 210 N94-12655
LAND MANAGEMENT
Space Activities in the Asia Pacific Region [JTN-93-80421] p 35 N94-10676
Space research and remote sensing programmes in Bangladesh p 35 N94-10679
Status of remote sensing and Geographic Information System (GIS) applications in the Environment and Natural Resources (ENR) sector p 36 N94-10687
Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation p 219 N94-12704
A method to minimize reference data in classifying satellite remote sensing data into land cover classes p 219 N94-12705
LAND USE
Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846
Segmented land use classification of multitemporal ERS-1 SAR data using a majority filter p 245 N94-12472
Land cover monitoring with multi-temporal ERS-1 SAR observations in the Netherlands p 246 N94-12473
Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea p 246 N94-12478
Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485
Geoecological monitoring of an agricultural area p 248 N94-12489
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation p 219 N94-12704
LANDAU FACTOR
New squeezed landau states p 379 N94-10601
LANDAU-GINZBURG EQUATIONS
Stability and dynamics of spatio-temporal structures [DE93-011374] p 401 N94-11610
LANDFORMS
Global organization of tectonic deformation on Venus p 444 N94-12066
Modern shelf ice, equatorial Aeolis Quadrangle, Mars p 450 N94-12100
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203
Giant radiating dyke swarms on Earth and Venus p 283 N94-12236
LANDING GEAR
Active landing gear control for improved ride quality during ground roll p 27 N94-11345
LANDING SIMULATION
In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734
LANDING SITES
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048
LANDSAT SATELLITES
Landsat as a commercial enterprise [INPE-5477-TAE/019] p 232 N94-11524
LANGEVIN FORMULA
Dissipation in a squeezed-state environment p 370 N94-10584
The heat transfer by radiation between two media [DE93-617820] p 149 N94-10838
The Langevin's approach to the statistical theory of bounded plasma [DE93-617842] p 388 N94-10839
LANGUAGE PROGRAMMING
Layering techniques for development of parallel systems: An algebraic approach [MEMO-INF-92-62] p 335 N94-10277
An algebraic approach to incomparable families of formal languages [MEMO-INF-92-82] p 342 N94-10279
LANGUAGES
Processing proper nouns in machine translation for English news [NHK-SERIAL-414] p 418 N94-10559
LANTHANUM COMPOUNDS
Smart spatial light modulator research and development [AD-A264928] p 382 N94-11286
LARGE SCALE INTEGRATION
Development of microstrip gas chambers with multi-chip technology [DE93-753169] p 367 N94-11509
LARGE SPACE STRUCTURES
Progress in multidisciplinary design optimization at NASA Langley [NASA-TM-107754] p 318 N94-10814
Adaptive structures for spacecraft: A USAF perspective p 45 N94-11319
Dynamic tests on the NASA Langley CSI evolutionary model p 45 N94-11320
Smart structures at Aastra Corporation p 69 N94-11326
Active damping augmentation of elastomechanical systems using piezoelectric sensors and actuators p 72 N94-11346
Control of large space structures with varying configuration [AD-A265764] p 44 N94-12387
Space truss zero gravity dynamics [AD-A266130] p 44 N94-12541
LASER ABLATION
Characterization of an excimer laser-ablated plasma and applications p 392 N94-11450
Momentum induced by laser-tissue interaction [DE93-010737] p 301 N94-11667
The laser ablation of gold films at the electrode surface of a quartz crystal microbalance [AD-A265535] p 175 N94-12012
LASER ANEMOMETERS
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes [NASA-TP-3383] p 15 N94-11133
LASER APPLICATIONS
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Material characterization and modeling with shearography [NASA-CR-192576] p 185 N94-10342
Laser Synchrotron Source (LSS) [AD-D015755] p 173 N94-10371
Paint removal activities in the US Navy p 126 N94-10614
Paint removal activities in Canada p 126 N94-10615
Automated Laser Paint Stripping (ALPS) update p 127 N94-10624
Atomization characteristics of a prefilming airblast atomizer [NAL-TM-644] p 148 N94-10727
The response of an electron in a biased double well to a strong laser: Delocalization and low frequency generation [AD-A265169] p 366 N94-11100
A preliminary study on ice shape tracing with a laser light sheet [NASA-TM-105964] p 174 N94-11132
Aircraft windscreens enhance visual search disruption produced by laser glare [AD-A265167] p 26 N94-11892
The development of phytoplankton sensing system with optical fiber p 203 N94-11967
Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732
LASER BEAMS
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
Start-up imprinting and shock dynamics in laser-target interaction [DE93-008051] p 172 N94-10150

Fabrication and analysis of a special optical connector containing a 1/4-inch-long optical fiber for DOI tests
[DE93-013115] p 381 N94-10647
Multiple laser beam combining and phasing using closed-loop control
[DE93-009830] p 175 N94-11283
Aircraft windscreens enhance visual search disruption produced by laser glare
[AD-A265167] p 26 N94-11892
Short wavelength crystal fiber devices
[AD-A265716] p 176 N94-12402

LASER CAVITIES
The laser second threshold: Its exact analytical dependence on detuning and relaxation rates
[DE93-619706] p 175 N94-11633

LASER DAMAGE
Enhanced Damage-Resistant Optics for Spaceflight Laser Systems: Workshop findings and recommendations
[NASA-TM-109243] p 381 N94-11054
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230
Aircraft windscreens enhance visual search disruption produced by laser glare
[AD-A265167] p 26 N94-11892
Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL
[DE93-013430] p 95 N94-12602

LASER DOPPLER VELOCIMETERS
Experimental analysis of Benard-convection by the combined application of liquid crystals and PIV
p 106 N94-10109
Particle image velocimetry technique: Calibration tests
p 111 N94-10137
Laser velocimeter measurements of the flow field generated by a forward-swept propfan during flutter
[NASA-TM-106195] p 14 N94-10892

LASER FUSION
Start-up imprinting and shock dynamics in laser-target interaction
[DE93-008051] p 172 N94-10150
Studies on the parametric decay of waves in fusion plasmas
[DE93-621659] p 390 N94-11148
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230

LASER GUIDANCE
Laser system design for the generation of a sodium-layer laser guide star
[DE93-014127] p 176 N94-12784

LASER HEATING
An analytic model for calculating pump-induced wavefront distortions in laser slabs
[DE93-011953] p 174 N94-11126

LASER INDUCED FLUORESCENCE
The pyrene laser induced fluorescence technique as a diagnostic tool for combustion thermometry in microgravity p 107 N94-10113
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-193189] p 274 N94-10701
Development of shipboard ocean lidar
p 140 N94-11965
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312
Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755

LASER INTERFEROMETRY
Semiconductor ring lasers
[DE93-012386] p 174 N94-11005

LASER MATERIALS
New challenges in optical materials development
[DE93-011889] p 383 N94-11676

LASER MICROSCOPY
FFT-based methods for nonlinear image restoration in confocal microscopy
[CS-9301] p 174 N94-10904

LASER OUTPUTS
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic
[DE93-012782] p 173 N94-10160
Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287
High-order harmonic conversion efficiency in helium
[DE93-011714] p 364 N94-10753
Multiple laser beam combining and phasing using closed-loop control
[DE93-009830] p 175 N94-11283
A 1.94 micron laser apparatus, system, and method using a thulium-doped yttrium-lithium-fluoride laser crystal pumped with a diode laser
[AD-D015740] p 176 N94-12321
Spatial coherence of soft x ray lasers
[DE93-012497] p 176 N94-12590

LASER PLASMA INTERACTIONS
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic
[DE93-012782] p 173 N94-10160
High-energy density physics at Los Alamos
[DE93-010271] p 371 N94-10260
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286
Controlling chaotic behavior in CO2 and other lasers
[AD-A264811] p 174 N94-10870
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity
[DE93-013102] p 389 N94-11114
Inexpensive capillary discharge x-ray laser driver
[AD-A265932] p 176 N94-12382

LASER PLASMAS
Controlling chaotic behavior in CO2 and other lasers
[AD-A264811] p 174 N94-10870
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA
[DE93-011892] p 393 N94-11677

LASER POWER BEAMING
Fabrication and analysis of a special optical connector containing a 1/4-inch-long optical fiber for DOI tests
[DE93-013115] p 381 N94-10647
InGaAs concentrator cells for laser power converters and tandem cells p 50 N94-11394
The efficiency of photovoltaic cells exposed to pulsed laser light p 50 N94-11395
Response of silicon solar cell to pulsed laser illumination p 51 N94-11396
Approaches to solar cell design for pulsed laser power receivers p 51 N94-11397
Workshop summary: Receivers for laser power beaming p 54 N94-11419

LASER PUMPING
High power z pinches as x ray laser photopumps
[DE93-012842] p 173 N94-10746
An analytic model for calculating pump-induced wavefront distortions in laser slabs
[DE93-011953] p 174 N94-11126
New challenges in optical materials development
[DE93-011889] p 383 N94-11676
A 1.94 micron laser apparatus, system, and method using a thulium-doped yttrium-lithium-fluoride laser crystal pumped with a diode laser
[AD-D015740] p 176 N94-12321
Inexpensive capillary discharge x-ray laser driver
[AD-A265932] p 176 N94-12382

LASER RANGE FINDERS
LASSO observations at McDonald and OCA/CERGA: A preliminary analysis p 352 N94-10972

LASER RANGER/TRACKER
LASSO observations at McDonald and OCA/CERGA: A preliminary analysis p 352 N94-10972
ERS-1 precise orbits and altimetry analysis
p 242 N94-11771
Operational ERS-1 orbit determination at D-PAF
p 243 N94-11774

LASER SPECTROMETERS
Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles
p 431 N94-12167

LASER SPECTROSCOPY
Laser spectroscopy
[DE93-009403] p 173 N94-10255
Atomic processes relevant to polarization plasma spectroscopy
[DE93-753240] p 393 N94-11594
Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755

LASER TARGET INTERACTIONS
Start-up imprinting and shock dynamics in laser-target interaction
[DE93-008051] p 172 N94-10150
Momentum induced by laser-tissue interaction
[DE93-010737] p 301 N94-11667

LASER TARGETS
Short pulse lasers for generation of fields exceeding 100 MG
[DE93-013346] p 369 N94-11815
Submicrosecond, synchronizable x ray source
[AD-D015745] p 176 N94-12337

LASERS
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286
The laser second threshold: Its exact analytical dependence on detuning and relaxation rates
[DE93-619706] p 175 N94-11633
Analytical details of the instability threshold of the laser-Lorenz model
[DE93-619707] p 175 N94-11634

LASING
High power z pinches as x ray laser photopumps
[DE93-012842] p 173 N94-10746
High-order harmonic conversion efficiency in helium
[DE93-011714] p 364 N94-10753
A 1.94 micron laser apparatus, system, and method using a thulium-doped yttrium-lithium-fluoride laser crystal pumped with a diode laser
[AD-D015740] p 176 N94-12321

LATENT HEAT
Latent and sensible heat flux estimated from ERS-1 data p 244 N94-11783
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT
p 194 N94-11918
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

LATITUDE
A method for calculating exact geodetic latitude and altitude
[AD-A265783] p 229 N94-10417
A simple model of clastic sediments on Mars
p 460 N94-12155

LATTICE PARAMETERS
Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas
[DE93-613910] p 396 N94-10800
Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds
[DE93-010687] p 400 N94-11457

LATTICE VIBRATIONS
Energy transfer dynamics and impact sensitivity
[DE93-009551] p 98 N94-11269

LATTICES (MATHEMATICS)
An algebraic approach to incomparable families of formal languages
[MEMO-INF-92-82] p 342 N94-10279
Generalized spin systems and sigma-models
[DE93-613981] p 410 N94-10802

LAUNCH VEHICLES
Exergy decrease in shock waves and boundary layers of space launch vehicles
[AD-A265272] p 42 N94-10493
Space transportation alternatives for large space programs: The International Space University Summer Session, 1992
[NASA-TM-106271] p 40 N94-10811
On-orbit refueling p 38 N94-11565
In-space operations for lunar and Mars space transfer vehicles p 348 N94-11568
The National Launch System Advanced Development Program: A brief overview p 40 N94-11576

LAUNCHERS
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370

LAVA
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows
p 281 N94-12041
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055
Quantifying the effect of rheology on plan-view shapes of lava flows p 282 N94-12116
Lava flows on Venus: Analysis of motion and cooling
p 457 N94-12137
Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes
p 467 N94-12195

LEAD ALLOYS
New mechanism of Ostwald ripening in Lorentz-force stabilized Cu-Pb dispersions p 116 N94-10192
Effect of experimental procedure on pattern formation and array disorder in cellular solidification
p 117 N94-10203

LEAD ISOTOPES
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407
LEW88516 and SNC meteorites p 430 N94-12150

LEAD ZIRCONATE TITANATES
Smart spatial light modulator research and development [AD-A264928] p 382 N94-11286
Recent developments in piezoelectric and electrostrictive sensors and actuators for smart structures p 70 N94-11332

LEADING EDGE FLAPS
A determination of the external forces required to move the benchmark active controls testing model in pure plunge and pure pitch [NASA-TM-107743] p 16 N94-12421

LEADING EDGE SWEEP
Real gas and surface transpiration effects upon swept leading edge high speed flow including transition p 8 N94-10452
Schlieren photographs and internal pressure distributions for three-dimensional sidewall-compression scramjet inlets at a Mach number of 6 in CF4 [NASA-TM-4479] p 148 N94-10644

LEADING EDGES
Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615
A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625

LEAF AREA INDEX
Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site p 248 N94-12491

LEAKAGE
Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472
A prototype urine collection device for female aircrew p 317 N94-11549
A combustion products analyzer for contingency use during thermodegradation events on spacecraft p 318 N94-11555

LEARNING THEORY
Acting to gain information [NASA-CR-193399] p 418 N94-10515

LEAST SQUARES METHOD
A window least squares algorithm for statistical noise smoothing of 2D-ACAR data [DE93-613828] p 395 N94-10537
Optimisation methods for solving separable nonlinear least squares problems [ISVR-TR-219] p 345 N94-11217
Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030
Analysis of collinear passes of satellite altimeter data p 208 N94-12642

LECTURES
Laser spectroscopy [DE93-009403] p 173 N94-10255
Discrete space-time symmetries [DE93-010199] p 341 N94-10259
Some new/old approaches to QCD [DE93-010451] p 408 N94-10261
Lecture note on circuit technology for high energy physics experiment [DE93-771422] p 372 N94-11245

LEE WAVES
Lee waves: Benign and malignant [NASA-CR-186024] p 283 N94-10725

LENSES
Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813

LEPTONS
Acceleration of positrons in supernova shocks [NASA-CR-193713] p 425 N94-10511
Top quark search in D(O) from the lepton + jets mode [DE93-014027] p 370 N94-12781
Quark and lepton masses [DE93-012308] p 370 N94-12787

LEVITATION
Gas film levitator for containerless processing of glasses in microgravity conditions: Early concept and technology demonstration p 108 N94-10122
TEMPUS: An electromagnetic levitation facility for containerless processing under micro-g in Spacelab p 109 N94-10125
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129
Development of passive superconducting bearings. Phase 3 [AD-A266050] p 180 N94-10706
Improvement of azimuthal homogeneity in permanent-magnet bearing rotors [DE93-009954] p 144 N94-11607

LEVITATION MELTING
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129
Microstructure and associated properties of YB2Cu3O(x) superconductors prepared by melt processing techniques [DE93-010675] p 398 N94-11004

LIBRARIES
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL) [NASA-TM-106238] p 327 N94-11232
Guidelines for the establishment and operation of an RFP (Request for proposal) library [AD-A265894] p 417 N94-12360

LICENSING
Intergovernmental decisionmaking for environmental protection and public works [PB93-176824] p 266 N94-11584

LIE GROUPS
One-loop quantum gravity on de Sitter space [DE92-641349] p 425 N94-11152

LIFE (DURABILITY)
Environmental Protection Agency's life cycle methodology: Guidelines for use in development of packaging [PB93-194199] p 265 N94-10841
Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189

LIFE CYCLE COSTS
ACARA user's manual [NASA-TM-106277] p 183 N94-11167
In-flight aircraft structure health monitoring based on smart structures technology p 22 N94-11333
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles [DE93-010770] p 182 N94-11438

LIFE SCIENCES
The International Microgravity Laboratory, a Spacelab for materials and life sciences p 125 N94-10249
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375) [NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376) [NASA-SP-7011(376)] p 303 N94-10399
Proceedings of the Symposium on Radiation Research in Life Science [DE93-754137] p 300 N94-10888
Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374) [NASA-SP-7011(374)] p 304 N94-11689

LIFE SUPPORT SYSTEMS
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375) [NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376) [NASA-SP-7011(376)] p 303 N94-10399
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374) [NASA-SP-7011(374)] p 304 N94-11689
Space Life Support Engineering Program [NASA-CR-193474] p 316 N94-12365
Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369

LIFT
In-flight simulation of backside operating models using direct lift controller [NAL-TR-1152] p 30 N94-10734

LIGANDS
Publications/Patents/Presentations/Honors/Student eport [AD-A265136] p 78 N94-11873

LIGHT (VISIBLE RADIATION)
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742

LIGHT AMPLIFIERS
Method and apparatus for polarization-maintaining fiber optical amplification with orthogonal polarization output [AD-D015756] p 374 N94-10372

LIGHT BEAMS
A compact, four-way image splitter [AD-A266107] p 382 N94-11656
Development of the one-component diode-array velocimeter [AD-A265552] p 171 N94-12533

LIGHT CURVE
A method to determine asteroid poles p 431 N94-12205
Yohkoh Bragg Crystal Spectrometer light curves for Ca XIX (3.1631-3.1912A): 1 October 1991 - 30 September 1992 [AD-A266090] p 483 N94-12414

LIGHT EMISSION
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993 [PB93-196228] p 485 N94-10850
Thermographic properties of eight blue-emitting phosphors [DE93-011459] p 78 N94-11622
Observations of optical counterparts of Gamma-Ray bursts [NASA-CR-193573] p 485 N94-12589

LIGHT EMITTING DIODES
Improved super luminescent light source specification [AD-D015746] p 176 N94-12329

LIGHT MODULATION
Smart spatial light modulator research and development [AD-A264928] p 382 N94-11286
Spatial light modulator having photosensitive and ferroelectric layers [AD-D015731] p 404 N94-12400

LIGHT SCATTERING
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic [DE93-012782] p 173 N94-10160
Phasing operator for two oscillators in classical field p 370 N94-10579
Flowfield structure of swept shock wave/turbulent boundary-layer interactions p 149 N94-10899
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels [DE93-009798] p 98 N94-11366
Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971
Dust in the Martian atmosphere: Polarimetric sensing p 473 N94-12223
Light scattering from a spherical particle on a conducting plane. Part 1: Normal incidence [AD-A265920] p 383 N94-12341
Limitations to the quality of optical phase conjugation by stimulated Brillouin scattering [AD-A266006] p 383 N94-12389
Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar p 224 N94-12736

LIGHT SOURCES
LCLS optics: Selected technological issues and scientific opportunities [DE93-010953] p 175 N94-11468
Improved super luminescent light source specification [AD-D015746] p 176 N94-12329

LIGHT TRANSMISSION
Smoothly deformed light p 375 N94-10566
Non classical effects in planar waveguides p 376 N94-10574
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light p 376 N94-10575
Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603
Radiation defect production in InAs crystals under electron irradiation [DE93-617202] p 397 N94-10845
Plans to improve the experimental limit in the comparison of the east-west and west-east one-way light propagation times on the rotating earth p 351 N94-10971
A development on estimation method of undersea light p 204 N94-11974
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
Trajectory curving in underwater propagation of light p 226 N94-12748

LIGHTNING
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
Primordial lightning: Evidence preserved in chondrites p 432 N94-12230

LIMITER CIRCUITS
Assessment of the impact of HTSC's on superconducting fault-current limiters [DE93-009986] p 143 N94-11454

LINE SHAPE
Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems [AD-A265075] p 382 N94-11653

LINE SPECTRA

NMR spectroscopy of experimentally shocked single crystal quartz: A reexamination of the NMR shock barometer p 81 N94-12258

LINEAR ACCELERATORS

Nonlinear space charge effect of bunched beam in linac [DE93-612176] p 371 N94-10409

DILUTE: A code for studying beam evolution under RF noise [DE93-011605] p 133 N94-10960

Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots [DE93-621655] p 391 N94-11211

LCLS optics: Selected technological issues and scientific opportunities [DE93-010953] p 175 N94-11468

Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole [DE93-014474] p 374 N94-12786

LINEAR ALTERNATORS

Lightweight linear alternators with and without capacitive tuning [NASA-CR-185273] p 140 N94-10505

LINEAR ENERGY TRANSFER (LET)

Nonperturbative methods in HZE ion transport [NASA-TP-3363] p 484 N94-10759

LINEAR EQUATIONS

The solving of equations by the method of boundary elements p 326 N94-11182

LINEAR EVOLUTION EQUATIONS

Curvature effects in three-dimensional boundary layers p 164 N94-12623

LINEAR PROGRAMMING

A simplicial approach to integer programming [REPT-93-06] p 322 N94-10355

Progress in multidisciplinary design optimization at NASA Langley [NASA-TM-107754] p 318 N94-10814

LINEAR QUADRATIC GAUSSIAN CONTROL

Project of an attitude control system (three axis) of a satellite using the LQG/LTR methodology [INPE-5473-TDI/504] p 44 N94-12356

LINEAR SYSTEMS

Sample-data and discrete-time H2 optimal control [MEMO-COSOR-92-53] p 339 N94-10869

The Nehari problem for the Pritchard-Salamon class of infinite-dimensional linear systems: A direct approach [CS-9216] p 344 N94-10905

Discrete Kalman filtering equations of second-order form for control-structure interaction simulations [NASA-CR-193723] p 331 N94-11522

Computational algorithms or identification of distributed parameter systems [AD-A265252] p 331 N94-11680

LINEAR TRANSFORMATIONS

Stability by linear processes [NASA-CR-194131] p 323 N94-10862

LINEARIZATION

On output linearization of observable dynamics [MEMO-1105] p 341 N94-10276

Wait-free linearization with an assertional proof [CS-9208] p 323 N94-10878

Computational algorithms or identification of distributed parameter systems [AD-A265252] p 331 N94-11680

LINGUISTICS

Automatic word categorization: An information-theoretic approach [CS-9209] p 419 N94-10903

Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session) [DE93-013470] p 340 N94-12428

LININGS

Spin-rolling, welding, and heat treatment of aluminium 2219 for Ariane 5 GAM high pressure vessel liners p 62 N94-10045

A repair patching system for aircraft cargo liners p 17 N94-10771

Ceramics technology project database [DE93-012431] p 91 N94-11672

LIOUVILLE THEOREM

Classical gravity coupled to Liouville theory [DE93-613049] p 275 N94-10798

LIPIDS

Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids [AD-A264957] p 301 N94-11648

LIQUEFACTION

Condensation phenomena p 162 N94-12550

LIQUID CHROMATOGRAPHY

Chromatographic assessment of hydrogen-bond donating ability [AD-A265292] p 369 N94-11826

Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

LIQUID COOLING

Liquid Cooled Heat Sink with through Vias (LCHS) [AD-A266008] p 73 N94-12344

Boiling heat-transfer processes and their application in the cooling of high heat flux devices [AD-A266086] p 413 N94-12535

Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber [NASA-TP-3380] p 55 N94-12569

LIQUID CRYSTALS

Vectra insulative support structures within spacecraft p 62 N94-10050

Solidification from supercooled melt under microgravity p 113 N94-10176

Physical properties of injection molded liquid crystal polymers and high temperature engineering polymers [AD-A264912] p 87 N94-10508

Stability and dynamics of spatio-temporal structures [DE93-011374] p 401 N94-11610

Spatial light modulator having photosensitive and ferroelectric layers [AD-D015731] p 404 N94-12400

LIQUID HELIUM

Quantum dynamics of helium clusters [AD-A266060] p 411 N94-10874

Development of commercially viable high-T(sub c) Bi-2223 superconductor tapes [DE93-009966] p 142 N94-10951

Superfluid turbulence p 158 N94-12307

LIQUID HYDROGEN

An environmental study of the National Aerospace Plane [AD-A266071] p 25 N94-10945

Preprints of the 13th Hydrogen Energy System Symposium [DE93-781115] p 99 N94-11444

LIQUID INJECTION

Atomization characteristics of a prefilming airblast atomizer [NAL-TM-644] p 148 N94-10727

LIQUID METALS

Measurement of the thermal conductivity of molten InSb in a drop shaft p 105 N94-10102

Experimental approach to non-contact calorimetry in space p 112 N94-10143

Thermophysical properties of undercooled liquid metals p 86 N94-10190

Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202

Measurements of heat capacity in undercooled metals p 87 N94-10231

The reaction between titanium carbide and aluminium carbide in liquid aluminium; a microgravity study p 123 N94-10238

Shear flow control of gas jets in liquids [AD-A264673] p 152 N94-11448

Performance aspects of de Laval spray-forming nozzles [DE93-013671] p 163 N94-12604

LIQUID NITROGEN

Development of commercially viable high-T(sub c) Bi-2223 superconductor tapes [DE93-009966] p 142 N94-10951

LIQUID OXYGEN

Shear coaxial injector atomization phenomena for combusting and non-combusting conditions [NASA-CR-193339] p 152 N94-11526

Thermodynamics of lunar ilmenite reduction p 415 N94-12028

LIQUID PHASE EPITAXY

Effect of gravity on the dissolution and liquid phase epitaxial growth processes in a horizontal sandwich system p 118 N94-10208

LIQUID PHASE SINTERING

Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 118 N94-10207

LIQUID PHASES

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

LIQUID PROPELLANT ROCKET ENGINES

Axisymmetric single shear element combustion instability experiment [NASA-TM-106327] p 46 N94-10763

Combustion chamber analysis code [NASA-CR-192585] p 46 N94-10934

LIQUID ROCKET PROPELLANTS

Development of a high specific 1.5 to 5 kW thermal arcjet [NASA-CR-193133] p 47 N94-11354

Shear coaxial injector atomization phenomena for combusting and non-combusting conditions [NASA-CR-193339] p 152 N94-11526

LIQUID SURFACES

Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries p 101 N94-10077

Evaporation under microgravity conditions p 102 N94-10086

Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108

Description of the liquid structure facility architecture and experimental demonstration of the diagnostic capabilities p 39 N94-10118

Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218

Convective motion in a multi-layered system with a free surface p 120 N94-10219

LIQUID-LIQUID INTERFACES

Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1 [ESA-SP-333-VOL-1] p 99 N94-10070

The formation and breakage of liquid bridges under microgravity p 100 N94-10071

Non-linear liquid bridge dynamics p 100 N94-10074

Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075

Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries p 101 N94-10077

Stability of liquid bridges between parallel plates p 101 N94-10078

Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity p 101 N94-10079

Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system) p 101 N94-10082

Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083

High Prandtl number fluids in a multilayered system under 1-g or micro-g environment p 104 N94-10096

Benard and Marangoni convection in multiple liquid layers p 105 N94-10100

Coupled thermogravitational and thermocapillary convection in a two-layer fluid system p 105 N94-10101

Thermocapillary slug flow in a capillary tube p 105 N94-10104

Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2 [ESA-SP-333-VOL-2] p 112 N94-10171

Transient effects in the Benard instabilities: Coupling between capillary and gravity effects p 119 N94-10216

Numerical investigations on Marangoni-Benard instability in multi layer systems p 120 N94-10217

Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218

Convective motion in a multi-layered system with a free surface p 120 N94-10219

Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221

Surface tension and adsorption kinetics in immiscible liquid systems at microgravity p 121 N94-10225

Fluid-fluid interfacial instabilities induced by gravity p 121 N94-10229

Use of inert immiscible liquid for crystal separation out of its feeding solution in weightlessness p 124 N94-10242

LIQUID-SOLID INTERFACES

Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1 [ESA-SP-333-VOL-1] p 99 N94-10070

The formation and breakage of liquid bridges under microgravity p 100 N94-10071

Experimental study of axisymmetric thermocapillary flows p 100 N94-10072

Non-linear liquid bridge dynamics p 100 N94-10074

Dielectric liquid bridge stabilization in microgravity by means of electric fields p 100 N94-10075

Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries p 101 N94-10077

Stability of liquid bridges between parallel plates p 101 N94-10078

Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083

Liquid bridges and floating zones p 102 N94-10085

Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness p 105 N94-10105

On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173

TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements
p 114 N94-10184
Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185
Ground results of the Mephisto program: Benefits and space experiments orientation p 86 N94-10197
Transient effects in the Benard instabilities: Coupling between capillary and gravity effects
p 119 N94-10216
The physics of pattern formation of liquid interfaces
[DE93-013333] p 154 N94-11814

LIQUIDS
Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215

LIQUIDUS
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O
[DE93-013590] p 76 N94-11244

LITHIUM ALLOYS
Aluminium-lithium forgings: Properties and potential satellite applications p 58 N94-10021
Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022
Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023

LITHIUM CHLORIDES
Aluminum-phosphorus chemistry: Preparation and structural characterization of (Et2AlP(SiMe3)2)2, Et(Cl)2Al(dot)P(SiMe3)3, and i-Bu2(Cl)Al(dot)P(SiMe3)3
[AD-A265268] p 78 N94-11683

LITHIUM FLUORIDES
Modeling void growth and movement with phase change in thermal energy storage canisters
[NASA-TM-106288] p 163 N94-12576

LITHIUM NIOBATES
Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281

LITHOGRAPHY
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286
Physical optics modelling of Soft X ray Projection Lithography (SXPL) imaging experiments
[DE93-011556] p 374 N94-10339
Wavelength considerations in soft x ray projection lithography
[DE93-014115] p 381 N94-10651
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system
[DE93-011879] p 143 N94-11273
A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker
[AD-A265998] p 93 N94-12353
Low voltage electron beam lithography
[AD-A265358] p 145 N94-12405
Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid)
[AD-A265288] p 95 N94-12585

LITHOLOGY
Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa)
p 281 N94-12032
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core
p 281 N94-12056
Oxygen isotopes as tracers of tektite source rocks: An example from the Ivory Coast tektites and Lake Bosumtwi Crater p 430 N94-12146
Post-impact alteration of the Manson impact structure
p 282 N94-12188
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga
p 473 N94-12228
Assimilation in lunar basalts and volcanic glasses: Implications for a heterogenous mantle source region
p 478 N94-12250

LITHOSPHERE
A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130
Transmantle flux tectonics p 283 N94-12249

LITTORAL DRIFT
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942

LITTORAL TRANSPORT
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942

LOAD DISTRIBUTION (FORCES)
Method of recertifying a loaded bearing member using a phase point
[NASA-CASE-LAR-14741-1] p 185 N94-10671

LOAD TESTS
Numerical simulation and experimental results of filament wound CFRP tubes tested under biaxial load
p 58 N94-10015
Analytical prediction and test verification of the multiaxial behaviour of high-strength steel for lightweight structures
p 58 N94-10016

LOADS (FORCES)
Perforated plates for thin-walled structures
p 63 N94-10056
Method of recertifying a loaded bearing member using a phase point
[NASA-CASE-LAR-14741-1] p 185 N94-10671
Materials for adaptive structural acoustic control, volume 3
[AD-A264621] p 358 N94-11262
A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585
Mechanical interaction between synthetic fiber and cement base matrix in FRC composites
[AD-A265310] p 73 N94-11686

LOCAL AREA NETWORKS
Formal specification of the plain UCN layer in LOTOS
[MEMO-INF-92-83] p 131 N94-10280
Using a private SMDS/ATM network to provide long-haul supercomputing visualization services
[DE93-010692] p 325 N94-11109
Reliability analysis for FDDI dual homing networks
[AD-A266133] p 337 N94-11475

LOCKING
Self locking set screw
[AD-D015774] p 178 N94-10385

LOCOMOTIVES
Electromechanical batteries and the electric locomotive
[DE93-013311] p 142 N94-11009

LOGARITHMS
Quenched chiral logarithms
[DE93-010195] p 346 N94-11663

LOGIC CIRCUITS
Smart spatial light modulator research and development
[AD-A264928] p 382 N94-11286
Programmable logic devices
[DE93-013117] p 144 N94-11479

LOGIC PROGRAMMING
A correct and efficient interface for logical query languages with complex objects
[MEMO-INF-93-01] p 320 N94-10167

LOGISTICS
Assessing the adequacy of the industrial base
[AD-A264954] p 417 N94-11856

LOGISTICS MANAGEMENT
On-orbit refueling p 38 N94-11565
Analysis of the Army's installation support modules with the private sector's open information systems
[AD-A265667] p 421 N94-12579

LONG DURATION EXPOSURE FACILITY
The magnitude of impact damage on LDEF materials
[NASA-CR-188258] p 43 N94-10666
Space environmental effects on the integrity of chromic acid anodized coatings
[NASA-CR-191468] p 55 N94-10947
Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE)
[NASA-CR-192572] p 73 N94-11484
Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045
Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063
Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178
Lessons learned from the Long Duration Exposure Facility
[AD-A266026] p 44 N94-12394

LONG DURATION SPACE FLIGHT
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts
p 311 N94-12005

LONG TERM EFFECTS
Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE)
[NASA-CR-192572] p 73 N94-11484
Lessons learned from the Long Duration Exposure Facility
[AD-A266026] p 44 N94-12394

LONG WAVE RADIATION
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840
Studies of the net surface radiative flux from satellite radiances during FIFE
[NASA-CR-193150] p 230 N94-10953

LONGITUDINAL STABILITY
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances
p 31 N94-11492

LONGITUDINAL WAVES
Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626

LOOP ANTENNAS
Multiple Antenna Implementation System (MAntIS)
[DE93-012515] p 131 N94-10270

LORENTZ FORCE
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129
New mechanism of Ostwald ripening in Lorentz-force stabilized Cu-Pb dispersions p 116 N94-10192

LOSSES
Power losses of a type 2 superconducting slab of arbitrary thickness in the presence of alternating current conductors
[DE93-617892] p 396 N94-10716

LOUDSPEAKERS
On the formation process of Karman vortex street
p 16 N94-12621

LOUVERS
Icing of turbine intake louvers
[AD-A265714] p 29 N94-12274

LOW CONCENTRATIONS
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres
[DE93-012236] p 266 N94-11671

LOW CONDUCTIVITY
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851

LOW COST
Processing, properties, and wear resistance of aluminides
[DE93-012186] p 83 N94-11141
Inexpensive capillary discharge x-ray laser driver
[AD-A265932] p 176 N94-12382
Limitations to the quality of optical phase conjugation by stimulated Brillouin scattering
[AD-A266006] p 383 N94-12389

LOW CURRENTS
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375

LOW DENSITY MATERIALS
An ultralight carbon-carbon composite with amorphous matrix p 61 N94-10042

LOW FREQUENCIES
Stationary spectra in a magnetized current-carrying plasma
[DE93-617847] p 386 N94-10397
Stationary spectra in a plasma with a shear (renormalized statistical approach with non-zero eigenfrequencies)
[DE93-617851] p 386 N94-10523
Stationary spectra in a finite-pressure current-carrying plasma
[DE93-617848] p 387 N94-10538
Stationary spectra in a quasi neutral current-carrying plasma
[DE93-617849] p 387 N94-10539
Stationary spectra in a sheared plasma (linear limit)
[DE93-617850] p 387 N94-10540
Low power digital recorder development
[AD-A265921] p 170 N94-10704
Effects of energetic particle events on VLF/LF propagation parameters/1989
[AD-A265266] p 275 N94-11013
The response of an electron in a biased double well to a strong laser: Delocalization and low frequency generation
[AD-A265169] p 366 N94-11100
Energy transfer dynamics and impact sensitivity
[DE93-009551] p 98 N94-11269

LOW GRAVITY MANUFACTURING
Solidification in immiscible systems: The influence of processing conditions on resulting microstructures
p 112 N94-10174
Ripening of immiscible liquid droplets in microgravity with constrained Marangoni drift p 117 N94-10200

A study of the quasibinary Al-W-Mo system. Part 1: Preliminary investigations and preparation for microgravity experiments p 119 N94-10211
A study of the quasibinary Al-Mo-W system. Part 2: A physico-mechanical investigation of the system fabricated under the gravitylessness conditions
p 119 N94-10212

LOW PASS FILTERS
Force reflection with compliance control
[NASA-CASE-NPO-18668-1-CU] p 179 N94-10654

LOW PRESSURE
Plating under reduced pressure
[DE93-011896] p 84 N94-11668

LOW SPEED
Strain concentration assessment of laminates subjected to low velocity impact
[AD-A264497] p 73 N94-11446
Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

LOW TEMPERATURE
Crystal growth from low temperature vapour phase
p 115 N94-10191
Experiments in ultracold collisions
[DE93-012110] p 365 N94-11029
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O
[DE93-013590] p 76 N94-11244
Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5)
[DE93-011359] p 403 N94-12363

LOW TEMPERATURE ENVIRONMENTS
Icing of turbine intake louvers
[AD-A265714] p 29 N94-12274

LOW THRUST
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252

LOW VOLTAGE
Low voltage electron beam lithography
[AD-A265358] p 145 N94-12405

LOWER BODY NEGATIVE PRESSURE
Glycerol-induced hyperhydration p 309 N94-11996
Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest
p 310 N94-11998

LUBRICANTS
The properties of perfluoropolyethers used for space applications
[NASA-TM-106275] p 88 N94-10864
Measurement of viscosity, density and gas solubility of refrigerant blends
[DE93-014772] p 89 N94-11145
Accelerated screening methods for predicting lubricant performance in refrigerant compressors
[DE93-014773] p 89 N94-11146
Ceramics technology project database
[DE93-012431] p 91 N94-11672

LUBRICATION
Accelerated screening methods for predicting lubricant performance in refrigerant compressors
[DE93-014773] p 89 N94-11146
Advanced model of gradual wear of viscoelastic surface film
[AD-A265130] p 90 N94-11222
Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures
[NASA-TM-106078] p 55 N94-11362
Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374

LUBRICATION SYSTEMS
AGBT advanced counter-rotating gearbox detailed design report
[NASA-CR-180883] p 179 N94-10400

LUMINAIRES
Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision
[AD-A265065] p 331 N94-11652

LUMINESCENCE
Improved super luminescent light source specification
[AD-D015746] p 176 N94-12329

LUMINOSITY
Experimental efforts and results in finding new heavy scintillators
[DE93-010406] p 371 N94-10156
Upgraded D(O) calorimeter electronics for short Tevatron bunch space and the effect of pile-up on the W mass measurement
[DE93-013566] p 146 N94-12603

LUNAR BASED EQUIPMENT
General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027
Galileo EM-2 contributions to the lunar control network p 468 N94-12198

LUNAR BASES
Lunar campsite concept: Space transfer concepts and analysis for exploration missions
[NASA-CR-192602] p 433 N94-10144
Radiation considerations for interplanetary missions
p 45 N94-11559
Cold press sintering of simulated lunar basalt
p 131 N94-12026
General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028
Mission to the Moon: An ESA study on future exploration p 460 N94-12153
Exploration planning in the context of human exploration and development of the Moon p 474 N94-12229
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Manned lunar exploration missions
p 482 N94-12326

LUNAR COMPOSITION
Multiple nitrogen components in lunar soil sample 12023 p 451 N94-12108
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232
Measuring and distinguishing compositional and maturity properties of lunar soils by remote VIS-NIR spectroscopy p 478 N94-12251

LUNAR CONSTRUCTION EQUIPMENT
Cold press sintering of simulated lunar basalt
p 131 N94-12026

LUNAR CRATERS
Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158

LUNAR CRUST
The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197
Assimilation in lunar basalts and volcanic glasses: Implications for a heterogenous mantle source region
p 478 N94-12250

LUNAR DUST
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232

LUNAR EVOLUTION
Magnetic fields and nonuniform structures of the Moon p 472 N94-12218

LUNAR EXPLORATION
Lunar campsite concept: Space transfer concepts and analysis for exploration missions
[NASA-CR-192602] p 433 N94-10144
The Los Alamos neutron spectrometer for the Lunar Scout-1 mission p 172 N94-12038
Mission to the Moon: An ESA study on future exploration p 460 N94-12153
Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165
Exploration planning in the context of human exploration and development of the Moon p 474 N94-12229
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247
Significance and scenarios of lunar and planetary exploration missions p 482 N94-12324
Unmanned lunar exploration mission
p 482 N94-12325
Manned lunar exploration missions
p 482 N94-12326

LUNAR GEOLOGY
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079
Multiple nitrogen components in lunar soil sample 12023 p 451 N94-12108
Viscous relaxation of the Moho under large lunar basins p 452 N94-12113
Mission to the Moon: An ESA study on future exploration p 460 N94-12153
Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158
Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181
The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197
Magnetic fields and nonuniform structures of the Moon p 472 N94-12218
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232
Assimilation in lunar basalts and volcanic glasses: Implications for a heterogenous mantle source region
p 478 N94-12250

LUNAR GRAVITATION
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152
Magnetic fields and nonuniform structures of the Moon p 472 N94-12218

LUNAR LANDING MODULES
Unmanned lunar exploration mission
p 482 N94-12325

LUNAR LOGISTICS
Lunar campsite concept: Space transfer concepts and analysis for exploration missions
[NASA-CR-192602] p 433 N94-10144

LUNAR MAGNETIC FIELDS
Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181
Magnetic fields and nonuniform structures of the Moon p 472 N94-12218

LUNAR MANTLE
Assimilation in lunar basalts and volcanic glasses: Implications for a heterogenous mantle source region
p 478 N94-12250

LUNAR MARIA
Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079
Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173
Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas
p 464 N94-12179

LUNAR MINING
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247

LUNAR PROBES
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Unmanned lunar exploration mission
p 482 N94-12325

LUNAR RADAR ECHOES
Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049

LUNAR RESOURCES
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247

LUNAR ROCKS
Production of electronic grade lunar silicon by disproportionation of silicon difluoride
p 435 N94-12017
Cold press sintering of simulated lunar basalt
p 131 N94-12026
General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
Natural thermoluminescence profiles in lunar cores and implications for meteorites p 443 N94-12060
Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159
Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181
The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197
The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Magnetic fields and nonuniform structures of the Moon p 472 N94-12218

LUNAR ROVING VEHICLES
Unmanned lunar exploration mission
p 482 N94-12325

LUNAR SATELLITES
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Unmanned lunar exploration mission
p 482 N94-12325

LUNAR SHELTERS
Lunar campsite concept: Space transfer concepts and analysis for exploration missions
[NASA-CR-192602] p 433 N94-10144
LUNAR SOIL
Production of electronic grade lunar silicon by disproportionation of silicon difluoride
p 435 N94-12017
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
Multiple nitrogen components in lunar soil sample 12023 p 451 N94-12108
A reexamination of amino acids in lunar soil
p 452 N94-12109
Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159
Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232
Measuring and distinguishing compositional and maturity properties of lunar soils by remote VIS-NIR spectroscopy p 478 N94-12251
LUNAR SPACECRAFT
Lunar campsite concept: Space transfer concepts and analysis for exploration missions
[NASA-CR-192602] p 433 N94-10144
The Los Alamos neutron spectrometer for the Lunar Scout-1 mission p 172 N94-12038
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152
LUNAR SURFACE
Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079
Preliminary report of lunar observations by the Near-Infrared Mapping Spectrometer (NIMS) during the second Galileo Earth-Moon encounter
p 425 N94-12140
Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas
p 464 N94-12179
Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232
Measuring and distinguishing compositional and maturity properties of lunar soils by remote VIS-NIR spectroscopy p 478 N94-12251
LUNAR TOPOGRAPHY
Viscous relaxation of the Moho under large lunar basins p 452 N94-12113
LUNGS
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548
Pulmonary function in microgravity: KC-135 experience
p 309 N94-11994

M

MACH NUMBER
Numerical calculation of scramjet inlet flow
[NAL-TR-1174T] p 27 N94-10370
Exergy decrease in shock waves and boundary layers of space launch vehicles
[AD-A265272] p 42 N94-10493
Kinetic approach to long wave length modes in rotating plasmas
[DE93-771286] p 388 N94-10807
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300
MACHINE LEARNING
A new HMM learning algorithm for continuous speech recognition
[NHK-SERIAL-413] p 132 N94-10560
Toward intelligent flight control p 33 N94-11503
Statistical and optimization methods to expedite neural network training for transient identification
[DE93-009985] p 340 N94-11644
A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus
p 455 N94-12126
MACHINE TOOLS
Material removal processes: Engineering mechanics consideration
[DE93-010733] p 126 N94-10293
Thermal error compensation feasibility study using artificial intelligence
[AD-A266084] p 340 N94-12411
MACHINE TRANSLATION
Processing proper nouns in machine translation for English news
[NHK-SERIAL-414] p 418 N94-10559
Machine translation technology: A potential key to the information age
[PB93-134336] p 421 N94-12385
MACHINING
Material removal processes: Engineering mechanics consideration
[DE93-010733] p 126 N94-10293
Thermal error compensation feasibility study using artificial intelligence
[AD-A266084] p 340 N94-12411
MACROMOLECULES
Effects of a microgravity environment on the crystallization of biological macromolecules
p 117 N94-10198
MAGELLAN PROJECT (NASA)
Russia's contribution to regional geologic mapping of Venus p 454 N94-12122
Synthesis of global thematic mapping, Venus: Geologic correlations/questions for the Magellan gravity mission
p 467 N94-12194
Characteristics of arachnoids from Magellan data
p 469 N94-12204
MAGELLAN SPACECRAFT (NASA)
The origin of Venusian channels: Modelling of thermal erosion by lava p 456 N94-12131
MAGMA
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya: Petrogenesis
p 281 N94-12074
Lava flows on Venus: Analysis of motion and cooling
p 457 N94-12137
Comparison of the distributinn of large magmatic centers on Earth, Venus, and Mars p 467 N94-12192
The Magellan volcanic and magmatic feature catalog
p 467 N94-12193
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus
p 477 N94-12243
Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264
MAGNESIUM ALLOYS
Mechanical properties of magnesium/carbon composites developed by hot pressing under medium pressure p 59 N94-10024
MAGNESIUM ISOTOPES
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212
MAGNET COILS
High-field conductor testing at the FENIX facility
[DE93-012318] p 387 N94-10737
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215
MAGNETIC ANOMALIES
A study on the magnetospheric activity using the AE, ap, and Dst geomagnetic indices
[INPE-5470-TDI/501] p 276 N94-11165
Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219
Pseudo magnetic anomaly derived from satellite altimetry and its application to the tectonics in the North Fuji Basin p 208 N94-12645
MAGNETIC BEARINGS
Development of passive superconducting bearings. Phase 3
[AD-A266050] p 180 N94-10706
Improvement of azimuthal homogeneity in permanent-magnet bearing rotors
[DE93-009954] p 144 N94-11607
MAGNETIC CIRCUITS
Direct current transducer
[DE92-644548] p 141 N94-10533
MAGNETIC COILS
Processing and transport properties of high J(sub c) silver clad Bi-2223 tapes and coils
[DE93-010674] p 398 N94-11073
MAGNETIC COMPRESSION
MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects
[DE93-012682] p 384 N94-10158
MAGNETIC CONTROL
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215
MAGNETIC DIPOLES
Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219
MAGNETIC EFFECTS
The effect of a uniform magnetic field on the onset of steady Marangoni convection in a layer of conducting fluid p 120 N94-10222
On thermodynamic properties of heavy fermion systems in magnetic field
[DE93-613819] p 409 N94-10403
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field
[DE93-620983] p 391 N94-11174
Are cosmic rays effective for ionization of the solar nebula? p 472 N94-12220
MAGNETIC FIELD CONFIGURATIONS
Optimization of break-down conditions in tokamak TOTUS
[DE93-617863] p 386 N94-10524
Calculation of Mercier stability criterium in stellarators
[DE93-621599] p 389 N94-11091
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field
[DE93-620983] p 391 N94-11174
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215
Short pulse lasers for generation of fields exceeding 100 MG
[DE93-013346] p 369 N94-11815
Nonlinear analysis of a magnicon output cavity
[AD-A265342] p 145 N94-12424
MAGNETIC FIELD INVERSIONS
Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219
MAGNETIC FIELD RECONNECTION
A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications
[DE93-013249] p 273 N94-10305
A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications
[DE93-013248] p 273 N94-10319
Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128
Macroscopic behaviour and discrete dynamo of RFP plasma in high theta discharge
[DE93-771408] p 392 N94-11239
MAGNETIC FIELDS
The use of magnetic fields for damping unsteady Marangoni convection in GaAs floating zones under microgravity p 100 N94-10073
Calculation of the effects of magnetic field damping in fluid flow: Comparison of magnetohydrodynamic models of different complexity p 103 N94-10089
CdTe crystal growth in the Soviet facility zona 4
p 106 N94-10111
CdTe crystal growth by THM with a rotating magnetic field p 107 N94-10116
New mechanism of Ostwald ripening in Lorentz-force stabilized Cu-Pb dispersions p 116 N94-10192
Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193
THM-growth of III-V-semiconductors in the magnetic field p 118 N94-10209
The effect of a uniform magnetic field on the onset of steady Marangoni convection in a layer of conducting fluid p 120 N94-10222
Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field
[DE93-613723] p 386 N94-10387
Stationary spectra in a magnetized current-carrying plasma
[DE93-617847] p 386 N94-10397
On thermodynamic properties of heavy fermion systems in magnetic field
[DE93-613819] p 409 N94-10403
Stationary spectra in a finite-pressure current-carrying plasma
[DE93-617848] p 387 N94-10538
Stationary spectra in a sheared plasma (linear limit)
[DE93-617850] p 387 N94-10540
Quantum mechanical effects of topological origin
p 378 N94-10594
New squeezed landau states p 379 N94-10601

Power losses of a type 2 superconducting slab of arbitrary thickness in the presence of alternating current conductors
[DE93-617892] p 396 N94-10716
Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840
Calculation of Mercier stability criterium in stellarators
[DE93-621599] p 389 N94-11091
Possibilities of magnetic diagnostics in stellarators
[DE93-621608] p 389 N94-11092
Radiative properties of strongly magnetized plasmas
[DE93-014098] p 389 N94-11118
Magnetic Earth Ionosphere Resonant Frequencies (MEIRF) project
[NASA-CR-193182] p 276 N94-11355
Accretion disk viscosity and internal waves in disks
p 153 N94-11615
The magnetic field of rotating bodies
[DE93-619769] p 427 N94-11812
Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221
Pilot trial of potentiating normal healing of stress fractures using pulsing electromagnetic fields
[AD-A264251] p 311 N94-12364

MAGNETIC FILMS
NRL review for 1993
[AD-A265666] p 497 N94-12334

MAGNETIC FLUX
Quantum mechanical effects of topological origin
p 378 N94-10594
On the possible unobservability of the Wu-Yang phase factor in curved space
[DE93-617645] p 411 N94-10831

MAGNETIC LENSES
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848

MAGNETIC MEASUREMENT
Large array SQUID magnetometer for NDE
[AD-A264799] p 304 N94-11449
Magnetic fields and nonuniform structures of the Moon p 472 N94-12218

MAGNETIC MOMENTS
Effect of a distribution of exchange parameters within a simple localized-itinerant model
[DE93-610314] p 395 N94-10314

MAGNETIC PERMEABILITY
Remanent magnetism of HED meteorites: Implications for their evolution and ancient magnetic fields
p 431 N94-12172

MAGNETIC POLES
A method to determine asteroid poles
p 431 N94-12205
Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219

MAGNETIC PROPERTIES
Effect of a distribution of exchange parameters within a simple localized-itinerant model
[DE93-610314] p 395 N94-10314
Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data
[DE93-012740] p 363 N94-10743
Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854
Remanent magnetism of HED meteorites: Implications for their evolution and ancient magnetic fields
p 431 N94-12172
Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5)
[DE93-011359] p 403 N94-12363

MAGNETIC RESONANCE
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215

MAGNETIC SPECTROSCOPY
NMR spectroscopy of experimentally shocked single crystal quartz: A reexamination of the NMR shock barometer p 81 N94-12258

MAGNETIC SURVEYS
Pseudo magnetic anomaly derived from satellite altimetry and its application to the tectonics in the North Fuji Basin p 208 N94-12645

MAGNETIC SUSPENSION
Electromechanical batteries and the electric locomotive
[DE93-013311] p 142 N94-11009
Improvement of azimuthal homogeneity in permanent-magnet bearing rotors
[DE93-009954] p 144 N94-11607

MAGNETITE
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055
Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199

MAGNETIZATION
Magnetization reversal by nucleation
[DE93-610313] p 350 N94-10313

MAGNETO-OPTICS
Experiments in ultracold collisions
[DE93-012110] p 365 N94-11029

MAGNETOHYDRODYNAMIC FLOW
Comparison of hydrodynamic and semi-kinetic treatments for plasma flow along closed field lines
[NASA-CR-193589] p 387 N94-10641
Physics of tokamak scrape-off layer confinement
[DE93-011949] p 390 N94-11125
Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128

MAGNETOHYDRODYNAMIC STABILITY
Kinetic approach to long wave length modes in rotating plasmas
[DE93-771286] p 388 N94-10807
Magnetohydrodynamic computation of feedback stabilization of resistive-shell instabilities in the reversed field pinch
[DE93-013466] p 388 N94-10852
Calculation of Mercier stability criterium in stellarators
[DE93-621599] p 389 N94-11091
The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity
[DE93-013102] p 389 N94-11114
Gyrosheath near the tokamak edge
[DE93-012191] p 390 N94-11142
Studies on the parametric decay of waves in fusion plasmas
[DE93-621659] p 390 N94-11148
Elementary mechanism of electron beam dissipative instability development
[DE93-621653] p 391 N94-11209
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211
Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves
[DE93-621656] p 392 N94-11212
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmcspheric Plasma Channel (APCh)
[DE93-621658] p 392 N94-11213
The role of plasma rotation on MHD instabilities in tokamaks
[DE93-013486] p 393 N94-11512
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370

MAGNETOHYDRODYNAMIC WAVES
Efficiency of fast wave current drive for a weakly relativistic plasma
[DE93-012775] p 385 N94-10159
Nonlinear MHD-waves in a dissipative plasma with hall currents
[DE93-617844] p 386 N94-10395

MAGNETOHYDRODYNAMICS
Calculation of the effects of magnetic field damping in fluid flow: Comparison of magnetohydrodynamic models of different complexity p 103 N94-10089
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch
[DE93-012674] p 384 N94-10157
MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects
[DE93-012682] p 384 N94-10158
Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747
Magnetohydrodynamic computation of feedback stabilization of resistive-shell instabilities in the reversed field pinch
[DE93-013466] p 388 N94-10852
Discrete vortex representation of magnetohydrodynamics
[DE93-012190] p 393 N94-11669
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221

MAGNETOMETERS
A phaseonium magnetometer: A new optical magnetometer based on index enhanced media
p 375 N94-10565
NASA Marshall Space Flight Center solar observatory report, January - June 1993
[NASA-TM-108417] p 423 N94-10866
Large array SQUID magnetometer for NDE
[AD-A264799] p 304 N94-11449

MAGNETOPAUSE
A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications
[DE93-013249] p 273 N94-10305
A study of the magnetic field annihilation process in the magnetosphere and some geotechnical applications
[DE93-013248] p 273 N94-10319

MAGNETOSTATICS
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840

MAGNETOSTRICTION
On thermodynamic properties of heavy fermion systems in magnetic field
[DE93-613819] p 409 N94-10403

MAGNETS
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848
Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole
[DE93-014474] p 374 N94-12786

MAGNONS
The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3
[DE93-617882] p 395 N94-10525
Generalized spin systems and sigma-models
[DE93-613981] p 410 N94-10802
A symmetrical form for equations of a nonlinear spiral magnetic
[DE93-621350] p 344 N94-11033

MAIN SEQUENCE STARS
The abundances of the elements in sharp-lined early type stars
[NASA-CR-194055] p 424 N94-12573

MAINTAINABILITY
More sense for less cents: Cost effective servicing of remote sensing satellites p 348 N94-11572
RAMCAD (reliability, availability, and maintainability in computer-aided design)
[AD-A265143] p 331 N94-11679

MAINTENANCE
Applying reliability models to the maintenance of Space Shuttle software p 330 N94-11434
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012181] p 129 N94-11456
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012220] p 129 N94-11670

MAINTENANCE TRAINING
Exercise countermeasures for bed-rest deconditioning
[NASA-TM-103987] p 300 N94-11191
Forecasting the impact of virtual environment technology on maintenance training p 314 N94-11570

MAJORITY CARRIERS
Electrochemical characterization of p(+)n and n(+)p diffused InP structures p 49 N94-11385
Activation energy and capture cross section of majority carrier traps in Zn doped InP p 49 N94-11386

MAMMALS
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A266113] p 301 N94-12417

MAN MACHINE SYSTEMS
Virtual sound for virtual reality
[DE93-010519] p 321 N94-10291
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375)
[NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376)
[NASA-SP-7011(376)] p 303 N94-10399
A new HMM learning algorithm for continuous speech recognition
[NHK-SERIAL-413] p 132 N94-10560
Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527
Noise levels and their effects on Shuttle crewmembers' performance: Operational concerns p 314 N94-11538
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374)
[NASA-SP-7011(374)] p 304 N94-11689

MAN-COMPUTER INTERFACE
Software usability assessment guide
[AD-A265017] p 321 N94-10335
Low latency messages on distributed memory multiprocessors
[NASA-CR-191479] p 323 N94-10643
Flight simulator experiment of the cockpit advisory system
[NAL-TR-1151] p 33 N94-10733
Measuring human performance on NASA's microgravity aircraft p 317 N94-11537
Computing science and statistics, Volume 24: Graphics and visualization
[AD-A265181] p 332 N94-11878
The instrumentation of the multimodel and multilingual user interface
[AD-A265444] p 333 N94-12332
Transportable Applications Environment (TAE) Tenth Users' Conference
[NASA-CP-3225] p 333 N94-12448
Cognitive engineering models: A prerequisite to the design of human-computer interaction in complex dynamic systems
[NASA-CR-193472] p 320 N94-12558

MANAGEMENT INFORMATION SYSTEMS
Myths and realities: Defining re-engineering for a large organization p 330 N94-11436
Design issues for high performance engineering information systems
[AD-A264839] p 420 N94-11520
Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan
[PB93-191633] p 267 N94-11864
Analysis of the Army's installation support modules with the private sector's open information systems
[AD-A265667] p 421 N94-12579

MANAGEMENT METHODS
Space Station Redesign Team: Final report to the Advisory Committee on the Redesign of the Space Station
[NASA-TM-109241] p 42 N94-10663
Engineering performance metrics
[DE93-012084] p 128 N94-11028
From red tape to results: Creating a government that works better and costs less p 422 N94-11351
From red tape to results: Creating a government that works better and costs less. Executive summary
p 422 N94-11353
Maximizing reuse: Applying common sense and discipline p 329 N94-11429
Insights into software development in Japan
p 330 N94-11435
Research and development of post-classical management tools for government program offices, volume 2
[DE93-010236] p 417 N94-11600
International disaster research p 307 N94-11805

MANAGEMENT PLANNING
An advisor module for tactical and strategic state-oriented planning systems with an application in manpower planning
[MEMO-COSOR-92-57] p 416 N94-10868
US Coast Guard GPS Information Center (GPSIC) and its function within the Civil GPS Service (CGS)
p 24 N94-10966
Lunar-Ultraviolet Telescope Experiment (LUTE) integrated program plan
[NASA-CR-193267] p 424 N94-11356
Software management guide
[DE93-012034] p 330 N94-11452
Intergovernmental decisionmaking for environmental protection and public works
[PB93-176824] p 266 N94-11584
Information resources management long-range plan, FY1994
[DE93-013898] p 420 N94-11588
ESA Costing Software (ECOS) introduction
[ESA-F-28] p 333 N94-12383
Defense: Health care
[AD-A265914] p 421 N94-12445

MANAGEMENT SYSTEMS
Financial management: NASA's financial reports are based on unreliable data
[AD-A265690] p 418 N94-12443
Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780

MANEUVERABILITY
Physics of forebody flow control
[NASA-CR-193626] p 15 N94-11195
Comparing aircraft agility using mahalanobis distances
[PB93-175446] p 26 N94-11464
Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

MANGANESE
A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining
p 224 N94-12733

MANGANESE ALLOYS
Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205

MANGANESE ISOTOPES
Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022

MANIFOLDS (MATHEMATICS)
The structure of Hilbert flag varieties
[MEMO-1095] p 348 N94-10272
One dimensional representations in quantum optics
p 375 N94-10570
S(sup 1) x S(sup 2) as a bag membrane and its Einstein-Weyl geometry
[DE93-613149] p 410 N94-10635
Homoclinic intermittency
[W-9302] p 344 N94-10908
The Lip microbundle representation theorem
[DE93-619671] p 346 N94-11348

MANIPULATORS
Lightweight CFRP frame structures for a Rotex-derived manipulator system p 56 N94-10005
Force reflection with compliance control
[NASA-CASE-NPO-18668-1-CU] p 179 N94-10654
Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670
Momentum management in redundant manipulators for vibration suppression
[NASA-CR-194112] p 180 N94-10821
Mechanical analysis of parallel manipulators with simulation, design, and control applications
[ISBN-0-315-72013-1] p 181 N94-11156
Model reference adaptive control (MRAC) with applications to robotics p 339 N94-11640
Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics
[DE93-012823] p 340 N94-12543

MANNED MARS MISSIONS
In-space assembly-servicing requirements
p 348 N94-11569

MANNED SPACE FLIGHT
Lunar campsite concept: Space transfer concepts and analysis for exploration missions
[NASA-CR-192602] p 433 N94-10144
PTTI-aided ephemeris calculation and rapid data link acquisition for manned space flight p 42 N94-10974
Effects of CSF hormones and ionic composition on salt/water metabolism
[NASA-CR-193232] p 300 N94-11045

MANPOWER
An advisor module for tactical and strategic state-oriented planning systems with an application in manpower planning
[MEMO-COSOR-92-57] p 416 N94-10868

MANUALS
The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document
p 421 N94-11575

MANUFACTURING
Lightweight CFRP frame structures for a Rotex-derived manipulator system p 56 N94-10005
Cost effectiveness of structural applications of fibre reinforced thermoplastics p 60 N94-10032
Spin-rolling, welding, and heat treatment of aluminium 2219 for Ariane 5 GAM high pressure vessel liners
p 62 N94-10045
PM technology and mechanical properties of metallic foams p 64 N94-10059
Dry in-line thermoplastic matrix impregnation, phase 1
[AD-A265016] p 67 N94-11221
Large array SQUID magnetometer for NDE
[AD-A264799] p 304 N94-11449
The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy
[DE93-013221] p 84 N94-11488
Design issues for high performance engineering information systems
[AD-A264839] p 420 N94-11520
Space Solar Power Program
[DE93-011750] p 55 N94-11675
Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point
[AD-A265164] p 145 N94-11884

MANY BODY PROBLEM
Satellite structure of the xenon valence shell by electron momentum spectroscopy
[DE93-609993] p 360 N94-10327
Reduced gravity multibody dynamics testing
[NASA-CR-192589] p 125 N94-11483
Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism
[DE93-010738] p 401 N94-11646

MAPPING
Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717
Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734
The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data
p 197 N94-11931
Mapping bathymetric slopes from bathymetry data
[AD-A265923] p 290 N94-12350
Land cover monitoring with multi-temporal ERS-1 SAR observations in the Netherlands p 246 N94-12473
Mapping a dynamic playa surface using multitemporal ERS-1 SAR data: First results p 246 N94-12474
Preliminary studies on the application of ERS-1 data to topographic mapping p 246 N94-12476
Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea
p 246 N94-12478
Example of SPOT/ERS-1 complementarity
p 247 N94-12479
Application of ERS-1 SAR data to snow mapping
p 247 N94-12483
Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484
The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496
Mapping of sea bottom topography with ERS-1 C-band SAR p 254 N94-12525
ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526
SAR imaging of geology and bathymetry: Kent coastal area - southern North Sea p 254 N94-12527
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701
Estimation of areal evapotranspiration using LANDSAT TM data: Kitami City, Hokkaido, Japan
p 219 N94-12703
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation
p 219 N94-12704
A method to minimize reference data in classifying satellite remote sensing data into land cover classes
p 219 N94-12705

MAPS
Boundary of Fatou sets of hyperbolic rational maps or degree two
[DE93-613031] p 348 N94-10412
Convergence theorems for a class of nonlinear maps in uniformly smooth Banach spaces
[DE92-641347] p 343 N94-10531
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663

MARAGING STEELS
Weldability of maraging steels p 59 N94-10028

MARANGONI CONVECTION
Experimental study of axisymmetric thermocapillary flows p 100 N94-10072
The use of magnetic fields for damping unsteady Marangoni convection in GaAs floating zones under microgravity p 100 N94-10073
Instability of thermocapillary convection in floating zones p 101 N94-10076
Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries
p 101 N94-10077
Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity
p 101 N94-10079
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system)
p 101 N94-10082
Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087
Surface-tension driven convection in finite-size containers p 103 N94-10090
Marangoni instability induced convection in an evaporating liquid droplet p 104 N94-10094
Thermocapillary migration of bubbles: A semi-analytical solution for large Marangoni numbers
p 104 N94-10095
High Prandtl number fluids in a multilayered system under 1-g or micro-g environment p 104 N94-10096

Marangoni flows in open cavities with differentially heated end walls p 104 N94-10097

Benard and Marangoni convection in multiple liquid layers p 105 N94-10100

Coupled thermogravitational and thermocapillary convection in a two-layer fluid system p 105 N94-10101

Thermocapillary slug flow in a capillary tube p 105 N94-10104

Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107

Microgravity experiments using TR-1A rocket p 112 N94-10142

Thermocapillary convection instability in microgravity crystal growth p 112 N94-10172

Marangoni motion during melting of a hypermonotectic alloy: Numerical simulations for the D2 experiment IHF04 p 113 N94-10177

Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179

Ripening of immiscible liquid droplets in microgravity with constrained Marangoni drift p 117 N94-10200

Marangoni-driven solitary waves p 119 N94-10214

Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215

Numerical investigations on Marangoni-Benard instability in multi layer systems p 120 N94-10217

Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218

Convective motion in a multi-layered system with a free surface p 120 N94-10219

Vibrational-thermocapillary parallel flows and stability p 120 N94-10220

Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221

The effect of a uniform magnetic field on the onset of steady Marangoni convection in a layer of conducting fluid p 120 N94-10222

The combined influence of anticonvective and thermocapillary mechanisms on the stability of systems with interface p 121 N94-10223

Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243

Marangoni instability in a liquid layer with two free surfaces
[NASA-TM-106166] p 152 N94-11376

MARINE ENVIRONMENTS

Near surface ocean processes: Acoustical observations, ambient sound, and Langmuir circulation p 288 N94-11447

Biscayne bay: A bibliography of the marine environment
[PB93-184802] p 266 N94-11451

Automatic classification system for zooplankton p 203 N94-11969

Study on sea water purification using a substratum of marine organisms p 217 N94-12696

DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere p 226 N94-12749

MARINE METEOROLOGY

Development of a buoy system for monitoring marine weather and marine life abundance p 217 N94-12694

MARINE PROPULSION

Icing of turbine intake louvers
[AD-A265714] p 29 N94-12274

MARINE RESOURCES

Space research and remote sensing programmes in Bangladesh p 35 N94-10679

Biscayne bay: A bibliography of the marine environment
[PB93-184802] p 266 N94-11451

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658

Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

Development of a buoy system for monitoring marine weather and marine life abundance p 217 N94-12694

Acoustic estimation of plankton biomass p 218 N94-12699

MARKET RESEARCH

Potential markets for advanced satellite communications
[NASA-CR-191145] p 41 N94-10512

Business fleet refueling assessment
[PB93-189892] p 98 N94-11017

Space Solar Power Program
[DE93-011750] p 55 N94-11675

MARKOV CHAINS

Parametric analysis of atmospheric processes
[NASA-CR-192523] p 347 N94-10757

MARKOV PROCESSES

A new HMM learning algorithm for continuous speech recognition
[NHK-SERIAL-413] p 132 N94-10560

MARS

Significance and scenarios of lunar and planetary exploration missions p 482 N94-12324

Mars exploration missions p 482 N94-12327

Technical problems on lunar an planetary exploration mission p 482 N94-12328

MARS (PLANET)

Evolution of steep Martian slopes p 434 N94-11184

Giant impact-induced atmospheric blow-off p 435 N94-12019

Marslink p 438 N94-12034

Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust p 462 N94-12168

Small volcanoes in Tempe Terra, Mars: Their detailed morphometry and inferred geologic significance p 469 N94-12202

Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

Classification of Martian deltas p 470 N94-12207

A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245

Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

MARS ATMOSPHERE

Marslink p 438 N94-12034

Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044

An observational search for CO2 ice clouds on Mars p 441 N94-12054

The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs p 445 N94-12071

Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184

Dust in the Martian atmosphere: Polarimetric sensing p 473 N94-12223

Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga p 473 N94-12228

Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235

Organic matter on the early surface of Mars: An assessment of the contribution by interplanetary dust p 480 N94-12259

MARS CRATERS

Increased depth-diameter ratios in the Medusae Fossae Formation deposits of Mars p 439 N94-12043

Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044

Modern shelf ice, equatorial Aeolis Quadrangle, Mars p 450 N94-12100

Fractal dimensions of rampart impact craters on Mars p 460 N94-12154

MARS ENVIRONMENT

Dust in the Martian atmosphere: Polarimetric sensing p 473 N94-12223

MARS OBSERVER

A simple model of clastic sediments on Mars p 460 N94-12155

MARS PHOTOGRAPHS

Geologic history of central Chryse Planitia and the Viking 1 landing site, Mars p 465 N94-12180

MARS PROBES

A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053

Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323

Mars exploration missions p 482 N94-12327

MARS SURFACE

Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015

Rates of fluvio-thermal erosion on Mars p 435 N94-12018

Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031

Increased depth-diameter ratios in the Medusae Fossae Formation deposits of Mars p 439 N94-12043

Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044

A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053

Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars p 281 N94-12055

Thermal studies of Martian channels and valleys using Termoskan data p 443 N94-12064

Spectral analysis of the gravity and topography of Mars p 444 N94-12065

Reflectance spectra of sulfate-and carbonate-bearing Fe(3+)-doped montmorillonites as Mars soil analogs p 445 N94-12070

The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs p 445 N94-12071

Using high spectral resolution spectrophotometry to study broad mineral absorption features on Mars p 446 N94-12077

Modern shelf ice, equatorial Aeolis Quadrangle, Mars p 450 N94-12100

Martian particle size based on thermal inertia corrected for elevation-dependent atmospheric properties p 430 N94-12107

Chemical weathering on Mars: Rate of oxidation of iron dissolved in brines p 455 N94-12128

An ancient inner lake in Maadim Vallis p 456 N94-12133

Spatial variation in the seasonal south polar cap of Mars as observed by Mariner 7 p 456 N94-12134

Fault geometries and extension in the Valles Marineris, Mars p 458 N94-12144

Basal scarp, paleoglacier, and fissure flows of Elysium Mons, Mars p 459 N94-12148

Fractal dimensions of rampart impact craters on Mars p 460 N94-12154

A simple model of clastic sediments on Mars p 460 N94-12155

Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust p 462 N94-12168

The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars p 463 N94-12169

The thermodynamic case for a water-rich Mars p 463 N94-12170

Geologic history of central Chryse Planitia and the Viking 1 landing site, Mars p 465 N94-12180

Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184

Comparison of the distribution of large magmatic centers on Earth, Venus, and Mars p 467 N94-12192

Small volcanoes in Tempe Terra, Mars: Their detailed morphometry and inferred geologic significance p 469 N94-12202

Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

Classification of Martian deltas p 470 N94-12207

Relation between ages and elevations of Martian channels p 472 N94-12216

Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga p 473 N94-12228

Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234

Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations p 476 N94-12242

A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245

Organic matter on the early surface of Mars: An assessment of the contribution by interplanetary dust p 480 N94-12259

Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264

Do large impact basins in the southern hemisphere of Mars control the distribution of polar structures and deposits? p 481 N94-12266

Free-air and Bouguer gravity anomalies and the Martian crustal dichotomy p 481 N94-12267

New Mars free-air and Bouguer gravity: Correlation with topography, geology and large impact basins p 481 N94-12268

Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

MARS VOLCANOES

Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015

Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031

Basal scarp, paleoglacier, and fissure flows of Elysium Mons, Mars p 459 N94-12148

Small volcanoes in Tempe Terra, Mars: Their detailed morphometry and inferred geologic significance p 469 N94-12202
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

MARSHLANDS
A preliminary study of the variability and magnitude of the flux of biogenic sulfur gases from a New Hampshire salt marsh p 267 N94-12452
Sulfate reduction and other sedimentary biogeochemistry in a northern New England salt marsh p 268 N94-12453
Emissions of sulfur gases from wetlands p 269 N94-12458
Acetate concentrations and oxidation in salt marsh sediments p 269 N94-12459
Sulfur transformations in the sediments of a New Hampshire salt marsh p 270 N94-12463
Emissions of biogenic sulfur gases from northern bogs and fens p 271 N94-12467
Elevated acetate concentrations in the rhizosphere of Spartina alterniflora and potential influences on sulfate reduction p 271 N94-12468

MARTENSITIC STAINLESS STEELS
Weldability of maraging steels p 59 N94-10028

MASKING
A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker
[AD-A265998] p 93 N94-12353

MASKS
RF vacuum microelectronics
[AD-A266066] p 142 N94-10818
A prototype urine collection device for female aircrew p 317 N94-11549

MASS
Quark and lepton masses
[DE93-012308] p 370 N94-12787

MASS DISTRIBUTION
Power-law confusion: You say incremental, I say differential p 347 N94-12175
Mass and spatial distribution of carbonaceous component in Comet Halley p 433 N94-12263
Accuracy and repeatability of the standard automated mass properties measurement system
[AD-A265897] p 316 N94-12346

MASS FLOW
An overview of the capabilities of ARA for the measurement of nozzle discharge and thrust
[ARA-MEMO-378] p 55 N94-12283
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709

MASS FLOW RATE
Development of a high specific 1.5 to 5 kW thermal arcjet
[NASA-CR-193133] p 47 N94-11354

MASS SPECTRA
Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles p 431 N94-12167

MASS SPECTROMETERS
Ionization potentials of small carbon clusters
[AD-A264379] p 67 N94-11260
Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles p 431 N94-12167

MASS SPECTROSCOPY
Progress in zirconium resonance ionization spectroscopy
[DE93-011881] p 76 N94-11075
Tandem mass spectrometric analysis of phosphate esters
[AD-A265483] p 78 N94-12009
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE93-014093] p 272 N94-12783

MASS TRANSFER
Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092
Transport of heat and mass in near-critical fluids p 122 N94-10230
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851

MASSIVELY PARALLEL PROCESSORS
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems
[DE93-009838] p 335 N94-10257
A heterogeneous graphics procedure for visualization of massively parallel solutions
[DE93-009628] p 336 N94-11270
Massively parallel hydrodynamics on unstructured grids
[DE93-007325] p 153 N94-11601

MATCHED FILTERS
Further studies using matched filter theory and stochastic simulation for gust loads prediction
[NASA-TM-109010] p 26 N94-11587

MATERIAL ABSORPTION
Hygroscopic absorption to falling films: The effects of the concentration level
[ITN-93-85198] p 148 N94-10391

MATERIAL BALANCE
Disintegrating ice front of Shirase Glacier, East Antarctica p 210 N94-12654

MATERIALS TESTS
Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769
A polyimide foam for advanced fire resistant aircraft applications p 17 N94-10770
Development and testing of a superconducting link for an IR detector
[NASA-CR-193674] p 170 N94-10948
Lessons learned from the Long Duration Exposure Facility
[AD-A266026] p 44 N94-12394

MATHEMATICAL LOGIC
Finite state machine microarchitecture transformations described with relational algebra
[MEMO-INF-92-63] p 319 N94-10278

MATHEMATICAL MODELS
Constitutive laws for describing the service relevant creep behaviour of metallic materials p 64 N94-10060
Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083
Liquid bridges and floating zones p 102 N94-10085
Model of convective motion under low gravity p 103 N94-10088
Space and temporal behavior and control of the residual convection in microgravity p 104 N94-10099
Concept and design of ampoule for melt growth of gallium arsenide in first mission of space flyer unit p 107 N94-10115
CdTe crystal growth by THM with a rotating magnetic field p 107 N94-10116
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain
[DE93-013309] p 185 N94-10306
Topex orbit determination using GPS tracking system p 38 N94-10359
A lattice gas model for enzyme kinetics with alternate interactions
[DE93-613027] p 395 N94-10411
A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484
A lattice gas model for enzyme kinetics with next-nearest neighbor interactions
[DE93-613026] p 410 N94-10631
Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700
System monitoring and diagnosis with qualitative models
[NASA-CR-193812] p 323 N94-10711
Dimensional transition of the space-time at the minimum action near the planck scale
[DE93-754192] p 410 N94-10718
Bringing theory to practice: The reality of interprocessor communication
[DE93-012346] p 336 N94-10738
Applications of a model to predict flame spread over interior finish materials in a compartment p 19 N94-10783
Practical hazard assessment: An approach to the fire safety p 20 N94-10785
Developments needed to expand the role of fire modeling in material fire hazard assessment p 20 N94-10787
Classical gravity coupled to Liouville theory
[DE93-613049] p 275 N94-10798
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Combustion-induced crack propagation process in a solid-propellant crack cavity p 98 N94-10901
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement
[NASA-CR-193292] p 150 N94-10912
Studies of the net surface radiative flux from satellite radiances during FIFE
[NASA-CR-193150] p 230 N94-10953
Advances in time-scale algorithms p 334 N94-10988
Synopsis of timing measurement techniques used in telecommunications p 139 N94-10990
An analytic model for calculating pump-induced wavefront distortions in laser slabs
[DE93-011953] p 174 N94-11126
The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153
Comprehensive dynamic analysis of a bladed disk-turborotor-bearing system
[ISBN-0-315-73646-1] p 180 N94-11155
Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids
[DE93-012673] p 412 N94-11162
A version of superstring with four space-time dimensions
[DE93-608196] p 412 N94-11163
The controlling parameters of the integrated flux of a stellar population p 426 N94-11187
Blading models for TURBAN and CSPAN turbomachine design codes
[NASA-CR-191164] p 15 N94-11203
A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors
[NASA-TM-106279] p 29 N94-11255
Computational mechanics needs study
[NASA-CR-193712] p 327 N94-11279
Submarine internal waves
[MRL-GD-0049] p 98 N94-11303
Normal modes of the world's oceans: A numerical investigation using Proudman functions
[NASA-TM-104587] p 288 N94-11358
Extended ecosystem signatures with application to Eos synergism requirements
[NASA-CR-193398] p 266 N94-11374
Surface passivation of InP solar cells with InAlAs layers p 49 N94-11389
The impact of vegetation on the atmospheric boundary layer and convective storms p 277 N94-11480
A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity
[NASA-TM-106122] p 188 N94-11482
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492
Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499
Accretion disk viscosity and internal waves in disks p 153 N94-11615
Integral equation methods for mixed boundary problem of fracture mechanics p 188 N94-11617
A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711
New tests of the equivalence principle using non-metric couplings of electromagnetism and gravitation p 413 N94-11821
A simple model of melt fracture
[AD-A265311] p 92 N94-11862
Effect of species structure and dielectric constant on C-band forest backscatter
[NASA-TM-109219] p 245 N94-11885
The modelling of aerodynamic flows by solution of the Euler equations on mixed polyhedral grids
[ARA-84] p 16 N94-11888
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves p 195 N94-11922
The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931
The Pacific responses exhibited by an OGCM to various wind fields p 202 N94-11964
Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973
Rates of fluvio-thermal erosion on Mars p 435 N94-12018
Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036
Power-law confusion: You say incremental, I say differential p 347 N94-12175
Deviations from the straight line: Bumps (and grinds) in the collisionally evolved size distribution of asteroids p 431 N94-12201
Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238
Phase transitions and 2D spherical convection in a large icy satellite p 433 N94-12265
A local dynamic model for large eddy simulation p 155 N94-12285

Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

Experiments on near-wall structure of three-dimensional boundary layers p 159 N94-12309

The evolution equation for the flame surface density in turbulent premixed combustion p 81 N94-12316

Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317

Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319

Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347

Project of an attitude control system (three axis) of a satellite using the LQG/LTR methodology [INPE-5473-TDI/504] p 44 N94-12356

Ultrasonic wave interaction with advanced complex materials for nondestructive evaluation applications [AD-A265704] p 74 N94-12401

Sampling and position effects in the Electronically Steered Thinned Array Radiometer (ESTAR) [NASA-TM-108998] p 245 N94-12432

Modeling void growth and movement with phase change in thermal energy storage canisters [NASA-TM-106288] p 163 N94-12576

Process modelling for materials preparation experiments [NASA-CR-193556] p 56 N94-12588

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635

A numerical study of deep convection at high latitudes p 210 N94-12652

A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665

Variability of the mixed layer depth in the North Pacific Ocean as calculated by a 3-D semi-analytical mixed layer remote sensing model p 221 N94-12718

SST assimilation: Eastern Mediterranean case study p 221 N94-12719

Optimum selection of spectral channels in the problem of remote sensing of phytoplankton concentration in ocean water p 223 N94-12726

The thermodynamics of the nonlinear shear flows p 169 N94-12728

Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730

Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738

Convective and dynamic instability in meridional trenches p 225 N94-12739

Optical transfer operator of the atmosphere-ocean system p 225 N94-12742

Trajectory curving in underwater propagation of light p 226 N94-12748

Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752

Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753

Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754

Mixing of drifter ensemble by mesoscale currents p 228 N94-12760

Non-image visible polarization remote sensing of the ocean p 229 N94-12762

The 1991 version of the plume impingement computer program. Volume 1: Description [NASA-CR-194192] p 166 N94-12775

VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

MATHEMATICAL PROGRAMMING

A surrogate heuristic for set covering problems [INPE-5462-PRE/1770] p 325 N94-11178

MATHEMATICS

Project TIMS (Teaching Integrated Math/Science) [NASA-CR-194288] p 416 N94-11599

Career Information in the Mathematical Sciences (CIMS) [DE93-013780] p 318 N94-11817

MATRICES (MATHEMATICS)

Vectorizing matrix operations arising from PDE discretization on 9-point stencils [CWI-NM-R9221] p 342 N94-10351

On renormalization group flow in matrix model [DE93-613050] p 409 N94-10413

Symbolic dynamics and description of complexity [DE93-613030] p 418 N94-10485

Operator substitution [MEMO-COSOR-92-51] p 343 N94-10867

Alleviating memory contention in matrix computations on large-scale shared-memory multiprocessors [AD-A265009] p 320 N94-11294

Discrete Kalman filtering equations of second-order form for control-structure interaction simulations [NASA-CR-193723] p 331 N94-11522

Direct solution of the mathematical adjoint equations for an interface current nodal formulation [DE93-009961] p 346 N94-11608

MATRIX MATERIALS

Fatigue-life behavior and matrix fatigue crack spacing in unnotched SCS-6/Timetal 21S metal matrix composites [NASA-CR-191467] p 185 N94-10715

Interface considerations in Al2O3/NiAl composite [NASA-CR-191167] p 66 N94-11202

An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276

Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations p 476 N94-12242

Proposed framework for thermomechanical life modeling of metal matrix composites [NASA-TP-3320] p 74 N94-12449

MATRIX METHODS

A lattice gas model for enzyme kinetics with alternate interactions [DE93-613027] p 395 N94-10411

Spin characteristics of ion beams during the motion of electromagnetic elements [DE93-617448] p 364 N94-10848

MATTER (PHYSICS)

A theoretical kinematical study of the gradient of any cosmic scalar field [DE92-644731] p 425 N94-11136

MAXIMUM ENTROPY METHOD

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200

MAXIMUM LIKELIHOOD ESTIMATES

Segmented land use classification of multitemporal ERS-1 SAR data using a majority filter p 245 N94-12472

Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485

MAXWELL EQUATION

A parallel implementation of particle tracking with space charge effects on an Intel iPSC/860 [DE93-012307] p 335 N94-10340

Stationary spectra in a magnetized current-carrying plasma [DE93-617847] p 386 N94-10397

The heat transfer by radiation between two media [DE93-617820] p 149 N94-10838

MAXWELL FLUIDS

Kinetic approach to long wave length modes in rotating plasmas [DE93-771286] p 388 N94-10807

Stability of viscoelastic flow: Physical and numerical considerations p 31 N94-11493

MEAN FREE PATH

Electron runaway in RF discharges [DE93-771407] p 363 N94-10661

MEASURE AND INTEGRATION

Finite difference schemes for long-time integration [NASA-CR-191471] p 343 N94-10642

MEASURING INSTRUMENTS

Recommendations for future research in hypersonic instrumentation p 4 N94-10433

Pressure and force measurements on models set in hypersonic flows: A review p 5 N94-10435

Velocity measurements in hypersonic flows: A review p 5 N94-10436

Thermal flux measurements in hypersonic flows: A review p 5 N94-10438

Overview of the 1989 Wind Tunnel Calibration Workshop [NASA-TP-3393] p 34 N94-11869

MECHANICAL ENGINEERING

Material removal processes: Engineering mechanics consideration [DE93-010733] p 126 N94-10293

RAMCAD (reliability, availability, and maintainability in computer-aided design) [AD-A265143] p 331 N94-11679

MECHANICAL PROPERTIES

The microstructure and mechanical properties of hot worked FeAl intermetallic alloys p 58 N94-10020

Aluminium-lithium forgings: Properties and potential satellite applications p 58 N94-10021

Weldability of maraging steels p 59 N94-10028

Aluminum-beryllium alloys for aerospace applications p 60 N94-10029

Ceramic matrix composites: High performance materials for space application p 62 N94-10044

LAMINV: A computer code for creating laminates having prescribed properties p 65 N94-10069

Physical properties of injection molded liquid crystal polymers and high temperature engineering polymers [AD-A264912] p 87 N94-10508

Computational simulation of hot composite structures [NASA-TM-106200] p 186 N94-10762

Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772

Fire resistance and mechanical properties for phenolic prepregs p 20 N94-10786

Level 3 material characterization of NARC HRPF, HRHU, HRHF, and HRPU [NASA-CR-192579] p 65 N94-10812

Synthesis and properties of nanophase materials [DE93-011757] p 397 N94-10962

Fibre reinforced polymer matrix composites: Microstructure and mechanical properties [DLR-FB-92-28] p 66 N94-11085

Mechanical interaction between synthetic fiber and cement base matrix in FRC composites [AD-A265310] p 73 N94-11686

Experimental studies of the structure of grain boundaries [DE93-013979] p 402 N94-11700

Fracture behavior of ionomers and ionomeric blends [AD-A265379] p 94 N94-12407

Molecular properties of polymeric materials for space applications [NASA-CR-194370] p 94 N94-12450

MEDICAL PERSONNEL

US-USSR telemedicine consultation spacebridge to Armenia and Ufa p 308 N94-11809

MEDICAL SCIENCE

National Institute of Health Almanac, 1992 [PB93-183556] p 303 N94-10828

Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides [AD-A264851] p 88 N94-10863

The Department of Clinical Investigation, reports control symbol MED-300(R-1) [AD-A264969] p 304 N94-11649

Global considerations for implementation of telemedicine p 305 N94-11792

A telemedicine health care delivery system p 307 N94-11803

MEDICAL SERVICES

International Telemedicine/Disaster Medicine Conference: Papers and Presentations [NASA-NP-207] p 304 N94-11787

Medical informatics and telemedicine: A vision p 305 N94-11788

The Canadian experience: Using telemedicine for the support of medical care at remote sites p 305 N94-11789

Telemedicine and international disaster response: Medical consultation to Armenia and Russia via a telemedicine spacebridge p 305 N94-11790

Use of telescience for biomedical research during space flight p 305 N94-11791

Global considerations for implementation of telemedicine p 305 N94-11792

Tropical medicine: Telecommunications and technology transfer p 305 N94-11793

Clinical aspects of telemedicine p 306 N94-11795

Commercial applications of telemedicine p 306 N94-11798

Space technology in remote health care p 306 N94-11799

The use of communication technology in medicine p 306 N94-11800

The National Disaster Medical System p 307 N94-11801

A telemedicine health care delivery system p 307 N94-11803

Communications infrastructure requirements for telemedicine/telehealth in the context of planning for and responding to natural disasters: Considering the need for shared regional networks p 307 N94-11804

Use of satellite telecommunications for telemedicine p 308 N94-11807

US-USSR telemedicine consultation spacebridge to Armenia and Ufa p 308 N94-11809

The revitalization of health and education in Rural America Act of 1992 p 308 N94-11810

Defense: Health care [AD-A265914] p 421 N94-12445

MEDITERRANEAN SEA

Preliminary results of the comparison of ATSR measurements with in situ sea temperatures [DE93-013399] p 287 N94-10517

The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713

SST assimilation: Eastern Mediterranean case study p 221 N94-12719

MELT SPINNING

Comparison of Al-Fe alloys produced by PFC and USGA techniques p 58 N94-10019

MELTING

Marangoni motion during melting of a hypermonotectic alloy: Numerical simulations for the D2 experiment IHF04 p 113 N94-10177

Preliminary results of Mn partitioning experiments on Murchison analogues p 281 N94-12081

Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163

Flash melting of chondrule precursors in excess of 1600 C. Series 1: Type 2 (B1) chondrule composition experiments p 431 N94-12177

Primordial lightning: Evidence preserved in chondrites p 432 N94-12230

MELTS (CRYSTAL GROWTH)

Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080

Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system) p 101 N94-10082

On shape of single crystals grown by FZM in microgravity p 102 N94-10084

Liquid bridges and floating zones p 102 N94-10085

Space and temporal behavior and control of the residual convection in microgravity p 104 N94-10099

CdTe crystal growth in the Soviet facility zona 4 p 106 N94-10111

Concept and design of ampoule for melt growth of gallium arsenide in first mission of space flyer unit p 107 N94-10115

CdTe crystal growth by THM with a rotating magnetic field p 107 N94-10116

Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2 [ESA-SP-333-VOL-2] p 112 N94-10171

On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173

Solidification from supercooled melt under microgravity p 113 N94-10176

Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179

Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180

TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements p 114 N94-10184

Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193

Non-equilibrium solidification in undercooled Ni-B alloys p 86 N94-10196

Conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 117 N94-10201

THM-growth of III-V-semiconductors in the magnetic field p 118 N94-10209

Crystal growth in the Zone Melting Facility (ZMF) p 119 N94-10213

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

The solubility of gold in silicate melts: First results p 87 N94-12086

Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173

Flash melting of chondrule precursors in excess of 1600 C. Series 1: Type 2 (B1) chondrule composition experiments p 431 N94-12177

Process modelling for materials preparation experiments [NASA-CR-193556] p 56 N94-12588

MEMBRANES

Aluminum and membrane channels [AD-A265241] p 300 N94-11020

A theory of membrane absorbers [ISVR-TR-217] p 76 N94-11216

Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids [AD-A264957] p 301 N94-11648

MEMORY (COMPUTERS)

Radiation hardened nonvolatile memory for space and strategic applications [DE93-000746] p 319 N94-10146

A proof-of-concept implementation of persistence in a hierarchical storage system [DE93-009959] p 319 N94-10318

Simulation of a parallel computer [NAL-TR-1154] p 335 N94-10368

Low latency messages on distributed memory multiprocessors [NASA-CR-191479] p 323 N94-10643

Flexible language constructs for large parallel programs [NASA-CR-191478] p 326 N94-11196

Alleviating memory contention in matrix computations on large-scale shared-memory multiprocessors [AD-A265009] p 320 N94-11294

Data processing units for eight magnetospheric particle and field sensors [AD-A264403] p 276 N94-11463

Gallium arsenide dynamic random access memory support circuitry [AD-A265176] p 320 N94-11875

MENTAL PERFORMANCE

Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529

Analyzing human errors in flight mission operations p 314 N94-11534

MERCURY CADMIUM TELLURIDES

Process modelling for materials preparation experiments [NASA-CR-193556] p 56 N94-12588

MERCURY COMPOUNDS

Conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace p 117 N94-10201

MERIDIONAL FLOW

Numerical simulations of thermal convection in rapidly rotating spherical fluid shells p 153 N94-11635

MEROMORPHIC FUNCTIONS

On a class of two-dimensional nearest neighboring random walks [CWI-BS-R9220] p 347 N94-10353

MERRITT ISLAND (FL)

A study of the Merritt Island, Florida sea breeze flow regimes and their effect on surface heat and moisture fluxes [NASA-CR-4537] p 286 N94-12580

MESON-NUCLEON INTERACTIONS

Strangeness production with protons and pions [DE93-010879] p 359 N94-10304

Crossing-odd spin effects in the dipole model of hadron scattering [DE93-617692] p 362 N94-10551

MESONS

Proceedings of the third workshop on light quark meson spectroscopy [DE93-754138] p 363 N94-10696

Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD [DE93-013593] p 363 N94-10748

MESOSCALE PHENOMENA

On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200

A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study [AD-A264805] p 152 N94-11519

Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment [NASA-CR-193829] p 285 N94-11598

Ocean circulation revealed by altimeter data p 245 N94-11786

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

Comparison of ERS-1 SAR images of the Western Mediterranean to in situ oceanographic data: PRIM-1 Cruise (May 1992) p 255 N94-12529

On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724

Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754

MESOSPHERE

Polar mesospheric waves and structure [AD-A265360] p 279 N94-12561

MESSAGE PROCESSING

Low latency messages on distributed memory multiprocessors [NASA-CR-191479] p 323 N94-10643

Design and analysis of an optical interface message processor [AD-A266079] p 381 N94-10697

The Zipcode message-passing system [DE93-011958] p 336 N94-11027

A formally verified algorithm for interactive consistency under a hybrid fault model [NASA-CR-4527] p 326 N94-11188

Effective software reuse in an embedded realtime system [AD-A264993] p 326 N94-11220

Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL) [NASA-TM-106238] p 327 N94-11232

The PVM systems: An in-depth analysis and documenting study. Concise edition [DE93-011959] p 336 N94-11248

METABOLISM

Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats [AD-A265309] p 301 N94-11861

METAL BONDING

High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition [DE93-013977] p 398 N94-11115

Electronic and total energy properties of ternary and quaternary semiconductor compounds, alloys and superlattices [NASA-CR-192905] p 405 N94-12570

METAL COMBUSTION

Shear flow control of gas jets in liquids [AD-A264673] p 152 N94-11448

Distributed combustion in solid propellants [AD-A265727] p 99 N94-12564

METAL CRYSTALS

Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563

METAL FATIGUE

Fatigue in single crystal nickel superalloys [AD-A266116] p 85 N94-12418

Isothermal fatigue mechanisms in Ti-based metal matrix composites [NASA-CR-191181] p 74 N94-12594

METAL FILMS

Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures [NASA-TM-106078] p 55 N94-11362

In situ XANES studies of the passive film on Fe and Fe-26Cr [DE93-010869] p 84 N94-11459

The laser ablation of gold films at the electrode surface of a quartz crystal microbalance [AD-A265535] p 175 N94-12012

METAL FOAMS

PM technology and mechanical properties of metallic foams p 64 N94-10059

METAL FUELS

Shear flow control of gas jets in liquids [AD-A264673] p 152 N94-11448

METAL HALIDES

Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings [AD-A265072] p 92 N94-11866

METAL HYDRIDES

X ray and gamma ray spectroscopy of solids under pressure [DE93-014847] p 76 N94-10653

METAL IONS

Photodetachment studies on few-electron atomic negative ions [DE93-008474] p 358 N94-10154

X ray absorption spectroscopy of electrochemically generated species [AD-A264749] p 77 N94-11265

METAL MATRIX COMPOSITES

Hybrid materials for use at elevated temperatures p 57 N94-10013

Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022

Mechanical properties of magnesium/carbon composites developed by hot pressing under medium pressure p 59 N94-10024

Design evaluation of GLARE laminate lay-ups p 63 N94-10051

Joints between dissimilar metallic and ceramic materials p 63 N94-10052

Introducing SMaSE: An aide memoire on structural materials and space engineering p 63 N94-10053

Constitutive laws for describing the service relevant creep behaviour of metallic materials p 64 N94-10060

Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 118 N94-10207

A study of the quasibinary Al-W-Mo system. Part 1: Preliminary investigations and preparation for microgravity experiments p 119 N94-10211

A study of the quasibinary Al-Mo-W system. Part 2: A physico-mechanical investigation of the system fabricated under the gravitylessness conditions p 119 N94-10212

Interface reactions of (Ni3Al) ribbons/Al-MMC in ground preparation as preliminary test for microgravity experiments p 123 N94-10237

Fatigue-life behavior and matrix fatigue crack spacing in unnotched SCS-6/Timetal 21S metal matrix composites
[NASA-CR-191467] p 185 N94-10715

Computational simulation of hot composite structures
[NASA-TM-106200] p 186 N94-10762

Tribological characteristics of hot-pressed self-lubricating composites
[NAL-TR-1160] p 66 N94-10858

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites
[AD-A265153] p 187 N94-11096

Corrosion behavior of metal matrix composites
[AD-A265352] p 85 N94-12404

Proposed framework for thermomechanical life modeling of metal matrix composites
[NASA-TP-3320] p 74 N94-12449

Isothermal fatigue mechanisms in Ti-based metal matrix composites
[NASA-CR-191181] p 74 N94-12594

METAL OXIDE SEMICONDUCTORS

A study of DC-DC converters with MCTs for arcjet power supplies
[NASA-CR-193457] p 142 N94-10931

METAL PARTICLES

Processing, properties, and wear resistance of aluminides
[DE93-012186] p 83 N94-11141

Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024

The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110

Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199

The unusual metallic particles in Krymka LL3.0 chondrite p 433 N94-12253

Distributed combustion in solid propellants
[AD-A265727] p 99 N94-12564

METAL PLATES

Advances in low carbon, high strength ferrous alloys
[AD-A265264] p 85 N94-12532

METAL POWDER

The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy
[DE93-013221] p 84 N94-11488

METAL PROPELLANTS

Shear flow control of gas jets in liquids
[AD-A264673] p 152 N94-11448

METAL SHEETS

Hybrid materials for use at elevated temperatures
p 57 N94-10013

Failure prediction of thin beryllium sheets used in spacecraft structures
[NASA-CR-194164] p 187 N94-11190

METAL SPINNING

Spinforming characteristics of a net shape forming process p 56 N94-10004

Spin-rolling, welding, and heat treatment of aluminium 2219 for Ariane 5 GAM high pressure vessel liners
p 62 N94-10045

METAL SPRAYING

Performance aspects of de Laval spray-forming nozzles
[DE93-013671] p 163 N94-12604

METAL SURFACES

Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713

Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854

Real-space formation and dissipation dynamics of hexagonal reconstruction on Au(100) in aqueous media as explored by potentiodynamic scanning tunneling microscopy
[AD-A266138] p 368 N94-11658

Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534

METAL VAPORS

Design of CCD camera system for use inside electron beam furnace
[DE93-009525] p 170 N94-11267

METAL-GAS SYSTEMS

Atomic structures and compositions of internal interfaces
[DE93-014840] p 363 N94-10750

METALLIC STARS

The controlling parameters of the integrated flux of a stellar population p 426 N94-11187

METALLIZING

Method for producing a hybridization of detector array and integrated circuit for readout
[NASA-CASE-NPO-18062-1-CU] p 141 N94-10656

Effects of solar cell environment on contact integrity
p 49 N94-11387

Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings
[AD-A265072] p 92 N94-11866

METALLOGRAPHY

Metallographic cooling rates of L-group ordinary chondrites p 429 N94-12061

METALORGANIC CHEMICAL VAPOR DEPOSITION

High temperature annealing of minority carrier traps in irradiated MOCVD n(+)p InP solar cell junctions
p 48 N94-11382

Investigation of ZnSe-coated silicon substrates for GaAs solar cells p 52 N94-11405

Heteroepitaxial InP, and ultrathin, directly glassed, GaAs 3-5 solar cells p 52 N94-11406

Remote plasma enhanced chemical vapor deposition of GaP with in situ generation of phosphine precursors
p 399 N94-11440

Organometallic chemical vapor deposition and characterization of ZnGeP2/GaP multiple heterostructures on GaP substrates p 400 N94-11442

Organometallic chemical vapor deposition and characterization of ZnGe(1-x)Si(x)P2-Ge alloys on GaP substrates p 400 N94-11443

METALS

Structure of s - p bonded metal clusters with 8, 20 and 40 valence electrons
[DE93-613643] p 361 N94-10503

Monte Carlo simulations of phase transformations in Fe-Cr alloys
[DE93-013847] p 81 N94-10522

A method of influence regions in the theory of vacancy swelling of metals
[DE93-620579] p 83 N94-11363

METAMORPHISM (GEOLOGY)

Shock transformations in quartzite p 97 N94-12040

Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045

Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core
p 281 N94-12056

Metallographic cooling rates of L-group ordinary chondrites p 429 N94-12061

Chondrite thermal histories from Low-CA pyroxene microstructures: Autometamorphism versus prograde metamorphism revisited p 429 N94-12105

Anomalous REE patterns in unequilibrated enstatite chondrites: Evidence and implications
p 431 N94-12191

The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197

Trace element distributions in primitive achondrites
p 431 N94-12200

Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

METASTABLE STATE

Photodetachment studies on few-electron atomic negative ions
[DE93-008474] p 358 N94-10154

Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854

Non-barrier tunneling in presence of dissipations
[DE93-621381] p 412 N94-11086

Polymeric nitrogen
[DE93-012600] p 89 N94-11151

METEORITE COLLISIONS

Explicit 3D continuum fracture modeling with smooth particle hydrodynamics p 429 N94-12062

Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157

Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181

Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238

METEORITE CRATERS

Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023

Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa)
p 281 N94-12032

Increased depth-diameter ratios in the Medusae Fossae Formation deposits of Mars p 439 N94-12043

Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars
p 169 N94-12044

Strontium and oxygen isotope study of M-1, M-3 and M-4 drill core samples from the Manson impact structure, Iowa: Comparison with Haitian K-T impact glasses
p 281 N94-12080

Si-29 NMR spectroscopy of naturally-shocked quartz from Meteor Crater, Arizona: Correlation to Kieffer's classification scheme p 80 N94-12087

Age of Popigai impact event using the Ar-40 - Ar-39 method p 282 N94-12093

Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions
p 282 N94-12149

Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157

Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160

KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161

Post-impact alteration of the Manson impact structure
p 282 N94-12188

Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189

Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

METEORITES

Meteorites from recent amor-type orbits
p 429 N94-12059

Natural thermoluminescence profiles in lunar cores and implications for meteorites p 443 N94-12060

Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit
p 281 N94-12084

Chondrule formation by clumpy accretion onto the solar nebula p 448 N94-12089

METEORITIC COMPOSITION

Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015

Moessbauer spectroscopy of the SNC meteorite Zagami p 428 N94-12016

Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020

Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021

Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022

Calorimetric thermometry of meteoritic troilite: A feasibility study p 428 N94-12025

Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029

Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030

Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035

Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

The great 8 MA event and the structure of the H-chondrite parent body p 429 N94-12058

Natural thermoluminescence profiles in lunar cores and implications for meteorites p 443 N94-12060

Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063

The asteroid-meteorite connection: Forging a new link to Vesta as the parent body of basaltic achondrite (HED) meteorites p 429 N94-12068

Alkali-granitoids as fragments within the ordinary chondrite Adzhi-Bogdo: Evidence for highly fractionated, alkali-granitic liquids on asteroids p 429 N94-12069

Preliminary results of Mn partitioning experiments on Murchison analogues p 281 N94-12081

Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082

Ar-39 - Ar-40 ages of acapulcoites and lodranites: Evidence for early parent body heating
p 281 N94-12083

Midplane temperatures in the solar nebula
p 448 N94-12088

Chondrule formation by clumpy accretion onto the solar nebula p 448 N94-12089

Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094

Trace-element abundances in several new ureilites
p 80 N94-12096

Mineralogy versus bulk composition of the carbonaceous chondrite clast Kaidun 2
p 429 N94-12101

Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104

SXRF determination of trace elements in chondrule rims in the unequilibrated CO3 chondrite, ALH A77307
p 429 N94-12106

Determining the relative extent of alteration in CM chondrites p 430 N94-12114

The EET87513 clast N: A CM2 fragment in an HED polymict breccia p 453 N94-12117

Volatiles in fourteen interplanetary dust particles: A comparison with CI and CM chondrites p 430 N94-12132

Distribution of vanadium and melting of opaque assemblages in Efremovka CAI's p 282 N94-12141

Metal-rich meteorites from the aubrite parent body p 430 N94-12142

Oxygen isotopes as tracers of tektite source rocks: An example from the Ivory Coast tektites and Lake Bosumtwi Crater p 430 N94-12146

LEW88516 and SNC meteorites p 430 N94-12150

The Th and U abundances in chondritic meteorites p 430 N94-12151

Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160

KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161

Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163

Spectral mixing models of S-Type asteroids p 431 N94-12164

Olivine-rich asteroids, pallasitic olivine and olivine-metal mixtures: Comparisons of reflectance spectra p 431 N94-12171

Remanent magnetism of HED meteorites: Implications for their evolution and ancient magnetic fields p 431 N94-12172

The experimental production of matrix lumps within chondrules: Evidence of post-formational processes p 431 N94-12176

Flash melting of chondrule precursors in excess of 1600 C. Series 1: Type 2 (B1) chondrule composition experiments p 431 N94-12177

Trace element distributions in primitive achondrites p 431 N94-12200

Cathodoluminescence properties of components in enstatite chondrites p 432 N94-12206

The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208

Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211

Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225

Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation p 432 N94-12226

Primordial lightning: Evidence preserved in chondrites p 432 N94-12230

Micro-zoning in minerals of a Landes silicate inclusion p 432 N94-12231

A new carbon-rich phase (COPS) in Antarctic micrometeorites p 432 N94-12233

The Xe-Q in lodranites and a hint for Xe-L. FRO90011 another lodranite? p 432 N94-12239

Projectile-target mixing in melted ejecta formed during a hypervelocity impact cratering event p 432 N94-12241

The unusual metallic particles in Krymka LL3.0 chondrite p 433 N94-12253

On possibility of diamond formations in radiation process p 433 N94-12254

The carbon isotopic composition of Novo Urei diamonds p 433 N94-12255

The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256

Cronstedtite and iron sulfide mineralogy of CM-type carbonaceous chondrites from cryogenic Moessbauer spectra p 433 N94-12257

Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264

METEORITIC DAMAGE

Post-impact alteration of the Manson impact structure p 282 N94-12188

Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

METEORITIC DIAMONDS

On possibility of diamond formations in radiation process p 433 N94-12254

The carbon isotopic composition of Novo Urei diamonds p 433 N94-12255

The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256

METEORITIC MICROSTRUCTURES

Metallographic cooling rates of L-group ordinary chondrites p 429 N94-12061

Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160

METEOROID CONCENTRATION

A CM chondrite cluster and CM streams p 432 N94-12215

METEOROID SHOWERS

Meteorites from recent amor-type orbits p 429 N94-12059

METEOROIDS

The magnitude of impact damage on LDEF materials [NASA-CR-188258] p 43 N94-10666

Meteorites from recent amor-type orbits p 429 N94-12059

A CM chondrite cluster and CM streams p 432 N94-12215

METEOROLOGICAL CHARTS

Use of ERS-1 scatterometer winds in Canadian forecast centres p 250 N94-12504

METEOROLOGICAL INSTRUMENTS

The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992 [AD-A264922] p 289 N94-11853

METEOROLOGICAL PARAMETERS

Database blending for the climatology of cloud statistics program [AD-A265034] p 283 N94-10336

Parametric analysis of atmospheric processes [NASA-CR-192523] p 347 N94-10757

The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113

TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991 [INPE-5497-TDI/512] p 230 N94-11179

Global monitoring of atmospheric properties by the EOS MODIS [NASA-TM-109237] p 231 N94-11485

Development of a graphical user interface and graphics display for the WIND system [DE93-011780] p 285 N94-11614

Characteristic scales and vortex features of mesoscale vortices observed by the satellites during the winter p 199 N94-11943

Scatterometer observations: Review p 201 N94-11956

An atmospheric boundary layer stability estimator for urban areas [AD-A265189] p 279 N94-12422

A study of the Merritt Island, Florida sea breeze flow regimes and their effect on surface heat and moisture fluxes [NASA-CR-4537] p 286 N94-12580

An integrated approach to total end-to-end quality control of ocean data in the real-time environment p 211 N94-12662

Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663

METEOROLOGICAL RADAR

Impact of shutting down en route primary radars within CONUS interior [DOT-VNTSC-FAA-93-1] p 23 N94-11626

Rainfall-runoff estimation using digital radar [AD-A265390] p 286 N94-12408

METEOROLOGICAL SATELLITES

Database blending for the climatology of cloud statistics program [AD-A265034] p 283 N94-10336

Meteorological Satellite Center [MSC-TN-26] p 190 N94-11079

Simulation of images of water vapor channel and infrared split channel p 190 N94-11081

Statistical study on the regional and seasonal distribution of fog in the far east region by using GMS imagery p 190 N94-11082

Overview of training seminar for the use of Japanese Earth Resources Satellite-1 (JERS-1) data p 190 N94-11083

METEOROLOGICAL SERVICES

Development of a graphical user interface and graphics display for the WIND system [DE93-011780] p 285 N94-11614

METEOROLOGICAL SOLENOIDS

Characteristic scales and vortex features of mesoscale vortices observed by the satellites during the winter p 199 N94-11943

METEOROLOGY

Preliminary results of the comparison of ATSR measurements with in situ sea temperatures [DE93-013399] p 287 N94-10517

Environmental Sciences Division [DE93-013865] p 264 N94-10650

The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113

An overview of intertropical convergence and intertropical discontinuity [DE93-619229] p 277 N94-11603

Development of a graphical user interface and graphics display for the WIND system [DE93-011780] p 285 N94-11614

Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures [AD-A264920] p 245 N94-11851

The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992 [AD-A264922] p 289 N94-11853

METHANE

Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224

Conversion of acetic acid to methane by thermophiles [DE93-014433] p 300 N94-10652

Solid-state structures of guanidinium methane, ethane, and trifluoromethanesulfonate [AD-A265293] p 402 N94-11654

METHOD OF MOMENTS

Design of a continuous resistively loaded monopole antenna [AD-A265852] p 138 N94-12281

METHYL ALCOHOL

Methanol pan fires in an enclosed space: Effect of pressure and oxygen concentration [AD-A266108] p 79 N94-12415

Solvent dynamical effects in electron transfer: Molecular dynamics simulations of reactions in methanol [AD-A266061] p 369 N94-12420

METHYL COMPOUNDS

Vibrational overtone activation of methylcyclopropene [AD-A265588] p 79 N94-12373

METHYLATION

Studies in bioorganic chemistry [AD-A265532] p 55 N94-12011

METHYLENE

Vibrational overtone activation of methylcyclopropene [AD-A265588] p 79 N94-12373

METRIC SPACE

S(sup 1) x S(sup 2) as a bag membrane and its Einstein-Weyl geometry [DE93-613149] p 410 N94-10635

New tests of the equivalence principle using non-metric couplings of electromagnetism and gravitation p 413 N94-11821

METRICATION

The MERMAID project p 329 N94-11426

METROLOGY

Needs for super-smooth surfaces [DE93-012482] p 382 N94-11242

MICHELSON INTERFEROMETERS

Study of Einstein-Podolsky-Rosen state for space-time variables in a two photon interference experiment p 370 N94-10582

Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013

MICROANALYSIS

Microanalysis of directionally solidified cobalt oxide-zirconia eutectic [DE93-013207] p 88 N94-10527

MICROBALANCES

The laser ablation of gold films at the electrode surface of a quartz crystal microbalance [AD-A265535] p 175 N94-12012

A novel test method for fuel thermal stability [AD-A265853] p 99 N94-12275

MICROCHANNELS

Liquid Cooled Heat Sink with through Vias (LCHS) [AD-A266008] p 73 N94-12344

MICROCOMPUTERS

Controller of serial multiplex communication channel [DE92-641157] p 336 N94-10544

MICROCRACKS

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites [AD-A265153] p 187 N94-11096

Fatigue in single crystal nickel superalloys [AD-A266116] p 85 N94-12418

MICROCRYSTALS

HRTEM in protein crystallography [DE93-610322] p 395 N94-10406

MICROELECTRONICS

RF vacuum microelectronics [AD-A266066] p 142 N94-10818

Applications of spectroscopic ellipsometry to microelectronics [AD-A265148] p 143 N94-11159

Resist materials design: Base-catalyzed chemical amplification [AD-A265286] p 145 N94-11819

Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point
[AD-A265164] p 145 N94-11884

Polymers for microelectronics
[AD-A266036] p 94 N94-12396

Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices
[AD-A265685] p 405 N94-12442

MICROGRAVITY

Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235

Reduced gravity multibody dynamics testing
[NASA-CR-192589] p 125 N94-11483

SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523

Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556

Microgravity vibration isolation technology: Development to demonstration
[NASA-TM-106320] p 1 N94-11703

An application of reduced gravity model to mesoscale eddies p 199 N94-11945

Echocardiography in the flight program
p 309 N94-11993

Space truss zero gravity dynamics
[AD-A266130] p 44 N94-12541

The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547

Research on two phase flow in microgravity
p 162 N94-12554

Modeling void growth and movement with phase change in thermal energy storage canisters
[NASA-TM-106288] p 163 N94-12576

MICROGRAVITY APPLICATIONS

Protein, glass, aerosol research, containerless processing and diagnostics technology for microgravity application p 106 N94-10112

Design of a CVD reactor for the deposition of diamond in a microgravity environment p 109 N94-10127

Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129

Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131

The surface plasmon spectroscopy as diagnostic technique in microgravity experiments
p 110 N94-10133

Microgravity experiments using TR-1A rocket
p 112 N94-10142

Thermocapillary convection instability in microgravity crystal growth p 112 N94-10172

Solidification in immiscible systems: The influence of processing conditions on resulting microstructures
p 112 N94-10174

Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180

Crystal growth from low temperature vapour phase
p 115 N94-10191

MICROHARDNESS

DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168

MICROMECHANICS

Sensor abstractions to support many-robot systems
[AD-A265907] p 180 N94-10803

Micromechanisms of fatigue crack growth and fracture toughness in metal matrix composites
[AD-A265153] p 187 N94-11096

An analysis of fiber-matrix interface failure stresses for a range of ply stress states
[NASA-TM-106999] p 67 N94-11276

Mechanical interaction between synthetic fiber and cement base matrix in FRC composites
[AD-A265310] p 73 N94-11686

Analytical models for describing the mechanical behavior of fiber reinforced composites
[AD-A265906] p 74 N94-12347

Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374

MICROMETEORITES

K/T spherules from Haiti and Wyoming: Origin, diagenesis, and similarity to some microtektites
p 281 N94-12065

A new carbon-rich phase (COPS) in Antarctic micrometeorites p 432 N94-12233

MICROMETEOROIDS

Dimensional scaling for impact cratering and perforation
[NASA-CR-188259] p 42 N94-10665

Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063

Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178

Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189

MICROORGANISMS

Spacelab J air filter debris analysis
[NASA-CR-192569] p 301 N94-11201

The role of certain infauna and vascular plants in the mediation of redox reactions in marine sediments
p 268 N94-12454

MICROPROCESSORS

User's manual for the DAD-1 data acquisition daughter board for the SuperCard-2
[DE93-012153] p 325 N94-11139

Data processing units for eight magnetospheric particle and field sensors
[AD-A264403] p 276 N94-11463

MICROSCOPES

Interferometric and optical tests of water window imaging x ray microscopes
[NASA-CR-193369] p 375 N94-10506

MICROSCOPY

Ballistic electron transport studies using BEEM
[AD-A266029] p 369 N94-12395

MICROSTRIP DEVICES

Development of microstrip gas chamber and application to imaging gamma-ray detector
[DE93-754294] p 34 N94-11041

MICROSTRUCTURE

The microstructure and mechanical properties of hot worked FeAl intermetallic alloys p 58 N94-10020

Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063

Solidification in immiscible systems: The influence of processing conditions on resulting microstructures
p 112 N94-10174

TEM study of a space processed Al-Al2O3 metallic composite p 75 N94-10186

Pulsatile instability in rapid directional solidification: Strongly-nonlinear analysis p 115 N94-10188

Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194

Undercooled W-Re and Mo-Re drops in an ultra high vacuum drop tube p 86 N94-10195

Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527

Preparation of carbon monoliths having tailored pore structure from porous polymer precursors
[DE93-011576] p 89 N94-10958

Synthesis and properties of nanophase materials
[DE93-011757] p 397 N94-10962

Microstructure and associated properties of YB2Cu3O(x) superconductors prepared by melt processing techniques
[DE93-010675] p 398 N94-11004

Damping measurements for ultra-high carbon steel/brass laminates
[DE93-011886] p 82 N94-11076

Fibre reinforced polymer matrix composites: Microstructure and mechanical properties
[DLR-FB-92-28] p 66 N94-11085

Damping mechanisms in chemically vapor deposited SiC fibers
[NASA-TM-106334] p 66 N94-11135

Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281

High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment
[DE93-012430] p 72 N94-11368

Organometallic chemical vapor deposition and characterization of ZnGe(1-x)Si(x)P2-Ge alloys on GaP substrates p 400 N94-11443

The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy
[DE93-013221] p 84 N94-11488

Mechanical interaction between synthetic fiber and cement base matrix in FRC composites
[AD-A265310] p 73 N94-11686

Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites
[AD-A265177] p 92 N94-11876

Chondrite thermal histories from Low-CA pyroxene microstructures: Autometamorphism versus prograde metamorphism revisited p 429 N94-12105

Fracture behavior of ionomers and ionomeric blends
[AD-A265379] p 94 N94-12407

Microstructure-based fatigue life prediction methods for naval steel structures
[AD-A265429] p 85 N94-12426

Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices
[AD-A265685] p 405 N94-12442

Deformation mechanisms in tungsten single crystals in ballistic impact experiments
[AD-A265701] p 405 N94-12563

MICROWAVE AMPLIFIERS

Wide band 140 GHz TWTA p 132 N94-10514

Nonlinear analysis of a magnicon output cavity
[AD-A265342] p 145 N94-12424

MICROWAVE ATTENUATION

A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665

MICROWAVE CIRCUITS

Three-cavity circuit studies of the Maryland gyroklystron
[DE93-010173] p 145 N94-11645

Limited bandwidth microwave filter
[AD-D015744] p 145 N94-12322

Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773

MICROWAVE EQUIPMENT

Microwave multiplexer with channels of varying fractional bandwidths
[AD-D015754] p 140 N94-10389

MICROWAVE FILTERS

Limited bandwidth microwave filter
[AD-D015744] p 145 N94-12322

MICROWAVE IMAGERY

Summer Arctic ice concentrations and characteristics from SAR and SSM/I data p 241 N94-11762

Ocean wave detection by SAR p 197 N94-11932

On the determination of the SAR ocean surface scattering patch size p 197 N94-11933

Measurements of ocean cross-section with a side-looking airborne radar p 201 N94-11954

SSMI wind speed variability over the Pacific Ocean
p 207 N94-12637

Microwave radiometry of ice cover in polar regions
p 210 N94-12655

MICROWAVE OSCILLATORS

Dielectric resonator
[US-PATENT-4,580,116] p 141 N94-10668

MICROWAVE POWER BEAMING

Construction and testing of a space ready rectenna
[NASA-CR-193310] p 137 N94-11357

MICROWAVE RADIOMETERS

Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-193627] p 274 N94-10726

Physical processes of microwave backscattering from laboratory wind-wave surfaces p 200 N94-11952

Dependence of oceanic microwave emission on wind direction p 201 N94-11957

On the variability of wind speeds in the North Western Pacific observed by altimeter/GEOSAT and SSM/I/DMSP p 201 N94-11960

Sampling and position effects in the Electronically Steered Thinned Array Radiometer (ESTAR)
[NASA-TM-108998] p 245 N94-12432

Validation of the ATSR/M microwave radiometer data
p 252 N94-12511

SSMI wind speed variability over the Pacific Ocean
p 207 N94-12637

Microwave radiometry of ice cover in polar regions
p 210 N94-12655

Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663

MICROWAVE RESONANCE

Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880

MICROWAVE SCATTERING

ERS-1 studies at the Department of Oceanography from Space, IFREMER/Brest (France) p 233 N94-11712

The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

On the determination of the SAR ocean surface scattering patch size p 197 N94-11933

Experiment and results of the Italian activity in the field of ocean microwave backscattering p 200 N94-11953

Scatterometer observations: Review
p 201 N94-11956

The microwave backscattering from wind waves
p 201 N94-11959

A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665

MICROWAVE SIGNATURES

Arctic sea ice microwave signature and geophysical processes study p 240 N94-11754

MICROWAVE SOUNDING
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
MICROWAVE SPECTRA
Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707
The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708
MICROWAVE TRANSMISSION
Construction and testing of a space ready rectenna [NASA-CR-193310] p 137 N94-11357
One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere [DE93-009517] p 137 N94-11466
MICROWAVES
Single-electron tunneling [DE93-013337] p 396 N94-10648
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices [DE93-621609] p 66 N94-11143
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron [DE93-621666] p 392 N94-11214
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds p 426 N94-11582
Search for structures in the cosmic microwave background radiation [INPE-5491-TDI/508] p 484 N94-12357
MIE SCATTERING
Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189
Light scattering from a spherical particle on a conducting plane. Part 1: Normal incidence [AD-A265920] p 383 N94-12341
MIGRATION
Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938
MILITARY AIRCRAFT
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers [AD-A264079] p 89 N94-11107
MILITARY OPERATIONS
Assessing the adequacy of the industrial base [AD-A264954] p 417 N94-11856
Improved Many-On-Many ROUTE software description [DE93-013961] p 334 N94-12608
MILITARY PSYCHOLOGY
The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research [AD-A265278] p 313 N94-11701
MILITARY SPACECRAFT
Fuzzification of ASAT's rule based aimpoint selection [AD-A266068] p 43 N94-11223
MILITARY TECHNOLOGY
Assured Mission Support Space Architecture (AMSSA) study p 348 N94-11573
MILLIMETER WAVES
Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels [NASA-CR-193627] p 274 N94-10726
MILLING
Titanium alloys milling assistance by high pressure lubricoolant jet [DE93-013302] p 82 N94-11008
MIMD (COMPUTERS)
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems [DE93-009838] p 335 N94-10257
Layering techniques for development of parallel systems: An algebraic approach [MEMO-INF-92-62] p 335 N94-10277
A parallel implementation of particle tracking with space charge effects on an Intel iPSC/860 [DE93-012307] p 335 N94-10340
Flexible language constructs for large parallel programs [NASA-CR-191478] p 326 N94-11196
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL) [NASA-TM-106238] p 327 N94-11232
A heterogeneous graphics procedure for visualization of massively parallel solutions [DE93-009628] p 336 N94-11270
Parallel molecular dynamics with the embedded atom method [DE93-010683] p 367 N94-11455
MIMO (CONTROL SYSTEMS)
Utilizing quantitative feedback theory design technique for flight control system p 32 N94-11501
MINERAL DEPOSITS
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F [NASA-CR-193095] p 435 N94-12015
Increased depth-diameter ratios in the Medusae Fossae Formation deposits of Mars p 439 N94-12043
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core p 281 N94-12056
MINERAL EXPLORATION
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247
MINERALOGY
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F [NASA-CR-193095] p 435 N94-12015
Moessbauer spectroscopy of the SNC meteorite Zagami p 428 N94-12016
Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035
Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars p 281 N94-12055
Alkali-granitoids as fragments within the ordinary chondrite Adzhi-Bogdo: Evidence for highly fractionated, alkali-granitic liquids on asteroids p 429 N94-12069
Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079
Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091
Mineralogy versus bulk composition of the carbonaceous chondrite clast Kaidun 2 p 429 N94-12101
Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104
The EET87513 clast N: A CM2 fragment in an HED polymict breccia p 453 N94-12117
Venus mountain-top mineralogy: Misconceptions about pyrite as the high radar-reflecting phase p 455 N94-12129
LEW88516 and SNC meteorites p 430 N94-12150
First results of the seven-color asteroid survey p 430 N94-12162
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163
Crystal-chemistry and partitioning of REE in whitlockite p 408 N94-12174
Post-impact alteration of the Manson impact structure p 282 N94-12188
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214
Micro-zoning in minerals of a Landes silicate inclusion p 432 N94-12231
The Xe-Q in Iodranites and a hint for Xe-L. FRO90011 another Iodranite? p 432 N94-12239
Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations p 476 N94-12242
Measuring and distinguishing compositional and maturity properties of lunar soils by remote VIS-NIR spectroscopy p 478 N94-12251
Cronstedtite and iron sulfide mineralogy of CM-type carbonaceous chondrites from cryogenic Moessbauer spectra p 433 N94-12257
MINERALS
Distribution of mineral aerosols over the North Pacific p 204 N94-11976
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core p 281 N94-12056
Using high spectral resolution spectrophotometry to study broad mineral absorption features on Mars p 446 N94-12077
Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184
Trace element distributions in primitive achondrites p 431 N94-12200
Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264
MINIATURIZATION
Design and development of a miniature column-based interface (MCBI) stress gage [AD-A266054] p 170 N94-10873
MINKOWSKI SPACE
On local frame fields and fermion dynamics in space with nontrivial topologies [DE93-617657] p 349 N94-10548
Non-Euclidean space for local hidden variables [DE93-621341] p 344 N94-11032
Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088
MINNESOTA
Satellite inventory of Minnesota forest resources [NASA-CR-193565] p 231 N94-11521
MINORITIES
Flight Dynamics Directorate (FDD) Historically Black Colleges and Universities (HBCU's) database managment system: A user's guide [AD-A264947] p 419 N94-11288
A summer program in mathematics and computer science for academically oriented student [AD-A263467] p 415 N94-11517
Pattern of federal procurement from minority and women-owned small business [PB93-189355] p 417 N94-11844
MINORITY CARRIERS
High temperature annealing of minority carrier traps in irradiated MOCVD n(+)p InP solar cell junctions p 48 N94-11382
Measurement of the minority carrier diffusion length and edge surface-recombination velocity in InP p 49 N94-11388
Surface passivation of InP solar cells with InAlAs layers p 49 N94-11389
Investigation of ZnSe-coated silicon substrates for GaAs solar cells p 52 N94-11405
MIRROR FUSION
Applying design principles to fusion reactor configurations for propulsion in space [NASA-TM-108247] p 47 N94-11053
MIRRORS
Zerodur polishing process for high surface quality and high efficiency [DE93-012596] p 87 N94-10271
Spin characteristics of ion beams during the motion of electromagnetic elements [DE93-617448] p 364 N94-10848
Damage thresholds of fluoride multilayers at 355 nm [DE93-009523] p 90 N94-11230
Needs for super-smooth surfaces [DE93-012482] p 382 N94-11242
Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189
Light scattering from a spherical particle on a conducting plane. Part 1: Normal incidence [AD-A265920] p 383 N94-12341
Comparison of multiresolution techniques for digital signal processing [AD-A265364] p 138 N94-12406
MIS (SEMICONDUCTORS)
Squeezed states of electrons and transitions of the density of states p 370 N94-10593
MISSILE DETECTION
Estimation with multisensor/multiscan detection fusion [AD-A265673] p 138 N94-12338
MISSILE TRACKING
Ultraviolet plume instrument description and plume data reduction methodology [AD-A266141] p 54 N94-11643
MISSION PLANNING
Results of mission preparation support to microgravity experiments on board of Eureca 1 p 111 N94-10138
Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139
Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179
Aerodynamic and aerothermal challenges for the design of the Hermes spaceplane p 3 N94-10423
An analysis of the modes and states for generic avionics [NASA-CR-188253] p 27 N94-10664
Parametric analysis of atmospheric processes [NASA-CR-192523] p 347 N94-10757
Lunar-Ultraviolet Telescope Experiment (LUTE) integrated program plan [NASA-CR-193267] p 424 N94-11356
Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556
Operational radiological support for the US manned space program p 318 N94-11561
On-orbit refueling p 38 N94-11565
The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles [AD-A265175] p 332 N94-11874
The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929
Conceptual studies report on lunar and planetary exploration [NASDA-TK-SS0438] p 481 N94-12323

Significance and scenarios of lunar and planetary exploration missions p 482 N94-12324
Unmanned lunar exploration mission
p 482 N94-12325
Manned lunar exploration missions
p 482 N94-12326
Mars exploration missions p 482 N94-12327
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Summary of studies on JEM utilization experiment projects p 161 N94-12548
METEOSAT second generation programme SEVIRI: An enhanced visible and IR radiometer for meteorology
p 212 N94-12667

MISSISSIPPI RIVER (US)
Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685

MITOCHONDRIA
Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats
[AD-A265309] p 301 N94-11861

MIXED CRYSTALS
Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry
[DE93-010871] p 394 N94-10301

MIXED OXIDES
Grain boundaries in complex oxides
[DE93-013986] p 398 N94-11012

MIXING
Projectile-target mixing in melted ejecta formed during a hypervelocity impact cratering event
p 432 N94-12241

MIXING LAYERS (FLUIDS)
The kinematics of buoyancy induced mixing
p 123 N94-10239
Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924
Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312
Plane mixing layer vortical structure kinematics
p 159 N94-12313
Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314

MIXING LENGTH FLOW THEORY
Why convective heat transport in the solar nebula was inefficient p 458 N94-12143
Mixing in a stratified shear flow: Energetics and sampling p 159 N94-12311

MIXTURES
Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215
Measurement of viscosity, density and gas solubility of refrigerant blends
[DE93-014772] p 89 N94-11145

MODAL RESPONSE
Nonlinear response of a clamped-clamped beam with internal resonance under sinusoidal excitation
p 186 N94-10897
Dynamic tests on the NASA Langley CSI evolutionary model p 45 N94-11320

MODEL REFERENCE ADAPTIVE CONTROL
Model reference adaptive control (MRAC) with applications to robotics p 339 N94-11640

MODELS
Neural network model selection using asymptotic jackknife estimator and cross-validation method
[AD-A264960] p 339 N94-11289

MODEMS
Two way time transfer results at NRL and USNO
p 353 N94-10983
Performances of a date dissemination code on telephone lines using commercial modems
p 139 N94-10984

MODULATION
Controlling chaotic behavior in CO2 and other lasers
[AD-A264811] p 174 N94-10870
To the theory of irregular auto modulation in electron beam-backward electromagnetic wave dynamic system
[DE93-620982] p 133 N94-11030
Telemetering and telecommunications research
[NASA-CR-193235] p 42 N94-11297
Experimental and theoretical investigations of Cs-Ba vapor tacitron inverter for power conditioning in space power systems
[DE93-012971] p 48 N94-11372

MODULATION TRANSFER FUNCTION
Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment
[NASA-CR-194030] p 139 N94-12778

MODULATORS
Variable rate transfer of optical information
[AD-D015758] p 418 N94-10374
Controlling chaotic behavior in CO2 and other lasers
[AD-A264811] p 174 N94-10870
Smart spatial light modulator research and development
[AD-A264928] p 382 N94-11286
GaAs sigma-delta modulator modeling for Analog to Digital Converters (ADC's)
[AD-A263419] p 144 N94-11516

MODULES
A tool for generation of expert system shells
[INPE-5493-TDI/510] p 325 N94-11181

MODULUS OF ELASTICITY
High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition
[DE93-013977] p 398 N94-11115

MOISTURE CONTENT
Photochemical modelling of Venus clouds using Pioneer Venus data
[NASA-CR-194108] p 434 N94-10823
Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160
Analytic expression for epithermal neutron spectra amplitudes as a function of water content
p 473 N94-12227
Cloud liquid water content over the Pacific Ocean tropical zone derived from ship microwave radiometric measurement p 225 N94-12743

MOLDING MATERIALS
Universal adjustable mould for antenna reflectors
p 59 N94-10027

MOLDS
Universal adjustable mould for antenna reflectors
p 59 N94-10027

MOLECULAR BEAM EPITAXY
Crack suppression in GaInSb buffer layers initially under tensile stress
[DE93-012839] p 396 N94-10745
Rapid thermal processing for strained-layer semiconductor devices
[DE93-013754] p 396 N94-10809
Memory effects in the organometallic chemical beam epitaxy of compound semiconductors
[NASA-CR-193106] p 399 N94-11439
Ballistic electron transport studies using BEEM
[AD-A266029] p 369 N94-12395

MOLECULAR BEAMS
In situ secondary ion mass spectrometry analysis
[DE93-012185] p 76 N94-11140
Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

MOLECULAR CHAINS
Structural and electronic properties of atomic chains
[DE93-617758] p 366 N94-11349

MOLECULAR CLOUDS
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds
p 426 N94-11582
Initiating solar system formation through stellar shock waves p 448 N94-12090

MOLECULAR COLLISIONS
Collision-induced squeezing in a harmonic oscillator
p 379 N94-10597

MOLECULAR DIFFUSION
Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319
Mapping closures for turbulent combustion
[AD-A265671] p 79 N94-12378

MOLECULAR ENERGY LEVELS
Dynamics of charge-transfer excited states relevant to photochemical energy conversion
[DE93-013981] p 263 N94-11116

MOLECULAR EXCITATION
Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287
Review of SHARC 2.0 O3 kinetics and spectroscopy
[AD-A265481] p 274 N94-10496
Phasing operator for two oscillators in classical field
p 370 N94-10579
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds
p 426 N94-11582
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces
p 81 N94-12156

MOLECULAR GASES
Dynamics of dissociation versus ionization in strong laser fields
[DE93-009261] p 173 N94-10287
Quantum dynamics of helium clusters
[AD-A266060] p 411 N94-10874

MOLECULAR INTERACTIONS
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

MOLECULAR PHYSICS
Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010
Parallel molecular dynamics with the embedded atom method
[DE93-010683] p 367 N94-11455
Chaos, entropy, and reversibility: A simple example
p 31 N94-11495
A molecular dynamics simulation code ISIS
[DE93-753187] p 368 N94-11592

MOLECULAR RELAXATION
Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids
[AD-A264689] p 399 N94-11263

MOLECULAR ROTATION
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds
p 426 N94-11582

MOLECULAR STRUCTURE
Chemical pattern formation under microgravity
p 121 N94-10227
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
Recent advances in electron momentum spectroscopy
[DE93-610149] p 361 N94-10333
Site dependence of the apparent shape of a molecule in STM images: Benzene on Pt(111)
[AD-A263488] p 365 N94-11093
Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids
[AD-A264689] p 399 N94-11263
Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684
The global potential energy surfaces of the lowest two 1A' states of the ozone molecule: Theoretical determination and analysis p 267 N94-12269
Fracture behavior of ionomers and ionomeric blends
[AD-A265379] p 94 N94-12407
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

MOLECULAR WEIGHT
Synthesis, characterization, and modification of poly(organophosphazenes), that bear both 2,2,2-trifluoroethoxy and phenoxy groups
[AD-A264913] p 92 N94-11847
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A264914] p 92 N94-11848
Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425

MOLECULES
Pulsed plasma processing for control of diesel engine emissions
[DE93-011884] p 181 N94-11247
A new decomposition strategy for parallel bonded molecular dynamics
[DE93-009839] p 366 N94-11284
FEFF5: An ab initio multiple scattering XAFS code
[DE93-011000] p 367 N94-11470

MOLYBDENUM
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system
[DE93-011879] p 143 N94-11273

MOLYBDENUM ALLOYS
A history of tungsten- and molybdenum-base alloys
[DE93-010283] p 82 N94-11108

MOLYBDENUM SULFIDES
Low temperature pathways to Chevrel phases via reduced molybdenum sulfide cluster complexes
[DE93-013282] p 405 N94-12599

MOMENTS OF INERTIA
Porosity and the ecology of icy satellites
p 431 N94-12186
Accuracy and repeatability of the standard automated mass properties measurement system
[AD-A265897] p 316 N94-12346

MOMENTUM
On a Lagrange-Hamilton formalism describing position and momentum uncertainties p 349 N94-10583

Momentum and heat frictions between fast ions and thermal plasma species
[DE93-771240] p 390 N94-11149
Momentum induced by laser-tissue interaction
[DE93-010737] p 301 N94-11667
Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643

MOMENTUM TRANSFER
Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551
Momentum management in redundant manipulators for vibration suppression
[NASA-CR-194112] p 180 N94-10821
Accretion disk viscosity and internal waves in disks
p 153 N94-11615
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves
p 195 N94-11922
Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925

MONGOLIA
National space programmes and application of the remote sensing data in Mongolia p 36 N94-10686

MONITORS
Measurement of display transfer characteristics using test pictures
[BBC-RD-1992/13] p 133 N94-11023

MONKEYS
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli
[AD-A265168] p 324 N94-11099
Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness
[AD-A265657] p 302 N94-12441

MONOCHROMATORS
Moncchromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

MONOMERS
Photoinitiated radical polymerization of liquid monomers in microgravity p 124 N94-10246
New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107
The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase
[AD-A265799] p 94 N94-12381
Synthesis and polymerization of oligomeric multiple aromatic ether-containing phthalonitriles
[AD-D015729] p 94 N94-12399

MONOPOLE ANTENNAS
Design of a matching network for dipole antennas
[AD-A265115] p 136 N94-11158
Design of a continuous resistively loaded monopole antenna
[AD-A265852] p 138 N94-12281

MONOPOLES
Design of a continuous resistively loaded monopole antenna
[AD-A265852] p 138 N94-12281

MONOTECTIC ALLOYS
Marangoni motion during melting of a hypermonotectic alloy: Numerical simulations for the D2 experiment IHF04 p 113 N94-10177

MONTE CARLO METHOD
Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030
Heat analysis of thermoplastic components during the initial stages of manufacturing: A probabilistic approach
p 60 N94-10031
Techniques, processes, and measures for software safety and reliability
[DE93-012379] p 322 N94-10347
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method
p 7 N94-10449
Monte Carlo simulations of a two-dimensional hard dimer system
[DE93-613535] p 361 N94-10502
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507
Acceleration of positrons in supernova shocks
[NASA-CR-193713] p 425 N94-10511
Monte Carlo simulations of phase transformations in Fe-Cr alloys
[DE93-013847] p 81 N94-10522
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837
ACARA user's manual
[NASA-TM-106277] p 183 N94-11167
Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method
p 205 N94-11980
Venus resurfacing rates: Constraints provided by 3-D Monte Carlo simulations p 453 N94-12119
PDF approach for turbulent scalar field: Some recent developments p 160 N94-12315
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725

MONTMORILLONITE
Reflectance spectra of sulfate-and carbonate-bearing Fe(3+)-doped montmorillonites as Mars soil analogs
p 445 N94-12070

MOON
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152
Mission to the Moon: An ESA study on future exploration p 460 N94-12153
Exploration planning in the context of human exploration and development of the Moon p 474 N94-12229
Significance and scenarios of lunar and planetary exploration missions p 482 N94-12324
Technical problems on lunar an planetary exploration mission p 482 N94-12328

MOORING
Real-time tomography mooring
[AD-A264923] p 289 N94-11854

MORPHOLOGY
Ground results of the Mephisto program: Benefits and space experiments orientation p 86 N94-10197
Physical studies of planetary and satellite surfaces
[NASA-CR-193545] p 434 N94-10817
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents
[AD-A265149] p 143 N94-11160
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
The morphologies of distant radio galaxies
p 426 N94-11597
Yana ring structure, North-Eastern Siberia: A possible counterpart of coronae on Venus p 282 N94-12121
Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158
Small volcanoes in Tempe Terra, Mars: Their detailed morphometry and inferred geologic significance
p 469 N94-12202

MORTALITY
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548
Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

MOSAICS
Radarmap of Germany: First mosaic and classification
p 246 N94-12477

MOSSBAUER EFFECT
A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source
[DE93-009795] p 75 N94-10338
The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3
[DE93-617882] p 395 N94-10525
X ray and gamma ray spectroscopy of solids under pressure
[DE93-014847] p 76 N94-10653
Moessbauer spectroscopy of the SNC meteorite Zagami p 428 N94-12016
Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations
p 476 N94-12242
Cronstedtite and iron sulfide mineralogy of CM-type carbonaceous chondrites from cryogenic Moessbauer spectra p 433 N94-12257

MOTION PERCEPTION
Visual psychophysics of egomotion
[AD-A265253] p 304 N94-11681

MOTION SICKNESS
Motion and spatial disorientation systems: Special research capabilities
[AD-A265155] p 303 N94-11097
Promethazine and its use as a treatment for space motion sickness p 312 N94-11550
Update on the incidence and treatment of space motion sickness p 312 N94-11551
Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

MOTION SIMULATION
Mechanical analysis of parallel manipulators with simulation, design, and control applications
[ISBN-0-315-72013-1] p 181 N94-11156

MOTOR VEHICLES
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector
[PB93-194165] p 267 N94-11845

MOUNTAINS
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method
p 205 N94-11980
Monitoring of snowcover in high mountain terrain with ERS-1 SAR p 247 N94-12482

MSM (SEMICONDUCTORS)
Effects of solar cell environment on contact integrity
p 49 N94-11387

MULTICHANNEL COMMUNICATION
An efficient medium access control strategy for high speed WDM multiaccess networks
[MEMO-INF-92-74] p 131 N94-10165

MULTIGRID METHODS
Hypersonic flow computations around re-entry vehicles p 9 N94-10461
Looking for O(N) Navier-Stokes solutions on non-structured meshes
[NASA-CR-191472] p 345 N94-11277
Viscous analysis of three-dimensional rotor flows using a multigrid method
[NASA-TM-106266] p 152 N94-11481
Grid optimization and multigrid techniques for fluid flow and transport problems p 154 N94-11824
Application of incremental unknowns to the Burgers equation p 156 N94-12293
Towards a cell-vertex Navier-Stokes algorithm for three-dimensional structured/unstructured meshes
[ARA-MEMO-366] p 161 N94-12437

MULTIMEDIA
Development of a hypermedia knowledge base of aircraft fire safety regulations p 21 N94-10793
Design issues for high performance engineering information systems
[AD-A264839] p 420 N94-11520
The use of communication technology in medicine
p 306 N94-11800

MULTIPHASE FLOW
Nonlinear aspects of transonic aeroelasticity
p 2 N94-10357
Nonlinear aspects of transonic aeroelasticity
[UTIAS-RN-345] p 15 N94-11857

MULTIPHOTON ABSORPTION
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light
p 376 N94-10575

MULTIPLE ACCESS
An efficient medium access control strategy for high speed WDM multiaccess networks
[MEMO-INF-92-74] p 131 N94-10165
Optimal routing of IP packets to multi-homed servers
[DE93-010949] p 133 N94-10709

MULTIPLEXING
Multiplexed and distributed optical fibre sensors
p 64 N94-10065
A fiber optic network system with low crosstalk using code-division multiplexing
[AD-D015763] p 374 N94-10376
Microwave multiplexer with channels of varying fractional bandwidths
[AD-D015754] p 140 N94-10389
Controller of serial multiplex communication channel
[DE92-641157] p 336 N94-10544
SONET synchronization: What's happening
p 355 N94-10992
Analysis of the eastern range multiplexed fiber optic IRIG B120 distribution system p 139 N94-10996
Holographic multiplexing for 3D optical memory
[AD-A266099] p 171 N94-11420
Superconducting SQUID amplifiers for IR detectors and other applications, phase 2
[AD-A265447] p 145 N94-12333

MULTIPOLAR FIELDS
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221

MULTIPOLES
Model for the pomeron
[DE93-617693] p 362 N94-10552

MULTIPROCESSING (COMPUTERS)
Efficient partitioning and assignment on programs for multiprocessor execution
[NASA-CR-193458] p 324 N94-10942
The Zipcode message-passing system
[DE93-011958] p 336 N94-11027

Node assignment in heterogeneous computing
[NASA-CR-4534] p 142 N94-11131
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL)
[NASA-TM-106238] p 327 N94-11232
Alleviating memory contention in matrix computations on large-scale shared-memory multiprocessors
[AD-A265009] p 320 N94-11294
Scalable concurrent programming project
[AD-A266097] p 328 N94-11295
Scalable spin locks for multiprogrammed systems
[AD-A265007] p 337 N94-11650

MULTIPROGRAMMING
Scalable concurrent programming project
[AD-A266097] p 328 N94-11295
Scalable spin locks for multiprogrammed systems
[AD-A265007] p 337 N94-11650

MULTISENSOR APPLICATIONS
Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338

MULTISPECTRAL BAND SCANNERS
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces
p 81 N94-12156

MULTISTATIC RADAR
Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049

MULTIVARIATE STATISTICAL ANALYSIS
A multi-variance analysis in the time domain
p 146 N94-10999
Applications of multivariate analysis
[AD-A265250] p 347 N94-11882

MUONS
Conceptual design report for the SDC barrel and intermediate muon detectors based on a jet-type drift chamber
[DE93-753173] p 367 N94-11510
Experiments with energetic (mu)d and (mu)t emitted from solid hydrogen
[DE93-010252] p 373 N94-12542

MURCHISON METEORITE
Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029
Determining the relative extent of alteration in CM chondrites p 430 N94-12114
A new carbon-rich phase (COPS) in Antarctic micrometeorites p 432 N94-12233

MUSCULAR FUNCTION
Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats
[AD-A265309] p 301 N94-11861

MUSCULAR STRENGTH
Exercise countermeasures for bed-rest deconditioning
[NASA-TM-103987] p 300 N94-11191

MUSCULOSKELETAL SYSTEM
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546

MUTATIONS
Proceedings of the Symposium on Radiation Research in Life Science
[DE93-754137] p 300 N94-10888

MYLAR (TRADEMARK)
Thermal testing of aluminized Mylar
[NASA-TM-108414] p 89 N94-11175

N

NACELLES
Application of composite materials for production nacelle structures p 56 N94-10006
The application of advanced materials to aircraft nacelle structures p 57 N94-10011

NARROWBAND
Continued development of an ultra-narrow bandpass filter for solar research
[NASA-CR-194169] p 381 N94-10735
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay
[DE93-620976] p 143 N94-11365

NASA PROGRAMS
The NASA Lewis Research Center SBIR program: An assessment
[NASA-TM-106205] p 485 N94-10356
NASA Marshall Space Flight Center solar observatory report, January - June 1993
[NASA-TM-108417] p 423 N94-10866
National Aero-Space Plane: A need for program direction and funding decisions
[GAO/NSIAD-93-207] p 416 N94-10910
NASA procurement: Proposed changes to the Jet Propulsion Laboratory contract. Report to Congressional Requesters
[GAO/NSIAD-93-178] p 416 N94-10941
Advanced statistical methods for improved data analysis of NASA astrophysics missions
[NASA-CR-193514] p 425 N94-10943
The 1987 RIACS annual report
[NASA-CR-193220] p 324 N94-11046
The role of metrics and measurements in a software intensive total quality management environment
p 329 N94-11428
Development and application of an acceptance testing model p 330 N94-11432
Financial management: NASA's financial reports are based on unreliable data
[AD-A265690] p 418 N94-12443

NASA SPACE PROGRAMS
Transportation systems analyses: Volume 1: Executive Summary
[NASA-CR-192583] p 41 N94-10826
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827

NASTRAN
NASTRAN modeling of flight test components for UH-60A airloads program test configuration
[NASA-CR-193614] p 186 N94-10937

NATIONAL AEROSPACE PLANE PROGRAM
CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422
National Aero-Space Plane: A need for program direction and funding decisions
[GAO/NSIAD-93-207] p 416 N94-10910
An environmental study of the National Aerospace Plane
[AD-A266071] p 25 N94-10945

NATIONAL AIRSPACE SYSTEM
National Airspace System operational concept
[DOT/FAA/SE-93/1] p 23 N94-10933
FAA air traffic activity
[AD-A266043] p 22 N94-12397

NATIONAL LAUNCH VEHICLE PROGRAM
The National Launch System Advanced Development Program: A brief overview p 40 N94-11576

NATURAL GAS
Vehicular fleet operation on natural gas and propane: An overview
[PB93-194603] p 98 N94-10844
Business fleet refueling assessment
[PB93-189892] p 98 N94-11017

NATURAL LANGUAGE (COMPUTERS)
A real-time spoken-language system for interactive problem solving
[AD-A266046] p 324 N94-11104
Transactions of the 10th Army Conference on Applied Mathematics and Computing
[AD-A265098] p 318 N94-11678
Machine translation technology: A potential key to the information age
[PB93-134336] p 421 N94-12385
Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session)
[DE93-013470] p 340 N94-12428

NATURAL LANGUAGE PROCESSING
Automatic word categorization: An information-theoretic approach
[CS-9209] p 419 N94-10903

NATURAL SATELLITES
Physical studies of planetary and satellite surfaces
[NASA-CR-193545] p 434 N94-10817
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

NAVIER-STOKES EQUATION
Numerical calculation of scramjet inlet flow
[NAL-TR-1174T] p 27 N94-10370
Experimental, analytical, and computational methods applied to hypersonic compression ramp flows
p 6 N94-10444
A CFD-based aerodynamic design procedure for hypersonic wind-tunnel nozzles p 9 N94-10458
Hypersonic multi block flow simulations around space vehicles including non-equilibrium chemistry
p 9 N94-10460
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-2] p 10 N94-10468
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-3] p 10 N94-10469
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Computation using q-omega 2 equation turbulence model
[PAPER-2D-4] p 10 N94-10470
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoils: Computation using Baldwin-Lomax turbulence model
[PAPER-2D-5] p 11 N94-10471
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft
[PAPER-2D-7] p 11 N94-10472
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-9] p 11 N94-10474
Flow analysis around ONERA model M5 configuration
[PAPER-3D-1] p 11 N94-10477
Flow analysis around ONERA model M5 configuration
[PAPER-3D-2] p 12 N94-10478
Flow analysis around ONERA model M5 configuration
[PAPER-3D-4] p 12 N94-10480
Flow analysis around ONERA model M5 configuration
[PAPER-3D-5] p 12 N94-10481
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover
[NASA-CR-4532] p 13 N94-10758
A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct
[NASA-TM-106250] p 39 N94-10764
Development of an unstructured solution adaptive method for the quasi-three-dimensional Euler and Navier-Stokes equations
[NASA-CR-191161] p 28 N94-10816
A dynamically adaptive mesh method for internal flows
p 149 N94-10896
Combustion chamber analysis code
[NASA-CR-192585] p 46 N94-10934
New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations
[NASA-TM-106226] p 150 N94-10939
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions
[AD-A265275] p 150 N94-11014
Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow
[DE93-011590] p 14 N94-11111
High order accurate solutions of viscous problems
[NASA-TM-106267] p 151 N94-11253
Looking for O(N) Navier-Stokes solutions on non-structured meshes
[NASA-CR-191472] p 345 N94-11277
Computation of hypersonic nosetip heat transfer rates for an M829-like projectile
[AD-A263226] p 16 N94-11870
A local dynamic model for large eddy simulation
p 155 N94-12285
Application of incremental unknowns to the Burgers equation p 156 N94-12293
Direct numerical simulation of turbulent flow over a backward-facing step p 156 N94-12296
Towards a cell-vertex Navier-Stokes algorithm for three-dimensional structured/unstructured meshes
[ARA-MEMO-366] p 161 N94-12437
Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition
[NAL-SP-18] p 163 N94-12611

NAVIGATION
Helicopter approach capability using the differential Global Positioning System
[NASA-CR-177618] p 24 N94-12355
Experiments in mobile robot navigation and range imaging
[DE93-013280] p 341 N94-12598

NAVIGATION AIDS
National Airspace System operational concept
[DOT/FAA/SE-93/1] p 23 N94-10933
Toward intelligent flight control p 33 N94-11503
Definition of spacecraft standard interfaces by the NASA Space Assembly and Servicing Working Group (SASWG) p 348 N94-11574

NAVIGATION SATELLITES
The time keeping system for GPS block IIR
p 24 N94-10964

NAVY
Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point
[AD-A265164] p 145 N94-11884

NEAR INFRARED RADIATION
Formulating infrared coatings for defence applications
[MRL-RR-1-93] p 90 N94-11302
A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053
Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097
A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245
Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

NEBULAE

Midplane temperatures in the solar nebula p 448 N94-12088

Initiating solar system formation through stellar shock waves p 448 N94-12090

NECK (ANATOMY)

Mass properties test procedure for manikin headforms and helmet systems [AD-A265654] p 315 N94-10296

NEGATIVE IONS

Photodetachment studies on few-electron atomic negative ions [DE93-008474] p 358 N94-10154

NEODYMIUM ISOTOPES

Radiogenic age and isotopic studies [DE93-610548] p 274 N94-10407

NEODYMIUM LASERS

Thermal-optical switching of a silicon based interference filter [AD-A265152] p 174 N94-11095

An analytic model for calculating pump-induced wavefront distortions in laser slabs [DE93-011953] p 174 N94-11126

Short pulse lasers for generation of fields exceeding 100 MG [DE93-013346] p 369 N94-11815

NEON ISOTOPES

Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020

Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021

Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082

NEPHELINE

The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214

NEPTUNE (PLANET)

Detection of dust impacts by the Voyager planetary radio astronomy experiment [NASA-CR-193281] p 423 N94-11305

Models of Neptune's smooth recurrent radio emission [NASA-CR-193283] p 484 N94-11312

Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221

Precession of Uranus and Neptune and their magnetic field p 473 N94-12222

NETWORK ANALYSIS

Networks of real-time processes [DE93-013049] p 338 N94-12597

NETWORK CONTROL

Galileo EM-2 contributions to the lunar control network p 468 N94-12198

NETWORKS

Design of a matching network for dipole antennas [AD-A265115] p 136 N94-11158

Galileo EM-2 contributions to the lunar control network p 468 N94-12198

NEURAL NETS

The applicability of neural nets for decision support [MEMO-COSOR-92-49] p 338 N94-10169

Nonlinear stability and control study of highly maneuverable high performance aircraft [NASA-CR-193480] p 25 N94-10344

Unsupervised splitting rules for neural tree classifiers [AD-A264961] p 338 N94-10487

Functional approximation using artificial neural networks in structural mechanics [NASA-TM-105820] p 188 N94-11254

Three-dimensional object recognition using an unsupervised BCM network: The usefulness of distinguishing features [AD-A264576] p 304 N94-11261

Neural network model selection using asymptotic jackknife estimator and cross-validation method [AD-A264960] p 339 N94-11289

Fault location in structures using neural networks p 70 N94-11335

Spatial light rebroadcaster architecture study [AD-A266102] p 382 N94-11421

Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

Toward intelligent flight control p 33 N94-11503

Bounding the Vapnik-Chervonenkis dimension of concept classes parameterized by real numbers [DE93-011600] p 331 N94-11611

Model reference adaptive control (MRAC) with applications to robotics p 339 N94-11640

Statistical and optimization methods to expedite neural network training for transient identification [DE93-009985] p 340 N94-11644

Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision [AD-A265065] p 331 N94-11652

A hybrid neural network and feature extraction technique for target recognition [AD-D015732] p 333 N94-12386

Signal feature analysis using neural networks and psychoacoustics [AD-A266048] p 340 N94-12398

Thermal error compensation feasibility study using artificial intelligence [AD-A266084] p 340 N94-12411

Proceedings of the Seventh International Symposium on Methodologies for Intelligent Systems (poster session) [DE93-013470] p 340 N94-12428

NEUROLOGY

Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

NEURONS

Three-dimensional object recognition using an unsupervised BCM network: The usefulness of distinguishing features [AD-A264576] p 304 N94-11261

Role of spatially distributed ion channels in single neuron computation [AD-A265972] p 79 N94-12351

Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness [AD-A265657] p 302 N94-12441

NEUROPHYSIOLOGY

Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533

Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems [AD-A265161] p 313 N94-11890

NRL review for 1993 [AD-A265666] p 497 N94-12334

The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators [AD-A266113] p 301 N94-12417

NEUROTRANSMITTERS

The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators [AD-A266113] p 301 N94-12417

NEUTRAL ATOMS

Imaging of magnetospheric dynamics using low energy neutral atom detection [DE93-012656] p 275 N94-10742

NEUTRAL BUOYANCY SIMULATION

Propellant management in surface tension tanks p 106 N94-10110

NEUTRAL CURRENTS

Future high precision experiments and new physics beyond Standard Model [DE93-011004] p 373 N94-11618

NEUTRAL PARTICLES

Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224

NEUTRINOS

The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point [DE93-012655] p 361 N94-10349

On parity conservation and the question of the missing, right-handed neutrino [DE93-613092] p 361 N94-10414

Planck scale effects on the Majoron [DE93-613120] p 410 N94-10545

Tau physics [DE93-010956] p 367 N94-11469

NEUTRON BEAMS

Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron [DE93-754288] p 363 N94-10720

NEUTRON DIFFRACTION

Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry [DE93-010871] p 394 N94-10301

Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data [DE93-012740] p 363 N94-10743

NEUTRON IRRADIATION

Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation [DE93-617173] p 397 N94-10830

Facility for stress corrosion cracking test of irradiated material in high temperature water [DE93-753189] p 84 N94-11593

NEUTRON SCATTERING

Rietveld refinement of magnetic structures from pulsed-neutron-source powder-diffraction data [DE93-012740] p 363 N94-10743

The searchlight problem for neutrons in a semi-infinite medium [DE93-010796] p 365 N94-10952

Energy transfer dynamics and impact sensitivity [DE93-009551] p 98 N94-11269

X-ray and neutron scattering studies of magnetic critical fluctuations in holmium [DE93-010873] p 400 N94-11467

NEUTRON SOURCES

Intense neutron sources for fusion materials studies [DE93-009782] p 391 N94-11171

NEUTRON SPECTRA

Analytic expression for epithermal neutron spectra amplitudes as a function of water content p 473 N94-12227

NEUTRON SPECTROMETERS

The Los Alamos neutron spectrometer for the Lunar Scout-1 mission p 172 N94-12038

NEUTRONS

A spectral nodal method for the solution of the Sn equations in x, y geometry for highly absorbing deep penetration problems [DE93-613520] p 349 N94-10636

The searchlight problem for neutrons in a semi-infinite medium [DE93-010796] p 365 N94-10952

Development of deterministic transport methods for low energy neutrons for shielding in space [NASA-CR-194172] p 366 N94-11199

NICKEL

Plating under reduced pressure [DE93-011896] p 84 N94-11668

NICKEL ALLOYS

Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063

Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204

Interface reactions of (Ni3Al) ribbons/Al-MMC in ground preparation as preliminary test for microgravity experiments p 123 N94-10237

Production of reactive sintered nickel aluminide [DE93-014434] p 83 N94-11127

Fatigue in single crystal nickel superalloys [AD-A266116] p 85 N94-12418

NiAl alloys for structural uses [NASA-CR-194113] p 85 N94-12447

NICKEL HYDROGEN BATTERIES

Space Station Freedom advanced photovoltaics and battery technology development planning p 52 N94-11401

NICKEL ISOTOPES

Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199

NIGHT VISION

Perceptual response to visual noise and display media [NASA-CR-193406] p 313 N94-11511

NIOBIUM

Experimental approach to non-contact calorimetry in space p 112 N94-10143

Space Storable Rocket Technology program (SSRT). Option 1 program [NASA-CR-191171] p 46 N94-10938

NIOBIUM COMPOUNDS

High frequency behavior of long and small junctions [AD-A265670] p 403 N94-12336

NIOBIUM OXIDES

Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels [NASA-TM-106259] p 90 N94-11257

NITRAMINE PROPELLANTS

Time-temperature shift factors for gun propellants [AD-A264979] p 97 N94-10489

NITRATES

The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660

Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661

NITRIC OXIDE

In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures [NASA-CR-193189] p 274 N94-10701

NITRILES

Coupled growth of cells and bubbles in directional solidification of succinonitrile-acetone alloys p 118 N94-10206

NITROGEN
Polymeric nitrogen
[DE93-012600] p 89 N94-11151
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
Multiple nitrogen components in lunar soil sample 12023 p 451 N94-12108
Carbon and nitrogen in Type 2 supernova diamonds
p 431 N94-12166
NITROGEN DIOXIDE
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures
[NASA-CR-193189] p 274 N94-10701
NITROGEN ISOTOPES
Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029
NITROGEN OXIDES
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
NITROGEN 15
The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase
[AD-A265799] p 94 N94-12381
NOAA SATELLITES
Radiometer offsets and count conversion coefficients for the Earth Radiation Budget Experiment (ERBE) spacecraft for the years 1987, 1988, and 1989
[NASA-CR-191489] p 286 N94-12772
NOAA 10 SATELLITE
Radiometer offsets and count conversion coefficients for the Earth Radiation Budget Experiment (ERBE) spacecraft for the years 1987, 1988, and 1989
[NASA-CR-191489] p 286 N94-12772
NOAA 9 SATELLITE
Radiometer offsets and count conversion coefficients for the Earth Radiation Budget Experiment (ERBE) spacecraft for the years 1987, 1988, and 1989
[NASA-CR-191489] p 286 N94-12772
NOBLE METALS
Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use
[ARL-TR-27] p 90 N94-11311
Examination of the surface second harmonic response at infrared wavelengths
[AD-A265206] p 403 N94-12371
NODULES
A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining
p 224 N94-12733
NOISE
A window least squares algorithm for statistical noise smoothing of 2D-ACAR data
[DE93-613828] p 395 N94-10537
NOISE GENERATORS
Control of jet noise
[NASA-CR-193612] p 358 N94-11176
NOISE INTENSITY
Spacecraft signal sources portable test system
p 139 N94-11000
Noise levels and their effects on Shuttle crewmembers' performance: Operational concerns p 314 N94-11538
Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349
NOISE REDUCTION
Control of jet noise
[NASA-CR-193612] p 358 N94-11176
A theory of membrane absorbers
[ISVR-TR-217] p 76 N94-11216
Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas
p 464 N94-12179
NOISE SPECTRA
Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349
NOMENCLATURES
Effect of switched-bias bakes on the postirradiation electrical response of MOS devices
[DE93-009629] p 143 N94-11271
NONDESTRUCTIVE TESTS
Special problems of 3-D ultrasonic QNDI techniques and applications to composites aerospace structures
p 61 N94-10036
Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it
p 61 N94-10037
Quantifying disbond area p 61 N94-10038
New x ray scanning topographic approaches to nondestructive evaluation of composites
p 61 N94-10039
Material characterization and modeling with shearography
[NASA-CR-192576] p 185 N94-10342
Report of the IAEA Consultants' Meeting on Real-Time Nondestructive Monitoring of Wear and Corrosion Using the Thin Layer Activation Technique
[DE93-617422] p 183 N94-10847
Response of composite laminates to dynamic surface loads p 66 N94-10902
A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience
[AGARD-LS-190] p 28 N94-11022
Fibre reinforced polymer matrix composites: Microstructure and mechanical properties
[DLR-FB-92-28] p 66 N94-11085
Ultrasonic inspection, material noise and surface roughness
[DE93-011560] p 183 N94-11110
A survey of techniques for corrosion monitoring
[DE93-012131] p 83 N94-11250
Large array SQUID magnetometer for NDE
[AD-A264799] p 304 N94-11449
Potential techniques for non-destructive evaluation of cable materials
[DE93-008350] p 183 N94-11586
Ultrasonic wave interaction with advanced complex materials for nondestructive evaluation applications
[AD-A265704] p 74 N94-12401
NONEQUILIBRIUM CONDITIONS
The High Precision Thermostat HPT-HYDRA
p 109 N94-10124
Non-equilibrium solidification in undercooled Ni-B alloys p 86 N94-10196
NONEQUILIBRIUM FLOW
Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles
[NAL-TR-1149] p 27 N94-10367
Calculations of viscous nonequilibrium flows in nozzles
p 8 N94-10455
Nonequilibrium hypersonic flow in a wind-tunnel nozzle
p 8 N94-10456
Hypersonic, nonequilibrium flow over a cylindrically blunted 6 deg wedge
[NASA-TM-108994] p 162 N94-12571
NONEQUILIBRIUM THERMODYNAMICS
Canonical operator formulation of nonequilibrium thermodynamics
[DE93-613028] p 409 N94-10388
Nonequilibrium hypersonic flow in a wind-tunnel nozzle
p 8 N94-10456
Hypersonic multi block flow simulations around space vehicles including non-equilibrium chemistry
p 9 N94-10460
Thermal and chemical non equilibrium hypersonic flow computations p 10 N94-10465
Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700
NONFLAMMABLE MATERIALS
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials
[DOT/FAA/CT-93/3] p 17 N94-10766
Fire-resistant hydrolytically stable poly(arylene phosphine oxide) material systems p 19 N94-10780
A non-halogenated, flame retarded polycarbonate
p 19 N94-10781
Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788
Future material development trends for commercial airplane interiors p 21 N94-10792
Future needs in the development of materials for aircraft interiors and equipment p 21 N94-10794
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials
[AD-A266057] p 22 N94-12384
NONINTRUSIVE MEASUREMENT
Local measurement of temperatures and concentrations: A review for hypersonic flows
p 4 N94-10434
NONLINEAR EQUATIONS
Non-linear liquid bridge dynamics p 100 N94-10074
General renormalized statistical approach with finite cross-field correlations
[DE93-617846] p 386 N94-10396
A symmetrical form for equations of a nonlinear spiral magnetic
[DE93-621350] p 344 N94-11033
Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494
Nonlinear and dynamic analysis of flight
p 32 N94-11496
Spline approximation for system of n-th order nonlinear ordinary differential equations
[DE93-608188] p 346 N94-11507
NONLINEAR FILTERS
Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems
[AD-A265161] p 313 N94-11890
NONLINEAR OPTICS
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567
Disturbance, the uncertainty principle and quantum optics p 375 N94-10569
Photon number amplification/duplication through parametric conversion p 376 N94-10572
Non classical effects in planar waveguides
p 376 N94-10574
Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576
Second and third order nonlinear optical properties of crystalline inorganic/organic complexes
[DE93-011883] p 173 N94-10755
Lattice-matched heteroepitaxy of wide gap ternary compound semiconductors p 400 N94-11441
The laser second threshold: Its exact analytical dependence on detuning and relaxation rates
[DE93-619706] p 175 N94-11633
A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A265797] p 93 N94-12380
Limitations to the quality of optical phase conjugation by stimulated Brillouin scattering
[AD-A266006] p 383 N94-12389
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438
Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534
Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577
NONLINEAR SYSTEMS
Chemical pattern formation under microgravity
p 121 N94-10227
Balancing of the normalized right coprime factorization of a nonlinear system
[MEMO-1096] p 341 N94-10273
On output linearization of observable dynamics
[MEMO-1105] p 341 N94-10276
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
On the Sobolev systems with ellipsoid cavities
[DE92-641290] p 148 N94-10530
Convergence theorems for a class of nonlinear maps in uniformly smooth Banach spaces
[DE92-641347] p 343 N94-10531
Classical gravity coupled to Liouville theory
[DE93-613049] p 275 N94-10798
Detecting non-linearities in stationary time series
[W-9223] p 344 N94-10906
Creation and annihilation of solitons in nonlinear integrable systems
[DE93-621379] p 365 N94-11078
Optimisation methods for solving separable nonlinear least squares problems
[ISVR-TR-219] p 345 N94-11217
Trajectory pattern inverse dynamics and control of nonlinear dynamics systems with application to flexible structures p 181 N94-11219
Stability in Aerospace Systems
[AGARD-R-789] p 31 N94-11489
Chaotic time series analysis p 31 N94-11490
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances
p 31 N94-11492
Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499
Transactions of the 10th Army Conference on Applied Mathematics and Computing
[AD-A265098] p 318 N94-11678
Nonlinear stability calculations of pipe flow
p 163 N94-12612
Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow
p 164 N94-12622
The thermodynamics of the nonlinear shear flows
p 169 N94-12728

NONLINEARITY

Effects of axial and centrifugal forces on the stability of liquid bridges p 102 N94-10083

Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field
[DE93-613723] p 386 N94-10387

Nonlinear MHD-waves in a dissipative plasma with hall currents
[DE93-617844] p 386 N94-10395

Singularity spectrum of self-organized criticality
[DE93-613820] p 348 N94-10404

On the Sobolev systems with ellipsoid cavities
[DE92-641290] p 148 N94-10530

On the stability of stationary regimes in a distributed autovibration system with external feedback
[DE93-620979] p 141 N94-10543

An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions
p 349 N94-10573

Non-stationary and non-linear dispersive medium as external field which generates the squeezed states
p 380 N94-10605

The nonlinear evolution of modes on unstable stratified shear layers
[NASA-CR-191492] p 149 N94-10810

A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer
[DE93-011950] p 275 N94-11052

Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117

Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128

Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves
[DE93-621656] p 392 N94-11212

Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay
[DE93-620976] p 143 N94-11365

Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722

Nonlinear aspects of transonic aeroelasticity
[UTIAS-RN-345] p 15 N94-11857

Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems
[AD-A265161] p 313 N94-11890

Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338

A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A265797] p 93 N94-12380

Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534

Three-dimensional finite element analysis of explosive safety facilities: A technology assessment
[AD-A265700] p 35 N94-12562

Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577

Nonlinear effects in ferrite tuned cavities
[DE93-014136] p 374 N94-12785

NONNEWTONIAN FLOW

Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314

NONRELATIVISTIC MECHANICS

Observables, measurements and phase operators from a Bohmian perspective p 378 N94-10589

Non-gauge phase transformations in quantum transition amplitudes p 378 N94-10596

NONUNIFORMITY

DILUTE: A code for studying beam evolution under RF noise
[DE93-011605] p 133 N94-10960

NORMAL DENSITY FUNCTIONS

Positive phase space distributions and uncertainty relations p 379 N94-10598

NORMALITY

Balancing of the normalized right coprime factorization of a nonlinear system
[MEMO-1096] p 341 N94-10273

NORMALIZING (STATISTICS)

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

NORTH ATLANTIC TREATY ORGANIZATION (NATO)

AGARD highlights 92/2, September 1992
[AGARD-HIGHLIGHTS-92/2] p 497 N94-11820

NORTH SEA

Calibration of ERS-1 altimetry over the North Sea
p 234 N94-11716

NORWAY

Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720

NOSE TIPS

Computation of hypersonic nosetip heat transfer rates for an M829-like projectile
[AD-A263226] p 16 N94-11870

NOZZLE DESIGN

Gas-liquid jets under reduced gravity conditions
p 103 N94-10091

A CFD-based aerodynamic design procedure for hypersonic wind-tunnel nozzles p 9 N94-10458

Control of jet noise
[NASA-CR-193612] p 358 N94-11176

NOZZLE FLOW

Numerical simulation of the flow through a scramjet engine p 3 N94-10425

Calculations of viscous nonequilibrium flows in nozzles
p 8 N94-10455

Static internal performance of a single expansion ramp nozzle with multiaxis thrust vectoring capability
[NASA-TM-4450] p 12 N94-10675

Control of jet noise
[NASA-CR-193612] p 358 N94-11176

An overview of the capabilities of ARA for the measurement of nozzle discharge and thrust
[ARA-MEMO-378] p 55 N94-12283

NOZZLE GEOMETRY

Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles
[NAL-TR-1149] p 27 N94-10367

NUCLEAR ASTROPHYSICS

Nuclear astrophysics
[DE93-010569] p 425 N94-10292

Planck scale effects on the Majoron
[DE93-613120] p 410 N94-10545

Experimental and theoretical high energy physics program
[DE93-013336] p 373 N94-12600

NUCLEAR BINDING ENERGY

Recent advances in electron momentum spectroscopy
[DE93-610149] p 361 N94-10333

Three-nucleon problem with phase equivalent potentials
[DE93-617731] p 363 N94-10722

Quantum dynamics of helium clusters
[AD-A266060] p 411 N94-10874

Interatomic interactions in BCC and FCC lattices of transition metals
[DE93-621541] p 398 N94-11090

A generalized Bethe-Weizsaecker mass formula for strange hadronic matter
[DE93-011010] p 368 N94-11620

NUCLEAR ENERGY

Directory of IAEA databases
[DE93-622837] p 420 N94-11818

NUCLEAR EXPLOSIONS

Sensitivities of calculated residual stress to separation distances of two simultaneous events
[DE92-019571] p 98 N94-10751

NUCLEAR FUEL ELEMENTS

Space nuclear thermal propulsion nuclear element tests at Sandia National Laboratories
[DE93-002301] p 45 N94-10282

A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529

TFE verification program
[DE93-009609] p 373 N94-11694

NUCLEAR FUSION

Heavy ion fusion at sub-barrier energies: Progress and questions
[DE93-011764] p 372 N94-11124

Experiments with energetic (mu)d and (mu)t emitted from solid hydrogen
[DE93-010252] p 373 N94-12542

NUCLEAR LIGHTBULB ENGINES

In-reactor testing of the closed cycle gas core reactor: The Nuclear Light Bulb concept
[DE93-004053] p 370 N94-10149

NUCLEAR MAGNETIC RESONANCE

Si-29 NMR spectroscopy of naturally-shocked quartz from Meteor Crater, Arizona: Correlation to Kieffer's classification scheme p 80 N94-12087

NMR spectroscopy of experimentally shocked single crystal quartz: A reexamination of the NMR shock barometer p 81 N94-12258

The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase
[AD-A265799] p 94 N94-12381

NMR characterization of polymers formed in diazotizing mixtures of luminol and 3-amino-L-tyrosine
[AD-A266093] p 94 N94-12536

NUCLEAR MODELS

Coulomb effects in low-energy nuclear fragmentation
[NASA-TP-3352] p 485 N94-12434

NUCLEAR PHYSICS

Report of the Workshop on Light Particle-Induced Reactions
[DE93-752300] p 360 N94-10317

The legacy of uncertainty p 376 N94-10577

Report of the third Seminar on Nuclear Physics at the Energy Region of the JAERI Tandem-Booster Accelerator
[DE93-754330] p 372 N94-11043

Directory of IAEA databases
[DE93-622837] p 420 N94-11818

NUCLEAR POTENTIAL

Quasi-relativistic effects in barrier-penetration processes
[DE93-617730] p 410 N94-10721

NUCLEAR POWER PLANTS

Techniques, processes, and measures for software safety and reliability
[DE93-012379] p 322 N94-10347

Renewable energy sources 1991, part 3
[DE93-605594] p 263 N94-11505

Statistical and optimization methods to expedite neural network training for transient identification
[DE93-009985] p 340 N94-11644

Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012220] p 129 N94-11670

NUCLEAR PROPULSION

Space nuclear thermal propulsion nuclear element tests at Sandia National Laboratories
[DE93-002301] p 45 N94-10282

Space nuclear technology
[DE93-010184] p 45 N94-10299

A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529

Applying design principles to fusion reactor configurations for propulsion in space
[NASA-TM-108247] p 47 N94-11053

NUCLEAR RADIATION SPECTROSCOPY

Proceedings of the third workshop on light quark meson spectroscopy
[DE93-754138] p 363 N94-10696

NUCLEAR REACTIONS

Report of the Workshop on Light Particle-Induced Reactions
[DE93-752300] p 360 N94-10317

The multiplicity spectra of the (169)Tm(n, gamma) reaction
[DE93-617733] p 364 N94-10835

Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

Double-lambda compound nucleus and the formation of double hypernuclei
[DE93-754289] p 365 N94-11040

Report of the third Seminar on Nuclear Physics at the Energy Region of the JAERI Tandem-Booster Accelerator
[DE93-754330] p 372 N94-11043

Coulomb effects in low-energy nuclear fragmentation
[NASA-TP-3352] p 485 N94-12434

Final state interactions and inclusive nuclear collisions
[NASA-TP-3353] p 373 N94-12435

NUCLEAR REACTOR CONTROL

GRISET certification package
[DE93-011783] p 327 N94-11246

NUCLEAR REACTORS

GRISET certification package
[DE93-011783] p 327 N94-11246

Research results
[DE93-753403] p 372 N94-11595

NUCLEAR RESEARCH

Directory of IAEA databases
[DE93-622837] p 420 N94-11818

NUCLEAR RESEARCH AND TEST REACTORS

In-reactor testing of the closed cycle gas core reactor: The Nuclear Light Bulb concept
[DE93-004053] p 370 N94-10149

Space nuclear technology
[DE93-010184] p 45 N94-10299

A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529

Development of plastic capsule for research reactor irradiation
[DE93-753186] p 372 N94-11591

NUCLEAR ROCKET ENGINES

Space nuclear technology
[DE93-010184] p 45 N94-10299

Applying design principles to fusion reactor configurations for propulsion in space
[NASA-TM-108247] p 47 N94-11053

NUCLEAR SPIN

High spin properties of nuclei [DE93-008788] p 358 N94-10254

The multiplicity spectra of the (169)Tm(n, gamma) reaction [DE93-617733] p 364 N94-10835

NUCLEAR STRUCTURE

High spin properties of nuclei [DE93-006788] p 358 N94-10254

Nuclear structure models: Applications and development [DE93-012934] p 368 N94-11813

NUCLEATE BOILING

Gravity and electric field effects on pool boiling heat transfer p 121 N94-10226

NUCLEATION

STARDUST: A simulation experiment of cosmic dust analogues production in microgravity conditions p 113 N94-10175

Coupled growth of cells and bubbles in directional solidification of succinonitrile-acetone alloys p 118 N94-10206

Study of vapor bubble growth in a supersaturated liquid p 122 N94-10232

Magnetization reversal by nucleation [DE93-610313] p 350 N94-10313

Structural development in ceramic precursor sols and gels [AD-A264354] p 90 N94-11281

Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

A mechanism for the reduction in risk of decompression sickness in microgravity environment p 312 N94-11545

An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films [AD-A265037] p 401 N94-11651

Carbon and nitrogen in Type 2 supernova diamonds p 431 N94-12166

Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

NUCLEI (NUCLEAR PHYSICS)

Report of the third Seminar on Nuclear Physics at the Energy Region of the JAERI Tandem-Booster Accelerator [DE93-754330] p 372 N94-11043

NUCLEON-NUCLEON INTERACTIONS

Workshop on NN Bremsstrahlung and Polarization Observables [DE93-010181] p 361 N94-10334

P-matrix description of the two-particle interaction [DE93-617690] p 361 N94-10549

Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550

The determination of nucleon-nucleon scattering phases by the phase functions method [DE93-617729] p 362 N94-10557

Three-nucleon problem with phase equivalent potentials [DE93-617731] p 363 N94-10722

NUCLEON-NUCLEON SCATTERING

Crossing-odd spin effects in the dipole model of hadron scattering [DE93-617692] p 362 N94-10551

The determination of nucleon-nucleon scattering phases by the phase functions method [DE93-617729] p 362 N94-10557

NUCLEONS

Crossing-odd spin effects in the dipole model of hadron scattering [DE93-617692] p 362 N94-10551

A generalized Bethe-Weizsaecker mass formula for strange hadronic matter [DE93-011010] p 368 N94-11620

NUCLEOPHILES

Synthesis, characterization, and modification of poly(organophosphazenes), that bear both 2,2,2-trifluoroethoxy and phenoxy groups [AD-A264913] p 92 N94-11847

NUCLIDES

Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

NUMERICAL ANALYSIS

Aerosol sampling models survey [AD-A265903] p 75 N94-10337

Summary of research in progress at ICASE [NASA-CR-191481] p 318 N94-11198

Normal modes of the world's oceans: A numerical investigation using Proudman functions [NASA-TM-104587] p 288 N94-11358

Numerical simulations of thermal convection in rapidly rotating spherical fluid shells p 153 N94-11635

Research in computing and applied mathematics [AD-A266137] p 331 N94-11657

Measurement of wave parameters by HF ocean radar p 192 N94-11903

Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936

An application of reduced gravity model to mesoscale eddies p 199 N94-11945

Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973

A development on estimation method of undersea light p 204 N94-11974

Atmospheric correction plans for SeaWiFS p 204 N94-11975

Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978

The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981

Incident shortwave and longwave radiations over the western North Pacific and the Sea of Okhotsk derived from GMS-WEFAX images p 205 N94-11982

Studies of dynamical processes affecting the distribution of stratospheric ozone [NASA-CR-193477] p 279 N94-12560

Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639

Theory and oceanographic applications of satellite altimeter measurements p 208 N94-12641

A numerical study of deep convection at high latitudes p 210 N94-12652

Microwave radiometry of ice cover in polar regions p 210 N94-12655

Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664

Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675

The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713

Variability of the mixed layer depth in the North Pacific Ocean as calculated by a 3-D semi-analytical mixed layer remote sensing model p 221 N94-12718

Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752

NUMERICAL CONTROL

Position and force control of a vehicle with two or more steerable drive wheels [DE93-012512] p 177 N94-10269

AD100/ADSIM, ACSL, and MATLAB output comparisons using frequency-response analysis [DE93-009640] p 47 N94-11122

Airborne optical tracking control system design study [DE93-009515] p 382 N94-11662

NUMERICAL FLOW VISUALIZATION

Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664

Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679

NUMERICAL INTEGRATION

On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance p 426 N94-11596

NUMERICAL STABILITY

A reliable stability test for exponential polynomials [MEMO-COSOR-92-48] p 341 N94-10168

Numerical simulations of thermal convection in rapidly rotating spherical fluid shells p 153 N94-11635

Summation by parts, projections, and stability [NASA-CR-194290] p 346 N94-12776

NUMERICAL WEATHER FORECASTING

Simulation of images of water vapor channel and infrared split channel p 190 N94-11081

Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

NUSSELT NUMBER

On temperature distribution in non-participating medium with radiation boundary condition [DE93-619375] p 153 N94-11604

NYLON (TRADEMARK)

Wetting effects on nylon spheres engulfment in ice p 115 N94-10189

The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase [AD-A265799] p 94 N94-12381

O

O RING SEALS

Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump [NAL-TR-1155] p 178 N94-10369

Check valve with poppet dashpot/frictional damping mechanism [NASA-CASE-MSC-21950-1] p 179 N94-10658

OBJECT-ORIENTED PROGRAMMING

An object-oriented model for extensible concurrent systems: The composition-filters approach [MEMO-INF-92-87] p 320 N94-10166

Database computing in HEP [DE93-011765] p 419 N94-11105

Object oriented implementation of adaptive mesh refinement algorithms [DE93-011885] p 325 N94-11112

Development of generic field classes for finite element and finite difference problems [DE93-011678] p 345 N94-11225

Impacts of object-oriented technologies: Seven years of SEL studies p 329 N94-11425

The MERMAID project p 329 N94-11426

Reuse: A knowledge-based approach p 329 N94-11430

Large project experiences with object-oriented methods and reuse p 329 N94-11431

The relational-to-object-oriented cross-model accessing capability in a multi-model and multi-lingual database system [AD-A264911] p 420 N94-11846

OBLIQUE SHOCK WAVES

Numerical calculation of scramjet inlet flow [NAL-TR-1174T] p 27 N94-10370

Flow development in a circular pipe in the UTIAS/RPI M = 8.3 gun tunnel p 6 N94-10442

Development of a Delaunay-based adaption scheme with applications to complex three-dimensional rotational flows p 149 N94-10824

Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912

OBSERVABILITY (SYSTEMS)

On output linearization of observable dynamics [MEMO-1105] p 341 N94-10276

OBSTACLE AVOIDANCE

Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535

OCCLUSION

Optimal hemicube sampling [DE93-010499] p 334 N94-12591

OCCUPATION

A summer program in mathematics and computer science for academically oriented student [AD-A263467] p 415 N94-11517

Career Information in the Mathematical Sciences (CIMS) [DE93-013780] p 318 N94-11817

OCEAN BOTTOM

Low power digital recorder development [AD-A265921] p 170 N94-10704

Acoustics of bubbly sediments [AD-A263726] p 288 N94-11299

A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585

Acoustic characteristics of side scan sonar and sub-bottom profiler for 10,000 m class ROV p 172 N94-11916

The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931

On resolution of underwater stereo photogrammetry p 172 N94-11966

Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091

Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199

Preliminary analysis of the FLIP array data from the NOBS experiment [AD-A265911] p 289 N94-12349

Mapping bathymetric slopes from bathymetry data [AD-A265923] p 290 N94-12350

Mapping of sea bottom topography with ERS-1 C-band SAR p 254 N94-12525

Integrated marine survey system p 217 N94-12693

A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining p 224 N94-12733

Bottom currents and possibilities for near bottom layer environmental investigations in the Pacific by means of self contained bottom stations p 224 N94-12734

Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735

Convective and dynamic instability in meridional trenches p 225 N94-12739

Model of Kuroshio region circulation p 229 N94-12765

OCEAN COLOR SCANNER

Application of the airborne ocean color imager for commercial fishing [NASA-TM-103986] p 231 N94-11378

OCEAN CURRENTS

Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate [NASA-TM-108253] p 43 N94-10699

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200

Near surface ocean processes: Acoustical observations, ambient sound, and Langmuir circulation p 288 N94-11447

Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717

Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719

Ocean circulation revealed by ice floe tracking p 240 N94-11759

ERS-1 radar altimetry over the North Atlantic p 242 N94-11772

An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander [AD-A265116] p 289 N94-11868

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894

HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

Exchange of bay water with ocean current monitored by the NOAA satellite p 193 N94-11908

Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940

An application of reduced gravity model to mesoscale eddies p 199 N94-11945

A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983

Circulation of North Pacific Intermediate Water p 206 N94-11985

Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635

Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Observation of warm current at the boundary from north equatorial current to Kuroshio by NOAA/AVHRR p 214 N94-12676

The WOCE/TOGA Surface Velocity Programme (SVP) p 216 N94-12691

The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729

Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730

A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining p 224 N94-12733

Bottom currents and possibilities for near bottom layer environmental investigations in the Pacific by means of self contained bottom stations p 224 N94-12734

Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735

Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753

Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759

Mixing of drifter ensemble by mesoscale currents p 228 N94-12760

Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

OCEAN DATA ACQUISITIONS SYSTEMS

One-year mooring of an ADCP in the central region of the Kuroshio west of Okinawa p 194 N94-11913

Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914

Measurement of the surface layer current averaged vertically using Multipaths Inverted Echosounder p 194 N94-11915

Acoustic characteristics of side scan sonar and sub-bottom profiler for 10,000 m class ROV p 172 N94-11916

The development of phytoplankton sensing system with optical fiber p 203 N94-11967

Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968

ERS-1 and Almaz SAR ocean wave imaging over the Gulf Stream and the Grand Banks p 251 N94-12505

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635

A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657

ADCP evidence for upper layer circulation in northeast of the South China Sea p 215 N94-12686

Development of a shuttle AUV for oceanographic measurement p 217 N94-12692

Integrated marine survey system p 217 N94-12693

Development of a buoy system for monitoring marine weather and marine life abundance p 217 N94-12694

Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732

Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735

DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere p 226 N94-12749

The structure of hydrophysical measuring systems of vertical sounding and self-contained stations p 227 N94-12751

OCEAN DYNAMICS

Normal modes of the world's oceans: A numerical investigation using Proudman functions [NASA-TM-104587] p 288 N94-11358

Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714

Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717

SAR imaging of dynamical features in the English Channel p 234 N94-11721

SAR ocean imaging in the Gulf of Alaska p 235 N94-11723

Comparisons of ERS-1 altimeter height data and the Fine Resolution Antarctic Model (FRAM) p 235 N94-11725

Air-sea-ice interactions in the Weddell Sea p 239 N94-11753

Space and time variability of the Gulf Stream using ERS-1 ALT-OPR02 data p 242 N94-11769

Circulation of North Pacific Intermediate Water p 206 N94-11985

Shear, strain and thermohaline vertical fine structure in the upper ocean [AD-A265961] p 289 N94-12348

ERS-1 and Almaz SAR ocean wave imaging over the Gulf Stream and the Grand Banks p 251 N94-12505

A new model for Synthetic Aperture Radar (SAR) images from ocean scatter p 251 N94-12508

On the extraction of ocean wave spectra from ERS-1 SAR wave mode image spectra p 251 N94-12509

Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524

ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526

Comparison of GEOSAT sea surface height and model-simulated surface dynamic height p 208 N94-12644

Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

OCEAN MODELS

Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710

Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714

Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724

Comparisons of ERS-1 altimeter height data and the Fine Resolution Antarctic Model (FRAM) p 235 N94-11725

Air-sea-ice interactions in the Weddell Sea p 239 N94-11753

Remote sensing and the air-sea boundary layers p 191 N94-11896

Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921

Circulation of North Pacific Intermediate Water p 206 N94-11985

A new model for Synthetic Aperture Radar (SAR) images from ocean scatter p 251 N94-12508

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635

Comparison of GEOSAT sea surface height and model-simulated surface dynamic height p 208 N94-12644

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother p 209 N94-12648

Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649

Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650

A numerical study of deep convection at high latitudes p 210 N94-12652

Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738

Convective and dynamic instability in meridional trenches p 225 N94-12739

Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752

Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753

Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754

Generation of internal waves near the shelf boundary p 229 N94-12763

Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

Model of Kuroshio region circulation p 229 N94-12765

Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

OCEAN SURFACE

Preliminary results on backscattering strength from a wind generated bubbly ocean surface [AD-A265006] p 287 N94-10490

Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate [NASA-TM-108253] p 43 N94-10699

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200

Near surface ocean processes: Acoustical observations, ambient sound, and Langmuir circulation p 288 N94-11447

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

Calibration of ERS-1 altimetry over the North Sea p 234 N94-11716

Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719

First results for the simultaneous estimation of the geoid and the sea surface topography by ERS-1 altimeter data p 241 N94-11765

Separation of geoid and sea surface topography in shallow water regions: A first ERS-1 radar altimeter data evaluation p 242 N94-11766

A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767

ERS-1 radar altimetry over the North Atlantic p 242 N94-11772

Preliminary geophysical investigation with ERS-1 35-day altimeter data p 243 N94-11775

Quick-look monitoring of the sea surface with ERS-1 fast delivery altimeter data p 243 N94-11777

Spatial scales of wave height p 244 N94-11782

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894

Remote sensing and the air-sea boundary layers p 191 N94-11896

Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898

An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900

Remote sensing of the suspended matter distribution with high concentration in China Sea p 192 N94-11901

Statistical study of HF ocean radar echo p 139 N94-11905

Exchange of bay water with ocean current monitored by the NOAA satellite p 193 N94-11908

Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918

Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919

A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920

Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921

Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves p 195 N94-11922

Sea surface heat flux in the beginning of the Kuroshio p 195 N94-11923

Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924

Mixed layer heat budget of Kuroshio-Tango triangle using satellite and ship observations p 196 N94-11925

Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926

Ocean wave detection by SAR p 197 N94-11932

On the determination of the SAR ocean surface scattering patch size p 197 N94-11933

The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936

Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938

The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

An application of reduced gravity model to mesoscale eddies p 199 N94-11945

The use of CZCS for primary production estimate in the Pacific p 199 N94-11946

CZCS derived chlorophyll distribution in Antarctic water during austral summer p 199 N94-11947

Seasonal changes of phytoplankton distributions in the Northwest Pacific detected by Coastal Zone Color Scanner p 200 N94-11948

Satellite-derived oceanic features p 200 N94-11949

Particle dynamics in the western subarctic Pacific: Implications from CZCS imagery p 200 N94-11950

High-reflectance water mass in Off-Sanriku area observed by CZCS p 200 N94-11951

Physical processes of microwave backscattering from laboratory wind-wave surfaces p 200 N94-11952

Experiment and results of the Italian activity in the field of ocean microwave backscattering p 200 N94-11953

Measurements of ocean cross-section with a side-looking airborne radar p 201 N94-11954

Dependence of oceanic microwave emission on wind direction p 201 N94-11957

Surface roughness variations across the Iceland-Faroes frontal region observed by the GEOSAT altimeter and NOAA AVHRR p 201 N94-11958

On the variability of wind speeds in the North Western Pacific observed by altimeter/GEOSAT and SSM/I/DMSP p 201 N94-11960

Observation of wind and waves by GEOSAT altimeter p 202 N94-11961

Availability of wind field over the North Pacific derived from data on ships-of-opportunity and analysis of long-term variabilities p 202 N94-11962

Wind field estimate by using one hour GMS data p 202 N94-11963

The Pacific responses exhibited by an OGCM to various wind fields p 202 N94-11964

Development of shipboard ocean lidar p 140 N94-11965

Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971

Optical characteristics in Tokyo Bay p 204 N94-11972

Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973

Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349

A statistical analysis of sea state surface ERS-1 SAR-wave mode imagettes p 251 N94-12507

Ship traffic monitoring using the ERS-1 SAR p 253 N94-12521

Topography of the Western Mediterranean from the ERS-1 altimeter p 255 N94-12531

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2
[JTN-93-80419] p 207 N94-12635

Analysis of GEOSAT wind data p 207 N94-12636

SSMI wind speed variability over the Pacific Ocean p 207 N94-12637

Observation of wave crests by satellite remote sensed data p 207 N94-12638

Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

Theory and oceanographic applications of satellite altimeter measurements p 208 N94-12641

Analysis of collinear passes of satellite altimeter data p 208 N94-12642

Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643

Comparison of GEOSAT sea surface height and model-simulated surface dynamic height p 208 N94-12644

Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother p 209 N94-12648

Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649

Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650

Pacific rim sea ice as observed with the NIMBUS-7 SMMR p 210 N94-12651

The seasonal change of phytoplankton size distribution using optical fiber sensor p 210 N94-12656

A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657

The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660

Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668

Measurement of the sea surface emissivity p 213 N94-12672

Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673

Satellite observations of the northeast monsoon coastal current p 214 N94-12678

Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679

Sea surface temperature difference between NOAA/AVHRR and in-situ observation p 215 N94-12680

Statistical features of mesoscale eddies at the Kuroshio front p 215 N94-12682

Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683

A study of front dynamics off northeastern Taiwan based on the NOAA-AVHRR satellite remote sensing data p 215 N94-12684

Satellite thermal variations of Kuroshio in relation to storm floods p 215 N94-12685

Frontal zones in Pacific Ocean: Satellite and ship data analysis p 216 N94-12687

Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688

Observation of cold coastal water with high turbidity around the southwestern tip of Korean Peninsula p 216 N94-12689

On the error characteristics of the sea surface temperature observed by satellite p 216 N94-12690

Seasonal variability of surface ocean color in the Omura Bay using multitemporal LANDSAT-5 TM data p 218 N94-12698

Study on air-sea interactions in the OMLET (Ocean Mixed Layer Experiment) area using satellite remote sensing p 220 N94-12710

The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713

Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714

Satellite and moored buoy observations of polar frontal system over the Yamato Rise in the Japan Sea p 221 N94-12715

The relationship between skin and bulk sea surface temperatures p 221 N94-12716

Variability of the Kuroshio observed from satellite thermal imagery p 221 N94-12717

Variability of the mixed layer depth in the North Pacific Ocean as calculated by a 3-D semi-analytical mixed layer remote sensing model p 221 N94-12718

SST assimilation: Eastern Mediterranean case study p 221 N94-12719

Mapping of high density area of benthic diatom in Ariake Sea p 222 N94-12720

Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721

Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam p 177 N94-12722

The method of investigation of the horizontal structure of the thermal fronts p 222 N94-12723

On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724

Optimum selection of spectral channels in the problem of remote sensing of phytoplankton concentration in ocean water p 223 N94-12726

Field research of wind wave spectrum variability p 223 N94-12727

Influence of the Kuroshio warm-core rings on hydrographic and fishery conditions off southern Kuril Islands p 224 N94-12737

Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

Observations of film slicks and internal waves with Ka-band scatterometer p 225 N94-12741

Optical transfer operator of the atmosphere-ocean system p 225 N94-12742

Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744

Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746

Radar observation of internal waves field in the north-west Pacific p 226 N94-12747

Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752

Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753

Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754

A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing p 228 N94-12757

High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759

The algorithm of primary production determination p 228 N94-12761

Non-image visible polarization remote sensing of the ocean p 229 N94-12762

Generation of internal waves near the shelf boundary p 229 N94-12763

Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

Model of Kuroshio region circulation p 229 N94-12765

OCEAN TEMPERATURE

Preliminary results of the comparison of ATSR measurements with in situ sea temperatures
[DE93-013399] p 287 N94-10517

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1
[JTN-93-80418] p 191 N94-11894

Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968

Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970

On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987

Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990

Shear, strain and thermohaline vertical fine structure in the upper ocean
[AD-A265961] p 289 N94-12348
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2
[JTN-93-80419] p 207 N94-12635
A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing
p 228 N94-12757
Generation of internal waves near the shelf boundary
p 229 N94-12763

OCEANOGRAPHIC PARAMETERS
Remote sensing and the air-sea boundary layers
p 191 N94-11896
Satellite observations of red tide events: Plans for EESI p 191 N94-11899
An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900
Remote sensing of the suspended matter distribution with high concentration in China Sea
p 192 N94-11901
Measurement of wave parameters by HF ocean radar
p 192 N94-11903
Kuroshio observations by the HF ocean radar
p 192 N94-11904
Groundwave HF ocean surface radar
p 139 N94-11906
Air-sea interaction: Fluxes, a review
p 201 N94-11955
Impact of ERS-1 wind/wave/ice data on operational ocean forecasting p 250 N94-12500
A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657
An integrated approach to total end-to-end quality control of ocean data in the real-time environment
p 211 N94-12662

OCEANOGRAPHY
Preliminary results of the comparison of ATSR measurements with in situ sea temperatures
[DE93-013399] p 287 N94-10517
Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699
Study of the surface circulation to the North of Bransfield Strait, Antarctica
[INPE-5472-TDI/503] p 288 N94-11200
Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707
ERS-1 studies at the Department of Oceanography from Space, IFREMER/Brest (France) p 233 N94-11712
Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714
Arctic sea ice microwave signature and geophysical processes study p 240 N94-11754
Spatial scales of wave height p 244 N94-11782
The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992
[AD-A264922] p 289 N94-11853
Real-time tomography mooring
[AD-A264923] p 289 N94-11854
The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929
Remote sensing for numerical modelling of radiative transfer processes in ocean environment
p 204 N94-11973
Use of SAR-wave, altimeter, and wind-scatterometer data in an operational swell forecasting system
p 250 N94-12503
Real time processing wave spectra from satellite SAR
p 251 N94-12506
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere
p 226 N94-12749

OCEANS
Sandia ocean modeling system programmer's guide and user's manual
[DE93-007427] p 287 N94-10153
Normal modes of the world's oceans: A numerical investigation using Proudman functions
[NASA-TM-104587] p 288 N94-11358
Real-time tomography mooring
[AD-A264923] p 289 N94-11854
The thermodynamic case for a water-rich Mars
p 463 N94-12170
Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data
p 212 N94-12664
Trajectory curving in underwater propagation of light
p 226 N94-12748
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere
p 226 N94-12749

ODD-EVEN NUCLEI
High spin properties of nuclei
[DE93-008788] p 358 N94-10254

ODD-ODD NUCLEI
Nuclear structure models: Applications and development
[DE93-012934] p 368 N94-11813

OH-6 HELICOPTER
Advanced rotorcraft flight simulation: Model development, validation and parallel implementation
p 25 N94-11056

OHMIC DISSIPATION
Non-barrier tunneling in presence of dissipations
[DE93-621381] p 412 N94-11086
Elementary mechanism of electron beam dissipative instability development
[DE93-621653] p 391 N94-11209
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh)
[DE93-621658] p 392 N94-11213

OIL EXPLORATION
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C
[PB93-190304] p 265 N94-11018
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9
[PB93-190312] p 265 N94-11019

OIL FIELDS
Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution
p 214 N94-12677

OIL POLLUTION
A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983

OIL SLICKS
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C
[PB93-190304] p 265 N94-11018
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9
[PB93-190312] p 265 N94-11019
Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers
[PB93-181592] p 266 N94-11471
A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR
p 253 N94-12520
Ship traffic monitoring using the ERS-1 SAR
p 253 N94-12521
Oil spill detection using satellite-based SAR: Experience from a field experiment p 253 N94-12522
Observations of film slicks and internal waves with Ka-band scatterometer p 225 N94-12741

OLIGOMERS
Synthesis and polymerization of oligomeric multiple aromatic ether-containing phthalonitriles
[AD-D015729] p 94 N94-12399

OLIVINE
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055
Olivine-rich asteroids, pallasitic olivine and olivine-metal mixtures: Comparisons of reflectance spectra
p 431 N94-12171
On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225
Micro-zoning in minerals of a Landes silicate inclusion
p 432 N94-12231

ON-LINE SYSTEMS
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response
[NAL-TR-1153] p 2 N94-10363
The First Text Retrieval Conference (TREC-1)
[PB93-191641] p 419 N94-10829
A survey of techniques for corrosion monitoring
[DE93-012131] p 83 N94-11250

ONBOARD DATA PROCESSING
Data processing units for eight magnetospheric particle and field sensors
[AD-A264403] p 276 N94-11463
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere
p 226 N94-12749

ONBOARD EQUIPMENT
Integrated marine survey system p 217 N94-12693
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere
p 226 N94-12749

ONE DIMENSIONAL FLOW
A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors
[NASA-TM-106279] p 29 N94-11255

OPERATING COSTS
Space transportation alternatives for large space programs: The International Space University Summer Session, 1992
[NASA-TM-106271] p 40 N94-10811
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827
Pulsed plasma processing for control of diesel engine emissions
[DE93-011884] p 181 N94-11247
Life-cycle cost analysis of conventional and fuel cell/battery powered urban passenger vehicles
[DE93-010770] p 182 N94-11438
Forecasting the impact of virtual environment technology on maintenance training p 314 N94-11570

OPERATING SYSTEMS (COMPUTERS)
Transportable Applications Environment (TAE) Tenth Users' Conference
[NASA-CP-3225] p 333 N94-12448

OPERATING TEMPERATURE
Thin film preparation and interfacial reaction study of solid oxide fuel cell materials p 263 N94-11313

OPERATIONAL PROBLEMS
Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532

OPERATIONS RESEARCH
An advisor module for tactical and strategic state-oriented planning systems with an application in manpower planning
[MEMO-COSOR-92-57] p 416 N94-10868

OPERATOR PERFORMANCE
Analyzing human errors in flight mission operations
p 314 N94-11534
Vigilance problems in orbiter processing
p 314 N94-11536
Measuring human performance on NASA's microgravity aircraft p 317 N94-11537
Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539
SATORI: Situation Assessment Through the Re-creation of Incidents
[DOT/FAA/AM-93/12] p 38 N94-12567

OPERATORS (MATHEMATICS)
Deformations and recursion operators for evolution equations
[MEMO-1104] p 341 N94-10163
The super vectorfield package for REDUCE. Version 1.0
[MEMO-1099] p 321 N94-10265
Balancing of the normalized right coprime factorization of a nonlinear system
[MEMO-1096] p 341 N94-10273
The ring structure of chiral operators for minimal models coupled to 2D gravity
[DE93-613119] p 409 N94-10500
On local frame fields and fermion dynamics in space with nontrivial topologies
[DE93-617657] p 349 N94-10548
Observables, measurements and phase operators from a Bohmian perspective p 378 N94-10589
Nonunitary and unitary approach to Eigenvalue problem of Boson operators and squeezed coherent states
p 350 N94-10595
Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607
Operator substitution
[MEMO-COSOR-92-51] p 343 N94-10867
The Nehari problem for the Pritchard-Salamon class of infinite-dimensional linear systems: A direct approach
[CS-9216] p 344 N94-10905
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742

OPERATORS (PERSONNEL)
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012181] p 129 N94-11456
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings
[DE93-012220] p 129 N94-11670

OPTICAL COMMUNICATION
Design and analysis of an optical interface message processor
[AD-A266079] p 381 N94-10697
Experimental comparison of time synchronization techniques by means of light signals and clock transport on the rotating earth p 351 N94-10970

OPTICAL COMPUTERS
Design and analysis of an optical interface message processor
[AD-A266079] p 381 N94-10697
Spatial light rebroadcaster architecture study
[AD-A266102] p 382 N94-11421
OPTICAL CORRECTION PROCEDURE
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742
OPTICAL CORRELATORS
Application of normalized gray-scale correlation
[DE93-013765] p 141 N94-10521
OPTICAL DATA PROCESSING
Variable rate transfer of optical information
[AD-D015758] p 418 N94-10374
Design and analysis of an optical interface message processor
[AD-A266079] p 381 N94-10697
The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph
p 197 N94-11934
OPTICAL EQUIPMENT
Development tests for a high stability optical bench
p 62 N94-10047
Technique to prepare high-reflectance optical fiber bragg gratings with single exposure in-line on fiber draw tower
[AD-D015757] p 374 N94-10373
Wavelength considerations in soft x ray projection lithography
[DE93-014115] p 381 N94-10651
Optoelectronic technology consortium
[AD-A265691] p 383 N94-12444
OPTICAL FIBERS
Multiplexed and distributed optical fibre sensors
p 64 N94-10065
Fibre optic strain and temperature measurement in composite materials: A review of the OSTIC programme
p 65 N94-10066
The sensitivity of an optical fiber holographic interferometer p 107 N94-10117
Method and apparatus for polarization-maintaining fiber optical amplification with orthogonal polarization output
[AD-D015756] p 374 N94-10372
Technique to prepare high-reflectance optical fiber bragg gratings with single exposure in-line on fiber draw tower
[AD-D015757] p 374 N94-10373
Fabrication and analysis of a special optical connector containing a 1/4-inch-long optical fiber for DOI tests
[DE93-013115] p 381 N94-10647
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850
Factors affecting the embedding of optical fibre sensors in advanced composite structures p 70 N94-11336
Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968
Localized and distributed fiber-optic strain sensors embedded in composite materials
[UTIAS-346] p 73 N94-12013
OPTICAL FILTERS
Continued development of an ultra-narrow bandpass filter for solar research
[NASA-CR-194169] p 381 N94-10735
Thermal-optical switching of a silicon based interference filter
[AD-A265152] p 174 N94-11095
Design of CCD camera system for use inside electron beam furnace
[DE93-009525] p 170 N94-11267
Presort processor --- optical filtering
[AD-A263872] p 382 N94-11300
Comparison of multiresolution techniques for digital signal processing
[AD-A265364] p 138 N94-12406
OPTICAL GYROSCOPES
NASA's first in-space optical gyroscope: A technology experiment on the X ray Timing Explorer spacecraft
[NASA-TM-109242] p 170 N94-10667
OPTICAL MATERIALS
Second and third order nonlinear optical properties of crystalline inorganic/organic complexes
[DE93-011883] p 173 N94-10755
Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930
Enhanced Damage-Resistant Optics for Spaceflight Laser Systems: Workshop findings and recommendations
[NASA-TM-109243] p 381 N94-11054
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230
Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350
New challenges in optical materials development
[DE93-011889] p 383 N94-11676
OPTICAL MEASUREMENT
Holographic interferometry for microgravity applications p 108 N94-10123
Pressure and force measurements on models set in hypersonic flows: A review p 5 N94-10435
Flow visualization and spectroscopy in hypersonic flows: New trends p 5 N94-10437
A preliminary study on ice shape tracing with a laser light sheet
[NASA-TM-105964] p 174 N94-11132
The evolution of whole field optical diagnostics for external transonic testing
[ARA-MEMO-379] p 383 N94-11887
OPTICAL MEASURING INSTRUMENTS
Local measurement of temperatures and concentrations: A review for hypersonic flows
p 4 N94-10434
Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron
[DE93-754288] p 363 N94-10720
Optical fibre techniques for structural monitoring in composites p 69 N94-11324
Strain measurement of carbon/epoxy composite with fibre optics white light quasi distributed polarimetric sensor p 69 N94-11328
The development of phytoplankton sensing system with optical fiber p 203 N94-11967
The seasonal change of phytoplankton size distribution using optical fiber sensor p 210 N94-12656
OPTICAL MEMORY (DATA STORAGE)
Holographic multiplexing for 3D optical memory
[AD-A266099] p 171 N94-11420
OPTICAL PATHS
Study of Einstein-Podolsky-Rosen state for space-time variables in a two photon interference experiment
p 370 N94-10582
OPTICAL PROPERTIES
Invariance of the mobility edge in anodic titanium oxides
[DE92-642136] p 394 N94-10281
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416
Interferometric and optical tests of water window imaging x ray microscopes
[NASA-CR-193369] p 375 N94-10506
Fabrication and analysis of a special optical connector containing a 1/4-inch-long optical fiber for DOI tests
[DE93-013115] p 381 N94-10647
Space environmental effects on the integrity of chromic acid anodized coatings
[NASA-CR-191468] p 55 N94-10947
Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate
[DE93-012498] p 399 N94-11243
Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems
[AD-A265075] p 382 N94-11653
Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880
Optical characteristics in Tokyo Bay
p 204 N94-11972
Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time
[AD-A265530] p 403 N94-12010
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites
p 430 N94-12163
OPTICAL PUMPING
A phaseonium magnetometer: A new optical magnetometer based on index enhanced media
p 375 N94-10565
High power z pinches as x ray laser photopumps
[DE93-012842] p 173 N94-10746
New challenges in optical materials development
[DE93-011889] p 383 N94-11676
OPTICAL RADAR
Characterization of a scannerless LADAR system
[DE93-011582] p 174 N94-10959
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535
Development of shipboard ocean lidar
p 140 N94-11965
Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970
Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam
p 177 N94-12722
Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar
p 224 N94-12736
OPTICAL REFLECTION
An expert system shell for inferring vegetation characteristics: Prototype help system (Task 1)
[NASA-CR-193411] p 231 N94-11236
Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898
The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981
OPTICAL SWITCHING
Design and analysis of an optical interface message processor
[AD-A266079] p 381 N94-10697
Thermal-optical switching of a silicon based interference filter
[AD-A265152] p 174 N94-11095
A thermal ionization model for the sustaining phase of lock-on in GaAs
[DE93-011558] p 144 N94-11624
Preliminary surface-emitting laser logic device evaluation
[AD-A266111] p 383 N94-12416
OPTICAL THICKNESS
Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978
OPTICAL TRACKING
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3218] p 350 N94-10963
Airborne optical tracking control system design study
[DE93-009515] p 382 N94-11662
OPTICAL TRANSFER FUNCTION
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742
OPTICAL WAVEGUIDES
Semiconductor ring lasers
[DE93-012386] p 174 N94-11005
OPTIMAL CONTROL
Nonlinear stability and control study of highly maneuverable high performance aircraft
[NASA-CR-193480] p 25 N94-10344
Sample-data and discrete-time H2 optimal control
[MEMO-COSOR-92-53] p 339 N94-10869
Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft
[NASA-TM-106265] p 30 N94-11251
OPTIMIZATION
Perforated plates for thin-walled structures
p 63 N94-10056
LAMINV: A computer code for creating laminates having prescribed properties p 65 N94-10069
Marginal allocations in the core of minimal chain-games
[MEMO-1103] p 348 N94-10162
Applications of cut polyhedra
[CWI-BS-R9221] p 347 N94-10354
Optimization algorithms for integer networks with side constraints for application in routing and scheduling
[AD-A265254] p 322 N94-10492
The d-edge shortest-path problem for a Monge graph
[DE93-009828] p 343 N94-10708
Progress in multidisciplinary design optimization at NASA Langley
[NASA-TM-107754] p 318 N94-10814
Multilevel computer-aided optimum design of structural systems using multiple basis vectors
p 187 N94-11055
Optimisation methods for solving separable nonlinear least squares problems
[ISVR-TR-219] p 345 N94-11217
Grid optimization and multigrid techniques for fluid flow and transport problems p 154 N94-11824
A new heuristic for set covering problems
[INPE-5471-TDI/502] p 333 N94-12358
OPTOELECTRONIC DEVICES
Multiplexed and distributed optical fibre sensors
p 64 N94-10065
Ultrastable reference frequency distribution utilizing a fiber optic link p 355 N94-10994
Lattice-matched heteroepitaxy of wide gap ternary compound semiconductors p 400 N94-11441
ORBIT CALCULATION
Topex orbit determination using GPS tracking system
p 38 N94-10359
Precision GPS ephemerides and baselines
[NASA-CR-194171] p 23 N94-11177
Removal of orbital error and the local geoid effects from ERS-1 altimeter data p 242 N94-11770

ERS-1 precise orbits and altimetry analysis p 242 N94-11771
Operational ERS-1 orbit determination at D-PAF p 243 N94-11774
The Earth's gravity model for the ERS-1 commissioning phase p 243 N94-11778
ERS-1 precise orbit determination p 244 N94-11779
Lunar Scout Two spacecraft gravity experiment p 459 N94-12152

ORBIT TRANSFER VEHICLES
Workshop on Solar Electric Propulsion p 54 N94-11416

ORBITAL ASSEMBLY
In-space operations for lunar and Mars space transfer vehicles p 348 N94-11568
On-orbit servicing for USAF space missions: A phased development approach p 348 N94-11571
Definition of spacecraft standard interfaces by the NASA Space Assembly and Servicing Working Group (SASWG) p 348 N94-11574

ORBITAL ELEMENTS
The long-term dynamical behavior of short-period comets p 427 N94-11629

ORBITAL MECHANICS
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

ORBITAL POSITION ESTIMATION
Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130
Regional orbit precision in the Mediterranean area p 39 N94-12530

ORBITAL RESONANCES (CELESTIAL MECHANICS)
The IR properties of ringed galaxies and the IRAS database [NASA-CR-194286] p 426 N94-11590
On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance p 426 N94-11596

ORBITAL SERVICING
On-orbit refueling p 38 N94-11565
On-orbit refueling p 38 N94-11566
Preliminary analysis of the benefits derived to US Air Force spacecraft from on-orbit refueling p 38 N94-11567
In-space operations for lunar and Mars space transfer vehicles p 348 N94-11568
In-space assembly-servicing requirements p 348 N94-11569
Definition of spacecraft standard interfaces by the NASA Space Assembly and Servicing Working Group (SASWG) p 348 N94-11574
Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577

ORBITS
The long-term dynamical behavior of short-period comets p 427 N94-11629

ORDER-DISORDER TRANSFORMATIONS
X-ray and neutron scattering studies of magnetic critical fluctuations in holmium [DE93-010873] p 400 N94-11467

ORGANELLES
Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids [AD-A264957] p 301 N94-11648

ORGANIC CHEMISTRY
Studies in bioorganic chemistry [AD-A265532] p 55 N94-12011

ORGANIC COMPOUNDS
Second and third order nonlinear optical properties of crystalline inorganic/organic complexes [DE93-011883] p 173 N94-10755
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553
Synthesis, characterization, and modification of poly(organophosphazenes), that bear both 2,2,2-trifluoroethoxy and phenoxy groups [AD-A264913] p 92 N94-11847
Tandem mass spectrometric analysis of phosphate esters [AD-A265483] p 78 N94-12009
A reexamination of amino acids in lunar soil p 452 N94-12109
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210

ORGANIC MATERIALS
Organic matter on the early surface of Mars: An assessment of the contribution by interplanetary dust p 480 N94-12259
Mass and spatial distribution of carbonaceous component in Comet Halley p 433 N94-12263
The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes [AD-A265623] p 404 N94-12376
Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659
Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661
Non-image visible polarization remote sensing of the ocean p 229 N94-12762

ORGANIC SOLIDS
Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755
Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756

ORGANISMS
Compatibility tests for biological specimens to on-board experiments in the Space Shuttle flight [NASDA-CNT-930003] p 301 N94-12278
Study on sea water purification using a substratum of marine organisms p 217 N94-12696
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701
The algorithm of primary production determination p 228 N94-12761
Non-image visible polarization remote sensing of the ocean p 229 N94-12762

ORGANIZATIONS
Engineering performance metrics [DE93-012084] p 128 N94-11028
Insights into software development in Japan p 330 N94-11435
Myths and realities: Defining re-engineering for a large organization p 330 N94-11436
Research and development of post-classical management tools for government program offices, volume 2 [DE93-010236] p 417 N94-11600
Electric and hybrid vehicle site operators program: Thinking of the future [DE93-011231] p 144 N94-11609
AGARD highlights 92/2, September 1992 [AGARD-HIGHLIGHTS-92/2] p 497 N94-11820

ORGANOMETALLIC COMPOUNDS
Aluminum-phosphorus chemistry: Preparation and structural characterization of (Et2AlP(SiMe3)2)2, Et(Cl)2Al(dot)P(SiMe3)3, and i-Bu2(Cl)Al(dot)P(SiMe3)3 [AD-A265268] p 78 N94-11683

ORIGINS
Using solar flare track densities to determine the origin of interplanetary dust particles p 429 N94-12078

ORTHOGONAL FUNCTIONS
An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander [AD-A265116] p 289 N94-11868

ORTHOSTATIC TOLERANCE
Exercise countermeasures for bed-rest deconditioning [NASA-TM-103987] p 300 N94-11191
Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992
Echocardiography in the flight program p 309 N94-11993
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998
Fitness, autonomic regulation and orthostatic tolerance p 310 N94-11999
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004
Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006

ORTHOTROPIC CYLINDERS
Imperfection sensitivity of the Brazier effect for orthotropic cylindrical shells [LR-687] p 186 N94-10879

OSCILLATING CYLINDERS
Vortex-induced forces on oscillating bluff cylinders [AD-A265056] p 154 N94-11865

OSCILLATING FLOW
On the combustion of a laminar spray [NASA-TM-106210] p 28 N94-11238
High order accurate solutions of viscous problems [NASA-TM-106267] p 151 N94-11253
A simple model of melt fracture [AD-A265311] p 92 N94-11862
Establishing baseline data for an experimental appratus that measures heat transfer under conditions of oscillating pressure and flow [NASA-CR-193772] p 413 N94-12343

OSCILLATIONS
Aharonov-Bohm effect in Luttinger liquid [DE93-613818] p 408 N94-10148
Pulsatile instability in rapid directional solidification: Strongly-nonlinear analysis p 115 N94-10188
A group-theoretic approach to the study of small oscillations of a dynamical system with a known symmetry [DE93-612971] p 409 N94-10402
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents [AD-A265149] p 143 N94-11160
Sine and random vibration program evaluation on vibration control systems [DE93-011974] p 188 N94-11460
Decay interaction of bulk and surface Langmuir waves [DE93-617843] p 393 N94-11477
On the coupling of electromagnetic radiation into cavities [DE93-011406] p 137 N94-11621

OSCILLATORS
Numerical simulation of sidebands in free electron laser oscillators [DE93-612675] p 173 N94-10483
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference [AD-A264958] p 375 N94-10486
Review of SHARC 2.0 O3 kinetics and spectroscopy [AD-A265481] p 274 N94-10496
Quantum noise and squeezing in optical parametric oscillator with arbitrary output coupling p 375 N94-10568
An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions p 349 N94-10573
Dissipation in a squeezed-state environment p 370 N94-10584
Disciplined rubidium oscillator with GPS selective availability p 353 N94-10977
A multi-variance analysis in the time domain p 146 N94-10999
A new method of time difference measurement: The time difference method by dual phase coincidence points detection p 357 N94-11002
Confidence of the three-point estimator of frequency drift p 357 N94-11003

OSMIUM
Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films [AD-A265404] p 94 N94-12425

OSMIUM ISOTOPES
Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182
Re-Os dating of 3AB iron meteorites p 432 N94-12237

OSMOSIS
Physiological water model development p 316 N94-12367

OUTCROPS
Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit p 281 N94-12084

OUTGASSING
Vacuum stability requirements of polymeric material for spacecraft application [NASA-TM-109216] p 91 N94-11350
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210

OVER-THE-HORIZON RADAR
HF-OTH radar performance results [AD-A266106] p 138 N94-11655

OXIDATION
Atomic structures and compositions of internal interfaces [DE93-014840] p 363 N94-10750
Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques [NASA-TM-106121] p 67 N94-11237
Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 268 N94-11472
Potential techniques for non-destructive evaluation of cable materials [DE93-008350] p 183 N94-11586
Chemical weathering on Mars: Rate of oxidation of iron dissolved in brines p 455 N94-12128
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210

OXIDATION RESISTANCE

Protective coatings for high-temperature polymer matrix composites
[NASA-TM-106276] p 74 N94-12431

OXIDATION-REDUCTION REACTIONS

Technical Update: Johnson Space Center system using a solid electrolytic cell in a remote location to measure oxygen fugacities in CO/CO2 controlled-atmosphere furnaces
[NASA-TM-104774] p 423 N94-11183

X ray absorption spectroscopy of electrochemically generated species
[AD-A264749] p 77 N94-11265

Publications/Patents/Presentations/Honors/Student eport
[AD-A265136] p 78 N94-11873

The Fe/Mn constraint on precursors of basaltic achondrites p 432 N94-12208

Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425

Sulfate reduction and other sedimentary biogeochemistry in a northern New England salt marsh p 268 N94-12453

The role of certain infauna and vascular plants in the mediation of redox reactions in marine sediments p 268 N94-12454

Acetate concentrations and oxidation in salt marsh sediments p 269 N94-12459

The effects of acid deposition on sulfate reduction and methane production in peatlands p 270 N94-12465

Elevated acetate concentrations in the rhizosphere of Spartina alterniflora and potential influences on sulfate reduction p 271 N94-12468

OXIDE FILMS

Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL
[DE93-013430] p 95 N94-12602

OXIDES

Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices
[AD-A265685] p 405 N94-12442

OXYGEN

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

Methanol pan fires in an enclosed space: Effect of pressure and oxygen concentration
[AD-A266108] p 79 N94-12415

OXYGEN ATOMS

Atomic structures and compositions of internal interfaces
[DE93-014840] p 363 N94-10750

OXYGEN BREATHING

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

OXYGEN CONSUMPTION

The OSU heat release rate test using the oxygen consumption principle p 20 N94-10784

OXYGEN ISOTOPES

Interstellar graphite in Murchison: Continued search for isotopically distinct components p 97 N94-12029

The EET87513 clast N: A CM2 fragment in an HED polymict breccia p 453 N94-12117

Oxygen isotopes as tracers of tektite source rocks: An example from the Ivory Coast tektites and Lake Bosumtwi Crater p 430 N94-12146

Trace element distributions in primitive achondrites p 431 N94-12200

OXYGEN METABOLISM

Exercise countermeasures for bed-rest deconditioning
[NASA-TM-103987] p 300 N94-11191

OXYGEN PRODUCTION

General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027

Thermodynamics of lunar ilmenite reduction p 415 N94-12028

OXYGEN SUPPLY EQUIPMENT

General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027

OXYGEN 17

Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

OXYGEN 18

Strontium and oxygen isotope study of M-1, M-3 and M-4 drill core samples from the Manson impact structure, Iowa: Comparison with Haitian K-T impact glasses p 281 N94-12080

Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

OZONE

Review of SHARC 2.0 O3 kinetics and spectroscopy
[AD-A265481] p 274 N94-10496

The global potential energy surfaces of the lowest two 1A' states of the ozone molecule: Theoretical determination and analysis p 267 N94-12269

Studies of dynamical processes affecting the distribution of stratospheric ozone
[NASA-CR-193477] p 279 N94-12560

OZONE DEPLETION

Mid-latitude ionospheric response to active experiments
[NASA-CR-193549] p 280 N94-12583

OZONOSPHERE

Atmospheric and spectroscopic research in the far infrared
[NASA-CR-193551] p 280 N94-12582

P

P-I-N JUNCTIONS

Radiation effects in Ga(0.47)In(0.53)As solar cells p 52 N94-11404

Measurement and modeling of the stability of hydrogenated amorphous silicon solar cells and films after intense illumination p 263 N94-11638

P-N JUNCTIONS

Electrochemical characterization of p(+)n and n(+)p diffused InP structures p 49 N94-11385

New experimental techniques for solar cells p 52 N94-11403

P-TYPE SEMICONDUCTORS

Organometallic chemical vapor deposition and characterization of ZnGe(1-x)Si(x)P2-Ge alloys on GaP substrates p 400 N94-11443

PACIFIC OCEAN

Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1
[JTN-93-80418] p 191 N94-11894

Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914

Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924

The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

Coastal processes due to nearshore current around an upheaving island p 199 N94-11942

Availability of wind field over the North Pacific derived from data on ships-of-opportunity and analysis of long-term variabilities p 202 N94-11962

Circulation of North Pacific Intermediate Water p 206 N94-11985

Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990

SSMI wind speed variability over the Pacific Ocean p 207 N94-12637

Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

Pseudo magnetic anomaly derived from satellite altimetry and its application to the tectonics in the North Fuji Basin p 208 N94-12645

Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother p 209 N94-12648

Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650

Pacific rim sea ice as observed with the NIMBUS-7 SMMR p 210 N94-12651

Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661

Sea surface temperature images of Geostationary Meteorological Satellite (GMS) and sea truth data from ferry boats p 213 N94-12671

Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683

On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724

PACKAGING

Environmental Protection Agency's life cycle methodology: Guidelines for use in development of packaging
[PB93-194199] p 265 N94-10841

PACKING DENSITY

Dynamic high-pressure shock compaction of diamond powders
[AD-A266004] p 93 N94-12354

PAIN

Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235

Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

PAINTS

Environmentally Safe and Effective Processes for Paint Removal
[AGARD-R-791] p 126 N94-10613

Paint removal activities in the US Navy p 126 N94-10614

Paint removal activities in Canada p 126 N94-10615

Procedures without danger to the environment and efficiency (PSDEE) for the removal of paint. Point on the French activities concerning the removal of paint p 126 N94-10616

Paint removal activities in Germany p 126 N94-10617

The development of alternative paint removal techniques in the RAF p 126 N94-10618

Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services p 126 N94-10619

Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620

German Air Forces experiences with plastic media blasting and future requirements p 127 N94-10621

Plastic media blasting activities at Hill Air Force Base p 127 N94-10622

Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process p 127 N94-10623

Automated Laser Paint Stripping (ALPS) update p 127 N94-10624

Aquastrip (tm): An innovative paint removal technology p 127 N94-10625

Paint removal and surface cleaning using ice particles p 128 N94-10626

Paint removal using wheat starch blast media p 128 N94-10627

IATA taskforce: Paintstripping p 128 N94-10628

Selectively strippable paint schemes p 128 N94-10629

Experimental measurement of the plasma conductivity of Z93 and Z93P thermal control paint
[NASA-TM-106284] p 43 N94-10756

Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218

Formulating infrared coatings for defence applications
[MRL-RR-1-93] p 90 N94-11302

PAIR PRODUCTION

Coherence influence on the intensity of Bose-Einstein correlations and visible size of a source
[DE93-617697] p 349 N94-10556

Top quark search in D(O) from the lepton + jets mode
[DE93-014027] p 370 N94-12781

PAKISTAN SPACE PROGRAM

Pakistan Space and Upper Atmosphere Research Commission p 37 N94-10693

PALEOMAGNETISM

Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181

Magnetic fields and nonuniform structures of the Moon p 472 N94-12218

PANELS

Stress relaxation forming of Ariane 5 front skirt outer skin panels p 62 N94-10046

PARABOLIC DIFFERENTIAL EQUATIONS

Summation by parts, projections, and stability
[NASA-CR-194290] p 346 N94-12776

PARABOLIC FLIGHT

The formation and breakage of liquid bridges under microgravity p 100 N94-10071

Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128

PARACHUTES

Parachute having improved vent line stacking
[NASA-CASE-MFS-28508-1] p 14 N94-11021

PARADOXES

Study of Einstein-Podolsky-Rosen state for space-time variables in a two photon interference experiment p 370 N94-10582

Observables, measurements and phase operators from a Bohmian perspective p 378 N94-10589

PARALLEL COMPUTERS

Simulation of a parallel computer
[NAL-TR-1154] p 335 N94-10368

Low latency messages on distributed memory multiprocessors
[NASA-CR-191479] p 323 N94-10643
The PVM systems: An in-depth analysis and documenting study. Concise edition
[DE93-011959] p 336 N94-11248
A heterogeneous graphics procedure for visualization of massively parallel solutions
[DE93-009628] p 336 N94-11270
Optimal cube-connected cube multiprocessors
[NASA-CR-191463] p 337 N94-11308

PARALLEL FLOW
Vibrational-thermocapillary parallel flows and stability
p 120 N94-10220
Receptivity in parallel flows: An adjoint approach
p 157 N94-12301

PARALLEL PLATES
Stability of liquid bridges between parallel plates
p 101 N94-10078

PARALLEL PROCESSING (COMPUTERS)
Massively parallel multifrontal methods for finite element analysis on MIMD computer systems
[DE93-009838] p 335 N94-10257
Layering techniques for development of parallel systems: An algebraic approach
[MEMO-INF-92-62] p 335 N94-10277
A parallel implementation of particle tracking with space charge effects on an Intel iPSC/860
[DE93-012307] p 335 N94-10340
CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422
Application of parallel processing to a surface patch/wire junction EFIE code
[AD-A264965] p 336 N94-10488
Optimization algorithms for integer networks with side constraints for application in routing and scheduling
[AD-A265254] p 322 N94-10492
Bringing theory to practice: The reality of interprocessor communication
[DE93-012346] p 336 N94-10738
Efficient partitioning and assignment on programs for multiprocessor execution
[NASA-CR-193458] p 324 N94-10942
The Zipcode message-passing system
[DE93-011958] p 336 N94-11027
Basic experiment on an ultrasonic method of localization
[DE93-754295] p 358 N94-11042
Advanced rotorcraft flight simulation: Model development, validation and parallel implementation
p 25 N94-11056
Summary of research in progress at ICASE
[NASA-CR-191481] p 318 N94-11198
A distributed version of the NASA Engine Performance Program
[NASA-TM-106208] p 327 N94-11231
Portable programming on parallel/networked computers using the Application Portable Parallel Library (APPL)
[NASA-TM-106238] p 327 N94-11232
The PVM systems: An in-depth analysis and documenting study. Concise edition
[DE93-011959] p 336 N94-11248
A heterogeneous graphics procedure for visualization of massively parallel solutions
[DE93-009628] p 336 N94-11270
Heterogeneous SuperConcurrent Parallelism (HeSCP)
[AD-A265004] p 336 N94-11293
Optimal cube-connected cube multiprocessors
[NASA-CR-191463] p 337 N94-11308
Parallel molecular dynamics with the embedded atom method
[DE93-010683] p 367 N94-11455
Massively parallel hydrodynamics on unstructured grids
[DE93-007325] p 153 N94-11601
High-performance distributed systems architecture
[AD-A265297] p 337 N94-11829
Problem specific environments for parallel systems
[AD-A266129] p 337 N94-12540
Networks of real-time processes
[DE93-013049] p 338 N94-12597
The DOE Program in High-Performance Computing and Communications (HPCC)
[DE93-013813] p 334 N94-12606

PARALLEL PROGRAMMING
Advanced rotorcraft flight simulation: Model development, validation and parallel implementation
p 25 N94-11056
Flexible language constructs for large parallel programs
[NASA-CR-191478] p 326 N94-11196
Scalable spin locks for multiprogrammed systems
[AD-A265007] p 337 N94-11650
Transactions of the 10th Army Conference on Applied Mathematics and Computing
[AD-A265098] p 318 N94-11678
An introduction to chordal graphs and clique trees
[DE93-012508] p 332 N94-11695
Problem specific environments for parallel systems
[AD-A266129] p 337 N94-12540

PARAMAGNETISM
Orbital glass in HTSC
[DE93-613988] p 395 N94-10415

PARAMETER IDENTIFICATION
Microwave radiometry of ice cover in polar regions
p 210 N94-12655
Trajectory curving in underwater propagation of light
p 226 N94-12748
Mixing of drifter ensemble by mesoscale currents
p 228 N94-12760
Improvement of method for experimental determination of flutter speed by parameter identification
[NASA-CR-193555] p 33 N94-12769

PARAMETERIZATION
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer
[DE93-011950] p 275 N94-11052
Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577
Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

PARAMETRIC AMPLIFIERS
Quantum noise and squeezing in optical parametric oscillator with arbitrary output coupling
p 375 N94-10568
Photon number amplification/duplication through parametric conversion p 376 N94-10572

PARASITIC DISEASES
Satellite, environmental, and medical information applied to epidemiological monitoring p 307 N94-11802

PARITY
Discrete space-time symmetries
[DE93-010199] p 341 N94-10259
On parity conservation and the question of the missing, right-handed neutrino
[DE93-613092] p 361 N94-10414
Nuclear structure models: Applications and development
[DE93-012934] p 368 N94-11813

PARSING ALGORITHMS
Layering techniques for development of parallel systems: An algebraic approach
[MEMO-INF-92-62] p 335 N94-10277

PARTIAL DIFFERENTIAL EQUATIONS
Vectorizing matrix operations arising from PDE discretization on 9-point stencils
[CWI-NM-R9221] p 342 N94-10351
The INTEGRATOR package for REDUCE, version 1.0
[MEMO-1100] p 322 N94-10418
Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607
DILUTE: A code for studying beam evolution under RF noise
[DE93-011605] p 133 N94-10960
Quality factors and local adaption (with applications in Eulerian hydrodynamics)
[DE93-010502] p 151 N94-11272
Control of large space structures with varying configuration
[AD-A265764] p 44 N94-12387

PARTIAL PRESSURE
A mechanism for the reduction in risk of decompression sickness in microgravity environment
p 312 N94-11545

PARTICLE ACCELERATION
Acceleration of positrons in supernova shocks
[NASA-CR-193713] p 425 N94-10511

PARTICLE ACCELERATOR TARGETS
Fast trigger algorithm for B-events selection
[DE93-621452] p 365 N94-11089
Experiments to measure the gluon helicity distribution in protons
[DE93-011756] p 368 N94-11613

PARTICLE ACCELERATORS
Proceedings of the Second KEK Topical Conference on e(sup +)e(sup -) collision physics
[DE93-754139] p 364 N94-10889

PARTICLE BEAMS
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Spectrum analysis in beam diagnostics
[DE93-013401] p 373 N94-12601

PARTICLE COLLISIONS
Strangeness production with protons and pions
[DE93-010879] p 359 N94-10304
Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron
[DE93-754288] p 363 N94-10720
Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD
[DE93-013593] p 363 N94-10748
The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter
[DE93-620984] p 364 N94-10875
Proceedings of the Second KEK Topical Conference on e(sup +)e(sup -) collision physics
[DE93-754139] p 364 N94-10889
Experiments in ultracold collisions
[DE93-012110] p 365 N94-11029
Electronic excitation of ground state atoms by collision with heavy gas particles
[NASA-CR-193364] p 366 N94-11360
Experiments to measure the gluon helicity distribution in protons
[DE93-011756] p 368 N94-11613
Top quark search in D(O) from the lepton + jets mode
[DE93-014027] p 370 N94-12781

PARTICLE DENSITY (CONCENTRATION)
Nonlinear space charge effect of bunched beam in linac
[DE93-612176] p 371 N94-10409

PARTICLE EMISSION
NASCAP programmer's reference manual
[NASA-CR-191044] p 278 N94-11702

PARTICLE IMAGE VELOCIMETRY
The evolution of whole field optical diagnostics for external transonic testing
[ARA-MEMO-379] p 383 N94-11887
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889

PARTICLE INTERACTIONS
Indication on the existence of the bound state in the p anti p-system
[DE92-641575] p 361 N94-10532
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction
[DE93-617691] p 362 N94-10550
Gas-Grain Simulation Facility (GGSF). Volume 2: Conceptual design definition
[NASA-CR-177613] p 423 N94-11229
Studies of electrostatic waves and VLF-wave particle interaction in the ionosphere
[AD-A266013] p 278 N94-12392

PARTICLE MASS
Top and Higgs masses in a composite boson model
[DE93-010874] p 359 N94-10302
Report of the Workshop on Light Particle-Induced Reactions
[DE93-752300] p 360 N94-10317

PARTICLE MOTION
Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space
p 350 N94-10600
New squeezed landau states p 379 N94-10601
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199
Helium transport scaling law studies
[DE93-013487] p 393 N94-11513
Short pulse lasers for generation of fields exceeding 100 MG
[DE93-013346] p 369 N94-11815
Spectrum analysis in beam diagnostics
[DE93-013401] p 373 N94-12601

PARTICLE PRECIPITATION
Processing, properties, and wear resistance of aluminides
[DE93-012186] p 83 N94-11141

PARTICLE PRODUCTION
Production of strange clusters in relativistic heavy ion collisions
[DE93-010876] p 359 N94-10303
Strangeness production with protons and pions
[DE93-010879] p 359 N94-10304
Fast trigger algorithm for B-events selection
[DE93-621452] p 365 N94-11089
Relativistic heavy-ion collisions
[DE93-014844] p 366 N94-11147
Tau physics
[DE93-010956] p 367 N94-11469
Experiments to measure the gluon helicity distribution in protons
[DE93-011756] p 368 N94-11613

PARTICLE SIZE DISTRIBUTION
Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202

Granular instability in fluidized beds: A small-over-large instability p 122 N94-10235
Martian particle size based on thermal inertia corrected for elevation-dependent atmospheric properties p 430 N94-12107
Organic matter on the early surface of Mars: An assessment of the contribution by interplanetary dust p 480 N94-12259
Dynamic high-pressure shock compaction of diamond powders [AD-A266004] p 93 N94-12354

PARTICLE SPIN
Aharonov-Bohm effect in Luttinger liquid [DE93-613818] p 408 N94-10148

PARTICLE THEORY
Top and Higgs masses in a composite boson model [DE93-010874] p 359 N94-10302
The legacy of uncertainty p 376 N94-10577
S(sup 1) x S(sup 2) as a bag membrane and its Einstein-Weyl geometry [DE93-613149] p 410 N94-10635
All possible electroweak models from Z orbifold [DE93-617656] p 411 N94-10880
Elementary particle physics and high energy phenomena [DE93-013971] p 370 N94-12609

PARTICLE TRACKS
Conceptual design report for the SDC barrel and intermediate muon detectors based on a jet-type drift chamber [DE93-753173] p 367 N94-11510
Theory of elementary particles and accelerator theory. Task C: Experimental high energy physics [DE93-013139] p 368 N94-11696

PARTICLE TRAJECTORIES
Spin characteristics of ion beams during the motion of electromagnetic elements [DE93-617448] p 364 N94-10848
Quantized conic sections; quantum gravity [DE93-010950] p 411 N94-10956
Non-barrier tunneling in presence of dissipations [DE93-621381] p 412 N94-11086
Probability of particle trapping/detrapping in torsatrons [DE93-621641] p 390 N94-11121
A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study [AD-A264805] p 152 N94-11519
Coulomb effects in low-energy nuclear fragmentation [NASA-TP-3352] p 485 N94-12434

PARTICLES
Light scattering from a spherical particle on a conducting plane. Part 1: Normal incidence [AD-A265920] p 383 N94-12341

PARTICULATES
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels [DE93-009798] p 98 N94-11366
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring [DE93-014093] p 272 N94-12783

PARTITIONS (MATHEMATICS)
A lattice gas model for enzyme kinetics with alternate interactions [DE93-613027] p 395 N94-10411

PASCAL (PROGRAMMING LANGUAGE)
The solving of equations by the method of boundary elements p 326 N94-11182

PASSENGERS
Federal Aviation Administration aviation forecasts [AD-A265611] p 2 N94-12578

PASSIVITY
Surface passivation of InP solar cells with InAlAs layers p 49 N94-11389
In situ XANES studies of the passive film on Fe and Fe-26Cr [DE93-010869] p 84 N94-11459
Corrosion and passivation of high temperature superconductors [AD-A265402] p 405 N94-12586

PATTERN RECOGNITION
Object recognition in industrial environment by means of tactile sensor [ITN-93-85200] p 178 N94-10393
Model-based recognition of 3-D objects by geometric hashing technique [DE93-612916] p 322 N94-10410
Unsupervised splitting rules for neural tree classifiers [AD-A264961] p 338 N94-10487
Automaticity of processing location versus identity information in brief visual displays [AD-A265013] p 418 N94-10491
Application of normalized gray-scale correlation [DE93-013765] p 141 N94-10521
Introduction to Bayesian image analysis [DE93-012628] p 347 N94-11006
A high-speed object recognition chip based on biologically-realistic hybrid temporal processing element [AD-A265490] p 339 N94-11049
Three-dimensional object recognition using an unuspervised BCM network: The usefulness of distinguishing features [AD-A264576] p 304 N94-11261
A summary of image segmentation techniques [NASA-TM-104022] p 327 N94-11274
Remote sensing of the suspended matter distribution with high concentration in China Sea p 192 N94-11901
A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus p 455 N94-12126

PAYLOAD INTEGRATION
The advanced fluid physics module: How to achieve scientific goals for Spacelab D2 p 39 N94-10136

PAYLOADS
Description of the liquid structure facility architecture and experimental demonstration of the diagnostic capabilities p 39 N94-10118

PEAT
Application of static and dynamic enclosures in determining DMS and OCS fluxes in Sphagnum peatlands p 269 N94-12460
Effects of inorganic sulfur addition on fluxes of volatile sulfur compounds in Sphagnum peatlands p 270 N94-12461
Environmental factors controlling fluxes of dimethyl sulfide in a New Hampshire fen p 270 N94-12462

PEEK
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials [DE93-008717] p 88 N94-10891
Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone) [AD-A266027] p 91 N94-11487

PEGASUS AIR-LAUNCHED BOOSTER
In-flight evaluation of aerodynamic predictions of an air-launched space booster p 3 N94-10427
Special investigation report: Commercial space launch incident, launch procedure anomaly orbital sciences corporation PEGASUS/SCD-1, 80 nautical miles east of Cape Canaveral, Florida, February 9, 1993 [PB93-917003] p 40 N94-11893

PELLETS
Dielectric breakdown and its influence on ignition [AD-A264925] p 78 N94-11855

PENETRATION
A spectral nodal method for the solution of the Sn equations in x, y geometry for highly absorbing deep penetration problems [DE93-613520] p 349 N94-10636
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter [DE93-617741] p 364 N94-10837
Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563
Prediction of alumina penetration [DE93-014017] p 95 N94-12610

PENNING EFFECT
Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578

PEPTIDES
Development of bioelastic materials for the prevention of adhesions: Polypenta- and polytetrapeptides [AD-A264851] p 88 N94-10863
Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids [AD-A264957] p 301 N94-11648

PERFLUORO COMPOUNDS
The properties of perfluoropolyethers used for space applications [NASA-TM-106275] p 88 N94-10864

PERFORATED PLATES
Perforated plates for thin-walled structures p 63 N94-10056

PERFORMANCE
From red tape to results: Creating a government that works better and costs less p 422 N94-11351
From red tape to results: Creating a government that works better and costs less. Executive summary p 422 N94-11353

PERFORMANCE PREDICTION
Hydrostatic testing of thick laminated composite cylinders for performance model validation [DE93-012728] p 184 N94-10264
Characterization of a scannerless LADAR system [DE93-011582] p 174 N94-10959
Accelerated screening methods for predicting lubricant performance in refrigerant compressors [DE93-014773] p 89 N94-11146
A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors [NASA-TM-106279] p 29 N94-11255
Applying reliability models to the maintenance of Space Shuttle software p 330 N94-11434
Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532
HF-OTH radar performance results [AD-A266106] p 138 N94-11655

PERFORMANCE TESTS
An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008
The electron beam furnace: A new facility for materials science research p 109 N94-10126
Particle image velocimetry technique: Calibration tests p 111 N94-10137
Hydrostatic testing of thick laminated composite cylinders for performance model validation [DE93-012728] p 184 N94-10264
Space nuclear thermal propulsion nuclear element tests at Sandia National Laboratories [DE93-002301] p 45 N94-10282
Demonstration prototype gamma-ray hodoscope alternative to CARGOSCAN for rocket stage monitoring [DE93-006908] p 169 N94-10326
AGBT advanced counter-rotating gearbox detailed design report [NASA-CR-180883] p 179 N94-10400
Static internal performance of a single expansion ramp nozzle with multiaxis thrust vectoring capability [NASA-TM-4450] p 12 N94-10675
Characterization of in-flight performance of ion propulsion systems [NASA-TM-106283] p 46 N94-10761
Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844
In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT) [NAL-TR-1165] p 43 N94-10859
Performance and rotor loads measurements of the Lynx XZ170 helicopter with rectangular blades [NASA-TM-104000] p 1 N94-10936
Landing Craft Air Cushion (LCAC) crew selection system manual [AD-A265158] p 313 N94-11098
Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130
Accelerated screening methods for predicting lubricant performance in refrigerant compressors [DE93-014773] p 89 N94-11146
Development and application of an acceptance testing model p 330 N94-11432
Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533
Electric and hybrid vehicle site operators program: Thinking of the future [DE93-011231] p 144 N94-11609
Theory of elementary particles and accelerator theory. Task C: Experimental high energy physics [DE93-013139] p 368 N94-11696
Basic attributes test (BAT): Operational pre-implementation analysis and score equating [AD-A265885] p 314 N94-12276
FR/GE/US radar receiver pulse compression ratio [AD-A265391] p 138 N94-12409

PERIOD DOUBLING
To the theory of irregular auto modulation in electron beam-backward electromagnetic wave dynamic system [DE93-620982] p 133 N94-11030

PERIODIC VARIATIONS
A grid generation method to calculate the flow field in a three-dimensional cascade of blades [NAL-TR-1158] p 147 N94-10364
Large amplitude shape oscillations in a mercury drop using a drop tower [DE93-767972] p 125 N94-10730
Space and time variability of the Gulf Stream using ERS-1 ALT-OPR02 data p 242 N94-11769
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894
Acoustic Doppler current profiling of the Kuroshio over the East China Sea shelf slope p 194 N94-11914
Sea surface heat flux in the beginning of the Kuroshio p 195 N94-11923
Seasonal variation of the surface mixed layer in the subtropical re-circulation area of the North Pacific during OMLET p 195 N94-11924
The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

Current variability on the shelf break northeast of Taiwan p 219 N94-12708

PERMANENT MAGNETS
Lightweight linear alternators with and without capacitive tuning [NASA-CR-185273] p 140 N94-10505
Improvement of azimuthal homogeneity in permanent-magnet bearing rotors [DE93-009954] p 144 N94-11607

PEROVSKITES
The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

PERSONAL COMPUTERS
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363
Application of parallel processing to a surface patch/wire junction EFIE code [AD-A264965] p 336 N94-10488

PERSONALITY TESTS
Basic attributes test (BAT): Operational pre-implementation analysis and score equating [AD-A265885] p 314 N94-12276

PERSONNEL
Department of Energy fundamentals handbook: Engineering symbology, prints, and drawings [DE93-012181] p 129 N94-11456
The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research [AD-A265278] p 313 N94-11701

PERSONNEL SELECTION
A comparison of high and low-impact reports of investigation on adjudicators' decision making: A pilot study [AD-A265747] p 416 N94-10298
Landing Craft Air Cushion (LCAC) crew selection system manual [AD-A265158] p 313 N94-11098
The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research [AD-A265278] p 313 N94-11701
Basic attributes test (BAT): Operational pre-implementation analysis and score equating [AD-A265885] p 314 N94-12276

PERTURBATION THEORY
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light p 376 N94-10575
Direct solution of the mathematical adjoint equations for an interface current nodal formulation [DE93-009961] p 346 N94-11608

PETRI NETS
Task planning with uncertainty for robotic systems [NASA-CR-193253] p 338 N94-10638

PETROGRAPHY
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core p 281 N94-12056
The great 8 MA event and the structure of the H-chondrite parent body p 429 N94-12058
Trace-element abundances in several new ureilites p 80 N94-12096
Distribution of vanadium and melting of opaque assemblages in Efremovka CAI's p 282 N94-12141

PETROLEUM PRODUCTS
Immediate response to free product discovery [PB93-182970] p 265 N94-11015
Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers [PB93-181592] p 266 N94-11471

PETROLOGY
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F [NASA-CR-193095] p 435 N94-12015
Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
The great 8 MA event and the structure of the H-chondrite parent body p 429 N94-12058
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya: Petrogenesis p 281 N94-12074
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Petrogenesis p 281 N94-12075
Mineralogy versus bulk composition of the carbonaceous chondrite clast Kaidun 2 p 429 N94-12101
A structural and petrographic investigation of the pretoria saltpan impact structure p 282 N94-12102
Carbonaceous chondrite clasts in the Kapoeta howardite p 282 N94-12104
LEW88516 and SNC meteorites p 430 N94-12150
Flash melting of chondrule precursors in excess of 1600 C. Series 1: Type 2 (B1) chondrule composition experiments p 431 N94-12177
Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182
Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196
The granulite suite: Impact melts and metamorphic breccias of the early lunar crust p 282 N94-12197
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211

PH
A survey of techniques for corrosion monitoring [DE93-012131] p 83 N94-11250

PH FACTOR
Size dependence of chemical reactivity of gaseous metal clusters: A new mechanistic probe [AD-A264690] p 77 N94-11264

PHASE CHANGE MATERIALS
Modeling void growth and movement with phase change in thermal energy storage canisters [NASA-TM-106288] p 163 N94-12576

PHASE COHERENCE
Coherent structure in near wall turbulence with riblets p 165 N94-12628

PHASE CONJUGATION
Limitations to the quality of optical phase conjugation by stimulated Brillouin scattering [AD-A266006] p 383 N94-12389

PHASE DEMODULATORS
Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013

PHASE DIAGRAMS
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O [DE93-013590] p 76 N94-11244
Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5) [DE93-011359] p 403 N94-12363

PHASE ERROR
The limit of frequency estimation p 356 N94-11001

PHASE LOCKED SYSTEMS
Method of recertifying a loaded bearing member using a phase point [NASA-CASE-LAR-14741-1] p 185 N94-10671

PHASE MATCHING
New challenges in optical materials development [DE93-011889] p 383 N94-11676

PHASE SEPARATION (MATERIALS)
Design of multisample, multistep phase partitioning apparatus for use on Space Shuttle Spacelab, and Spacelab missions p 108 N94-10120
Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221
Phase separation at gas-liquid critical points p 122 N94-10233
Use of inert immiscible liquid for crystal separation out of its feeding solution in weightlessness p 124 N94-10242

PHASE SHIFT
Interferometry with particles of non-zero rest mass [DE93-613518] p 409 N94-10501
Three-nucleon problem with phase equivalent potentials [DE93-617731] p 363 N94-10722
Characterization of a scannerless LADAR system [DE93-011582] p 174 N94-10959
FEFF5: An ab initio multiple scattering XAFS code [DE93-011000] p 367 N94-11470

PHASE SHIFT KEYING
Telemetering and telecommunications research [NASA-CR-193235] p 42 N94-11297
Flexible high-speed CODEC [NASA-CR-191169] p 146 N94-12433

PHASE STABILITY (MATERIALS)
Fluid-fluid interfacial instabilities induced by gravity p 121 N94-10229

PHASE TRANSFORMATIONS
Studies of critical point phenomena of fluids: Bulk fluids, fluids in pores, and at interfaces p 80 N94-10228
Singularity spectrum of self-organized criticality [DE93-613820] p 348 N94-10404
Monte Carlo simulations of phase transformations in Fe-Cr alloys [DE93-013847] p 81 N94-10522
Non-gauge phase transformations in quantum transition amplitudes p 378 N94-10596
Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas [DE93-613910] p 396 N94-10800
Non-barrier tunneling in presence of dissipations [DE93-621381] p 412 N94-11086
Low temperature synthesis of monolithic transparent Ta2O5 gels from hydrolysis of metal alkoxide [NASA-TM-106246] p 89 N94-11204
Real-space formation and dissipation dynamics of hexagonal reconstruction on Au(100) in aqueous media as explored by potentiodynamic scanning tunneling microscopy [AD-A266138] p 368 N94-11658
Shock transformations in quartzite p 97 N94-12040
Phase transitions and 2D spherical convection in a large icy satellite p 433 N94-12265
Electrode potential-induced reconstruction of Au(100): Effect of chemisorption on nanoscale dynamics as probed by the in-situ scanning tunneling microscopy [AD-A265900] p 404 N94-12388

PHASE VELOCITY
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS [AD-A265959] p 275 N94-11102

PHASE-SPACE INTEGRAL
Correlated states of a quantum oscillator acted by short pulses p 380 N94-10609

PHENOL FORMALDEHYDE
Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772
Advanced phenolic systems for aircraft interiors p 18 N94-10776
Fire resistance and mechanical properties for phenolic prepregs p 20 N94-10786

PHENOLIC RESINS
Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772
Advanced phenolic systems for aircraft interiors p 18 N94-10776

PHENYLS
The synthesis of photocrosslinkable chalcone-bearing polyphosphazenes [AD-A264915] p 92 N94-11849

PHILIPPINES
Status of remote sensing and Geographic Information System (GIS) applications in the Environment and Natural Resources (ENR) sector p 36 N94-10687

PHOBOS
Interdisciplinary scientist participation in the Phobos mission [NASA-CR-193715] p 482 N94-12446

PHONONS
Energy transfer dynamics and impact sensitivity [DE93-009551] p 98 N94-11269
On the theory of phonoriton in cubic semiconductors with a degenerate valence band [DE93-613539] p 402 N94-11680

PHOSPHATES
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials [DE93-008717] p 88 N94-10891
In situ secondary ion mass spectrometry analysis [DE93-012185] p 76 N94-11140
Radiation-induced aperiodicity in irradiated ceramics [DE93-013335] p 91 N94-11698
Tandem mass spectrometric analysis of phosphate esters [AD-A265483] p 78 N94-12009

PHOSPHAZENE
Ring-opening polymerization of phosphazenes [AD-A265000] p 90 N94-11292
Synthesis, characterization, and modification of poly(organophosphazenes), that bear both 2,2,2-trifluoroethoxy and phenoxy groups [AD-A264913] p 92 N94-11847
Radiation-induced modifications of allylamino-substituted polyphosphazenes [AD-A264914] p 92 N94-11848
The synthesis of photocrosslinkable chalcone-bearing polyphosphazenes [AD-A264915] p 92 N94-11849

PHOSPHINES
Remote plasma enhanced chemical vapor deposition of GaP with in situ generation of phosphine precursors p 399 N94-11440

PHOSPHORESCENCE
Thermographic properties of eight blue-emitting phosphors [DE93-011459] p 78 N94-11622

PHOSPHORS
Thermographic properties of eight blue-emitting phosphors [DE93-011459] p 78 N94-11622
PHOSPHORUS COMPOUNDS
Aluminum-phosphorus chemistry: Preparation and structural characterization of (Et2AlP(SiMe3)2)2, Et(Cl)2Al(dot)P(SiMe3)3, and i-Bu2(Cl)Al(dot)P(SiMe3)3 [AD-A265268] p 78 N94-11683
PHOSPHORUS POLYMERS
Fire-resistant hydrolytically stable poly(arylene phosphine oxide) material systems p 19 N94-10780
PHOTOACOUSTIC SPECTROSCOPY
Application of the infrared photoacoustic spectroscopy to the study of the cure mechanisms of structural epoxy adhesives p 61 N94-10040
PHOTOCATHODES
Interference photocathode [AD-D015770] p 132 N94-10382
PHOTOCHEMICAL REACTIONS
Photoinitiated radical polymerization of liquid monomers in microgravity p 124 N94-10246
Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry [DE93-010871] p 394 N94-10301
Photochemical modelling of Venus clouds using Pioneer Venus data [NASA-CR-194108] p 434 N94-10823
Dynamics of charge-transfer excited states relevant to photochemical energy conversion [DE93-013981] p 263 N94-11116
The synthesis of photocrosslinkable chalcone-bearing polyphosphazenes [AD-A264915] p 92 N94-11849
NRL review for 1993 [AD-A265666] p 497 N94-12334
A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker [AD-A265998] p 93 N94-12353
Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid) [AD-A265288] p 95 N94-12585
PHOTOCONDUCTIVITY
A thermal ionization model for the sustaining phase of lock-on in GaAs [DE93-011558] p 144 N94-11624
PHOTOCONDUCTORS
GaAs PCSS: High gain switching and device reliability [DE93-009851] p 401 N94-11605
PHOTODETACHMENT
Photodetachment studies on few-electron atomic negative ions [DE93-008474] p 358 N94-10154
PHOTODIODES
New challenges in optical materials development [DE93-011889] p 383 N94-11676
Development of the one-component diode-array velocimeter [AD-A265552] p 171 N94-12533
PHOTOELECTRIC EMISSION
Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism [DE93-010738] p 401 N94-11646
PHOTOELECTRON SPECTROSCOPY
Surface and near-surface atom imaging with photoelectron holography [DE93-013197] p 169 N94-10526
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films [DE93-767974] p 82 N94-10732
Tribological characteristics of hot-pressed self-lubricating composites [NAL-TR-1160] p 66 N94-10858
PHOTOELECTRONS
Photodetachment studies on few-electron atomic negative ions [DE93-008474] p 358 N94-10154
Surface and near-surface atom imaging with photoelectron holography [DE93-013197] p 169 N94-10526
Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD [DE93-013593] p 363 N94-10748
PHOTOEXCITATION
Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids [AD-A264689] p 399 N94-11263
Atomic processes relevant to polarization plasma spectroscopy [DE93-753240] p 393 N94-11594
Polaronic charge separation in mixed-halide MX solids [AD-A266073] p 403 N94-12345
PHOTOGEOLOGY
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048
PHOTOGRAMMETRY
On resolution of underwater stereo photogrammetry p 172 N94-11966
PHOTOGRAPHIC MEASUREMENT
Interferometric and optical tests of water window imaging x ray microscopes [NASA-CR-193369] p 375 N94-10506
PHOTOINTERPRETATION
Satellite inventory of Minnesota forest resources [NASA-CR-193565] p 231 N94-11521
PHOTOIONIZATION
Dynamics of dissociation versus ionization in strong laser fields [DE93-009261] p 173 N94-10287
High power z pinches as x ray laser photopumps [DE93-012842] p 173 N94-10746
PHOTOLITHOGRAPHY
Radiation-induced modifications of allylamino-substituted polyphosphazenes [AD-A264914] p 92 N94-11848
PHOTOLUMINESCENCE
GaAs PCSS: High gain switching and device reliability [DE93-009851] p 401 N94-11605
Thermographic properties of eight blue-emitting phosphors [DE93-011459] p 78 N94-11622
PHOTOLYSIS
Vibrational overtone activation of methylcyclopropene [AD-A265588] p 79 N94-12373
PHOTOMAPPING
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048
PHOTOMASKS
A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker [AD-A265998] p 93 N94-12353
PHOTONICS
Semiconductor ring lasers [DE93-012386] p 174 N94-11005
Preliminary surface-emitting laser logic device evaluation [AD-A266111] p 383 N94-12416
PHOTONS
Disturbance, the uncertainty principle and quantum optics p 375 N94-10569
Photon number amplification/duplication through parametric conversion p 376 N94-10572
Non classical effects in planar waveguides p 376 N94-10574
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light p 376 N94-10575
Study of Einstein-Podolsky-Rosen state for space-time variables in a two photon interference experiment p 370 N94-10582
Squeezed colour states in gluon jet p 379 N94-10599
Wavelets and spacetime squeeze p 379 N94-10604
Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD [DE93-013593] p 363 N94-10748
A review of two photon production of jets at PEP and PETRA energies [DE93-011742] p 364 N94-10754
Non-Euclidean space for local hidden variables [DE93-621341] p 344 N94-11032
Investigation of optically generated electronic defects and protonic transport in hydrogen-bonded molecular solids: Isomorphs of potassium dihydrogen phosphate [DE93-012498] p 399 N94-11243
LCLS optics: Selected technological issues and scientific opportunities [DE93-010953] p 175 N94-11468
Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes [AD-A265197] p 373 N94-11880
PHOTOPRODUCTION
A review of two photon production of jets at PEP and PETRA energies [DE93-011742] p 364 N94-10754
PHOTOSYNTHESIS
Estimating Photosynthetically Available Radiation (PAR) at the Earth's surface from satellite observations p 230 N94-10955
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector [PB93-194165] p 267 N94-11845
Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661
PHOTOTRANSISTORS
Preliminary surface-emitting laser logic device evaluation [AD-A266111] p 383 N94-12416
PHOTOVOLTAGES
Adsorption and dissociation of disilane on Si(001) studied by STM [AD-A265269] p 402 N94-11684
PHOTOVOLTAIC CELLS
Flexible polycrystalline thin-film photovoltaics for space applications p 50 N94-11393
Space Station Freedom advanced photovoltaics and battery technology development planning p 52 N94-11401
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411
PHOTOVOLTAIC CONVERSION
Japan's Sunshine Project [DE93-767980] p 262 N94-10498
High efficiency direct thermal to electric energy conversion from radioisotope decay using selective emitters and spectrally tuned solar cells [NASA-TM-106227] p 47 N94-11307
Proceedings of the 12th Space Photovoltaic Research and Technology Conference (SPRAT 12) [NASA-CP-3210] p 48 N94-11380
Flexible polycrystalline thin-film photovoltaics for space applications p 50 N94-11393
Space Station Freedom advanced photovoltaics and battery technology development planning p 52 N94-11401
Workshop summary: Receivers for laser power beaming p 54 N94-11419
PHOTOVOLTAIC EFFECT
An overview of the Defence Research Agency photovoltaic programme p 53 N94-11412
NASDA activities in space solar power system research, development and applications p 54 N94-11413
Thin film solar cell workshop p 54 N94-11415
Polaronic charge separation in mixed-halide MX solids [AD-A266073] p 403 N94-12345
PHYSICAL CHEMISTRY
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2 [ESA-SP-333-VOL-2] p 112 N94-10171
Crystal-chemistry and partitioning of REE in whitlockite p 408 N94-12174
PHYSICAL EXERCISE
Exercise countermeasures for bed-rest deconditioning [NASA-TM-103987] p 300 N94-11191
Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992
Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity p 310 N94-12001
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368
PHYSICAL OPTICS
Physical optics modelling of Soft X ray Projection Lithography (SXPL) imaging experiments [DE93-011556] p 374 N94-10339
PO/PTD diffraction synthesis of array-fed reflector antennas for satellite and radar applications p 137 N94-11636
PHYSICAL SCIENCES
Project TIMS (Teaching Integrated Math/Science) [NASA-CR-194288] p 416 N94-11599
PHYSICIANS
Clinical aspects of telemedicine p 306 N94-11795
PHYSIOLOGICAL EFFECTS
Effects of CSF hormones and ionic composition on salt/water metabolism [NASA-CR-193232] p 300 N94-11045
Exercise countermeasures for bed-rest deconditioning [NASA-TM-103987] p 300 N94-11191
PHYSIOLOGICAL RESPONSES
Unsupervised splitting rules for neural tree classifiers [AD-A264961] p 338 N94-10487
Effect of double density caging during Space Shuttle transport of laboratory rats [NASA-CR-193228] p 300 N94-11180

Allowable exposure limits for carbon dioxide during extravehicular activity
[NASA-TM-103832] p 315 N94-11375
A mechanism for the reduction in risk of decompression sickness in microgravity environment
p 312 N94-11545
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995
Glycerol-induced hyperhydration p 309 N94-11996
Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997
Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest
p 310 N94-11998
Fitness, autonomic regulation and orthostatic tolerance p 310 N94-11999
Local fluid shifts and edema in humans during simulated microgravity p 311 N94-12003
Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006

PHYSIOLOGY
Conversion of acetic acid to methane by thermophiles
[DE93-014433] p 300 N94-10652
Motion and spatial disorientation systems: Special research capabilities
[AD-A265155] p 303 N94-11097
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543
Physiological water model development
p 316 N94-12367

PHYTOPLANKTON
Seasonal changes of phytoplankton distributions in the Northwest Pacific detected by Coastal Zone Color Scanner p 200 N94-11948
Particle dynamics in the western subarctic Pacific: Implications from CZCS imagery p 200 N94-11950
Development of shipboard ocean lidar
p 140 N94-11965
The development of phytoplankton sensing system with optical fiber p 203 N94-11967
The seasonal change of phytoplankton size distribution using optical fiber sensor p 210 N94-12656
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660
Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan
p 211 N94-12661
Optimum selection of spectral channels in the problem of remote sensing of phytoplankton concentration in ocean water p 223 N94-12726
High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

PHYTOTRONS
Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber
[NASA-TM-109188] p 315 N94-11258

PIEZOELECTRIC CERAMICS
Smart structures at Aastra Corporation
p 69 N94-11326
Recent developments in piezoelectric and electrostrictive sensors and actuators for smart structures p 70 N94-11332
Ceramic actuators for smart materials
[AD-A265664] p 93 N94-12331

PIEZOELECTRIC TRANSDUCERS
Active vibration control of adaptive flexible structures using piezoelectric smart sensors and actuators
p 189 N94-11823

PIEZOELECTRICITY
Recent developments in piezoelectric and electrostrictive sensors and actuators for smart structures p 70 N94-11332
Structural analysis and optimization of adaptive structures by use of the finite element method
p 71 N94-11339
Active damping augmentation of elastomechanical systems using piezoelectric sensors and actuators
p 72 N94-11346
Ceramic actuators for smart materials
[AD-A265664] p 93 N94-12331

PIGMENTS
Formulating infrared coatings for defence applications
[MRL-RR-1-93] p 90 N94-11302

PILOT PERFORMANCE
Aviation accident risk for airmen with aphakia and artificial lens implants
[DOT/FAA/AM-93/11] p 303 N94-10813
Quantitative EEG patterns of differential in-flight workload p 317 N94-11528
Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529
Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532
A comparison of head-up and head-down display formats during instrument flying tasks
[AD-A266140] p 316 N94-11642
The aging military aviator: A review and annotated bibliography
[AD-A265341] p 311 N94-12423

PILOT SELECTION
Basic attributes test (BAT): Operational pre-implementation analysis and score equating
[AD-A265885] p 314 N94-12276

PILOT TRAINING
Flight simulator experiment of the cockpit advisory system
[NAL-TR-1151] p 33 N94-10733
Transfer of training for aerospace operations: How to measure, validate, and improve it p 314 N94-11530
Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532
Basic attributes test (BAT): Operational pre-implementation analysis and score equating
[AD-A265885] p 314 N94-12276

PINHOLE CAMERAS
High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA
[DE93-011892] p 393 N94-11677

PINNING
High frequency behavior of long and small junctions
[AD-A265670] p 403 N94-12336

PINS
Extensions of some guidelines for the mechanical design of coaxial compression pin seals
[DE93-012385] p 177 N94-10348

PINTLES
Atomization characteristics of a prefilming airblast atomizer
[NAL-TM-644] p 148 N94-10727

PION BEAMS
Relativistic heavy ion research
[DE93-013127] p 367 N94-11373

PIONS
Strangeness production with protons and pions
[DE93-010879] p 359 N94-10304
Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551
Coherence influence on the intensity of Bose-Einstein correlations and visible size of a source
[DE93-617697] p 349 N94-10556
Pion correlations and calorimeter design for high energy heavy ion collisions
[DE93-013861] p 373 N94-12607

PIPE FLOW
Flow development in a circular pipe in the UTIAS/RPI M = 8.3 gun tunnel p 6 N94-10442
Suppression of the near wall burst process of a fully developed turbulent pipe flow
[AD-A265995] p 161 N94-12352
Nonlinear stability calculations of pipe flow
p 163 N94-12612

PIPES (TUBES)
A new and efficient way to join composite pipes
p 63 N94-10054
Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness
p 105 N94-10105
An investigation on the effectiveness of the piping interference removal system for STOL aircraft wind tunnel tests
[NAL-TM-647] p 2 N94-10350
Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor
[DE93-005428] p 187 N94-11169

PISTONS
Cooled spool piston compressor
[NASA-CASE-MSC-22020-1] p 179 N94-10674
Instantaneous engine frictional torque: Its components and piston assembly friction
[DE93-011639] p 182 N94-11625
Ceramics technology project database
[DE93-012431] p 91 N94-11672

PITCH
On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances
p 31 N94-11492

PITCHING MOMENTS
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889

PITTING
Plating under reduced pressure
[DE93-011896] p 84 N94-11668

PIXELS
Optimal hemicube sampling
[DE93-010499] p 334 N94-12591

PLAINS
Modern shelf ice, equatorial Aeolis Quadrangle, Mars
p 450 N94-12100
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars
p 469 N94-12203

PLANE WAVES
Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576
Effects of energetic particle events on VLF/LF propagation parameters/1989
[AD-A265266] p 275 N94-11013

PLANETARY ATMOSPHERES
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Giant impact-induced atmospheric blow-off
p 435 N94-12019
An interferometric spectral mapper for the Cassini mission to Saturn and Titan
[NASA-CR-193805] p 482 N94-12429

PLANETARY COMPOSITION
Marslink p 438 N94-12034
Venus mountain-top mineralogy: Misconceptions about pyrite as the high radar-reflecting phase
p 455 N94-12129
Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234
Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235
Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264

PLANETARY CRATERS
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Landscape and geomorphic survey of Zhamanshin area, Northern Kazakhstan: Preliminary report on 1992 field trip data p 282 N94-12123
A two-stage (turbulent-drainage) mechanism for the emplacement of impact crater outflows on Venus
p 458 N94-12145
Cratering on Gaspra p 459 N94-12147

PLANETARY CRUSTS
Venus' center of mass - center of figure displacement and implications p 444 N94-12067
Can weak crust explain the correlation of geoid and topography on Venus? p 453 N94-12118
Fault geometries and extension in the Valles Marineris, Mars p 458 N94-12144
Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust
p 462 N94-12168
The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars
p 463 N94-12169
The thermodynamic case for a water-rich Mars
p 463 N94-12170
Porosity and the ecology of icy satellites
p 431 N94-12186
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga
p 473 N94-12228
Do large impact basins in the southern hemisphere of Mars control the distribution of polar structures and deposits? p 481 N94-12266
Free-air and Bouguer gravity anomalies and the Martian crustal dichotomy p 481 N94-12267
New Mars free-air and Bouguer gravity: Correlation with topography, geology and large impact basins
p 481 N94-12268

PLANETARY EVOLUTION
Columbus proto-planetesimal dust aggregation experiment p 123 N94-10236
Giant impact-induced atmospheric blow-off
p 435 N94-12019
Metal-rich meteorites from the aubrite parent body
p 430 N94-12142
On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation
p 432 N94-12226
Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

PLANETARY GEOLOGY
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407

Physical studies of planetary and satellite surfaces
[NASA-CR-193545] p 434 N94-10817
Evolution of steep Martian slopes p 434 N94-11184
Analysis of gravity, magnetic, and seismic reflection data from Tibet and neighboring regions of China
[NASA-CR-193405] p 278 N94-11886
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Rates of fluvio-thermal erosion on Mars
p 435 N94-12018
Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023
Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031
Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows
p 281 N94-12041
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
Increased depth-diameter ratios in the Medusae Fossae Formation deposits of Mars p 439 N94-12043
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core
p 281 N94-12056
Thermal studies of Martian channels and valleys using Termoskan data p 443 N94-12064
Spectral analysis of the gravity and topography of Mars p 444 N94-12065
Global organization of tectonic deformation on Venus
p 444 N94-12066
Venus' center of mass - center of figure displacement and implications p 444 N94-12067
Using high spectral resolution spectrophotometry to study broad mineral absorption features on Mars
p 446 N94-12077
Venus resurfacing rates: Constraints provided by 3-D Monte Carlo simulations p 453 N94-12119
Scalloped margin domes: What are the processes responsible and how do they operate?
p 454 N94-12120
Yana ring structure, North-Eastern Siberia: A possible counterpart of coronae on Venus p 282 N94-12121
Russia's contribution to regional geologic mapping of Venus p 454 N94-12122
Chemical weathering on Mars: Rate of oxidation of iron dissolved in brines p 455 N94-12128
Geology and surface characteristics of Bell Regio, Venus p 457 N94-12136
Fault geometries and extension in the Valles Marineris, Mars p 458 N94-12144
A two-stage (turbulent-drainage) mechanism for the emplacement of impact crater outflows on Venus
p 458 N94-12145
Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust
p 462 N94-12168
The thermodynamic case for a water-rich Mars
p 463 N94-12170
Geologic history of central Chryse Planitia and the Viking 1 landing site, Mars p 465 N94-12180
Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes
p 467 N94-12195
Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196
Small volcanoes in Tempe Terra, Mars: Their detailed morphometry and inferred geologic significance
p 469 N94-12202
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars
p 469 N94-12203
Characteristics of arachnoids from Magellan data
p 469 N94-12204
Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212
Relation between ages and elevations of Martian channels p 472 N94-12216
Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234
Giant radiating dyke swarms on Earth and Venus
p 283 N94-12236
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247
Transmantle flux tectonics p 283 N94-12249
Do large impact basins in the southern hemisphere of Mars control the distribution of polar structures and deposits? p 481 N94-12266
New Mars free-air and Bouguer gravity: Correlation with topography, geology and large impact basins
p 481 N94-12268
Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446
Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

PLANETARY GRAVITATION
Spectral analysis of the gravity and topography of Mars p 444 N94-12065

PLANETARY MAGNETIC FIELDS
Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221
Precession of Uranus and Neptune and their magnetic field p 473 N94-12222

PLANETARY MAGNETOTAILS
An investigation of the near Earth space environments
[AD-A265295] p 278 N94-11828

PLANETARY MANTLES
Can weak crust explain the correlation of geoid and topography on Venus? p 453 N94-12118
Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130
Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga
p 473 N94-12228
Morphotectonics of Venus p 478 N94-12248
Transmantle flux tectonics p 283 N94-12249

PLANETARY MAPPING
Meteorological Satellite Center
[MSC-TN-26] p 190 N94-11079
Fine tuning of stretched-VISSR image mapping
p 190 N94-11080
Russia's contribution to regional geologic mapping of Venus p 454 N94-12122
Geologic history of central Chryse Planitia and the Viking 1 landing site, Mars p 465 N94-12180
Synthesis of global thematic mapping, Venus: Geologic correlations/questions for the Magellan gravity mission
p 467 N94-12194
Relation between ages and elevations of Martian channels p 472 N94-12216
Free-air and Bouguer gravity anomalies and the Martian crustal dichotomy p 481 N94-12267
Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

PLANETARY NEBULAE
Midplane temperatures in the solar nebula
p 448 N94-12088
Chondrule formation by clumpy accretion onto the solar nebula p 448 N94-12089
The experimental production of matrix lumps within chondrules: Evidence of post-formational processes
p 431 N94-12176
Anomalous REE patterns in unequilibrated enstatite chondrites: Evidence and implications
p 431 N94-12191

PLANETARY RINGS
Wave structure in planetary rings p 434 N94-11185
Submission of Earth-based ring occultation observations to the NASA planetary data system rings discipline node
[NASA-CR-193469] p 427 N94-12557

PLANETARY ROTATION
A method to determine asteroid poles
p 431 N94-12205

PLANETARY STRUCTURE
Marslink p 438 N94-12034
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga
p 473 N94-12228

PLANETARY SURFACES
Physical studies of planetary and satellite surfaces
[NASA-CR-193545] p 434 N94-10817
Yana ring structure, North-Eastern Siberia: A possible counterpart of coronae on Venus p 282 N94-12121
Cratering on Gaspra p 459 N94-12147
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces
p 81 N94-12156
Transmantle flux tectonics p 283 N94-12249

PLANETOLOGY
Planetary astronomy of Mars. Mars data reduction
[NASA-CR-193515] p 424 N94-12768

PLANKTON
Acoustic estimation of plankton biomass
p 218 N94-12699
A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing
p 228 N94-12757

PLANNING
Information resources management long-range plan, FY1994
[DE93-013898] p 420 N94-11588

PLANT ROOTS
Acetate concentrations and oxidation in salt marsh sediments p 269 N94-12459

PLANTS (BOTANY)
Plant architecture, growth and radiative transfer for terrestrial and space environments
[NASA-CR-193587] p 302 N94-12559

PLASMA ACCELERATION
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p))
[DE93-621654] p 391 N94-11210

PLASMA COMPOSITION
Physics and modelling of scrape-off layer transport
[DE93-010510] p 385 N94-10289
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
Helium transport scaling law studies
[DE93-013487] p 393 N94-11513
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

PLASMA CONDUCTIVITY
Experimental measurement of the plasma conductivity of Z93 and Z93P thermal control paint
[NASA-TM-106284] p 43 N94-10756
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840

PLASMA CONTROL
Transport mechanisms acting in toroidal devices: A theoretician's view
[DE93-013463] p 385 N94-10310
Optimization of break-down conditions in tokamak TOTUS
[DE93-617863] p 386 N94-10524
Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747
Calculation of Mercier stability criterium in stellarators
[DE93-621599] p 389 N94-11091
Possibilities of magnetic diagnostics in stellarators
[DE93-621608] p 389 N94-11092
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Physics of tokamak scrape-off layer confinement
[DE93-011949] p 390 N94-11125
Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field
[DE93-620983] p 391 N94-11174
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214
The role of plasma rotation on MHD instabilities in tokamaks
[DE93-013486] p 393 N94-11512
Results from the D3-D advanced divertor program
[DE93-015472] p 393 N94-11514
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370
An emerging understanding of H-mode discharges in tokamaks
[DE93-012829] p 394 N94-12544

PLASMA CURRENTS
Efficiency of fast wave current drive for a weakly relativistic plasma
[DE93-012775] p 385 N94-10159
Possibilities of magnetic diagnostics in stellarators
[DE93-621608] p 389 N94-11092
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370

PLASMA DENSITY
Comparison of hydrodynamic and semi-kinetic treatments for plasma flow along closed field lines
[NASA-CR-193589] p 387 N94-10641

Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p))
[DE93-621654] p 391 N94-11210
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh)
[DE93-621658] p 392 N94-11213
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370

PLASMA DIAGNOSTICS
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic
[DE93-012782] p 173 N94-10160
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
Possibilities of magnetic diagnostics in stellarators
[DE93-621608] p 389 N94-11092
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices
[DE93-621609] p 66 N94-11143
High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA
[DE93-011892] p 393 N94-11677
Inexpensive capillary discharge x-ray laser driver
[AD-A265932] p 176 N94-12382
Spectrum analysis in beam diagnostics
[DE93-013401] p 373 N94-12601

PLASMA DIFFUSION
Numerical method of singular problems on singular integrals
[DE93-613654] p 343 N94-10546

PLASMA DRIFT
Observing and modelling F-region ionospheric dynamics using the (O2) 7320A emission
[AD-A265407] p 279 N94-12419

PLASMA DYNAMICS
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214

PLASMA EQUILIBRIUM
Stationary spectra in a quasi neutral current-carrying plasma
[DE93-617849] p 387 N94-10539

PLASMA ETCHING
Resist materials design: Base-catalyzed chemical amplification
[AD-A265286] p 145 N94-11819

PLASMA FREQUENCIES
Stationary spectra in a magnetized current-carrying plasma
[DE93-617847] p 386 N94-10397
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh)
[DE93-621658] p 392 N94-11213
Decay interaction of bulk and surface Langmuir waves
[DE93-617843] p 393 N94-11477

PLASMA GUNS
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211

PLASMA HEATING
Efficiency of fast wave current drive for a weakly relativistic plasma
[DE93-012775] p 385 N94-10159
Simulations of D3-D divertor biasing with the LEDGE code
[DE93-010500] p 385 N94-10262
Multiple Antenna Implementation System (MAntIS)
[DE93-012515] p 131 N94-10270
Characterization of high-power RF structures using time-domain field codes
[DE93-013416] p 132 N94-10518
Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214
Conversion of the four-strap array in D3-D to a tunable traveling wave antenna
[DE93-012085] p 137 N94-11453
Statistical approach to LHCD modeling using the wave kinetic equation
[DE93-012831] p 394 N94-12545

PLASMA INTERACTIONS
High heat flux components and plasma surface interactions
[DE93-008786] p 385 N94-10253
Results from the D3-D advanced divertor program
[DE93-015472] p 393 N94-11514
Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes
[AD-A265197] p 373 N94-11880
Giotto data analysis: Electron plasma and heavy ion composition measurements at Comet Halley
[NASA-CR-193587] p 428 N94-12770

PLASMA JETS
Macroscopic behaviour and discrete dynamo of RFP plasma in high theta discharge
[DE93-771408] p 392 N94-11239

PLASMA LAYERS
Simulations of D3-D divertor biasing with the LEDGE code
[DE93-010500] p 385 N94-10262
Physics and modelling of scrape-off layer transport
[DE93-010510] p 385 N94-10289
Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field
[DE93-613723] p 386 N94-10387
Physics of tokamak scrape-off layer confinement
[DE93-011949] p 390 N94-11125
Results from the D3-D advanced divertor program
[DE93-015472] p 393 N94-11514

PLASMA OSCILLATIONS
Spatial helicon-wave echo in an inhomogeneous magnetized plasma
[DE93-617845] p 389 N94-10885
Ion shaking in the 200 MeV XLS-ring
[DE93-014057] p 374 N94-12782

PLASMA PHYSICS
Two fluid plasmas in the vicinity of a Schwarzschild black hole
[DE93-610264] p 385 N94-10284
Texas experimental tokamak
[DE93-013377] p 386 N94-10321
A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507
Numerical method of singular problems on singular integrals
[DE93-613654] p 343 N94-10546
Distribution of charged particles near the plasma boundary in the presence of external electric field
[DE93-617862] p 389 N94-10886
To the complexity of dynamic system problem
[DE93-621355] p 134 N94-11037
VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066

PLASMA PINCH
High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA
[DE93-011892] p 393 N94-11677

PLASMA POTENTIALS
Electron runaway in RF discharges
[DE93-771407] p 363 N94-10661
NASCAP programmer's reference manual
[NASA-CR-191044] p 278 N94-11702

PLASMA PRESSURE
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field
[DE93-620983] p 391 N94-11174
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215

PLASMA PROPULSION
Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700

PLASMA RADIATION
Advanced concepts theory annual report 1992
[AD-A266132] p 393 N94-11474

PLASMA SHEATHS
Simulations of D3-D divertor biasing with the LEDGE code
[DE93-010500] p 385 N94-10262
Physics of tokamak scrape-off layer confinement
[DE93-011949] p 390 N94-11125
Gyrosheath near the tokamak edge
[DE93-012191] p 390 N94-11142

PLASMA SPECTRA
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840

PLASMA TURBULENCE
Transport mechanisms acting in toroidal devices: A theoretician's view
[DE93-013463] p 385 N94-10310
Texas experimental tokamak
[DE93-013377] p 386 N94-10321
Stationary spectra in a quasi neutral current-carrying plasma
[DE93-617849] p 387 N94-10539
Stationary spectra in a sheared plasma (linear limit)
[DE93-617850] p 387 N94-10540
VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066
Physics of tokamak scrape-off layer confinement
[DE93-011949] p 390 N94-11125
Discrete vortex representation of magnetohydrodynamics
[DE93-012190] p 393 N94-11669

PLASMA WAVES
Two fluid plasmas in the vicinity of a Schwarzschild black hole
[DE93-610264] p 385 N94-10284
General renormalized statistical approach with finite cross-field correlations
[DE93-617846] p 386 N94-10396
Stationary spectra in a magnetized current-carrying plasma
[DE93-617847] p 386 N94-10397
Stationary spectra in a finite-pressure current-carrying plasma
[DE93-617848] p 387 N94-10538
Spatial helicon-wave echo in an inhomogeneous magnetized plasma
[DE93-617845] p 389 N94-10885
The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity
[DE93-013102] p 389 N94-11114
Studies on the parametric decay of waves in fusion plasmas
[DE93-621659] p 390 N94-11148
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p))
[DE93-621654] p 391 N94-11210
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211
Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves
[DE93-621656] p 392 N94-11212
Studies of electrostatic waves and VLF-wave particle interaction in the ionosphere
[AD-A266013] p 278 N94-12392

PLASMA-ELECTROMAGNETIC INTERACTION
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Distribution of charged particles near the plasma boundary in the presence of external electric field
[DE93-617862] p 389 N94-10886
Studies on the parametric decay of waves in fusion plasmas
[DE93-621659] p 390 N94-11148

PLASMA-PARTICLE INTERACTIONS
Momentum and heat frictions between fast ions and thermal plasma species
[DE93-771240] p 390 N94-11149

PLASMAS (PHYSICS)
MHD simulation of deuterium-fiber-initiated Z-pinches with two-fluid effects
[DE93-012682] p 384 N94-10158
Simulations of D3-D divertor biasing with the LEDGE code
[DE93-010500] p 385 N94-10262
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286
An investigation of conducted and radiated emissions from a hollow-cathode plasma contactor
[NASA-CR-191172] p 386 N94-10346
Stationary spectra in a magnetized current-carrying plasma
[DE93-617847] p 386 N94-10397
Stationary spectra in a plasma with a shear (renormalized statistical approach with non-zero eigenfrequencies)
[DE93-617851] p 386 N94-10523
Stationary spectra in a finite-pressure current-carrying plasma
[DE93-617848] p 387 N94-10538
Stationary spectra in a quasi neutral current-carrying plasma
[DE93-617849] p 387 N94-10539
Stationary spectra in a sheared plasma (linear limit)
[DE93-617850] p 387 N94-10540
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662
The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Magnetohydrodynamic computation of feedback stabilization of resistive-shell instabilities in the reversed field pinch
[DE93-013466] p 388 N94-10852

Wave generation by contaminant ions [NASA-CR-193558] p 364 N94-10946

Calculation of Mercier stability criterium in stellarators [DE93-621599] p 389 N94-11091

Possibilities of magnetic diagnostics in stellarators [DE93-621608] p 389 N94-11092

The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity [DE93-013102] p 389 N94-11114

Radiative properties of strongly magnetized plasmas [DE93-014098] p 389 N94-11118

Particle transport analysis in torsatron configurations [DE93-621640] p 390 N94-11120

Simulation study of dynamo structure in reversed field pinch [DE93-771406] p 390 N94-11128

Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves [DE93-621656] p 392 N94-11212

Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh) [DE93-621658] p 392 N94-11213

Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron [DE93-621666] p 392 N94-11214

Discrete vortex representation of magnetohydrodynamics [DE93-012190] p 393 N94-11669

An investigation of the near Earth space environments [AD-A265295] p 278 N94-11828

PLASMONS

The surface plasmon spectroscopy as diagnostic technique in microgravity experiments p 110 N94-10133

PLASTIC DEFORMATION

A simple model of melt fracture [AD-A265311] p 92 N94-11862

PLASTIC FLOW

A simple model of melt fracture [AD-A265311] p 92 N94-11862

PLASTIC PROPERTIES

Design evaluation of GLARE laminate lay-ups p 63 N94-10051

PLATE THEORY

Boundary element method for eigenvalue problems of thin plates [ITN-93-85199] p 343 N94-10392

PLATES (STRUCTURAL MEMBERS)

Development tests for a high stability optical bench p 62 N94-10047

PLATES (TECTONICS)

A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585

Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042

Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130

Morphotectonics of Venus p 478 N94-12248

PLATING

Plating under reduced pressure [DE93-011896] p 84 N94-11668

PLATINUM

Site dependence of the apparent shape of a molecule in STM images: Benzene on Pt(111) [AD-A263488] p 365 N94-11093

A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces [DE93-012767] p 77 N94-11370

Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals [AD-A263566] p 401 N94-11518

Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions p 282 N94-12149

The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes [AD-A265623] p 404 N94-12376

PLAYAS

Mapping a dynamic playa surface using multitemporal ERS-1 SAR data: First results p 246 N94-12474

PLUG NOZZLES

Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber [NASA-TP-3380] p 55 N94-12569

PLUMES

User's manual for the plume visibility model PLUVUE 2 (revised) [PB93-188233] p 265 N94-11016

Ultraviolet plume instrument description and plume data reduction methodology [AD-A266141] p 54 N94-11643

Tectonics on Triton p 466 N94-12187

The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774

The 1991 version of the plume impingement computer program. Volume 1: Description [NASA-CR-194192] p 166 N94-12775

PLUNGERS

Check valve with poppet dashpot/frictional damping mechanism [NASA-CASE-MSC-21950-1] p 179 N94-10658

PNEUMATICS

Lift enhancement of a wing/strake using pneumatic blowing [AD-A265074] p 26 N94-11872

POINCARE PROBLEM

Chaos, entropy, and reversibility: A simple example p 31 N94-11495

POINT DEFECTS

Electronic characterization of defects in narrow gap semiconductors [NASA-CR-193568] p 397 N94-10819

The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation [DE93-617201] p 397 N94-10843

A method of influence regions in the theory of vacancy swelling of metals [DE93-620579] p 83 N94-11363

POINT IMPACT

Detection of dust impacts by the Voyager planetary radio astronomy experiment [NASA-CR-193281] p 423 N94-11305

POINT SOURCES

The searchlight problem for neutrons in a semi-infinite medium [DE93-010796] p 365 N94-10952

About excitation of round waveguide by a point current source [DE93-621352] p 133 N94-11034

POISSON EQUATION

Looking for O(N) Navier-Stokes solutions on non-structured meshes [NASA-CR-191472] p 345 N94-11277

POLAR CAPS

Spatial variation in the seasonal south polar cap of Mars as observed by Mariner 7 p 456 N94-12134

A new data collection system for ionospheric modelling and related topics [AD-A265893] p 278 N94-12277

POLAR METEOROLOGY

Studies of dynamical processes affecting the distribution of stratospheric ozone [NASA-CR-193477] p 279 N94-12560

POLAR ORBITS

Exploration planning in the context of human exploration and development of the Moon p 474 N94-12229

POLAR REGIONS

Sea ice: A climate component p 232 N94-11705

Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738

Geomorphology of Triton's polar materials p 466 N94-12185

A first assessment of the value of ERS-1 scatterometer winds for meteorological studies in the polar regions p 250 N94-12501

Polar mesospheric waves and structure [AD-A265360] p 279 N94-12561

POLARIMETERS

The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter [DE93-620984] p 364 N94-10875

Localized and distributed fiber-optic strain sensors embedded in composite materials [UTIAS-346] p 73 N94-12013

Seeing the Black Forest by ERS-1 and AIRSAR: A comparison p 249 N94-12495

POLARIMETRY

Enhancement effects in polarimetric radar returns: Phase difference statistics [NASA-CR-193408] p 231 N94-11309

POLARITONS

On the theory of phonoriton in cubic semiconductors with a degenerate valence band [DE93-613539] p 402 N94-11660

POLARITY

Polarity reversals and tilt of the Earth's magnetic dipole p 283 N94-12219

POLARIZATION (CHARGE SEPARATION)

Gyrosheath near the tokamak edge [DE93-012191] p 390 N94-11142

Macroscopic electric charge separation during hypervelocity impacts: Potential implications for planetary paleomagnetism p 431 N94-12181

Polaronic charge separation in mixed-halide MX solids [AD-A266073] p 403 N94-12345

POLARIZATION (WAVES)

Method and apparatus for polarization-maintaining fiber optical amplification with orthogonal polarization output [AD-D015756] p 374 N94-10372

Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam p 177 N94-12722

Non-image visible polarization remote sensing of the ocean p 229 N94-12762

POLARIZATION CHARACTERISTICS

Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam p 177 N94-12722

POLARIZED LIGHT

New tests of the equivalence principle using non-metric couplings of electromagnetism and gravitation p 413 N94-11821

Non-image visible polarization remote sensing of the ocean p 229 N94-12762

POLARIZED RADIATION

Atomic processes relevant to polarization plasma spectroscopy [DE93-753240] p 393 N94-11594

POLARONS

Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids [AD-A264689] p 399 N94-11263

Polaronic charge separation in mixed-halide MX solids [AD-A266073] p 403 N94-12345

POLICIES

National Aero-Space Plane: A need for program direction and funding decisions [GAO/NSIAD-93-207] p 416 N94-10910

NASA procurement: Proposed changes to the Jet Propulsion Laboratory contract. Report to Congressional Requesters [GAO/NSIAD-93-178] p 416 N94-10941

The Department of Clinical Investigation, reports control symbol MED-300(R-1) [AD-A264969] p 304 N94-11649

POLISHING

Zerodur polishing process for high surface quality and high efficiency [DE93-012596] p 87 N94-10271

POLLUTION CONTROL

Environmental Protection Agency's life cycle methodology: Guidelines for use in development of packaging [PB93-194199] p 265 N94-10841

Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846

Immediate response to free product discovery [PB93-182970] p 265 N94-11015

Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C [PB93-190304] p 265 N94-11018

Control of jet noise [NASA-CR-193612] p 358 N94-11176

Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor [NASA-TM-105888] p 28 N94-11234

Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472

POLLUTION MONITORING

International Space Year in China p 36 N94-10680

Remote surface water monitoring radio based telemetry system [DE93-009643] p 41 N94-11282

Methodologies for estimating air emissions from three non-traditional source categories: Oil spills, petroleum vessel loading and unloading, and cooling towers [PB93-181592] p 266 N94-11471

Satellite observations of red tide events: Plans for EESI p 191 N94-11899

An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900

A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983

Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution p 214 N94-12677

Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring [DE93-014093] p 272 N94-12783

POLLUTION TRANSPORT

A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983

POLONIUM ISOTOPES

Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres [DE93-012236] p 266 N94-11671

POLYACRYLONITRILE

A new FR water resistant acoustic insulation material for aircraft p 18 N94-10773

Preparation of carbon monoliths having tailored pore structure from porous polymer precursors
[DE93-011576] p 89 N94-10958

POLYBUTADIENE

Investigation of the reason for the softening behaviour of filled polymers p 63 N94-10058

Interfacial modification through end group complexation in polymer blends
[AD-A265887] p 93 N94-12340

POLYCARBONATES

A non-halogenated, flame retarded polycarbonate p 19 N94-10781

POLYCRYSTALS

Flexible polycrystalline thin-film photovoltaics for space applications p 50 N94-11393

Grain boundary creep in copper
[DE93-610974] p 84 N94-12361

POLYETHYLENES

Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends
[DE93-013140] p 89 N94-11007

Development of plastic capsule for research reactor irradiation
[DE93-753186] p 372 N94-11591

POLYGONS

Finding a covering triangulation whose maximum angle is provably small
[DE93-010691] p 334 N94-12593

POLYHEDRONS

Applications of cut polyhedra
[CWI-BS-R9221] p 347 N94-10354

Model-based recognition of 3-D objects by geometric hashing technique
[DE93-612916] p 322 N94-10410

POLYIMIDES

Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769

A polyimide foam for advanced fire resistant aircraft applications p 17 N94-10770

Semiconductor ring lasers
[DE93-012386] p 174 N94-11005

A novel photosensitive polyimide resist consisting of a soluble polyimide and a bis(perfluorophenyl azide) as a cross-linker
[AD-A265998] p 93 N94-12353

Protective coatings for high-temperature polymer matrix composites
[NASA-TM-106276] p 74 N94-12431

POLYMER BLENDS

Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends
[DE93-013140] p 89 N94-11007

Interfacial modification through end group complexation in polymer blends
[AD-A265887] p 93 N94-12340

POLYMER CHEMISTRY

New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513

Ring-opening polymerization of phosphazenes
[AD-A265000] p 90 N94-11292

Polymer-polymer interactions
[AD-A265304] p 91 N94-11830

Molecular properties of polymeric materials for space applications
[NASA-CR-194370] p 94 N94-12450

Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid)
[AD-A265288] p 95 N94-12585

POLYMER MATRIX COMPOSITES

Vectra insulative support structures within spacecraft p 62 N94-10050

The Netherlands innovation oriented research programme on polymer composites and special polymers 1985-1993 p 65 N94-10067

Fibre reinforced polymer matrix composites: Microstructure and mechanical properties
[DLR-FB-92-28] p 66 N94-11085

Protective coatings for high-temperature polymer matrix composites
[NASA-TM-106276] p 74 N94-12431

POLYMER PHYSICS

A simple model of melt fracture
[AD-A265311] p 92 N94-11862

POLYMERIC FILMS

Sensing glass transitions in thin polymer films on acoustic wave microsensors
[DE93-010805] p 87 N94-10295

The fire properties of insulation bags, as installed and after aircraft operations p 19 N94-10778

Glucose electrodes based on cross-linked (Os(bpy)2Cl)(sup +/2+) complexed poly(1-vinylimidazole) films
[AD-A265404] p 94 N94-12425

Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577

Performance aspects of de Laval spray-forming nozzles
[DE93-013671] p 163 N94-12604

POLYMERIZATION

Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092

Photoinitiated radical polymerization of liquid monomers in microgravity p 124 N94-10246

Fire-resistant hydrolytically stable poly(arylene phosphine oxide) material systems p 19 N94-10780

Polymeric nitrogen
[DE93-012600] p 89 N94-11151

Ring-opening polymerization of phosphazenes
[AD-A265000] p 90 N94-11292

Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A264914] p 92 N94-11848

Synthesis and polymerization of oligomeric multiple aromatic ether-containing phthalonitriles
[AD-D015729] p 94 N94-12399

NMR characterization of polymers formed in diazotizing mixtures of luminol and 3-amino-L-tyrosine
[AD-A266093] p 94 N94-12536

POLYMERS

The Netherlands innovation oriented research programme on polymer composites and special polymers 1985-1993 p 65 N94-10067

Physical properties of injection molded liquid crystal polymers and high temperature engineering polymers
[AD-A264912] p 87 N94-10508

Preparation of carbon monoliths having tailored pore structure from porous polymer precursors
[DE93-011576] p 89 N94-10958

Polymeric nitrogen
[DE93-012600] p 89 N94-11151

A new decomposition strategy for parallel bonded molecular dynamics
[DE93-009839] p 366 N94-11284

Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350

Fracture behavior of ionomers and ionomeric blends
[AD-A265379] p 94 N94-12407

NMR characterization of polymers formed in diazotizing mixtures of luminol and 3-amino-L-tyrosine
[AD-A266093] p 94 N94-12536

Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid)
[AD-A265288] p 95 N94-12585

POLYMETHYL METHACRYLATE

A relaxation study of poled nonlinear optical polymers by infrared reflection-absorption spectroscopy
[AD-A265797] p 93 N94-12380

POLYMORPHISM

Hydrogen-bond polymorphs of guanidinium 4-biphenylsulfonate
[AD-A265294] p 402 N94-11827

POLYNOMIALS

A reliable stability test for exponential polynomials
[MEMO-COSOR-92-48] p 341 N94-10168

An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions p 349 N94-10573

On convexity and Schoenberg's variation diminishing splines
[DE93-619673] p 346 N94-11632

POLYPROPYLENE

New technology for effective control of flammability in polyolefin fiber/textiles p 18 N94-10774

POLYSACCHARIDES

Improving reservoir conformance using gelled polymer systems
[DE93-014532] p 88 N94-10749

POLYSTYRENE

Polymer-polymer interactions
[AD-A265304] p 91 N94-11830

Polymers for microelectronics
[AD-A266036] p 94 N94-12396

POLYSULFIDES

Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

POLYTOPES

Applications of cut polyhedra
[CWI-BS-R9221] p 347 N94-10354

A simplicial approach to integer programming
[REPT-93-06] p 322 N94-10355

POMERONS

Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551

Model for the pomeron
[DE93-617693] p 362 N94-10552

Logarithmically rising cross section and the ratio sigma(sub el)/sigma(sub t)
[DE93-617694] p 362 N94-10553

Detecting the odderon
[DE93-617695] p 362 N94-10554

Fine structure of the Pomeron and the real part of the elastic scattering amplitude
[DE93-617696] p 362 N94-10555

PONDS

Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701

POPULATIONS

Automatic classification system for zooplankton p 203 N94-11969

POROSITY

Improving reservoir conformance using gelled polymer systems
[DE93-014532] p 88 N94-10749

Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters
[DE93-011952] p 150 N94-11026

Plating under reduced pressure
[DE93-011896] p 84 N94-11668

Porosity and the ecology of icy satellites p 431 N94-12186

POROUS MATERIALS

Preparation of carbon monoliths having tailored pore structure from porous polymer precursors
[DE93-011576] p 89 N94-10958

PORTABLE EQUIPMENT

A portable controller for unmanned ground vehicles
[AD-A264963] p 181 N94-11290

DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere p 226 N94-12749

POSEIDON SATELLITE

Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699

POSITION (LOCATION)

Visual encoding of spatial relations
[AD-A266049] p 313 N94-10909

Analysis of IRAS solar system dust data
[NASA-CR-193704] p 483 N94-10949

Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

The Magellan volcanic and magmatic feature catalog p 467 N94-12193

POSITION ERRORS

Force reflection with compliance control
[NASA-CASE-NPO-18668-1-CU] p 179 N94-10654

Thermal error compensation feasibility study using artificial intelligence
[AD-A266084] p 340 N94-12411

POSITIONING

Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131

Thermal error compensation feasibility study using artificial intelligence
[AD-A266084] p 340 N94-12411

POSITRON ANNIHILATION

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data
[DE93-613828] p 395 N94-10537

POSITRONS

Acceleration of positrons in supernova shocks
[NASA-CR-193713] p 425 N94-10511

POSTFLIGHT ANALYSIS

Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-57
[NASA-TM-107562] p 40 N94-10805

Promethazine and its use as a treatment for space motion sickness p 312 N94-11550

POSTLAUNCH REPORTS

Flight data analysis of Japanese Earth Resources Satellite-1 (JERS-1)
[NASDA-CNT-930004] p 245 N94-12279

POSTMISSION ANALYSIS (SPACECRAFT)

Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-57
[NASA-TM-107562] p 40 N94-10805

POTASSIUM ISOTOPES

Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407

POTENTIAL ENERGY
Non-empirical interatomic potentials for transition metals
[DE93-013705] p 365 N94-11011
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
The global potential energy surfaces of the lowest two 1A' states of the ozone molecule: Theoretical determination and analysis p 267 N94-12269

POTENTIAL FLOW
Solving the inverse problem for incompressible potential flow through two-dimensional cascades
[NAL-TR-1162] p 147 N94-10365

POWDER (PARTICLES)
Development of commercially viable high-T(sub c) Bi-2223 superconductor tapes
[DE93-009966] p 142 N94-10951
Production of reactive sintered nickel aluminide
[DE93-014434] p 83 N94-11127
Processing, properties, and wear resistance of aluminides
[DE93-012186] p 83 N94-11141
Effect of powder processing on slip casting parameters and sintering of Si3N4-Y2O3-SiO2
[AD-A264474] p 83 N94-11445
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites
p 430 N94-12163
Dynamic high-pressure shock compaction of diamond powders
[AD-A266004] p 93 N94-12354

POWDER METALLURGY
Bibliography on Hot Isostatic Pressing (HIP) technology
[AD-A265668] p 81 N94-10297
Application of powder metallurgy techniques to produce improved bearing elements for liquid rocket engines
[NASA-CR-193731] p 82 N94-10804
A history of tungsten- and molybdenum-base alloys
[DE93-010283] p 82 N94-11108
Production of reactive sintered nickel aluminide
[DE93-014434] p 83 N94-11127
Effect of powder processing on slip casting parameters and sintering of Si3N4-Y2O3-SiO2
[AD-A264474] p 83 N94-11445
The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy
[DE93-013221] p 84 N94-11488

POWDERED ALUMINUM
PM technology and mechanical properties of metallic foams p 64 N94-10059

POWER AMPLIFIERS
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773

POWER CONDITIONING
Experimental and theoretical investigations of Cs-Ba vapor tacitron inverter for power conditioning in space power systems
[DE93-012971] p 48 N94-11372

POWER EFFICIENCY
InGaAs concentrator cells for laser power converters and tandem cells p 50 N94-11394
A high specific power solar array for low to mid-power spacecraft p 51 N94-11399

POWER GAIN
Design of a matching network for dipole antennas
[AD-A265115] p 136 N94-11158

POWER LINES
Potential techniques for non-destructive evaluation of cable materials
[DE93-008350] p 183 N94-11586

POWER SERIES
Deviations from the straight line: Bumps (and grinds) in the collisionally evolved size distribution of asteroids
p 431 N94-12201

POWER SPECTRA
Polar mesospheric waves and structure
[AD-A265380] p 279 N94-12561

POWER SUPPLY CIRCUITS
A soft-start circuit for arcjet ignition
[NASA-TM-106287] p 180 N94-10760

PRANDTL NUMBER
Instability of thermocapillary convection in floating zones p 101 N94-10076
High Prandtl number fluids in a multilayered system under 1-g or micro-g environment p 104 N94-10096

PRE-MAIN SEQUENCE STARS
Detection of accreting circumstellar gas around weak emission-line Herbig Ae/Be stars
[NASA-TM-108256] p 424 N94-11306

PRECESSION
Precession of Uranus and Neptune and their magnetic field p 473 N94-12222

PRECIPITATION (METEOROLOGY)
Design of a global soil moisture initialization procedure for the simple biosphere model
[NASA-TM-104590] p 284 N94-10940
The impact of horizontal resolution on moist processes in the ECMWF model
[DE93-011718] p 276 N94-11227
Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment
[NASA-CR-193829] p 285 N94-11598
Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685
Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919
Measurements of ocean cross-section with a side-looking airborne radar p 201 N94-11954
A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665

PRECIPITATION HARDENING
On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys
[DE93-617200] p 82 N94-10842
Corrosion behavior of metal matrix composites
[AD-A265352] p 85 N94-12404

PREDICTION ANALYSIS TECHNIQUES
Parametric analysis of atmospheric processes
[NASA-CR-192523] p 347 N94-10757
Failure prediction of thin beryllium sheets used in spacecraft structures
[NASA-CR-194164] p 187 N94-11190
A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors
[NASA-TM-106279] p 29 N94-11255
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades
[NASA-TM-106278] p 151 N94-11256
Computational mechanics needs study
[NASA-CR-193712] p 327 N94-11279
Chaotic time series analysis p 31 N94-11490
Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498
Further studies using matched filter theory and stochastic simulation for gust loads prediction
[NASA-TM-109010] p 26 N94-11587
Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

PREFORMS
Design and manufacturing of CFRP rings by RTM
p 59 N94-10025

PRELAUNCH TESTS
A facility for testing 10- to 100-kWe space power reactors
[DE92-040420] p 372 N94-11296

PREMIXED FLAMES
Influence of gravity and ambient pressure variations on the behavior of buoyant laminar diffusion flames
p 123 N94-10240
The evolution equation for the flame surface density in turbulent premixed combustion p 81 N94-12316
Generation of two-dimensional vortices in a cross-flow
p 160 N94-12318
Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319

PREMIXING
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234

PREPOLYMERS
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

PREPREGS
Hybrid materials for use at elevated temperatures
p 57 N94-10013
Advanced phenolic systems for aircraft interiors
p 18 N94-10776
Fire resistance and mechanical properties for phenolic prepregs p 20 N94-10786

PREPROCESSING
The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496
The 1991 version of the plume impingement computer program. Volume 1: Description
[NASA-CR-194192] p 166 N94-12775

PRESIDENTIAL REPORTS
From red tape to results: Creating a government that works better and costs less p 422 N94-11351
From red tape to results: Creating a government that works better and costs less. Executive summary
p 422 N94-11353

PRESSING (FORMING)
Cost effectiveness of structural applications of fibre reinforced thermoplastics p 60 N94-10032

PRESSURE BREATHING
Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

PRESSURE DEPENDENCE
The effect of pressure and quadrupolar interactions on the nematic-isotropic transition properties: Numerical results for a system of prolate ellipsoids including second and fourth rank orientational order parameters
[DE93-613540] p 410 N94-10536
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O
[DE93-013590] p 76 N94-11244

PRESSURE DISTRIBUTION
Schlieren photographs and internal pressure distributions for three-dimensional sidewall-compression scramjet inlets at a Mach number of 6 in CF4
[NASA-TM-4479] p 148 N94-10644

PRESSURE EFFECTS
Influence of gravity and ambient pressure variations on the behavior of buoyant laminar diffusion flames
p 123 N94-10240
The effect of pressure and quadrupolar interactions on the nematic-isotropic transition properties: Numerical results for a system of prolate ellipsoids including second and fourth rank orientational order parameters
[DE93-613540] p 410 N94-10536
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O
[DE93-013590] p 76 N94-11244
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028
Shock transformations in quartzite p 97 N94-12040
The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs
p 445 N94-12071
Methanol pan fires in an enclosed space: Effect of pressure and oxygen concentration
[AD-A266108] p 79 N94-12415

PRESSURE GAGES
Analysis of Hopkinson bar pressure gage
[AD-A262366] p 171 N94-12362

PRESSURE GRADIENTS
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673
A Galilean and tensorial invariant k-epsilon model for near wall turbulence
[NASA-TM-106263] p 151 N94-11192
The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars
p 463 N94-12169
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300
Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649

PRESSURE MEASUREMENT
Microgravity combustion of dust suspension in a spherical chamber p 80 N94-10248
An experimental investigation of high-speed water-entry for full-size and scale-model pointed nose vehicles
[DE93-008491] p 147 N94-10252
Pressure and force measurements on models set in hypersonic flows: A review p 5 N94-10435
Flow development in a circular pipe in the UTIAS/RPI M = 8.3 gun tunnel p 6 N94-10442
Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction
p 6 N94-10443
Some experimental study and numerical simulation in wind tunnel flow p 8 N94-10457
Wall interference correction based on interface measurements in subsonic wind tunnel testing
p 15 N94-11154
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252
Overview of the 1989 Wind Tunnel Calibration Workshop
[NASA-TP-3393] p 34 N94-11869
Analysis of Hopkinson bar pressure gage
[AD-A262366] p 171 N94-12362

PRESSURE OSCILLATIONS
Establishing baseline data for an experimental appratus that measures heat transfer under conditions of oscillating pressure and flow
[NASA-CR-193772] p 413 N94-12343

PRESSURE REDUCTION

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543

Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546

Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547

PRESSURE REGULATORS

Dual valve plate two-way pressure relief valve [AD-D015766] p 178 N94-10379

A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors [NASA-TM-106279] p 29 N94-11255

PRESSURE SENSORS

Combustion-induced crack propagation process in a solid-propellant crack cavity p 98 N94-10901

A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies [NASA-TM-106281] p 47 N94-11252

PRESSURE SUITS

Motion and spatial disorientation systems: Special research capabilities [AD-A265155] p 303 N94-11097

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

PRESSURE VESSEL DESIGN

A new and efficient way to join composite pipes p 63 N94-10054

PRESSURE VESSELS

Design with high strength steel: A case of failure and its implications p 58 N94-10017

Spin-rolling, welding, and heat treatment of aluminium 2219 for Ariane 5 GAM high pressure vessel liners p 62 N94-10045

Heavy-section steel technology program [DE93-009222] p 184 N94-10155

Potential change in flaw geometry during pressurized-thermal-shock transients [DE93-009709] p 184 N94-10288

PRESSURIZED WATER REACTORS

Potential change in flaw geometry during pressurized-thermal-shock transients [DE93-009709] p 184 N94-10288

PRETREATMENT

Microbiological test results using three urine pretreatment regimes with 316L stainless steel [NASA-CR-192568] p 299 N94-10360

PRINCIPAL COMPONENTS ANALYSIS

A consideration on principal component analysis of satellite IR data p 193 N94-11909

Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030

PRINTED CIRCUITS

Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system [DE93-011879] p 143 N94-11273

PROBABILITY DENSITY FUNCTIONS

Probabilistic evaluation of uncertainties and risks in aerospace components [NASA-TM-105603] p 185 N94-10361

Probability density distribution of velocity differences at high Reynolds numbers p 158 N94-12304

PDF approach for turbulent scalar field: Some recent developments p 160 N94-12315

PROBABILITY DISTRIBUTION FUNCTIONS

Bayesian reliability analysis with imprecise prior probabilities [MEMO-COSOR-92-50] p 183 N94-10170

Probabilistic evaluation of uncertainties and risks in aerospace components [NASA-TM-105603] p 185 N94-10361

Imprecise highest density regions related to intervals of measures [MEMO-COSOR-92-54] p 347 N94-10876

PROBABILITY THEORY

Applications of cut polyhedra [CWI-BS-R9221] p 347 N94-10354

Singularity spectrum of self-organized criticality [DE93-613820] p 348 N94-10404

Positive phase space distributions and uncertainty relations p 379 N94-10598

Wavelets and spacetime squeeze p 379 N94-10604

Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607

Probability of particle trapping/detrapping in torsatrons [DE93-621641] p 390 N94-11121

Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids [AD-A264957] p 301 N94-11648

Applications of multivariate analysis [AD-A265250] p 347 N94-11882

Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157

PROBLEM SOLVING

A real-time spoken-language system for interactive problem solving [AD-A266046] p 324 N94-11104

Criteria for assessing problem solving and decision making in complex environments p 314 N94-11532

Design, development, and testing of an automated knowledge-acquisition tool to aid problem solving, decision making, and planning [DE93-010239] p 417 N94-11661

Problem specific environments for parallel systems [AD-A266129] p 337 N94-12540

PROCEDURES

Insights into software development in Japan p 330 N94-11435

PROCESS HEAT

Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity [DE93-010010] p 262 N94-10258

PRODUCT DEVELOPMENT

Solving the essentials of an innovative tennis racket product: Functionality, simplicity, and super-lightweight technology p 65 N94-10068

Future material development trends for commercial airplane interiors p 21 N94-10792

PRODUCTION COSTS

Space transportation alternatives for large space programs: The International Space University Summer Session, 1992 [NASA-TM-106271] p 40 N94-10811

Space Solar Power Program [DE93-011750] p 55 N94-11675

Analysis of the economics of DC arc CVD diamond [AD-A265688] p 403 N94-12339

PRODUCTION ENGINEERING

Object recognition in industrial environment by means of tactile sensor [ITN-93-85200] p 178 N94-10393

PRODUCTIVITY

Measuring human performance on NASA's microgravity aircraft p 317 N94-11537

High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

PROGRAM VERIFICATION (COMPUTERS)

A formally verified algorithm for interactive consistency under a hybrid fault model [NASA-CR-4527] p 326 N94-11188

Development and application of an acceptance testing model p 330 N94-11432

A recent Cleanroom success story: The Redwing project p 39 N94-11433

The 1991 version of the plume impingement computer program. Volume 1: Description [NASA-CR-194192] p 166 N94-12775

PROGRAMMABLE LOGIC DEVICES

Programmable logic devices [DE93-013117] p 144 N94-11479

PROGRAMMERS

Insights into software development in Japan p 330 N94-11435

Analysis and guidelines for reusable Ada software [AD-A264918] p 332 N94-11850

PROGRAMMING ENVIRONMENTS

Reuse: A knowledge-based approach p 329 N94-11430

A recent Cleanroom success story: The Redwing project p 39 N94-11433

Problem specific environments for parallel systems [AD-A266129] p 337 N94-12540

PROGRAMMING LANGUAGES

Bundle event structures: A non-interleaving semantics for LOTOS [MEMO-INF-92-73] p 320 N94-10164

An object-oriented model for extensible concurrent systems: The composition-filters approach [MEMO-INF-92-87] p 320 N94-10166

Techniques, processes, and measures for software safety and reliability [DE93-012379] p 322 N94-10347

Flexible language constructs for large parallel programs [NASA-CR-191478] p 326 N94-11196

The instrumentation of the multimodel and multilingual user interface [AD-A265444] p 333 N94-12332

PROJECT MANAGEMENT

Analysis of the cost evaluation of ESA programmes and comparable national and international programmes [GTS-92063] p 416 N94-10145

The 40 kWe S-PRIME Thermionic Design and Technology Demonstration Program [DE93-004738] p 40 N94-10147

Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846

Engineering performance metrics [DE93-012084] p 128 N94-11028

Development and application of an acceptance testing model p 330 N94-11432

STGT program: Ada coding and architecture lessons learned p 330 N94-11437

Software management guide [DE93-012034] p 330 N94-11452

Research and development of post-classical management tools for government program offices, volume 2 [DE93-010236] p 417 N94-11600

Quality assurance in basic research and R/D [DE93-010825] p 183 N94-11647

The Department of Clinical Investigation, reports control symbol MED-300(R-1) [AD-A264969] p 304 N94-11649

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

PROJECT PLANNING

Canada's longterm space plan and ISY activities p 37 N94-10692

National Aero-Space Plane: A need for program direction and funding decisions [GAO/NSIAD-93-207] p 416 N94-10910

Lunar-Ultraviolet Telescope Experiment (LUTE) integrated program plan [NASA-CR-193267] p 424 N94-11356

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

Devices related for thermal control systems used in microgravity p 162 N94-12553

Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556

METEOSAT second generation programme SEVIRI: An enhanced visible and IR radiometer for meteorology p 212 N94-12667

PROJECT SETI

Preparing for the initial observations of the Targeted Search and the Sky Survey systems [NASA-CR-193644] p 318 N94-10865

PROJECTILE CRATERING

A two-stage (turbulent-drainage) mechanism for the emplacement of impact crater outflows on Venus p 458 N94-12145

Projectile-target mixing in melted ejecta formed during a hypervelocity impact cratering event p 432 N94-12241

PROLATENESS

The effect of pressure and quadrupolar interactions on the nematic-isotropic transition properties: Numerical results for a system of prolate ellipsoids including second and fourth rank orientational order parameters [DE93-613540] p 410 N94-10536

PROMETHAZINE

Promethazine and its use as a treatment for space motion sickness p 312 N94-11550

Update on the incidence and treatment of space motion sickness p 312 N94-11551

PROP-FAN TECHNOLOGY

AGBT advanced counter-rotating gearbox detailed design report [NASA-CR-180883] p 179 N94-10400

Laser velocimeter measurements of the flow field generated by a forward-swept propfan during flutter [NASA-TM-106195] p 14 N94-10892

PROPANE

Vehicular fleet operation on natural gas and propane: An overview [PB93-194603] p 98 N94-10844

PROPELLANT GRAINS

Combustion-induced crack propagation process in a solid-propellant crack cavity p 98 N94-10901

PROPELLANT TANKS

Spinforming characteristics of a net shape forming process p 56 N94-10004

PROPELLANT TESTS

On the combustion of a laminar spray [NASA-TM-106210] p 28 N94-11238

PROPELLANT TRANSFER

Propellant management in surface tension tanks p 106 N94-10110

On-orbit refueling p 38 N94-11566

PROPELLER NOISE

An experimental investigation of the sources of propeller noise due to turbulence ingestion p 358 N94-11057

PROPELLER SLIPSTREAMS

An experimental investigation of the sources of propeller noise due to turbulence ingestion p 358 N94-11057

PROPHYLAXIS
Update on the incidence and treatment of space motion sickness p 312 N94-11551
PROPORTIONAL COUNTERS
Analysis and interpretation of high energy cosmic rays measured on Spacelab-2 [NASA-CR-193586] p 485 N94-12771
PROPULSION SYSTEM CONFIGURATIONS
Distributed simulation using a real-time shared memory network [NASA-TM-106239] p 319 N94-10724
PROPULSION SYSTEM PERFORMANCE
Space nuclear thermal propulsion nuclear element tests at Sandia National Laboratories [DE93-002301] p 45 N94-10282
Arcjet space thrusters [NASA-CR-193191] p 46 N94-10700
Characterization of in-flight performance of ion propulsion systems [NASA-TM-106283] p 46 N94-10761
Space Storable Rocket Technology program (SSRT). Option 1 program [NASA-CR-191171] p 46 N94-10938
A distributed version of the NASA Engine Performance Program [NASA-TM-106208] p 327 N94-11231
PROPYLENE
Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends [DE93-013140] p 89 N94-11007
PROTECTIVE CLOTHING
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 375) [NASA-SP-7011(375)] p 303 N94-10398
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 376) [NASA-SP-7011(376)] p 303 N94-10399
Aerospace medicine and biology: A continuing bibliography with indexes (supplement 374) [NASA-SP-7011(374)] p 304 N94-11689
PROTECTIVE COATINGS
Selectively strippable paint schemes p 128 N94-10629
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials [DE93-008717] p 88 N94-10891
Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218
Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use [ARL-TR-27] p 90 N94-11311
High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment [DE93-012430] p 72 N94-11368
Weld overlay coatings for erosion control [DE93-013592] p 84 N94-11816
Protective coatings for high-temperature polymer matrix composites [NASA-TM-106276] p 74 N94-12431
Corrosion and passivation of high temperature superconductors [AD-A265402] p 405 N94-12586
PROTEIN CRYSTAL GROWTH
Advanced protein, crystallization facility and associated new developments p 39 N94-10119
Effects of a microgravity environment on the crystallization of biological macromolecules p 117 N94-10198
PROTEINS
Electrohydrodynamic effects in continuous flow electrophoresis observations on Earth and in microgravity p 122 N94-10234
HRTEM in protein crystallography [DE93-610322] p 395 N94-10406
Amperometric biosensors based on 3-dimensional hydrogel-forming epoxy networks [AD-A265528] p 87 N94-10510
Aluminum and membrane channels [AD-A265241] p 300 N94-11020
A new decomposition strategy for parallel bonded molecular dynamics [DE93-009839] p 366 N94-11284
Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids [AD-A264957] p 301 N94-11648
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660
PROTOCOL (COMPUTERS)
An efficient medium access control strategy for high speed WDM multiaccess networks [MEMO-INF-92-74] p 131 N94-10165
Asynchronous Transfer Mode (ATM) technology: An overview [AD-A266087] p 383 N94-12413
PROTON BEAMS
Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron [DE93-754288] p 363 N94-10720
Experimental particle physics at the University of Pittsburgh [DE93-013326] p 369 N94-12546
PROTON IRRADIATION
Investigation of the radiation resistance of triple-junction a-Si:H alloy solar cells irradiated with 1.00 MeV protons p 50 N94-11391
Diffusion length damage coefficient and annealing studies in proton-irradiated InP [NASA-TM-106262] p 404 N94-12430
PROTON SCATTERING
Indication on the existence of the bound state in the p anti p-system [DE92-641575] p 361 N94-10532
PROTON-PROTON REACTIONS
Strangeness production with protons and pions [DE93-010879] p 359 N94-10304
PROTONS
Indication on the existence of the bound state in the p anti p-system [DE92-641575] p 361 N94-10532
Experiments to measure the gluon helicity distribution in protons [DE93-011756] p 368 N94-11613
Solid-state structures of guanidinium methane, ethane, and trifluoromethanesulfonate [AD-A265293] p 402 N94-11654
PROTOPLANETS
Columbus proto-planetesimal dust aggregation experiment p 123 N94-10236
Giant impact-induced atmospheric blow-off p 435 N94-12019
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation p 432 N94-12226
PROTOSTARS
Initiating solar system formation through stellar shock waves p 448 N94-12090
PROTOTYPES
Characterization of a scannerless LADAR system [DE93-011582] p 174 N94-10959
A prototype urine collection device for female aircrew p 317 N94-11549
PROVING
Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707
The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708
Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710
Validation test system for sea surface temperature detected by satellites in Mutsu Bay p 213 N94-12670
Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673
Further study of the Non-Regression-Coefficient SST retrieval method p 213 N94-12674
PSYCHOACOUSTICS
Signal feature analysis using neural networks and psychoacoustics [AD-A266048] p 340 N94-12398
PSYCHOLOGICAL TESTS
Basic attributes test (BAT): Operational pre-implementation analysis and score equating [AD-A265885] p 314 N94-12276
PSYCHOMOTOR PERFORMANCE
Landing Craft Air Cushion (LCAC) crew selection system manual [AD-A265158] p 313 N94-11098
Measuring human performance on NASA's microgravity aircraft p 317 N94-11537
PSYCHOPHYSICS
Visual encoding of spatial relations [AD-A266049] p 313 N94-10909
Visual psychophysics of egomotion [AD-A265253] p 304 N94-11681
PSYCHOPHYSIOLOGY
Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529
PUBLIC HEALTH
Technical Conference on Tropical Urban Climates: Extended Abstracts [WMO/TD-538] p 283 N94-10561
International Telemedicine/Disaster Medicine Conference: Papers and Presentations [NASA-NP-207] p 304 N94-11787
The Canadian experience: Using telemedicine for the support of medical care at remote sites p 305 N94-11789
Applications of the INTELSAT system to remote health care p 306 N94-11794
Clinical aspects of telemedicine p 306 N94-11795
Commercial applications of telemedicine p 306 N94-11798
Space technology in remote health care p 306 N94-11799
The National Disaster Medical System p 307 N94-11801
Satellite, environmental, and medical information applied to epidemiological monitoring p 307 N94-11802
A telemedicine health care delivery system p 307 N94-11803
Use of satellite telecommunications for telemedicine p 308 N94-11807
US-USSR telemedicine consultation spacebridge to Armenia and Ufa p 308 N94-11809
The revitalization of health and education in Rural America Act of 1992 p 308 N94-11810
PULMONARY FUNCTIONS
Project ARGO: Gas phase formation in simulated microgravity [NASA-TM-104762] p 125 N94-11235
Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994
PULSAR MAGNETOSPHERES
Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065
PULSARS
Pulsar astrometry by using VLBI (PSR0329 between Kashima 26mPhi and Usuda 64mPhi) p 351 N94-10968
An ensemble pulsar time p 351 N94-10969
PULSE COMMUNICATION
Study on color video pictures transmission by digital acoustic signal p 139 N94-11917
PULSE COMPRESSION
One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere [DE93-009517] p 137 N94-11466
FR/GE/US radar receiver pulse compression ratio [AD-A265391] p 138 N94-12409
PULSE DURATION
Response of silicon solar cell to pulsed laser illumination p 51 N94-11396
PULSE DURATION MODULATION
A study of DC-DC converters with MCTs for arcjet power supplies [NASA-CR-193457] p 142 N94-10931
PULSE GENERATORS
Characterization of the pulse transformer [AD-A263414] p 143 N94-11298
Advanced concepts theory annual report 1992 [AD-A266132] p 393 N94-11474
PULSED LASER DEPOSITION
In-situ crystallization of silicate glass films deposited on alpha- Al2O3 [DE93-012969] p 95 N94-12596
PULSED LASERS
Progress in zirconium resonance ionization spectroscopy [DE93-011881] p 76 N94-11075
Thermal-optical switching of a silicon based interference filter [AD-A265152] p 174 N94-11095
The efficiency of photovoltaic cells exposed to pulsed laser light p 50 N94-11395
Response of silicon solar cell to pulsed laser illumination p 51 N94-11396
Approaches to solar cell design for pulsed laser power receivers p 51 N94-11397
Short pulse lasers for generation of fields exceeding 100 MG [DE93-013346] p 369 N94-11815
Submicrosecond, synchronizable x ray source [AD-D015745] p 176 N94-12337
Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL [DE93-013430] p 95 N94-12602
PULSED RADIATION
Laser Synchrotron Source (LSS) [AD-D015755] p 173 N94-10371
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
PULSES
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
PURIFICATION
Electrohydrodynamic effects in continuous flow electrophoresis observations on Earth and in microgravity p 122 N94-10234
PURITY
Production of electronic grade lunar silicon by disproportionation of silicon difluoride p 435 N94-12017

PYRITES
The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246
PYROLYSIS
Fibre-reinforced ceramic components by filament winding for intermediate temperature applications
p 61 N94-10041
Applications of a model to predict flame spread over interior finish materials in a compartment
p 19 N94-10783
Preparation of carbon monoliths having tailored pore structure from porous polymer precursors
[DE93-011576] p 89 N94-10958
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
Separation of spallation and terrestrial C-14 in chondrites p 431 N94-12183

Q

Q FACTORS
Quality factors and local adaption (with applications in Eulerian hydrodynamics)
[DE93-010502] p 151 N94-11272
QUADRATURES
Numerical method of singular problems on singular integrals
[DE93-613654] p 343 N94-10546
Quantum noise and squeezing in optical parametric oscillator with arbitrary output coupling
p 375 N94-10568
One dimensional representations in quantum optics
p 375 N94-10570
Comparison of multiresolution techniques for digital signal processing
[AD-A265364] p 138 N94-12406
QUADRUPOLES
Fabrication and test of a superconducting RFQ
[DE93-010860] p 140 N94-10300
The effect of pressure and quadrupolar interactions on the nematic-isotropic transition properties: Numerical results for a system of prolate ellipsoids including second and fourth rank orientational order parameters
[DE93-613540] p 410 N94-10536
Performance characteristics of the INS 25.5-MHz split coaxial RFQ
[DE93-753168] p 144 N94-11508
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221
Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole
[DE93-014474] p 374 N94-12786
QUALITATIVE ANALYSIS
Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use
[ARL-TR-27] p 90 N94-11311
QUALITY
The experience factory: Can it make you a 5? or what is its relationship to other quality and improvement concepts? p 328 N94-11424
QUALITY CONTROL
Software process assessments p 329 N94-11427
Large array SQUID magnetometer for NDE
[AD-A264799] p 304 N94-11449
Quality assurance in basic research and R/D
[DE93-010825] p 183 N94-11647
An integrated approach to total end-to-end quality control of ocean data in the real-time environment
p 211 N94-12662
Quality assurance for environmental chemistry: 1991, volume 2
[DE93-011792] p 272 N94-12780
QUANTITATIVE ANALYSIS
Quantitative EEG patterns of differential in-flight workload p 317 N94-11528
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE93-014093] p 272 N94-12783
QUANTUM AMPLIFIERS
Photon number amplification/duplication through parametric conversion p 376 N94-10572
QUANTUM CHROMODYNAMICS
Some new/old approaches to QCD
[DE93-010451] p 408 N94-10261
Squeezed colour states in gluon jet
p 379 N94-10599
Spontaneous symmetry breaking in QCD
[DE93-753080] p 396 N94-10645
Experiments to measure the gluon helicity distribution in protons
[DE93-011756] p 368 N94-11613
Quenched chiral logarithms
[DE93-010195] p 346 N94-11663
Top quark search in D(O) from the lepton + jets mode
[DE93-014027] p 370 N94-12781
Quark and lepton masses
[DE93-012308] p 370 N94-12787
QUANTUM EFFICIENCY
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375
QUANTUM ELECTRODYNAMICS
The legacy of uncertainty p 376 N94-10577
Non-gauge phase transformations in quantum transition amplitudes p 378 N94-10596
Squeezed colour states in gluon jet
p 379 N94-10599
Non-stationary and non-linear dispersive medium as external field which generates the squeezed states
p 380 N94-10605
Quantized conic sections; quantum gravity
[DE93-010950] p 411 N94-10956
QUANTUM ELECTRONICS
The response of an electron in a biased double well to a strong laser: Delocalization and low frequency generation
[AD-A265169] p 366 N94-11100
High frequency behavior of long and small junctions
[AD-A265670] p 403 N94-12336
QUANTUM MECHANICS
Some new/old approaches to QCD
[DE93-010451] p 408 N94-10261
Wave function collapse: An unnecessary condition for the dynamical description of the Zeno and partial Zeno effect
[DE93-612970] p 132 N94-10401
A group-theoretic approach to the study of small oscillations of a dynamical system with a known symmetry
[DE93-612971] p 409 N94-10402
Standard model status (in search of new physics)
[DE93-013288] p 410 N94-10528
Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials
[DE93-617650] p 349 N94-10547
The Second International Workshop on Squeezed States and Uncertainty Relations
[NASA-CP-3219] p 375 N94-10564
One dimensional representations in quantum optics
p 375 N94-10570
Harmonic oscillator interaction with squeezed radiation
p 376 N94-10571
Non classical effects in planar waveguides
p 376 N94-10574
Phasing operator for two oscillators in classical field
p 370 N94-10579
On a Lagrange-Hamilton formalism describing position and momentum uncertainties p 349 N94-10583
Dissipation in a squeezed-state environment
p 370 N94-10584
Squeezed spin states: Squeezing the spin uncertainty relations p 377 N94-10585
Observables, measurements and phase operators from a Bohmian perspective p 378 N94-10589
Uncertainty relations, zero point energy and the linear canonical group p 378 N94-10590
Information entrophy via Glauber's Q-representation
p 378 N94-10592
Squeezed states of electrons and transitions of the density of states p 370 N94-10593
Quantum mechanical effects of topological origin
p 378 N94-10594
Collision-induced squeezing in a harmonic oscillator
p 379 N94-10597
Positive phase space distributions and uncertainty relations p 379 N94-10598
The uncertainty principle and quantum chaos
p 379 N94-10602
Relation of squeezed states between damped harmonic and simple harmonic oscillators p 380 N94-10606
Infinite-mode squeezed coherent states and non-equilibrium statistical mechanics (phase-space-picture approach)
[LBL-32695] p 380 N94-10608
Correlated states of a quantum oscillator acted by short pulses p 380 N94-10609
Floquet operator as integral of motion
p 380 N94-10610
Exact solutions of a many-anyon problem
[DE93-617646] p 411 N94-10832
Quantum dynamics of helium clusters
[AD-A266060] p 411 N94-10874
Superfield description of N = 2 extended one-dimensional supersymmetric quantum mechanics
[DE93-621420] p 412 N94-11087
Three-dimensional N = 4 extended supersymmetrical quantum mechanics
[DE93-621421] p 412 N94-11164
Absorption spectrum calculations using mixed quantum-gaussian wave packet dynamics
[AD-A265179] p 413 N94-11877
QUANTUM NUMBERS
Quantized conic sections; quantum gravity
[DE93-010950] p 411 N94-10956
QUANTUM OPTICS
The Second International Workshop on Squeezed States and Uncertainty Relations
[NASA-CP-3219] p 375 N94-10564
A phaseonium magnetometer: A new optical magnetometer based on index enhanced media
p 375 N94-10565
Smoothly deformed light p 375 N94-10566
Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567
Quantum noise and squeezing in optical parametric oscillator with arbitrary output coupling
p 375 N94-10568
Disturbance, the uncertainty principle and quantum optics p 375 N94-10569
One dimensional representations in quantum optics
p 375 N94-10570
Photon number amplification/duplication through parametric conversion p 376 N94-10572
Non classical effects in planar waveguides
p 376 N94-10574
Completeness properties of the minimum uncertainty states p 349 N94-10581
Uncertainty relations, zero point energy and the linear canonical group p 378 N94-10590
Information entrophy via Glauber's Q-representation
p 378 N94-10592
Positive phase space distributions and uncertainty relations p 379 N94-10598
Wavelets and spacetime squeeze
p 379 N94-10604
QUANTUM STATISTICS
Coherence influence on the intensity of Bose-Einstein correlations and visible size of a source
[DE93-617697] p 349 N94-10556
Relation of squeezed states between damped harmonic and simple harmonic oscillators p 380 N94-10606
Infinite-mode squeezed coherent states and non-equilibrium statistical mechanics (phase-space-picture approach)
[LBL-32695] p 380 N94-10608
QUANTUM THEORY
Discrete space-time symmetries
[DE93-010199] p 341 N94-10259
The structure of Hilbert flag varieties
[MEMO-1095] p 348 N94-10272
Standard model status (in search of new physics)
[DE93-013288] p 410 N94-10528
From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535
The Second International Workshop on Squeezed States and Uncertainty Relations
[NASA-CP-3219] p 375 N94-10564
A phaseonium magnetometer: A new optical magnetometer based on index enhanced media
p 375 N94-10565
Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567
Disturbance, the uncertainty principle and quantum optics p 375 N94-10569
Generalised squeezing and information theory approach to quantum entanglement p 377 N94-10580
Study of Einstein-Podolsky-Rosen state for space-time variables in a two photon interference experiment
p 370 N94-10582
Dissipation in a squeezed-state environment
p 370 N94-10584
Squeezed spin states: Squeezing the spin uncertainty relations p 377 N94-10585
Quantum entropy and uncertainty for two-mode squeezed, coherent and intelligent spin states
p 377 N94-10586
Geometric aspects of uncertainty and correlation
p 349 N94-10588
Nonunitary and unitary approach to Eigenvalue problem of Boson operators and squeezed coherent states
p 350 N94-10595
Non-gauge phase transformations in quantum transition amplitudes p 378 N94-10596
Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space
p 350 N94-10600
New squeezed landau states p 379 N94-10601
The uncertainty principle and quantum chaos
p 379 N94-10602

Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603

Infinite-mode squeezed coherent states and non-equilibrium statistical mechanics (phase-space-picture approach) [LBL-32695] p 380 N94-10608

Quantum processes in resonators with moving walls p 380 N94-10612

Limitation and suppression of hot electron fluctuations in submicron semiconductor structures [DE93-613911] p 396 N94-10801

Quantum solitons with cylindrical symmetry [DE93-617659] p 344 N94-10881

Proceedings of the Workshop on New Aspects of Quantum Field Theories [DE93-754136] p 411 N94-10887

Dissipative phase transitions in field theory models with spontaneous symmetry violation [DE93-621382] p 412 N94-11039

Creation and annihilation of solitons in nonlinear integrable systems [DE93-621379] p 365 N94-11078

Non-barrier tunneling in presence of dissipations [DE93-621381] p 412 N94-11086

Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088

A theoretical kinematical study of the gradient of any cosmic scalar field [DE92-644731] p 425 N94-11136

One-loop quantum gravity on de Sitter space [DE92-641349] p 425 N94-11152

Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents [AD-A265149] p 143 N94-11160

Divergences in the moduli space integral and accumulating handles in the infinite-genus limit [DE93-619722] p 346 N94-11693

Duality twisted boundary conditions in n-sta te Potts models [DE93-619724] p 346 N94-11811

Explorations in quantum gravity: From one loop effective actions to two-dimensional theories p 413 N94-11822

Superfluid turbulence p 158 N94-12307

QUANTUM WELLS

Non-gauge phase transformations in quantum transition amplitudes p 378 N94-10596

Effect of effective mass differences on the tunneling current-voltage behaviour of a resonant diode in the presence of space charge build-up [DE93-613817] p 142 N94-10799

The response of an electron in a biased double well to a strong laser: Delocalization and low frequency generation [AD-A265169] p 366 N94-11100

The additional contribution caused by Coulomb interaction to the exciton dispersion in multiple quantum wells and superlattices for direct band gap cubic semiconductors [DE93-613538] p 402 N94-11659

Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems [AD-A265599] p 404 N94-12375

Theoretical investigation of some novel phenomenal in artificially structured semiconductors [AD-A266142] p 405 N94-12587

QUARK MODELS

Quenched chiral logarithms [DE93-010195] p 346 N94-11663

QUARKS

Top and Higgs masses in a composite boson model [DE93-010874] p 359 N94-10302

Production of strange clusters in relativistic heavy ion collisions [DE93-010876] p 359 N94-10303

Searches for strangelets and other exotics at the AGS [DE93-013341] p 359 N94-10308

On the relativistic string size at finite temperature [DE93-617658] p 409 N94-10394

S(sup 1) x S(sup 2) as a bag membrane and its Einstein-Weyl geometry [DE93-613149] p 410 N94-10635

Proceedings of the third workshop on light quark meson spectroscopy [DE93-754138] p 363 N94-10696

Filamentation instability of hot quark-gluon plasma with hard jet [DE93-617679] p 388 N94-10882

Gluon gas viscosity in nonperturbative region [DE93-617680] p 397 N94-10883

Relativistic heavy-ion collisions [DE93-014844] p 366 N94-11147

Experiments to measure the gluon helicity distribution in protons [DE93-011756] p 368 N94-11613

Quenched chiral logarithms [DE93-010195] p 346 N94-11663

Top quark search in D(O) from the lepton + jets mode [DE93-014027] p 370 N94-12781

Quark and lepton masses [DE93-012308] p 370 N94-12787

QUARTZ

Dynamic studies of crystal growth using the AFM [DE93-009549] p 399 N94-11268

Si-29 NMR spectroscopy of naturally-shocked quartz from Meteor Crater, Arizona: Correlation to Kieffer's classification scheme p 80 N94-12087

QUARTZ CRYSTALS

The laser ablation of gold films at the electrode surface of a quartz crystal microbalance [AD-A265535] p 175 N94-12012

NMR spectroscopy of experimentally shocked single crystal quartz: A reexamination of the NMR shock barometer p 81 N94-12258

A novel test method for fuel thermal stability [AD-A265853] p 99 N94-12275

QUARTZITE

Shock transformations in quartzite p 97 N94-12040

QUATERNARY ALLOYS

Electronic and total energy properties of ternary and quaternary semiconductor compounds, alloys and superlattices [NASA-CR-192905] p 405 N94-12570

QUATERNIONS

Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics [DE93-012823] p 340 N94-12543

QUENCHING (COOLING)

AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141

EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199

QUERY LANGUAGES

A correct and efficient interface for logical query languages with complex objects [MEMO-INF-93-01] p 320 N94-10167

The relational-to-object-oriented cross-model accessing capability in a multi-model and multi-lingual database system [AD-A264911] p 420 N94-11846

QUESTOL AIRCRAFT

An investigation on the effectiveness of the piping interference removal system for STOL aircraft wind tunnel tests [NAL-TM-647] p 2 N94-10350

Aerodynamic model identification of quiet STOL experimental aircraft ASKA from dynamic flight test data [DE93-767967] p 25 N94-10728

Flight simulator experiment of the cockpit advisory system [NAL-TR-1151] p 33 N94-10733

QUEUEING THEORY

Complex functions in queueing theory [CWI-BS-R9219] p 342 N94-10352

Scalable spin locks for multiprogrammed systems [AD-A265007] p 337 N94-11650

QUOTIENTS

Finding minimum-quotient cuts in planar graphs [DE93-011675] p 344 N94-10961

R

RADAR APPROACH CONTROL

SATORI: Situation Assessment Through the Re-creation of Incidents [DOT/FAA/AM-93/12] p 38 N94-12567

RADAR CORNER REFLECTORS

An experiment for the radiometric calibration of the ERS-1 SAR p 236 N94-11733

RADAR CROSS SECTIONS

Theoretical studies of the radar properties of the icy Galilean moons of Jupiter [NASA-CR-193407] p 434 N94-11361

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

Ocean wave detection by SAR p 197 N94-11932

Measurements of ocean cross-section with a side-looking airborne radar p 201 N94-11954

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778

RADAR DATA

Groundwave HF ocean surface radar p 139 N94-11906

Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190

Synthesis of global thematic mapping, Venus: Geologic correlations/questions for the Magellan gravity mission p 467 N94-12194

SATORI: Situation Assessment Through the Re-creation of Incidents [DOT/FAA/AM-93/12] p 38 N94-12567

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778

RADAR DETECTION

Improved Many-On-Many ROUTE software description [DE93-013961] p 334 N94-12608

RADAR ECHOES

Statistical study of HF ocean radar echo p 139 N94-11905

Measurements of ocean cross-section with a side-looking airborne radar p 201 N94-11954

Development of shipboard ocean lidar p 140 N94-11965

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778

RADAR EQUIPMENT

The radar eye blinded: The USAF and electronic warfare, 1945-1955 [AD-A265494] p 132 N94-10497

HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

Resistivity and radar void detectors for tunneling machines p 140 N94-12706

RADAR IMAGERY

Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707

Wind and surface features in SAR images: The Canadian program p 234 N94-11718

Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720

SAR imaging of dynamical features in the English Channel p 234 N94-11721

SAR ocean imaging in the Gulf of Alaska p 235 N94-11723

Preliminary results of the experiment I-7 p 235 N94-11728

Calibration of the ERS-1 SAR fast-delivery images p 236 N94-11730

The use of active devices in the ERS-1 radiometric calibration p 236 N94-11732

Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734

SAR interferometry experiments with ERS-1 p 237 N94-11735

SAR-interferometry applying ERS-1: Some preliminary test results p 237 N94-11736

Monitoring of the Greenland Ice Sheet using ERS-1 synthetic aperture radar imagery p 237 N94-11741

Use of ERS-1 SAR to measure ice flux in the East Greenland current p 238 N94-11746

Validation of ERS-1 SAR measurements of sea ice during ARCTIC-1991 p 238 N94-11747

Ocean circulation revealed by ice floe tracking p 240 N94-11759

Evaluating ERS-1 ice motion and classification products p 241 N94-11763

A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767

An analysis of the gravity field in the Norwegian Sea and mapping of the ice cap of Greenland using ERS-1 altimeter measurements p 242 N94-11768

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

The microwave backscattering from wind waves p 201 N94-11959

Venus small volcano classification and description p 438 N94-12037

A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus p 455 N94-12126

Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas p 464 N94-12179

Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190

The Magellan volcanic and magmatic feature catalog p 467 N94-12193

Characteristics of arachnoids from Magellan data p 469 N94-12204

ISAR motion compensation using the burst derivative measure as a focal quality indicator [AD-A265647] p 138 N94-12440

Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484

Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485

Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site p 248 N94-12491

The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496

TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498

ERS-1 and Almaz SAR ocean wave imaging over the Gulf Stream and the Grand Banks p 251 N94-12505

Real time processing wave spectra from satellite SAR p 251 N94-12506

A statistical analysis of sea state surface ERS-1 SAR-wave mode imagettes p 251 N94-12507

A new model for Synthetic Aperture Radar (SAR) images from ocean scatter p 251 N94-12508

On the extraction of ocean wave spectra from ERS-1 SAR wave mode image spectra p 251 N94-12509

Tide-generated nonlinear internal wave packets in the Strait of Gibraltar observed by the synthetic aperture radar aboard the ERS-1 satellite p 252 N94-12510

Cloud studies using ATSR data p 253 N94-12517

Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR p 253 N94-12520

Ship traffic monitoring using the ERS-1 SAR p 253 N94-12521

Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis p 254 N94-12523

Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524

Mapping of sea bottom topography with ERS-1 C-band SAR p 254 N94-12525

ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526

SAR imaging of geology and bathymetry: Kent coastal area - southern North Sea p 254 N94-12527

Comparison of ERS-1 SAR images of the Western Mediterranean to in situ oceanographic data: PRIM-1 Cruise (May 1992) p 255 N94-12529

Ice studies in the Barents Sea by ERS-1 during SIZEX 1992 p 210 N94-12653

A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665

Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar p 224 N94-12736

Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746

Radar observation of internal waves field in the north-west Pacific p 226 N94-12747

RADAR MAPS

Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717

Radarmap of Germany: First mosaic and classification p 246 N94-12477

Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea p 246 N94-12478

Example of SPOT/ERS-1 complementarity p 247 N94-12479

The use of ERS-1 SAR data to study surface states p 247 N94-12480

Application of ERS-1 SAR data to snow mapping p 247 N94-12483

RADAR MEASUREMENT

Using transponders with the ERS-1 altimeter to measure orbit altitude to +/- 3 cm p 244 N94-11785

Measurement of wave parameters by HF ocean radar p 192 N94-11903

Kuroshio observations by the HF ocean radar p 192 N94-11904

Experiment and results of the Italian activity in the field of ocean microwave backscattering p 200 N94-11953

Air-sea interaction: Fluxes, a review p 201 N94-11955

Polar mesospheric waves and structure [AD-A265360] p 279 N94-12561

Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar p 224 N94-12736

RADAR RANGE

Improved Many-On-Many ROUTE software description [DE93-013961] p 334 N94-12608

RADAR RECEIVERS

FR/GE/US radar receiver pulse compression ratio [AD-A265391] p 138 N94-12409

RADAR SCANNING

Multichannel dual angle approach for sea surface temperature retrieval in context of ERS-1 scenario p 252 N94-12512

Validation of ATSR-1 using aircraft radiometer measurements over the South Atlantic p 252 N94-12515

Cloud studies using ATSR data p 253 N94-12517

A comparison of ATSR and shipboard radiometer SST measurements along transects between the UK and the Antarctic p 253 N94-12518

Preliminary validation of ATSR sea surface temperatures near the Faeroes p 253 N94-12519

RADAR SCATTERING

Theoretical studies of the radar properties of the icy Galilean moons of Jupiter [NASA-CR-193407] p 434 N94-11361

Development of shipboard ocean lidar p 140 N94-11965

Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970

Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam p 177 N94-12722

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778

RADAR SIGNATURES

The theory for, and demonstration of, information theory applied to radar target identification [DE93-006393] p 132 N94-10315

Signatures of Antarctic firn by means of ERS-1 AMI and by field measurements p 237 N94-11737

Experiences from the Swedish sea ice programme during BEERS-1992 p 239 N94-11751

Air-sea-ice interactions in the Weddell Sea p 239 N94-11753

Arctic sea ice microwave signature and geophysical processes study p 240 N94-11754

C-band SAR backscatter from ice on shallow tundra lakes: Observations and modelling p 240 N94-11755

Sea ice radar signatures from ERS-1 SAR during late Summer and Fall in the Beaufort and Chukchi Seas p 240 N94-11756

RADAR TARGETS

The theory for, and demonstration of, information theory applied to radar target identification [DE93-006393] p 132 N94-10315

ISAR motion compensation using the burst derivative measure as a focal quality indicator [AD-A265647] p 138 N94-12440

RADAR TRACKING

Mid-latitude ionospheric response to active experiments [NASA-CR-193549] p 280 N94-12583

Improved Many-On-Many ROUTE software description [DE93-013961] p 334 N94-12608

RADAR TRANSMISSION

HF-OTH radar performance results [AD-A266106] p 138 N94-11655

RADIAL FLOW

Development of passive superconducting bearings. Phase 3 [AD-A266050] p 180 N94-10706

Simulation study of dynamo structure in reversed field pinch [DE93-771406] p 390 N94-11128

Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes p 467 N94-12195

RADIANCE

A statistical method to determine aerosol path radiance and its application to atmospheric correction for CZCS imagery p 191 N94-11897

Distribution of mineral aerosols over the North Pacific p 204 N94-11976

The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method p 205 N94-11980

Seasonal variability of surface ocean color in the Omura Bay using multitemporal LANDSAT-5 TM data p 218 N94-12698

Optimum selection of spectral channels in the problem of remote sensing of phytoplankton concentration in ocean water p 223 N94-12726

Trajectory curving in underwater propagation of light p 226 N94-12748

RADIANT FLUX DENSITY

Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714

Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system [DE93-011879] p 143 N94-11273

EOL performance comparison of GaAs/Ge and Si BSF/R solar arrays p 51 N94-11398

RADIATION BELTS

Proton transport methods for satellite shield modeling [DE93-013602] p 42 N94-10520

Analysis of geophysical measurements and spacecraft interactions [AD-A266064] p 43 N94-10944

Potential health effects of space radiation p 312 N94-11558

RADIATION COUNTERS

Silicon-based elementary particle tracking system: Materials science and mechanical engineering design [DE93-012630] p 65 N94-10740

Effects of energetic particle events on VLF/LF propagation parameters/1989 [AD-A265266] p 275 N94-11013

Conceptual design report for the SDC barrel and intermediate muon detectors based on a jet-type drift chamber [DE93-753173] p 367 N94-11510

Experimental particle physics at the University of Pittsburgh [DE93-013326] p 369 N94-12546

RADIATION DAMAGE

Proton transport methods for satellite shield modeling [DE93-013602] p 42 N94-10520

EOL performance comparison of GaAs/Ge and Si BSF/R solar arrays p 51 N94-11398

Results of thermal vacuum tests for the PASP+ flight modules p 53 N94-11410

Multi-band gap and new solar cell options workshop p 54 N94-11418

Potential health effects of space radiation p 312 N94-11558

Diffusion length damage coefficient and annealing studies in proton-irradiated InP [NASA-TM-106262] p 404 N94-12430

RADIATION DETECTORS

Analysis and interpretation of high energy cosmic rays measured on Spacelab-2 [NASA-CR-193586] p 485 N94-12771

RADIATION DISTRIBUTION

A modeling perspective on cloud radiative forcing [DE93-012383] p 276 N94-11241

On possibility of diamond formations in radiation process p 433 N94-12254

RADIATION DOSAGE

Proton transport methods for satellite shield modeling [DE93-013602] p 42 N94-10520

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data [DE93-613828] p 395 N94-10537

On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys [DE93-617200] p 82 N94-10842

Radiation defect production in InAs crystals under electron irradiation [DE93-617202] p 397 N94-10845

A proposed performance index for galactic cosmic ray shielding materials [NASA-TM-4444] p 484 N94-11278

Activation energy and capture cross section of majority carrier traps in Zn doped InP p 49 N94-11386

Potential health effects of space radiation p 312 N94-11558

Radiation considerations for interplanetary missions p 45 N94-11559

Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

Operational radiological support for the US manned space program p 318 N94-11561

Lessons learned from the Long Duration Exposure Facility [AD-A266026] p 44 N94-12394

Experimental particle physics at the University of Pittsburgh [DE93-013326] p 369 N94-12546

RADIATION EFFECTS

Radiation hardened nonvolatile memory for space and strategic applications [DE93-000746] p 319 N94-10146

High heat flux components and plasma surface interactions [DE93-008786] p 385 N94-10253

Workshop on NN Bremsstrahlung and Polarization Observables
[DE93-010181] p 361 N94-10334
Investigation of soft errors in MOS RAM under influence of heavy ions
[DE92-644554] p 484 N94-10534
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation
[DE93-617173] p 397 N94-10830
On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys
[DE93-617200] p 82 N94-10842
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845
Proceedings of the Symposium on Radiation Research in Life Science
[DE93-754137] p 300 N94-10888
Combustion chamber analysis code
[NASA-CR-192585] p 46 N94-10934
Welding tritium aged stainless steel
[DE93-011782] p 181 N94-11228
Effect of switched-bias bakes on the postirradiation electrical response of MOS devices
[DE93-009629] p 143 N94-11271
Proceedings of the 12th Space Photovoltaic Research and Technology Conference (SPRAT 12)
[NASA-CP-3210] p 48 N94-11380
Radiation effects in heteroepitaxial InP solar cells
p 48 N94-11383
Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells
p 50 N94-11392
Radiation effects in Ga(0.47)In(0.53)As solar cells
p 52 N94-11404
The UoSAT-5 solar cell experiment: First year in orbit
p 53 N94-11409
Potential health effects of space radiation
p 312 N94-11558
Potential techniques for non-destructive evaluation of cable materials
[DE93-008350] p 183 N94-11586
Radiation-induced aperiodicity in irradiated ceramics
[DE93-013335] p 91 N94-11698
The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981
On possibility of diamond formations in radiation process p 433 N94-12254
Chemical release and radiation effects (CRRES) data directory
[NASA-CR-192551] p 279 N94-12581

RADIATION HARDENING
Radiation hardened nonvolatile memory for space and strategic applications
[DE93-000746] p 319 N94-10146
Specification and testing for power by wire aircraft
[NASA-TM-106232] p 46 N94-10765
Effect of switched-bias bakes on the postirradiation electrical response of MOS devices
[DE93-009629] p 143 N94-11271

RADIATION HAZARDS
Fully coupled neutronic and hydrodynamic analysis of space nuclear reactor reentry accidents
[DE93-005459] p 372 N94-10890
Radiation considerations for interplanetary missions
p 45 N94-11559

RADIATION MEASUREMENT
An intercomparison of the radium mass standards of the UK and the USSR: 2
[NPL-RSA(EXT)-34] p 359 N94-10266
Demonstration prototype gamma-ray hodoscope alternative to CARGOSCAN for rocket stage monitoring
[DE93-006908] p 169 N94-10326

RADIATION PRESSURE
Using solar flare track densities to determine the origin of interplanetary dust particles p 429 N94-12078

RADIATION PROTECTION
Report on Subgroup on Data Banks for Risk Assessment
[DE93-012150] p 418 N94-10646
A proposed performance index for galactic cosmic ray shielding materials
[NASA-TM-4444] p 484 N94-11278

RADIATION SHIELDING
Proton transport methods for satellite shield modeling
[DE93-013602] p 42 N94-10520
Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199
A proposed performance index for galactic cosmic ray shielding materials
[NASA-TM-4444] p 484 N94-11278
Radiation considerations for interplanetary missions
p 45 N94-11559

RADIATION SOURCES
Intense neutron sources for fusion materials studies
[DE93-009782] p 391 N94-11171
Advanced concepts theory annual report 1992
[AD-A266132] p 393 N94-11474

RADIATION TOLERANCE
A detailed study of the photo-injection annealing of thermally diffused InP solar cells p 48 N94-11381
High temperature annealing of minority carrier traps in irradiated MOCVD n(+)p InP solar cell junctions
p 48 N94-11382
Radiation effects in heteroepitaxial InP solar cells
p 48 N94-11383
Progress in p(+)n InP solar cells fabricated by thermal diffusion p 48 N94-11384
Electrochemical characterization of p(+)n and n(+)p diffused InP structures p 49 N94-11385
Investigation of the radiation resistance of triple-junction a-Si:H alloy solar cells irradiated with 1.00 MeV protons
p 50 N94-11391
Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells
p 50 N94-11392
Radiation effects in Ga(0.47)In(0.53)As solar cells
p 52 N94-11404
The UoSAT-5 solar cell experiment: First year in orbit
p 53 N94-11409
An overview of the Defence Research Agency photovoltaic programme p 53 N94-11412
Workshop on Heteroepitaxial InP Solar Cells
p 54 N94-11414
Development of plastic capsule for research reactor irradiation
[DE93-753186] p 372 N94-11591

RADIATIVE HEAT TRANSFER
The cloud radiative feedback of a midlatitude squall line system and implication for climate study
[DE93-010511] p 283 N94-10290
The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
Meteorological Satellite Center
[MSC-TN-26] p 190 N94-11079
Why convective heat transport in the solar nebula was inefficient p 458 N94-12143

RADIATIVE RECOMBINATION
Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117
Atomic processes relevant to polarization plasma spectroscopy
[DE93-753240] p 393 N94-11594

RADIATIVE TRANSFER
Conductive-radiative model for predicting the shape of HgI2 crystal grown in the LTVG furnace
p 117 N94-10201
Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714
Studies of the net surface radiative flux from satellite radiances during FIFE
[NASA-CR-193150] p 230 N94-10953
Simulation of images of water vapor channel and infrared split channel p 190 N94-11081
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851
Remote sensing for numerical modelling of radiative transfer processes in ocean environment
p 204 N94-11973
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method
p 205 N94-11980
An observational search for CO2 ice clouds on Mars
p 441 N94-12054
Multichannel dual angle approach for sea surface temperature retrieval in context of ERS-1 scenario
p 252 N94-12512
Optimal hemicube sampling
[DE93-010499] p 334 N94-12591
Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738

RADIO ALTIMETERS
Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699
Proceedings of First ERS-1 Symposium on Space at the Service of Our Environment, volume 1
[ESA-SP-359-VOL-1] p 232 N94-11704
Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722
The height calibration of the ERS-1 radar altimeter
p 241 N94-11764
Separation of geoid and sea surface topography in shallow water regions: A first ERS-1 radar altimeter data evaluation p 242 N94-11766
Operational ERS-1 orbit determination at D-PAF
p 243 N94-11774
Validating the UK-PAF land ice product surface elevation p 244 N94-11780
Surface roughness variations across the Iceland-Faroes frontal region observed by the GEOSAT altimeter and NOAA AVHRR p 201 N94-11958
On the variability of wind speeds in the North Western Pacific observed by altimeter/GEOSAT and SSM/I/DMSP p 201 N94-11960
Observation of wind and waves by GEOSAT altimeter
p 202 N94-11961
Topography of the Western Mediterranean from the ERS-1 altimeter p 255 N94-12531

RADIO ANTENNAS
Multiple Antenna Implementation System (MAntIS)
[DE93-012515] p 131 N94-10270

RADIO ASTRONOMY
Interstellar scattering and the selection of extragalactic radiosources with highly compact components
p 134 N94-11063
Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065
The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068
Detection of dust impacts by the Voyager planetary radio astronomy experiment
[NASA-CR-193281] p 423 N94-11305
Models of Neptune's smooth recurrent radio emission
[NASA-CR-193283] p 484 N94-11312

RADIO BEACONS
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773

RADIO COMMUNICATION
Disturbance Impact Assessment System (DIAS), version 2.0. System design document
[AD-A265251] p 138 N94-11883

RADIO EMISSION
Models of Neptune's smooth recurrent radio emission
[NASA-CR-193283] p 484 N94-11312

RADIO EQUIPMENT
Preparing for the initial observations of the Targeted Search and the Sky Survey systems
[NASA-CR-193644] p 318 N94-10865

RADIO FREQUENCIES
Multiple Antenna Implementation System (MAntIS)
[DE93-012515] p 131 N94-10270
Characterization of high-power RF structures using time-domain field codes
[DE93-013416] p 132 N94-10518
Electron runaway in RF discharges
[DE93-771407] p 363 N94-10661
RF vacuum microelectronics
[AD-A266066] p 142 N94-10818
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850
DILUTE: A code for studying beam evolution under RF noise
[DE93-011605] p 133 N94-10960
Initial assessment of lower hybrid current drive in D3-D
[DE93-013310] p 394 N94-12370
Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole
[DE93-014474] p 374 N94-12786

RADIO FREQUENCY HEATING
Conversion of the four-strap array in D3-D to a tunable traveling wave antenna
[DE93-012085] p 137 N94-11453

RADIO GALAXIES
The morphologies of distant radio galaxies
p 426 N94-11597

RADIO INTERFEROMETERS
The influence of the propagation medium on the sensitivity and resolution of meter wavelength aperture synthesis systems p 134 N94-11062
Elimination of the influence of the atmosphere on the accuracy of solutions to astrometric problems by means of a ground-space VLBI network p 136 N94-11071

RADIO OBSERVATION
HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

RADIO RECEIVERS
Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument
[NASA-CR-194376] p 427 N94-12566

RADIO SIGNALS
Elimination of the influence of the atmosphere on the accuracy of solutions to astrometric problems by means of a ground-space VLBI network p 136 N94-11071
RADIO SOURCES (ASTRONOMY)
Tropospheric and ionospheric effects on differential astrometry with a ground-space based VLBI array
p 136 N94-11070
Models of Neptune's smooth recurrent radio emission
[NASA-CR-193283] p 484 N94-11312
RADIO TELEMETRY
The 17th Transducer Workshop
[AD-A265526] p 141 N94-10509
Remote surface water monitoring radio based telemetry system
[DE93-009643] p 41 N94-11282
RADIO TRANSMISSION
Building penetration loss measurements for DAB signals at 211 MHz
[BBC-RD-1992/14] p 133 N94-11024
Propagation Effects in Space VLBI
p 134 N94-11060
Radiowaves propagation through inhomogeneous interstellar plasma p 134 N94-11061
Interstellar scattering and the selection of extragalactic radiosources with highly compact components
p 134 N94-11063
Intraday variability and the compactness of extragalactic radio sources p 135 N94-11064
RADIO TRANSMITTERS
In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT)
[NAL-TR-1165] p 43 N94-10859
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773
RADIOACTIVE AGE DETERMINATION
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407
Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020
Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021
Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022
Re-Os dating of 3AB iron meteorites
p 432 N94-12237
The Xe-Q in lodranites and a hint for Xe-L. FRO90011 another lodranite? p 432 N94-12239
On the origin of (4)He and (40)Ar in natural gold
p 87 N94-12240
RADIOACTIVE DECAY
Nuclear astrophysics
[DE93-010569] p 425 N94-10292
The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point
[DE93-012655] p 361 N94-10349
On parity conservation and the question of the missing, right-handed neutrino
[DE93-613092] p 361 N94-10414
High efficiency direct thermal to electric energy conversion from radioisotope decay using selective emitters and spectrally tuned solar cells
[NASA-TM-106227] p 47 N94-11307
Tau physics
[DE93-010956] p 367 N94-11469
RADIOACTIVE ISOTOPES
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848
RADIOACTIVE MATERIALS
Wind system documentation
[DE93-010381] p 285 N94-11664
Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations
p 476 N94-12242
RADIOACTIVE WASTES
Computer models used to support cleanup decision-making at hazardous and radioactive waste sites
[PB93-183333] p 274 N94-10698
RADIOGENIC MATERIALS
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407
Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082
Studies of the release of radiogenic Xe-129 from Bjurboele: Evidence against simple diffusion models
p 430 N94-12125
RADIOGRAPHY
Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it
p 61 N94-10037
New x ray scanning topographic approaches to nondestructive evaluation of composites
p 61 N94-10039
RADIOLOGY
Operational radiological support for the US manned space program p 318 N94-11561
RADIOMETERS
Development of a balloon-borne stabilized platform for measuring radiative flux profiles in the atmospheric boundary layer
[DE93-013186] p 274 N94-10323
Coherence effects in radiometry and in spectroscopy
[DE93-013437] p 75 N94-10519
Progress in multidisciplinary design optimization at NASA Langley
[NASA-TM-107754] p 318 N94-10814
Atmospheric correction plans for SeaWiFS
p 204 N94-11975
Radiometer offsets and count conversion coefficients for the Earth Radiation Budget Experiment (ERBE) spacecraft for the years 1987, 1988, and 1989
[NASA-CR-191489] p 286 N94-12772
RADIOMETRIC RESOLUTION
Preliminary results of the experiment I-7
p 235 N94-11728
Calibration of the ERS-1 SAR fast-delivery images
p 236 N94-11730
The use of active devices in the ERS-1 radiometric calibration p 236 N94-11732
An experiment for the radiometric calibration of the ERS-1 SAR p 236 N94-11733
RADIOSONDES
Cloud liquid water content over the Pacific Ocean tropical zone derived from ship microwave radiometric measurement p 225 N94-12743
RADIUM ISOTOPES
An intercomparison of the radium mass standards of the UK and the USSR: 2
[NPL-RSA(EXT)-34] p 359 N94-10266
RADON
Study of the atmospheric chemistry of radon progeny in laboratory and real indoor atmospheres
[DE93-012236] p 266 N94-11671
RAIL TRANSPORTATION
Safety of high speed ground transportation systems: X2000 US demonstration vehicle dynamics trials, preliminary test report, October 1992 - January 1993
[PB93-194645] p 422 N94-10736
Experiment on a high Reynolds number turbulent boundary layer p 164 N94-12617
On the wake behind a high speed train
p 164 N94-12618
RAILGUN ACCELERATORS
Investigation of multiphase railgun systems
p 40 N94-11637
RAIN
The effect of rain on ERS-1 altimeter data
p 243 N94-11773
Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989
Rainfall-runoff estimation using digital radar
[AD-A265390] p 286 N94-12408
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663
RAIN EROSION
Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668
RAIN FORESTS
TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498
RAMAN SPECTRA
Surface-enhanced raman spectroscopy of electroactive films of C60 and an Ir-C60 complex on gold: Symmetry lowering, electron localization, and counteraction effects
[AD-A265934] p 396 N94-10705
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756
RAMAN SPECTROSCOPY
Surface-enhanced raman spectroscopy of electroactive films of C60 and an Ir-C60 complex on gold: Symmetry lowering, electron localization, and counteraction effects
[AD-A265934] p 396 N94-10705
RANDOM ACCESS MEMORY
Investigation of soft errors in MOS RAM under influence of heavy ions
[DE92-644554] p 484 N94-10534
Gallium arsenide dynamic random access memory support circuitry
[AD-A265176] p 320 N94-11875
RANDOM PROCESSES
Intermittency following a Hopf bifurcation
[W-9301] p 344 N94-10907
Search for structures in the cosmic microwave background radiation
[INPE-5491-TDI/508] p 484 N94-12357
RANDOM SAMPLING
A CM chondrite cluster and CM streams
p 432 N94-12215
RANDOM VARIABLES
Parametric analysis of atmospheric processes
[NASA-CR-192523] p 347 N94-10757
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837
RANDOM VIBRATION
Development of a fatigue analysis approach for CFRP structures under acoustic loading p 58 N94-10018
Sine and random vibration program evaluation on vibration control systems
[DE93-011974] p 188 N94-11460
RANDOM WALK
On a class of two-dimensional nearest neighboring random walks
[CWI-BS-R9220] p 347 N94-10353
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507
The limit of frequency estimation p 356 N94-11001
RAPID QUENCHING (METALLURGY)
Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063
RAPID TRANSIT SYSTEMS
Safety of high speed ground transportation systems: X2000 US demonstration vehicle dynamics trials, preliminary test report, October 1992 - January 1993
[PB93-194645] p 422 N94-10736
RARE EARTH ELEMENTS
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094
Crystal-chemistry and partitioning of REE in whitlockite
p 408 N94-12174
Anomalous REE patterns in unequilibrated enstatite chondrites: Evidence and implications
p 431 N94-12191
RARE GASES
Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga
p 473 N94-12228
The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256
RAREFIED GAS DYNAMICS
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method
p 7 N94-10449
RAREFIED PLASMAS
Nonlinear second harmonic generation by light wave-plasma interaction in oscillating magnetic field
[DE93-613723] p 386 N94-10387
RATES (PER TIME)
Rates of fluvio-thermal erosion on Mars
p 435 N94-12018
RATIOS
Damping measurements for ultra-high carbon steel/brass laminates
[DE93-011886] p 82 N94-11076
RATS
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554
Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity
p 310 N94-12001
Fluid compartment and renal function alterations in the rat during 7 and 14 day head down tilt
p 310 N94-12002
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A266113] p 301 N94-12417
RAY TRACING
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch
[DE93-012674] p 384 N94-10157

Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems
[AD-A265075] p 382 N94-11653
Optimal hemicube sampling
[DE93-010499] p 334 N94-12591

RAYLEIGH-BENARD CONVECTION
Evaporation under microgravity conditions
p 102 N94-10086
Benard and Marangoni convection in multiple liquid layers p 105 N94-10100
Marangoni-driven solitary waves p 119 N94-10214
Transient effects in the Benard instabilities: Coupling between capillary and gravity effects
p 119 N94-10216
Numerical investigations on Marangoni-Benard instability in multi layer systems p 120 N94-10217
Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287
Convective and dynamic instability in meridional trenches p 225 N94-12739

REACTING FLOW
CFD analysis of hypersonic, chemically reacting flow fields p 2 N94-10422
Stability of hypersonic boundary-layer flows with chemistry p 7 N94-10451
Nonequilibrium hypersonic flow in a wind-tunnel nozzle
p 8 N94-10456
Some experimental study and numerical simulation in wind tunnel flow p 8 N94-10457
Hypersonic multi block flow simulations around space vehicles including non-equilibrium chemistry
p 9 N94-10460
Thermal and chemical non equilibrium hypersonic flow computations p 10 N94-10465
Combustion chamber analysis code
[NASA-CR-192585] p 46 N94-10934
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels
[DE93-012835] p 152 N94-11371
PDF approach for turbulent scalar field: Some recent developments p 160 N94-12315
Theories of turbulent combustion in high speed flows
[AD-A265735] p 79 N94-12403

REACTION BONDING
High-temperature corrosion of ceramic-ceramic composites in a waste incinerator environment
[DE93-012430] p 72 N94-11368

REACTION KINETICS
Chemical pattern formation under microgravity
p 121 N94-10227
The reaction between titanium carbide and aluminium carbide in liquid aluminium; a microgravity study
p 123 N94-10238
Report of the Workshop on Light Particle-Induced Reactions
[DE93-752300] p 360 N94-10317
The intensity of knock in an internal combustion engine: An experimental and modeling study
[DE93-013089] p 177 N94-10322
Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment
p 7 N94-10447
Review of SHARC 2.0 O3 kinetics and spectroscopy
[AD-A265481] p 274 N94-10496
Kinetics of high concentration arsenic deactivation at moderate to low temperatures
[DE93-013349] p 395 N94-10516
A lattice gas model for enzyme kinetics with next-nearest neighbor interactions
[DE93-613026] p 410 N94-10631
Szilard-Chalmers effect in solid HIO4.2H2O by neutron irradiation
[DE93-617173] p 397 N94-10830
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993
[PB93-196228] p 485 N94-10850
KIVA-3: A KIVA program with block-structured mesh for complex geometries
[DE93-011986] p 77 N94-11249
Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels
[NASA-TM-106259] p 90 N94-11257
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces
[DE93-012767] p 77 N94-11370
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels
[DE93-012835] p 152 N94-11371
The evolution equation for the flame surface density in turbulent premixed combustion p 81 N94-12316
Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317
Solvent dynamical effects in electron transfer: Molecular dynamics simulations of reactions in methanol
[AD-A266061] p 369 N94-12420

REACTION TIME
Evaluation of the C/EC/KC-135 ground collision avoidance system (GCAS), Study 2
[AD-A265193] p 24 N94-11879

REACTOR CORES
Facility for stress corrosion cracking test of irradiated material in high temperature water
[DE93-753189] p 84 N94-11593

REACTOR DESIGN
A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529
Looking beyond ITER: Toroidal concept improvement
[DE93-012762] p 388 N94-10744
Applying design principles to fusion reactor configurations for propulsion in space
[NASA-TM-108247] p 47 N94-11053
Experimental approach to the physics of the high density divertor
[DE93-009149] p 391 N94-11170

REACTOR MATERIALS
High heat flux components and plasma surface interactions
[DE93-008786] p 385 N94-10253
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices
[DE93-621609] p 66 N94-11143
Intense neutron sources for fusion materials studies
[DE93-009782] p 391 N94-11171

REACTOR PHYSICS
A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529

REACTOR SAFETY
Techniques, processes, and measures for software safety and reliability
[DE93-012379] p 322 N94-10347
Proceedings of the Second Technical Meeting on High Temperature Gas-Cooled Reactors
[DE93-754285] p 371 N94-10719
Fracture mechanics and full scale pipe break testing for the Department of Environment's New Production Reactor-Heavy Water Reactor
[DE93-005428] p 187 N94-11169
GRISET certification package
[DE93-011783] p 327 N94-11246

REACTOR TECHNOLOGY
A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529
Intense neutron sources for fusion materials studies
[DE93-009782] p 391 N94-11171
Development of plastic capsule for research reactor irradiation
[DE93-753186] p 372 N94-11591
Research results
[DE93-753403] p 372 N94-11595

READ-ONLY MEMORY DEVICES
Radiation hardened nonvolatile memory for space and strategic applications
[DE93-000746] p 319 N94-10146

READOUT
Method for producing a hybridization of detector array and integrated circuit for readout
[NASA-CASE-NPO-18062-1-CU] p 141 N94-10656

REAL GASES
Issues and approach to develop validated analysis tools for hypersonic flows: One perspective p 7 N94-10446
Real gas and surface transpiration effects upon swept leading edge high speed flow including transition
p 8 N94-10452
On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462

REAL NUMBERS
Bounding the Vapnik-Chervonenkis dimension of concept classes parameterized by real numbers
[DE93-011600] p 331 N94-11611

REAL TIME OPERATION
Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087
Virtual sound for virtual reality
[DE93-010519] p 321 N94-10291
A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484
Application of normalized gray-scale correlation
[DE93-013765] p 141 N94-10521
Distributed simulation using a real-time shared memory network
[NASA-TM-106239] p 319 N94-10724
Report of the IAEA Consultants' Meeting on Real-Time Nondestructive Monitoring of Wear and Corrosion Using the Thin Layer Activation Technique
[DE93-617422] p 183 N94-10847
RighTime: A real time clock correcting program for MS-DOS-based computer systems p 334 N94-10986
A real-time spoken-language system for interactive problem solving
[AD-A266046] p 324 N94-11104
Effective software reuse in an embedded realtime system
[AD-A264993] p 326 N94-11220
Application of the airborne ocean color imager for commercial fishing
[NASA-TM-103986] p 231 N94-11378
Spatial light rebroadcaster architecture study
[AD-A266102] p 382 N94-11421
A combustion products analyzer for contingency use during thermodegradation events on spacecraft
p 318 N94-11555
Teaching high-performance skills using above-real-time training
[NASA-CR-4528] p 315 N94-11627
Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision
[AD-A265065] p 331 N94-11652
Real-time tomography mooring
[AD-A264923] p 289 N94-11854
Distributed real-time system design: Theoretical concepts and applications
[AD-A265199] p 337 N94-11881
ISAR motion compensation using the burst derivative measure as a focal quality indicator
[AD-A265647] p 138 N94-12440
Real time processing wave spectra from satellite SAR
p 251 N94-12506
A user appraisal of ATSR near-real-time products
p 252 N94-12516
Networks of real-time processes
[DE93-013049] p 338 N94-12597
An integrated approach to total end-to-end quality control of ocean data in the real-time environment
p 211 N94-12662
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE93-014093] p 272 N94-12783

RECEIVERS
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles
[DE93-620980] p 362 N94-10649
Progress on GPS standardization p 24 N94-10965
Workshop summary: Receivers for laser power beaming p 54 N94-11419
Airborne optical tracking control system design study
[DE93-009515] p 382 N94-11662
Studies of electrostatic waves and VLF-wave particle interaction in the ionosphere
[AD-A266013] p 278 N94-12392

RECEPTORS (PHYSIOLOGY)
Probability of alamethicin conductance states varies with nonlamellar tendency of bilayer phospholipids
[AD-A264957] p 301 N94-11648

RECESSION
Rates of fluvio-thermal erosion on Mars
p 435 N94-12018

RECOMBINATION REACTIONS
Surface passivation of InP solar cells with InAlAs layers p 49 N94-11389

RECONNAISSANCE
Integrating the services' imagery architectures
[AD-A265487] p 171 N94-12335

RECRYSTALLIZATION
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core
p 281 N94-12056
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites
p 430 N94-12163

RECTANGULAR WAVEGUIDES
Nonlinear instability of a laminar flow in a rectangular duct and generation of the turbulent secondary flow
p 164 N94-12622

RECTENNAS
Construction and testing of a space ready rectenna
[NASA-CR-193310] p 137 N94-11357

RECURSIVE FUNCTIONS
Deformations and recursion operators for evolution equations
[MEMO-1104] p 341 N94-10163
RECYCLING
Environmental Protection Agency's life cycle methodology: Guidelines for use in development of packaging
[PB93-194199] p 265 N94-10841
Some environmental aspects of the application of fibre reinforced plastics in structures
[LM-998] p 88 N94-10877
RED TIDE
Satellite observations of red tide events: Plans for EESI p 191 N94-11899
REDOX CELLS
Technical Update: Johnson Space Center system using a solid electrolytic cell in a remote location to measure oxygen fugacities in CO/CO2 controlled-atmosphere furnaces
[NASA-TM-104774] p 423 N94-11183
REDUCED GRAVITY
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1
[ESA-SP-333-VOL-1] p 99 N94-10070
Experimental study of axisymmetric thermocapillary flows p 100 N94-10072
The use of magnetic fields for damping unsteady Marangoni convection in GaAs floating zones under microgravity p 100 N94-10073
Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity p 101 N94-10079
Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080
On shape of single crystals grown by FZM in microgravity p 102 N94-10084
Liquid bridges and floating zones p 102 N94-10085
Model of convective motion under low gravity p 103 N94-10088
Gas-liquid jets under reduced gravity conditions p 103 N94-10091
Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092
High Prandtl number fluids in a multilayered system under 1-g or micro-g environment p 104 N94-10096
Bubbles and drops behaviour under low-gravity: A space experiment for the IML-2 mission p 104 N94-10098
Space and temporal behavior and control of the residual convection in microgravity p 104 N94-10099
Measurement of the thermal conductivity of molten InSb in a drop shaft p 105 N94-10102
The effect of gravity modulation on thermosolutal convection p 105 N94-10103
Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness p 105 N94-10105
Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107
Propellant management in surface tension tanks p 106 N94-10110
CdTe crystal growth in the Soviet facility zona 4 p 106 N94-10111
The pyrene laser induced fluorescence technique as a diagnostic tool for combustion thermometry in microgravity p 107 N94-10113
A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114
CdTe crystal growth by THM with a rotating magnetic field p 107 N94-10116
Advanced protein, crystallization facility and associated new developments p 39 N94-10119
Design of multisample, multistep phase partitioning apparatus for use on Space Shuttle Spacelab, and Spacelab missions p 108 N94-10120
Calibration of accelerometers on drop tower Bremen p 108 N94-10121
Gas film levitator for containerless processing of glasses in microgravity conditions: Early concept and technology demonstration p 108 N94-10122
Holographic interferometry for microgravity applications p 108 N94-10123
The High Precision Thermostat HPT-HYDRA p 109 N94-10124
TEMPUS: An electromagnetic levitation facility for containerless processing under micro-g in Spacelab p 109 N94-10125
The electron beam furnace: A new facility for materials science research p 109 N94-10126
Design of a CVD reactor for the deposition of diamond in a microgravity environment p 109 N94-10127
Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128
Force and power efficiency of micro-g electromagnetic levitation coils p 110 N94-10129
High temperature processing and diagnostic technologies for microgravity applications p 110 N94-10130
Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131
MUZO: The programmable multi zone furnace for gas payloads and sounding rockets p 110 N94-10132
The surface plasmon spectroscopy as diagnostic technique in microgravity experiments p 110 N94-10133
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment p 39 N94-10134
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
The advanced fluid physics module: How to achieve scientific goals for Spacelab D2 p 39 N94-10136
Results of mission preparation support to microgravity experiments on board of Eureca 1 p 111 N94-10138
AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141
Microgravity experiments using TR-1A rocket p 112 N94-10142
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2
[ESA-SP-333-VOL-2] p 112 N94-10171
Thermocapillary convection instability in microgravity crystal growth p 112 N94-10172
STARDUST: A simulation experiment of cosmic dust analogues production in microgravity conditions p 113 N94-10175
Solidification from supercooled melt under microgravity p 113 N94-10176
Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180
Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193
Effects of a microgravity environment on the crystallization of biological macromolecules p 117 N94-10198
Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 118 N94-10207
Crystallization of zeolites in the microgravity environment of space p 119 N94-10210
A study of the quasibinary Al-W-Mo system. Part 1: Preliminary investigations and preparation for microgravity experiments p 119 N94-10211
Instability of thermocapillary convection in multiple superposed immiscible liquid layers p 120 N94-10218
Influence of neutral particles concentration on flame propagation in methane-air mixtures at zero and normal gravity conditions p 121 N94-10224
Surface tension and adsorption kinetics in immiscible liquid systems at microgravity p 121 N94-10225
Gravity and electric field effects on pool boiling heat transfer p 121 N94-10226
Chemical pattern formation under microgravity p 121 N94-10227
Transport of heat and mass in near-critical fluids p 122 N94-10230
Study of vapor bubble growth in a supersaturated liquid p 122 N94-10232
Phase separation at gas-liquid critical points p 122 N94-10233
Electrohydrodynamic effects in continuous flow electrophoresis observations on Earth and in microgravity p 122 N94-10234
Interface reactions of (Ni3Al) ribbons/Al-MMC in ground preparation as preliminary test for microgravity experiments p 123 N94-10237
The reaction between titanium carbide and aluminium carbide in liquid aluminium; a microgravity study p 123 N94-10238
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243
Some aspects of combustion modelling by low and normal gravity p 124 N94-10244
Photoinitiated radical polymerization of liquid monomers in microgravity p 124 N94-10246
A method for determination of the elongational viscosity of viscoelastic fluids without body forces p 124 N94-10247
Microgravity combustion of dust suspension in a spherical chamber p 80 N94-10248
The International Microgravity Laboratory, a Spacelab for materials and life sciences p 125 N94-10249
Large amplitude shape oscillations in a mercury drop using a drop tower
[DE93-767972] p 125 N94-10730
Effects of CSF hormones and ionic composition on salt/water metabolism
[NASA-CR-193232] p 300 N94-11045
Measuring human performance on NASA's microgravity aircraft p 317 N94-11537
A mechanism for the reduction in risk of decompression sickness in microgravity environment p 312 N94-11545
Comprehensive analysis of airborne contaminants from recent Spacelab missions p 318 N94-11553
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures p 308 N94-11992
Pulmonary function in microgravity: KC-135 experience p 309 N94-11994
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995
Autogenic-feedback training: A countermeasure for orthostatic intolerance p 311 N94-12006
REDUCTION (CHEMISTRY)
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Thermodynamics of lunar ilmenite reduction p 415 N94-12028
The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
REED-SOLOMON CODES
An investigation of error characteristics and coding performance
[NASA-CR-193620] p 324 N94-10932
REENTRY TRAJECTORIES
Aerodynamic and aerothermal challenges for the design of the Hermes spaceplane p 3 N94-10423
REENTRY VEHICLES
Planetary entry vehicle design for planned and potential ESA missions to Titan, Mars, and Earth return (FGE TN 51/92) p 4 N94-10428
Synthesis of the Workshop on Hypersonic Flows for ReEntry Problems p 5 N94-10440
Local aerothermal problems during Hermes re-entry p 10 N94-10464
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300
REFERENCE SYSTEMS
Toward 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-193184] p 229 N94-10702
REFINING
Highly anisotropic but nodeless gap from a valence-fluctuation pairing mechanism
[DE93-010738] p 401 N94-11646
REFLECTANCE
Effects of energetic particle events on VLF/LF propagation parameters/1989
[AD-A265266] p 275 N94-11013
An expert system shell for inferring vegetation characteristics: Prototype help system (Task 1)
[NASA-CR-193411] p 231 N94-11236
Needs for super-smooth surfaces
[DE93-012482] p 382 N94-11242
Formulating infrared coatings for defence applications
[MRL-RR-1-93] p 90 N94-11302
On the coupling of electromagnetic radiation into cavities
[DE93-011406] p 137 N94-11621
Feature association without a motion estimate
[AD-A265162] p 138 N94-11891
Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163
REFLECTED WAVES
Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714
REFLECTOMETERS
Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968
REFLECTOR ANTENNAS
PO/PTD diffraction synthesis of array-fed reflector antennas for satellite and radar applications p 137 N94-11636
REFLECTORS
Universal adjustable mould for antenna reflectors p 59 N94-10027
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230

Feature association without a motion estimate
[AD-A265162] p 138 N94-11891
Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas
p 464 N94-12179
Spatial light modulator having photosensitive and ferroelectric layers
[AD-D015731] p 404 N94-12400

REFLEXES
Carotid-cardiac baroreflex: Relation with orthostatic hypotension following simulated microgravity and implications for development of countermeasures
p 308 N94-11992

REFRACTIVITY
The sensitivity of an optical fiber holographic interferometer p 107 N94-10117
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732

REFRACTORY MATERIALS
High temperature materials for hypersonic transport
p 56 N94-10003
Distortions and stresses in thin shells due to anisotropic thermal expansion p 57 N94-10014
An ultralight carbon-carbon composite with amorphous matrix p 61 N94-10042
Ceramic matrix composites: High performance materials for space application p 62 N94-10044
Joints between dissimilar metallic and ceramic materials p 63 N94-10052
Advanced methods of permanently joining carbon materials p 63 N94-10057
High temperature composites in Aerospatiale activities
p 64 N94-10062
Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063
Fibre reinforced structures with glass matrix
p 64 N94-10064
STARDUST: A simulation experiment of cosmic dust analogues production in microgravity conditions
p 113 N94-10175
Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107
The giant impact produced a precipitated Moon
p 430 N94-12135
Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers
[AD-D015747] p 93 N94-12330
Synthesis and polymerization of oligomeric multiple aromatic ether-containing phthalonitriles
[AD-D015729] p 94 N94-12399

REFRACTORY METAL ALLOYS
Structural material, manufacture, and design requirements for high-temperature fasteners for space plane technologies p 63 N94-10055
Constitutive laws for describing the service relevant creep behaviour of metallic materials p 64 N94-10060

REFRACTORY METALS
Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings
[AD-A265072] p 92 N94-11866
Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

REFRIGERANTS
Theoretical evaluation of R22 and R502 alternatives
[DE93-014767] p 411 N94-10853
Measurement of viscosity, density and gas solubility of refrigerant blends
[DE93-014772] p 89 N94-11145
Accelerated screening methods for predicting lubricant performance in refrigerant compressors
[DE93-014773] p 89 N94-11146

REFRIGERATING MACHINERY
Accelerated screening methods for predicting lubricant performance in refrigerant compressors
[DE93-014773] p 89 N94-11146

REFRIGERATORS
The superfluid Stirling refrigerator, a new method for cooling below 0.5 K
[DE93-012672] p 128 N94-11161
The Second Workshop on Refrigerating System Utilization Onboard the JEM
[NASDA-CON-930001] p 129 N94-11831
Summary of the pre-AO of the JEM onboard scientific and engineering experiments for refrigerator utilization
p 129 N94-11832
Development of space refrigerator
p 129 N94-11833
Studies on refrigerator sensors and cooling section interface p 129 N94-11834
Trend of miniature refrigerator utilization in earth observation area p 130 N94-11835
Satellite observation of atmospheric tracer components: JEM/POP p 130 N94-11836
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
Refrigerator utilization in infrared astronomy
p 130 N94-11838
Study on various cryogenic refrigeration cycles using all purpose refrigerators p 130 N94-11839
Development test on 2 K cooling systems
p 130 N94-11840
Generation of superfluid He by G-M cycle cryogenic refrigerator p 130 N94-11841
Development of 4 K refrigerator using highly efficient heat accumulating reservoir p 130 N94-11842
Utilization of superconductivity in the area of space
p 131 N94-11843

REFUELING
Vehicular fleet operation on natural gas and propane: An overview
[PB93-194603] p 98 N94-10844
Business fleet refueling assessment
[PB93-189892] p 98 N94-11017
On-orbit refueling p 38 N94-11565
On-orbit refueling p 38 N94-11566
Preliminary analysis of the benefits derived to US Air Force spacecraft from on-orbit refueling
p 38 N94-11567

REGENERATION (ENGINEERING)
Regeneration of near-wall turbulence structures
p 158 N94-12308

REGENERATIVE FUEL CELLS
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411

REGGE POLES
Model for the pomeron
[DE93-617693] p 362 N94-10552

REGIONAL PLANNING
Summary of implementation and demonstration projects in bays and estuaries
[PB93-194637] p 265 N94-10846

REGISTERS (COMPUTERS)
Simulation of a parallel computer
[NAL-TR-1154] p 335 N94-10368
Wait-free linearization with an assertional proof
[CS-9208] p 323 N94-10878

REGOLITH
Cold press sintering of simulated lunar basalt
p 131 N94-12026
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110
Impact comminution of glasses: Implications for lunar regolith evolution p 461 N94-12159
Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites
p 430 N94-12163
Porosity and the ecology of icy satellites
p 431 N94-12186

REGRESSION ANALYSIS
Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714

REGULATIONS
Aircraft material fire testing and the creation of an international working group p 21 N94-10790
Development of a hypermedia knowledge base of aircraft fire safety regulations p 21 N94-10793
The future of aircraft cabin fire safety
p 22 N94-10797
Toxic chemical release inventory reporting Form R and instructions. Revised 1992 version. Section 313 of the Emergency Planning and Community Right-to-Know Act
[PB93-194140] p 264 N94-10836

REGULATORY MECHANISMS (BIOLOGY)
The organization of the suprachiasmatic circadian pacemaker of the rat and its regulation by neurotransmitters and modulators
[AD-A266113] p 301 N94-12417

REINFORCED PLASTICS
Advanced Materials for Lightweight Structures
[ESA-SP-336] p 56 N94-10001
Applications of continuous fiber reinforced thermoplastics in aircraft interiors p 18 N94-10775

REINFORCEMENT (PSYCHOLOGY)
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli
[AD-A265168] p 324 N94-11099

REINFORCEMENT (STRUCTURES)
Three-dimensional finite element analysis of explosive safety facilities: A technology assessment
[AD-A265700] p 35 N94-12562

REINFORCING FIBERS
Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012
Damping mechanisms in chemically vapor deposited SiC fibers
[NASA-TM-106334] p 66 N94-11135
An analysis of fiber-matrix interface failure stresses for a range of ply stress states
[NASA-TM-108999] p 67 N94-11276
Mechanical interaction between synthetic fiber and cement base matrix in FRC composites
[AD-A265310] p 73 N94-11686
Electronic and total energy properties of ternary and quaternary semiconductor compounds, alloys and superlattices
[NASA-CR-192905] p 405 N94-12570

RELATIVE BIOLOGICAL EFFECTIVENESS (RBE)
Potential health effects of space radiation
p 312 N94-11558

RELATIVISTIC EFFECTS
Efficiency of fast wave current drive for a weakly relativistic plasma
[DE93-012775] p 385 N94-10159
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
On the relativistic string size at finite temperature
[DE93-617658] p 409 N94-10394
Quasi-relativistic effects in barrier-penetration processes
[DE93-617730] p 410 N94-10721

RELATIVISTIC ELECTRON BEAMS
An experimental program for collective acceleration of ions using intense relativistic electron beams
[DE93-612205] p 371 N94-10316
Scattering of modulated Ultra-Relativistic Electron Beam (UREB) by atmospheric plasma
[DE93-620987] p 387 N94-10558

RELATIVISTIC PARTICLES
Diagnostic complex for the space-time analysis of energy and current of pulsed relativistic particles
[DE93-620980] p 362 N94-10649
Quantized conic sections; quantum gravity
[DE93-010950] p 411 N94-10956
Relativistic heavy-ion collisions
[DE93-014844] p 366 N94-11147
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211

RELATIVISTIC PLASMAS
Efficiency of fast wave current drive for a weakly relativistic plasma
[DE93-012775] p 385 N94-10159
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode
[DE93-620977] p 387 N94-10541
Filamentation instability of hot quark-gluon plasma with hard jet
[DE93-617679] p 388 N94-10882

RELATIVISTIC THEORY
Two fluid plasmas in the vicinity of a Schwarzschild black hole
[DE93-610264] p 385 N94-10284
From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535
On the doubling of hydrodynamic theorems in relativistic theory of superfluidity
[DE93-617895] p 148 N94-10717

RELATIVITY
Standard model status (in search of new physics)
[DE93-013288] p 410 N94-10528
From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535
The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587
Dimensional transition of the space-time at the minimum action near the planck scale
[DE93-754192] p 410 N94-10718
Explorations in quantum gravity: From one loop effective actions to two-dimensional theories p 413 N94-11822

RELAXATION (MECHANICS)
Viscous relaxation of the Moho under large lunar basins p 452 N94-12113

RELAXATION METHOD (MATHEMATICS)
A new heuristic for set covering problems
[INPE-5471-TDI/502] p 333 N94-12358

Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679

RELIABILITY

A reliable stability test for exponential polynomials
[MEMO-COSOR-92-48] p 341 N94-10168

RAMCAD (reliability, availability, and maintainability in computer-aided design)
[AD-A265143] p 331 N94-11679

RELIABILITY ANALYSIS

Bayesian reliability analysis with imprecise prior probabilities
[MEMO-COSOR-92-50] p 183 N94-10170

Investigation of alternate power source for Space Shuttle Orbiter hydraulic system
[NASA-CR-193229] p 46 N94-10911

Applying reliability models to the maintenance of Space Shuttle software p 330 N94-11434

Reliability analysis for FDDI dual homing networks
[AD-A266133] p 337 N94-11475

RELIABILITY ENGINEERING

A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience
[AGARD-LS-190] p 28 N94-11022

RELIEF MAPS

The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data
p 197 N94-11931

An ancient inner lake in Maadim Vallis
p 456 N94-12133

RELIEF VALVES

Dual valve plate two-way pressure relief valve
[AD-D015766] p 178 N94-10379

REMOTE CONSOLES

The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation
p 220 N94-12713

REMOTE CONTROL

Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087

TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134

Analysis of the alignment of a Schlieren system for tele-operation p 111 N94-10140

A portable controller for unmanned ground vehicles
[AD-A264963] p 181 N94-11290

REMOTE MANIPULATOR SYSTEM

Momentum management in redundant manipulators for vibration suppression
[NASA-CR-194112] p 180 N94-10821

REMOTE REGIONS

Space technology in remote health care
p 306 N94-11799

REMOTE SENSING

Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676

Current status of space activities in Asia Pacific region
p 35 N94-10677

Considerations for future regional space cooperation
p 35 N94-10678

Space research and remote sensing programmes in Bangladesh p 35 N94-10679

Space program in Indonesia p 36 N94-10681

Space programme in Malaysia p 36 N94-10685

National space programmes and application of the remote sensing data in Mongolia p 36 N94-10686

Status of remote sensing and Geographic Information System (GIS) applications in the Environment and Natural Resources (ENR) sector p 36 N94-10687

Russian space system for the Earth remote sensing
p 37 N94-10688

Sun-synchronous and geo-synchronous satellite data utilization for environmental studies p 37 N94-10689

Thailand ISY activities p 37 N94-10690

National space program in Australia
p 37 N94-10691

Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694

Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699

A browse facility for Earth science remote sensing data: Center director's discretionary fund final report
[NASA-TM-108413] p 419 N94-10723

Meteorological Satellite Center
[MSC-TN-26] p 190 N94-11079

An expert system shell for inferring vegetation characteristics: Prototype help system (Task 1)
[NASA-CR-193411] p 231 N94-11236

Remote surface water monitoring radio based telemetry system
[DE93-009643] p 41 N94-11282

Atmospheric correction of AVIRIS data in ocean waters
[AD-A264931] p 288 N94-11287

Enhancement effects in polarimetric radar returns: Phase difference statistics
[NASA-CR-193408] p 231 N94-11309

Extended ecosystem signatures with application to Eos synergism requirements
[NASA-CR-193398] p 266 N94-11374

Application of the airborne ocean color imager for commercial fishing
[NASA-TM-103986] p 231 N94-11378

Satellite inventory of Minnesota forest resources
[NASA-CR-193565] p 231 N94-11521

Landsat as a commercial enterprise
[INPE-5477-TAE/019] p 232 N94-11524

More sense for less cents: Cost effective servicing of remote sensing satellites p 348 N94-11572

Activities relating to understanding the initiation, organization and structure of moist convection in the Southeast environment
[NASA-CR-193829] p 285 N94-11598

Proceedings of First ERS-1 Symposium on Space at the Service of Our Environment, volume 1
[ESA-SP-359-VOL-1] p 232 N94-11704

Sea ice: A climate component p 232 N94-11705

Calibration and validation of the ERS-1 wind scatterometer p 232 N94-11706

Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707

The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

ERS-1 studies at the Department of Oceanography from Space, IFREMER/Brest (France) p 233 N94-11712

The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713

Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717

Wind and surface features in SAR images: The Canadian program p 234 N94-11718

Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719

Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720

SAR imaging of dynamical features in the English Channel p 234 N94-11721

Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722

SAR ocean imaging in the Gulf of Alaska
p 235 N94-11723

Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724

Comparisons of ERS-1 altimeter height data and the Fine Resolution Antarctic Model (FRAM)
p 235 N94-11725

Calibration results for the ERS-1, AIRSAR, and PHARS p 236 N94-11731

Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734

SAR interferometry experiments with ERS-1
p 237 N94-11735

SAR-interferometry applying ERS-1: Some preliminary test results p 237 N94-11736

Signatures of Antarctic firn by means of ERS-1 AMI and by field measurements p 237 N94-11737

Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738

Some results of the derivation of ice sheet elevations in Antarctica from ERS-1 altimeter data
p 237 N94-11739

Utilisation of ERS-1 data for mapping of Antarctica
p 237 N94-11740

Monitoring of the Greenland Ice Sheet using ERS-1 synthetic aperture radar imagery p 237 N94-11741

Preliminary evaluation of ERS-1 altimetry over Filchner-Ronne Ice Shelf, Antarctica
p 238 N94-11742

Investigations of Arctic ice-sheets and glaciers using ERS-1 SAR p 238 N94-11743

Spatial patterns in backscatter strength across the Greenland Ice Sheet p 238 N94-11744

Ice studies in the Barents Sea by ERS-1 SAR during SIZEX 92 p 238 N94-11745

Use of ERS-1 SAR to measure ice flux in the East Greenland current p 238 N94-11746

Validation of ERS-1 SAR measurements of sea ice during ARCTIC-1991 p 238 N94-11747

Arctic coastal polynya observations with ERS-1 SAR and DMSP SSM/I p 239 N94-11748

Sea ice deformation observed with ERS-1 SAR
p 239 N94-11749

Finnish ERS-1 Baltic Sea ice experiment in Winter 1992 p 239 N94-11750

Experiences from the Swedish sea ice programme during BEERS-1992 p 239 N94-11751

Remote sensing and global environment
p 191 N94-11895

Remote sensing and the air-sea boundary layers
p 191 N94-11896

Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898

Satellite observations of red tide events: Plans for EESI p 191 N94-11899

An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900

Remote sensing of the suspended matter distribution with high concentration in China Sea
p 192 N94-11901

Kuroshio observations by the HF ocean radar
p 192 N94-11904

Statistical study of HF ocean radar echo
p 139 N94-11905

Satellite derived sea surface temperature applications for Indian Ocean resources development
p 193 N94-11907

Exchange of bay water with ocean current monitored by the NOAA satellite p 193 N94-11908

A consideration on principal component analysis of satellite IR data p 193 N94-11909

Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911

Acoustic waveguide characteristics of the Indian Ocean north of equator p 193 N94-11912

Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919

The use of remote sensing data for coastal zone management and environment in Indonesia
p 196 N94-11927

Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

Analysis of the characteristic and mechanism of suspended matter transportation in Huanghe delta sea area using remote sensing techniques p 197 N94-11930

The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931

Ocean wave detection by SAR p 197 N94-11932

On the determination of the SAR ocean surface scattering patch size p 197 N94-11933

The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

Appearance, behavior, and oceanic structures of warm streamers in the Kuroshio Oyashio frontal region p 198 N94-11937

Warm streamers extended from Warm Core Rings (WCRs) and their role on fish migration and fishing ground formation p 198 N94-11938

The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

Characteristic scales and vortex features of mesoscale vortices observed by the satellites during the winter p 199 N94-11943

The use of CZCS for primary production estimate in the Pacific p 199 N94-11946

CZCS derived chlorophyll distribution in Antarctic water during austral summer p 199 N94-11947

Seasonal changes of phytoplankton distributions in the Northwest Pacific detected by Coastal Zone Color Scanner p 200 N94-11948

Satellite-derived oceanic features p 200 N94-11949

Particle dynamics in the western subarctic Pacific: Implications from CZCS imagery p 200 N94-11950

High-reflectance water mass in Off-Sanriku area observed by CZCS p 200 N94-11951

Physical processes of microwave backscattering from laboratory wind-wave surfaces p 200 N94-11952

Experiment and results of the Italian activity in the field of ocean microwave backscattering p 200 N94-11953

Measurements of ocean cross-section with a side-looking airborne radar p 201 N94-11954

Air-sea interaction: Fluxes, a review p 201 N94-11955

Scatterometer observations: Review p 201 N94-11956

Dependence of oceanic microwave emission on wind direction p 201 N94-11957

Surface roughness variations across the Iceland-Faroes frontal region observed by the GEOSAT altimeter and NOAA AVHRR p 201 N94-11958

The microwave backscattering from wind waves p 201 N94-11959

On the variability of wind speeds in the North Western Pacific observed by altimeter/GEOSAT and SSM/I/DMSP p 201 N94-11960

Observation of wind and waves by GEOSAT altimeter p 202 N94-11961

Wind field estimate by using one hour GMS data p 202 N94-11963

The Pacific responses exhibited by an OGCM to various wind fields p 202 N94-11964

Development of shipboard ocean lidar p 140 N94-11965

Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970

Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971

Optical characteristics in Tokyo Bay p 204 N94-11972

Atmospheric correction plans for SeaWiFS p 204 N94-11975

Distribution of mineral aerosols over the North Pacific p 204 N94-11976

Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978

Overwater atmospheric dispersion of volcanic smokes from Mt. Sakurajima observed in NOAA-AVHRR data p 205 N94-11979

Incident shortwave and longwave radiations over the western North Pacific and the Sea of Okhotsk derived from GMS-WEFAX images p 205 N94-11982

A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983

Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984

Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989

Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030

Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097

Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165

Automatic definition of spectral units in the equatorial regions of Mars p 432 N94-12234

Observing and modelling F-region ionospheric dynamics using the (O2) 7320A emission
[AD-A265407] p 279 N94-12419

Sampling and position effects in the Electronically Steered Thinned Array Radiometer (ESTAR)
[NASA-TM-108998] p 245 N94-12432

Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

Emissions of sulfur gases from marine and freshwater wetlands of the Florida Everglades: Rates and extrapolation using remote sensing p 269 N94-12457

Effects of inorganic sulfur addition on fluxes of volatile sulfur compounds in Sphagnum peatlands p 270 N94-12461

Proceedings of 1st ERS-1 Symposium on Space at the Service of Our Environment, Volume 2

REMOVAL
Environmentally Safe and Effective Processes for Paint Removal
[AGARD-R-791] p 126 N94-10613
Paint removal activities in the US Navy p 126 N94-10614
Paint removal activities in Canada p 126 N94-10615
Procedures without danger to the environment and efficiency (PSDEE) for the removal of paint. Point on the French activities concerning the removal of paint p 126 N94-10616
Paint removal activities in Germany p 126 N94-10617
The development of alternative paint removal techniques in the RAF p 126 N94-10618
Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services p 126 N94-10619
Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620
German Air Forces experiences with plastic media blasting and future requirements p 127 N94-10621
Plastic media blasting activities at Hill Air Force Base p 127 N94-10622
Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process p 127 N94-10623
Automated Laser Paint Stripping (ALPS) update p 127 N94-10624
Aquastrip (tm): An innovative paint removal technology p 127 N94-10625
Paint removal and surface cleaning using ice particles p 128 N94-10626
Paint removal using wheat starch blast media p 128 N94-10627
IATA taskforce: Paintstripping p 128 N94-10628
Selectively strippable paint schemes p 128 N94-10629

RENAL FUNCTION
Proceedings of the First Joint NASA Cardiopulmonary Workshop
[NASA-CP-10068] p 308 N94-11991
Fluid compartment and renal function alterations in the rat during 7 and 14 day head down tilt p 310 N94-12002
Physiological water model development p 316 N94-12367

RENORMALIZATION GROUP METHODS
On renormalization group flow in matrix model
[DE93-613050] p 409 N94-10413

REPLENISHMENT

The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars p 463 N94-12169

REPORTS

A comparison of high and low-impact reports of investigation on adjudicators' decision making: A pilot study [AD-A265747] p 416 N94-10298

REPUBLIC OF SOUTH AFRICA

A structural and petrographic investigation of the pretoria saltpan impact structure p 282 N94-12102

Geophysical signature of the Pretoria saltpan impact structure and a possible satellite crater p 282 N94-12103

RESEARCH AIRCRAFT

Measuring human performance on NASA's microgravity aircraft p 317 N94-11537

RESEARCH AND DEVELOPMENT

Advanced Materials for Lightweight Structures [ESA-SP-336] p 56 N94-10001

The EUREKA project portfolio in new materials p 56 N94-10002

Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023

Fibre optic strain and temperature measurement in composite materials: A review of the OSTIC programme p 65 N94-10066

The Netherlands innovation oriented research programme on polymer composites and special polymers 1985-1993 p 65 N94-10067

Protein, glass, aerosol research, containerless processing and diagnostics technology for microgravity application p 106 N94-10112

The NASA Lewis Research Center SBIR program: An assessment [NASA-TM-106205] p 485 N94-10356

Recommendations for future research in hypersonic instrumentation p 4 N94-10433

Future material development trends for commercial airplane interiors p 21 N94-10792

Advanced aircraft materials research and development plan p 22 N94-10796

The future of aircraft cabin fire safety p 22 N94-10797

National patterns of R and D resources, 1992 [NSF-92-330] p 422 N94-11186

NASDA activities in space solar power system research, development and applications p 54 N94-11413

Quality assurance in basic research and R/D [DE93-010825] p 183 N94-11647

The 27th International Applied Military Psychology Symposium: A Focus on Decision Making Research [AD-A265278] p 313 N94-11701

AGARD highlights 92/2, September 1992 [AGARD-HIGHLIGHTS-92/2] p 497 N94-11820

Integrating the services' imagery architectures [AD-A265487] p 171 N94-12335

National SBIR Phase 3 Commercialization Conference [AD-A266083] p 417 N94-12410

Elementary particle physics and high energy phenomena [DE93-013971] p 370 N94-12609

RESEARCH FACILITIES

Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1 [ESA-SP-333-VOL-1] p 99 N94-10070

Description of the liquid structure facility architecture and experimental demonstration of the diagnostic capabilities p 39 N94-10118

The electron beam furnace: A new facility for materials science research p 109 N94-10126

Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128

Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135

The advanced fluid physics module: How to achieve scientific goals for Spacelab D2 p 39 N94-10136

Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180

Crystal growth in the Zone Melting Facility (ZMF) p 119 N94-10213

The critical facility on IML-1 p 44 N94-10250

Numerical wind tunnel project and computational fluid dynamics at National Aerospace Laboratory, Japan [NAL-TM-648T] p 149 N94-10861

Motion and spatial disorientation systems: Special research capabilities [AD-A265155] p 303 N94-11097

Five biomedical experiments flown in an Earth orbiting laboratory: Lessons learned from developing these experiments on the first international microgravity mission from concept to landing p 302 N94-11556

Quality assurance in basic research and R/D [DE93-010825] p 183 N94-11647

RESEARCH MANAGEMENT

Canada's longterm space plan and ISY activities p 37 N94-10692

National Institute of Health Almanac, 1992 [PB93-183556] p 303 N94-10828

Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106

Quality assurance in basic research and R/D [DE93-010825] p 183 N94-11647

The Department of Clinical Investigation, reports control symbol MED-300(R-1) [AD-A264969] p 304 N94-11649

RESEARCH PROJECTS

The EUREKA project portfolio in new materials p 56 N94-10002

The Netherlands innovation oriented research programme on polymer composites and special polymers 1985-1993 p 65 N94-10067

Pakistan Space and Upper Atmosphere Research Commission p 37 N94-10693

Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106

Facts about the US Antarctic program [NSF-92-134] p 279 N94-12568

RESEARCH VEHICLES

Development of a shuttle AUV for oceanographic measurement p 217 N94-12692

RESIDUAL STRESS

Extensions of some guidelines for the mechanical design of coaxial compression pin seals [DE93-012385] p 177 N94-10348

Fracture behavior of surface-modified ceramics [DE93-013707] p 88 N94-10710

Sensitivities of calculated residual stress to separation distances of two simultaneous events [DE92-019571] p 98 N94-10751

Computational simulation of hot composite structures [NASA-TM-106200] p 186 N94-10762

Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347

RESIDUES

Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045

Composition and modal frequencies of hypervelocity particles less than 1 millimeter in diameter in low-Earth orbit p 429 N94-12063

RESIN MATRIX COMPOSITES

Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030

Heat analysis of thermoplastic components during the initial stages of manufacturing: A probabilistic approach p 60 N94-10031

Application of advanced thermoplastics p 60 N94-10033

Low cost thermoplastic composites for structural applications: Design concepts using new materials and processes p 60 N94-10034

Tape winding of thermoplastic composites p 60 N94-10035

Silicon-based elementary particle tracking system: Materials science and mechanical engineering design [DE93-012630] p 65 N94-10740

Dry in-line thermoplastic matrix impregnation, phase 1 [AD-A265016] p 67 N94-11221

An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276

RESIN TRANSFER MOLDING

Design and manufacturing of CFRP rings by RTM p 59 N94-10025

RESISTANCE

Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid) [AD-A265288] p 95 N94-12585

RESISTANCE HEATING

Crystal growth in the Zone Melting Facility (ZMF) p 119 N94-10213

RESONANCE

Progress in zirconium resonance ionization spectroscopy [DE93-011881] p 76 N94-11075

The IR properties of ringed galaxies and the IRAS database [NASA-CR-194286] p 426 N94-11590

Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems [AD-A265161] p 313 N94-11890

RESONANCE FLUORESCENCE

Squeezing in phase-conjugated resonance fluorescence p 376 N94-10576

RESONANCE SCATTERING

Linear antenna of an arbitrary orientation and position in cylindric screen [DE93-621353] p 134 N94-11035

RESONANT FREQUENCIES

Laboratory study on the natural modes of a rotating two-phase fluid system subject to axial excitation p 106 N94-10106

Boundary element method for eigenvalue problems of thin plates [ITN-93-85199] p 343 N94-10392

On the stability of stationary regimes in a distributed autovibration system with external feedback [DE93-620979] p 141 N94-10543

Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578

Magnetic Earth Ionosphere Resonant Frequencies (MEIRF) project [NASA-CR-193182] p 276 N94-11355

The laser second threshold: Its exact analytical dependence on detuning and relaxation rates [DE93-619706] p 175 N94-11633

Nonlinear effects in ferrite tuned cavities [DE93-014136] p 374 N94-12785

RESONANT TUNNELING

Effect of effective mass differences on the tunneling current-voltage behaviour of a resonant diode in the presence of space charge build-up [DE93-613817] p 142 N94-10799

RESONATORS

Quantum processes in resonators with moving walls p 380 N94-10612

Dielectric resonator [US-PATENT-4,580,116] p 141 N94-10668

Conversion of the four-strap array in D3-D to a tunable traveling wave antenna [DE93-012085] p 137 N94-11453

RESOURCE ALLOCATION

ACARA user's manual [NASA-TM-106277] p 183 N94-11167

RESOURCES MANAGEMENT

Current status of space activities in Asia Pacific region p 35 N94-10677

Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846

Information resources management long-range plan, FY1994 [DE93-013898] p 420 N94-11588

Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan [PB93-191633] p 267 N94-11864

The use of remote sensing data for coastal zone management and environment in Indonesia p 196 N94-11927

The requirement for global training programmes to meet the new remote sensing technology p 196 N94-11929

Integrating the services' imagery architectures [AD-A265487] p 171 N94-12335

Quality assurance for environmental chemistry: 1991, volume 2 [DE93-011792] p 272 N94-12780

RESPIRATION

Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

RESPIRATORY DISEASES

Allowable exposure limits for carbon dioxide during extravehicular activity [NASA-TM-103832] p 315 N94-11375

RESTORATION

Summary of implementation and demonstration projects in bays and estuaries [PB93-194637] p 265 N94-10846

RESUSCITATION

Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548

RETINA

Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision [AD-A265065] p 331 N94-11652

RETINAL IMAGES

Visual psychophysics of egomotion [AD-A265253] p 304 N94-11681

RETRACTABLE EQUIPMENT

In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT) [NAL-TR-1165] p 43 N94-10859

RETROREFLECTORS

Galileo EM-2 contributions to the lunar control network p 468 N94-12198

REVENUE

Survey to determine the value of DYNA [DE93-012390] p 321 N94-10267

Federal Aviation Administration aviation forecasts
[AD-A265611] p 2 N94-12578

REVERSE ENGINEERING

Reuse: A knowledge-based approach
p 329 N94-11430

Myths and realities: Defining re-engineering for a large organization p 330 N94-11436

REVERSE FIELD PINCH

Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747

Magnetohydrodynamic computation of feedback stabilization of resistive-shell instabilities in the reversed field pinch
[DE93-013466] p 388 N94-10852

Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128

Macroscopic behaviour and discrete dynamo of RFP plasma in high theta discharge
[DE93-771408] p 392 N94-11239

REVIEWING

Research on two phase flow in microgravity
p 162 N94-12554

REYNOLDS NUMBER

Numerical calculation of scramjet inlet flow
[NAL-TR-1174T] p 27 N94-10370

Regeneration of near-wall turbulence structures
p 158 N94-12308

REYNOLDS STRESS

A local dynamic model for large eddy simulation
p 155 N94-12285

Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288

Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290

Direct numerical simulation of turbulent flow over a backward-facing step p 156 N94-12296

Reynolds stress closure modeling in wall-bounded flows p 157 N94-12298

Application of a Reynolds stress model to separating boundary layers p 157 N94-12299

RHENIUM

Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938

RHENIUM ISOTOPES

Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182

Re-Os dating of 3AB iron meteorites
p 432 N94-12237

RHEOLOGY

Improving reservoir conformance using gelled polymer systems
[DE93-014532] p 88 N94-10749

A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585

Quantifying the effect of rheology on plan-view shapes of lava flows p 282 N94-12116

Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314

RHYOLITE

Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072

Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Petrogenesis
p 281 N94-12075

Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times
p 281 N94-12076

RHYTHM (BIOLOGY)

The 2nd Annual Meeting of the Society for Research on Biological Rhythms
[AD-A264869] p 303 N94-10872

RIBLETS

Coherent structure in near wall turbulence with riblets
p 165 N94-12628

RIBS (SUPPORTS)

Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves
p 165 N94-12627

RICCATI EQUATION

A new approach to the I/N-expansion for the Dirac equation
[DE93-617647] p 349 N94-10833

RIDING QUALITY

Active landing gear control for improved ride quality during ground roll p 27 N94-11345

RIEMANN MANIFOLD

From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535

RING GALAXIES

The IR properties of ringed galaxies and the IRAS database
[NASA-CR-194286] p 426 N94-11590

RING LASERS

Semiconductor ring lasers
[DE93-012386] p 174 N94-11005

RING STRUCTURES

Design and manufacturing of CFRP rings by RTM
p 59 N94-10025

The ring structure of chiral operators for minimal models coupled to 2D gravity
[DE93-613119] p 409 N94-10500

Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023

Yana ring structure, North-Eastern Siberia: A possible counterpart of coronae on Venus p 282 N94-12121

RING WINGS

Simulated wake characteristics of tapered annular wings by a discrete vortex method
[NAL-TR-1156] p 13 N94-10855

Simulated and experimental aerodynamic characteristics of tapered annular wings
[NAL-TR-1157] p 13 N94-10856

RISK

Report on Subgroup on Data Banks for Risk Assessment
[DE93-012150] p 418 N94-10646

RIVER BASINS

Modeling present and future river runoff using global atmospheric models
[AD-A265274] p 285 N94-11685

Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system
p 165 N94-12624

RIVERS

Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928

Analysis of the characteristic and mechanism of suspended matter transportation in Huanghe delta sea area using remote sensing techniques
p 197 N94-11930

Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484

Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data
p 212 N94-12664

Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744

ROBOT ARMS

Payload sensitivity in coupled bending and torsional vibrations in flexible beams
[MEMO-1102] p 184 N94-10161

Force reflection with compliance control
[NASA-CASE-NPO-18668-1-CU] p 179 N94-10654

Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670

Momentum management in redundant manipulators for vibration suppression
[NASA-CR-194112] p 180 N94-10821

An adaptive and robust control for motion coordination of two-cooperating robot manipulators
p 340 N94-11825

ROBOT CONTROL

Position and force control of a vehicle with two or more steerable drive wheels
[DE93-012512] p 177 N94-10269

Force reflection with compliance control
[NASA-CASE-NPO-18668-1-CU] p 179 N94-10654

Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670

Sensor abstractions to support many-robot systems
[AD-A265907] p 180 N94-10803

Momentum management in redundant manipulators for vibration suppression
[NASA-CR-194112] p 180 N94-10821

The development of an interactive synthesis tool for intelligent controllers of modular, reconfigurable robots
p 339 N94-10898

Basic experiment on an ultrasonic method of localization
[DE93-754295] p 358 N94-11042

Development and evaluation of a predictive algorithm for telerobotic task complexity p 341 N94-11562

The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874

Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics
[DE93-012823] p 340 N94-12543

Experiments in mobile robot navigation and range imaging
[DE93-013280] p 341 N94-12598

ROBOT DYNAMICS

The development of an interactive synthesis tool for intelligent controllers of modular, reconfigurable robots
p 339 N94-10898

Trajectory pattern inverse dynamics and control of nonlinear dynamics systems with application to flexible structures p 181 N94-11219

Space Station maintenance studies using plaid graphics p 335 N94-11578

Robotic servicing on Earth orbiting satellites
p 45 N94-11579

An adaptive and robust control for motion coordination of two-cooperating robot manipulators
p 340 N94-11825

Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics
[DE93-012823] p 340 N94-12543

ROBOT SENSORS

Experiments in mobile robot navigation and range imaging
[DE93-013280] p 341 N94-12598

ROBOTICS

Lightweight CFRP frame structures for a Rotex-derived manipulator system p 56 N94-10005

Position and force control of a vehicle with two or more steerable drive wheels
[DE93-012512] p 177 N94-10269

Preliminary system design of a Three Arm Capture Mechanism (TACM) flight demonstration article
[NASA-CR-192573] p 177 N94-10341

Task planning with uncertainty for robotic systems
[NASA-CR-193253] p 338 N94-10638

Sensor abstractions to support many-robot systems
[AD-A265907] p 180 N94-10803

Mechanical analysis of parallel manipulators with simulation, design, and control applications
[ISBN-0-315-72013-1] p 181 N94-11156

Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527

Space Station maintenance studies using plaid graphics p 335 N94-11578

Robotic servicing on Earth orbiting satellites
p 45 N94-11579

The rational behavior model: A multi-paradigm, tri-level software architecture for the control of autonomous vehicles
[AD-A265175] p 332 N94-11874

ROBOTS

Position and force control of a vehicle with two or more steerable drive wheels
[DE93-012512] p 177 N94-10269

Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services
p 126 N94-10619

Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620

Plastic media blasting activities at Hill Air Force Base
p 127 N94-10622

Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process
p 127 N94-10623

Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670

Sensor abstractions to support many-robot systems
[AD-A265907] p 180 N94-10803

Development and evaluation of a predictive algorithm for telerobotic task complexity p 341 N94-11562

Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577

Robotic servicing on Earth orbiting satellites
p 45 N94-11579

ROBUSTNESS (MATHEMATICS)

RAMCAD (reliability, availability, and maintainability in computer-aided design)
[AD-A265143] p 331 N94-11679

ROCK INTRUSIONS

Giant radiating dyke swarms on Earth and Venus
p 283 N94-12236

ROCKET ENGINE DESIGN

In-reactor testing of the closed cycle gas core reactor: The Nuclear Light Bulb concept
[DE93-004053] p 370 N94-10149

Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938

Applying design principles to fusion reactor configurations for propulsion in space
[NASA-TM-108247] p 47 N94-11053

ROCKET ENGINES
Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump
[NAL-TR-1155] p 178 N94-10369
Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber
[NASA-TP-3380] p 55 N94-12569

ROCKET EXHAUST
Ultraviolet plume instrument description and plume data reduction methodology
[AD-A266141] p 54 N94-11643
The 1991 version of the plume impingement computer program. Volume 2: User's input guide
[NASA-CR-194191] p 166 N94-12774
The 1991 version of the plume impingement computer program. Volume 1: Description
[NASA-CR-194192] p 166 N94-12775

ROCKET NOZZLES
Development of a high specific 1.5 to 5 kW thermal arcjet
[NASA-CR-193133] p 47 N94-11354

ROCKET THRUST
In-reactor testing of the closed cycle gas core reactor: The Nuclear Light Bulb concept
[DE93-004053] p 370 N94-10149

ROCKS
Oxygen isotopes as tracers of tektite source rocks: An example from the Ivory Coast tektites and Lake Bosumtwi Crater p 430 N94-12146

ROCKY MOUNTAINS (NORTH AMERICA)
Large eddy simulations of the atmospheric boundary layer east of the Colorado Rockies p 277 N94-11465

ROTARY WING AIRCRAFT
Smart materials for helicopter rotor active control p 27 N94-11321

ROTARY WINGS
Quantifying disbond area p 61 N94-10038
Determining XV-15 aeroelastic modes from flight data with frequency-domain methods
[NASA-TP-3330] p 25 N94-10935
Performance and rotor loads measurements of the Lynx XZ170 helicopter with rectangular blades
[NASA-TM-104000] p 1 N94-10936
Smart materials for helicopter rotor active control p 27 N94-11321

ROTATING BODIES
Reduced gravity multibody dynamics testing
[NASA-CR-192589] p 125 N94-11483
The magnetic field of rotating bodies
[DE93-619769] p 427 N94-11812
Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359
Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620

ROTATING FLUIDS
Laboratory study on the natural modes of a rotating two-phase fluid system subject to axial excitation p 106 N94-10106
SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523

ROTATING PLASMAS
Kinetic approach to long wave length modes in rotating plasmas
[DE93-771286] p 388 N94-10807
The role of plasma rotation on MHD instabilities in tokamaks
[DE93-013486] p 393 N94-11512

ROTATION
Effect of rotation on microgravity floating-zone crystal growth p 101 N94-10080
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field
[DE93-620983] p 391 N94-11174
Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

ROTOR AERODYNAMICS
A grid generation method to calculate the flow field in a three-dimensional cascade of blades
[NAL-TR-1158] p 147 N94-10364
Solving the inverse problem for incompressible potential flow through two-dimensional cascades
[NAL-TR-1162] p 147 N94-10365

ROTOR BLADES (TURBOMACHINERY)
A grid generation method to calculate the flow field in a three-dimensional cascade of blades
[NAL-TR-1158] p 147 N94-10364
Solving the inverse problem for incompressible potential flow through two-dimensional cascades
[NAL-TR-1162] p 147 N94-10365
Viscous analysis of three-dimensional rotor flows using a multigrid method
[NASA-TM-106266] p 152 N94-11481

ROTORS
Dynamic tester for rotor seals and bearings
[NASA-CASE-MFS-28493-1] p 33 N94-10669
Development of passive superconducting bearings. Phase 3
[AD-A266050] p 180 N94-10706
A comparison between numerically modelled and experimentally measured loss mechanisms in wave rotors
[NASA-TM-106279] p 29 N94-11255

ROUTES
Federal Aviation Administration aviation forecasts
[AD-A265611] p 2 N94-12578

ROVING VEHICLES
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323

RUBIDIUM
Disciplined rubidium oscillator with GPS selective availability p 353 N94-10977

RUN TIME (COMPUTERS)
Massively parallel hydrodynamics on unstructured grids
[DE93-007325] p 153 N94-11601

RUNWAYS
The Memphis Precision Runway Monitor Program Instrument Landing System final approach study
[AD-A266035] p 23 N94-11103

RURAL AREAS
The Canadian experience: Using telemedicine for the support of medical care at remote sites p 305 N94-11789
The revitalization of health and education in Rural America Act of 1992 p 308 N94-11810

RUSSIAN FEDERATION
Space nuclear technology
[DE93-010184] p 45 N94-10299

RUSTING
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732

S

S GLASS
Hydrostatic testing of thick laminated composite cylinders for performance model validation
[DE93-012728] p 184 N94-10264

S WAVES
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS
[AD-A265959] p 275 N94-11102

S-N DIAGRAMS
Development of a fatigue analysis approach for CFRP structures under acoustic loading p 58 N94-10018

SAFETY
Safety of high speed ground transportation systems: X2000 US demonstration vehicle dynamics trials, preliminary test report, October 1992 - January 1993
[PB93-194645] p 422 N94-10736

SAFETY MANAGEMENT
Achievements and challenges of Space Station Freedom's safety review process
[NASA-TM-106199] p 40 N94-10640
Health and safety issues for aerospace workers in the use of advanced materials p 21 N94-10795
The future of aircraft cabin fire safety p 22 N94-10797

SAGNAC EFFECT
Interferometry with particles of non-zero rest mass
[DE93-613518] p 409 N94-10501

SALINITY
Shear, strain and thermohaline vertical fine structure in the upper ocean
[AD-A265961] p 289 N94-12348

SALMONELLA
Compatibility tests for biological specimens to on-board experiments in the Space Shuttle flight
[NASDA-CNT-930003] p 301 N94-12278

SALTS
Aluminum and membrane channels
[AD-A265241] p 300 N94-11020
Modeling void growth and movement with phase change in thermal energy storage canisters
[NASA-TM-106288] p 163 N94-12576

SAMARIUM ISOTOPES
Radiogenic age and isotopic studies
[DE93-610548] p 274 N94-10407

SAMPLERS
Analytical method for water vapor collection and analysis in aircraft cabin fires
[DOT/FAA/CT-TN93/33] p 22 N94-12575

SAMPLING
Analytical method for water vapor collection and analysis in aircraft cabin fires
[DOT/FAA/CT-TN93/33] p 22 N94-12575
Optimal hemicube sampling
[DE93-010499] p 334 N94-12591

SANDS
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942
A simple model of clastic sediments on Mars p 460 N94-12155

SANDSTONES
Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters
[DE93-011952] p 150 N94-11026
In situ secondary ion mass spectrometry analysis
[DE93-012185] p 76 N94-11140
Si-29 NMR spectroscopy of naturally-shocked quartz from Meteor Crater, Arizona: Correlation to Kieffer's classification scheme p 80 N94-12087

SANDWICH STRUCTURES
Low cost and thermally stable sandwich design for FIRST p 57 N94-10009
Design and manufacturing of filament wound thrust cylinder p 57 N94-10010
Development tests for a high stability optical bench p 62 N94-10047
Adaptive structure design employing shape memory actuators p 70 N94-11331

SAPPHIRE
Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930

SARSAT
Low cost high efficiency GaAs monolithic RF module for SARSAT distress beacons
[NASA-CR-194235] p 146 N94-12773

SATELLITE ALTIMETRY
Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate
[NASA-TM-108253] p 43 N94-10699
Proceedings of First ERS-1 Symposium on Space at the Service of Our Environment, volume 1
[ESA-SP-359-VOL-1] p 232 N94-11704
Calibration of ERS-1 altimetry over the North Sea p 234 N94-11716
Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722
Comparisons of ERS-1 altimeter height data and the Fine Resolution Antarctic Model (FRAM) p 235 N94-11725
Analysis of ERS-1 altimeter data over the polar ice sheets p 237 N94-11738
Some results of the derivation of ice sheet elevations in Antarctica from ERS-1 altimeter data p 237 N94-11739
Preliminary evaluation of ERS-1 altimetry over Filchner-Ronne Ice Shelf, Antarctica p 238 N94-11742
The height calibration of the ERS-1 radar altimeter p 241 N94-11764
First results for the simultaneous estimation of the geoid and the sea surface topography by ERS-1 altimeter data p 241 N94-11765
Separation of geoid and sea surface topography in shallow water regions: A first ERS-1 radar altimeter data evaluation p 242 N94-11766
A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767
An analysis of the gravity field in the Norwegian Sea and mapping of the ice cap of Greenland using ERS-1 altimeter measurements p 242 N94-11768
Space and time variability of the Gulf Stream using ERS-1 ALT-OPR02 data p 242 N94-11769
ERS-1 radar altimetry over the North Atlantic p 242 N94-11772
The effect of rain on ERS-1 altimeter data p 243 N94-11773
Preliminary geophysical investigation with ERS-1 35-day altimeter data p 243 N94-11775
Arctic geodynamics: Continental shelf and deep ocean geophysics. ERS-1 satellite altimetry: A first look p 243 N94-11776
Quick-look monitoring of the sea surface with ERS-1 fast delivery altimeter data p 243 N94-11777
The Earth's gravity model for the ERS 1 commissioning phase p 243 N94-11778
Global wave height climatologies from ERS-1 altimeter data, and comparisons with those from GEOSAT p 244 N94-11781
The 1992 El Nino viewed by ERS-1 altimetry p 244 N94-11784
Using transponders with the ERS-1 altimeter to measure orbit altitude to +/- 3 cm p 244 N94-11785

Ocean circulation revealed by altimeter data p 245 N94-11786

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

Surface roughness variations across the Iceland-Faroes frontal region observed by the GEOSAT altimeter and NOAA AVHRR p 201 N94-11958

On the variability of wind speeds in the North Western Pacific observed by altimeter/GEOSAT and SSM/I/DMSP p 201 N94-11960

Observation of wind and waves by GEOSAT altimeter p 202 N94-11961

ERS-1 altimetry of inland water and land p 246 N94-12475

Use of ERS-1 wind and wave products in operational meteorology p 250 N94-12502

Comparison of ERS-1 SAR images of the Western Mediterranean to in situ oceanographic data: PRIM-1 Cruise (May 1992) p 255 N94-12529

Topography of the Western Mediterranean from the ERS-1 altimeter p 255 N94-12531

Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

Theory and oceanographic applications of satellite altimeter measurements p 208 N94-12641

Analysis of collinear passes of satellite altimeter data p 208 N94-12642

Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643

Comparison of GEOSAT sea surface height and model-simulated surface dynamic height p 208 N94-12644

Pseudo magnetic anomaly derived from satellite altimetry and its application to the tectonics in the North Fuji Basin p 208 N94-12645

Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother p 209 N94-12648

Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649

Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650

SATELLITE ATMOSPHERES

Sources of Na for the Io atmosphere p 455 N94-12127

Geomorphology of Triton's polar materials p 466 N94-12185

SATELLITE ATTITUDE CONTROL

Project of an attitude control system (three axis) of a satellite using the LQG/LTR methodology [INPE-5473-TDI/504] p 44 N94-12356

SATELLITE COMMUNICATION

Potential markets for advanced satellite communications [NASA-CR-191145] p 41 N94-10512

Space Activities in the Asia Pacific Region [JTN-93-80421] p 35 N94-10676

Current status of space activities in Asia Pacific region p 35 N94-10677

Space programme in Malaysia p 36 N94-10685

National space program in Australia p 37 N94-10691

PARTNERS p 38 N94-10695

The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting [NASA-CP-3218] p 350 N94-10963

Two way time transfer results at NRL and USNO p 353 N94-10983

New technology applied to telemedicine p 306 N94-11796

Space technology in remote health care p 306 N94-11799

Use of satellite telecommunications for telemedicine p 308 N94-11807

Use of low orbital satellite communications systems for humanitarian programs p 308 N94-11808

SATELLITE CONTROL

Pre-operation analysis of ERS-1 tracking and operation, part 2-A [NASDA-CNT-930001-PT-2-A] p 230 N94-11129

Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130

Flight data analysis of Japanese Earth Resources Satellite-1 (JERS-1) [NASDA-CNT-930004] p 245 N94-12279

SATELLITE DESIGN

Design and development of a CFRP central cylinder for satellites p 56 N94-10007

Japanese space activities p 36 N94-10682

Overview of KITSAT p 36 N94-10683

Korea space program p 36 N94-10684

Space transportation alternatives for large space programs: The International Space University Summer Session, 1992 [NASA-TM-106271] p 40 N94-10811

SATELLITE GROUND SUPPORT

Pre-operation analysis of ERS-1 tracking and operation, part 2-A [NASDA-CNT-930001-PT-2-A] p 230 N94-11129

Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130

SATELLITE GUIDANCE

Pre-operation analysis of ERS-1 tracking and operation, part 2-A [NASDA-CNT-930001-PT-2-A] p 230 N94-11129

Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130

SATELLITE IMAGERY

Space research and remote sensing programmes in Bangladesh p 35 N94-10679

Space program in Indonesia p 36 N94-10681

Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694

Statistical study on the regional and seasonal distribution of fog in the far east region by using GMS imagery p 190 N94-11082

TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991 [INPE-5497-TDI/512] p 230 N94-11179

Bayesian model for pictorial data fusion of satellite image [INPE-5457-TDI/499] p 345 N94-11193

Satellite inventory of Minnesota forest resources [NASA-CR-193565] p 231 N94-11521

Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707

Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720

Disintegrating ice front of Shirase Glacier, East Antarctica p 210 N94-12654
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663
Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664
A basic consideration for remote sensing using microwave radars on a satellite p 212 N94-12665
Migration of operational ice analysis and forecasting to a workstation platform at the Joint Ice Center p 212 N94-12666
Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668
Simple and low cost image processing system for satellite remote sensing data p 212 N94-12669
Validation test system for sea surface temperature detected by satellites in Mutsu Bay p 213 N94-12670
Sea surface temperature images of Geostationary Meteorological Satellite (GMS) and sea truth data from ferry boats p 213 N94-12671
Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673
Further study of the Non-Regression-Coefficient SST retrieval method p 213 N94-12674
Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675
Observation of warm current at the boundary from north equatorial current to Kuroshio by NOAA/AVHRR p 214 N94-12676
Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution p 214 N94-12677
Satellite observations of the northeast monsoon coastal current p 214 N94-12678
Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679
Sea surface temperature difference between NOAA/AVHRR and in-situ observation p 215 N94-12680
Application of NOAA AVHRR data to fisheries p 215 N94-12681
Statistical features of mesoscale eddies at the Kuroshio front p 215 N94-12682
Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683
A study of front dynamics off northeastern Taiwan based on the NOAA-AVHRR satellite remote sensing data p 215 N94-12684
Satellite thermal variations of Kuroshio in relation to storm floods p 215 N94-12685
Frontal zones in Pacific Ocean: Satellite and ship data analysis p 216 N94-12687
Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688
Observation of cold coastal water with high turbidity around the southwestern tip of Korean Peninsula p 216 N94-12689
On the error characteristics of the sea surface temperature observed by satellite p 216 N94-12690
Remote sensing of polluting focal points and coastal disturbances in the Gulf of Arauco and adjacent bays, central Chile p 217 N94-12695
Role of remote sensing and its cost effectiveness in site selection for coastal aquaculture p 217 N94-12697
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701
Estimation of areal evapotranspiration using LANDSAT TM data: Kitami City, Hokkaido, Japan p 219 N94-12703
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation p 219 N94-12704
A method to minimize reference data in classifying satellite remote sensing data into land cover classes p 219 N94-12705
Study on air-sea interactions in the OMLET (Ocean Mixed Layer Experiment) area using satellite remote sensing p 220 N94-12710
Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data p 220 N94-12711
Coastal upwelling monitored by satellite data: Methodologies and results p 220 N94-12712
The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713
Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714
Satellite and moored buoy observations of polar frontal system over the Yamato Rise in the Japan Sea p 221 N94-12715
Variability of the Kuroshio observed from satellite thermal imagery p 221 N94-12717
SST assimilation: Eastern Mediterranean case study p 221 N94-12719
Mapping of high density area of benthic diatom in Ariake Sea p 222 N94-12720
Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724
Influence of the Kuroshio warm-core rings on hydrographic and fishery conditions off southern Kuril Islands p 224 N94-12737
Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

SATELLITE NAVIGATION SYSTEMS
Comparison of GPS and GLONASS common-view time transfers p 24 N94-10967

SATELLITE NETWORKS
Use of low orbital satellite communications systems for humanitarian programs p 308 N94-11808

SATELLITE OBSERVATION
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
Space research and remote sensing programmes in Bangladesh p 35 N94-10679
Space program in Indonesia p 36 N94-10681
Space programme in Malaysia p 36 N94-10685
National space programmes and application of the remote sensing data in Mongolia p 36 N94-10686
Russian space system for the Earth remote sensing p 37 N94-10688
Sun-synchronous and geo-synchronous satellite data utilization for environmental studies p 37 N94-10689
Thailand ISY activities p 37 N94-10690
National space program in Australia p 37 N94-10691
Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694
Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714
Satellite-derived photosynthetically available and total solar irradiance at the surface during FIFE's intensive field campaigns p 230 N94-10954
Estimating Photosynthetically Available Radiation (PAR) at the Earth's surface from satellite observations p 230 N94-10955
Ultraviolet plume instrument description and plume data reduction methodology
[AD-A266141] p 54 N94-11643
Utilisation of ERS-1 data for mapping of Antarctica p 237 N94-11740
A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767
The Earth's gravity model for the ERS-1 commissioning phase p 243 N94-11778
Using transponders with the ERS-1 altimeter to measure orbit altitude to +/- 3 cm p 244 N94-11785
Satellite observation of atmospheric tracer components: JEM/POP p 130 N94-11836
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
Satellite observations of red tide events: Plans for EESI p 191 N94-11899
An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900
Remote sensing of the suspended matter distribution with high concentration in China Sea p 192 N94-11901
Scatterometer observations: Review p 201 N94-11956
Overwater atmospheric dispersion of volcanic smokes from Mt. Sakurajima observed in NOAA-AVHRR data p 205 N94-11979
Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490
Assessment of ERS-1 SAR data for soil moisture estimation p 249 N94-12492
Temporal monitoring of soil moisture using ERS-1 SAR data p 249 N94-12493
Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests p 249 N94-12494
Seeing the Black Forest by ERS-1 and AIRSAR: A comparison p 249 N94-12495
TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497
Studies of dynamical processes affecting the distribution of stratospheric ozone
[NASA-CR-193477] p 279 N94-12560
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2
[JTN-93-80419] p 207 N94-12635
Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746
Radar observation of internal waves field in the north-west Pacific p 226 N94-12747
Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753
Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754
The algorithm of primary production determination p 228 N94-12761
Non-image visible polarization remote sensing of the ocean p 229 N94-12762
Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766
Radiometer offsets and count conversion coefficients for the Earth Radiation Budget Experiment (ERBE) spacecraft for the years 1987, 1988, and 1989
[NASA-CR-191489] p 286 N94-12772

SATELLITE ORBITS
Satellite situation report, volume 32, no. 1
[NASA-TM-109233] p 42 N94-10562
Satellite situation report, volume 32, no. 2
[NASA-TM-109234] p 42 N94-10563
Satellite situation report, volume 31, no. 4
[NASA-TM-109232] p 39 N94-10659
ERS-1 precise orbit determination p 244 N94-11779
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057
Regional orbit precision in the Mediterranean area p 39 N94-12530

SATELLITE ORIENTATION
Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

SATELLITE POWER TRANSMISSION
Space transportation alternatives for large space programs: The International Space University Summer Session, 1992
[NASA-TM-106271] p 40 N94-10811
Construction and testing of a space ready rectenna
[NASA-CR-193310] p 137 N94-11357

SATELLITE SOLAR POWER STATIONS
Space transportation alternatives for large space programs: The International Space University Summer Session, 1992
[NASA-TM-106271] p 40 N94-10811

SATELLITE SOUNDING
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694
TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991
[INPE-5497-TDI/512] p 230 N94-11179
Satellite observation of atmospheric tracer components: JEM/POP p 130 N94-11836
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851

The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data
p 197 N94-11931

SATELLITE SURFACES

Physical studies of planetary and satellite surfaces
[NASA-CR-193545] p 434 N94-10817

A structural origin for the cantaloupe terrain of Triton
p 449 N94-12095

Sources of Na for the Io atmosphere
p 455 N94-12127

Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

SATELLITE TRACKING

Toward 10(exp 9) GPS geodesy: Vector baselines, Earth rotation and reference frames
[NASA-CR-193184] p 229 N94-10702

Operational ERS-1 orbit determination at D-PAF
p 243 N94-11774

ERS-1 precise orbit determination
p 244 N94-11779

Regional orbit precision in the Mediterranean area
p 39 N94-12530

SATELLITE-BORNE INSTRUMENTS

Imaging of magnetospheric dynamics using low energy neutral atom detection
[DE93-012656] p 275 N94-10742

Calibration and validation of the ERS-1 wind scatterometer p 232 N94-11706

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

Calibration of ERS-1 altimetry over the North Sea
p 234 N94-11716

Preliminary results of the experiment I-7
p 235 N94-11728

The ERS-1/CV 580 SAR cross-calibration experiment: Sault Ste Marie, October 26 - November 2, 1991
p 236 N94-11729

Calibration results for the ERS-1, AIRSAR, and PHARS p 236 N94-11731

An experiment for the radiometric calibration of the ERS-1 SAR p 236 N94-11733

SATELLITE-BORNE RADAR

Utilisation of ERS-1 data for mapping of Antarctica
p 237 N94-11740

Monitoring of the Greenland Ice Sheet using ERS-1 synthetic aperture radar imagery p 237 N94-11741

SATURN (PLANET)

Disk-resolved spectral characteristics of Saturn's medium-sized satellites p 471 N94-12213

SATURN SATELLITES

Disk-resolved spectral characteristics of Saturn's medium-sized satellites p 471 N94-12213

SCALARS

The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point
[DE93-012655] p 361 N94-10349

Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials
[DE93-617650] p 349 N94-10547

A new approach to the I/N-expansion for the Dirac equation
[DE93-617647] p 349 N94-10833

Exact solution of the N-dimensional generalized Dirac-Coulomb equation
[DE93-617649] p 411 N94-10834

A theoretical kinematical study of the gradient of any cosmic scalar field
[DE92-644731] p 425 N94-11136

PDF approach for turbulent scalar field: Some recent developments p 160 N94-12315

SCALE EFFECT

Planck scale effects on the Majoron
[DE93-613120] p 410 N94-10545

SCALE MODELS

An experimental investigation of high-speed water-entry for full-size and scale-model pointed nose vehicles
[DE93-008491] p 147 N94-10252

Application of normalized gray-scale correlation
[DE93-013765] p 141 N94-10521

Characterization of a scannerless LADAR system
[DE93-011582] p 174 N94-10959

A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study
[AD-A264805] p 152 N94-11519

SCALING LAWS

Dimensional scaling for impact cratering and perforation
[NASA-CR-188259] p 42 N94-10665

Helium transport scaling law studies
[DE93-013487] p 393 N94-11513

Power-law confusion: You say incremental, I say differential p 347 N94-12175

SCANNERS

Calorimetric thermometry of meteoritic troilite: A feasibility study p 428 N94-12025

SCANNING ELECTRON MICROSCOPY

Fractography handbook of spaceflight metals
[NASA-RP-1291] p 81 N94-10504

Measurement of the minority carrier diffusion length and edge surface-recombination velocity in InP
p 49 N94-11388

Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379

SCANNING TUNNELING MICROSCOPY

Site dependence of the apparent shape of a molecule in STM images: Benzene on Pt(111)
[AD-A263488] p 365 N94-11093

Dynamic studies of crystal growth using the AFM
[DE93-009549] p 399 N94-11268

Real-space formation and dissipation dynamics of hexagonal reconstruction on Au(100) in aqueous media as explored by potentiodynamic scanning tunneling microscopy
[AD-A266138] p 368 N94-11658

Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684

Atomic-scale imaging of surfaces and interfaces. Materials Research Society Symposium Proceedings, volume 295
[AD-A265674] p 369 N94-12379

Electrode potential-induced reconstruction of Au(100): Effect of chemisorption on nanoscale dynamics as probed by the in-situ scanning tunneling microscopy
[AD-A265900] p 404 N94-12388

SCATTERING

Preliminary results on backscattering strength from a wind generated bubbly ocean surface
[AD-A265006] p 287 N94-10490

Coherence effects in radiometry and in spectroscopy
[DE93-013437] p 75 N94-10519

Scattering of modulated Ultra-Relativistic Electron Beam (UREB) by atmospheric plasma
[DE93-620987] p 387 N94-10558

Interstellar scattering and the selection of extragalactic radiosources with highly compact components
p 134 N94-11063

Radiation and scattering by cavity-backed antennas on a circular cylinder
[NASA-CR-193409] p 136 N94-11084

SCATTERING AMPLITUDE

Indication on the existence of the bound state in the p anti p-system
[DE92-641575] p 361 N94-10532

P-matrix description of the two-particle interaction
[DE93-617690] p 361 N94-10549

Crossing-odd spin effects in the dipole model of hadron scattering
[DE93-617692] p 362 N94-10551

Model for the pomeron
[DE93-617693] p 362 N94-10552

Fine structure of the Pomeron and the real part of the elastic scattering amplitude
[DE93-617696] p 362 N94-10555

On the possible unobservability of the Wu-Yang phase factor in curved space
[DE93-617645] p 411 N94-10831

FEFF5: An ab initio multiple scattering XAFS code
[DE93-011000] p 367 N94-11470

Fermion-boson scattering in ladder approximation
[DE93-613111] p 368 N94-11581

SCATTERING COEFFICIENTS

Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam
p 177 N94-12722

Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar
p 224 N94-12736

SCATTERING CROSS SECTIONS

Convergent close-coupling calculations of electron-hydrogen scattering
[DE93-610049] p 360 N94-10328

Distorted-wave calculation of He(e,2e) including core-exchange
[DE93-610072] p 360 N94-10330

Logarithmically rising cross section and the ratio sigma(sub el)/sigma(sub t)
[DE93-617694] p 362 N94-10553

Detecting the odderon
[DE93-617695] p 362 N94-10554

Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049

Low voltage electron beam lithography
[AD-A265358] p 145 N94-12405

Final state interactions and inclusive nuclear collisions
[NASA-TP-3353] p 373 N94-12435

SCATTEROMETERS

Calibration and validation of the ERS-1 wind scatterometer p 232 N94-11706

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

ERS-1 studies at the Department of Oceanography from Space, IFREMER/Brest (France) p 233 N94-11712

The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713

Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714

A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715

Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719

Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724

Scatterometer observations: Review
p 201 N94-11956

The microwave backscattering from wind waves
p 201 N94-11959

A first assessment of the value of ERS-1 scatterometer winds for meteorological studies in the polar regions
p 250 N94-12501

Use of ERS-1 wind and wave products in operational meteorology p 250 N94-12502

Use of ERS-1 scatterometer winds in Canadian forecast centres p 250 N94-12504

SCENE ANALYSIS

Retrieval of radiation budgets in the Arctic from satellite measurements p 229 N94-10714

A summary of image segmentation techniques
[NASA-TM-104022] p 327 N94-11274

SCHEDULES

National Aero-Space Plane: A need for program direction and funding decisions
[GAO/NSIAD-93-207] p 416 N94-10910

Avoidance and suppression of compensation code in a trace scheduling compiler
[AD-A265612] p 333 N94-12439

Coordinated Radio, Electron, and Waves Experiment (CREWE) for the NASA Comet Rendezvous and Asteroid Flyby (CRAF) instrument
[NASA-CR-194376] p 427 N94-12566

SCHEDULING

ACARA user's manual
[NASA-TM-106277] p 183 N94-11167

Distributed real-time system design: Theoretical concepts and applications
[AD-A265199] p 337 N94-11881

Avoidance and suppression of compensation code in a trace scheduling compiler
[AD-A265612] p 333 N94-12439

SCHLIEREN PHOTOGRAPHY

Analysis of the alignment of a Schlieren system for tele-operation p 111 N94-10140

Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement
[NASA-CR-193292] p 150 N94-10912

SCHOOLS

A summer program in mathematics and computer science for academically oriented student
[AD-A263467] p 415 N94-11517

Career Information in the Mathematical Sciences (CIMS)
[DE93-013780] p 318 N94-11817

SCHOTTKY DIODES

Activation energy and capture cross section of majority carrier traps in Zn doped InP p 49 N94-11386

SCHROEDINGER EQUATION

P-matrix description of the two-particle interaction
[DE93-617690] p 361 N94-10549

Studies of P-matrix formalism on the basis of the potential description of two-particle interaction
[DE93-617691] p 362 N94-10550

Completeness properties of the minimum uncertainty states p 349 N94-10581

Uncertainty relations, zero point energy and the linear canonical group p 378 N94-10590

Positive phase space distributions and uncertainty relations p 379 N94-10598

Coherent states and uncertainty relations for the damped harmonic oscillator with time-dependent frequency
p 380 N94-10611

Quasi-relativistic effects in barrier-penetration processes
[DE93-617730] p 410 N94-10721

Exact solutions of a many-anyon problem [DE93-617646] p 411 N94-10832

SCIENCE

Project TIMS (Teaching Integrated Math/Science) [NASA-CR-194288] p 416 N94-11599

SCIENTIFIC SATELLITES

ESRO's first scientific satellite programme, 1961 - 1966 [ESA-HSR-2] p 44 N94-11462

SCIENTIFIC VISUALIZATION

The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113

Computing science and statistics, Volume 24: Graphics and visualization [AD-A265181] p 332 N94-11878

SCIENTISTS

The legacy of uncertainty p 376 N94-10577

NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 17: A comparison of the technical communication practices of Dutch and US aerospace engineers and scientists [NASA-TM-108987] p 419 N94-11352

SCINTILLATION

A new data collection system for ionospheric modelling and related topics [AD-A265893] p 278 N94-12277

SCINTILLATION COUNTERS

Experimental efforts and results in finding new heavy scintillators [DE93-010406] p 371 N94-10156

Conceptual design report for the SDC barrel and intermediate muon detectors based on a jet-type drift chamber [DE93-753173] p 367 N94-11510

SCREWS

Self locking set screw [AD-D015774] p 178 N94-10385

SEA BREEZE

A study of the Merritt Island, Florida sea breeze flow regimes and their effect on surface heat and moisture fluxes [NASA-CR-4537] p 286 N94-12580

SEA GRASSES

The role of certain infauna and vascular plants in the mediation of redox reactions in marine sediments p 268 N94-12454

SEA ICE

AMIP: The Atmospheric Model Intercomparison Project [DE93-007400] p 273 N94-10151

AMIP: The Atmospheric Model Intercomparison Project [DE93-007413] p 273 N94-10152

Sea ice: A climate component p 232 N94-11705

Monitoring of the Greenland Ice Sheet using ERS-1 synthetic aperture radar imagery p 237 N94-11741

Investigations of Arctic ice-sheets and glaciers using ERS-1 SAR p 238 N94-11743

Spatial patterns in backscatter strength across the Greenland Ice Sheet p 238 N94-11744

Ice studies in the Barents Sea by ERS-1 SAR during SIZEX 92 p 238 N94-11745

Validation of ERS-1 SAR measurements of sea ice during ARCTIC-1991 p 238 N94-11747

Arctic coastal polynya observations with ERS-1 SAR and DMSP SSM/I p 239 N94-11748

Sea ice deformation observed with ERS-1 SAR p 239 N94-11749

Finnish ERS-1 Baltic Sea ice experiment in Winter 1992 p 239 N94-11750

Experiences from the Swedish sea ice programme during BEERS-1992 p 239 N94-11751

Greenland Sea observations p 239 N94-11752

Arctic sea ice microwave signature and geophysical processes study p 240 N94-11754

Sea ice radar signatures from ERS-1 SAR during late Summer and Fall in the Beaufort and Chukchi Seas p 240 N94-11756

Waves and mesoscale features in the marginal ice zone p 240 N94-11757

The seasonal Sea Ice Monitoring and Modelling Site (SIMMS): Using ERS-1 in climate research p 240 N94-11758

Preliminary evaluation of ERS-1 SAR data for operational use in the Canadian sea ice monitoring program p 241 N94-11760

Sea ice feature and type identification in merged ERS-1 SAR and LANDSAT Thematic Mapper imagery p 241 N94-11761

Summer Arctic ice concentrations and characteristics from SAR and SSM/I data p 241 N94-11762

Evaluating ERS-1 ice motion and classification products p 241 N94-11763

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

Impact of ERS-1 wind/wave/ice data on operational ocean forecasting p 250 N94-12500

Pacific rim sea ice as observed with the NIMBUS-7 SMMR p 210 N94-12651

Microwave radiometry of ice cover in polar regions p 210 N94-12655

SEA LEVEL

Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate [NASA-TM-108253] p 43 N94-10699

Hypobaric decompression prebreathe requirements and breathing environment p 317 N94-11541

Spatial scales of wave height p 244 N94-11782

The 1992 El Nino viewed by ERS-1 altimetry p 244 N94-11784

Observation of wind and waves by GEOSAT altimeter p 202 N94-11961

Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

Theory and oceanographic applications of satellite altimeter measurements p 208 N94-12641

Analysis of collinear passes of satellite altimeter data p 208 N94-12642

Comparison of GEOSAT sea surface height and model-simulated surface dynamic height p 208 N94-12644

Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647

Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother p 209 N94-12648

Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649

Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650

SEA OF JAPAN

High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

Generation of internal waves near the shelf boundary p 229 N94-12763

SEA ROUGHNESS

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894

Remote sensing and the air-sea boundary layers p 191 N94-11896

Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898

HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

Measurement of wave parameters by HF ocean radar p 192 N94-11903

The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

Surface roughness variations across the Iceland-Faroes frontal region observed by the GEOSAT altimeter and NOAA AVHRR p 201 N94-11958

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635

Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

SEA STATES

Effects of wave nonlinearity on ERS-1 radar altimeter returns: A preliminary investigation p 235 N94-11722

Quick-look monitoring of the sea surface with ERS-1 fast delivery altimeter data p 243 N94-11777

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1 [JTN-93-80418] p 191 N94-11894

Remote sensing and the air-sea boundary layers p 191 N94-11896

Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898

Satellite observations of red tide events: Plans for EESI p 191 N94-11899

HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

Measurement of wave parameters by HF ocean radar p 192 N94-11903

Ocean wave detection by SAR p 197 N94-11932

On the determination of the SAR ocean surface scattering patch size p 197 N94-11933

The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940

Westward propagation of sea surface anomalies in the western North Pacific as seen by the altimeter and radiometer p 198 N94-11941

Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984

Circulation of North Pacific Intermediate Water p 206 N94-11985

SOFAR float tracking in the Shikoku basin p 206 N94-11986

Use of SAR-wave, altimeter, and wind-scatterometer data in an operational swell forecasting system p 250 N94-12503

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

A numerical study of deep convection at high latitudes p 210 N94-12652

The Pacific Subarctic Frontal Zone: Structure and dynamics p 223 N94-12731

Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732

Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

SEA SURFACE TEMPERATURE

AMIP: The Atmospheric Model Intercomparison Project [DE93-007400] p 273 N94-10151

AMIP: The Atmospheric Model Intercomparison Project [DE93-007413] p 273 N94-10152

Preliminary results of the comparison of ATSR measurements with in situ sea temperatures [DE93-013399] p 287 N94-10517

A modeling perspective on cloud radiative forcing [DE93-012383] p 276 N94-11241

Central Equatorial Pacific Experiment (CEPEX) [DE93-011656] p 190 N94-11674

Latent and sensible heat flux estimated from ERS-1 data p 244 N94-11783

The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992 [AD-A264922] p 289 N94-11853

Satellite derived sea surface temperature applications for Indian Ocean resources development p 193 N94-11907

Exchange of bay water with ocean current monitored by the NOAA satellite p 193 N94-11908

A consideration on principal component analysis of satellite IR data p 193 N94-11909

Trouble areas in the IRT measurement of the Earth surface temperature p 193 N94-11910

Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926

The Kyucho events in Sukumo Bay induced by Kuroshio front disturbances p 198 N94-11939

Satellite-derived oceanic features p 200 N94-11949

Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984

Sea surface temperature anomalies in the Arabian Sea p 206 N94-11988

Multichannel dual angle approach for sea surface temperature retrieval in context of ERS-1 scenario p 252 N94-12512

ATSR correlative skin measurements of sea surface temperature p 252 N94-12514

Validation of ATSR-1 using aircraft radiometer measurements over the South Atlantic p 252 N94-12515

A user appraisal of ATSR near-real-time products p 252 N94-12516

A comparison of ATSR and shipboard radiometer SST measurements along transects between the UK and the Antarctic p 253 N94-12518

Preliminary validation of ATSR sea surface temperatures near the Faeroes p 253 N94-12519

Comments on possible causes of recent global warming [DE93-010501] p 272 N94-12592

Variability of sea level and sea surface temperature anomalies in the equatorial Pacific p 208 N94-12640

Validation test system for sea surface temperature detected by satellites in Mutsu Bay p 213 N94-12670

Sea surface temperature images of Geostationary Meteorological Satellite (GMS) and sea truth data from ferry boats p 213 N94-12671

Measurement of the sea surface emissivity p 213 N94-12672
Evaluation of the method of geostrophic flow using NOAA-AVHRR data p 213 N94-12673
Further study of the Non-Regression-Coefficient SST retrieval method p 213 N94-12674
Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675
Observation of warm current at the boundary from north equatorial current to Kuroshio by NOAA/AVHRR p 214 N94-12676
Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679
Sea surface temperature difference between NOAA/AVHRR and in-situ observation p 215 N94-12680
Intrusion of Kuroshio warm water into Sagami Bay p 215 N94-12683
Satellite thermal variations of Kuroshio in relation to storm floods p 215 N94-12685
Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688
Observation of cold coastal water with high turbidity around the southwestern tip of Korean Peninsula p 216 N94-12689
On the error characteristics of the sea surface temperature observed by satellite p 216 N94-12690
The WOCE/TOGA Surface Velocity Programme (SVP) p 216 N94-12691
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701
Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data p 220 N94-12711
Coastal upwelling monitored by satellite data: Methodologies and results p 220 N94-12712
Applicability of satellite infrared data for the monitoring of coastal environments p 220 N94-12714
Satellite and moored buoy observations of polar frontal system over the Yamato Rise in the Japan Sea p 221 N94-12715
The relationship between skin and bulk sea surface temperatures p 221 N94-12716
Variability of the Kuroshio observed from satellite thermal imagery p 221 N94-12717
SST assimilation: Eastern Mediterranean case study p 221 N94-12719
The method of investigation of the horizontal structure of the thermal fronts p 222 N94-12723
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

SEA TRUTH
A comparison of ATSR and shipboard radiometer SST measurements along transects between the UK and the Antarctic p 253 N94-12518
Preliminary validation of ATSR sea surface temperatures near the Faeroes p 253 N94-12519
Oil spill detection using satellite-based SAR: Experience from a field experiment p 253 N94-12522
Comparison of ERS-1 SAR images of the Western Mediterranean to in situ oceanographic data: PRIM-1 Cruise (May 1992) p 255 N94-12529
A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657
Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659
Sea surface temperature images of Geostationary Meteorological Satellite (GMS) and sea truth data from ferry boats p 213 N94-12671
Frontal zones in Pacific Ocean: Satellite and ship data analysis p 216 N94-12687
The WOCE/TOGA Surface Velocity Programme (SVP) p 216 N94-12691
The circulation near Luzon p 219 N94-12707

SEA WATER
A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920
The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944
An application of reduced gravity model to mesoscale eddies p 199 N94-11945
Optical characteristics in Tokyo Bay p 204 N94-11972
Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973
A development on estimation method of undersea light p 204 N94-11974
A surface water monitoring system: A device for the sea-truth observations p 210 N94-12657
Primary productivity in the Oyashio area in the spring and summer of 1990 p 211 N94-12658
Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659
The phytoplankton bloom in the Kinu-ura Bay, Japan in the rainy season p 211 N94-12660
Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
The Pacific Subarctic Frontal Zone: Structure and dynamics p 223 N94-12731
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732
Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar p 224 N94-12736
Convective and dynamic instability in meridional trenches p 225 N94-12739
Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744
Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756
Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

SEALERS
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

SEALING
Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump
[NAL-TR-1155] p 178 N94-10369

SEALS (STOPPERS)
Extensions of some guidelines for the mechanical design of coaxial compression pin seals
[DE93-012385] p 177 N94-10348
Check valve with poppet damping mechanism
[NASA-CASE-MSC-21903-1] p 179 N94-10655
Dynamic tester for rotor seals and bearings
[NASA-CASE-MFS-28493-1] p 33 N94-10669

SEAS
An analysis of the gravity field in the Norwegian Sea and mapping of the ice cap of Greenland using ERS-1 altimeter measurements p 242 N94-11768

SEASAT SATELLITES
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918

SECONDARY FLOW
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889

SECONDARY ION MASS SPECTROMETRY
In situ secondary ion mass spectrometry analysis
[DE93-012185] p 76 N94-11140
Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232

SECURITY
A comparison of high and low-impact reports of investigation on adjudicators' decision making: A pilot study
[AD-A265747] p 416 N94-10298
Practical authorization in large heterogeneous distributed systems
[DE93-013192] p 335 N94-10324

SEDIMENT TRANSPORT
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701

SEDIMENTARY ROCKS
Stratigraphy and sedimentology of the K/T boundary deposit in Haiti p 282 N94-12138
A simple model of clastic sediments on Mars p 460 N94-12155

SEDIMENTS
Acoustics of bubbly sediments
[AD-A263726] p 288 N94-11299
Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576 p 282 N94-12091
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094
A simple model of clastic sediments on Mars p 460 N94-12155
Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199
The role of certain infauna and vascular plants in the mediation of redox reactions in marine sediments p 268 N94-12454
Acetate concentrations and oxidation in salt marsh sediments p 269 N94-12459
Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709

SEISMIC ENERGY
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS
[AD-A265959] p 275 N94-11102

SEISMIC WAVES
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS
[AD-A265959] p 275 N94-11102

SEISMOGRAPHS
Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349

SEISMOLOGY
Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters
[DE93-011952] p 150 N94-11026
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS
[AD-A265959] p 275 N94-11102
Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735

SELENOLOGY
Mission to the Moon: An ESA study on future exploration p 460 N94-12153
Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158
Exploration planning in the context of human exploration and development of the Moon p 474 N94-12229

SELF ABSORPTION
Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117

SEMANTICS
Bundle event structures: A non-interleaving semantics for LOTOS
[MEMO-INF-92-73] p 320 N94-10164
Automatic word categorization: An information-theoretic approach
[CS-9209] p 419 N94-10903

SEMICONDUCTOR DEVICES
Continuous-time adaptive learning circuit
[AD-D015773] p 140 N94-10384
Limitation and suppression of hot electron fluctuations in submicron semiconductor structures
[DE93-613911] p 396 N94-10801
Review of betavoltaic energy conversion p 53 N94-11407
GaAs PCSS: High gain switching and device reliability
[DE93-009851] p 401 N94-11605
Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices
[AD-A265685] p 405 N94-12442

SEMICONDUCTOR DIODES
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
Lecture note on circuit technology for high energy physics experiment
[DE93-771422] p 372 N94-11245

SEMICONDUCTOR JUNCTIONS
InGaAs concentrator cells for laser power converters and tandem cells p 50 N94-11394
Review of betavoltaic energy conversion p 53 N94-11407

SEMICONDUCTOR LASERS
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
Rapid thermal processing for strained-layer semiconductor devices
[DE93-013754] p 396 N94-10809
Characterization of a scannerless LADAR system
[DE93-011582] p 174 N94-10959
Semiconductor ring lasers
[DE93-012386] p 174 N94-11005
New challenges in optical materials development
[DE93-011889] p 383 N94-11676

SEMICONDUCTORS (MATERIALS)
Measurement of the thermal conductivity of molten InSb in a drop shaft p 105 N94-10102
Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180
THM-growth of III-V-semiconductors in the magnetic field p 118 N94-10209

Photostimulated attenuation of hypersound in superlattice
[DE93-611231] p 357 N94-10408
Structure of s - p bonded metal clusters with 8, 20 and 40 valence electrons
[DE93-613643] p 361 N94-10503
Method for producing a hybridization of detector array and integrated circuit for readout
[NASA-CASE-NPO-18062-1-CU] p 141 N94-10656
Crack suppression in GaInSb buffer layers initially under tensile stress
[DE93-012839] p 396 N94-10745
Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas
[DE93-613910] p 396 N94-10800
Rapid thermal processing for strained-layer semiconductor devices
[DE93-013754] p 396 N94-10809
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819
Ellipsometry studies of semiconductors surface cleaning
[AD-A265150] p 142 N94-11094
Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents
[AD-A265149] p 143 N94-11160
Memory effects in the organometallic chemical beam epitaxy of compound semiconductors
[NASA-CR-193106] p 399 N94-11439
Remote plasma enhanced chemical vapor deposition of GaP with in situ generation of phosphine precursors
p 399 N94-11440
Lattice-matched heteroepitaxy of wide gap ternary compound semiconductors p 400 N94-11441
Development of microstrip gas chambers with multi-chip technology
[DE93-753169] p 367 N94-11509
Wide Band-Gap Semiconductors. 1991 Materials Rese arch Society Symposium proceedings
[AD-A263418] p 401 N94-11515
A thermal ionization model for the sustaining phase of lock-on in GaAs
[DE93-011558] p 144 N94-11624
The additional contribution caused by Coulomb interaction to the exciton dispersion in multiple quantum wells and superlattices for direct band gap cubic semiconductors
[DE93-613538] p 402 N94-11659
On the theory of phonoriton in cubic semiconductors with a degenerate valence band
[DE93-613539] p 402 N94-11660
Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684
Gallium arsenide dynamic random access memory support circuitry
[AD-A265176] p 320 N94-11875
Production of electronic grade lunar silicon by disproportionation of silicon difluoride
p 435 N94-12017
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375
Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices
[AD-A265685] p 405 N94-12442
Synthesis and electronic properties of nanophase semiconductor materials
[AD-A265287] p 146 N94-12584
Theoretical investigation of some novel phenomenal in artificially structured semiconductors
[AD-A266142] p 405 N94-12587

SENSITIVITY
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli
[AD-A265168] p 324 N94-11099

SEPARATED FLOW
A comparative study of full Navier-Stokes and Reduced Navier-Stokes analyses for separating flows within a diffusing inlet S-duct
[NASA-TM-106250] p 39 N94-10764
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889

SEPARATION
Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185

SEPARATORS
Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849

SERIES (MATHEMATICS)
Detecting non-linearities in stationary time series
[W-9223] p 344 N94-10906

SERIES EXPANSION
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction
[DE93-617691] p 362 N94-10550
A new approach to the I/N-expansion for the Dirac equation
[DE93-617647] p 349 N94-10833

SERVICE LIFE
Characterization of in-flight performance of ion propulsion systems
[NASA-TM-106283] p 46 N94-10761
Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity
[DE93-011597] p 263 N94-11173
GaAs PCSS: High gain switching and device reliability
[DE93-009851] p 401 N94-11605

SET THEORY
An algebraic approach to incomparable families of formal languages
[MEMO-INF-92-82] p 342 N94-10279
Boundary of Fatou sets of hyperbolic rational maps or degree two
[DE93-613031] p 348 N94-10412
A surrogate heuristic for set covering problems
[INPE-5462-PRE/1770] p 325 N94-11178
A new heuristic for set covering problems
[INPE-5471-TDI/502] p 333 N94-12358

SEWING
Parachute having improved vent line stacking
[NASA-CASE-MFS-28508-1] p 14 N94-11021

SHADOWGRAPH PHOTOGRAPHY
Flowfield structure of swept shock wave/turbulent boundary-layer interactions p 149 N94-10899

SHAFTS (MACHINE ELEMENTS)
Dynamic tester for rotor seals and bearings
[NASA-CASE-MFS-28493-1] p 33 N94-10669

SHALES
Petrography and preliminary interpretations of the crystalline breccias from the Manson M-1 core
p 281 N94-12056
Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160

SHALLOW WATER
SAR imaging of geology and bathymetry: Kent coastal area - southern North Sea p 254 N94-12527
Trajectory curving in underwater propagation of light
p 226 N94-12748
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752

SHAPE MEMORY ALLOYS
On the stability of shape memory materials and their properties in static and dynamic applications
p 69 N94-11329
Adaptive structure design employing shape memory actuators p 70 N94-11331
Structural analysis and optimization of adaptive structures by use of the finite element method
p 71 N94-11339

SHAPES
Stability of liquid bridges between parallel plates
p 101 N94-10078
On shape of single crystals grown by FZM in microgravity p 102 N94-10084
A preliminary study on ice shape tracing with a laser light sheet
[NASA-TM-105964] p 174 N94-11132
Fractal dimensions of rampart impact craters on Mars
p 460 N94-12154

SHEAR
Shear, strain and thermohaline vertical fine structure in the upper ocean
[AD-A265961] p 289 N94-12348

SHEAR FLOW
Transport mechanisms acting in toroidal devices: A theoretician's view
[DE93-013463] p 385 N94-10310
The nonlinear evolution of modes on unstable stratified shear layers
[NASA-CR-191492] p 149 N94-10810
High order accurate solutions of viscous problems
[NASA-TM-106267] p 151 N94-11253
Shear flow control of gas jets in liquids
[AD-A264673] p 152 N94-11448
Modelling quasi-two-dimensional turbulent shear flow
p 153 N94-11616
Vortex-induced forces on oscillating bluff cylinders
[AD-A265056] p 154 N94-11865
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
Local isotropy in high Reynolds number turbulent shear flows p 157 N94-12302
Probability density distribution of velocity differences at high Reynolds numbers p 158 N94-12304
Mixing in a stratified shear flow: Energetics and sampling p 159 N94-12311
Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314
The thermodynamics of the nonlinear shear flows
p 169 N94-12728
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730
Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759

SHEAR LAYERS
The nonlinear evolution of modes on unstable stratified shear layers
[NASA-CR-191492] p 149 N94-10810
Application of jet-shear-layer mixing and effervescent atomization to the development of a low-NO(x) combustor
[NASA-TM-105888] p 28 N94-11234
High order accurate solutions of viscous problems
[NASA-TM-106267] p 151 N94-11253
Receptivity in parallel flows: An adjoint approach
p 157 N94-12301
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312
Shear, strain and thermohaline vertical fine structure in the upper ocean
[AD-A265961] p 289 N94-12348
Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615

SHEAR STRAIN
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain
[DE93-013309] p 185 N94-10306
Damping measurements for ultra-high carbon steel/brass laminates
[DE93-011886] p 82 N94-11076

SHEAR STRENGTH
Design of inspection and acceptance test methodology for TIG welded aluminum-alloy bracket for camera housings for IRS-1A space craft and executing it
p 61 N94-10037
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain
[DE93-013309] p 185 N94-10306

SHEAR STRESS
Design evaluation of GLARE laminate lay-ups
p 63 N94-10051
The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058
Application of a Reynolds stress model to separating boundary layers p 157 N94-12299

SHERGOTTITES
Moessbauer spectroscopy of the SNC meteorite Zagami p 428 N94-12016
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082
LEW88516 and SNC meteorites p 430 N94-12150
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga
p 473 N94-12228

SHIELDING
Linear antenna of an arbitrary orientation and position in cylindric screen
[DE93-621353] p 134 N94-11035

SHIP HULLS
Microstructure-based fatigue life prediction methods for naval steel structures
[AD-A265429] p 85 N94-12426
Advances in low carbon, high strength ferrous alloys
[AD-A265264] p 85 N94-12532

SHIPS
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere
p 226 N94-12749

SHOCK HEATING
Impact mineralogy and chemistry of the cretaceous-tertiary boundary at DSDP site 576
p 282 N94-12091
Primordial lightning: Evidence preserved in chondrites
p 432 N94-12230

SHOCK LOADS
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
Shock transformations in quartzite p 97 N94-12040
Dynamic high-pressure shock compaction of diamond powders
[AD-A266004] p 93 N94-12354

SHOCK SPECTRA
Computational methods for problems in aerodynamics using parallel and vector architectures [AD-A265626] p 16 N94-12377

SHOCK TESTS
Start-up imprinting and shock dynamics in laser-target interaction [DE93-008051] p 172 N94-10150
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
Dynamic loading in manufacturing and service: Australia's shock testing capability p 128 N94-11304

SHOCK TUBES
Comparison of computation and experiment for a high enthalpy, heated-driver, shock-tube environment p 7 N94-10447
New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939

SHOCK TUNNELS
The high enthalpy facilities HEG and TH 2 in Germany p 4 N94-10430

SHOCK WAVE INTERACTION
Experimental, analytical, and computational methods applied to hypersonic compression ramp flows p 6 N94-10444
Development of a Delaunay-based adaption scheme with applications to complex three-dimensional rotational flows p 149 N94-10824
Flowfield structure of swept shock wave/turbulent boundary-layer interactions p 149 N94-10899
An improved material interface reconstruction algorithm for Eulerian codes [DE93-011679] p 326 N94-11226
Large eddy simulation of shock turbulence interaction p 155 N94-12289

SHOCK WAVE PROPAGATION
Flow visualization of shock propagation in baffle systems [DE93-013312] p 147 N94-10307
Giant impact-induced atmospheric blow-off p 435 N94-12019

SHOCK WAVES
Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-8] p 11 N94-10473
Exergy decrease in shock waves and boundary layers of space launch vehicles [AD-A265272] p 42 N94-10493
Acceleration of positrons in supernova shocks [NASA-CR-193713] p 425 N94-10511
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
A symmetrical form for equations of a nonlinear spiral magnetic [DE93-621350] p 344 N94-11033
Turbulent wall jet in blast wave precursor [DE93-011955] p 151 N94-11144
Nonlinear aspects of transonic aeroelasticity [UTIAS-RN-345] p 15 N94-11857
Chondrule formation by clumpy accretion onto the solar nebula p 448 N94-12089
Initiating solar system formation through stellar shock waves p 448 N94-12090
NMR spectroscopy of experimentally shocked single crystal quartz: A reexamination of the NMR shock barometer p 81 N94-12258
Large eddy simulation of shock turbulence interaction p 155 N94-12289
Analysis of Hopkinson bar pressure gage [AD-A262366] p 171 N94-12362
Computational methods for problems in aerodynamics using parallel and vector architectures [AD-A265626] p 16 N94-12377

SHORELINES
Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942
Study on sea water purification using a substratum of marine organisms p 217 N94-12696
Study of growing processes of a tombolo using an air photograph p 218 N94-12702

SHORT WAVE RADIATION
Studies of the net surface radiative flux from satellite radiances during FIFE [NASA-CR-193150] p 230 N94-10953

SHUTDOWNS
Impact of shutting down en route primary radars within CONUS interior [DOT-VNTSC-FAA-93-1] p 23 N94-11626

SIDE-LOOKING RADAR
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR p 253 N94-12520

SIDEBANDS
Numerical simulation of sidebands in free electron laser oscillators [DE93-612675] p 173 N94-10483

SIDEREAL TIME
A method to determine asteroid poles p 431 N94-12205

SIGNAL ANALYSIS
Signal feature analysis using neural networks and psychoacoustics [AD-A266048] p 340 N94-12398

SIGNAL DETECTION
The theory for, and demonstration of, information theory applied to radar target identification [DE93-006393] p 132 N94-10315
Signal detection theory and methods for evaluating human performance in decision tasks p 314 N94-11531
Comparison of multiresolution techniques for digital signal processing [AD-A265364] p 138 N94-12406

SIGNAL DETECTORS
Observations of optical counterparts of Gamma-Ray bursts [NASA-CR-193573] p 485 N94-12589

SIGNAL DISTORTION
NRL review for 1993 [AD-A265666] p 497 N94-12334

SIGNAL ENCODING
Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197
Flexible high-speed CODEC [NASA-CR-191169] p 146 N94-12433

SIGNAL GENERATORS
Dielectric resonator [US-PATENT-4,580,116] p 141 N94-10668

SIGNAL MEASUREMENT
A new method of time difference measurement: The time difference method by dual phase coincidence points detection p 357 N94-11002
Building penetration loss measurements for DAB signals at 211 MHz [BBC-RD-1992/14] p 133 N94-11024

SIGNAL PROCESSING
Variable rate transfer of optical information [AD-D015758] p 418 N94-10374
Wideband beamforming for a sparse nonuniform spaced sensor array [AD-A265909] p 133 N94-10660
Basic experiment on an ultrasonic method of localization [DE93-754295] p 358 N94-11042
Generalization of Dyson criterion for the amplitude-phase fluctuations case and for the system of interferometers p 135 N94-11067
Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197
Chaotic time series analysis p 31 N94-11490
Limited bandwidth microwave filter [AD-D015744] p 145 N94-12322
Comparison of multiresolution techniques for digital signal processing [AD-A265364] p 138 N94-12406

SIGNAL RECEPTION
Magnetic Earth Ionosphere Resonant Frequencies (MEIRF) project [NASA-CR-193182] p 276 N94-11355

SIGNAL TRANSMISSION
Underwater hydrophone location survey p 290 N94-10975
Adaptive algorithms for use with digital filters in vibration control p 71 N94-11338
NRL review for 1993 [AD-A265666] p 497 N94-12334

SIGNATURES
Geophysical signature of the Pretoria saltpan impact structure and a possible satellite crater p 282 N94-12103

SIGNS AND SYMPTOMS
Effects of CSF hormones and ionic composition on salt/water metabolism [NASA-CR-193232] p 300 N94-11045
Monitoring cognitive function and need with the automated neuropsychological assessment metrics in Decompression Sickness (DCS) research p 314 N94-11533
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546
Promethazine and its use as a treatment for space motion sickness p 312 N94-11550
Update on the incidence and treatment of space motion sickness p 312 N94-11551

SILANES
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554
Adsorption and dissociation of disilane on Si(001) studied by STM [AD-A265269] p 402 N94-11684

SILICA GLASS
Material advances for lightweight TPS p 62 N94-10049
Arcjet exploratory tests of ARC optical window design for the AFE vehicle [NASA-CR-192655] p 34 N94-10930

SILICATES
The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052
Alkali-granitoids as fragments within the ordinary chondrite Adzhi-Bogdo: Evidence for highly fractionated, alkali-granitic liquids on asteroids p 429 N94-12069
The solubility of gold in silicate melts: First results p 87 N94-12086
Unequilibrated, equilibrated, and reduced aggregates in anhydrous interplanetary dust particles p 429 N94-12098
The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110
Micro-zoning in minerals of a Landes silicate inclusion p 432 N94-12231
In-situ crystallization of silicate glass films deposited on alpha- Al2O3 [DE93-012969] p 95 N94-12596

SILICON
Effect of gravity on the dissolution and liquid phase epitaxial growth processes in a horizontal sandwich system p 118 N94-10208
Journal of Research of the National Institute of Standards and Technology, volume 98, number 2, March - April 1993 [PB93-196228] p 485 N94-10850
Thermal-optical switching of a silicon based interference filter [AD-A265152] p 174 N94-11095
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents [AD-A265149] p 143 N94-11160
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system [DE93-011879] p 143 N94-11273
Production of electronic grade lunar silicon by disproportionation of silicon difluoride p 435 N94-12017
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214
The adsorption and surface reaction of SiCl4 on Si(100)-(2x1) [AD-A266124] p 79 N94-12538
Synthesis and electronic properties of nanophase semiconductor materials [AD-A265287] p 146 N94-12584

SILICON ALLOYS
Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063
EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199

SILICON CARBIDES
Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012
New processes for lightweight ceramic matrix composites p 61 N94-10043
Study of the tribological behavior of SiC and Si3N4 ceramic couples in terms of temperature: The reality p 64 N94-10061
High temperature composites in Aerospatiale activities p 64 N94-10062
Damping mechanisms in chemically vapor deposited SiC fibers [NASA-TM-106334] p 66 N94-11135
The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite [DE93-011690] p 73 N94-11612

SILICON DIOXIDE
Thermal-optical switching of a silicon based interference filter [AD-A265152] p 174 N94-11095

Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents
[AD-A265149] p 143 N94-11160

Radiation-induced aperiodicity in irradiated ceramics
[DE93-013335] p 91 N94-11698

Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

SILICON FILMS

Workshop summary: New silicon cells
p 54 N94-11417

An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651

SILICON ISOTOPES

Si-29 NMR spectroscopy of naturally-shocked quartz from Meteor Crater, Arizona: Correlation to Kieffer's classification scheme p 80 N94-12087

NMR spectroscopy of experimentally shocked single crystal quartz: A reexamination of the NMR shock barometer p 81 N94-12258

SILICON NITRIDES

Study of the tribological behavior of SiC and Si3N4 ceramic couples in terms of temperature: The reality
p 64 N94-10061

Protective coatings for high-temperature polymer matrix composites
[NASA-TM-106276] p 74 N94-12431

SILICON OXIDES

Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

SILICON RADIATION DETECTORS

Silicon-based elementary particle tracking system: Materials science and mechanical engineering design
[DE93-012630] p 65 N94-10740

Fast trigger algorithm for B-events selection
[DE93-621452] p 365 N94-11089

Relativistic heavy ion research
[DE93-013127] p 367 N94-11373

Theory of elementary particles and accelerator theory. Task C: Experimental high energy physics
[DE93-013139] p 368 N94-11696

Experimental particle physics at the University of Pittsburgh
[DE93-013326] p 369 N94-12546

SILOXANES

A non-halogenated, flame retarded polycarbonate
p 19 N94-10781

SILVER

The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes
[AD-A265623] p 404 N94-12376

Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum
[AD-A265622] p 79 N94-12534

SIMD (COMPUTERS)

Layering techniques for development of parallel systems: An algebraic approach
[MEMO-INF-92-62] p 335 N94-10277

SIMPLEX METHOD

Design of a continuous resistively loaded monopole antenna
[AD-A265852] p 138 N94-12281

SIMULATION

Functional reasoning, explanation, and analysis
[DE92-526832] p 313 N94-10251

Photostimulated attenuation of hypersound in superlattice
[DE93-611231] p 357 N94-10408

The development of an interactive synthesis tool for intelligent controllers of modular, reconfigurable robots
p 339 N94-10898

Simulation of images of water vapor channel and infrared split channel p 190 N94-11081

Gas-Grain Simulation Facility (GGSF). Volume 2: Conceptual design definition
[NASA-CR-177613] p 423 N94-11229

Large eddy simulations of the atmospheric boundary layer east of the Colorado Rockies p 277 N94-11465

Discrete Kalman filtering equations of second-order form for control-structure interaction simulations
[NASA-CR-193723] p 331 N94-11522

SIMULATORS

TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134

A flexible modelling software for data acquisition
[DE93-612915] p 322 N94-10484

Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670

SINE WAVES

Vortex-induced forces on oscillating bluff cylinders
[AD-A265056] p 154 N94-11865

SINGAPORE

Sun-synchronous and geo-synchronous satellite data utilization for environmental studies p 37 N94-10689

SINGLE CRYSTALS

Use of inert immiscible liquid for crystal separation out of its feeding solution in weightlessness
p 124 N94-10242

Recent developments in piezoelectric and electrostrictive sensors and actuators for smart structures p 70 N94-11332

Investigation of ZnSe-coated silicon substrates for GaAs solar cells p 52 N94-11405

Low energy electron diffraction and cyclic voltammetry studies of flame-annealed platinum single crystals
[AD-A263566] p 401 N94-11518

Polaronic charge separation in mixed-halide MX solids
[AD-A266073] p 403 N94-12345

The effects of organic adsorbates on the underpotential deposition of silver on Pt(111) electrodes
[AD-A265623] p 404 N94-12376

Low voltage electron beam lithography
[AD-A265358] p 145 N94-12405

Fatigue in single crystal nickel superalloys
[AD-A266116] p 85 N94-12418

Deformation mechanisms in tungsten single crystals in ballistic impact experiments
[AD-A265701] p 405 N94-12563

Tin whiskers in electronic circuits
[AD-A265917] p 146 N94-12565

SINGLE EVENT UPSETS

Relationship between IBICC imaging and SEU in CMOS ICs
[DE93-009854] p 143 N94-11285

SINGULAR INTEGRAL EQUATIONS

Integral equation methods for mixed boundary problem of fracture mechanics p 188 N94-11617

SINGULARITY (MATHEMATICS)

Numerical method of singular problems on singular integrals
[DE93-613654] p 343 N94-10546

SINKS

A method of influence regions in the theory of vacancy swelling of metals
[DE93-620579] p 83 N94-11363

SINTERING

Ostwald ripening of solid cobalt particles in liquid copper p 87 N94-10202

Production of reactive sintered nickel aluminide
[DE93-014434] p 83 N94-11127

Creep deformation and mechanical properties of sintered glass and polycrystalline matrix composites
p 67 N94-11315

Effect of powder processing on slip casting parameters and sintering of Si3N4-Y2O3-SiO2
[AD-A264474] p 83 N94-11445

Cold press sintering of simulated lunar basalt
p 131 N94-12026

General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027

SIS (SUPERCONDUCTORS)

Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837

Utilization of superconductivity in the area of space
p 131 N94-11843

SIZE DETERMINATION

Atomization characteristics of a prefilming airblast atomizer
[NAL-TM-644] p 148 N94-10727

SIZE DISTRIBUTION

The development of phytoplankton sensing system with optical fiber p 203 N94-11967

Venus small volcano classification and description
p 438 N94-12037

Deviations from the straight line: Bumps (and grinds) in the collisionally evolved size distribution of asteroids
p 431 N94-12201

Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

The seasonal change of phytoplankton size distribution using optical fiber sensor p 210 N94-12656

SIZE SEPARATION

The carbon isotopic composition of Novo Urei diamonds p 433 N94-12255

SKIN FRICTION

Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction
p 6 N94-10443

Real gas and surface transpiration effects upon swept leading edge high speed flow including transition
p 8 N94-10452

SKIRTS

Stress relaxation forming of Ariane 5 front skirt outer skin panels p 62 N94-10046

SKY SURVEYS (ASTRONOMY)

Preparing for the initial observations of the Targeted Search and the Sky Survey systems
[NASA-CR-193644] p 318 N94-10865

First results of the seven-color asteroid survey
p 430 N94-12162

SLABS

An analytic model for calculating pump-induced wavefront distortions in laser slabs
[DE93-011953] p 174 N94-11126

SLEEP

Noise levels and their effects on Shuttle crewmembers' performance: Operational concerns p 314 N94-11538

SLENDER BODIES

Stability of hypersonic flow over a blunt body
p 7 N94-10450

SLIDING

Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374

SLIDING CONTACT

Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures
[NASA-TM-106078] p 55 N94-11362

SLIDING FRICTION

Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732

SLIP CASTING

Effect of powder processing on slip casting parameters and sintering of Si3N4-Y2O3-SiO2
[AD-A264474] p 83 N94-11445

SLOPES

Evolution of steep Martian slopes p 434 N94-11184

Power-law confusion: You say incremental, I say differential p 347 N94-12175

Mapping bathymetric slopes from bathymetry data
[AD-A265923] p 290 N94-12350

SLURRIES

Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector
[PB93-194165] p 267 N94-11845

SMALL SCIENTIFIC SATELLITES

Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

In-orbit performance tests and tele-command systems of the umbrella test satellite (DEBUT)
[NAL-TR-1165] p 43 N94-10859

SMART STRUCTURES

Smart Structures for Aircraft and Spacecraft
[AGARD-CP-531] p 68 N94-11317

Smart structures: A technology for next generation aircraft p 27 N94-11318

Dynamic tests on the NASA Langley CSI evolutionary model p 45 N94-11320

Smart materials for helicopter rotor active control
p 27 N94-11321

Intelligent structures: A technology overview and assessment p 68 N94-11322

The Satellite Attack Warning and Assessment Flight Experiment (SAWAFE) p 45 N94-11323

Optical fibre techniques for structural monitoring in composites p 69 N94-11324

Smart processing of composite materials for enhanced performance and properties p 69 N94-11325

Smart structures at Aastra Corporation
p 69 N94-11326

Fiber optic sensing for composite smart structures
p 69 N94-11327

On the stability of shape memory materials and their properties in static and dynamic applications
p 69 N94-11329

Smart polymeric system for electromechanical transduction p 70 N94-11330

Recent developments in piezoelectric and electrostrictive sensors and actuators for smart structures p 70 N94-11332

In-flight aircraft structure health monitoring based on smart structures technology p 22 N94-11333

Structural health monitoring using embedded fibre optic sensors p 22 N94-11334

Fault location in structures using neural networks
p 70 N94-11335

Factors affecting the embedding of optical fibre sensors in advanced composite structures p 70 N94-11336

Fiber-optic sensor systems for measuring strain and the detection of acoustic emissions in smart structures
p 71 N94-11337

Structural analysis and optimization of adaptive structures by use of the finite element method
p 71 N94-11339

Fiber-optic interferometric strain gauge for smart structures applications: First flight tests
p 71 N94-11340

On possible applications of smart structures to control of space systems p 45 N94-11342
Aircraft smart structures research in the USAF Wright Laboratory p 72 N94-11343
Advances in adaptive structures at Jet Propulsion Laboratory p 72 N94-11344
Multidimensional intelligent control for superlight air vehicles p 27 N94-11347
Active vibration control of adaptive flexible structures using piezoelectric smart sensors and actuators p 189 N94-11823

SMOKE
New thermoplastic laminating adhesives for the aircraft industry with low heat release and low smoke emission p 17 N94-10767
A new low smoke, low heat release structural foam p 17 N94-10768
A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study [AD-A264805] p 152 N94-11519
Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution p 214 N94-12677

SMOKE TRAILS
Simulated wake characteristics of tapered annular wings by a discrete vortex method [NAL-TR-1156] p 13 N94-10855

SMOOTHING
Improvement of the flow quality in the ARA transonic tunnel by means of a long cell honeycomb [ARA-MEMO-375] p 34 N94-10894
FFTSCAN: A program for spectral smoothing using Fourier transforms [AD-A264921] p 278 N94-11852

SNOW COVER
Signatures of Antarctic firn by means of ERS-1 AMI and by field measurements p 237 N94-11737
Snow and glacier investigations by ERS-1 SAR: First results p 247 N94-12481
Monitoring of snowcover in high mountain terrain with ERS-1 SAR p 247 N94-12482
Application of ERS-1 SAR data to snow mapping p 247 N94-12483
Disintegrating ice front of Shirase Glacier, East Antarctica p 210 N94-12654

SOBOLEV SPACE
On the Sobolev systems with ellipsoid cavities [DE92-641290] p 148 N94-10530

SODIUM
Laser system design for the generation of a sodium-layer laser guide star [DE93-014127] p 176 N94-12784

SODIUM COMPOUNDS
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039

SODIUM FLUORIDES
Production of electronic grade lunar silicon by disproportionation of silicon difluoride p 435 N94-12017

SOFTENING
Investigation of the reason for the softening behaviour of filled polymers p 63 N94-10058

SOFTWARE ENGINEERING
System engineering concept demonstration, technology assessments, volume 5 [AD-A265471] p 323 N94-10494
System engineering concept demonstration, trade studies, volume 6 [AD-A265472] p 323 N94-10495
The Zipcode message-passing system [DE93-011958] p 336 N94-11027
Development of generic field classes for finite element and finite difference problems [DE93-011678] p 345 N94-11225
Computational mechanics needs study [NASA-CR-193712] p 327 N94-11279
Proceedings of the Seventeenth Annual Software Engineering Workshop [NASA-TM-109245] p 328 N94-11422
Experimental software engineering: Seventeen years of lessons in the SEL p 328 N94-11423
The experience factory: Can it make you a 5? or what is its relationship to other quality and improvement concepts? p 328 N94-11424
Impacts of object-oriented technologies: Seven years of SEL studies p 329 N94-11425
The MERMAID project p 329 N94-11426
Software process assessments p 329 N94-11427
The role of metrics and measurements in a software intensive total quality management environment p 329 N94-11428
Maximizing reuse: Applying common sense and discipline p 329 N94-11429
Reuse: A knowledge-based approach p 329 N94-11430
Large project experiences with object-oriented methods and reuse p 329 N94-11431
Development and application of an acceptance testing model p 330 N94-11432
A recent Cleanroom success story: The Redwing project p 39 N94-11433
Insights into software development in Japan p 330 N94-11435
Myths and realities: Defining re-engineering for a large organization p 330 N94-11436
Development and implementation of a general purpose x-windows display program [AD-A265306] p 332 N94-11860
The instrumentation of the multimodel and multilingual user interface [AD-A265444] p 333 N94-12332

SOFTWARE RELIABILITY
Techniques, processes, and measures for software safety and reliability [DE93-012379] p 322 N94-10347
The experience factory: Can it make you a 5? or what is its relationship to other quality and improvement concepts? p 328 N94-11424
Software process assessments p 329 N94-11427
A recent Cleanroom success story: The Redwing project p 39 N94-11433
Applying reliability models to the maintenance of Space Shuttle software p 330 N94-11434

SOFTWARE REUSE
Effective software reuse in an embedded realtime system [AD-A264993] p 326 N94-11220
The role of metrics and measurements in a software intensive total quality management environment p 329 N94-11428
Maximizing reuse: Applying common sense and discipline p 329 N94-11429
Reuse: A knowledge-based approach p 329 N94-11430
Large project experiences with object-oriented methods and reuse p 329 N94-11431
Analysis and guidelines for reusable Ada software [AD-A264918] p 332 N94-11850

SOFTWARE TOOLS
Propellant management in surface tension tanks p 106 N94-10110
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment p 39 N94-10134
The super vectorfield package for REDUCE. Version 1.0 [MEMO-1099] p 321 N94-10265
The INTEGRATOR package for REDUCE, version 1.0 [MEMO-1100] p 322 N94-10418
System engineering concept demonstration, technology assessments, volume 5 [AD-A265471] p 323 N94-10494
A toolkit for building Earth system models [DE93-012147] p 276 N94-11138
A tool for generation of expert system shells [INPE-5493-TDI/510] p 325 N94-11181
The MERMAID project p 329 N94-11426
Large project experiences with object-oriented methods and reuse p 329 N94-11431
System engineering concept demonstration, process model, volume 3 [AD-A265469] p 333 N94-12008
Radarmap of Germany: First mosaic and classification p 246 N94-12477
Use of SAR-wave, altimeter, and wind-scatterometer data in an operational swell forecasting system p 250 N94-12503
Problem specific environments for parallel systems [AD-A266129] p 337 N94-12540

SOIL MOISTURE
Design of a global soil moisture initialization procedure for the simple biosphere model [NASA-TM-104590] p 284 N94-10940
The impact of vegetation on the atmospheric boundary layer and convective storms p 277 N94-11480
The use of ERS-1 SAR data to study surface states p 247 N94-12480
Geoecological monitoring of an agricultural area p 248 N94-12489
Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site p 248 N94-12491
Assessment of ERS-1 SAR data for soil moisture estimation p 249 N94-12492
Temporal monitoring of soil moisture using ERS-1 SAR data p 249 N94-12493

SOIL SCIENCE
Sulfate reduction and other sedimentary biogeochemistry in a northern New England salt marsh p 268 N94-12453
Sulfur transformations in the sediments of a New Hampshire salt marsh p 270 N94-12463

SOILS
Immediate response to free product discovery [PB93-182970] p 265 N94-11015
In situ secondary ion mass spectrometry analysis [DE93-012185] p 76 N94-11140
Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472
Reflectance spectra of sulfate-and carbonate-bearing Fe(3+)-doped montmorillonites as Mars soil analogs p 445 N94-12070
The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs p 445 N94-12071
A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245
Elevated acetate concentrations in the rhizosphere of Spartina alterniflora and potential influences on sulfate reduction p 271 N94-12468
Evaluating the spread of red soil with LANDSAT TM data in coral reefs of Okinawa main island, southwestern Japan p 212 N94-12668

SOL-GEL PROCESSES
Fibre reinforced structures with glass matrix p 64 N94-10064
Low temperature synthesis of monolithic transparent Ta2O5 gels from hydrolysis of metal alkoxide [NASA-TM-106246] p 89 N94-11204
Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels [NASA-TM-106259] p 90 N94-11257
Structural development in ceramic precursor sols and gels [AD-A264354] p 90 N94-11281

SOLAR ACTIVITY
Effects of energetic particle events on VLF/LF propagation parameters/1989 [AD-A265266] p 275 N94-11013
Disturbance Impact Assessment System (DIAS), version 2.0. System design document [AD-A265251] p 138 N94-11883
Yohkoh Bragg Crystal Spectrometer light curves for Ca XIX (3.1631-3.1912A): 1 October 1991 - 30 September 1992 [AD-A266090] p 483 N94-12414

SOLAR ACTIVITY EFFECTS
Radiation considerations for interplanetary missions p 45 N94-11559
Results from a year-long auroral-E measurement campaign [AD-A265059] p 278 N94-11871

SOLAR ARRAYS
Proceedings of the 12th Space Photovoltaic Research and Technology Conference (SPRAT 12) [NASA-CP-3210] p 48 N94-11380
Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells p 50 N94-11392
The efficiency of photovoltaic cells exposed to pulsed laser light p 50 N94-11395
EOL performance comparison of GaAs/Ge and Si BSF/R solar arrays p 51 N94-11398
A high specific power solar array for low to mid-power spacecraft p 51 N94-11399
Results of thermal vacuum tests for the PASP+ flight modules p 53 N94-11410
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411
Workshop on Solar Electric Propulsion p 54 N94-11416
Workshop summary: Receivers for laser power beaming p 54 N94-11419
Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE) [NASA-CR-192572] p 73 N94-11484

SOLAR CELLS
Japan's Sunshine Project [DE93-767980] p 262 N94-10498
Proceedings of the 12th Space Photovoltaic Research and Technology Conference (SPRAT 12) [NASA-CP-3210] p 48 N94-11380
A detailed study of the photo-injection annealing of thermally diffused InP solar cells p 48 N94-11381
High temperature annealing of minority carrier traps in irradiated MOCVD n(+)p InP solar cell junctions p 48 N94-11382
Radiation effects in heteroepitaxial InP solar cells p 48 N94-11383
Progress in p(+)n InP solar cells fabricated by thermal diffusion p 48 N94-11384
Effects of solar cell environment on contact integrity p 49 N94-11387

Surface passivation of InP solar cells with InAlAs layers p 49 N94-11389
Polyimide based amorphous silicon solar modules p 49 N94-11390
Investigation of the radiation resistance of triple-junction a-Si:H alloy solar cells irradiated with 1.00 MeV protons p 50 N94-11391
Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells p 50 N94-11392
InGaAs concentrator cells for laser power converters and tandem cells p 50 N94-11394
Response of silicon solar cell to pulsed laser illumination p 51 N94-11396
Approaches to solar cell design for pulsed laser power receivers p 51 N94-11397
A high specific power solar array for low to mid-power spacecraft p 51 N94-11399
TAB interconnects for space concentrator solar cell arrays p 51 N94-11400
New experimental techniques for solar cells p 52 N94-11403
Radiation effects in Ga(0.47)In(0.53)As solar cells p 52 N94-11404
Investigation of ZnSe-coated silicon substrates for GaAs solar cells p 52 N94-11405
Heteroepitaxial InP, and ultrathin, directly glassed, GaAs 3-5 solar cells p 52 N94-11406
UV testing of solar cells: Effects of antireflective coating, prior irradiation, and UV source p 53 N94-11408
The UoSAT-5 solar cell experiment: First year in orbit p 53 N94-11409
Results of thermal vacuum tests for the PASP+ flight modules p 53 N94-11410
An overview of the Defence Research Agency photovoltaic programme p 53 N94-11412
NASDA activities in space solar power system research, development and applications p 54 N94-11413
Workshop on Heteroepitaxial InP Solar Cells p 54 N94-11414
Thin film solar cell workshop p 54 N94-11415
Workshop summary: New silicon cells p 54 N94-11417
Multi-band gap and new solar cell options workshop p 54 N94-11418
Measurement and modeling of the stability of hydrogenated amorphous silicon solar cells and films after intense illumination p 263 N94-11638

SOLAR COLLECTORS
Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity
[DE93-010010] p 262 N94-10258
Renewable energy sources 1991, part 2
[DE93-605634] p 263 N94-11506

SOLAR CORONA
Why convective heat transport in the solar nebula was inefficient p 458 N94-12143
Are cosmic rays effective for ionization of the solar nebula? p 472 N94-12220

SOLAR COSMIC RAYS
Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

SOLAR CYCLES
Radiation considerations for interplanetary missions p 45 N94-11559
Comments on possible causes of recent global warming
[DE93-010501] p 272 N94-12592

SOLAR ELECTRIC PROPULSION
Workshop on Solar Electric Propulsion p 54 N94-11416

SOLAR ENERGY
Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity
[DE93-010010] p 262 N94-10258
Japan's Sunshine Project
[DE93-767980] p 262 N94-10498
Space Solar Power Program
[DE93-011750] p 55 N94-11675

SOLAR FLARES
Proton transport methods for satellite shield modeling
[DE93-013602] p 42 N94-10520
SMM x ray polychromator
[NASA-CR-193282] p 483 N94-11048
Results from a year-long auroral-E measurement campaign
[AD-A265059] p 278 N94-11871
Disturbance Impact Assessment System (DIAS), version 2.0. System design document
[AD-A265251] p 138 N94-11883
Using solar flare track densities to determine the origin of interplanetary dust particles p 429 N94-12078
Data analysis tasks: BATSE
[NASA-CR-192598] p 483 N94-12427

SOLAR FLUX
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method p 205 N94-11980

SOLAR GENERATORS
Japan's Sunshine Project
[DE93-767980] p 262 N94-10498

SOLAR GRAVITATION
New tests of the equivalence principle using non-metric couplings of electromagnetism and gravitation p 413 N94-11821

SOLAR HEATING
Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity
[DE93-010010] p 262 N94-10258

SOLAR INSTRUMENTS
Continued development of an ultra-narrow bandpass filter for solar research
[NASA-CR-194169] p 381 N94-10735
NASA Marshall Space Flight Center solar observatory report, January - June 1993
[NASA-TM-108417] p 423 N94-10866

SOLAR NEUTRINOS
Solar neutrinos with three flavor mixings
[DE93-011006] p 483 N94-11619

SOLAR OBSERVATORIES
NASA Marshall Space Flight Center solar observatory report, January - June 1993
[NASA-TM-108417] p 423 N94-10866

SOLAR ORBITS
Using solar flare track densities to determine the origin of interplanetary dust particles p 429 N94-12078

SOLAR PHYSICS
Solar neutrinos with three flavor mixings
[DE93-011006] p 483 N94-11619

SOLAR POWER SATELLITES
Space transportation alternatives for large space programs: The International Space University Summer Session, 1992
[NASA-TM-106271] p 40 N94-10811
Construction and testing of a space ready rectenna
[NASA-CR-193310] p 137 N94-11357

SOLAR PROTONS
Proton transport methods for satellite shield modeling
[DE93-013602] p 42 N94-10520

SOLAR RADIATION
Estimating Photosynthetically Available Radiation (PAR) at the Earth's surface from satellite observations p 230 N94-10955
A modeling perspective on cloud radiative forcing
[DE93-012383] p 276 N94-11241
Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method p 205 N94-11980
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
Comments on possible causes of recent global warming
[DE93-010501] p 272 N94-12592

SOLAR SENSORS
Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

SOLAR SPECTRA
Solar neutrinos with three flavor mixings
[DE93-011006] p 483 N94-11619
Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165
Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184

SOLAR SPECTROMETERS
SMM x ray polychromator
[NASA-CR-193282] p 483 N94-11048

SOLAR SYSTEM
Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

SOLAR SYSTEM EVOLUTION
Origins of Solar Systems Workshop: The Origin, Evolution, and Detectability of Short Period Comets
[NASA-CR-194255] p 427 N94-11628
The long-term dynamical behavior of short-period comets p 427 N94-11629
Midplane temperatures in the solar nebula p 448 N94-12088
Chondrule formation by clumpy accretion onto the solar nebula p 448 N94-12089
Initiating solar system formation through stellar shock waves p 448 N94-12090
Studies of the release of radiogenic Xe-129 from Bjurboele: Evidence against simple diffusion models p 430 N94-12125
The giant impact produced a precipitated Moon p 430 N94-12135
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation p 432 N94-12226

SOLAR WIND
Solar wind channels for MeV particles
[DE93-012648] p 482 N94-10741
SMM x ray polychromator
[NASA-CR-193282] p 483 N94-11048

SOLAR X-RAYS
Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165

SOLDERED JOINTS
ENSAFE fireset flex circuit analysis
[DE93-013106] p 144 N94-11478

SOLDERING
Advanced soldering processes
[DE93-009856] p 129 N94-11606

SOLDERS
Advanced soldering processes
[DE93-009856] p 129 N94-11606

SOLENOIDS
High-field conductor testing at the FENIX facility
[DE93-012318] p 387 N94-10737
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848

SOLID CRYOGENS
Experiments with energetic (mu)d and (mu)t emitted from solid hydrogen
[DE93-010252] p 373 N94-12542

SOLID ELECTROLYTES
Technical Update: Johnson Space Center system using a solid electrolytic cell in a remote location to measure oxygen fugacities in CO/CO2 controlled-atmosphere furnaces
[NASA-TM-104774] p 423 N94-11183
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666

SOLID LUBRICANTS
Study of the tribological behavior of SiC and Si3N4 ceramic couples in terms of temperature: The reality p 64 N94-10061
Advanced model of gradual wear of viscoelastic surface film
[AD-A265130] p 90 N94-11222
Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374

SOLID PROPELLANT COMBUSTION
Combustion-induced crack propagation process in a solid-propellant crack cavity p 98 N94-10901

SOLID PROPELLANT ROCKET ENGINES
Combustion-induced crack propagation process in a solid-propellant crack cavity p 98 N94-10901

SOLID PROPELLANTS
Polymeric nitrogen
[DE93-012600] p 89 N94-11151
Distributed combustion in solid propellants
[AD-A265727] p 99 N94-12564

SOLID SOLUTIONS
Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry
[DE93-010871] p 394 N94-10301
Materials for adaptive structural acoustic control, volume 3
[AD-A264621] p 358 N94-11262

SOLID STATE
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416
Solid-state structures of guanidinium methane, ethane, and trifluoromethanesulfonate
[AD-A265293] p 402 N94-11654
Hydrogen-bond polymorphs of guanidinium 4-biphenylsulfonate
[AD-A265294] p 402 N94-11827
The 13C and 15N solid-state NMR of copolymers of nylon 6 and 7: Observation of a stable pseudohexagonal phase
[AD-A265799] p 94 N94-12381
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

SOLID STATE DEVICES
Solid state ionics 3. Materials Research Society Symposium Proceedings, volume 293
[AD-A265675] p 395 N94-10416

SOLID STATE LASERS
Limitations to the quality of optical phase conjugation by stimulated Brillouin scattering
[AD-A266006] p 383 N94-12389

SOLID SURFACES

Application of spin-sensitive electron spectroscopies to investigations of electronic and magnetic properties of solid surfaces and epitaxial systems
[DE93-015079] p 76 N94-10854

SOLID SUSPENSIONS

Remote sensing of the suspended matter distribution with high concentration in China Sea
p 192 N94-11901

Analysis of the characteristic and mechanism of suspended matter transportation in Huanghe delta sea area using remote sensing techniques
p 197 N94-11930

Development of shipboard ocean lidar
p 140 N94-11965

A development on estimation method of undersea light p 204 N94-11974

Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2
[JTN-93-80419] p 207 N94-12635

SOLID-SOLID INTERFACES

Effect of experimental procedure on pattern formation and array disorder in cellular solidification
p 117 N94-10203

SOLIDIFICATION

Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063

Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185

Wetting effects on nylon spheres engulfment in ice
p 115 N94-10189

Thermophysical properties of undercooled liquid metals p 86 N94-10190

Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194

Undercooled W-Re and Mo-Re drops in an ultra high vacuum drop tube p 86 N94-10195

Non-equilibrium solidification in undercooled Ni-B alloys p 86 N94-10196

Ground results of the Mephisto program: Benefits and space experiments orientation p 86 N94-10197

Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204

SOLIDS

X ray and gamma ray spectroscopy of solids under pressure
[DE93-014847] p 76 N94-10653

Characterization of an excimer laser-ablated plasma and applications p 392 N94-11450

Corrosion control by vitreous films on aluminum and high T(sub c) superconductors
[AD-A266016] p 85 N94-12393

SOLITARY WAVES

Marangoni-driven solitary waves p 119 N94-10214

Quantum solitons with cylindrical symmetry
[DE93-617659] p 344 N94-10881

Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves
[DE93-613827] p 398 N94-11025

Creation and annihilation of solitons in nonlinear integrable systems
[DE93-621379] p 365 N94-11078

Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves
[DE93-621656] p 392 N94-11212

Femtosecond dynamics, photoexcitation, and ESR spectra of MX chain solids
[AD-A264689] p 399 N94-11263

SOLUBILITY

Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends
[DE93-013140] p 89 N94-11007

Measurement of viscosity, density and gas solubility of refrigerant blends
[DE93-014772] p 89 N94-11145

Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

The solubility of epsilon-CL-20 in selected materials
[DE93-009304] p 77 N94-11602

Polymer-polymer interactions
[AD-A265304] p 91 N94-11830

The solubility of gold in silicate melts: First results
p 87 N94-12086

Graphite solubility and [illegible] vesiculation in basalt-like melts at one-ATM p 463 N94-12173

SOLUTES

The effect of gravity modulation on thermosolutal convection p 105 N94-10103

The effect of gravitational modulation on convection in vertical Bridgman growth p 113 N94-10178

Experimental studies of the structure of grain boundaries
[DE93-013979] p 402 N94-11700

SOLUTIONS

Synthesis of molecular sieves from clear solution
p 124 N94-10245

SOLVATION

Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010

SOLVENTS

Polar solvation and electron transfer
[DE93-013328] p 365 N94-11010

Dynamics of charge-transfer excited states relevant to photochemical energy conversion
[DE93-013981] p 263 N94-11116

Joint pain and Doppler-detectable bubbles in altitude (Hypobaric) decompression p 312 N94-11542

Solvent dynamical effects in electron transfer: Molecular dynamics simulations of reactions in methanol
[AD-A266061] p 369 N94-12420

SONAR

Acoustic characteristics of side scan sonar and sub-bottom profiler for 10,000 m class ROV
p 172 N94-11916

Mapping bathymetric slopes from bathymetry data
[AD-A265923] p 290 N94-12350

Signal feature analysis using neural networks and psychoacoustics
[AD-A266048] p 340 N94-12398

SORET COEFFICIENT

On the role of Soret effect in concentration distribution in crystals growing from the melt p 112 N94-10173

Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215

SOUND FIELDS

Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131

SOUND GENERATORS

Direct numerical simulation of hot jets
p 156 N94-12295

SOUND TRANSDUCERS

Acoustic characteristics of side scan sonar and sub-bottom profiler for 10,000 m class ROV
p 172 N94-11916

SOUND WAVES

Virtual sound for virtual reality
[DE93-010519] p 321 N94-10291

Sensing glass transitions in thin polymer films on acoustic wave microsensors
[DE93-010805] p 87 N94-10295

Estimation of the direct acoustic radiation from turbulent spots using boundary layer velocity measurements
p 357 N94-10358

Photostimulated attenuation of hypersound in superlattice
[DE93-611231] p 357 N94-10408

Confinement of acoustical modes due to the electron-phonon interaction within 2D-electron gas
[DE93-613910] p 396 N94-10800

Acoustics of bubbly sediments
[AD-A263726] p 288 N94-11299

Near surface ocean processes: Acoustical observations, ambient sound, and Langmuir circulation
p 288 N94-11447

Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

NRL review for 1993
[AD-A265666] p 497 N94-12334

Preliminary analysis of the FLIP array data from the NOBS experiment
[AD-A265911] p 289 N94-12349

SOUNDING ROCKETS

MUZO: The programmable multi zone furnace for gas payloads and sounding rockets p 110 N94-10132

Microgravity experiments using TR-1A rocket
p 112 N94-10142

TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements
p 114 N94-10184

AD100/ADSIM, ACSL, and MATLAB output comparisons using frequency-response analysis
[DE93-009640] p 47 N94-11122

SOURCE PROGRAMS

Reuse: A knowledge-based approach
p 329 N94-11430

SOUTH KOREA

Overview of KITSAT p 36 N94-10683

Korea space program p 36 N94-10684

SOUTHERN OSCILLATION

Updated forecast of Atlantic seasonal hurricane activity for 1993 p 285 N94-11194

Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911

Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646

SOVIET SPACECRAFT

Russian space system for the Earth remote sensing
p 37 N94-10688

SPACE ADAPTATION SYNDROME

Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

SPACE BASED RADAR

Spaceborne SAR study: LDRD 1992
[DE93-011485] p 232 N94-11623

ERS-1 SAR calibration strategy p 235 N94-11726

ERS-1 preliminary antenna elevation pattern measured by ground-receivers p 235 N94-11727

Preliminary results of the experiment I-7
p 235 N94-11728

The ERS-1/CV 580 SAR cross-calibration experiment: Sault Ste Marie, October 26 - November 2, 1991
p 236 N94-11729

Calibration of the ERS-1 SAR fast-delivery images
p 236 N94-11730

Calibration results for the ERS-1, AIRSAR, and PHARS p 236 N94-11731

An experiment for the radiometric calibration of the ERS-1 SAR p 236 N94-11733

Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734

SAR interferometry experiments with ERS-1
p 237 N94-11735

SAR-interferometry applying ERS-1: Some preliminary test results p 237 N94-11736

Utilisation of ERS-1 data for mapping of Antarctica
p 237 N94-11740

Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR
p 226 N94-12746

SPACE CHARGE

A parallel implementation of particle tracking with space charge effects on an Intel iPSC/860
[DE93-012307] p 335 N94-10340

Nonlinear space charge effect of bunched beam in linac
[DE93-612176] p 371 N94-10409

Effect of effective mass differences on the tunneling current-voltage behaviour of a resonant diode in the presence of space charge build-up
[DE93-613817] p 142 N94-10799

Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117

SPACE COLONIES

Exploration planning in the context of human exploration and development of the Moon p 474 N94-12229

SPACE COMMERCIALIZATION

Potential markets for advanced satellite communications
[NASA-CR-191145] p 41 N94-10512

Landsat as a commercial enterprise
[INPE-5477-TAE/019] p 232 N94-11524

The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document
p 421 N94-11575

Special investigation report: Commercial space launch incident, launch procedure anomaly orbital sciences corporation PEGASUS/SCD-1, 80 nautical miles east of Cape Canaveral, Florida, February 9, 1993
[PB93-917003] p 40 N94-11893

SPACE COMMUNICATION

Use of low orbital satellite communications systems for humanitarian programs p 308 N94-11808

SPACE DEBRIS

Satellite situation report, volume 32, no. 1
[NASA-TM-109233] p 42 N94-10562

Satellite situation report, volume 32, no. 2
[NASA-TM-109234] p 42 N94-10563

Satellite situation report, volume 31, no. 4
[NASA-TM-109232] p 39 N94-10659

The magnitude of impact damage on LDEF materials
[NASA-CR-188258] p 43 N94-10666

Modelling hypervelocity impacts into aluminum structures based on LDEF data p 190 N94-12178

Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189

SPACE ERECTABLE STRUCTURES

Advances in adaptive structures at Jet Propulsion Laboratory p 72 N94-11344

On-orbit servicing for USAF space missions: A phased development approach p 348 N94-11571

Definition of spacecraft standard interfaces by the NASA Space Assembly and Servicing Working Group (SASWG) p 348 N94-11574

SPACE EXPLORATION

ESA/ESOC: 25 years
[ESA-BR-90] p 485 N94-11379

Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527

In-space operations for lunar and Mars space transfer vehicles p 348 N94-11568
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Mars exploration missions p 482 N94-12327
Technical problems on lunar an planetary exploration mission p 482 N94-12328

SPACE LABORATORIES
Advanced protein, crystallization facility and associated new developments p 39 N94-10119
The International Microgravity Laboratory, a Spacelab for materials and life sciences p 125 N94-10249
The critical facility on IML-1 p 44 N94-10250
Effect of double density caging during Space Shuttle transport of laboratory rats
[NASA-CR-193228] p 300 N94-11180

SPACE LOGISTICS
Definition of spacecraft standard interfaces by the NASA Space Assembly and Servicing Working Group (SASWG) p 348 N94-11574

SPACE MAINTENANCE
On-orbit refueling p 38 N94-11566
Preliminary analysis of the benefits derived to US Air Force spacecraft from on-orbit refueling
p 38 N94-11567
Forecasting the impact of virtual environment technology on maintenance training p 314 N94-11570
On-orbit servicing for USAF space missions: A phased development approach p 348 N94-11571
More sense for less cents: Cost effective servicing of remote sensing satellites p 348 N94-11572
Space Station maintenance studies using plaid graphics p 335 N94-11578
Robotic servicing on Earth orbiting satellites
p 45 N94-11579

SPACE MANUFACTURING
Solidification in immiscible systems: The influence of processing conditions on resulting microstructures
p 112 N94-10174
Space Solar Power Program
[DE93-011750] p 55 N94-11675

SPACE MISSIONS
An analysis of the modes and states for generic avionics
[NASA-CR-188253] p 27 N94-10664
The 1987 RIACS annual report
[NASA-CR-193220] p 324 N94-11046
Analyzing human errors in flight mission operations
p 314 N94-11534
On-orbit servicing for USAF space missions: A phased development approach p 348 N94-11571
Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577
Summary of the pre-AO of the JEM onboard scientific and engineering experiments for refrigerator utilization
p 129 N94-11832
Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations
p 476 N94-12242
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Significance and scenarios of lunar and planetary exploration missions p 482 N94-12324
Technical problems on lunar an planetary exploration mission p 482 N94-12328
Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

SPACE NAVIGATION
NASA's first in-space optical gyroscope: A technology experiment on the X ray Timing Explorer spacecraft
[NASA-TM-109242] p 170 N94-10667
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152

SPACE OBSERVATIONS (FROM EARTH)
The 1.2 to 3.5 microns observations of asteroid 4179 Toutatis p 430 N94-12111

SPACE PLASMAS
Solar wind channels for MeV particles
[DE93-012648] p 482 N94-10741
Imaging of magnetospheric dynamics using low energy neutral atom detection
[DE93-012656] p 275 N94-10742
The influence of the propagation medium on the sensitivity and resolution of meter wavelength aperture synthesis systems p 134 N94-11062

SPACE PLATFORMS
Robotic servicing on Earth orbiting satellites
p 45 N94-11579
Spaceborne SAR study: LDRD 1992
[DE93-011485] p 232 N94-11623

SPACE POWER REACTORS
The 40 kWe S-PRIME Thermionic Design and Technology Demonstration Program
[DE93-004738] p 40 N94-10147
A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529
Fully coupled neutronic and hydrodynamic analysis of space nuclear reactor reentry accidents
[DE93-005459] p 372 N94-10890
A facility for testing 10- to 100-kWe space power reactors
[DE92-040420] p 372 N94-11296
Proceedings of the 12th Space Photovoltaic Research and Technology Conference (SPRAT 12)
[NASA-CP-3210] p 48 N94-11380
TFE verification program
[DE93-009609] p 373 N94-11694

SPACE PROBES
Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

SPACE PROCESSING
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1
[ESA-SP-333-VOL-1] p 99 N94-10070
Gas film levitator for containerless processing of glasses in microgravity conditions: Early concept and technology demonstration p 108 N94-10122
TEMPUS: An electromagnetic levitation facility for containerless processing under micro-g in Spacelab
p 109 N94-10125
Microgravity Applications Furnace Facility (MAFF) for parabolic flights p 109 N94-10128
High temperature processing and diagnostic technologies for microgravity applications
p 110 N94-10130
Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139
AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141
Microgravity experiments using TR-1A rocket
p 112 N94-10142
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2
[ESA-SP-333-VOL-2] p 112 N94-10171
Scientific specifications for an automated facility for growing large semiconducting crystals from the melt in space p 114 N94-10180
Variations of the temperature profile in the gradient furnace GFQ within a cylindrical sample used for directional solidification p 114 N94-10181
Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182
Convection related radial segregation in an idealized horizontal Bridgman configuration p 115 N94-10185
TEM study of a space processed Al-Al2O3 metallic composite p 75 N94-10186
In situ observation of temperature dependence of concentration field during growth of KB5 crystals by holographic interferometry p 115 N94-10187
Crystal growth from low temperature vapour phase
p 115 N94-10191
Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193
Undercooled W-Re and Mo-Re drops in an ultra high vacuum drop tube p 86 N94-10195
Effects of a microgravity environment on the crystallization of biological macromolecules
p 117 N94-10198
EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition
p 118 N94-10207
Crystallization of zeolites in the microgravity environment of space p 119 N94-10210
Crystal growth in the Zone Melting Facility (ZMF)
p 119 N94-10213
Memory effects in the organometallic chemical beam epitaxy of compound semiconductors
[NASA-CR-193106] p 399 N94-11439
Cold press sintering of simulated lunar basalt
p 131 N94-12026
General overview of an integrated lunar oxygen production/brickmaking system p 131 N94-12027
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028

SPACE PROGRAMS
Analysis of the cost evaluation of ESA programmes and comparable national and international programmes
[GTS-92063] p 416 N94-10145
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
Current status of space activities in Asia Pacific region
p 35 N94-10677
Considerations for future regional space cooperation
p 35 N94-10678
Space research and remote sensing programmes in Bangladesh p 35 N94-10679
Overview of KITSAT p 36 N94-10683
Korea space program p 36 N94-10684
Space programme in Malaysia p 36 N94-10685
National space programmes and application of the remote sensing data in Mongolia p 36 N94-10686
Thailand ISY activities p 37 N94-10690
Panel discussion: Role of space program in the Asia Pacific Region p 37 N94-10694
Space Solar Power Program
[DE93-011750] p 55 N94-11675
Medical care delivery in the US space program
p 307 N94-11806

SPACE SHUTTLE MAIN ENGINE
Probabilistic evaluation of uncertainties and risks in aerospace components
[NASA-TM-105603] p 185 N94-10361
Application of powder metallurgy techniques to produce improved bearing elements for liquid rocket engines
[NASA-CR-193731] p 82 N94-10804
Enhancements to the Engine Data Interpretation System (EDIS)
[NASA-CR-192593] p 180 N94-10815
A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints
[NASA-TM-108418] p 188 N94-11275

SPACE SHUTTLE MISSIONS
Echocardiography in the flight program
p 309 N94-11993

SPACE SHUTTLE ORBITERS
Extraction of stability and control derivatives from orbiter flight data
[NASA-TM-4500] p 13 N94-10707
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820
Investigation of alternate power source for Space Shuttle Orbiter hydraulic system
[NASA-CR-193229] p 46 N94-10911
Vigilance problems in orbiter processing
p 314 N94-11536

SPACE SHUTTLE PAYLOADS
Compatibility tests for biological specimens to on-board experiments in the Space Shuttle flight
[NASDA-CNT-930003] p 301 N94-12278

SPACE SHUTTLES
Space Shuttle hypersonic aerodynamic and aerothermodynamic flight research and the comparison to ground test results
[NASA-TM-4499] p 13 N94-10820
Applying reliability models to the maintenance of Space Shuttle software p 330 N94-11434
Microgravity vibration isolation technology: Development to demonstration
[NASA-TM-106320] p 1 N94-11703

SPACE STATION FREEDOM
Microbiological test results using three urine pretreatment regimes with 316L stainless steel
[NASA-CR-192568] p 299 N94-10360
Achievements and challenges of Space Station Freedom's safety review process
[NASA-TM-106199] p 40 N94-10640
Space Station Redesign Team: Final report to the Advisory Committee on the Redesign of the Space Station
[NASA-TM-109241] p 42 N94-10663
Space Station redesign option A: Modular buildup concept
[NASA-TM-108415] p 43 N94-10808
Transportation systems analyses: Volume 1: Executive Summary
[NASA-CR-192583] p 41 N94-10826
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827
Large project experiences with object-oriented methods and reuse p 329 N94-11431
Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527
Space Station maintenance studies using plaid graphics p 335 N94-11578

Microgravity vibration isolation technology: Development to demonstration
[NASA-TM-106320] p 1 N94-11703

SPACE STATION POWER SUPPLIES
Space Station Freedom advanced photovoltaics and battery technology development planning
p 52 N94-11401

SPACE STATION STRUCTURES
Space Station maintenance studies using plaid graphics p 335 N94-11578

SPACE SUITS
Crew chief p 335 N94-11564

SPACE TECHNOLOGY EXPERIMENTS
The Second Workshop on Refrigerating System Utilization Onboard the JEM
[NASDA-CON-930001] p 129 N94-11831
Summary of the pre-AO of the JEM onboard scientific and engineering experiments for refrigerator utilization
p 129 N94-11832
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
Utilization of superconductivity in the area of space
p 131 N94-11843
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Summary of studies on JEM utilization experiment projects p 161 N94-12548
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549
Condensation phenomena p 162 N94-12550
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Research on two phase flow in microgravity
p 162 N94-12554
Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556

SPACE TRANSPORTATION
Space transportation alternatives for large space programs: The International Space University Summer Session, 1992
[NASA-TM-106271] p 40 N94-10811
Transportation systems analyses: Volume 1: Executive Summary
[NASA-CR-192583] p 41 N94-10826
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827
Space Solar Power Program
[DE93-011750] p 55 N94-11675

SPACE TRANSPORTATION SYSTEM
Transportation systems analyses: Volume 1: Executive Summary
[NASA-CR-192583] p 41 N94-10826
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827
Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

SPACE TRANSPORTATION SYSTEM FLIGHTS
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-57
[NASA-TM-107562] p 40 N94-10805
Echocardiography in the flight program
p 309 N94-11993

SPACE-TIME FUNCTIONS
Discrete space-time symmetries
[DE93-010199] p 341 N94-10259
On the generalized Jordan-Brans-Dicke theory
[DE93-613051] p 409 N94-10499
From the Weyl theory to a theory of locally anisotropic space-time
[DE92-644734] p 410 N94-10535
Wavelets and spacetime squeeze
p 379 N94-10604
Dimensional transition of the space-time at the minimum action near the planck scale
[DE93-754192] p 410 N94-10718
New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations
[NASA-TM-106226] p 150 N94-10939
A version of superstring with four space-time dimensions
[DE93-608196] p 412 N94-11163

SPACEBORNE ASTRONOMY
Propagation Effects in Space VLBI
p 134 N94-11060
Yohkoh Bragg Crystal Spectrometer light curves for Ca XIX (3.1631-3.1912A): 1 October 1991 - 30 September 1992
[AD-A266090] p 483 N94-12414

SPACEBORNE EXPERIMENTS
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 1
[ESA-SP-333-VOL-1] p 99 N94-10070
The formation and breakage of liquid bridges under microgravity p 100 N94-10071
Towards real time numerical stimulation of Marangoni convection: A help for telescience microgravity experiments p 102 N94-10087
Marangoni instability induced convection in an evaporating liquid droplet p 104 N94-10094
Bubbles and drops behaviour under low-gravity: A space experiment for the IML-2 mission p 104 N94-10098
Description of the liquid structure facility architecture and experimental demonstration of the diagnostic capabilities
p 39 N94-10118
Advanced protein, crystallization facility and associated new developments p 39 N94-10119
MUZO: The programmable multi zone furnace for gas payloads and sounding rockets p 110 N94-10132
The surface plasmon spectroscopy as diagnostic technique in microgravity experiments
p 110 N94-10133
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
The advanced fluid physics module: How to achieve scientific goals for Spacelab D2 p 39 N94-10136
Results of mission preparation support to microgravity experiments on board of Eureca 1 p 111 N94-10138
Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139
Analysis of the alignment of a Schlieren system for tele-operation p 111 N94-10140
AGF (Automatic Gradient Furnace): A proposed microgravity facility p 112 N94-10141
Microgravity experiments using TR-1A rocket
p 112 N94-10142
Experimental approach to non-contact calorimetry in space p 112 N94-10143
Proceedings of the 8th European Symposium on Materials and Fluid Sciences in Microgravity, volume 2
[ESA-SP-333-VOL-2] p 112 N94-10171
Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179
Results of crystal growth experiments by FZM on Zona facilities in microgravity p 116 N94-10193
EUSO-D2-experiment: Unidirectional solidification with quenching of an AlSi11 alloy p 86 N94-10199
Ripening of immiscible liquid droplets in microgravity with constrained Marangoni drift p 117 N94-10200
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition
p 118 N94-10207
A study of the quasibinary Al-W-Mo system. Part 1: Preliminary investigations and preparation for microgravity experiments p 119 N94-10211
Transport of heat and mass in near-critical fluids
p 122 N94-10230
Measurements of heat capacity in undercooled metals
p 87 N94-10231
Columbus proto-planetesimal dust aggregation experiment p 123 N94-10236
Use of inert immiscible liquid for crystal separation out of its feeding solution in weightlessness
p 124 N94-10242
Single bubble experiments in pool boiling: Results from TEXUS 26 p 124 N94-10243
The International Microgravity Laboratory, a Spacelab for materials and life sciences p 125 N94-10249
The critical facility on IML-1 p 44 N94-10250
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
Space environmental effects on the integrity of chromic acid anodized coatings
[NASA-CR-191468] p 55 N94-10947
Gas-Grain Simulation Facility (GGSF). Volume 2: Conceptual design definition
[NASA-CR-177613] p 423 N94-11229
An overview of the Defence Research Agency photovoltaic programme p 53 N94-11412
Microgravity vibration isolation technology: Development to demonstration
[NASA-TM-106320] p 1 N94-11703
Summary of the pre-AO of the JEM onboard scientific and engineering experiments for refrigerator utilization
p 129 N94-11832
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837
Utilization of superconductivity in the area of space
p 131 N94-11843
Lunar Scout Two spacecraft gravity experiment
p 459 N94-12152
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Summary of studies on JEM utilization experiment projects p 161 N94-12548
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549
Condensation phenomena p 162 N94-12550
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Research on two phase flow in microgravity
p 162 N94-12554
Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556

SPACEBORNE LASERS
Enhanced Damage-Resistant Optics for Spaceflight Laser Systems: Workshop findings and recommendations
[NASA-TM-109243] p 381 N94-11054

SPACEBORNE PHOTOGRAPHY
Preliminary report of lunar observations by the Near-Infrared Mapping Spectrometer (NIMS) during the second Galileo Earth-Moon encounter
p 425 N94-12140

SPACEBORNE TELESCOPES
An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008
Zerodur polishing process for high surface quality and high efficiency
[DE93-012596] p 87 N94-10271

SPACECRAFT CHARGING
Experimental measurement of the plasma conductivity of Z93 and Z93P thermal control paint
[NASA-TM-106284] p 43 N94-10756
Analysis of geophysical measurements and spacecraft interactions
[AD-A266064] p 43 N94-10944
NASCAP programmer's reference manual
[NASA-CR-191044] p 278 N94-11702

SPACECRAFT COMPONENTS
Spinforming characteristics of a net shape forming process p 56 N94-10004
Development tests for a high stability optical bench
p 62 N94-10047
Introducing SMaSE: An aide memoire on structural materials and space engineering p 63 N94-10053
The properties of perfluoropolyethers used for space applications
[NASA-TM-106275] p 88 N94-10864
The trial manufacture and test of critical components in docking mechanism
[NASDA-TMR-930005] p 44 N94-12280
Conceptual studies report on lunar and planetary exploration
[NASDA-TK-SS0438] p 481 N94-12323
Manned lunar exploration missions
p 482 N94-12326
Mars exploration missions p 482 N94-12327

SPACECRAFT CONFIGURATIONS
Space Station Redesign Team: Final report to the Advisory Committee on the Redesign of the Space Station
[NASA-TM-109241] p 42 N94-10663

SPACECRAFT CONSTRUCTION MATERIALS
Advanced Materials for Lightweight Structures
[ESA-SP-336] p 56 N94-10001
The EUREKA project portfolio in new materials
p 56 N94-10002
Spinforming characteristics of a net shape forming process p 56 N94-10004
Design and development of a CFRP central cylinder for satellites p 56 N94-10007
Design and manufacturing of filament wound thrust cylinder p 57 N94-10010
Design concepts for load-carrying hot structures for reentry bodies p 57 N94-10012
Hybrid materials for use at elevated temperatures
p 57 N94-10013
Analytical prediction and test verification of the multiaxial behaviour of high-strength steel for lightweight structures
p 58 N94-10016
Aluminium-lithium forgings: Properties and potential satellite applications p 58 N94-10021
Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022
Investigations on aluminium-lithium alloys for damage tolerant application p 59 N94-10023

- Design and manufacturing of CFRP rings by RTM p 59 N94-10025
- Aluminum-beryllium alloys for aerospace applications p 60 N94-10029
- Ceramic matrix composites: High performance materials for space application p 62 N94-10044

Spatial variation in the seasonal south polar cap of Mars as observed by Mariner 7 p 456 N94-12134

Mass and spatial distribution of carbonaceous component in Comet Halley p 433 N94-12263

Sea surface temperature difference between NOAA/AVHRR and in-situ observation p 215 N94-12680

Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744

Trajectory curving in underwater propagation of light p 226 N94-12748

Mixing of drifter ensemble by mesoscale currents p 228 N94-12760

SPATIAL FILTERING

Presort processor --- optical filtering [AD-A263872] p 382 N94-11300

Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485

SPATIAL RESOLUTION

Interferometric and optical tests of water window imaging x ray microscopes [NASA-CR-193369] p 375 N94-10506

Characterization of a scannerless LADAR system [DE93-011582] p 174 N94-10959

Numerical simulations of thermal convection in rapidly rotating spherical fluid shells p 153 N94-11635

SPECIFIC HEAT

A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114

The High Precision Thermostat HPT-HYDRA p 109 N94-10124

Thermophysical properties of undercooled liquid metals p 86 N94-10190

Measurements of heat capacity in undercooled metals p 87 N94-10231

Thermodynamic model of air in chemical equilibrium p 7 N94-10448

SPECIFIC IMPULSE

In-reactor testing of the closed cycle gas core reactor: The Nuclear Light Bulb concept [DE93-004053] p 370 N94-10149

SPECIFICATIONS

Test specifications, specimen design and instrumentation test data interpretation [DE93-012338] p 188 N94-11367

METEOSAT second generation programme SEVIRI: An enhanced visible and IR radiometer for meteorology p 212 N94-12667

SPECKLE INTERFEROMETRY

Material characterization and modeling with shear ography [NASA-CR-192576] p 185 N94-10342

SPECTRA

Stationary spectra in a magnetized current-carrying plasma [DE93-617847] p 386 N94-10397

Coherence effects in radiometry and in spectroscopy [DE93-013437] p 75 N94-10519

Stationary spectra in a sheared plasma (linear limit) [DE93-617850] p 387 N94-10540

Polar mesospheric waves and structure [AD-A265360] p 279 N94-12561

SPECTRAL BANDS

Review of SHARC 2.0 O3 kinetics and spectroscopy [AD-A265481] p 274 N94-10496

Thermographic properties of eight blue-emitting phosphors [DE93-011459] p 78 N94-11622

A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053

Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184

Computational methods for problems in aerodynamics using parallel and vector architectures [AD-A265626] p 16 N94-12377

SPECTRAL EMISSION

Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

SPECTRAL ENERGY DISTRIBUTION

Comparison of multiresolution techniques for digital signal processing [AD-A265364] p 138 N94-12406

SPECTRAL METHODS

A spectral nodal method for the solution of the Sn equations in x, y geometry for highly absorbing deep penetration problems [DE93-613520] p 349 N94-10636

New developments in the method of space-time conservation element and solution element: Applications to the Euler and Navier-Stokes equations [NASA-TM-106226] p 150 N94-10939

Computational methods for problems in aerodynamics using parallel and vector architectures [AD-A265626] p 16 N94-12377

DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

Boundary conditions and bifurcations in plane Poiseuille flow p 166 N94-12634

SPECTRAL REFLECTANCE

High-reflectance water mass in Off-Sanriku area observed by CZCS p 200 N94-11951

A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053

Reflectance spectra of sulfate-and carbonate-bearing Fe(3+)-doped montmorillonites as Mars soil analogs p 445 N94-12070

The effects of atmospheric pressure on infrared reflectance spectra of Martian analogs p 445 N94-12071

Spectral and multispectral imaging studies of lunar mantled mare deposits p 446 N94-12079

Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097

How diverse is the asteroid belt? p 430 N94-12124

Simulation of possible regolith optical alteration effects on carbonaceous chondrite meteorites p 430 N94-12163

Spectral mixing models of S-Type asteroids p 431 N94-12164

Olivine-rich asteroids, pallasitic olivine and olivine-metal mixtures: Comparisons of reflectance spectra p 431 N94-12171

Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244

A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245

Properties of spectral reflectance of crown and crown structure of mangrove species in Okinawa p 218 N94-12700

Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744

Planetary astronomy of Mars. Mars data reduction [NASA-CR-193515] p 424 N94-12768

SPECTRAL RESOLUTION

Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures [AD-A264920] p 245 N94-11851

Using high spectral resolution spectrophotometry to study broad mineral absorption features on Mars p 446 N94-12077

Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184

SPECTRAL SIGNATURES

Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244

SPECTRAL THEORY

HEAO-1 analysis of Low Energy Detectors (LED) [NASA-CR-194087] p 424 N94-12574

SPECTROMETERS

A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source [DE93-009795] p 75 N94-10338

Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD [DE93-013593] p 363 N94-10748

Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978

Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165

Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations p 476 N94-12242

SPECTROPHOTOMETRY

Using high spectral resolution spectrophotometry to study broad mineral absorption features on Mars p 446 N94-12077

The 1.2 to 3.5 microns observations of asteroid 4179 Toutatis p 430 N94-12111

Disk-resolved spectral characteristics of Saturn's medium-sized satellites p 471 N94-12213

Properties of spectral reflectance of crown and crown structure of mangrove species in Okinawa p 218 N94-12700

Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755

SPECTRORADIOMETERS

Global monitoring of atmospheric properties by the EOS MODIS [NASA-TM-109237] p 231 N94-11485

SPECTROSCOPIC ANALYSIS

Laser spectroscopy [DE93-009403] p 173 N94-10255

Review of SHARC 2.0 O3 kinetics and spectroscopy [AD-A265481] p 274 N94-10496

The multiplicity spectra of the (169)Tm(n, gamma) reaction [DE93-617733] p 364 N94-10835

Radiation effects in Ga(0.47)In(0.53)As solar cells p 52 N94-11404

Characterization of an excimer laser-ablated plasma and applications p 392 N94-11450

Moessbauer spectroscopy of the SNC meteorite Zagami p 428 N94-12016

Measurements of cosmogenic nuclides in lunar rock 64455 p 437 N94-12033

Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045

Disk-resolved spectral characteristics of Saturn's medium-sized satellites p 471 N94-12213

Atmospheric and spectroscopic research in the far infrared [NASA-CR-193551] p 280 N94-12582

Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756

SPECTROSCOPY

The surface plasmon spectroscopy as diagnostic technique in microgravity experiments p 110 N94-10133

Photodetachment studies on few-electron atomic negative ions [DE93-008474] p 358 N94-10154

A new matrix for the ageless 21.6-keV Eu-151 nuclear gamma ray Moessbauer source [DE93-009795] p 75 N94-10338

Coherence effects in radiometry and in spectroscopy [DE93-013437] p 75 N94-10519

Strange meson spectroscopy in K(omega) and K(phi) at 11 GeV/c and Cherenkov ring imaging at SLD [DE93-013593] p 363 N94-10748

Ellipsometry studies of semiconductors surface cleaning [AD-A265150] p 142 N94-11094

Applications of spectroscopic ellipsometry to microelectronics [AD-A265148] p 143 N94-11159

FFTSCAN: A program for spectral smoothing using Fourier transforms [AD-A264921] p 278 N94-11852

Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes [AD-A265197] p 373 N94-11880

Moessbauer spectroscopy of the SNC meteorite Zagami p 428 N94-12016

Reflectance spectra of sulfate-and carbonate-bearing Fe(3+)-doped montmorillonites as Mars soil analogs p 445 N94-12070

Si-29 NMR spectroscopy of naturally-shocked quartz from Meteor Crater, Arizona: Correlation to Kieffer's classification scheme p 80 N94-12087

Nonlinear optical spectroscopy of Ag(111) in electrolyte and in vacuum [AD-A265622] p 79 N94-12534

SPECTRUM ANALYSIS

The multiplicity spectra of the (169)Tm(n, gamma) reaction [DE93-617733] p 364 N94-10835

Measurement methods and algorithms for comparison of local and remote clocks p 354 N94-10987

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 266 N94-11200

The IR properties of ringed galaxies and the IRAS database [NASA-CR-194286] p 426 N94-11590

The morphologies of distant radio galaxies p 426 N94-11597

Implementation and use of a computational ray-tracing program for the design and analysis of complex optical systems [AD-A265075] p 382 N94-11653

The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708

The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934

Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997

Cardiovascular dynamics during space sickness and deconditioning p 311 N94-12007

Effects of microscopic iron metal on the reflectance spectra of glass and minerals p 436 N94-12024

Fourier domain target transformation analysis in the thermal infrared p 258 N94-12030

A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053

Spectral analysis of the gravity and topography of Mars p 444 N94-12065

The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110

Spectral mixing models of S-Type asteroids p 431 N94-12164

Olivine-rich asteroids, pallasitic olivine and olivine-metal mixtures: Comparisons of reflectance spectra p 431 N94-12171

Composition of the Martian aerosols through near-IR spectroscopy p 475 N94-12235

Chondrites, S asteroids, and space weathering: Thumping noises from the coffin? p 433 N94-12244

Cronstedtite and iron sulfide mineralogy of CM-type carbonaceous chondrites from cryogenic Moessbauer spectra p 433 N94-12257

Comparison of multiresolution techniques for digital signal processing [AD-A265364] p 138 N94-12406

Spectrum analysis in beam diagnostics [DE93-013401] p 373 N94-12601

Characterization of dissolved organic matter in the ocean by using the fluorescence excitation-emission matrix p 211 N94-12659

Field research of wind wave spectrum variability p 223 N94-12727

Observations of film slicks and internal waves with Ka-band scatterometer p 225 N94-12741

Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745

Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755

Ecological application of Surface Enhanced Raman Spectroscopy p 227 N94-12756

The algorithm of primary production determination p 228 N94-12761

Non-image visible polarization remote sensing of the ocean p 229 N94-12762

SPEECH RECOGNITION

A new HMM learning algorithm for continuous speech recognition [NHK-SERIAL-413] p 132 N94-10560

A real-time spoken-language system for interactive problem solving [AD-A266046] p 324 N94-11104

SPHERES

Wetting effects on nylon spheres engulfment in ice p 115 N94-10189

SPHERICAL SHELLS

Microgravity combustion of dust suspension in a spherical chamber p 80 N94-10248

SPHERULES

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

Arroyo el Mimbral, Mexico, K/T unit: Origin as debris flow/turbidite, not a tsunami deposit p 281 N94-12084

K/T spherules from Haiti and Wyoming: Origin, diagenesis, and similarity to some microtektites p 281 N94-12085

Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160

KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161

Iron and nickel isotopic mass fractionation in deep-sea spherules p 282 N94-12199

Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238

SPIN DYNAMICS

Crossing-odd spin effects in the dipole model of hadron scattering [DE93-617692] p 362 N94-10551

Squeezed spin states: Squeezing the spin uncertainty relations p 377 N94-10585

SPIN GLASS

The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3 [DE93-617882] p 395 N94-10525

SPIN-LATTICE RELAXATION

Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5) [DE93-011359] p 403 N94-12363

SPINEL

The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052

SPLINE FUNCTIONS

Spline approximation for system of n-th order nonlinear ordinary differential equations [DE93-608188] p 346 N94-11507

On convexity and Schoenberg's variation diminishing splines [DE93-619673] p 346 N94-11632

SPOILERS

A determination of the external forces required to move the benchmark active controls testing model in pure plunge and pure pitch [NASA-TM-107743] p 16 N94-12421

SPONTANEOUS EMISSION

Improved super luminescent light source specification [AD-D015746] p 176 N94-12329

SPORADIC E LAYER

Results from a year-long auroral-E measurement campaign [AD-A265059] p 278 N94-11871

SPOT (FRENCH SATELLITE)

Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea p 246 N94-12478

Example of SPOT/ERS-1 complementarity p 247 N94-12479

TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497

SPRAY NOZZLES

Atomization characteristics of a prefilming airblast atomizer [NAL-TM-644] p 148 N94-10727

Performance aspects of de Laval spray-forming nozzles [DE93-013671] p 163 N94-12604

SPRAYED COATINGS

Performance aspects of de Laval spray-forming nozzles [DE93-013671] p 163 N94-12604

SPRAYERS

Atomization characteristics of a prefilming airblast atomizer [NAL-TM-644] p 148 N94-10727

Combustion chamber analysis code [NASA-CR-192585] p 46 N94-10934

On the combustion of a laminar spray [NASA-TM-106210] p 28 N94-11238

KIVA-3: A KIVA program with block-structured mesh for complex geometries [DE93-011986] p 77 N94-11249

Performance aspects of de Laval spray-forming nozzles [DE93-013671] p 163 N94-12604

SPREAD SPECTRUM TRANSMISSION

A fiber optic network system with low crosstalk using code-division multiplexing [AD-D015763] p 374 N94-10376

SPREADING

Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh) [DE93-621658] p 392 N94-11213

SPUTTERING

Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films [DE93-767974] p 82 N94-10732

Sources of Na for the Io atmosphere p 455 N94-12127

Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232

Damage threshold study of ion beam sputtered coatings for a visible high-repetition laser at LLNL [DE93-013430] p 95 N94-12602

SQUALLS

The cloud radiative feedback of a midlatitude squall line system and implication for climate study [DE93-010511] p 283 N94-10290

SQUARE WELLS

P-matrix description of the two-particle interaction [DE93-617690] p 361 N94-10549

SQUEEZED STATES (QUANTUM THEORY)

The Second International Workshop on Squeezed States and Uncertainty Relations [NASA-CP-3219] p 375 N94-10564

Smoothly deformed light p 375 N94-10566

Nonclassical states of the second optical harmonic in the presence of self-action p 375 N94-10567

Quantum noise and squeezing in optical parametric oscillator with arbitrary output coupling p 375 N94-10568

One dimensional representations in quantum optics p 375 N94-10570

Harmonic oscillator interaction with squeezed radiation p 376 N94-10571

Photon number amplification/duplication through parametric conversion p 376 N94-10572

An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions p 349 N94-10573

Non classical effects in planar waveguides p 376 N94-10574

Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light p 376 N94-10575

Generalised squeezing and information theory approach to quantum entanglement p 377 N94-10580

Completeness properties of the minimum uncertainty states p 349 N94-10581

Dissipation in a squeezed-state environment p 370 N94-10584

Squeezed spin states: Squeezing the spin uncertainty relations p 377 N94-10585

Quantum entropy and uncertainty for two-mode squeezed, coherent and intelligent spin states p 377 N94-10586

The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587

Uncertainty relations, zero point energy and the linear canonical group p 378 N94-10590

Supersqueezed states from squeezed states p 378 N94-10591

Squeezed states of electrons and transitions of the density of states p 370 N94-10593

Quantum mechanical effects of topological origin p 378 N94-10594

Nonunitary and unitary approach to Eigenvalue problem of Boson operators and squeezed coherent states p 350 N94-10595

Collision-induced squeezing in a harmonic oscillator p 379 N94-10597

Squeezed colour states in gluon jet p 379 N94-10599

New squeezed landau states p 379 N94-10601

Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603

Wavelets and spacetime squeeze p 379 N94-10604

Non-stationary and non-linear dispersive medium as external field which generates the squeezed states p 380 N94-10605

Relation of squeezed states between damped harmonic and simple harmonic oscillators p 380 N94-10606

Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607

Infinite-mode squeezed coherent states and non-equilibrium statistical mechanics (phase-space-picture approach)
[LBL-32695] p 380 N94-10608

Coherent states and uncertainty relations for the damped harmonic oscillator with time-dependent frequency p 380 N94-10611

Quantum processes in resonators with moving walls p 380 N94-10612

SQUID (DETECTORS)

Large array SQUID magnetometer for NDE
[AD-A264799] p 304 N94-11449

Superconducting SQUID amplifiers for IR detectors and other applications, phase 2
[AD-A265447] p 145 N94-12333

STABILITY

Granular instability in fluidized beds: A small-over-large instability p 122 N94-10235

Enhanced stability of magic clusters: A case study of icosahedric Al(sub 12)X, X=B, Al, Ga, C, Si, Ge, Ti, As
[DE93-613644] p 395 N94-10386

Stability by linear processes
[NASA-CR-194131] p 323 N94-10862

Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350

Analytical details of the instability threshold of the laser-Lorenz model
[DE93-619707] p 175 N94-11634

Resist materials design: Base-catalyzed chemical amplification
[AD-A265286] p 145 N94-11819

Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577

STABILITY DERIVATIVES

Extraction of stability and control derivatives from orbiter flight data
[NASA-TM-4500] p 13 N94-10707

Nonlinear aspects of transonic aeroelasticity
[UTIAS-RN-345] p 15 N94-11857

STABILITY TESTS

Marangoni instability in a liquid layer with two free surfaces
[NASA-TM-106166] p 152 N94-11376

Stability analysis and aerospace vehicle dynamics p 31 N94-11491

Stability model of the atmosphere p 32 N94-11500

STABILIZATION

Magnetohydrodynamic computation of feedback stabilization of resistive-shell instabilities in the reversed field pinch
[DE93-013466] p 388 N94-10852

STABILIZED PLATFORMS

Development of a balloon-borne stabilized platform for measuring radiative flux profiles in the atmospheric boundary layer
[DE93-013186] p 274 N94-10323

STAGE SEPARATION

Estimation of the attitude motion of the small satellite ORIZURU
[NAL-TR-1145] p 42 N94-10366

STAGNATION FLOW

A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces
[DE93-012767] p 77 N94-11370

STAINLESS STEELS

Microbiological test results using three urine pretreatment regimes with 316L stainless steel
[NASA-CR-192568] p 299 N94-10360

Welding tritium aged stainless steel
[DE93-011782] p 181 N94-11228

STANDARDIZATION

Progress on GPS standardization p 24 N94-10965

MIL-STDS and PTTI: What's available and what needs to be done p 352 N94-10973

Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Incorporated
[DE93-012509] p 420 N94-11369

Longitudinal study of astronaut health: Mortality in the years 1959-1991 p 312 N94-11560

The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document p 421 N94-11575

STANDARDS

An intercomparison of the radium mass standards of the UK and the USSR: 2
[NPL-RSA(EXT)-34] p 359 N94-10266

The 17th Transducer Workshop
[AD-A265526] p 141 N94-10509

Correspondence standards
[NHB-1450.10B] p 420 N94-11589

Analysis and guidelines for reusable Ada software
[AD-A264918] p 332 N94-11850

STANDING WAVES

The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682

STAR FORMATION

Detection of accreting circumstellar gas around weak emission-line Herbig Ae/Be stars
[NASA-TM-108256] p 424 N94-11306

Analysis of interstellar fragmentation structure based on IRAS images
[NASA-CR-193518] p 428 N94-12767

STARCHES

Paint removal using wheat starch blast media p 128 N94-10627

STATE ESTIMATION

Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338

STATE VECTORS

Nonlinear and dynamic analysis of flight p 32 N94-11496

STATIC ELECTRICITY

The response of an electron in a biased double well to a strong laser: Delocalization and low frequency generation
[AD-A265169] p 366 N94-11100

STATIC LOADS

Nonlinear response of a clamped-clamped beam with internal resonance under sinusoidal excitation p 186 N94-10897

STATIC PRESSURE

Dynamic tester for rotor seals and bearings
[NASA-CASE-MFS-28493-1] p 33 N94-10669

STATIC STABILITY

X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504

STATISTICAL ANALYSIS

General renormalized statistical approach with finite cross-field correlations
[DE93-617846] p 386 N94-10396

Stationary spectra in a plasma with a shear (renormalized statistical approach with non-zero eigenfrequencies)
[DE93-617851] p 386 N94-10523

A window least squares algorithm for statistical noise smoothing of 2D-ACAR data
[DE93-613828] p 395 N94-10537

The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839

Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 386 N94-10840

Advanced statistical methods for improved data analysis of NASA astrophysics missions
[NASA-CR-193514] p 425 N94-10943

Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber
[NASA-TM-109188] p 315 N94-11258

Three-dimensional object recognition using an unsupervised BCM network: The usefulness of distinguishing features
[AD-A264576] p 304 N94-11261

Statistical and optimization methods to expedite neural network training for transient identification
[DE93-009985] p 340 N94-11644

General aviation aircraft-normal acceleration data analysis and collection project
[AD-A265055] p 26 N94-11858

Computing science and statistics, Volume 24: Graphics and visualization
[AD-A265181] p 332 N94-11878

Statistical process control in the hybrid microelectronics manufacturing industry: A Navy view point
[AD-A265164] p 145 N94-11884

A statistical method to determine aerosol path radiance and its application to atmospheric correction for CZCS imagery p 191 N94-11897

Remote sensing of the suspended matter distribution with high concentration in China Sea p 192 N94-11901

Statistical study of HF ocean radar echo p 139 N94-11905

A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920

Estimation of solar radiation at the sea surface with geostationary meteorological satellite data p 196 N94-11926

Incident shortwave and longwave radiations over the western North Pacific and the Sea of Okhotsk derived from GMS-WEFAX images p 205 N94-11982

A statistical analysis of sea state surface ERS-1 SAR-wave mode imagettes p 251 N94-12507

Further study of the Non-Regression-Coefficient SST retrieval method p 213 N94-12674

Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679

Sea surface temperature difference between NOAA/AVHRR and in-situ observation p 215 N94-12680

Coastal upwelling monitored by satellite data: Methodologies and results p 220 N94-12712

Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721

Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

STATISTICAL CORRELATION

Chaos, entropy, and reversibility: A simple example p 31 N94-11495

Analysis of gravity, magnetic, and seismic reflection data from Tibet and neighboring regions of China
[NASA-CR-193405] p 278 N94-11886

The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931

STATISTICAL DISTRIBUTIONS

Imprecise highest density regions related to intervals of measures
[MEMO-COSOR-92-54] p 347 N94-10876

A CM chondrite cluster and CM streams p 432 N94-12215

STATISTICAL MECHANICS

Lattice gas hydrodynamics: Theory and simulations
[DE93-013297] p 147 N94-10320

Infinite-mode squeezed coherent states and non-equilibrium statistical mechanics (phase-space-picture approach)
[LBL-32695] p 380 N94-10608

STATISTICAL TESTS

Object recognition in industrial environment by means of tactile sensor
[ITN-93-85200] p 178 N94-10393

STATOR BLADES

Viscous analysis of three-dimensional rotor flows using a multigrid method
[NASA-TM-106266] p 152 N94-11481

STATORS

Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes
[NASA-TP-3383] p 15 N94-11133

STEADY STATE
Material removal processes: Engineering mechanics consideration
[DE93-010733] p 126 N94-10293
A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585

STEEL STRUCTURES
Microstructure-based fatigue life prediction methods for naval steel structures
[AD-A265429] p 85 N94-12426

STEELS
Spinforming characteristics of a net shape forming process p 56 N94-10004
Heavy-section steel technology program
[DE93-009222] p 184 N94-10155
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials
[DE93-008717] p 88 N94-10891
Immediate response to free product discovery
[PB93-182970] p 265 N94-11015

STELLAR COLOR
The controlling parameters of the integrated flux of a stellar population p 426 N94-11187

STELLAR COMPOSITION
The abundances of the elements in sharp-lined early type stars
[NASA-CR-194055] p 424 N94-12573

STELLAR ENVELOPES
Detection of accreting circumstellar gas around weak emission-line Herbig Ae/Be stars
[NASA-TM-108256] p 424 N94-11306
Why convective heat transport in the solar nebula was inefficient p 458 N94-12143

STELLAR EVOLUTION
The controlling parameters of the integrated flux of a stellar population p 426 N94-11187
Carbon and nitrogen in Type 2 supernova diamonds p 431 N94-12166

STELLAR MASS
Carbon and nitrogen in Type 2 supernova diamonds p 431 N94-12166

STELLAR MASS ACCRETION
Detection of accreting circumstellar gas around weak emission-line Herbig Ae/Be stars
[NASA-TM-108256] p 424 N94-11306

STELLAR MASS EJECTION
Nuclear astrophysics
[DE93-010569] p 425 N94-10292

STELLAR OCCULTATION
Wave structure in planetary rings p 434 N94-11185
Submission of Earth-based ring occultation observations to the NASA planetary data system rings discipline node
[NASA-CR-193469] p 427 N94-12557

STELLARATORS
Transport mechanisms acting in toroidal devices: A theoretician's view
[DE93-013463] p 385 N94-10310
Characterization of high-power RF structures using time-domain field codes
[DE93-013416] p 132 N94-10518
Looking beyond ITER: Toroidal concept improvement
[DE93-012762] p 388 N94-10744
Calculation of Mercier stability criterium in stellarators
[DE93-621599] p 389 N94-11091
Possibilities of magnetic diagnostics in stellarators
[DE93-621608] p 389 N94-11092
Charged particle motion in torsatrons, part 1
[DE93-621639] p 389 N94-11119
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Probability of particle trapping/detrapping in torsatrons
[DE93-621641] p 390 N94-11121
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field
[DE93-620983] p 391 N94-11174
Characteristics of ICR-produced peripheral plasma in the Uragan-3M torsatron
[DE93-621666] p 392 N94-11214
Magnetic island suppression in torsatron configurations
[DE93-621681] p 392 N94-11215

STEREOPHOTOGRAPHY
On resolution of underwater stereo photogrammetry p 172 N94-11966

STEREOSCOPY
Preliminary studies on the application of ERS-1 data to topographic mapping p 246 N94-12476

STIFFNESS
Analytical models for describing the mechanical behavior of fiber reinforced composites
[AD-A265906] p 74 N94-12347

STILBENE
Preparation of stable photopatternable polymeric materials for non-linear optics
[AD-A265359] p 95 N94-12577

STIRLING CYCLE
The superfluid Stirling refrigerator, a new method for cooling below 0.5 K
[DE93-012672] p 128 N94-11161

STIRLING ENGINES
Establishing baseline data for an experimental appratus that measures heat transfer under conditions of oscillating pressure and flow
[NASA-CR-193772] p 413 N94-12343

STISHOVITE
Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions p 282 N94-12149

STOCHASTIC PROCESSES
Canonical operator formulation of nonequilibrium thermodynamics
[DE93-613028] p 409 N94-10388
A multi-variance analysis in the time domain p 146 N94-10999
Kinetic effects in stochastic topologically nontrivial field
[DE93-621642] p 391 N94-11207
Simple kinetic model for plasma in stochastic helical field
[DE93-621643] p 391 N94-11208
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots
[DE93-621655] p 391 N94-11211
Further studies using matched filter theory and stochastic simulation for gust loads prediction
[NASA-TM-109010] p 26 N94-11587
A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767
Nonlinear resonance: Noise-assisted information processing in physical and neurophysiological systems
[AD-A265161] p 313 N94-11890
Mapping closures for turbulent combustion
[AD-A265671] p 79 N94-12378

STOICHIOMETRY
Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5)
[DE93-011359] p 403 N94-12363

STOKES LAW (FLUID MECHANICS)
Numerical simulation of multi-droplet hydrodynamic interactions in liquid dispersions p 114 N94-10182

STONY-IRON METEORITES
Metal-rich meteorites from the aubrite parent body p 430 N94-12142

STOPPING POWER
Experimental efforts and results in finding new heavy scintillators
[DE93-010406] p 371 N94-10156

STORAGE RINGS (PARTICLE ACCELERATORS)
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system
[DE93-011879] p 143 N94-11273

STORAGE STABILITY
Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938

STORAGE TANKS
Immediate response to free product discovery
[PB93-182970] p 265 N94-11015

STORMS (METEOROLOGY)
The impact of vegetation on the atmospheric boundary layer and convective storms p 277 N94-11480
Rainfall-runoff estimation using digital radar
[AD-A265390] p 286 N94-12408
A study of the Merritt Island, Florida sea breeze flow regimes and their effect on surface heat and moisture fluxes
[NASA-CR-4537] p 286 N94-12580

STOVL AIRCRAFT
Criteria for design of integrated flight/propulsion control systems for STOVL fighter aircraft
[NASA-TP-3356] p 30 N94-11134
Application of controller partitioning optimization procedure to integrated flight/propulsion control design for a STOVL aircraft
[NASA-TM-106265] p 30 N94-11251
Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft
[NASA-TM-104008] p 30 N94-11259

STRAIN ENERGY RELEASE RATE
Understanding cracking failures of coatings: A fracture mechanics approach p 187 N94-11218

STRAIN GAGES
Design and development of a miniature column-based interface (MCBI) stress gage
[AD-A266054] p 170 N94-10873
Fiber-optic interferometric strain gauge for smart structures applications: First flight tests p 71 N94-11340
Localized and distributed fiber-optic strain sensors embedded in composite materials
[UTIAS-346] p 73 N94-12013

STRAIN HARDENING
A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity
[NASA-TM-106122] p 188 N94-11482

STRAIN MEASUREMENT
An electro-optical system for the measurement of strains p 186 N94-10900
Smart structures at Aastra Corporation p 69 N94-11326
Fiber optic sensing for composite smart structures p 69 N94-11327
Strain measurement of carbon/epoxy composite with fibre optics white light quasi distributed polarimetric sensor p 69 N94-11328
Structural health monitoring using embedded fibre optic sensors p 22 N94-11334
Factors affecting the embedding of optical fibre sensors in advanced composite structures p 70 N94-11336
Fiber-optic sensor systems for measuring strain and the detection of acoustic emissions in smart structures p 71 N94-11337
Fiber-optic interferometric strain gauge for smart structures applications: First flight tests p 71 N94-11340
Localized and distributed fiber-optic strain sensors embedded in composite materials
[UTIAS-346] p 73 N94-12013

STRAIN RATE
Material removal processes: Engineering mechanics consideration
[DE93-010733] p 126 N94-10293
Facility for stress corrosion cracking test of irradiated material in high temperature water
[DE93-753189] p 84 N94-11593
Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

STRAITS
Tide-generated nonlinear internal wave packets in the Strait of Gibraltar observed by the synthetic aperture radar aboard the ERS-1 satellite p 252 N94-12510

STRAKES
Lift enhancement of a wing/strake using pneumatic blowing
[AD-A265074] p 26 N94-11872

STRANGE ATTRACTORS
Detecting non-linearities in stationary time series
[W-9223] p 344 N94-10906

STRANGENESS
Production of strange clusters in relativistic heavy ion collisions
[DE93-010876] p 359 N94-10303
Strangeness production with protons and pions
[DE93-010879] p 359 N94-10304
A generalized Bethe-Weizsaecker mass formula for strange hadronic matter
[DE93-011010] p 368 N94-11620

STRATA
The nonlinear evolution of modes on unstable stratified shear layers
[NASA-CR-191492] p 149 N94-10810
Post-impact alteration of the Manson impact structure p 282 N94-12188

STRATIFIED FLOW
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292
Mixing in a stratified shear flow: Energetics and sampling p 159 N94-12311

STRATIGRAPHY
The Lathrop Wells Volcanic Center: Status of field and geochronology studies
[DE93-008917] p 273 N94-10285
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Apollo 16 core 60013/14 as a product of path 1 and path 2 regolith evolution processes p 440 N94-12050
The great 8 MA event and the structure of the H-chondrite parent body p 429 N94-12058

Stratigraphy and sedimentology of the K/T boundary deposit in Haiti p 282 N94-12138
Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158
Geomorphology of Triton's polar materials p 466 N94-12185

STRATOSPHERE
Implications of aerosol retrieval and atmospheric correction in remote sensing p 205 N94-11978
Identification of cometary and asteroidal particles in stratospheric IDP collections p 430 N94-12115
Studies of dynamical processes affecting the distribution of stratospheric ozone [NASA-CR-193477] p 279 N94-12560
Stratospheric aircraft exhaust plume and wake chemistry [NASA-CR-191495] p 279 N94-12572

STREAK CAMERAS
Plans to improve the experimental limit in the comparison of the east-west and west-east one-way light propagation times on the rotating earth p 351 N94-10971

STREAMS
An application of reduced gravity model to mesoscale eddies p 199 N94-11945
SOFAR float tracking in the Shikoku basin p 206 N94-11986
On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987
A numerical study of deep convection at high latitudes p 210 N94-12652
Study on diffusion phenomena of river effluents issued into sea around Japan with satellite remote sensing data p 212 N94-12664
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan p 220 N94-12709
A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining p 224 N94-12733
Bottom currents and possibilities for near bottom layer environmental investigations in the Pacific by means of self contained bottom stations p 224 N94-12734
Convective and dynamic instability in meridional trenches p 225 N94-12739
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752
Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753
Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754
Mixing of drifter ensemble by mesoscale currents p 228 N94-12760
Generation of internal waves near the shelf boundary p 229 N94-12763
Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764
Model of Kuroshio region circulation p 229 N94-12765

STRESS (PHYSIOLOGY)
Motion and spatial disorientation systems: Special research capabilities [AD-A265155] p 303 N94-11097
P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1 [AD-A266072] p 304 N94-11224
Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995

STRESS (PSYCHOLOGY)
Aviators, air combat, and combat stress: An Air F orce commander's primer [AD-A265083] p 313 N94-11867

STRESS ANALYSIS
Design and development of a miniature column-based interface (MCBI) stress gage [AD-A266054] p 170 N94-10873
Imperfection sensitivity of the Brazier effect for orthotropic cylindrical shells [LR-687] p 186 N94-10879
An electro-optical system for the measurement of strains p 186 N94-10900
Computational gearing mechanics [NASA-CR-193666] p 181 N94-11157
Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity [DE93-011597] p 263 N94-11173
A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints [NASA-TM-108418] p 188 N94-11275
An analysis of fiber-matrix interface failure stresses for a range of ply stress states [NASA-TM-108999] p 67 N94-11276
RAMCAD (reliability, availability, and maintainability in computer-aided design) [AD-A265143] p 331 N94-11679
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
Application of a Reynolds stress model to separating boundary layers p 157 N94-12299
Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347
Advances in low carbon, high strength ferrous alloys [AD-A265264] p 85 N94-12532

STRESS CONCENTRATION
Analytical models for describing the mechanical behavior of fiber reinforced composites [AD-A265906] p 74 N94-12347

STRESS CORROSION
Corrosion behavior of metal matrix composites [AD-A265352] p 85 N94-12404

STRESS CORROSION CRACKING
Facility for stress corrosion cracking test of irradiated material in high temperature water [DE93-753189] p 84 N94-11593
Corrosion behavior of metal matrix composites [AD-A265352] p 85 N94-12404

STRESS DISTRIBUTION
Elastic plastic fracture mechanics methodology for surface cracks [NASA-CR-194129] p 185 N94-10712
Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

STRESS INTENSITY FACTORS
The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite [DE93-011690] p 73 N94-11612

STRESS MEASUREMENT
Design and development of a miniature column-based interface (MCBI) stress gage [AD-A266054] p 170 N94-10873

STRESS RATIO
Fatigue-life behavior and matrix fatigue crack spacing in unnotched SCS-6/Timetal 21S metal matrix composites [NASA-CR-191467] p 185 N94-10715

STRESS RELAXATION
Stress relaxation forming of Ariane 5 front skirt outer skin panels p 62 N94-10046
Investigation of the reason for the softening behaviour of filled polymers p 63 N94-10058
Time-temperature shift factors for gun propellants [AD-A264979] p 97 N94-10489
Crack suppression in GaInSb buffer layers initially under tensile stress [DE93-012839] p 396 N94-10745

STRESS TENSORS
A local dynamic model for large eddy simulation p 155 N94-12285

STRESS-STRAIN RELATIONSHIPS
A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity [NASA-TM-106122] p 188 N94-11482

STRESSES
Protective coatings for high-temperature polymer matrix composites [NASA-TM-106276] p 74 N94-12431

STRIATION
Electron runaway in RF discharges [DE93-771407] p 363 N94-10661

STRING THEORY
Some new/old approaches to QCD [DE93-010451] p 408 N94-10261
On renormalization group flow in matrix model [DE93-613050] p 409 N94-10413
Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088
A version of superstring with four space-time dimensions [DE93-608196] p 412 N94-11163
The solutions of cosmic string loop equation in expanding universe [DE93-619717] p 427 N94-11692
Divergences in the moduli space integral and accumulating handles in the infinite-genus limit [DE93-619722] p 346 N94-11693

STRINGS
On the relativistic string size at finite temperature [DE93-617658] p 409 N94-10394
Classical gravity coupled to Liouville theory [DE93-613049] p 275 N94-10798

STRIPPING
Environmentally Safe and Effective Processes for Paint Removal [AGARD-R-791] p 126 N94-10613
Paint removal activities in the US Navy p 126 N94-10614
Paint removal activities in Canada p 126 N94-10615
Procedures without danger to the environment and efficiency (PSDEE) for the removal of paint. Point on the French activities concerning the removal of paint p 126 N94-10616
Paint removal activities in Germany p 126 N94-10617
The development of alternative paint removal techniques in the RAF p 126 N94-10618
Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services p 126 N94-10619
Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620
German Air Forces experiences with plastic media blasting and future requirements p 127 N94-10621
Plastic media blasting activities at Hill Air Force Base p 127 N94-10622
Large Aircraft Robotic Paint Stripping (LARPS) system and the high pressure water process p 127 N94-10623
Automated Laser Paint Stripping (ALPS) update p 127 N94-10624
Aquastrip (tm): An innovative paint removal technology p 127 N94-10625
Paint removal and surface cleaning using ice particles p 128 N94-10626
Paint removal using wheat starch blast media p 128 N94-10627
IATA taskforce: Paintstripping p 128 N94-10628
Selectively strippable paint schemes p 128 N94-10629

STROKE VOLUME
Echocardiography in the flight program p 309 N94-11993

STRONTIUM ISOTOPES
Strontium and oxygen isotope study of M-1, M-3 and M-4 drill core samples from the Manson impact structure, Iowa: Comparison with Haitian K-T impact glasses p 281 N94-12080

STRUCTURAL ANALYSIS
Computational procedures for determining parameters in Ramberg-Osgood elastoplastic model based on modulus and damping versus strain [DE93-013309] p 185 N94-10306
Probabilistic evaluation of uncertainties and risks in aerospace components [NASA-TM-105603] p 185 N94-10361
NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937
Functional approximation using artificial neural networks in structural mechanics [NASA-TM-105820] p 188 N94-11254
Computational mechanics needs study [NASA-CR-193712] p 327 N94-11279
Structural analysis and optimization of adaptive structures by use of the finite element method p 71 N94-11339
A high specific power solar array for low to mid-power spacecraft p 51 N94-11399
A structural and petrographic investigation of the pretoria saltpan impact structure p 282 N94-12102

STRUCTURAL BASINS
Sandia ocean modeling system programmer's guide and user's manual [DE93-007427] p 287 N94-10153
SOFAR float tracking in the Shikoku basin p 206 N94-11986
Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023
Viscous relaxation of the Moho under large lunar basins p 452 N94-12113
Do large impact basins in the southern hemisphere of Mars control the distribution of polar structures and deposits? p 481 N94-12266

STRUCTURAL DESIGN
NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937
A study of strength evaluations of EDNi/EDCu/NARloy-Z bonded joints [NASA-TM-108418] p 188 N94-11275
RAMCAD (reliability, availability, and maintainability in computer-aided design) [AD-A265143] p 331 N94-11679
The trial manufacture and test of critical components in docking mechanism [NASDA-TMR-930005] p 44 N94-12280

Fracture behavior of ionomers and ionomeric blends
[AD-A265379] p 94 N94-12407

STRUCTURAL ENGINEERING
Smart Structures for Aircraft and Spacecraft
[AGARD-CP-531] p 68 N94-11317

STRUCTURAL FAILURE
Failure prediction of thin beryllium sheets used in spacecraft structures
[NASA-CR-194164] p 187 N94-11190
Fiber optic sensing for composite smart structures
p 69 N94-11327
Strain concentration assessment of laminates subjected to low velocity impact
[AD-A264497] p 73 N94-11446
Microstructure-based fatigue life prediction methods for naval steel structures
[AD-A265429] p 85 N94-12426
Resistivity and radar void detectors for tunneling machines p 140 N94-12706

STRUCTURAL MEMBERS
Method of recertifying a loaded bearing member using a phase point
[NASA-CASE-LAR-14741-1] p 185 N94-10671

STRUCTURAL PROPERTIES (GEOLOGY)
On the mechanical development of the Flexible External Insulation (FEI) for Hermes spaceplane
p 62 N94-10048
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
A structural origin for the cantaloupe terrain of Triton
p 449 N94-12095
Sources of Na for the Io atmosphere
p 455 N94-12127
Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190
Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes
p 467 N94-12195
Characteristics of arachnoids from Magellan data
p 469 N94-12204
Classification of Martian deltas p 470 N94-12207
Giant radiating dyke swarms on Earth and Venus
p 283 N94-12236
Morphotectonics of Venus p 478 N94-12248

STRUCTURAL RELIABILITY
Elastic plastic fracture mechanics methodology for surface cracks
[NASA-CR-194129] p 185 N94-10712

STRUCTURAL STABILITY
The impact of active controls technology on the structural integrity of aeronautical vehicles
p 27 N94-11341

STRUCTURAL STRAIN
Strain concentration assessment of laminates subjected to low velocity impact
[AD-A264497] p 73 N94-11446

STRUCTURAL VIBRATION
Computational gearing mechanics
[NASA-CR-193666] p 181 N94-11157
Active landing gear control for improved ride quality during ground roll p 27 N94-11345
Active vibration control of adaptive flexible structures using piezoelectric smart sensors and actuators
p 189 N94-11823

STRUCTURED PROGRAMMING
Bundle event structures: A non-interleaving semantics for LOTOS
[MEMO-INF-92-73] p 320 N94-10164

STUDENTS
A summer program in mathematics and computer science for academically oriented student
[AD-A263467] p 415 N94-11517
Career Information in the Mathematical Sciences (CIMS)
[DE93-013780] p 318 N94-11817

STUDS (STRUCTURAL MEMBERS)
Instability around an isolated roughness element
p 165 N94-12629

STYPHNATES
Energy transfer dynamics and impact sensitivity
[DE93-009551] p 98 N94-11269

SUBCRITICAL FLOW
A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625

SUBDUCTION (GEOLOGY)
A model for the subduction mechanics of flexible lithosphere and its viscous coupling to the mantle using power-law rheologies p 277 N94-11585
The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992
[AD-A264922] p 289 N94-11853
Flexure and the role of inplane force around coronae on Venus p 452 N94-12112
Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130
Convective and dynamic instability in meridional trenches p 225 N94-12739

SUBMARINES
Submarine internal waves
[MRL-GD-0049] p 98 N94-11303

SUBMILLIMETER WAVES
Investigation of passive atmospheric sounding using millimeter and submillimeter wavelength channels
[NASA-CR-193627] p 274 N94-10726
Submillimeter wave observation experiment of Earth atmosphere with SIS mixer p 130 N94-11837

SUBROUTINES
Subroutine functions for generating animation data
[DE93-767973] p 313 N94-10731

SUBSONIC FLOW
High order accurate solutions of viscous problems
[NASA-TM-106267] p 151 N94-11253

SUBSONIC FLUTTER
Laser velocimeter measurements of the flow field generated by a forward-swept propfan during flutter
[NASA-TM-106195] p 14 N94-10892

SUBSONIC WIND TUNNELS
Wall interference correction based on interface measurements in subsonic wind tunnel testing
p 15 N94-11154

SUBSTRATES
Zerodur polishing process for high surface quality and high efficiency
[DE93-012596] p 87 N94-10271
Rapid thermal processing for strained-layer semiconductor devices
[DE93-013754] p 396 N94-10809
Needs for super-smooth surfaces
[DE93-012482] p 382 N94-11242
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099
Analysis of the economics of DC arc CVD diamond
[AD-A265688] p 403 N94-12339
Dynamic high-pressure shock compaction of diamond powders
[AD-A266004] p 93 N94-12354
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375
Corrosion and passivation of high temperature superconductors
[AD-A265402] p 405 N94-12586

SUBSTRUCTURES
Multilevel computer-aided optimum design of structural systems using multiple basis vectors
p 187 N94-11055

SUCTION
DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613

SULFATES
Second and third order nonlinear optical properties of crystalline inorganic/organic complexes
[DE93-011883] p 173 N94-10755
Sulfate reduction and other sedimentary biogeochemistry in a northern New England salt marsh
p 268 N94-12453
Acetate concentrations and oxidation in salt marsh sediments p 269 N94-12459
The effects of acid deposition on sulfate reduction and methane production in peatlands p 270 N94-12465

SULFIDES
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107
Biogeochemical factors which regulate the formation and fate of sulfide in wetlands p 270 N94-12464

SULFONATES
Solid-state structures of guanidinium methane, ethane, and trifluoromethanesulfonate
[AD-A265293] p 402 N94-11654
Hydrogen-bond polymorphs of guanidinium 4-biphenylsulfonate
[AD-A265294] p 402 N94-11827

SULFONES
New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513

SULFUR
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713
Carbon analyses of IDP's sectioned in sulfur and supported on beryllium films p 81 N94-12099
Sulfur transformations in the sediments of a New Hampshire salt marsh p 270 N94-12463
Emissions of biogenic sulfur gases from northern bogs and fens p 271 N94-12467
Sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12470

SULFUR COMPOUNDS
Terminal Decomposition and Gaseous Sulfur Release from Tidal Wetlands
[NASA-CR-193466] p 267 N94-12451
A preliminary study of the variability and magnitude of the flux of biogenic sulfur gases from a New Hampshire salt marsh p 267 N94-12452
Emissions of biogenic sulfur gases from Alaskan tundra p 268 N94-12455
Factors controlling fluxes of volatile sulfur compounds in Sphagnum peatlands p 268 N94-12456
Emissions of sulfur gases from marine and freshwater wetlands of the Florida Everglades: Rates and extrapolation using remote sensing p 269 N94-12457
Emissions of sulfur gases from wetlands
p 269 N94-12458
Application of static and dynamic enclosures in determining DMS and OCS fluxes in Sphagnum peatlands p 269 N94-12460
Effects of inorganic sulfur addition on fluxes of volatile sulfur compounds in Sphagnum peatlands
p 270 N94-12461
Environmental factors controlling fluxes of dimethyl sulfide in a New Hampshire fen p 270 N94-12462
Factors controlling sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12469

SULFUR DIOXIDES
Study of climatic effects of cloud-aerosol interaction
p 204 N94-11977

SULFUR FLUORIDES
Studies of critical point phenomena of fluids: Bulk fluids, fluids in pores, and at interfaces p 80 N94-10228

SULFUR HEXAFLUORIDE
Transport of heat and mass in near-critical fluids
p 122 N94-10230

SULFUR OXIDES
User's manual for the plume visibility model PLUVUE 2 (revised)
[PB93-188233] p 265 N94-11016

SUMMER
A summer program in mathematics and computer science for academically oriented student
[AD-A263467] p 415 N94-11517

SUMS
Summation by parts, projections, and stability
[NASA-CR-194290] p 346 N94-12776

SUN
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

SUNLIGHT
A development on estimation method of undersea light p 204 N94-11974
The evaluation of radiative process in the atmosphere-ground system by Monte Carlo method
p 205 N94-11980
Incident shortwave and longwave radiations over the western North Pacific and the Sea of Okhotsk derived from GMS-WEFAX images p 205 N94-11982

SUPERCOMPUTERS
An account of Sandia's research booth at Supercomputing 1992: A collaborative effort in high-performance computing and networking
[DE93-012397] p 319 N94-10268
Numerical wind tunnel project and computational fluid dynamics at National Aerospace Laboratory, Japan
[NAL-TM-648T] p 149 N94-10861
The DOE Program in High-Performance Computing and Communications (HPCC)
[DE93-013813] p 334 N94-12606

SUPERCONDUCTING CAVITY RESONATORS
Fabrication and test of a superconducting RFQ
[DE93-010860] p 140 N94-10300
Nonlinear effects in ferrite tuned cavities
[DE93-014136] p 374 N94-12785

SUPERCONDUCTING DEVICES
Fabrication and test of a superconducting RFQ
[DE93-010860] p 140 N94-10300
Improvement of azimuthal homogeneity in permanent-magnet bearing rotors
[DE93-009954] p 144 N94-11607
Utilization of superconductivity in the area of space
p 131 N94-11843

SUPERCONDUCTING FILMS

Processing and transport properties of high J(sub c) silver clad Bi-2223 tapes and coils [DE93-010674] p 398 N94-11073

Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices [AD-A265685] p 405 N94-12442

SUPERCONDUCTING MAGNETS

High-field conductor testing at the FENIX facility [DE93-012318] p 387 N94-10737

SUPERCONDUCTING SUPER COLLIDER

Database computing in HEP [DE93-011765] p 419 N94-11105

Nonlinear effects in ferrite tuned cavities [DE93-014136] p 374 N94-12785

SUPERCONDUCTIVITY

Orbital glass in HTSC [DE93-613988] p 395 N94-10415

Power losses of a type 2 superconducting slab of arbitrary thickness in the presence of alternating current conductors [DE93-617892] p 396 N94-10716

Development and testing of a superconducting link for an IR detector [NASA-CR-193674] p 170 N94-10948

Assessment of the impact of HTSC's on superconducting fault-current limiters [DE93-009986] p 143 N94-11454

Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds [DE93-010687] p 400 N94-11457

Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5) [DE93-011359] p 403 N94-12363

Quark and lepton masses [DE93-012308] p 370 N94-12787

SUPERCONDUCTORS

High-energy density physics at Los Alamos [DE93-010271] p 371 N94-10260

Development of passive superconducting bearings. Phase 3 [AD-A266050] p 180 N94-10706

Power losses of a type 2 superconducting slab of arbitrary thickness in the presence of alternating current conductors [DE93-617892] p 396 N94-10716

High-field conductor testing at the FENIX facility [DE93-012318] p 387 N94-10737

Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids [DE93-012673] p 412 N94-11162

Fullerene superconductors: Phase stability and anomalously low T(sub c)'s in some ternary compounds [DE93-010687] p 400 N94-11457

SUPERCOOLING

Solidification from supercooled melt under microgravity p 113 N94-10176

Numerical calculation of the growth of InP by the travelling heater method in the first mission of the Space Flyer Unit p 114 N94-10179

Thermophysical properties of undercooled liquid metals p 86 N94-10190

Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194

Undercooled W-Re and Mo-Re drops in an ultra high vacuum drop tube p 86 N94-10195

Non-equilibrium solidification in undercooled Ni-B alloys p 86 N94-10196

Solidification and metastable phase formation of highly undercooled Fe-Cr-Ni alloy melts p 87 N94-10204

SUPERCRITICAL FLUIDS

Polymer-polymer interactions [AD-A265304] p 91 N94-11830

SUPERCRITICAL WINGS

X-29: Longitudinal instability at high angle-of-attack p 33 N94-11504

SUPERFLUIDITY

On the doubling of hydrodynamic theorems in relativistic theory of superfluidity [DE93-617895] p 148 N94-10717

Quantum dynamics of helium clusters [AD-A266060] p 411 N94-10874

The superfluid Stirling refrigerator, a new method for cooling below 0.5 K [DE93-012672] p 128 N94-11161

Superfluid turbulence p 158 N94-12307

SUPERHIGH FREQUENCIES

Wide band 140 GHz TWTA p 132 N94-10514

Nonlinear analysis of a magnicon output cavity [AD-A265342] p 145 N94-12424

Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment [NASA-CR-194030] p 139 N94-12778

SUPERLATTICES

Photostimulated attenuation of hypersound in superlattice [DE93-611231] p 357 N94-10408

Rapid thermal processing for strained-layer semiconductor devices [DE93-013754] p 396 N94-10809

Organometallic chemical vapor deposition and characterization of ZnGe(1-x)Si(x)P2-Ge alloys on GaP substrates p 400 N94-11443

The additional contribution caused by Coulomb interaction to the exciton dispersion in multiple quantum wells and superlattices for direct band gap cubic semiconductors [DE93-613538] p 402 N94-11659

Electronic and total energy properties of ternary and quaternary semiconductor compounds, alloys and superlattices [NASA-CR-192905] p 405 N94-12570

SUPERNOVA REMNANTS

Acceleration of positrons in supernova shocks [NASA-CR-193713] p 425 N94-10511

VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066

SUPERNOVA 1987A

Carbon and nitrogen in Type 2 supernova diamonds p 431 N94-12166

SUPERNOVAE

Nuclear astrophysics [DE93-010569] p 425 N94-10292

Acceleration of positrons in supernova shocks [NASA-CR-193713] p 425 N94-10511

Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022

SUPERPLASTICITY

SPF/DB: A manufacturing technique for lightweight structures p 59 N94-10026

SUPERSATURATION

Study of vapor bubble growth in a supersaturated liquid p 122 N94-10232

SUPERSONIC BOUNDARY LAYERS

The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058

SUPERSONIC COMBUSTION

Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

Theories of turbulent combustion in high speed flows [AD-A265735] p 79 N94-12403

SUPERSONIC COMBUSTION RAMJET ENGINES

Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles [NAL-TR-1149] p 27 N94-10367

Numerical calculation of scramjet inlet flow [NAL-TR-1174T] p 27 N94-10370

Numerical simulation of the flow through a scramjet engine p 3 N94-10425

Schlieren photographs and internal pressure distributions for three-dimensional sidewall-compression scramjet inlets at a Mach number of 6 in CF4 [NASA-TM-4479] p 148 N94-10644

An environmental study of the National Aerospace Plane [AD-A266071] p 25 N94-10945

Preprints of the 13th Hydrogen Energy System Symposium [DE93-781115] p 99 N94-11444

SUPERSONIC FLIGHT

Preliminary supersonic flight test evaluation of performance seeking control [NASA-TM-4494] p 28 N94-11205

SUPERSONIC FLOW

Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363

Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles [NAL-TR-1149] p 27 N94-10367

Exergy decrease in shock waves and boundary layers of space launch vehicles [AD-A265272] p 42 N94-10493

Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow [DE93-011590] p 14 N94-11111

SUPERSONIC JET FLOW

Control of jet noise [NASA-CR-193612] p 358 N94-11176

High order accurate solutions of viscous problems [NASA-TM-106267] p 151 N94-11253

SUPERSONIC NOZZLES

Control of jet noise [NASA-CR-193612] p 358 N94-11176

SUPERSONIC TRANSPORTS

Supersonic airplane study and design [NASA-CR-193219] p 25 N94-11150

Stratospheric aircraft exhaust plume and wake chemistry [NASA-CR-191495] p 279 N94-12572

SUPERSYMMETRY

The super vectorfield package for REDUCE. Version 1.0 [MEMO-1099] p 321 N94-10265

The INTEGRATOR package for REDUCE, version 1.0 [MEMO-1100] p 322 N94-10418

The ring structure of chiral operators for minimal models coupled to 2D gravity [DE93-613119] p 409 N94-10500

Supersqueezed states from squeezed states p 378 N94-10591

Superfield description of N = 2 extended one-dimensional supersymmetric quantum mechanics [DE93-621420] p 412 N94-11087

Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088

A version of superstring with four space-time dimensions [DE93-608196] p 412 N94-11163

Three-dimensional N = 4 extended supersymmetrical quantum mechanics [DE93-621421] p 412 N94-11164

SUPINE POSITION

Pulmonary function in microgravity: KC-135 experience p 309 N94-11994

SUPPORTS

Vibration isolation mount with locking means [AD-D015769] p 178 N94-10381

SUPPRESSORS

Corner vortex suppressor [AD-D015772] p 147 N94-10383

SURFACE COOLING

A structural origin for the cantaloupe terrain of Triton p 449 N94-12095

Lava flows on Venus: Analysis of motion and cooling p 457 N94-12137

Boiling heat-transfer processes and their application in the cooling of high heat flux devices [AD-A266086] p 413 N94-12535

SURFACE CRACKS

Elastic plastic fracture mechanics methodology for surface cracks [NASA-CR-194129] p 185 N94-10712

SURFACE DEFECTS

Invariance of the mobility edge in anodic titanium oxides [DE92-642136] p 394 N94-10281

Potential change in flaw geometry during pressurized-thermal-shock transients [DE93-009709] p 184 N94-10288

SURFACE DISTORTION

An analytic model for calculating pump-induced wavefront distortions in laser slabs [DE93-011953] p 174 N94-11126

PO/PTD diffraction synthesis of array-fed reflector antennas for satellite and radar applications p 137 N94-11636

SURFACE EMITTING LASERS

Preliminary surface-emitting laser logic device evaluation [AD-A266111] p 383 N94-12416

SURFACE FINISHING

Protective coatings for high-temperature polymer matrix composites [NASA-TM-106276] p 74 N94-12431

SURFACE IONIZATION

Solar wind-induced secondary ions and their relation to lunar surface composition p 474 N94-12232

SURFACE LAYERS

Marangoni flows in open cavities with differentially heated end walls p 104 N94-10097

The surface plasmon spectroscopy as diagnostic technique in microgravity experiments p 110 N94-10133

Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165

SURFACE NAVIGATION

Real-time tomography mooring [AD-A264923] p 289 N94-11854

SURFACE PROPERTIES

Wetting effects on nylon spheres engulfment in ice p 115 N94-10189

Hydrogen partitioning and transport in titanium aluminides [NASA-CR-194117] p 76 N94-10713

Evolution of steep Martian slopes p 434 N94-11184

Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering [DE93-012324] p 77 N94-11359

Organometallic chemical vapor deposition and characterization of ZnGeP2/GaP multiple heterostructures on GaP substrates p 400 N94-11442
Property changes induced by the space environment in composite materials on LDEF: Solar array materials passive LDEF experiment A0171 (SAMPLE)
[NASA-CR-192572] p 73 N94-11484
The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682
Wind and surface features in SAR images: The Canadian program p 234 N94-11718
A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces
p 81 N94-12156
Near-infrared spectra of the Martian surface: Reading between the lines p 465 N94-12184
Examination of the surface second harmonic response at infrared wavelengths
[AD-A265206] p 403 N94-12371
Interdisciplinary scientist participation in the Phobos mission
[NASA-CR-193715] p 482 N94-12446

SURFACE REACTIONS
Electrochemical process and product therefrom
[AD-D015767] p 75 N94-10380
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels
[DE93-012835] p 152 N94-11371
Wide Band-Gap Semiconductors. 1991 Materials Research Society Symposium proceedings
[AD-A263418] p 401 N94-11515
Real-space formation and dissipation dynamics of hexagonal reconstruction on Au(100) in aqueous media as explored by potentiodynamic scanning tunneling microscopy
[AD-A266138] p 368 N94-11658
The adsorption and surface reaction of SiCl4 on Si(100)-(2x1)
[AD-A266124] p 79 N94-12538

SURFACE ROUGHNESS
Ultrasonic inspection, material noise and surface roughness
[DE93-011560] p 183 N94-11110
Needs for super-smooth surfaces
[DE93-012482] p 382 N94-11242
Plating under reduced pressure
[DE93-011896] p 84 N94-11668
The physics of pattern formation of liquid interfaces
[DE93-013333] p 154 N94-11814
Interpretation of lunar and planetary electromagnetic scattering using the full wave solutions
p 440 N94-12049
Coherent structure in near wall turbulence with riblets
p 165 N94-12628
Instability around an isolated roughness element
p 165 N94-12629

SURFACE ROUGHNESS EFFECTS
Ultrasonic inspection, material noise and surface roughness
[DE93-011560] p 183 N94-11110
Coherent structure in near wall turbulence with riblets
p 165 N94-12628
Instability around an isolated roughness element
p 165 N94-12629

SURFACE STABILITY
Evaporation under microgravity conditions
p 102 N94-10086

SURFACE TEMPERATURE
Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851
Rates of fluvio-thermal erosion on Mars
p 435 N94-12018
Comments on possible causes of recent global warming
[DE93-010501] p 272 N94-12592

SURFACE TREATMENT
Fracture behavior of surface-modified ceramics
[DE93-013707] p 88 N94-10710
Ellipsometry studies of semiconductors surface cleaning
[AD-A265150] p 142 N94-11094

SURFACE VEHICLES
Safety of high speed ground transportation systems: X2000 US demonstration vehicle dynamics trials, preliminary test report, October 1992 - January 1993
[PB93-194645] p 422 N94-10736

SURFACE WATER
Sandia ocean modeling system programmer's guide and user's manual
[DE93-007427] p 287 N94-10153
Remote surface water monitoring radio based telemetry system
[DE93-009643] p 41 N94-11282
Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust
p 462 N94-12168
The thermodynamic case for a water-rich Mars
p 463 N94-12170

SURFACE WAVES
Uni-directional waves over slowly varying bottom. Part 1: Derivation of a KdV-type of equation
[MEMO-1098] p 147 N94-10275
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS
[AD-A265959] p 275 N94-11102
Near surface ocean processes: Acoustical observations, ambient sound, and Langmuir circulation
p 288 N94-11447
Decay interaction of bulk and surface Langmuir waves
[DE93-617843] p 393 N94-11477
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves
p 195 N94-11922
Topics in pattern formation and chaotic systems
[AD-A265922] p 161 N94-12342

SURVEILLANCE
Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338

SURVEYS
Survey to determine the value of DYNA
[DE93-012390] p 321 N94-10267
Aerosol sampling models survey
[AD-A265903] p 75 N94-10337
Computer models used to support cleanup decision-making at hazardous and radioactive waste sites
[PB93-183333] p 274 N94-10698
National patterns of R and D resources, 1992
[NSF-92-330] p 422 N94-11186
A survey of techniques for corrosion monitoring
[DE93-012131] p 83 N94-11250
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 17: A comparison of the technical communication practices of Dutch and US aerospace engineers and scientists
[NASA-TM-108987] p 419 N94-11352
Pattern of federal procurement from minority and women-owned small business
[PB93-189355] p 417 N94-11844
Aviators, air combat, and combat stress: An Air Force commander's primer
[AD-A265083] p 313 N94-11867

SURVIVAL
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548

SUSPENDING (MIXING)
Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness
p 105 N94-10105

SUSPENSIONS
The solubility of epsilon-CL-20 in selected materials
[DE93-009304] p 77 N94-11602

SWEAT
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368

SWEDEN
Experiences from the Swedish sea ice programme during BEERS-1992 p 239 N94-11751

SWELLING
A method of influence regions in the theory of vacancy swelling of metals
[DE93-620579] p 83 N94-11363

SWEPT FORWARD WINGS
X-29: Longitudinal instability at high angle-of-attack
p 33 N94-11504

SWEPT WINGS
Physics of forebody flow control
[NASA-CR-193626] p 15 N94-11195
Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499

SWIRLING
SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523

SWITCHES
A picosecond high pressure gas switch
[DE93-011897] p 142 N94-11050
Experimental and theoretical investigations of Cs-Ba vapor tacitron inverter for power conditioning in space power systems
[DE93-012971] p 48 N94-11372
GaAs PCSS: High gain switching and device reliability
[DE93-009851] p 401 N94-11605
A thermal ionization model for the sustaining phase of lock-on in GaAs
[DE93-011558] p 144 N94-11624

SWITCHING
A picosecond high pressure gas switch
[DE93-011897] p 142 N94-11050
Experimental and theoretical investigations of Cs-Ba vapor tacitron inverter for power conditioning in space power systems
[DE93-012971] p 48 N94-11372
Assessment of the impact of HTSC's on superconducting fault-current limiters
[DE93-009986] p 143 N94-11454
GaAs PCSS: High gain switching and device reliability
[DE93-009851] p 401 N94-11605
Ceramic actuators for smart materials
[AD-A265664] p 93 N94-12331

SWITCHING CIRCUITS
A study of DC-DC converters with MCTs for arcjet power supplies
[NASA-CR-193457] p 142 N94-10931

SYMBOLS
Symbolic dynamics and description of complexity
[DE93-613030] p 418 N94-10485

SYMMETRY
Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry
[DE93-010871] p 394 N94-10301
Exact solutions of a many-anyon problem
[DE93-617646] p 411 N94-10832
Quantum solitons with cylindrical symmetry
[DE93-617659] p 344 N94-10881
Quenched chiral logarithms
[DE93-010195] p 346 N94-11663
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks
[AD-A265291] p 404 N94-12438

SYMPATHETIC NERVOUS SYSTEM
Valsalva maneuver: Insights into baroreflex modulation of human sympathetic activity p 310 N94-12000
Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004

SYNCHRONISM
An object-oriented model for extensible concurrent systems: The composition-filters approach
[MEMO-INF-92-87] p 320 N94-10166
LASSO observations at McDonald and OCA/CERGA: A preliminary analysis p 352 N94-10972
PTTI-aided ephemeris calculation and rapid data link acquisition for manned space flight p 42 N94-10974
Timing in private digital telecommunication networks
p 139 N94-10991
SONET synchronization: What's happening
p 355 N94-10992

SYNCHRONOUS PLATFORMS
Progress in multidisciplinary design optimization at NASA Langley
[NASA-TM-107754] p 318 N94-10814

SYNCHRONOUS SATELLITES
Sun-synchronous and geo-synchronous satellite data utilization for environmental studies p 37 N94-10689

SYNCHROTRON RADIATION
Laser Synchrotron Source (LSS)
[AD-D015755] p 173 N94-10371
Cosmological gamma-ray burst model
[NASA-CR-193368] p 484 N94-10507

SYNCHROTRONS
Upgraded D(O) calorimeter electronics for short Tevatron bunch space and the effect of pile-up on the W mass measurement
[DE93-013566] p 146 N94-12603

SYNOPTIC METEOROLOGY
TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991
[INPE-5497-TDI/512] p 230 N94-11179

SYNTAX
Processing proper nouns in machine translation for English news
[NHK-SERIAL-414] p 418 N94-10559

SYNTHESIS (CHEMISTRY)
Synthesis of molecular sieves from clear solution
p 124 N94-10245

New aromatic activated dihalides and bisphenol monomers for the preparation of novel poly(arylene ethers)
[NASA-CR-193190] p 55 N94-10513
Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772
Low temperature synthesis of monolithic transparent Ta2O5 gels from hydrolysis of metal alkoxide
[NASA-TM-106246] p 89 N94-11204
Synthesis and thermal evolution of structure in alkoxide-derived niobium pentoxide gels
[NASA-TM-106259] p 90 N94-11257
Synthesis and electronic properties of nanophase semiconductor materials
[AD-A265287] p 146 N94-12584
Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid)
[AD-A265288] p 95 N94-12585

SYNTHETIC APERTURE RADAR
Spaceborne SAR study: LDRD 1992
[DE93-011485] p 232 N94-11623
Proceedings of First ERS-1 Symposium on Space at the Service of Our Environment, volume 1
[ESA-SP-359-VOL-1] p 232 N94-11704
Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707
The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708
Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714
Mapping of the East Australian current with the ERS-1 SAR and shipborne studies p 234 N94-11717
Wind and surface features in SAR images: The Canadian program p 234 N94-11718
Coastal ocean studies with ERS-1 SAR during NORCSEX 1991 p 234 N94-11720
SAR imaging of dynamical features in the English Channel p 234 N94-11721
SAR ocean imaging in the Gulf of Alaska
p 235 N94-11723
ERS-1 SAR calibration strategy p 235 N94-11726
ERS-1 preliminary antenna elevation pattern measured by ground-receivers p 235 N94-11727
Preliminary results of the experiment I-7
p 235 N94-11728
The ERS-1/CV 580 SAR cross-calibration experiment: Sault Ste Marie, October 26 - November 2, 1991
p 236 N94-11729
Calibration of the ERS-1 SAR fast-delivery images
p 236 N94-11730
Calibration results for the ERS-1, AIRSAR, and PHARS p 236 N94-11731
The use of active devices in the ERS-1 radiometric calibration p 236 N94-11732
An experiment for the radiometric calibration of the ERS-1 SAR p 236 N94-11733
Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734
SAR interferometry experiments with ERS-1
p 237 N94-11735
SAR-interferometry applying ERS-1: Some preliminary test results p 237 N94-11736
Monitoring of the Greenland Ice Sheet using ERS-1 synthetic aperture radar imagery p 237 N94-11741
Investigations of Arctic ice-sheets and glaciers using ERS-1 SAR p 238 N94-11743
Spatial patterns in backscatter strength across the Greenland Ice Sheet p 238 N94-11744
Ice studies in the Barents Sea by ERS-1 SAR during SIZEX 92 p 238 N94-11745
Validation of ERS-1 SAR measurements of sea ice during ARCTIC-1991 p 238 N94-11747
Waves and mesoscale features in the marginal ice zone p 240 N94-11757
Ocean circulation revealed by ice floe tracking
p 240 N94-11759
Preliminary evaluation of ERS-1 SAR data for operational use in the Canadian sea ice monitoring program
p 241 N94-11760
Summer Arctic ice concentrations and characteristics from SAR and SSM/I data p 241 N94-11762
Ocean wave detection by SAR p 197 N94-11932
On the determination of the SAR ocean surface scattering patch size p 197 N94-11933
Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935
Characteristics of arachnoids from Magellan data
p 469 N94-12204
ISAR motion compensation using the burst derivative measure as a focal quality indicator
[AD-A265647] p 138 N94-12440
Proceedings of 1st ERS-1 Symposium on Space at the Service of Our Environment, Volume 2
[ESA-SP-359-VOL-2] p 245 N94-12471
Segmented land use classification of multitemporal ERS-1 SAR data using a majority filter
p 245 N94-12472
Land cover monitoring with multi-temporal ERS-1 SAR observations in the Netherlands p 246 N94-12473
Mapping a dynamic playa surface using multitemporal ERS-1 SAR data: First results p 246 N94-12474
Preliminary studies on the application of ERS-1 data to topographic mapping p 246 N94-12476
Radarmap of Germany: First mosaic and classification
p 246 N94-12477
Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea
p 246 N94-12478
Example of SPOT/ERS-1 complementarity
p 247 N94-12479
The use of ERS-1 SAR data to study surface states
p 247 N94-12480
Snow and glacier investigations by ERS-1 SAR: First results p 247 N94-12481
Monitoring of snowcover in high mountain terrain with ERS-1 SAR p 247 N94-12482
Application of ERS-1 SAR data to snow mapping
p 247 N94-12483
Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485
Preliminary ERS-1 assessment for Canadian agriculture and forestry applications p 248 N94-12486
Segmentation and change detection in ERS-1 images over East Anglia p 248 N94-12487
ERS-1 SAR crop monitoring experiment in East Anglia, UK p 248 N94-12488
Geoecological monitoring of an agricultural area
p 248 N94-12489
Assessment of ERS-1 SAR data for soil moisture estimation p 249 N94-12492
Temporal monitoring of soil moisture using ERS-1 SAR data p 249 N94-12493
Observations of ERS-1 SAR sensitivities to changes in aboveground biomass in young loblolly pine forests
p 249 N94-12494
Seeing the Black Forest by ERS-1 and AIRSAR: A comparison p 249 N94-12495
The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496
TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497
TREES project: A suite of tools for information extraction from ERS-1 SAR data p 250 N94-12498
TREES project: Overview and status of the ERS-1 SAR contribution p 250 N94-12499
A statistical analysis of sea state surface ERS-1 SAR-wave mode imagettes p 251 N94-12507
A new model for Synthetic Aperture Radar (SAR) images from ocean scatter p 251 N94-12508
On the extraction of ocean wave spectra from ERS-1 SAR wave mode image spectra p 251 N94-12509
Tide-generated nonlinear internal wave packets in the Strait of Gibraltar observed by the synthetic aperture radar aboard the ERS-1 satellite p 252 N94-12510
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR
p 253 N94-12520
Ship traffic monitoring using the ERS-1 SAR
p 253 N94-12521
Oil spill detection using satellite-based SAR: Experience from a field experiment p 253 N94-12522
Pilot project PPF12. Coastal and fluvial environment in French Guiana: First results of ERS-1 SAR data analysis
p 254 N94-12523
Coastal morphodynamics and energetic characteristics of swell studied with ERS-1 SAR p 254 N94-12524
Mapping of sea bottom topography with ERS-1 C-band SAR p 254 N94-12525
ERS-1 imaging radar over the Waddensea-North Netherlands p 254 N94-12526
SAR imaging of geology and bathymetry: Kent coastal area - southern North Sea p 254 N94-12527
Applications of ERS-1 SAR data for analyzing riverine and coastal processes and geomorphology
p 254 N94-12528
Comparison of ERS-1 SAR images of the Western Mediterranean to in situ oceanographic data: PRIM-1 Cruise (May 1992) p 255 N94-12529
Ice studies in the Barents Sea by ERS-1 during SIZEX 1992 p 210 N94-12653
Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR
p 226 N94-12746

SYNTHETIC APERTURES
Sampling and position effects in the Electronically Steered Thinned Array Radiometer (ESTAR)
[NASA-TM-108998] p 245 N94-12432

SYNTHETIC FIBERS
Mechanical interaction between synthetic fiber and cement base matrix in FRC composites
[AD-A265310] p 73 N94-11686

SYNTHETIC RUBBERS
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107

SYSTEMS ANALYSIS
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827
Design for testability and diagnosis at the system-level
p 184 N94-11563
Space Life Support Engineering Program
[NASA-CR-193474] p 316 N94-12365
Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366
Analysis of the Army's installation support modules with the private sector's open information systems
[AD-A265667] p 421 N94-12579

SYSTEMS ENGINEERING
System engineering concept demonstration, technology assessments, volume 5
[AD-A265471] p 323 N94-10494
System engineering concept demonstration, trade studies, volume 6
[AD-A265472] p 323 N94-10495
System monitoring and diagnosis with qualitative models
[NASA-CR-193812] p 323 N94-10711
Space Station redesign option A: Modular buildup concept
[NASA-TM-108415] p 43 N94-10808
Progress in multidisciplinary design optimization at NASA Langley
[NASA-TM-107754] p 318 N94-10814
Transportation systems analyses: Volume 1: Executive Summary
[NASA-CR-192583] p 41 N94-10826
Transportation systems analyses. Volume 2: Technical/programmatics
[NASA-CR-192582] p 41 N94-10827
National Airspace System operational concept
[DOT/FAA/SE-93/1] p 23 N94-10933
MIL-STDS and PTTI: What's available and what needs to be done p 352 N94-10973
The guide to Design For On-orbit Spacecraft Servicing (DFOSS) manual: Producing a consensus document
p 421 N94-11575
The National Launch System Advanced Development Program: A brief overview p 40 N94-11576
System engineering concept demonstration, process model, volume 3
[AD-A265469] p 333 N94-12008
Integrating the services' imagery architectures
[AD-A265487] p 171 N94-12335
Machine translation technology: A potential key to the information age
[PB93-134336] p 421 N94-12385

SYSTEMS INTEGRATION
STGT program: Ada coding and architecture lessons learned p 330 N94-11437

SYSTEMS MANAGEMENT
Analysis of the Army's installation support modules with the private sector's open information systems
[AD-A265667] p 421 N94-12579

SYSTEMS SIMULATION
System monitoring and diagnosis with qualitative models
[NASA-CR-193812] p 323 N94-10711

SYSTEMS STABILITY
On the stability of stationary regimes in a distributed autovibration system with external feedback
[DE93-620979] p 141 N94-10543

SYSTOLE
Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547

T

T TAURI STARS
Why convective heat transport in the solar nebula was inefficient p 458 N94-12143

TACTILE SENSORS (ROBOTICS)
Object recognition in industrial environment by means of tactile sensor
[ITN-93-85200] p 178 N94-10393

TAIWAN
Sedimentation rates and particulate fluxes in the slope and deep sea areas off eastern Taiwan
p 220 N94-12709

TANDEM MIRRORS
Applying design principles to fusion reactor configurations for propulsion in space
[NASA-TM-108247] p 47 N94-11053
TANTALUM OXIDES
Low temperature synthesis of monolithic transparent Ta2O5 gels from hydrolysis of metal alkoxide
[NASA-TM-106246] p 89 N94-11204
TARGET ACQUISITION
Fuzzification of ASAT's rule based aimpoint selection
[AD-A266068] p 43 N94-11223
Aircraft windscreens enhance visual search disruption produced by laser glare
[AD-A265167] p 26 N94-11892
Estimation with multisensor/multiscan detection fusion
[AD-A265673] p 138 N94-12338
TARGET RECOGNITION
The theory for, and demonstration of, information theory applied to radar target identification
[DE93-006393] p 132 N94-10315
Spatial light rebroadcaster architecture study
[AD-A266102] p 382 N94-11421
Airborne optical tracking control system design study
[DE93-009515] p 382 N94-11662
A hybrid neural network and feature extraction technique for target recognition
[AD-D015732] p 333 N94-12386
ISAR motion compensation using the burst derivative measure as a focal quality indicator
[AD-A265647] p 138 N94-12440
TARGETS
GRAFTED (GRAphical Fault Tree EDitor): A fault tree description program for target vulnerability/survivability analysis
[AD-A264078] p 328 N94-11301
Projectile-target mixing in melted ejecta formed during a hypervelocity impact cratering event
p 432 N94-12241
TASK COMPLEXITY
Vigilance problems in orbiter processing
p 314 N94-11536
Development and evaluation of a predictive algorithm for telerobotic task complexity p 341 N94-11562
TASK PLANNING (ROBOTICS)
Task planning with uncertainty for robotic systems
[NASA-CR-193253] p 338 N94-10638
Development and evaluation of a predictive algorithm for telerobotic task complexity p 341 N94-11562
TASKS
Crew chief p 335 N94-11564
Career Information in the Mathematical Sciences (CIMS)
[DE93-013780] p 318 N94-11817
Locus coeruleus, vigilance, and stress: Brain mechanisms of adaptive behavioral responsiveness
[AD-A265657] p 302 N94-12441
TATB
Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB
[DE93-010742] p 97 N94-10294
TAXONOMY
How diverse is the asteroid belt? p 430 N94-12124
First results of the seven-color asteroid survey
p 430 N94-12162
TDR SATELLITES
STGT program: Ada coding and architecture lessons learned p 330 N94-11437
TEARING MODES (PLASMAS)
Reversed-field pinch studies in the Madison Symmetric Torus
[DE93-013464] p 388 N94-10747
Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128
Macroscopic behaviour and discrete dynamo of RFP plasma in high theta discharge
[DE93-771408] p 392 N94-11239
TECHNOLOGICAL FORECASTING
Space Station Freedom advanced photovoltaics and battery technology development planning
p 52 N94-11401
TECHNOLOGY ASSESSMENT
Protein, glass, aerosol research, containerless processing and diagnostics technology for microgravity application p 106 N94-10112
High temperature processing and diagnostic technologies for microgravity applications
p 110 N94-10130
The 40 kWe S-PRIME Thermionic Design and Technology Demonstration Program
[DE93-004738] p 40 N94-10147
Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity
[DE93-010010] p 262 N94-10258
System engineering concept demonstration, technology assessments, volume 5
[AD-A265471] p 323 N94-10494
Intelligent structures: A technology overview and assessment p 68 N94-11322
Workshop summary: New silicon cells
p 54 N94-11417
Software process assessments p 329 N94-11427
TFE verification program
[DE93-009609] p 373 N94-11694
TECHNOLOGY TRANSFER
Survey to determine the value of DYNA
[DE93-012390] p 321 N94-10267
Technology transfer at Lawrence Berkeley Laboratory
[DE93-010460] p 423 N94-11059
Tropical medicine: Telecommunications and technology transfer p 305 N94-11793
TECHNOLOGY UTILIZATION
Advanced Materials for Lightweight Structures
[ESA-SP-336] p 56 N94-10001
New technology applied to telemedicine
p 306 N94-11796
Machine translation technology: A potential key to the information age
[PBS3-134336] p 421 N94-12385
TECTONICS
Statistical description of tectonic motions
[NASA-CR-193701] p 275 N94-10950
Analysis of gravity, magnetic, and seismic reflection data from Tibet and neighboring regions of China
[NASA-CR-193405] p 278 N94-11886
Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Global organization of tectonic deformation on Venus
p 444 N94-12066
Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130
Stratigraphy and sedimentology of the K/T boundary deposit in Haiti p 282 N94-12138
Porosity and the ecology of icy satellites
p 431 N94-12186
Tectonics on Triton p 466 N94-12187
Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196
Transmantle flux tectonics p 283 N94-12249
Pseudo magnetic anomaly derived from satellite altimetry and its application to the tectonics in the North Fuji Basin p 208 N94-12645
TEFLON (TRADEMARK)
Dimensional scaling for impact cratering and perforation
[NASA-CR-188259] p 42 N94-10665
TEKTITES
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
K/T spherules from Haiti and Wyoming: Origin, diagenesis, and similarity to some microtektites
p 281 N94-12085
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094
Oxygen isotopes as tracers of tektite source rocks: An example from the Ivory Coast tektites and Lake Bosumtwi Crater p 430 N94-12146
Microtektite-like glass spherules in Late Devonian (367 MA) shales p 461 N94-12160
KT boundary impact glasses from the Gulf of Mexico region p 282 N94-12161
Soret diffusion: A possible cause of compositional heterogeneity within tektites p 432 N94-12211
Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238
TELECOMMUNICATION
Potential markets for advanced satellite communications
[NASA-CR-191145] p 41 N94-10512
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3218] p 350 N94-10963
Synopsis of timing measurement techniques used in telecommunications p 139 N94-10990
Timing in private digital telecommunication networks
p 139 N94-10991
Telescience capability for the Sondre Stromfjord, Greenland, incoherent-scatter radar facility
[NASA-CR-193683] p 136 N94-11206
Telemetering and telecommunications research
[NASA-CR-193235] p 42 N94-11297
International Telemedicine/Disaster Medicine Conference: Papers and Presentations
[NASA-NP-207] p 304 N94-11787
The Canadian experience: Using telemedicine for the support of medical care at remote sites
p 305 N94-11789
Global considerations for implementation of telemedicine p 305 N94-11792
Tropical medicine: Telecommunications and technology transfer p 305 N94-11793
Applications of the INTELSAT system to remote health care p 306 N94-11794
Clinical aspects of telemedicine p 306 N94-11795
Commercial applications of telemedicine
p 306 N94-11798
The use of communication technology in medicine
p 306 N94-11800
A telemedicine health care delivery system
p 307 N94-11803
Communications infrastructure requirements for telemedicine/telehealth in the context of planning for and responding to natural disasters: Considering the need for shared regional networks p 307 N94-11804
International disaster research p 307 N94-11805
Medical care delivery in the US space program
p 307 N94-11806
US-USSR telemedicine consultation spacebridge to Armenia and Ufa p 308 N94-11809
The revitalization of health and education in Rural America Act of 1992 p 308 N94-11810
Asynchronous Transfer Mode (ATM) technology: An overview
[AD-A266087] p 383 N94-12413
TELECONFERENCING
International Telemedicine/Disaster Medicine Conference: Papers and Presentations
[NASA-NP-207] p 304 N94-11787
Telemedicine and international disaster response: Medical consultation to Armenia and Russia via a telemedicine spacebridge p 305 N94-11790
Clinical aspects of telemedicine p 306 N94-11795
TELEMETRY
Telemetering and telecommunications research
[NASA-CR-193235] p 42 N94-11297
A telemedicine health care delivery system
p 307 N94-11803
Real-time tomography mooring
[AD-A264923] p 289 N94-11854
The structure of hydrophysical measuring systems of vertical sounding and self-contained stations
p 227 N94-12751
TELEOPERATORS
TOLS (Telescience On-Line Simulator): An essential instrument for micro-gravity interactive experiment
p 39 N94-10134
Analysis of the alignment of a Schlieren system for tele-operation p 111 N94-10140
Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670
A portable controller for unmanned ground vehicles
[AD-A264963] p 181 N94-11290
Sixth Annual Workshop on Space Operations Applications and Research (SOAR 1992), volume 2
[NASA-CP-3187-VOL-2] p 486 N94-11527
Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577
TELEPHONES
Performances of a date dissemination code on telephone lines using commercial modems
p 139 N94-10984
TELEROBOTICS
Telerobotic control of a mobile coordinated robotic server
[NASA-CR-193465] p 338 N94-10345
Telerobot control system
[NASA-CASE-NPO-18116-1-CU] p 179 N94-10670
Development and evaluation of a predictive algorithm for telerobotic task complexity p 341 N94-11562
In-space operations for lunar and Mars space transfer vehicles p 348 N94-11568
In-space assembly-servicing requirements
p 348 N94-11569
More sense for less cents: Cost effective servicing of remote sensing satellites p 348 N94-11572
Supervised autonomous control, shared control, and teleoperation for space servicing p 183 N94-11577
TELESCOPES
Continued development of an ultra-narrow bandpass filter for solar research
[NASA-CR-194169] p 381 N94-10735
Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849
NASA Marshall Space Flight Center solar observatory report, January - June 1993
[NASA-TM-108417] p 423 N94-10866
Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539

A comparison of telescopic and Phobos-2 ISM spectra of Mars in the short-wave near-infrared (0.76-1.02 microns) p 424 N94-12053
Model of optical scatter from microimpacts on the Hubble Telescope p 384 N94-12189
Galileo EM-2 contributions to the lunar control network p 468 N94-12198
Laser system design for the generation of a sodium-layer laser guide star
[DE93-014127] p 176 N94-12784

TELEVISION CAMERAS
A compact, four-way image splitter
[AD-A266107] p 382 N94-11656

TELEVISION EQUIPMENT
Measurement of display transfer characteristics using test pictures
[BBC-RD-1992/13] p 133 N94-11023

TELEVISION SYSTEMS
A compact, four-way image splitter
[AD-A266107] p 382 N94-11656

TEMPERATE REGIONS
The cloud radiative feedback of a midlatitude squall line system and implication for climate study
[DE93-010511] p 283 N94-10290

TEMPERATURE COMPENSATION
Sea surface temperature difference between NOAA/AVHRR and in-situ observation
p 215 N94-12680

TEMPERATURE CONTROL
The Third Workshop on Two Phase Fluid Experiment in the Space Environment
[NASDA-CON-930002] p 161 N94-12547
Summary of studies on JEM utilization experiment projects p 161 N94-12548
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549
Condensation phenomena p 162 N94-12550
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Devices related for thermal control systems used in microgravity p 162 N94-12553
Research and development of cold plate for two phase fluid loop thermal control system p 162 N94-12555
Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556

TEMPERATURE DEPENDENCE
On the relativistic string size at finite temperature
[DE93-617658] p 409 N94-10394
Experiments in ultracold collisions
[DE93-012110] p 365 N94-11029
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O
[DE93-013590] p 76 N94-11244
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458
Thermographic properties of eight blue-emitting phosphors
[DE93-011459] p 78 N94-11622
The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars
p 463 N94-12169
Environmental factors controlling fluxes of dimethyl sulfide in a New Hampshire fen p 270 N94-12462

TEMPERATURE DISTRIBUTION
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
Simulation of images of water vapor channel and infrared split channel p 190 N94-11081
On temperature distribution in non-participating medium with radiation boundary condition
[DE93-619375] p 153 N94-11604
Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984
On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987
Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990
Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217
Search for structures in the cosmic microwave background radiation
[INPE-5491-TDI/508] p 484 N94-12357
Observation of cold coastal water with high turbidity around the southwestern tip of Korean Peninsula
p 216 N94-12689
The relationship between skin and bulk sea surface temperatures p 221 N94-12716
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750

TEMPERATURE EFFECTS
In situ observation of temperature dependence of concentration field during growth of KB5 crystals by holographic interferometry p 115 N94-10187
Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB
[DE93-010742] p 97 N94-10294
Kinetics of high concentration arsenic deactivation at moderate to low temperatures
[DE93-013349] p 395 N94-10516
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713
Computational simulation of hot composite structures
[NASA-TM-106200] p 186 N94-10762
Flammability parameters of materials: Ignition, combustion, and flame spread p 20 N94-10788
Factors that affect OSU thermal performance of aircraft interior materials p 20 N94-10789
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Time-resolved optical studies of charge relaxation and charge transfer at electrode interfaces
[DE93-013985] p 398 N94-11117
DBTT measurement by use of Small Punch (SP) test
[DE93-753188] p 183 N94-11168
Thermal testing of aluminized Mylar
[NASA-TM-108414] p 89 N94-11175
P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1
[AD-A266072] p 304 N94-11224
Thermographic properties of eight blue-emitting phosphors
[DE93-011459] p 78 N94-11622
Changes in Hawaiian palagonite FE mineralogy associated with thermal alteration: Implications for Mars
p 281 N94-12055
Primordial lightning: Evidence preserved in chondrites
p 432 N94-12230
On the origin of (4)He and (40)Ar in natural gold
p 87 N94-12240
Thermal error compensation feasibility study using artificial intelligence
[AD-A266084] p 340 N94-12411
NiAl alloys for structural uses
[NASA-CR-194113] p 85 N94-12447
Molecular properties of polymeric materials for space applications
[NASA-CR-194370] p 94 N94-12450

TEMPERATURE GRADIENTS
Coupled thermogravitational and thermocapillary convection in a two-layer fluid system
p 105 N94-10101
Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108
A study of the quasibinary Al-Mo-W system. Part 2: A physico-mechanical investigation of the system fabricated under the gravitylessness conditions
p 119 N94-10212
Crystal growth in the Zone Melting Facility (ZMF)
p 119 N94-10213
Numerical investigations on Marangoni-Benard instability in multi layer systems p 120 N94-10217
Convective motion in a multi-layered system with a free surface p 120 N94-10219
Appearance of convective instabilities caused by liquid-liquid phase separation under small buoyancy forces p 120 N94-10221
A theoretical kinematical study of the gradient of any cosmic scalar field
[DE92-644731] p 425 N94-11136
The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars
p 463 N94-12169
Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217
A user appraisal of ATSR near-real-time products
p 252 N94-12516
Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data
p 220 N94-12711

TEMPERATURE MEASUREMENT
Low cost and thermally stable sandwich design for FIRST p 57 N94-10009
Experimental analysis of Benard-convection by the combined application of liquid crystals and PIV
p 106 N94-10109
The pyrene laser induced fluorescence technique as a diagnostic tool for combustion thermometry in microgravity p 107 N94-10113
A new method for hysteresis measurements developed for C(sub v) measurements at the critical point during the D2-mission p 107 N94-10114
High temperature processing and diagnostic technologies for microgravity applications
p 110 N94-10130
TEXUS 28 experiment: Convections and crystal growth of Ge:Ga. Analysis of temperature measurements
p 114 N94-10184
Ground results of the Mephisto program: Benefits and space experiments orientation p 86 N94-10197
Local measurement of temperatures and concentrations: A review for hypersonic flows
p 4 N94-10434
Experiments in ultracold collisions
[DE93-012110] p 365 N94-11029
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252
Heat flux measurements on ceramics with thin film thermocouples
[NASA-TM-106305] p 170 N94-11310
A detailed study of the photo-injection annealing of thermally diffused InP solar cells p 48 N94-11381
The excitation of cyanogen and ionized carbon in interstellar and extragalactic gas clouds
p 426 N94-11582
Overview of the 1989 Wind Tunnel Calibration Workshop
[NASA-TP-3393] p 34 N94-11869
Trouble areas in the IRT measurement of the Earth surface temperature p 193 N94-11910
Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968
Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970
Calorimetric thermometry of meteoritic troilite: A feasibility study p 428 N94-12025
Establishing baseline data for an experimental appratus that measures heat transfer under conditions of oscillating pressure and flow
[NASA-CR-193772] p 413 N94-12343
Preliminary validation of ATSR sea surface temperatures near the Faeroes p 253 N94-12519

TEMPERATURE MEASURING INSTRUMENTS
The High Precision Thermostat HPT-HYDRA
p 109 N94-10124
A comparison of ATSR and shipboard radiometer SST measurements along transects between the UK and the Antarctic p 253 N94-12518

TEMPERATURE PROBES
Ocean measuring experiments using optical fiber distributed temperature sensor p 172 N94-11968

TEMPERATURE PROFILES
The electron beam furnace: A new facility for materials science research p 109 N94-10126
Variations of the temperature profile in the gradient furnace GFQ within a cylindrical sample used for directional solidification p 114 N94-10181
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures
[AD-A264920] p 245 N94-11851
Remote sensing of subsurface water temperature profile and backscattering coefficient in the China Sea by Ocean Lidar (OLIDAR) p 203 N94-11970

TEMPERATURE SENSORS
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies
[NASA-TM-106281] p 47 N94-11252

TEMPORAL DISTRIBUTION
Distribution of mineral aerosols over the North Pacific
p 204 N94-11976

TEMPORAL RESOLUTION
SAR interferometry experiments with ERS-1
p 237 N94-11735
Segmented land use classification of multitemporal ERS-1 SAR data using a majority filter
p 245 N94-12472
Mapping a dynamic playa surface using multitemporal ERS-1 SAR data: First results p 246 N94-12474
Snow and glacier investigations by ERS-1 SAR: First results p 247 N94-12481
Per-field filtering and classification of multitemporal ERS-1 SAR imagery p 247 N94-12485
Extraction of plant and soil parameters from multitemporal ERS-1 SLC data of the Freiburg test site
p 248 N94-12491
Temporal monitoring of soil moisture using ERS-1 SAR data p 249 N94-12493
TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497

TENSILE PROPERTIES
Physical properties of injection molded liquid crystal polymers and high temperature engineering polymers [AD-A264912] p 87 N94-10508
The effect of processing on the microstructure and tensile properties of a (gamma)-TiAl based alloy [DE93-013221] p 84 N94-11488
Ceramic technology project database [DE93-012432] p 91 N94-11673

TENSILE STRENGTH
Design with high strength steel: A case of failure and its implications p 58 N94-10017
Mechanical properties of magnesium/carbon composites developed by hot pressing under medium pressure p 59 N94-10024
High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition [DE93-013977] p 398 N94-11115
Thermal testing of aluminized Mylar [NASA-TM-108414] p 89 N94-11175
Interface considerations in Al2O3/NiAl composite [NASA-CR-191167] p 66 N94-11202

TENSILE STRESS
Extensions of some guidelines for the mechanical design of coaxial compression pin seals [DE93-012385] p 177 N94-10348
Crack suppression in GaInSb buffer layers initially under tensile stress [DE93-012839] p 396 N94-10745
High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition [DE93-013977] p 398 N94-11115
Damage thresholds of fluoride multilayers at 355 nm [DE93-009523] p 90 N94-11230

TENSILE TESTS
Mechanical and fatigue properties of fibre reinforced aluminium-lithium alloy and aluminium-lithium MMC based laminates p 58 N94-10022
A method for determination of the elongational viscosity of viscoelastic fluids without body forces p 124 N94-10247

TENSORS
Regular tensor Green functions of the round waveguide [DE93-621354] p 345 N94-11036
Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

TERMINAL BALLISTICS
Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563

TERMINAL GUIDANCE
Evaluation of the capacity and delay benefits of terminal air traffic control automation [AD-A265323] p 24 N94-11863

TERMINOLOGY
Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Incorporated [DE93-012509] p 420 N94-11369

TERNARY ALLOYS
Lattice-matched heteroepitaxy of wide gap ternary compound semiconductors p 400 N94-11441
Electronic and total energy properties of ternary and quaternary semiconductor compounds, alloys and superlattices [NASA-CR-192905] p 405 N94-12570

TERNARY SYSTEMS
Rapid thermal processing for strained-layer semiconductor devices [DE93-013754] p 396 N94-10809

TERRACES (LANDFORMS)
Descriptions and preliminary interpretations of cores recovered from the Manson Impact Structure (Iowa) p 281 N94-12032

TERRAIN
Measures for simulator evaluation of a helicopter obstacle avoidance system p 35 N94-11535
A structural origin for the cantaloupe terrain of Triton p 449 N94-12095
Venus mountain-top mineralogy: Misconceptions about pyrite as the high radar-reflecting phase p 455 N94-12129
Relation between ages and elevations of Martian channels p 472 N94-12216
Do large impact basins in the southern hemisphere of Mars control the distribution of polar structures and deposits? p 481 N94-12266
Free-air and Bouguer gravity anomalies and the Martian crustal dichotomy p 481 N94-12267

TERRAIN ANALYSIS
Sources of Na for the Io atmosphere p 455 N94-12127
Terrestrial case studies of ilmenite exploration and lunar implications p 478 N94-12247

TERRESTRIAL PLANETS
Giant impact-induced atmospheric blow-off p 435 N94-12019
Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158

TERRESTRIAL RADIATION
A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245

TEST EQUIPMENT
Dynamic tester for rotor seals and bearings [NASA-CASE-MFS-28493-1] p 33 N94-10669
Programmable logic devices [DE93-013117] p 144 N94-11479
Hot-gas-side heat transfer characteristics of subscale, plug-nozzle rocket calorimeter chamber [NASA-TP-3380] p 55 N94-12569

TEST FACILITIES
High-field conductor testing at the FENIX facility [DE93-012318] p 387 N94-10737
Aircraft material fire testing and the creation of an international working group p 21 N94-10790
Experimental approach to the physics of the high density divertor [DE93-009149] p 391 N94-11170
A facility for testing 10- to 100-kWe space power reactors [DE92-040420] p 372 N94-11296
Development of a high specific 1.5 to 5 kW thermal arcjet [NASA-CR-193133] p 47 N94-11354
An overview of the capabilities of ARA for the measurement of nozzle discharge and thrust [ARA-MEMO-378] p 55 N94-12283

TEST PILOTS
Quantitative EEG patterns of differential in-flight workload p 317 N94-11528

TEST STANDS
Operational characteristics of a 100-mA, 2-MeV radio-frequency quadrupole [DE93-014474] p 374 N94-12786

TETHERED BALLOONS
Development of a balloon-borne stabilized platform for measuring radiative flux profiles in the atmospheric boundary layer [DE93-013186] p 274 N94-10323

TETRACHLORIDES
The adsorption and surface reaction of SiCl4 on Si(100)-(2x1) [AD-A266124] p 79 N94-12538

TEXTILES
New technology for effective control of flammability in polyolefin fiber/textiles p 18 N94-10774

TEXTS
Abbreviations, acronyms, and initialisms frequently used by Martin Marietta Energy Systems, Incorporated [DE93-012509] p 420 N94-11369

TEXTURES
Texture analysis of high Tc superconductors p 399 N94-11314
Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097
The EET87513 clast N: A CM2 fragment in an HED polymict breccia p 453 N94-12117
Trace element distributions in primitive achondrites p 431 N94-12200

THAILAND
Thailand ISY activities p 37 N94-10690

THALLIUM ALLOYS
Effect of experimental procedure on pattern formation and array disorder in cellular solidification p 117 N94-10203

THEMATIC MAPPERS (LANDSAT)
Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea p 246 N94-12478

THEMATIC MAPPING
Satellite inventory of Minnesota forest resources [NASA-CR-193565] p 231 N94-11521
Basal scarp, paleoglacier, and fissure flows of Elysium Mons, Mars p 459 N94-12148
Synthesis of global thematic mapping, Venus: Geologic correlations/questions for the Magellan gravity mission p 467 N94-12194
Geoecological monitoring of an agricultural area p 248 N94-12489

THEOREM PROVING
Operator substitution [MEMO-COSOR-92-51] p 343 N94-10867
Wait-free linearization with an assertional proof [CS-9208] p 323 N94-10878

THEOREMS
Convergence theorems for a class of nonlinear maps in uniformly smooth Banach spaces [DE92-641347] p 343 N94-10531
On the doubling of hydrodynamic theorems in relativistic theory of superfluidity [DE93-617895] p 148 N94-10717

THEORETICAL PHYSICS
On parity conservation and the question of the missing, right-handed neutrino [DE93-613092] p 361 N94-10414
A version of superstring with four space-time dimensions [DE93-608196] p 412 N94-11163
Experimental and theoretical high energy physics program [DE93-013336] p 373 N94-12600

THERMAL ANALYSIS
Fire resistance and mechanical properties for phenolic prepregs p 20 N94-10786
A high specific power solar array for low to mid-power spacecraft p 51 N94-11399
Results of thermal vacuum tests for the PASP+ flight modules p 53 N94-11410

THERMAL BOUNDARY LAYER
Boundary layers along horizontal free surfaces due to combined effects of temperature and concentration gradients p 106 N94-10108

THERMAL CONDUCTIVITY
Measurement of the thermal conductivity of molten InSb in a drop shaft p 105 N94-10102
Thermophysical properties of undercooled liquid metals p 86 N94-10190
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity [DE93-617852] p 388 N94-10840
Experimental study of multiple droplet evaporative cooling [PB93-198463] p 149 N94-10851
Low-expansion ceramics initiative [DE93-011860] p 89 N94-11106
Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time [AD-A265530] p 403 N94-12010
Martian particle size based on thermal inertia corrected for elevation-dependent atmospheric properties p 430 N94-12107
Does the thermal wind exist near the Earth's core boundary? p 283 N94-12217

THERMAL CONTROL COATINGS
Experimental measurement of the plasma conductivity of Z93 and Z93P thermal control paint [NASA-TM-106284] p 43 N94-10756
Vacuum stability requirements of polymeric material for spacecraft application [NASA-TM-109216] p 91 N94-11350

THERMAL CYCLING TESTS
Transport of heat and mass in near-critical fluids p 122 N94-10230
TAB interconnects for space concentrator solar cell arrays p 51 N94-11400

THERMAL DEGRADATION
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels [DE93-009798] p 98 N94-11366
Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels [AD-A265842] p 99 N94-12282

THERMAL DIFFUSION
Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215
Progress in p(+)n InP solar cells fabricated by thermal diffusion p 48 N94-11384
Electrochemical characterization of p(+)n and n(+)p diffused InP structures p 49 N94-11385
Micro-zoning in minerals of a Landes silicate inclusion p 432 N94-12231

THERMAL DISSOCIATION
Tribological characteristics of hot-pressed self-lubricating composites [NAL-TR-1160] p 66 N94-10858

THERMAL EMISSION
Galileo/NIMS near-infrared thermal imagery of the surface of Venus p 457 N94-12139
Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces p 81 N94-12156

THERMAL ENVIRONMENTS
The spectral effects of subsolidus reduction of olivine and pyroxene p 81 N94-12110

THERMAL EXPANSION
Low cost and thermally stable sandwich design for FIRST p 57 N94-10009

Sensing glass transitions in thin polymer films on acoustic wave microsensors
[DE93-010805] p 87 N94-10295
Method for producing a hybridization of detector array and integrated circuit for readout
[NASA-CASE-NPO-18062-1-CU] p 141 N94-10656
Ceramic technology project database
[DE93-012432] p 91 N94-11673

THERMAL INSULATION
Material advances for lightweight TPS
p 62 N94-10049
Vectra insulative support structures within spacecraft
p 62 N94-10050
Polyimide foam insulation systems: A major weight reduction and improvement in fire resistance of sidewall systems p 17 N94-10769
A new FR water resistant acoustic insulation material for aircraft p 18 N94-10773

THERMAL MAPPING
Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097
Martian particle size based on thermal inertia corrected for elevation-dependent atmospheric properties
p 430 N94-12107
Galileo/NIMS near-infrared thermal imagery of the surface of Venus p 457 N94-12139
A simple model of clastic sediments on Mars
p 460 N94-12155

THERMAL NEUTRONS
Possibility of a crossed-beam experiment involving slow-neutron capture by unstable nuclei rapid-process-tron
[DE93-754288] p 363 N94-10720
The multiplicity spectra of the (169)Tm(n, gamma) reaction
[DE93-617733] p 364 N94-10835
Analytic expression for epithermal neutron spectra amplitudes as a function of water content
p 473 N94-12227

THERMAL PLASMAS
Momentum and heat frictions between fast ions and thermal plasma species
[DE93-771240] p 390 N94-11149
An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651

THERMAL PROTECTION
On the mechanical development of the Flexible External Insulation (FEI) for Hermes spaceplane
p 62 N94-10048
Material advances for lightweight TPS
p 62 N94-10049
Debris/ice/TPS assessment and integrated photographic analysis for Shuttle Mission STS-57
[NASA-TM-107562] p 40 N94-10805
Space Storable Rocket Technology program (SSRT). Option 1 program
[NASA-CR-191171] p 46 N94-10938

THERMAL RADIATION
In-reactor testing of the closed cycle gas core reactor: The Nuclear Light Bulb concept
[DE93-004053] p 370 N94-10149
The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Combustion chamber analysis code
[NASA-CR-192585] p 46 N94-10934

THERMAL REACTORS
A critical assembly designed to measure neutronic benchmarks in support of the Space Nuclear Thermal Propulsion program
[DE92-040974] p 371 N94-10529

THERMAL RESISTANCE
Advanced Materials for Lightweight Structures
[ESA-SP-336] p 56 N94-10001
Protective coatings for high-temperature polymer matrix composites
[NASA-TM-106276] p 74 N94-12431

THERMAL SHOCK
Potential change in flaw geometry during pressurized-thermal-shock transients
[DE93-009709] p 184 N94-10288
Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques
[NASA-TM-106121] p 67 N94-11237

THERMAL STABILITY
An approach to high precision antenna structures by a CFRP core sandwich concept p 57 N94-10008
A wide-band fiber optic frequency distribution system employing thermally controlled phase compensation
p 355 N94-10995
Thermal stability of sealants for military aircraft: Modification of polysulfide prepolymers with ether and thioether monomers
[AD-A264079] p 89 N94-11107
High temperature stability, interface bonding, and mechanical behavior in (beta)-NiAl and Ni3Al matrix composites with reinforcements modified by ion beam enhanced deposition
[DE93-013977] p 398 N94-11115
Thermal testing of aluminized Mylar
[NASA-TM-108414] p 89 N94-11175
Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350
Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites
[AD-A265177] p 92 N94-11876
The stability of hibonite and other aluminous phases in silicate melts: Implications for the origin of hibonite-bearing inclusions p 80 N94-12052
A novel test method for fuel thermal stability
[AD-A265853] p 99 N94-12275
Advanced thermally stable coal-derived jet fuels: Compositional factors affecting thermal degradation of jet fuels
[AD-A265842] p 99 N94-12282
Liquid Cooled Heat Sink with through Vias (LCHS)
[AD-A266008] p 73 N94-12344
Photogenerated base in polymer imaging. Synthesis and photopatterning of poly(2-cyano-2-(p-vinylphenyl) butanoic acid)
[AD-A265288] p 95 N94-12585

THERMAL STRESSES
Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels
[DE93-009798] p 98 N94-11366
Instantaneous engine frictional torque: Its components and piston assembly friction
[DE93-011639] p 182 N94-11625
A novel test method for fuel thermal stability
[AD-A265853] p 99 N94-12275
Analytical models for describing the mechanical behavior of fiber reinforced composites
[AD-A265906] p 74 N94-12347

THERMAL VACUUM TESTS
Results of thermal vacuum tests for the PASP+ flight modules p 53 N94-11410

THERMIONIC CONVERTERS
TFE verification program
[DE93-009609] p 373 N94-11694

THERMIONIC DIODES
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode
[DE93-620977] p 387 N94-10541

THERMIONIC EMITTERS
TFE verification program
[DE93-009609] p 373 N94-11694

THERMIONIC POWER GENERATION
The 40 kWe S-PRIME Thermionic Design and Technology Demonstration Program
[DE93-004738] p 40 N94-10147

THERMOCHEMISTRY
Technical Update: Johnson Space Center system using a solid electrolytic cell in a remote location to measure oxygen fugacities in CO/CO2 controlled-atmosphere furnaces
[NASA-TM-104774] p 423 N94-11183
Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings
[AD-A265072] p 92 N94-11866
Crystal-chemistry and partitioning of REE in whitlockite
p 408 N94-12174
The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246

THERMOCLINES
The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992
[AD-A264922] p 289 N94-11853
On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987
The Pacific Subarctic Frontal Zone: Structure and dynamics p 223 N94-12731
Generation of internal waves near the shelf boundary
p 229 N94-12763

THERMOCOUPLES
High temperature processing and diagnostic technologies for microgravity applications
p 110 N94-10130

THERMODYNAMIC CYCLES
Study on various cryogenic refrigeration cycles using all purpose refrigerators p 130 N94-11839

THERMODYNAMIC EFFICIENCY
Space Life Support Engineering Program
[NASA-CR-193474] p 316 N94-12365
Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369

THERMODYNAMIC EQUILIBRIUM
Rapid thermal processing for strained-layer semiconductor devices
[DE93-013754] p 396 N94-10809
Stability and dynamics of spatio-temporal structures
[DE93-011374] p 401 N94-11610
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028

THERMODYNAMIC PROPERTIES
LAMINV: A computer code for creating laminates having prescribed properties p 65 N94-10069
Experimental approach to non-contact calorimetry in space p 112 N94-10143
On thermodynamic properties of heavy fermion systems in magnetic field
[DE93-613819] p 409 N94-10403
Thermodynamic model of air in chemical equilibrium
p 7 N94-10448
Exergy decrease in shock waves and boundary layers of space launch vehicles
[AD-A265272] p 42 N94-10493
The effect of pressure and quadrupolar interactions on the nematic-isotropic transition properties: Numerical results for a system of prolate ellipsoids including second and fourth rank orientational order parameters
[DE93-613540] p 410 N94-10536
Primaset (tm): A safer material for aircraft interior applications p 18 N94-10772
Level 3 material characterization of NARC HRPF, HRHU, HRHF, and HRPU
[NASA-CR-192579] p 65 N94-10812
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT
p 194 N94-11918
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Thermodynamics of lunar ilmenite reduction
p 415 N94-12028
Variability of the mixed layer depth in the North Pacific Ocean as calculated by a 3-D semi-analytical mixed layer remote sensing model p 221 N94-12718
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732

THERMODYNAMICS
Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system)
p 101 N94-10082
A lattice gas model for enzyme kinetics with next-nearest neighbor interactions
[DE93-613026] p 410 N94-10631
Similarity of the leading contributions to the self-energy and the thermodynamics in two- and three-dimensional Fermi Liquids
[DE93-012673] p 412 N94-11162
A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity
[NASA-TM-106122] p 188 N94-11482
Chaos, entropy, and reversibility: A simple example
p 31 N94-11495
Proposed framework for thermomechanical life modeling of metal matrix composites
[NASA-TP-3320] p 74 N94-12449
The thermodynamics of the nonlinear shear flows
p 169 N94-12728

THERMOELECTRIC POWER GENERATION
High efficiency direct thermal to electric energy conversion from radioisotope decay using selective emitters and spectrally tuned solar cells
[NASA-TM-106227] p 47 N94-11307

THERMOGRAPHY
Thermal flux measurements in hypersonic flows: A review p 5 N94-10438
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851
Thermographic properties of eight blue-emitting phosphors
[DE93-011459] p 78 N94-11622

THERMOGRAVIMETRY
Analytical method for water vapor collection and analysis in aircraft cabin fires
[DOT/FAA/CT-TN93/33] p 22 N94-12575

THERMOLUMINESCENCE
Meteorites from recent amor-type orbits p 429 N94-12059
Natural thermoluminescence profiles in lunar cores and implications for meteorites p 443 N94-12060
Diamond thermoluminescence properties of different chondrites p 433 N94-12252

THERMOMETERS
Preliminary results of the comparison of ATSR measurements with in situ sea temperatures [DE93-013399] p 287 N94-10517
Trouble areas in the IRT measurement of the Earth surface temperature p 193 N94-11910

THERMONUCLEAR REACTIONS
High heat flux components and plasma surface interactions [DE93-008786] p 385 N94-10253

THERMOPHILES
Conversion of acetic acid to methane by thermophiles [DE93-014433] p 300 N94-10652

THERMOPLASTIC RESINS
Universal adjustable mould for antenna reflectors p 59 N94-10027
Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030
Heat analysis of thermoplastic components during the initial stages of manufacturing: A probabilistic approach p 60 N94-10031
Cost effectiveness of structural applications of fibre reinforced thermoplastics p 60 N94-10032
Application of advanced thermoplastics p 60 N94-10033
Low cost thermoplastic composites for structural applications: Design concepts using new materials and processes p 60 N94-10034
Tape winding of thermoplastic composites p 60 N94-10035
Applications of continuous fiber reinforced thermoplastics in aircraft interiors p 18 N94-10775
Uralane (tm) 5774-A/B: Ciba-Geigy's advanced urethane adhesive for the aircraft industry p 18 N94-10777
Fire-resistant hydrolytically stable poly(arylene phosphine oxide) material systems p 19 N94-10780
Dry in-line thermoplastic matrix impregnation, phase 1 [AD-A265016] p 67 N94-11221

THERMOPLASTICITY
New thermoplastic laminating adhesives for the aircraft industry with low heat release and low smoke emission p 17 N94-10767
Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone) [AD-A266027] p 91 N94-11487

THERMOREGULATION
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368

THERMOSETTING RESINS
Ceramics formed by pyrolysis of either linear or thermosetting carborane (siloxane or silane) acetylene based precursor polymers [AD-D015747] p 93 N94-12330
Synthesis and polymerization of oligomeric multiple aromatic ether-containing phthalonitriles [AD-D015729] p 94 N94-12399

THERMOSTATS
The High Precision Thermostat HPT-HYDRA p 109 N94-10124

THICKNESS
Material removal processes: Engineering mechanics consideration [DE93-010733] p 126 N94-10293
Temperature effects on failure thickness and deflagration-to-detonation transition in PBX 9502 and TATB [DE93-010742] p 97 N94-10294
Radiation considerations for interplanetary missions p 45 N94-11559
Dielectric breakdown and its influence on ignition [AD-A264925] p 78 N94-11855

THIN FILMS
Invariance of the mobility edge in anodic titanium oxides [DE92-642136] p 394 N94-10281
Sensing glass transitions in thin polymer films on acoustic wave microsensors [DE93-010805] p 87 N94-10295
Thin-film edge field emitter device and method of manufacture therefore [AD-D015764] p 140 N94-10377
Crack suppression in GaInSb buffer layers initially under tensile stress [DE93-012839] p 396 N94-10745
Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends [DE93-013140] p 89 N94-11007
Characterization of the Si/SiO2 interfere morphology from quantum oscillations in Fowler-Nordheim tunneling currents [AD-A265149] p 143 N94-11160
Materials for adaptive structural acoustic control, volume 3 [AD-A264621] p 358 N94-11262
Structural development in ceramic precursor sols and gels [AD-A264354] p 90 N94-11281
Thin film preparation and interfacial reaction study of solid oxide fuel cell materials p 263 N94-11313
Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures [NASA-TM-106078] p 55 N94-11362
Investigation of the radiation resistance of triple-junction a-Si:H alloy solar cells irradiated with 1.00 MeV protons p 50 N94-11391
Results of some initial space qualification testing on triple junction a-Si and CuInSe2 thin film solar cells p 50 N94-11392
Flexible polycrystalline thin-film photovoltaics for space applications p 50 N94-11393
Thin film solar cell workshop p 54 N94-11415
Remote plasma enhanced chemical vapor deposition of GaP with in situ generation of phosphine precursors p 399 N94-11440
In situ XANES studies of the passive film on Fe and Fe-26Cr [DE93-010869] p 84 N94-11459
Wide Band-Gap Semiconductors. 1991 Materials Rese arch Society Symposium proceedings [AD-A263418] p 401 N94-11515
Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings [AD-A265072] p 92 N94-11866
Applications of in-situ ellipsometry to microwave electron cyclotron resonance plasma processes [AD-A265197] p 373 N94-11880
NRL review for 1993 [AD-A265666] p 497 N94-12334
Ballistic electron transport studies using BEEM [AD-A266029] p 369 N94-12395
Multicomponent and multilayered thin films for advanced microtechnologies: Techniques, fundamentals, and devices [AD-A265685] p 405 N94-12442
In-situ crystallization of silicate glass films deposited on alpha- Al2O3 [DE93-012969] p 95 N94-12596

THIN PLATES
Boundary element method for eigenvalue problems of thin plates [ITN-93-85199] p 343 N94-10392

THIN WALLED SHELLS
Distortions and stresses in thin shells due to anisotropic thermal expansion p 57 N94-10014

THIN WALLS
Perforated plates for thin-walled structures p 63 N94-10056

THIN WINGS
Simulated wake characteristics of tapered annular wings by a discrete vortex method [NAL-TR-1156] p 13 N94-10855
Simulated and experimental aerodynamic characteristics of tapered annular wings [NAL-TR-1157] p 13 N94-10856

THIOUREAS
Second and third order nonlinear optical properties of crystalline inorganic/organic complexes [DE93-011883] p 173 N94-10755

THOMAS-FERMI MODEL
Radiative properties of strongly magnetized plasmas [DE93-014098] p 389 N94-11118

THOMSON SCATTERING
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic [DE93-012782] p 173 N94-10160

THORAX
Hormonal regulation of fluid and electrolyte metabolism during periods of headward fluid shifts p 311 N94-12005

THORIUM
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times p 281 N94-12076

THORIUM ISOTOPES
LEW88516 and SNC meteorites p 430 N94-12150
The Th and U abundances in chondritic meteorites p 430 N94-12151

THREE BODY PROBLEM
Three-nucleon problem with phase equivalent potentials [DE93-617731] p 363 N94-10722
On the depletion in the outer asteroid belt and the structure of the 4 to 3 mean motion resonance p 426 N94-11596
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057

THREE DIMENSIONAL BOUNDARY LAYER
On nonlinear Tollmien-Schlichting/vortex interaction in three-dimensional boundary layers [NASA-TM-106184] p 152 N94-11377
Experiments on near-wall structure of three-dimensional boundary layers p 159 N94-12309
Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620
Curvature effects in three-dimensional boundary layers p 164 N94-12623

THREE DIMENSIONAL FLOW
Three-dimensional hypersonic rarefied flow calculations using direct simulation Monte Carlo method p 7 N94-10449
Development of a Delaunay-based adaption scheme with applications to complex three-dimensional rotational flows p 149 N94-10824
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
KIVA-3: A KIVA program with block-structured mesh for complex geometries [DE93-011986] p 77 N94-11249
Viscous analysis of three-dimensional rotor flows using a multigrid method [NASA-TM-106266] p 152 N94-11481
The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
Reynolds stress closure modeling in wall-bounded flows p 157 N94-12298
Experiments on near-wall structure of three-dimensional boundary layers p 159 N94-12309
The three-dimensional evolution of a plane wake p 159 N94-12310
Towards a cell-vertex Navier-Stokes algorithm for three-dimensional structured/unstructured meshes [ARA-MEMO-366] p 161 N94-12437
Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624
VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades [CUED/A-TURBO/TR.128] p 166 N94-12777
VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

THREE DIMENSIONAL MODELS
Transient three-dimensional numerical simulation of Marangoni flow in a liquid column under microgravity p 101 N94-10079
Calculation of the effects of magnetic field damping in fluid flow: Comparison of magnetohydrodynamic models of different complexity p 103 N94-10089
Venus resurfacing rates: Constraints provided by 3-D Monte Carlo simulations p 453 N94-12119
Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks [AD-A265291] p 404 N94-12438

THRESHOLDS (PERCEPTION)
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli [AD-A265168] p 324 N94-11099

THRUST BEARINGS
Improvement of azimuthal homogeneity in permanent-magnet bearing rotors [DE93-009954] p 144 N94-11607

THRUST CHAMBERS
Space Storable Rocket Technology program (SSRT). Option 1 program [NASA-CR-191171] p 46 N94-10938

THRUST MEASUREMENT
Characterization of in-flight performance of ion propulsion systems [NASA-TM-106283] p 46 N94-10761
An overview of the capabilities of ARA for the measurement of nozzle discharge and thrust [ARA-MEMO-378] p 55 N94-12283

THRUST REVERSAL
Turbulence modeling for thrust reverser flow field prediction methods [AD-A266139] p 154 N94-11641

THRUST VECTOR CONTROL
Static internal performance of a single expansion ramp nozzle with multiaxis thrust vectoring capability [NASA-TM-4450] p 12 N94-10675
AD100/ADSIM, ACSL, and MATLAB output comparisons using frequency-response analysis [DE93-009640] p 47 N94-11122
Adaptive reconfigurable flight controls for high angle of attack aircraft agility p 32 N94-11502

THRUST-WEIGHT RATIO
Static internal performance of a single expansion ramp nozzle with multiaxis thrust vectoring capability [NASA-TM-4450] p 12 N94-10675

THRUSTORS
Arcjet space thrusters [NASA-CR-193191] p 46 N94-10700
A laboratory model of a hydrogen/oxygen engine for combustion and nozzle studies [NASA-TM-106281] p 47 N94-11252

THULIUM ISOTOPES
The multiplicity spectra of the (169)Tm(n, gamma) reaction [DE93-617733] p 364 N94-10835

THYRISTORS
A study of DC-DC converters with MCTs for arcjet power supplies [NASA-CR-193457] p 142 N94-10931

TIBET
Analysis of gravity, magnetic, and seismic reflection data from Tibet and neighboring regions of China [NASA-CR-193405] p 278 N94-11886

TIDAL WAVES
Generation of internal waves near the shelf boundary p 229 N94-12763
Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

TIDES
A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767
Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

TILES
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

TILT ROTOR AIRCRAFT
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover [NASA-CR-4532] p 13 N94-10758

TILTING ROTORS
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover [NASA-CR-4532] p 13 N94-10758

TIMBER IDENTIFICATION
Properties of spectral reflectance of crown and crown structure of mangrove species in Okinawa p 218 N94-12700

TIME
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting [NASA-CP-3218] p 350 N94-10963

TIME DEPENDENCE
Coherent states and uncertainty relations for the damped harmonic oscillator with time-dependent frequency p 380 N94-10611
The angular structure of second harmonic emission from laser-produced plasmas irradiated at moderate intensity [DE93-013102] p 389 N94-11114
The effects of an aggressive environment on the subcritical crack growth of a continuous-fiber ceramic composite [DE93-011690] p 73 N94-11612
Parametric study of diffusion-enhancement networks for spatiotemporal grouping in real-time artificial vision [AD-A265065] p 331 N94-11652
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287

TIME LAG
Plans to improve the experimental limit in the comparison of the east-west and west-east one-way light propagation times on the rotating earth p 351 N94-10971
Performances of a date dissemination code on telephone lines using commercial modems p 139 N94-10984
Time signal distribution in communication networks based on synchronous digital hierarchy p 139 N94-10989
Comments on possible causes of recent global warming [DE93-010501] p 272 N94-12592

TIME MEASUREMENT
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting [NASA-CP-3218] p 350 N94-10963
The time keeping system for GPS block IIR p 24 N94-10964
Progress on GPS standardization p 24 N94-10965
Comparison of GPS and GLONASS common-view time transfers p 24 N94-10967
Pulsar astrometry by using VLBI (PSR0329 between Kashima 26mPhi and Usuda 64mPhi) p 351 N94-10968
An ensemble pulsar time p 351 N94-10969
Experimental comparison of time synchronization techniques by means of light signals and clock transport on the rotating earth p 351 N94-10970
LASSO observations at McDonald and OCA/CERGA: A preliminary analysis p 352 N94-10972
MIL-STDS and PTTI: What's available and what needs to be done p 352 N94-10973
Possible applications of atomic frequency standards with an internal high resolution digital synthesizer p 353 N94-10979
Development of a cryogenic hydrogen maser at the NPL p 176 N94-10982
Performances of a date dissemination code on telephone lines using commercial modems p 139 N94-10984
TimeSet: A computer program that accesses five atomic time services on two continents p 334 N94-10985
RighTime: A real time clock correcting program for MS-DOS-based computer systems p 334 N94-10986
Measurement methods and algorithms for comparison of local and remote clocks p 354 N94-10987
Advances in time-scale algorithms p 334 N94-10988
Time signal distribution in communication networks based on synchronous digital hierarchy p 139 N94-10989
Synopsis of timing measurement techniques used in telecommunications p 139 N94-10990
Analysis of the eastern range multiplexed fiber optic IRIG B120 distribution system p 139 N94-10996
A new method of time difference measurement: The time difference method by dual phase coincidence points detection p 357 N94-11002
Confidence of the three-point estimator of frequency drift p 357 N94-11003
Rhenium-osmium isotope systematics of Group 2A and Group 4A iron meteorites p 431 N94-12182
An optoelectronic graphics display processor [AD-A266011] p 171 N94-12391

TIME MEASURING INSTRUMENTS
A new method of time difference measurement: The time difference method by dual phase coincidence points detection p 357 N94-11002

TIME OF FLIGHT SPECTROMETERS
Measurement of polycyclic aromatic hydrocarbon (PAHs) in interplanetary dust particles p 431 N94-12167

TIME SERIES ANALYSIS
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363
Detecting non-linearities in stationary time series [W-9223] p 344 N94-10906
Chaotic time series analysis p 31 N94-11490
Advective surface velocity in the north west Pacific derived from NOAA AVHRR images p 222 N94-12721
Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759

TIME SIGNALS
A precise GPS-based time and frequency system p 353 N94-10978
TimeSet: A computer program that accesses five atomic time services on two continents p 334 N94-10985
Time signal distribution in communication networks based on synchronous digital hierarchy p 139 N94-10989
Synopsis of timing measurement techniques used in telecommunications p 139 N94-10990
Performance of low-cost commercial fiber-optic transceivers for reference frequency distribution p 355 N94-10993
Analysis of the eastern range multiplexed fiber optic IRIG B120 distribution system p 139 N94-10996
Estimating the instabilities of N clocks by means of comparison measurements p 356 N94-10997

TIME TEMPERATURE PARAMETER
Time-temperature shift factors for gun propellants [AD-A264979] p 97 N94-10489
Advanced diagnostics for in situ measurement of particle formation and deposition in thermally stressed jet fuels [DE93-009798] p 98 N94-11366

TIMING DEVICES
Experimental comparison of time synchronization techniques by means of light signals and clock transport on the rotating earth p 351 N94-10970
Disciplined rubidium oscillator with GPS selective availability p 353 N94-10977

TIMOSHENKO BEAMS
Control of large space structures with varying configuration [AD-A265764] p 44 N94-12387

TIN ALLOYS
Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194

TIROS N SERIES SATELLITES
TOVS soundings: Impact on the synoptic analysis over the south and southeast regions of Brazil from March 18 to March 19, 1991 [INPE-5497-TDI/512] p 230 N94-11179

TISSUES (BIOLOGY)
Research on acoustic coupling to electromagnetic pulses in tissue [AD-A264764] p 301 N94-11583
Momentum induced by laser-tissue interaction [DE93-010737] p 301 N94-11667

TITANATES
Grain boundaries in complex oxides [DE93-013986] p 398 N94-11012

TITANIUM ALLOYS
Hydrogen partitioning and transport in titanium aluminides [NASA-CR-194117] p 76 N94-10713
Titanium alloys milling assistance by high pressure lubricoolant jet [DE93-013302] p 82 N94-11008

TITANIUM CARBIDES
The reaction between titanium carbide and aluminium carbide in liquid aluminium; a microgravity study p 123 N94-10238

TITANIUM COMPOUNDS
Hydrogen partitioning and transport in titanium aluminides [NASA-CR-194117] p 76 N94-10713

TITANIUM OXIDES
Grain boundaries in complex oxides [DE93-013986] p 398 N94-11012

TOKAMAK DEVICES
Efficiency of fast wave current drive for a weakly relativistic plasma [DE93-012775] p 385 N94-10159
Optimization of a CO2 laser Thomson scattering alpha particle diagnostic [DE93-012782] p 173 N94-10160
Physics and modelling of scrape-off layer transport [DE93-010510] p 385 N94-10289
Transport mechanisms acting in toroidal devices: A theoretician's view [DE93-013463] p 385 N94-10310
Texas experimental tokamak [DE93-013377] p 386 N94-10321
A flexible modelling software for data acquisition [DE93-612915] p 322 N94-10484
Characterization of high-power RF structures using time-domain field codes [DE93-013416] p 132 N94-10518
Optimization of break-down conditions in tokamak TOTUS [DE93-617863] p 386 N94-10524
Looking beyond ITER: Toroidal concept improvement [DE93-012762] p 388 N94-10744
Reversed-field pinch studies in the Madison Symmetric Torus [DE93-013464] p 388 N94-10747
Kinetic approach to long wave length modes in rotating plasmas [DE93-771286] p 388 N94-10807
Possibilities of magnetic diagnostics in stellarators [DE93-621608] p 389 N94-11092
Physics of tokamak scrape-off layer confinement [DE93-011949] p 390 N94-11125
Gyrosheath near the tokamak edge [DE93-012191] p 390 N94-11142
Studies on the parametric decay of waves in fusion plasmas [DE93-621659] p 390 N94-11148
Intense neutron sources for fusion materials studies [DE93-009782] p 391 N94-11171
The role of plasma rotation on MHD instabilities in tokamaks [DE93-013486] p 393 N94-11512
Helium transport scaling law studies [DE93-013487] p 393 N94-11513
Results from the D3-D advanced divertor program [DE93-015472] p 393 N94-11514
Initial assessment of lower hybrid current drive in D3-D [DE93-013310] p 394 N94-12370
An emerging understanding of H-mode discharges in tokamaks [DE93-012829] p 394 N94-12544

Statistical approach to LHCD modeling using the wave kinetic equation [DE93-012831] p 394 N94-12545

TOLLMIEN-SCHLICHTING WAVES

On nonlinear Tollmien-Schlichting/vortex interaction in three-dimensional boundary layers [NASA-TM-106184] p 152 N94-11377

TOMOGRAPHY

Real-time tomography mooring [AD-A264923] p 289 N94-11854

TOPEX

Topex orbit determination using GPS tracking system p 38 N94-10359

Topex/Poseidon: A United States/France mission. Oceanography from space: The oceans and climate [NASA-TM-108253] p 43 N94-10699

TOPOGRAPHY

New x ray scanning topographic approaches to nondestructive evaluation of composites p 61 N94-10039

First results for the simultaneous estimation of the geoid and the sea surface topography by ERS-1 altimeter data p 241 N94-11765

A stochastic-deterministic approach as an alternative to classical cross-over techniques in small ocean basins p 242 N94-11767

Analysis of gravity, magnetic, and seismic reflection data from Tibet and neighboring regions of China [NASA-CR-193405] p 278 N94-11886

Lineament analysis and tectonic interpretation for the Tharsis region p 437 N94-12031

Spectral analysis of the gravity and topography of Mars p 444 N94-12065

Venus' center of mass - center of figure displacement and implications p 444 N94-12067

A structural and petrographic investigation of the pretoria saltpan impact structure p 282 N94-12102

Flexure and the role of inplane force around coronae on Venus p 452 N94-12112

Can weak crust explain the correlation of geoid and topography on Venus? p 453 N94-12118

Landscape and geomorphic survey of Zhamanshin area, Northern Kazakhstan: Preliminary report on 1992 field trip data p 282 N94-12123

An ancient inner lake in Maadim Vallis p 456 N94-12133

Geology and surface characteristics of Bell Regio, Venus p 457 N94-12136

Differential scaling: Implications for central structures in large lunar craters p 461 N94-12158

Using lunar sounder imagery to distinguish surface from subsurface reflectors in lunar highlands areas p 464 N94-12179

Morphotectonics of Venus p 478 N94-12248

Transmantle flux tectonics p 283 N94-12249

New Mars free-air and Bouguer gravity: Correlation with topography, geology and large impact basins p 481 N94-12268

Interdisciplinary scientist participation in the Phobos mission [NASA-CR-193715] p 482 N94-12446

ERS-1 altimetry of inland water and land p 246 N94-12475

Preliminary studies on the application of ERS-1 data to topographic mapping p 246 N94-12476

The TREES project: Pre-processing and generation of terrain data for inclusion in an ERS-1 SAR classification scheme p 249 N94-12496

Topography of the Western Mediterranean from the ERS-1 altimeter p 255 N94-12531

TOPOLOGY

On local frame fields and fermion dynamics in space with nontrivial topologies [DE93-617657] p 349 N94-10548

Quantum mechanical effects of topological origin p 378 N94-10594

On the possible unobservability of the Wu-Yang phase factor in curved space [DE93-617645] p 411 N94-10831

The Lip microbundle representation theorem [DE93-619671] p 346 N94-11348

TOROIDAL PLASMAS

Reversed-field pinch studies in the Madison Symmetric Torus [DE93-013464] p 388 N94-10747

Macroscopic behaviour and discrete dynamo of RFP plasma in high theta discharge [DE93-771408] p 392 N94-11239

Conversion of the four-strap array in D3-D to a tunable traveling wave antenna [DE93-012085] p 137 N94-11453

TORQUE

Instantaneous engine frictional torque: Its components and piston assembly friction [DE93-011639] p 182 N94-11625

TORSION

Damping measurements for ultra-high carbon steel/brass laminates [DE93-011886] p 82 N94-11076

TORSIONAL VIBRATION

Payload sensitivity in coupled bending and torsional vibrations in flexible beams [MEMO-1102] p 184 N94-10161

TOTAL QUALITY MANAGEMENT

The 17th Transducer Workshop [AD-A265526] p 141 N94-10509

Engineering performance metrics [DE93-012084] p 128 N94-11028

The role of metrics and measurements in a software intensive total quality management environment p 329 N94-11428

Development and application of an acceptance testing model p 330 N94-11432

Analyzing human errors in flight mission operations p 314 N94-11534

TOUGHNESS

Damping measurements for ultra-high carbon steel/brass laminates [DE93-011886] p 82 N94-11076

Processing and properties of coated HPZ fiber reinforced glass-ceramic matrix composites [AD-A265177] p 92 N94-11876

TOWING

Calibration of anemometers at low speed by means of towing carriage p 164 N94-12619

TOXICITY

Toxic chemical release inventory reporting Form R and instructions. Revised 1992 version. Section 313 of the Emergency Planning and Community Right-to-Know Act [PB93-194140] p 264 N94-10836

Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

A combustion products analyzer for contingency use during thermodegradation events on spacecraft p 318 N94-11555

Wind system documentation [DE93-010381] p 285 N94-11664

TOXICITY AND SAFETY HAZARD

Environmentally Safe and Effective Processes for Paint Removal [AGARD-R-791] p 126 N94-10613

TOXICOLOGY

A combustion products analyzer for contingency use during thermodegradation events on spacecraft p 318 N94-11555

TRACE ELEMENTS

Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094

Trace-element abundances in several new ureilites p 80 N94-12096

SXRF determination of trace elements in chondrule rims in the unequilibrated CO3 chondrite, ALH A77307 p 429 N94-12106

Trace element distributions in primitive achondrites p 431 N94-12200

Isotopic and trace element characteristics of an unusual refractory inclusion from Essebi p 471 N94-12212

Trace element content of chondritic cosmic dust: Volatile enrichments, thermal alterations, and the possibility of contamination p 433 N94-12260

New low-Ni (igneous?) particles among the C and C? types of cosmic dust p 433 N94-12262

TRACHYTE

Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072

TRACKING (POSITION)

Underwater hydrophone location survey p 290 N94-10975

Quantitative EEG patterns of differential in-flight workload p 317 N94-11528

TRACKING NETWORKS

Analysis of the eastern range multiplexed fiber optic IRIG B120 distribution system p 139 N94-10996

TRACKING PROBLEM

Derivation of three closed loop kinematic velocity models using normalized quaternion feedback for an autonomous redundant manipulator with application to inverse kinematics [DE93-012823] p 340 N94-12543

TRACKING STATIONS

Pre-operation analysis of ERS-1 tracking and operation, part 2-F [NASDA-CNT-930002-PT-2-F] p 230 N94-11130

TRAILING EDGE FLAPS

Control effectiveness at hypersonic speeds p 3 N94-10426

TRAILING EDGES

New aerodynamic information obtained from the solution of the inverse problem for aerofoils [NAL-TR-1172] p 14 N94-10860

TRAINING ANALYSIS

Teaching high-performance skills using above-real-time training [NASA-CR-4528] p 315 N94-11627

SATORI: Situation Assessment Through the Re-creation of Incidents [DOT/FAA/AM-93/12] p 38 N94-12567

TRAINING DEVICES

Quantitative EEG patterns of differential in-flight workload p 317 N94-11528

TRAINING EVALUATION

Teaching high-performance skills using above-real-time training [NASA-CR-4528] p 315 N94-11627

TRAINING SIMULATORS

Teaching high-performance skills using above-real-time training [NASA-CR-4528] p 315 N94-11627

TRAJECTORIES

Feature association without a motion estimate [AD-A265162] p 138 N94-11891

TRAJECTORY ANALYSIS

On renormalization group flow in matrix model [DE93-613050] p 409 N94-10413

Study of the surface circulation to the North of Bransfield Strait, Antarctica [INPE-5472-TDI/503] p 288 N94-11200

Modelling of dispersal and deposition of impact glass spherules from the Cretaceous-Tertiary boundary deposit p 432 N94-12238

TRAJECTORY OPTIMIZATION

Progress in multidisciplinary design optimization at NASA Langley [NASA-TM-107754] p 318 N94-10814

TRAJECTORY PLANNING

Trajectory pattern inverse dynamics and control of nonlinear dynamics systems with application to flexible structures p 181 N94-11219

Experiments in mobile robot navigation and range imaging [DE93-013280] p 341 N94-12598

TRANSATMOSPHERIC VEHICLES

Hypersonic, nonequilibrium flow over a cylindrically blunted 6 deg wedge [NASA-TM-108994] p 162 N94-12571

TRANSDUCERS

The 17th Transducer Workshop [AD-A265526] p 141 N94-10509

Direct current transducer [DE92-644548] p 141 N94-10533

Design of a matching network for dipole antennas [AD-A265115] p 136 N94-11158

Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547

Ceramic actuators for smart materials [AD-A265664] p 93 N94-12331

TRANSFER FUNCTIONS

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

The ideal Kolmogorov inertial range and constant p 158 N94-12305

The helical decomposition and the instability assumption p 158 N94-12306

TRANSFER OF TRAINING

Transfer of training for aerospace operations: How to measure, validate, and improve it p 314 N94-11530

TRANSFER ORBITS

In-space operations for lunar and Mars space transfer vehicles p 348 N94-11568

In-space assembly-servicing requirements p 348 N94-11569

TRANSFORMATIONS (MATHEMATICS)

Subband/transform functions for image processing [NASA-TM-106183] p 323 N94-10639

TRANSFORMERS

Design of a matching network for dipole antennas [AD-A265115] p 136 N94-11158

Characterization of the pulse transformer [AD-A263414] p 143 N94-11298

TRANSIENT HEATING

Primordial lightning: Evidence preserved in chondrites p 432 N94-12230

TRANSIENT LOADS

Response of composite laminates to dynamic surface loads p 66 N94-10902

TRANSIENT RESPONSE

Transient effects in the Benard instabilities: Coupling between capillary and gravity effects p 119 N94-10216

Statistical and optimization methods to expedite neural network training for transient identification [DE93-009985] p 340 N94-11644

TRANSISTORS
Effect of switched-bias bakes on the postirradiation electrical response of MOS devices
[DE93-009629] p 143 N94-11271
TRANSIT TIME
Electron runaway in RF discharges
[DE93-771407] p 363 N94-10661
TRANSITION FLOW
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades
[NASA-TM-106278] p 151 N94-11256
Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498
DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613
Criteria for onset of boundary-layer transition on spinning bodies p 164 N94-12620
Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626
TRANSITION METALS
Non-empirical interatomic potentials for transition metals
[DE93-013705] p 365 N94-11011
Interatomic interactions in BCC and FCC lattices of transition metals
[DE93-621541] p 398 N94-11090
Polaronic charge separation in mixed-halide MX solids
[AD-A266073] p 403 N94-12345
TRANSITION PRESSURE
Heavy-section steel technology program
[DE93-009222] p 184 N94-10155
TRANSITION PROBABILITIES
Probability of particle trapping/detrapping in torsatrons
[DE93-621641] p 390 N94-11121
TRANSITION TEMPERATURE
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458
X-ray and neutron scattering studies of magnetic critical fluctuations in holmium
[DE93-010873] p 400 N94-11467
TRANSMISSION ELECTRON MICROSCOPY
HRTEM in protein crystallography
[DE93-610322] p 395 N94-10406
Test of a method for phase retrieval in HRTEM
[DE93-612641] p 170 N94-10630
Mineralogy of chondritic interplanetary dust particle impact residues from LDEF p 80 N94-12045
TRANSMISSION LOSS
Building penetration loss measurements for DAB signals at 211 MHz
[BBC-RD-1992/14] p 133 N94-11024
TRANSMITTANCE
A development on estimation method of undersea light p 204 N94-11974
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
TRANSMITTERS
Galileo EM-2 contributions to the lunar control network p 468 N94-12198
TRANSONIC FLOW
Nonlinear aspects of transonic aeroelasticity
p 2 N94-10357
Flow analysis around ONERA model M5 configuration
[PAPER-3D-2] p 12 N94-10478
Flow analysis around ONERA model M5 configuration
[PAPER-3D-3] p 12 N94-10479
Flow analysis around ONERA model M5 configuration
[PAPER-3D-4] p 12 N94-10480
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes
[NASA-TP-3383] p 15 N94-11133
Nonlinear aspects of transonic aeroelasticity
[UTIAS-RN-345] p 15 N94-11857
TRANSONIC SPEED
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil
[PAPER-2D-2] p 10 N94-10468
TRANSONIC WIND TUNNELS
Improvement of the flow quality in the ARA transonic tunnel by means of a long cell honeycomb
[ARA-MEMO-375] p 34 N94-10894
The evolution of whole field optical diagnostics for external transonic testing
[ARA-MEMO-379] p 383 N94-11887
TRANSPIRATION
Real gas and surface transpiration effects upon swept leading edge high speed flow including transition
p 8 N94-10452
TRANSPONDERS
Performance of traffic-alert collision avoidance (TCAS) antennas in the presence of scatterers
[NASA-CR-193569] p 23 N94-11525
Impact of shutting down en route primary radars within CONUS interior
[DOT-VNTSC-FAA-93-1] p 23 N94-11626
TRANSPORT AIRCRAFT
High temperature materials for hypersonic transport
p 56 N94-10003
AGBT advanced counter-rotating gearbox detailed design report
[NASA-CR-180883] p 179 N94-10400
TRANSPORT PROPERTIES
Physics and modelling of scrape-off layer transport
[DE93-010510] p 385 N94-10289
Transport mechanisms acting in toroidal devices: A theoretician's view
[DE93-013463] p 385 N94-10310
Aerosol sampling models survey
[AD-A265903] p 75 N94-10337
Arcjet space thrusters
[NASA-CR-193191] p 46 N94-10700
Hydrogen partitioning and transport in titanium aluminides
[NASA-CR-194117] p 76 N94-10713
Processing and transport properties of high J(sub c) silver clad Bi-2223 tapes and coils
[DE93-010674] p 398 N94-11073
Process modelling for materials preparation experiments
[NASA-CR-193556] p 56 N94-12588
TRANSPORT THEORY
A spectral nodal method for discrete ordinates problems in x,y geometry
[DE93-610128] p 342 N94-10283
Physics and modelling of scrape-off layer transport
[DE93-010510] p 385 N94-10289
A spectral nodal method for the solution of the Sn equations in x, y geometry for highly absorbing deep penetration problems
[DE93-613520] p 349 N94-10636
The searchlight problem for neutrons in a semi-infinite medium
[DE93-010796] p 365 N94-10952
Development of deterministic transport methods for low energy neutrons for shielding in space
[NASA-CR-194172] p 366 N94-11199
Helium transport scaling law studies
[DE93-013487] p 393 N94-11513
Grid optimization and multigrid techniques for fluid flow and transport problems p 154 N94-11824
TRANSPORTATION
Polymer electrolyte fuel cells: Potential transportation and stationary applications
[DE93-010734] p 264 N94-11666
TRANSPUTERS
Application of parallel processing to a surface patch/wire junction EFIE code
[AD-A264965] p 336 N94-10488
TRAPPED PARTICLES
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Quantum non demolition measurement of cyclotron excitations in a Penning trap p 376 N94-10578
Kinetic approach to long wave length modes in rotating plasmas
[DE93-771286] p 388 N94-10807
Analysis of geophysical measurements and spacecraft interactions
[AD-A266064] p 43 N94-10944
The 24th Annual Precise Time and Time Interval (PTTI) Applications and Planning Meeting
[NASA-CP-3218] p 350 N94-10963
Particle transport analysis in torsatron configurations
[DE93-621640] p 390 N94-11120
Probability of particle trapping/detrapping in torsatrons
[DE93-621641] p 390 N94-11121
TRAPPING
Laser cooling and trapping of atoms in microgravity: Ultracold atoms collisions p 124 N94-10241
Bond distortion and electron trapping in charged C60
[DE93-613642] p 396 N94-10637
Probability of particle trapping/detrapping in torsatrons
[DE93-621641] p 390 N94-11121
TRAVELING SALESMAN PROBLEM
Bibliographic notes on Voronoi diagrams
[PB93-189298] p 343 N94-10825
TRAVELING WAVE AMPLIFIERS
Wide band 140 GHz TWTA p 132 N94-10514
TRAVELING WAVES
Conversion of the four-strap array in D3-D to a tunable traveling wave antenna
[DE93-012085] p 137 N94-11453
The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682
Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632
TREES (MATHEMATICS)
Marginal allocations in the core of minimal chain-games
[MEMO-1103] p 348 N94-10162
Algorithms for the maximum clique problem
[MEMO-1101] p 322 N94-10419
An introduction to chordal graphs and clique trees
[DE93-012508] p 332 N94-11695
TREES (PLANTS)
Satellite inventory of Minnesota forest resources
[NASA-CR-193565] p 231 N94-11521
TRENDS
Potential markets for advanced satellite communications
[NASA-CR-191145] p 41 N94-10512
National patterns of R and D resources, 1992
[NSF-92-330] p 422 N94-11186
TRIANGULATION
Finding a covering triangulation whose maximum angle is provably small
[DE93-010691] p 334 N94-12593
TRIATOMIC MOLECULES
The global potential energy surfaces of the lowest two 1A' states of the ozone molecule: Theoretical determination and analysis p 267 N94-12269
TRIBOLOGY
Study of the tribological behavior of SiC and Si3N4 ceramic couples in terms of temperature: The reality
p 64 N94-10061
Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump
[NAL-TR-1155] p 178 N94-10369
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732
Tribological characteristics of hot-pressed self-lubricating composites
[NAL-TR-1160] p 66 N94-10858
The properties of perfluoropolyethers used for space applications
[NASA-TM-106275] p 88 N94-10864
Advanced model of gradual wear of viscoelastic surface film
[AD-A265130] p 90 N94-11222
Tribological characteristics of sputtered Au/Cr films on alumina substrates at elevated temperatures
[NASA-TM-106078] p 55 N94-11362
Ceramics technology project database
[DE93-012431] p 91 N94-11672
Properties of interfacial tribo-films
[AD-A265591] p 182 N94-12374
TRIGGER CIRCUITS
Upgraded D(O) calorimeter electronics for short Tevatron bunch space and the effect of pile-up on the W mass measurement
[DE93-013566] p 146 N94-12603
TRIMERS
The synthesis of photocrosslinkable chalcone-bearing polyphosphazenes
[AD-A264915] p 92 N94-11849
TRITIUM
High-energy density physics at Los Alamos
[DE93-010271] p 371 N94-10260
The effect of a scalar boson coupled to neutrinos on the behavior of the tritium beta decay spectrum near the end point
[DE93-012655] p 361 N94-10349
Three-nucleon problem with phase equivalent potentials
[DE93-617731] p 363 N94-10722
Welding tritium aged stainless steel
[DE93-011782] p 181 N94-11226
TRITON
Orbital simulations of satellite escape/capture and the origin of satellites such as Triton p 429 N94-12057
A structural origin for the cantaloupe terrain of Triton
p 449 N94-12095
Geomorphology of Triton's polar materials
p 466 N94-12185
Tectonics on Triton p 466 N94-12187
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221
TROILITE
Calorimetric thermometry of meteoritic troilite: A feasibility study p 428 N94-12025
TROPICAL REGIONS
Technical Conference on Tropical Urban Climates: Extended Abstracts
[WMO/TD-538] p 283 N94-10561
An overview of intertropical convergence and intertropical discontinuity
[DE93-619229] p 277 N94-11603
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674

Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Methodological considerations for use of ERS-1 imagery for the delineation of river networks in tropical forest areas p 247 N94-12484
TREES project: A case study on the use of multi-temporal ERS-1 SAR data and SPOT data for monitoring tropical ecosystems p 249 N94-12497
TREES project: Overview and status of the ERS-1 SAR contribution p 250 N94-12499
Principal oscillation pattern analysis of sea level variations in the tropical Pacific measured by the GEOSAT altimeter p 209 N94-12646
Preliminary results from a satellite altimetric data assimilation using a Kalman filter and smoother p 209 N94-12648

TROPICAL STORMS
Updated forecast of Atlantic seasonal hurricane activity for 1993 p 285 N94-11194

TROPOSPHERE
In situ detection of tropospheric OH, HO2, NO2, and NO by laser-induced fluorescence in detection chambers at reduced pressures [NASA-CR-193189] p 274 N94-10701
Preliminary validation of the low frequency variability of tropospheric temperature and circulation simulated for the AMIP by the ECMWF model [DE93-012382] p 284 N94-10739
An overview of intertropical convergence and intertropical discontinuity [DE93-619229] p 277 N94-11603

TROUGHS
Fault geometries and extension in the Valles Marineris, Mars p 458 N94-12144
Shallow crustal discontinuities and graben and scarp formation in the Tharsis region of Mars p 469 N94-12203

TRUNCATION ERRORS
Finite difference schemes for long-time integration [NASA-CR-191471] p 343 N94-10642

TRUSSES
Space truss zero gravity dynamics [AD-A266130] p 44 N94-12541

TUNABLE LASERS
Thermal-optical switching of a silicon based interference filter [AD-A265152] p 174 N94-11095
Laser system design for the generation of a sodium-layer laser guide star [DE93-014127] p 176 N94-12784

TUNDRA
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697
Emissions of biogenic sulfur gases from Alaskan tundra p 268 N94-12455
Emissions of sulfur gases from wetlands p 269 N94-12458

TUNGSTEN
Liquid phase sintering of tungsten composites under microgravity. Effect of matrix composition p 118 N94-10207
Deformation mechanisms in tungsten single crystals in ballistic impact experiments [AD-A265701] p 405 N94-12563

TUNGSTEN ALLOYS
A history of tungsten- and molybdenum-base alloys [DE93-010283] p 82 N94-11108

TUNING
Lightweight linear alternators with and without capacitive tuning [NASA-CR-185273] p 140 N94-10505
Fine tuning of stretched-VISSR image mapping p 190 N94-11080
The laser second threshold: Its exact analytical dependence on detuning and relaxation rates [DE93-619706] p 175 N94-11633
Nonlinear effects in ferrite tuned cavities [DE93-014136] p 374 N94-12785

TUNNELING (EXCAVATION)
Resistivity and radar void detectors for tunneling machines p 140 N94-12706

TURBINE BLADES
Comprehensive dynamic analysis of a bladed disk-turborotor-bearing system [ISBN-0-315-73646-1] p 180 N94-11155
Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity [DE93-011597] p 263 N94-11173
Blading models for TURBAN and CSPAN turbomachine design codes [NASA-CR-191164] p 15 N94-11203
Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use [ARL-TR-27] p 90 N94-11311
VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades [CUED/A-TURBO/TR.128] p 166 N94-12777
VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

TURBINE ENGINES
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes [NASA-TP-3383] p 15 N94-11133
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades [NASA-TM-106278] p 151 N94-11256

TURBINE EXHAUST NOZZLES
Studies on scramjet nozzles. Part 1: Performance of two dimensional nozzles [NAL-TR-1149] p 27 N94-10367

TURBINE PUMPS
Durability of a carbon segmented circumferential seal for a liquid oxygen turbopump [NAL-TR-1155] p 178 N94-10369
Application of powder metallurgy techniques to produce improved bearing elements for liquid rocket engines [NASA-CR-193731] p 82 N94-10804

TURBINE WHEELS
Comprehensive dynamic analysis of a bladed disk-turborotor-bearing system [ISBN-0-315-73646-1] p 180 N94-11155

TURBINES
Method of reducing drag in aerodynamic systems [NASA-CASE-LEW-14791-1] p 12 N94-10672

TURBOMACHINE BLADES
Probabilistic evaluation of uncertainties and risks in aerospace components [NASA-TM-105603] p 185 N94-10361

TURBOMACHINERY
VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades [CUED/A-TURBO/TR.128] p 166 N94-12777
VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

TURBULENCE
An experimental investigation of the sources of propeller noise due to turbulence ingestion p 358 N94-11057
The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058
Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow [DE93-011590] p 14 N94-11111
Control of jet noise [NASA-CR-193612] p 358 N94-11176
Turbulence modeling for thrust reverser flow field prediction methods [AD-A266139] p 154 N94-11641
The coherent structure in the oceanic turbulence around Japan Islands Chain forced by an air, sea, and solid Earth interaction p 198 N94-11940
Annual Research Briefs, 1992 [NASA-CR-194389] p 155 N94-12284
Local isotropy in high Reynolds number turbulent shear flows p 157 N94-12302
The ideal Kolmogorov inertial range and constant p 158 N94-12305
Plane mixing layer vortical structure kinematics p 159 N94-12313
Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314
Mapping closures for turbulent combustion [AD-A265671] p 79 N94-12378
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
Coherent structure in near wall turbulence with riblets p 165 N94-12628
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730

TURBULENCE EFFECTS
Estimation of the direct acoustic radiation from turbulent spots using boundary layer velocity measurements p 357 N94-10358
Direct simulation of compressible wall-bounded turbulence p 156 N94-12294

TURBULENCE MODELS
Numerical calculation of scramjet inlet flow [NAL-TR-1174T] p 27 N94-10370
Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441
Experimental, analytical, and computational methods applied to hypersonic compression ramp flows p 6 N94-10444
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Computation using q-omega 2 equation turbulence model [PAPER-2D-4] p 10 N94-10470
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoils: Computation using Baldwin-Lomax turbulence model [PAPER-2D-5] p 11 N94-10471
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft [PAPER-2D-7] p 11 N94-10472
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-8] p 11 N94-10473
Flow analysis around ONERA model M5 configuration [PAPER-3D-1] p 11 N94-10477
Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow [DE93-011590] p 14 N94-11111
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades [NASA-TM-106278] p 151 N94-11256
A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study [AD-A264805] p 152 N94-11519
Modelling quasi-two-dimensional turbulent shear flow p 153 N94-11616
Turbulence modeling for thrust reverser flow field prediction methods [AD-A266139] p 154 N94-11641
Annual Research Briefs, 1992 [NASA-CR-194389] p 155 N94-12284
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
Large eddy simulation of shock turbulence interaction p 155 N94-12289
Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290
Large-eddy simulation of turbulent flow with a surface-mounted two-dimensional obstacle p 156 N94-12291
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292
Application of incremental unknowns to the Burgers equation p 156 N94-12293
Direct simulation of compressible wall-bounded turbulence p 156 N94-12294
Application of a Reynolds stress model to separating boundary layers p 157 N94-12299
The ideal Kolmogorov inertial range and constant p 158 N94-12305
PDF approach for turbulent scalar field: Some recent developments p 160 N94-12315
Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition [NAL-SP-18] p 163 N94-12611
Turbulence modeling and compressibility p 163 N94-12614

TURBULENT BOUNDARY LAYER
Problems in the validation of CFD codes through comparison with experiment p 6 N94-10441
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil: Compendium of results p 11 N94-10475
Flowfield structure of swept shock wave/turbulent boundary-layer interactions p 149 N94-10899
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
The effects of successive distortions on a turbulent boundary layer in a supersonic flow p 14 N94-11058
Remote sensing and the air-sea boundary layers p 191 N94-11896
Application of a Reynolds stress model to separating boundary layers p 157 N94-12299
Progress in modeling hypersonic turbulent boundary layers p 157 N94-12300
An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers p 157 N94-12303
Experiments on near-wall structure of three-dimensional boundary layers p 159 N94-12309
Suppression of the near wall burst process of a fully developed turbulent pipe flow [AD-A265995] p 161 N94-12352
Experiment on a high Reynolds number turbulent boundary layer p 164 N94-12617
Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626
Coherent structure in near wall turbulence with riblets p 165 N94-12628

TURBULENT COMBUSTION
The evolution equation for the flame surface density in turbulent premixed combustion p 81 N94-12316
Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317

Generation of two-dimensional vortices in a cross-flow p 160 N94-12318
Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319
Mapping closures for turbulent combustion [AD-A265671] p 79 N94-12378
Theories of turbulent combustion in high speed flows [AD-A265735] p 79 N94-12403

TURBULENT DIFFUSION
Aerosol sampling models survey [AD-A265903] p 75 N94-10337
A self-consistent model of non-linear parameterization of turbulent diffusion in atmospheric boundary layer [DE93-011950] p 275 N94-11052
Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319
Theories of turbulent combustion in high speed flows [AD-A265735] p 79 N94-12403

TURBULENT FLOW
Combustion chamber analysis code [NASA-CR-192585] p 46 N94-10934
Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow [DE93-011590] p 14 N94-11111
Physics of tokamak scrape-off layer confinement [DE93-011949] p 390 N94-11125
Turbulent wall jet in blast wave precursor [DE93-011955] p 151 N94-11144
A Galilean and tensorial invariant k-epsilon model for near wall turbulence [NASA-TM-106263] p 151 N94-11192
KIVA-3: A KIVA program with block-structured mesh for complex geometries [DE93-011986] p 77 N94-11249
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades [NASA-TM-106278] p 151 N94-11256
Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494
Modelling quasi-two-dimensional turbulent shear flow p 153 N94-11616
A two-stage (turbulent-drainage) mechanism for the emplacement of impact crater outflows on Venus p 458 N94-12145
Annual Research Briefs, 1992 [NASA-CR-194389] p 155 N94-12284
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
Large eddy simulation of shock turbulence interaction p 155 N94-12289
Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290
Large-eddy simulation of turbulent flow with a surface-mounted two-dimensional obstacle p 156 N94-12291
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292
Application of incremental unknowns to the Burgers equation p 156 N94-12293
Direct simulation of compressible wall-bounded turbulence p 156 N94-12294
Direct numerical simulation of turbulent flow over a backward-facing step p 156 N94-12296
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
Local isotropy in high Reynolds number turbulent shear flows p 157 N94-12302
An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers p 157 N94-12303
The helical decomposition and the instability assumption p 158 N94-12306
Superfluid turbulence p 158 N94-12307
Regeneration of near-wall turbulence structures p 158 N94-12308
Mixing in a stratified shear flow: Energetics and sampling p 159 N94-12311
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312
The evolution equation for the flame surface density in turbulent premixed combustion p 81 N94-12316
Study and modeling of finite rate chemistry effects in turbulent non-premixed flames p 81 N94-12317
Why does preferential diffusion strongly affect premixed turbulent combustion? p 81 N94-12319
Tensoral: A system for post-processing turbulence simulation data p 75 N94-12320
Topics in pattern formation and chaotic systems [AD-A265922] p 161 N94-12342
Suppression of the near wall burst process of a fully developed turbulent pipe flow [AD-A265995] p 161 N94-12352
Mapping closures for turbulent combustion [AD-A265671] p 79 N94-12378
Theories of turbulent combustion in high speed flows [AD-A265735] p 79 N94-12403
Development of the one-component diode-array velocimeter [AD-A265552] p 171 N94-12533
DNS on control of laminar-turbulent transition in channel flow with suction and blowing p 163 N94-12613
Turbulence modeling and compressibility p 163 N94-12614
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624
Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626
Coherent structure in near wall turbulence with riblets p 165 N94-12628

TURBULENT JETS
Turbulent wall jet in blast wave precursor [DE93-011955] p 151 N94-11144

TURBULENT MIXING
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
LIF measurements of scalar mixing in turbulent shear layers p 159 N94-12312
PDF approach for turbulent scalar field: Some recent developments p 160 N94-12315

TURBULENT WAKES
The three-dimensional evolution of a plane wake p 159 N94-12310
On the wake behind a high speed train p 164 N94-12618

TURING MACHINES
Finite state machine microarchitecture transformations described with relational algebra [MEMO-INF-92-63] p 319 N94-10278

TVD SCHEMES
Large time-step stability of explicit one-dimensional advection schemes [NASA-TM-106203] p 342 N94-10362
Numerical calculation of scramjet inlet flow [NAL-TR-1174T] p 27 N94-10370
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 airfoil [PAPER-2D-2] p 10 N94-10468
Aerodynamic characteristics analysis of Garabedian-Korn 75-06-12 aircraft [PAPER-2D-7] p 11 N94-10472
Flow analysis around ONERA model M5 configuration [PAPER-3D-2] p 12 N94-10478
Flow analysis around ONERA model M5 configuration [PAPER-3D-4] p 12 N94-10480
Viscous flow simulation using an upwind method for hexahedral based adaptive meshes [AD-A265901] p 148 N94-10703

TWILIGHT GLOW
Aircraft windscreens enhance visual search disruption produced by laser glare [AD-A265167] p 26 N94-11892

TWO BODY PROBLEM
P-matrix description of the two-particle interaction [DE93-617690] p 361 N94-10549
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550
Exact solutions of a many-anyon problem [DE93-617646] p 411 N94-10832

TWO DIMENSIONAL FLOW
Thermocapillary instabilities in cylindrical liquid bridges: Mechanisms and transition boundaries p 101 N94-10077
Solving the inverse problem for incompressible potential flow through two-dimensional cascades [NAL-TR-1162] p 147 N94-10365
Modelling quasi-two-dimensional turbulent shear flow p 153 N94-11616
Aerodynamic sound due to interaction between a two-dimensional free shear layer and the leading edge of a parallel flat plate p 163 N94-12615
Boundary conditions and bifurcations in plane Poiseuille flow p 166 N94-12634

TWO DIMENSIONAL JETS
Direct numerical simulation of hot jets p 156 N94-12295

TWO DIMENSIONAL MODELS
Numerical simulation of Marangoni convection around gas bubbles in a liquid matrix p 106 N94-10107
Flow transitions in a 2D directional solidification model p 114 N94-10183
Marangoni Benard instabilities in liquid mixtures with Soret effect p 119 N94-10215
Simulations of D3-D divertor biasing with the LEDGE code [DE93-010500] p 385 N94-10262
On a class of two-dimensional nearest neighboring random walks [CWI-BS-R9220] p 347 N94-10353
Axisymmetric single shear element combustion instability experiment [NASA-TM-106327] p 46 N94-10763
Classical gravity coupled to Liouville theory [DE93-613049] p 275 N94-10798
Finite element simulation of the 2D collapse of a polyelectrolyte gel disk [DE93-010693] p 91 N94-11665
Explorations in quantum gravity: From one loop effective actions to two-dimensional theories p 413 N94-11822

TWO FLUID MODELS
On the coupling of electromagnetic radiation into cavities [DE93-011406] p 137 N94-11621

TWO PHASE FLOW
Two-phase flow heat transfer and hydrodynamics in an electric field p 103 N94-10093
Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness p 105 N94-10105
Laboratory study on the natural modes of a rotating two-phase fluid system subject to axial excitation p 106 N94-10106
FORCE2: A state-of-the-art two-phase code for hydrodynamic calculations [DE93-010661] p 150 N94-11072
KIVA-3: A KIVA program with block-structured mesh for complex geometries [DE93-011986] p 77 N94-11249
The physics of pattern formation of liquid interfaces [DE93-013333] p 154 N94-11814
The Third Workshop on Two Phase Fluid Experiment in the Space Environment [NASDA-CON-930002] p 161 N94-12547
Summary of studies on JEM utilization experiment projects p 161 N94-12548
Compilation of proposals for boiling and evaporation experiments in space environments and proposals concerning experiment projects p 161 N94-12549
Condensation phenomena p 162 N94-12550
Developmental research of thermal control system in space environment p 162 N94-12551
Two phase flow and isopycnic liquid-liquid two phase fluid in reduced gravity field p 162 N94-12552
Devices related for thermal control systems used in microgravity p 162 N94-12553
Research on two phase flow in microgravity p 162 N94-12554
Research and development of cold plate for two phase fluid loop thermal control system p 162 N94-12555
Organization and management policy for two phase fluid experiment in space environment p 162 N94-12556

U

U BENDS
Corrosion behavior of metal matrix composites [AD-A265352] p 85 N94-12404

U.S.S.R. SPACE PROGRAM
Russian space system for the Earth remote sensing p 37 N94-10688

UBV SPECTRA
First results of the seven-color asteroid survey p 430 N94-12162

UH-60A HELICOPTER
A feasibility study regarding the addition of a fifth control to a rotorcraft in-flight simulator [NASA-CR-193240] p 30 N94-10895
Helicopter approach capability using the differential Global Positioning System [NASA-CR-177618] p 24 N94-12355

ULTRASONIC FLAW DETECTION
Ultrasonic inspection, material noise and surface roughness [DE93-011560] p 183 N94-11110
Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques [NASA-TM-106121] p 67 N94-11237

ULTRASONIC RADIATION
Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves [DE93-613827] p 398 N94-11025
Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters [DE93-011952] p 150 N94-11026

ULTRASONIC SCANNERS
Basic experiment on an ultrasonic method of localization [DE93-754295] p 358 N94-11042

ULTRASONIC TESTS

Special problems of 3-D ultrasonic QNDI techniques and applications to composites aerospace structures p 61 N94-10036

High temperature processing and diagnostic technologies for microgravity applications p 110 N94-10130

Method of recertifying a loaded bearing member using a phase point [NASA-CASE-LAR-14741-1] p 185 N94-10671

Ultrasonic inspection, material noise and surface roughness [DE93-011560] p 183 N94-11110

Project ARGO: Gas phase formation in simulated microgravity [NASA-TM-104762] p 125 N94-11235

Assessment of damage in ceramics and ceramic matrix composites using ultrasonic techniques [NASA-TM-106121] p 67 N94-11237

ULTRASONICS

Comparison of Al-Fe alloys produced by PFC and USGA techniques p 58 N94-10019

Use of ultrasound in altitude decompression modeling p 317 N94-11540

Transcranial Doppler ultrasound and the etiology of neurologic decompression sickness during altitude decompression p 312 N94-11544

ULTRAVIOLET ABSORPTION

ADP study of the structure of the IUE halo [NASA-CR-194374] p 428 N94-12595

ULTRAVIOLET DETECTORS

Ultraviolet plume instrument description and plume data reduction methodology [AD-A266141] p 54 N94-11643

ULTRAVIOLET FILTERS

Alkali metal for ultraviolet band-pass filter [NASA-CASE-NPO-18433-1-CU] p 381 N94-10657

ULTRAVIOLET RADIATION

UV testing of solar cells: Effects of antireflective coating, prior irradiation, and UV source p 53 N94-11408

Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210

ULTRAVIOLET SPECTRA

On renormalization group flow in matrix model [DE93-613050] p 409 N94-10413

ULTRAVIOLET SPECTROSCOPY

Detection of accreting circumstellar gas around weak emission-line Herbig Ae/Be stars [NASA-TM-108256] p 424 N94-11306

ULTRAVIOLET TELESCOPES

Lunar-Ultraviolet Telescope Experiment (LUTE) integrated program plan [NASA-CR-193267] p 424 N94-11356

UNDERGROUND EXPLOSIONS

Sensitivities of calculated residual stress to separation distances of two simultaneous events [DE92-019571] p 98 N94-10751

UNDERGROUND STORAGE

Immediate response to free product discovery [PB93-182970] p 265 N94-11015

Catalytic oxidation of organics in vapor streams at remediation sites [PB93-182962] p 266 N94-11472

UNDERGROUND STRUCTURES

Design and development of a miniature column-based interface (MCBI) stress gage [AD-A266054] p 170 N94-10873

Resistivity and radar void detectors for tunneling machines p 140 N94-12706

UNDERWATER ACOUSTICS

Underwater hydrophone location survey p 290 N94-10975

Acoustics of bubbly sediments [AD-A263726] p 288 N94-11299

Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714

Acoustic characteristics of side scan sonar and sub-bottom profiler for 10,000 m class ROV p 172 N94-11916

Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

Signal feature analysis using neural networks and psychoacoustics [AD-A266048] p 340 N94-12398

UNDERWATER COMMUNICATION

Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

UNDERWATER EXPLOSIONS

Dynamic loading in manufacturing and service: Australia's shock testing capability p 128 N94-11304

UNDERWATER OPTICS

Trajectory curving in underwater propagation of light p 226 N94-12748

UNDERWATER PHOTOGRAPHY

On resolution of underwater stereo photogrammetry p 172 N94-11966

UNDERWATER RESOURCES

A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining p 224 N94-12733

UNDERWATER STRUCTURES

Coastal processes due to nearshore current around an upheaving island p 199 N94-11942

The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944

Idea of underground airplane p 27 N94-12630

The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729

UNDERWATER TESTS

Underwater hydrophone location survey p 290 N94-10975

Dynamic loading in manufacturing and service: Australia's shock testing capability p 128 N94-11304

UNDERWATER VEHICLES

Development of a shuttle AUV for oceanographic measurement p 217 N94-12692

UNIFIED FIELD THEORY

The magnetic field of rotating bodies [DE93-619769] p 427 N94-11812

Quark and lepton masses [DE93-012308] p 370 N94-12787

UNITED STATES

National patterns of R and D resources, 1992 [NSF-92-330] p 422 N94-11186

From red tape to results: Creating a government that works better and costs less p 422 N94-11351

From red tape to results: Creating a government that works better and costs less. Executive summary p 422 N94-11353

Insights into software development in Japan p 330 N94-11435

Landsat as a commercial enterprise [INPE-5477-TAE/019] p 232 N94-11524

UNIVERSAL TIME

A precise GPS-based time and frequency system p 353 N94-10978

UNIVERSE

Dimensional transition of the space-time at the minimum action near the planck scale [DE93-754192] p 410 N94-10718

A theoretical kinematical study of the gradient of any cosmic scalar field [DE92-644731] p 425 N94-11136

The solutions of cosmic string loop equation in expanding universe [DE93-619717] p 427 N94-11692

UNIVERSITIES

Flight Dynamics Directorate (FDD) Historically Black Colleges and Universities (HBCU's) database managment system: A user's guide [AD-A264947] p 419 N94-11288

UNIX (OPERATING SYSTEM)

A distributed version of the NASA Engine Performance Program [NASA-TM-106208] p 327 N94-11231

UNSTEADY FLOW

A dynamically adaptive mesh method for internal flows p 149 N94-10896

Unsteady flow past a NACA 0012 airfoil pitching at constant rates [AD-A265159] p 16 N94-11889

VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades [CUED/A-TURBO/TR.128] p 166 N94-12777

VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

UPPER ATMOSPHERE

Pakistan Space and Upper Atmosphere Research Commission p 37 N94-10693

Selected upper-air wind speed distributions [AD-A264822] p 284 N94-10871

The Air Force Interactive Meteorological System: A research tool for satellite meteorology [AD-A265957] p 284 N94-11113

The upwelling radiation at the top of the atmosphere in coastal region p 205 N94-11981

UPSTREAM

Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

UPWELLING WATER

Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935

On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987

Variation of the photosynthetic products in the regional upwelling area around the Izu Islands, Japan p 211 N94-12661

Swordfish (Xiphias gladius) catch distributions relative to environmental features observed from satellites off Coquimbo, Chile (30 deg S) p 216 N94-12688

Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data p 220 N94-12711

Coastal upwelling monitored by satellite data: Methodologies and results p 220 N94-12712

A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing p 228 N94-12757

High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758

URANIUM

Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times p 281 N94-12076

URANIUM ISOTOPES

Radiogenic age and isotopic studies [DE93-610548] p 274 N94-10407

Spin characteristics of ion beams during the motion of electromagnetic elements [DE93-617448] p 364 N94-10848

LEW88516 and SNC meteorites p 430 N94-12150

The Th and U abundances in chondritic meteorites p 430 N94-12151

URANUS (PLANET)

On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221

Precession of Uranus and Neptune and their magnetic field p 473 N94-12222

URBAN PLANNING

Technical Conference on Tropical Urban Climates: Extended Abstracts [WMO/TD-538] p 283 N94-10561

UREAS

Engineering solid-state materials. Strategies for modeling and packing control of molecular assemblies into 3-D networks [AD-A265291] p 404 N94-12438

UREILITES

Trace-element abundances in several new ureilites p 80 N94-12096

URETHANES

Uralane (tm) 5774-A/B: Ciba-Geigy's advanced urethane adhesive for the aircraft industry p 18 N94-10777

URINE

Microbiological test results using three urine pretreatment regimes with 316L stainless steel [NASA-CR-192568] p 299 N94-10360

A prototype urine collection device for female aircrew p 317 N94-11549

USER MANUALS (COMPUTER PROGRAMS)

Sandia ocean modeling system programmer's guide and user's manual [DE93-007427] p 287 N94-10153

PANACEA user's manual for PANACEA version 2.0 [DE93-012502] p 321 N94-10263

User's manual for the plume visibility model PLUVUE 2 (revised) [PB93-188233] p 265 N94-11016

Landing Craft Air Cushion (LCAC) crew selection system manual [AD-A265158] p 313 N94-11098

User's manual for the DAD-1 data acquisition daughter board for the SuperCard-2 [DE93-012153] p 325 N94-11139

ACARA user's manual [NASA-TM-106277] p 183 N94-11167

P2NBC2 Heat Strain Decision Aid. User's guide, version 2.1 [AD-A266072] p 304 N94-11224

Flight Dynamics Directorate (FDD) Historically Black Colleges and Universities (HBCU's) database managment system: A user's guide [AD-A264947] p 419 N94-11288

GRAFTED (GRAphical Fault Tree EDitor): A fault tree description program for target vulnerability/survivability analysis [AD-A264078] p 328 N94-11301

Software management guide [DE93-012034] p 330 N94-11452

NASCAP programmer's reference manual [NASA-CR-191044] p 278 N94-11702

The 1991 version of the plume impingement computer program. Volume 2: User's input guide [NASA-CR-194191] p 166 N94-12774

VIB3D: Method for calculating 3-D unsteady flow through turbomachinery blades [CUED/A-TURBO/TR.128] p 166 N94-12777

VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation
[CUED/A-TURBO/TR.129] p 166 N94-12779

USER REQUIREMENTS
Studies on refrigerator sensors and cooling section interface p 129 N94-11834
Data management strategy for the Tampa Bay National Estuary Program: Recommendations and implementation plan
[PB93-191633] p 267 N94-11864
Devices related for thermal control systems used in microgravity p 162 N94-12553

UTILITIES
Intergovernmental decisionmaking for environmental protection and public works
[PB93-176824] p 266 N94-11584

UTILITY AIRCRAFT
Idea of underground airplane p 27 N94-12630

V

V/STOL AIRCRAFT
Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft
[NASA-TM-104008] p 30 N94-11259

VACANCIES (CRYSTAL DEFECTS)
Invariance of the mobility edge in anodic titanium oxides
[DE92-642136] p 394 N94-10281
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819
Adsorption and dissociation of disilane on Si(001) studied by STM
[AD-A265269] p 402 N94-11684

VACUUM
Vacuum stability requirements of polymeric material for spacecraft application
[NASA-TM-109216] p 91 N94-11350
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548
The 1991 version of the plume impingement computer program. Volume 1: Description
[NASA-CR-194192] p 166 N94-12775

VACUUM TESTS
An investigation of conducted and radiated emissions from a hollow-cathode plasma contactor
[NASA-CR-191172] p 386 N94-10346

VALENCE
Enhanced stability of magic clusters: A case study of icosahedric Al(sub 12)X, X=B, Al, Ga, C, Si, Ge, Ti, As
[DE93-613644] p 395 N94-10386
X ray and gamma ray spectroscopy of solids under pressure
[DE93-014847] p 76 N94-10653

VALLEYS
Thermal studies of Martian channels and valleys using Termoskan data p 443 N94-12064
Mars: The initial emplacement of ground ice in response to the thermal evolution of its early crust
p 462 N94-12168

VALSALVA EXERCISE
Valsalva maneuver: Insights into baroreflex modulation of human sympathetic activity p 310 N94-12000

VALVES
Check valve with poppet damping mechanism
[NASA-CASE-MSC-21903-1] p 179 N94-10655
Check valve with poppet dashpot/frictional damping mechanism
[NASA-CASE-MSC-21950-1] p 179 N94-10658

VANES
Laser anemometer measurements and computations for transonic flow conditions in an annular cascade of high turning core turbine vanes
[NASA-TP-3383] p 15 N94-11133
A research program for improving heat transfer prediction for the laminar to turbulent transition region of turbine vanes/blades
[NASA-TM-106278] p 151 N94-11256
Performance characteristics of the INS 25.5-MHz split coaxial RFQ
[DE93-753168] p 144 N94-11508

VAPOR DEPOSITION
Design of a CVD reactor for the deposition of diamond in a microgravity environment p 109 N94-10127
Alkali metal for ultraviolet band-pass filter
[NASA-CASE-NPO-18433-1-CU] p 381 N94-10657
Thermal-optical switching of a silicon based interference filter
[AD-A265152] p 174 N94-11095
Damping mechanisms in chemically vapor deposited SiC fibers
[NASA-TM-106334] p 66 N94-11135
Wide Band-Gap Semiconductors. 1991 Materials Research Society Symposium proceedings
[AD-A263418] p 401 N94-11515
An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651
Chemical Vapor Deposition of Refractory Metals and Ceramics 2. Materials Research Society Symposium proceedings
[AD-A265072] p 92 N94-11866
Progress toward atomic layer epitaxy of diamond: Diamond films grown one layer at a time
[AD-A265530] p 403 N94-12010
Analysis of the economics of DC arc CVD diamond
[AD-A265688] p 403 N94-12339
Protective coatings for high-temperature polymer matrix composites
[NASA-TM-106276] p 74 N94-12431

VAPOR PHASES
Laser beam deflection: A diagnostic tool for vapour growth experiments in microgravity p 111 N94-10135
STARDUST: A simulation experiment of cosmic dust analogues production in microgravity conditions
p 113 N94-10175
Crystal growth from low temperature vapour phase
p 115 N94-10191
Project ARGO: Gas phase formation in simulated microgravity
[NASA-TM-104762] p 125 N94-11235
Size dependence of chemical reactivity of gaseous metal clusters: A new mechanistic probe
[AD-A264690] p 77 N94-11264
Characterization of gas-aerosol interaction kinetics using morphology dependent stimulated Raman scattering
[DE93-012324] p 77 N94-11359
A model of elementary chemistry and fluid mechanics in the combustion of hydrogen on platinum surfaces
[DE93-012767] p 77 N94-11370
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels
[DE93-012835] p 152 N94-11371
Risk of decompression sickness in the presence of circulating microbubbles p 312 N94-11546
Strategies and methodologies to develop techniques for computer-assisted analysis of gas phase formation during altitude decompression p 312 N94-11547
Resist materials design: Base-catalyzed chemical amplification
[AD-A265286] p 145 N94-11819
Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173
Development of a molecular beam technique to study early solar system silicon reactions p 432 N94-12224

VAPOR PRESSURE
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548
The role of the geothermal gradient in the emplacement and replenishment of ground ice on Mars
p 463 N94-12169

VAPORIZING
Evaluation of medical treatments to increase survival of ebullism in guinea pigs p 302 N94-11548
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline
p 81 N94-12214

VAPORS
Hygroscopic absorption to falling films: The effects of the concentration level
[ITN-93-85198] p 148 N94-10391
Catalytic oxidation of organics in vapor streams at remediation sites
[PB93-182962] p 266 N94-11472
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

VARIABILITY
Intraday variability and the compactness of extragalactic radio sources p 135 N94-11064
Statistical analysis of environmental variability within the CELSS breadboard project's biomass production chamber
[NASA-TM-109188] p 315 N94-11258
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT
p 194 N94-11918
A preliminary study of the variability and magnitude of the flux of biogenic sulfur gases from a New Hampshire salt marsh p 267 N94-12452
Mean flow and variability in the Kuroshio extension from GEOSAT altimetry data p 209 N94-12650
Field research of wind wave spectrum variability
p 223 N94-12727

VARIATIONS
Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936
Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649

VECTOR ANALYSIS
Multilevel computer-aided optimum design of structural systems using multiple basis vectors
p 187 N94-11055
Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724

VECTOR PROCESSING (COMPUTERS)
A molecular dynamics simulation code ISIS
[DE93-753187] p 368 N94-11592

VECTOR QUANTIZATION
Necessary conditions for the optimality of variable rate residual vector quantizers
[NASA-CR-193730] p 326 N94-11197

VECTOR SPACES
The super vectorfield package for REDUCE. Version 1.0
[MEMO-1099] p 321 N94-10265
The ring structure of chiral operators for minimal models coupled to 2D gravity
[DE93-613119] p 409 N94-10500
Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials
[DE93-617650] p 349 N94-10547
Exact solution of the N-dimensional generalized Dirac-Coulomb equation
[DE93-617649] p 411 N94-10834
Homoclinic intermittency
[W-9302] p 344 N94-10908

VECTORS (MATHEMATICS)
Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724

VEGA PROJECT
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047

VEGETATION
An expert system shell for inferring vegetation characteristics: Prototype help system (Task 1)
[NASA-CR-193411] p 231 N94-11236
Enhancement effects in polarimetric radar returns: Phase difference statistics
[NASA-CR-193408] p 231 N94-11309
The impact of vegetation on the atmospheric boundary layer and convective storms p 277 N94-11480
Emissions of biogenic sulfur gases from Alaskan tundra p 268 N94-12455
Emissions of sulfur gases from marine and freshwater wetlands of the Florida Everglades: Rates and extrapolation using remote sensing p 269 N94-12457
Emissions of sulfur gases from wetlands
p 269 N94-12458
Effects of inorganic sulfur addition on fluxes of volatile sulfur compounds in Sphagnum peatlands
p 270 N94-12461
Information capability of NOAA-AVHRR data for monitoring oceanographic and atmospheric pollution
p 214 N94-12677

VEGETATION GROWTH
Sulfur transformations in the sediments of a New Hampshire salt marsh p 270 N94-12463
Elevated acetate concentrations in the rhizosphere of Spartina alterniflora and potential influences on sulfate reduction p 271 N94-12468
Plant architecture, growth and radiative transfer for terrestrial and space environments
[NASA-CR-193476] p 302 N94-12559
Application of remote sensing for coastal management in the north coast of Java p 218 N94-12701

VEGETATIVE INDEX
Design of a global soil moisture initialization procedure for the simple biosphere model
[NASA-TM-104590] p 284 N94-10940
Assessment of ERS-1 SAR data for soil moisture estimation p 249 N94-12492
Properties of spectral reflectance of crown and crown structure of mangrove species in Okinawa
p 218 N94-12700

VELOCITY DISTRIBUTION
Experimental study of axisymmetric thermocapillary flows p 100 N94-10072
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
Comparison of hydrodynamic and semi-kinetic treatments for plasma flow along closed field lines
[NASA-CR-193589] p 387 N94-10641
Examination of wall functions for a parabolized Navier-Stokes code for supersonic flow
[DE93-011590] p 14 N94-11111
CRESLAF. Version 4.0: A Fortran program for modeling laminar, chemically reacting, boundary-layer flow in cylindrical or planar channels
[DE93-012835] p 152 N94-11371

Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494

A four-dimensional, mesoscale, non-gaussian multispectral smoke model. Phase 1: Feasibility study [AD-A264805] p 152 N94-11519

Use of ERS-1 data at Saclant Undersea Research Centre p 233 N94-11714

Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286

Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292

Numerical simulation using vorticity-vector potential formulation p 157 N94-12297

Laboratory studies on the velocity of fragments from impact disruptions p 189 N94-12359

On the wake behind a high speed train p 164 N94-12618

Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

VELOCITY MEASUREMENT

Experimental analysis of Benard-convection by the combined application of liquid crystals and PIV p 106 N94-10109

Particle image velocimetry technique: Calibration tests p 111 N94-10137

Estimation of the direct acoustic radiation from turbulent spots using boundary layer velocity measurements p 357 N94-10358

Velocity measurements in hypersonic flows: A review p 5 N94-10436

Perpendicular blade vortex interaction and its implications for helicopter noise prediction: Wave-number frequency spectra in a trailing vortex for BWI noise prediction [NASA-CR-193623] p 357 N94-10752

Laser velocimeter measurements of the flow field generated by a forward-swept propfan during flutter [NASA-TM-106195] p 14 N94-10892

Wall interference correction based on interface measurements in subsonic wind tunnel testing p 15 N94-11154

Measurement of the minority carrier diffusion length and edge surface-recombination velocity in InP p 49 N94-11388

The subduction experiment. Cruise report, R/V Oceanus, cruise number 250 legs 1 and 2. Subduction 2 mooring deployment and recovery cruise, 25 January-26 February 1992 [AD-A264922] p 289 N94-11853

The evolution of whole field optical diagnostics for external transonic testing [ARA-MEMO-379] p 383 N94-11887

Statistical study of HF ocean radar echo p 139 N94-11905

An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers p 157 N94-12303

Probability density distribution of velocity differences at high Reynolds numbers p 158 N94-12304

Development of the one-component diode-array velocimeter [AD-A265552] p 171 N94-12533

VENERA SATELLITES

Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048

VENEZIANO MODEL

One-loop quantum gravity on de Sitter space [DE92-641349] p 425 N94-11152

VENTILATION

Icing of turbine intake louvers [AD-A265714] p 29 N94-12274

VENTING

Analysis of geophysical measurements and spacecraft interactions [AD-A266064] p 43 N94-10944

VENTS

Parachute having improved vent line stacking [NASA-CASE-MFS-28508-1] p 14 N94-11021

VENUS (PLANET)

Giant impact-induced atmospheric blow-off p 435 N94-12019

Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023

Venus small volcano classification and description p 438 N94-12037

Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046

Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047

Regional geology of the Venera landing sites: Tentative results of photogeologic mapping p 440 N94-12048

Global organization of tectonic deformation on Venus p 444 N94-12066

Venus' center of mass - center of figure displacement and implications p 444 N94-12067

Flexure and the role of inplane force around coronae on Venus p 452 N94-12112

Can weak crust explain the correlation of geoid and topography on Venus? p 453 N94-12118

Yana ring structure, North-Eastern Siberia: A possible counterpart of coronae on Venus p 282 N94-12121

Russia's contribution to regional geologic mapping of Venus p 454 N94-12122

The origin of Venusian channels: Modelling of thermal erosion by lava p 456 N94-12131

Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190

Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes p 467 N94-12195

Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196

Characteristics of arachnoids from Magellan data p 469 N94-12204

Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243

Morphotectonics of Venus p 478 N94-12248

VENUS ATMOSPHERE

Photochemical modelling of Venus clouds using Pioneer Venus data [NASA-CR-194108] p 434 N94-10823

VENUS CLOUDS

Photochemical modelling of Venus clouds using Pioneer Venus data [NASA-CR-194108] p 434 N94-10823

VENUS RADAR ECHOES

Venus mountain-top mineralogy: Misconceptions about pyrite as the high radar-reflecting phase p 455 N94-12129

VENUS SURFACE

Morphology of large impact craters and basins on Venus: Implications for ring formation p 436 N94-12023

Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046

Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047

Global organization of tectonic deformation on Venus p 444 N94-12066

Venus' center of mass - center of figure displacement and implications p 444 N94-12067

Venus resurfacing rates: Constraints provided by 3-D Monte Carlo simulations p 453 N94-12119

A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus p 455 N94-12126

Venus mountain-top mineralogy: Misconceptions about pyrite as the high radar-reflecting phase p 455 N94-12129

Buoyant subduction on Venus: Implications for subduction around coronae p 455 N94-12130

The origin of Venusian channels: Modelling of thermal erosion by lava p 456 N94-12131

Geology and surface characteristics of Bell Regio, Venus p 457 N94-12136

Lava flows on Venus: Analysis of motion and cooling p 457 N94-12137

Galileo/NIMS near-infrared thermal imagery of the surface of Venus p 457 N94-12139

A two-stage (turbulent-drainage) mechanism for the emplacement of impact crater outflows on Venus p 458 N94-12145

Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190

Comparison of the distribution of large magmatic centers on Earth, Venus, and Mars p 467 N94-12192

The Magellan volcanic and magmatic feature catalog p 467 N94-12193

Synthesis of global thematic mapping, Venus: Geologic correlations/questions for the Magellan gravity mission p 467 N94-12194

Giant radiating dyke swarms on Earth and Venus p 283 N94-12236

The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246

Morphotectonics of Venus p 478 N94-12248

VERBAL COMMUNICATION

Noise levels and their effects on Shuttle crewmembers' performance: Operational concerns p 314 N94-11538

Correspondence standards [NHB-1450.10B] p 420 N94-11589

VERTICAL AIR CURRENTS

Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494

VERTICAL DISTRIBUTION

An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander [AD-A265116] p 289 N94-11868

The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729

Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar p 224 N94-12736

VERTICAL LANDING

Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft [NASA-TM-104008] p 30 N94-11259

VERTICAL MOTION SIMULATORS

Moving-base simulation evaluation of thrust margins for vertical landing for the NASA YAV-8B Harrier aircraft [NASA-TM-104008] p 30 N94-11259

VERY HIGH FREQUENCIES

Groundwave HF ocean surface radar p 139 N94-11906

VERY LONG BASE INTERFEROMETRY

Pulsar astrometry by using VLBI (PSR0329 between Kashima 26mPhi and Usuda 64mPhi) p 351 N94-10968

Propagation Effects in Space VLBI p 134 N94-11060

Interstellar scattering and the selection of extragalactic radiosources with highly compact components p 134 N94-11063

Intraday variability and the compactness of extragalactic radio sources p 135 N94-11064

Interstellar scattering and the pulsar studies with space VLBI p 135 N94-11065

VLBI and the detection of interstellar magnetohydrodynamic waves p 135 N94-11066

Generalization of Dyson criterion for the amplitude-phase fluctuations case and for the system of interferometers p 135 N94-11067

The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068

The superresolution effect observed through a random medium p 136 N94-11069

Tropospheric and ionospheric effects on differential astrometry with a ground-space based VLBI array p 136 N94-11070

Elimination of the influence of the atmosphere on the accuracy of solutions to astrometric problems by means of a ground-space VLBI network p 136 N94-11071

VERY LOW FREQUENCIES

Effects of energetic particle events on VLF/LF propagation parameters/1989 [AD-A265266] p 275 N94-11013

VESTA ASTEROID

Ejecting basaltic achondrites from Vesta: Hydrodynamical impact models p 429 N94-12036

The asteroid-meteorite connection: Forging a new link to Vesta as the parent body of basaltic achondrite (HED) meteorites p 429 N94-12068

VESTIBULAR TESTS

Motion and spatial disorientation systems: Special research capabilities [AD-A265155] p 303 N94-11097

VESTIBULES

Motion and spatial disorientation systems: Special research capabilities [AD-A265155] p 303 N94-11097

VIBRATION

Review of SHARC 2.0 O3 kinetics and spectroscopy [AD-A265481] p 274 N94-10496

On the stability of stationary regimes in a distributed autovibration system with external feedback [DE93-620979] p 141 N94-10543

Dynamic tester for rotor seals and bearings [NASA-CASE-MFS-28493-1] p 33 N94-10669

Sine and random vibration program evaluation on vibration control systems [DE93-011974] p 188 N94-11460

Vortex-induced forces on oscillating bluff cylinders [AD-A265056] p 154 N94-11865

Absorption spectrum calculations using mixed quantum-gaussian wave packet dynamics [AD-A265179] p 413 N94-11877

Thermal-infrared emission spectroscopy of natural surfaces: Application to coated surfaces p 81 N94-12156

A vibrational spectroscopic study of the structure of electroactive self-assembled monolayers of viologen derivatives [AD-A265705] p 78 N94-12273

Vibrational overtone activation of methylcyclopropene [AD-A265588] p 79 N94-12373

VIBRATION DAMPING

Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system) p 101 N94-10082

Vibration isolation mount with locking means [AD-D015769] p 178 N94-10381
Dynamic tester for rotor seals and bearings [NASA-CASE-MFS-28493-1] p 33 N94-10669
Momentum management in redundant manipulators for vibration suppression [NASA-CR-194112] p 180 N94-10821
Damping measurements for ultra-high carbon steel/brass laminates [DE93-011886] p 82 N94-11076
Damping mechanisms in chemically vapor deposited SiC fibers [NASA-TM-106334] p 66 N94-11135
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233
Adaptive structures for spacecraft: A USAF perspective p 45 N94-11319
Smart structures at Aastra Corporation p 69 N94-11326
On the stability of shape memory materials and their properties in static and dynamic applications p 69 N94-11329
Adaptive algorithms for use with digital filters in vibration control p 71 N94-11338
Structural analysis and optimization of adaptive structures by use of the finite element method p 71 N94-11339
Active landing gear control for improved ride quality during ground roll p 27 N94-11345
Active damping augmentation of elastomechanical systems using piezoelectric sensors and actuators p 72 N94-11346
Multidimensional intelligent control for superlight air vehicles p 27 N94-11347
Sine and random vibration program evaluation on vibration control systems [DE93-011974] p 188 N94-11460
Microgravity vibration isolation technology: Development to demonstration [NASA-TM-106320] p 1 N94-11703
Active vibration control of adaptive flexible structures using piezoelectric smart sensors and actuators p 189 N94-11823

VIBRATION EFFECTS
Vibrational-thermocapillary parallel flows and stability p 120 N94-10220
Comprehensive dynamic analysis of a bladed disk-turborotor-bearing system [ISBN-0-315-73646-1] p 180 N94-11155

VIBRATION ISOLATORS
Vibration isolation mount with locking means [AD-D015769] p 178 N94-10381
Microgravity vibration isolation technology: Development to demonstration [NASA-TM-106320] p 1 N94-11703

VIBRATION MODE
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363
NASTRAN modeling of flight test components for UH-60A airloads program test configuration [NASA-CR-193614] p 186 N94-10937

VIBRATION TESTS
Damping mechanisms in chemically vapor deposited SiC fibers [NASA-TM-106334] p 66 N94-11135
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing [NASA-TM-104269] p 26 N94-11233

VIBRATIONAL SPECTRA
A vibrational spectroscopic study of the structure of electroactive self-assembled monolayers of viologen derivatives [AD-A265705] p 78 N94-12273
Vibrational overtone activation of methylcyclopropene [AD-A265588] p 79 N94-12373

VIBRATORY LOADS
Performance and rotor loads measurements of the Lynx XZ170 helicopter with rectangular blades [NASA-TM-104000] p 1 N94-10936

VIDEO COMMUNICATION
Studies and simulations of the DigiCipher system [NASA-CR-193470] p 321 N94-10343
New technology applied to telemedicine p 306 N94-11796
Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

VIDEO DATA
Study on color video pictures transmission by digital acoustic signal p 139 N94-11917

VIDEO SIGNALS
GaAs sigma-delta modulator modeling for Analog to Digital Converters (ADC's) [AD-A263419] p 144 N94-11516
Observations of optical counterparts of Gamma-Ray bursts [NASA-CR-193573] p 485 N94-12589

VIETNAM
Shoreline change detection using remote sensing and GIS in Vietnam p 196 N94-11928

VIGNETTING
Interferometric and optical tests of water window imaging x ray microscopes [NASA-CR-193369] p 375 N94-10506

VIKING LANDER SPACECRAFT
Geologic history of central Chryse Planitia and the Viking 1 landing site, Mars p 465 N94-12180

VIRIAL COEFFICIENTS
Phase equilibria and volumetric properties for the system NaCl-CaCl2-H2O [DE93-013590] p 76 N94-11244

VIRTUAL REALITY
Virtual sound for virtual reality [DE93-010519] p 321 N94-10291
Forecasting the impact of virtual environment technology on maintenance training p 314 N94-11570

VISCOELASTIC DAMPING
Computational algorithms or identification of distributed parameter systems [AD-A265252] p 331 N94-11680

VISCOELASTICITY
A method for determination of the elongational viscosity of viscoelastic fluids without body forces p 124 N94-10247
Advanced model of gradual wear of viscoelastic surface film [AD-A265130] p 90 N94-11222
Stability of viscoelastic flow: Physical and numerical considerations p 31 N94-11493
On temperature distribution in non-participating medium with radiation boundary condition [DE93-619375] p 153 N94-11604
Numerical simulation of the non-Newtonian mixing layer p 159 N94-12314

VISCOPLASTICITY
A modeling investigation of thermal and strain induced recovery and nonlinear hardening in potential based viscoplasticity [NASA-TM-106122] p 188 N94-11482

VISCOSITY
Determination of the viscous acoustic field for liquid drop positioning/forcing in an acoustic levitation chamber in microgravity p 110 N94-10131
Thermophysical properties of undercooled liquid metals p 86 N94-10190
A method for determination of the elongational viscosity of viscoelastic fluids without body forces p 124 N94-10247
Measurement of viscosity, density and gas solubility of refrigerant blends [DE93-014772] p 89 N94-11145
Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves [DE93-621656] p 392 N94-11212
Viscous relaxation of the Moho under large lunar basins p 452 N94-12113

VISCOUS DAMPING
A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625

VISCOUS FLOW
Studies of hypersonic viscous flows p 8 N94-10454
Calculations of viscous nonequilibrium flows in nozzles p 8 N94-10455
On the accuracy and efficiency of CFD methods in real gas hypersonics p 9 N94-10462
Thermal and chemical non equilibrium hypersonic flow computations p 10 N94-10465
Viscous flow simulation using an upwind method for hexahedral based adaptive meshes [AD-A265901] p 148 N94-10703
High order accurate solutions of viscous problems [NASA-TM-106267] p 151 N94-11253
Viscous analysis of three-dimensional rotor flows using a multigrid method [NASA-TM-106266] p 152 N94-11481
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
VIB2D: Quasi 3-D unsteady viscous flow method for blade flutter calculation [CUED/A-TURBO/TR.129] p 166 N94-12779

VISCOUS FLUIDS
Deformation mechanisms of continuous fibre-reinforced thermoplastic composites during manufacturing: A probabilistic approach p 60 N94-10030
A method for determination of the elongational viscosity of viscoelastic fluids without body forces p 124 N94-10247
The physics of pattern formation of liquid interfaces [DE93-013333] p 154 N94-11814

VISIBILITY
User's manual for the plume visibility model PLUVUE 2 (revised) [PB93-188233] p 265 N94-11016
On resolution of underwater stereo photogrammetry p 172 N94-11966

VISIBLE INFRARED SPIN SCAN RADIOMETER
Effects of satellite spectral resolution and atmospheric water vapor on retrieval of near-ground temperatures [AD-A264920] p 245 N94-11851

VISIBLE SPECTRUM
Continued development of an ultra-narrow bandpass filter for solar research [NASA-CR-194169] p 381 N94-10735
Compositional and textural information from the dual inversion of visible, near and thermal infrared remotely sensed data p 258 N94-12097

VISION
Aviation accident risk for airmen with aphakia and artificial lens implants [DOT/FAA/AM-93/11] p 303 N94-10813

VISUAL AIDS
Animating engineering science results using AVS [DE93-011591] p 325 N94-11123

VISUAL OBSERVATION
Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539

VISUAL PERCEPTION
Automaticity of processing location versus identity information in brief visual displays [AD-A265013] p 418 N94-10491
Visual encoding of spatial relations [AD-A266049] p 313 N94-10909
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli [AD-A265168] p 324 N94-11099
Three-dimensional object recognition using an unsupervised BCM network: The usefulness of distinguishing features [AD-A264576] p 304 N94-11261
Perceptual response to visual noise and display media [NASA-CR-193406] p 313 N94-11511
Visual psychophysics of egomotion [AD-A265253] p 304 N94-11681

VISUAL STIMULI
Computer software and hardware to determine contrast sensitivity using three methods: Tracking, limits, and constant stimuli [AD-A265168] p 324 N94-11099

VITRIFICATION
Radiation-induced aperiodicity in irradiated ceramics [DE93-013335] p 91 N94-11698

VLASOV EQUATIONS
Dynamics of ion acceleration in electron flux by a virtual cathode potential [DE93-620978] p 371 N94-10542

VOICE DATA PROCESSING
Necessary conditions for the optimality of variable rate residual vector quantizers [NASA-CR-193730] p 326 N94-11197

VOIDS
A method of influence regions in the theory of vacancy swelling of metals [DE93-620579] p 83 N94-11363
Modeling void growth and movement with phase change in thermal energy storage canisters [NASA-TM-106288] p 163 N94-12576

VOLATILITY
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
Shock induced reaction in Chicxulub target materials (CaSO4 and SiO2) and their relation to extinctions p 282 N94-12149
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline p 81 N94-12214

VOLCANOES
The Lathrop Wells Volcanic Center: Status of field and geochronology studies [DE93-008917] p 273 N94-10285
Overwater atmospheric dispersion of volcanic smokes from Mt. Sakurajima observed in NOAA-AVHRR data p 205 N94-11979
Venus small volcano classification and description p 438 N94-12037
Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows p 281 N94-12041
Horizontal stresses induced by vertical processes in planetary lithospheres p 281 N94-12042
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047

A pattern recognition system for locating small volvanoes in Magellan SAR images of Venus p 455 N94-12126
Lava flows on Venus: Analysis of motion and cooling p 457 N94-12137
Graphite solubility and co-vesiculation in basalt-like melts at one-ATM p 463 N94-12173
Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190
Comparison of the distribution of large magmatic centers on Earth, Venus, and Mars p 467 N94-12192
The Magellan volcanic and magmatic feature catalog p 467 N94-12193
Large volcanoes on Venus: Examples of geologic and structural characteristics from different classes p 467 N94-12195
Regional mantle upwelling on Venus: The Beta-Atla-Themis anomaly and correlation with global tectonic patterns p 467 N94-12196
Small volcanoes in Tempe Terra, Mars: Their detailed morphometry and inferred geologic significance p 469 N94-12202
Oxidation state of the Earth's upper mantle during the last 3800 million years: Implications for the origin of life p 283 N94-12210
Giant radiating dyke swarms on Earth and Venus p 283 N94-12236

VOLCANOLOGY
Twenty-fourth Lunar and Planetary Science Conference. Part 1: A-F
[NASA-CR-193095] p 435 N94-12015
Venus small volcano classification and description p 438 N94-12037
Reconstruction of the dynamics of the 1800-1801 Hualalai eruption: Implications for planetary lava flows p 281 N94-12041
Estimation of age of Dali-Ganis rifting and associated volcanic activity, Venus p 440 N94-12046
Regional geology of the Vega landing sites: Tentative results of photogeologic mapping p 440 N94-12047
Stable isotope analyses of the peralkaline volcanics Gregory Rift Valley, Kenya p 281 N94-12072
Th-230 - U-238 series disequilibrium of the Olkaria basalts Gregory Rift Valley, Kenya p 281 N94-12073
Th-230 - U-238 series disequilibrium of the Olkaria rhyolites Gregory Rift Valley, Kenya: Residence times p 281 N94-12076
Geology and surface characteristics of Bell Regio, Venus p 457 N94-12136
Volcanism in southern Guinevere Planitia, Venus: Regional volcanic history and morphology of volcanic domes p 467 N94-12190
Comparison of the distribution of large magmatic centers on Earth, Venus, and Mars p 467 N94-12192
Characteristics of arachnoids from Magellan data p 469 N94-12204
Compositional heterogeneity within a dumbbell-shaped Apollo 15 green glass: Evidence for simultaneous eruption of different magmas p 470 N94-12209
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243
A comparison of the visible and near infrared reflectance of hydrovolcanic palagonite tuffs and Martian weathered soils p 477 N94-12245

VOLTAGE CONVERTERS (DC TO DC)
A study of DC-DC converters with MCTs for arcjet power supplies
[NASA-CR-193457] p 142 N94-10931

VOLUMETRIC ANALYSIS
Studies of critical point phenomena of fluids: Bulk fluids, fluids in pores, and at interfaces p 80 N94-10228

VORTEX ALLEVIATION
Corner vortex suppressor
[AD-D015772] p 147 N94-10383
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673

VORTEX BREAKDOWN
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673
Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631

VORTEX FLAPS
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673

VORTEX GENERATORS
Generation of two-dimensional vortices in a cross-flow p 160 N94-12318
Topics in pattern formation and chaotic systems
[AD-A265922] p 161 N94-12342
Growth and breakdown of Taylor-Goertler vortices in rotating Blasius boundary layer p 165 N94-12631

VORTEX SHEDDING
Perpendicular blade vortex interaction and its implications for helicopter noise prediction: Wave-number frequency spectra in a trailing vortex for BWI noise prediction
[NASA-CR-193623] p 357 N94-10752
Vortex-induced forces on oscillating bluff cylinders
[AD-A265056] p 154 N94-11865
On the wake behind a high speed train p 164 N94-12618

VORTICES
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673
Simulation study of dynamo structure in reversed field pinch
[DE93-771406] p 390 N94-11128
Control of jet noise
[NASA-CR-193612] p 358 N94-11176
Physics of forebody flow control
[NASA-CR-193626] p 15 N94-11195
On nonlinear Tollmien-Schlichting/vortex interaction in three-dimensional boundary layers
[NASA-TM-106184] p 152 N94-11377
Discrete vortex representation of magnetohydrodynamics
[DE93-012190] p 393 N94-11669
Vortex-induced forces on oscillating bluff cylinders
[AD-A265056] p 154 N94-11865
An investigation using empirical orthogonal functions and objective analysis to analyse the vertical temperature structure of a gulf stream meander
[AD-A265116] p 289 N94-11868
Time evolution of cross-stream exchange associated with the variations in the Kuroshio p 197 N94-11936
Characteristic scales and vortex features of mesoscale vortices observed by the satellites during the winter p 199 N94-11943
An application of reduced gravity model to mesoscale eddies p 199 N94-11945
Behavior of vortices generated by an advancing ejecta curtain in theory, in the laboratory, and on Mars p 169 N94-12044
A local dynamic model for large eddy simulation p 155 N94-12285
Large eddy simulations of time-dependent and buoyancy-driven channel flows p 155 N94-12287
A normal stress subgrid-scale eddy viscosity model in large eddy simulation p 155 N94-12288
Large eddy simulation of shock turbulence interaction p 155 N94-12289
Application of a dynamic subgrid-scale model to turbulent recirculating flows p 156 N94-12290
Large-eddy simulation of turbulent flow with a surface-mounted two-dimensional obstacle p 156 N94-12291
Similarity states of homogeneous stably-stratified turbulence at infinite Froude number p 156 N94-12292
Application of incremental unknowns to the Burgers equation p 156 N94-12293
Numerical simulation using vorticity-vector potential formulation p 157 N94-12297
Local isotropy in high Reynolds number turbulent shear flows p 157 N94-12302
Plane mixing layer vortical structure kinematics p 159 N94-12313
Generation of two-dimensional vortices in a cross-flow p 160 N94-12318
Suppression of the near wall burst process of a fully developed turbulent pipe flow
[AD-A265995] p 161 N94-12352
Proceedings of the 9th and 10th NAL Workshop on Investigation and Control of Boundary-Layer Transition
[NAL-SP-18] p 163 N94-12611
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
On the formation process of Karman vortex street p 16 N94-12621
Turbulent boundary layer interacting with spanwise periodic longitudinal vortex arrays p 165 N94-12626
Observations of eddy fields in the Northwest Pacific by GEOSAT altimetry p 207 N94-12639
Surface eddy fluxes from the GEOSAT satellite altimeter p 208 N94-12643
Measurement of eddy structure and movement in the north-east Pacific with the GEOSAT altimeter p 209 N94-12647
Fluctuations of the Kuroshio extension detected by the GEOSAT altimetry data p 209 N94-12649
Aspects of applying a relaxation method to computing sea surface velocities from sea surface temperature images p 214 N94-12679
Statistical features of mesoscale eddies at the Kuroshio front p 215 N94-12682
The WOCE/TOGA Surface Velocity Programme (SVP) p 216 N94-12691
Investigation of meso-scale fronts, eddies and upwellings in China Seas with AVHRR data p 220 N94-12711
The warm eddy detection from NOAA/AVHRR thermal images using the Hough transformation p 220 N94-12713
Satellite and moored buoy observations of polar frontal system over the Yamato Rise in the Japan Sea p 221 N94-12715
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724
Mixing of drifter ensemble by mesoscale currents p 228 N94-12760

VORTICITY
On the importance of mesoscale potential vorticity anomalies and topographic forcing during cyclone redevelopment across the Appalachians: A GALE case study p 284 N94-10822
Near surface ocean processes: Acoustical observations, ambient sound, and Langmuir circulation p 288 N94-11447
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889
Parameterization of subgrid-scale stress by the velocity gradient tensor p 155 N94-12286
The three-dimensional evolution of a plane wake p 159 N94-12310
Plane mixing layer vortical structure kinematics p 159 N94-12313

VSAT (NETWORK)
Two way time transfer results at NRL and USNO p 353 N94-10983

VULCANIZING
Vulcanian explosive eruptions: A mechanism for localised pyroclast dispersal on Venus p 477 N94-12243

VULNERABILITY
GRAFTED (GRAphical Fault Tree EDitor): A fault tree description program for target vulnerability/survivability analysis
[AD-A264078] p 328 N94-11301

W

WAFERS
RF vacuum microelectronics
[AD-A266066] p 142 N94-10818
An ellipsometry investigation of nucleation and growth of electron cyclotron resonance plasma deposited silicon films
[AD-A265037] p 401 N94-11651
Radiation-induced modifications of allylamino-substituted polyphosphazenes
[AD-A264914] p 92 N94-11848
Analysis of the economics of DC arc CVD diamond
[AD-A265688] p 403 N94-12339

WAKES
Submarine internal waves
[MRL-GD-0049] p 98 N94-11303
Topics in pattern formation and chaotic systems
[AD-A265922] p 161 N94-12342

WALKING
Robotic servicing on Earth orbiting satellites p 45 N94-11579

WALL FLOW
Wall interference correction based on interface measurements in subsonic wind tunnel testing p 15 N94-11154
A Galilean and tensorial invariant k-epsilon model for near wall turbulence
[NASA-TM-106263] p 151 N94-11192
Dynamics and control of coherent structures in the turbulent wall layer: An overview p 31 N94-11494
Reynolds stress closure modeling in wall-bounded flows p 157 N94-12298
Application of a Reynolds stress model to separating boundary layers p 157 N94-12299
Regeneration of near-wall turbulence structures p 158 N94-12308
Suppression of the near wall burst process of a fully developed turbulent pipe flow
[AD-A265995] p 161 N94-12352
Fluctuations of longitudinal vortices along a concave wall p 16 N94-12616
A numerical experiment of boundary layer transition at subcritical Reynolds numbers p 165 N94-12625
Turbulent drag reduction of a d-type rough wall boundary layer with longitudinal ribs placed within the grooves p 165 N94-12627

WALL JETS
Turbulent wall jet in blast wave precursor
[DE93-011955] p 151 N94-11144

WALL TEMPERATURE
Establishing baseline data for an experimental appratus that measures heat transfer under conditions of oscillating pressure and flow
[NASA-CR-193772] p 413 N94-12343
WALLS
Potential change in flaw geometry during pressurized-thermal-shock transients
[DE93-009709] p 184 N94-10288
Application of a Reynolds stress model to separating boundary layers p 157 N94-12299
WARFARE
Aviators, air combat, and combat stress: An Air F orce commander's primer
[AD-A265083] p 313 N94-11867
WARNING SYSTEMS
The Satellite Attack Warning and Assessment Flight Experiment (SAWAFE) p 45 N94-11323
WASTE DISPOSAL
Environmental Sciences Division
[DE93-013865] p 264 N94-10650
Computer models used to support cleanup decision-making at hazardous and radioactive waste sites
[PB93-183333] p 274 N94-10698
WASTE TREATMENT
Toxic chemical release inventory reporting Form R and instructions. Revised 1992 version. Section 313 of the Emergency Planning and Community Right-to-Know Act
[PB93-194140] p 264 N94-10836
Some environmental aspects of the application of fibre reinforced plastics in structures
[LM-998] p 88 N94-10877
Catalytic oxidation of organics in vapor streams at remediation sites
[PB93-182962] p 266 N94-11472
An estimate of the second law thermodynamic efficiency of the various units comprising an Environmental Control and Life Support System (ECLSS) p 317 N94-12369
Novel mass spectrometric instrument for gaseous and particulate characterization and monitoring
[DE93-014093] p 272 N94-12783
WASTE UTILIZATION
Some environmental aspects of the application of fibre reinforced plastics in structures
[LM-998] p 88 N94-10877
Coprocessing of fossil fuels and biomass for CO2 emission reduction in the transportation sector
[PB93-194165] p 267 N94-11845
WATER
Atomic and molecular data for H2O, CO and CO2 relevant to edge plasma impurities
[DE93-771423] p 387 N94-10662
Experimental study of multiple droplet evaporative cooling
[PB93-198463] p 149 N94-10851
Structural development in ceramic precursor sols and gels
[AD-A264354] p 90 N94-11281
An observational search for CO2 ice clouds on Mars p 441 N94-12054
Noble gas evidence of an aqueous reservoir near the surface of Mars more recently than 1.3 Ga p 473 N94-12228
Primitive SNC parent magmas and crystallization: Low PH2O experiments p 433 N94-12264
Space Life Support Engineering Program
[NASA-CR-193474] p 316 N94-12365
Physiological water model development p 316 N94-12367
Fundamental studies of radar scattering from water surfaces: The Lake Washington experiment
[NASA-CR-194030] p 139 N94-12778
WATER BALANCE
Flood monitoring in northern part of Central Java by remote sensing technique. Case study: The flooding of Semarang in January, 1990 p 206 N94-11989
WATER COLOR
Atmospheric correction of AVIRIS data in ocean waters
[AD-A264931] p 288 N94-11287
Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898
Satellite-derived oceanic features p 200 N94-11949
Bi-directional reflectance by oceanic waters studied via Monte-Carlo simulations p 203 N94-11971
Optical characteristics in Tokyo Bay p 204 N94-11972
Remote sensing for numerical modelling of radiative transfer processes in ocean environment p 204 N94-11973
Seasonal variability of surface ocean color in the Omura Bay using multitemporal LANDSAT-5 TM data p 218 N94-12698
WATER COOLED REACTORS
Facility for stress corrosion cracking test of irradiated material in high temperature water
[DE93-753189] p 84 N94-11593
WATER CURRENTS
Sandia ocean modeling system programmer's guide and user's manual
[DE93-007427] p 287 N94-10153
WATER DEPTH
The extraction of bottom characteristics and mapping in Kin Bay, Okinawa Main Island, Japan, using LANDSAT-5/TM and SPOT-1/HRV data p 197 N94-11931
WATER EROSION
Rates of fluvio-thermal erosion on Mars p 435 N94-12018
WATER FLOW
The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944
Rates of fluvio-thermal erosion on Mars p 435 N94-12018
Rainfall-runoff estimation using digital radar
[AD-A265390] p 286 N94-12408
Simultaneous 3D turbulent large-scale structures in a flood flow by multi-channels measuring system p 165 N94-12624
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730
WATER HEATING
Department of Energy solar process heat program: FY 1991 solar process heat prefeasibility studies activity
[DE93-010010] p 262 N94-10258
WATER IMMERSION
Development and analysis of insulation constructions for aerospace wiring applications p 21 N94-10791
WATER LOSS
Modifications to an interactive model of the human body during exercise: With special emphasis on thermoregulation p 317 N94-12368
WATER MANAGEMENT
Space Activities in the Asia Pacific Region
[JTN-93-80421] p 35 N94-10676
International Space Year in China p 36 N94-10680
An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900
WATER POLLUTION
Immediate response to free product discovery
[PB93-182970] p 265 N94-11015
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 1: Sections 1 through 4.C
[PB93-190304] p 265 N94-11018
Gulf of Mexico sales 147 and 150: Central and western planning areas. Draft environmental impact statement. Volume 2: Sections 4.D through 9
[PB93-190312] p 265 N94-11019
Biscayne bay: A bibliography of the marine environment
[PB93-184802] p 266 N94-11451
An algorithm for the detection of mucilage (green slime) in the Adriatic Sea p 191 N94-11900
A study of pollution courses of spilled oil floatation in the outer ocean p 205 N94-11983
Remote sensing of polluting focal points and coastal disturbances in the Gulf of Arauco and adjacent bays, central Chile p 217 N94-12695
Laser fluorescent monitoring of dissolved organic matter in natural water p 177 N94-12755
Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759
WATER QUALITY
Summary of implementation and demonstration projects in bays and estuaries
[PB93-194637] p 265 N94-10846
Remote surface water monitoring radio based telemetry system
[DE93-009643] p 41 N94-11282
Optical characteristics in Tokyo Bay p 204 N94-11972
WATER RECLAMATION
Microbiological test results using three urine pretreatment regimes with 316L stainless steel
[NASA-CR-192568] p 299 N94-10360
Systems analysis of a closed loop ECLSS using the ASPEN simulation tool. Thermodynamic efficiency analysis of ECLSS components p 316 N94-12366
WATER RESOURCES
Land use/land cover mapping of central water shed of Iran area based on satellite data interpretation p 219 N94-12704
WATER TREATMENT
Space Life Support Engineering Program
[NASA-CR-193474] p 316 N94-12365
WATER TUNNEL TESTS
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889
WATER VAPOR
The impact of horizontal resolution on moist processes in the ECMWF model
[DE93-011718] p 276 N94-11227
Central Equatorial Pacific Experiment (CEPEX)
[DE93-011656] p 190 N94-11674
Evaporation and thermal/hydrologic balance in the Pacific p 195 N94-11919
Evaluation of ECMWF latent heat flux in TOGA CD-ROM p 195 N94-11921
Validation of the ATSR/M microwave radiometer data p 252 N94-12511
Multichannel dual angle approach for sea surface temperature retrieval in context of ERS-1 scenario p 252 N94-12512
Analytical method for water vapor collection and analysis in aircraft cabin fires
[DOT/FAA/CT-TN93/33] p 22 N94-12575
Worldwide map of rainfall amount over the ocean derived from passive microwave radiometer p 211 N94-12663
Cloud liquid water content over the Pacific Ocean tropical zone derived from ship microwave radiometric measurement p 225 N94-12743
WATER WAVES
Preliminary results on backscattering strength from a wind generated bubbly ocean surface
[AD-A265006] p 287 N94-10490
Validation of directional wave spectra from the ERS-1 during the ESA CAL/VAL campaign p 232 N94-11707
The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708
Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710
The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713
Waves and mesoscale features in the marginal ice zone p 240 N94-11757
Global wave height climatologies from ERS-1 altimeter data, and comparisons with those from GEOSAT p 244 N94-11781
Spatial scales of wave height p 244 N94-11782
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 1
[JTN-93-80418] p 191 N94-11894
Remote sensing and the air-sea boundary layers p 191 N94-11896
HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902
Measurement of wave parameters by HF ocean radar p 192 N94-11903
Statistical study of HF ocean radar echo p 139 N94-11905
Groundwave HF ocean surface radar p 139 N94-11906
A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920
Air-sea fluxes and universal constants in weak-turbulence theory of surface gravity waves p 195 N94-11922
Ocean wave detection by SAR p 197 N94-11932
On the determination of the SAR ocean surface scattering patch size p 197 N94-11933
The optical/computer hybrid processing of extracting ocean wave directional spectrum by airborne photograph p 197 N94-11934
Ocean-ice interaction study of waves and mesoscale features p 197 N94-11935
Coastal processes due to nearshore current around an upheaving island p 199 N94-11942
Physical processes of microwave backscattering from laboratory wind-wave surfaces p 200 N94-11952
Dependence of oceanic microwave emission on wind direction p 201 N94-11957
Surface roughness variations across the Iceland-Faroes frontal region observed by the GEOSAT altimeter and NOAA AVHRR p 201 N94-11958
The microwave backscattering from wind waves p 201 N94-11959
Observation of wind and waves by GEOSAT altimeter p 202 N94-11961
Impact of ERS-1 wind/wave/ice data on operational ocean forecasting p 250 N94-12500
Real time processing wave spectra from satellite SAR p 251 N94-12506
On the extraction of ocean wave spectra from ERS-1 SAR wave mode image spectra p 251 N94-12509
Tide-generated nonlinear internal wave packets in the Strait of Gibraltar observed by the synthetic aperture radar aboard the ERS-1 satellite p 252 N94-12510

Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR p 253 N94-12520
Proceedings of the PORSEC 1992 in Okinawa: Conference for Pacific Ocean Environments and Probing, volume 2 [JTN-93-80419] p 207 N94-12635
Observation of wave crests by satellite remote sensed data p 207 N94-12638
Field research of wind wave spectrum variability p 223 N94-12727
Observations of film slicks and internal waves with Ka-band scatterometer p 225 N94-12741
Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745
Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR p 226 N94-12746
Radar observation of internal waves field in the north-west Pacific p 226 N94-12747

WATERPROOFING
Toxicity study of dimethylethoxysilane (DMSES), the waterproofing agent for the Orbiter heat protective system p 318 N94-11554

WATERSHEDS
Energy flow in an Arctic aquatic ecosystem [DE93-013178] p 267 N94-11697

WAVE ATTENUATION
Photostimulated attenuation of hypersound in superlattice [DE93-611231] p 357 N94-10408

WAVE DISPERSION
Nonlinear MHD-waves in a dissipative plasma with hall currents [DE93-617844] p 386 N94-10395
General renormalized statistical approach with finite cross-field correlations [DE93-617846] p 386 N94-10396
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550
On the doubling of hydrodynamic theorems in relativistic theory of superfluidity [DE93-617895] p 148 N94-10717
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS [AD-A265959] p 275 N94-11102
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p)) [DE93-621654] p 391 N94-11210
Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves [DE93-621656] p 392 N94-11212
One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere [DE93-009517] p 137 N94-11466

WAVE EQUATIONS
Wave and pseudo-diffusion equations from squeezed states p 347 N94-10607

WAVE EXCITATION
Wave generation by contaminant ions [NASA-CR-193558] p 364 N94-10946

WAVE FRONTS
An analytic model for calculating pump-induced wavefront distortions in laser slabs [DE93-011953] p 174 N94-11126
Multiple laser beam combining and phasing using closed-loop control [DE93-009830] p 175 N94-11283

WAVE FUNCTIONS
Satellite structure of the xenon valence shell by electron momentum spectroscopy [DE93-609993] p 360 N94-10327
Distorted-wave calculation of He(e,2e) including core-exchange [DE93-610072] p 360 N94-10330
Electron momentum spectroscopy of atoms, molecules and solids [DE93-610148] p 360 N94-10332
Recent advances in electron momentum spectroscopy [DE93-610149] p 361 N94-10333
Wave function collapse: An unnecessary condition for the dynamical description of the Zeno and partial Zeno effect [DE93-612970] p 132 N94-10401
P-matrix description of the two-particle interaction [DE93-617690] p 361 N94-10549
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550
The uncertainty principle and quantum chaos p 379 N94-10602
Wavelets and spacetime squeeze p 379 N94-10604
Coherent states and uncertainty relations for the damped harmonic oscillator with time-dependent frequency p 380 N94-10611
Test of a method for phase retrieval in HRTEM [DE93-612641] p 170 N94-10630
Quasi-relativistic effects in barrier-penetration processes [DE93-617730] p 410 N94-10721
On the possible unobservability of the Wu-Yang phase factor in curved space [DE93-617645] p 411 N94-10831
Exact solutions of a many-anyon problem [DE93-617646] p 411 N94-10832

WAVE GENERATION
Wave generation by contaminant ions [NASA-CR-193558] p 364 N94-10946

WAVE INTERACTION
Evaluation of dual flow thrust vectored nozzles with exhaust stream impingement [NASA-CR-193292] p 150 N94-10912
Theoretical investigation of 3-D shock wave turbulent boundary layer interactions [AD-A265275] p 150 N94-11014
Wave structure in planetary rings p 434 N94-11185
On nonlinear Tollmien-Schlichting/vortex interaction in three-dimensional boundary layers [NASA-TM-106184] p 152 N94-11377
Ultrasonic wave interaction with advanced complex materials for nondestructive evaluation applications [AD-A265704] p 74 N94-12401

WAVE PACKETS
On a Lagrange-Hamilton formalism describing position and momentum uncertainties p 349 N94-10583
Correlated states of a quantum oscillator acted by short pulses p 380 N94-10609
Absorption spectrum calculations using mixed quantum-gaussian wave packet dynamics [AD-A265179] p 413 N94-11877

WAVE PROPAGATION
Nonlinear MHD-waves in a dissipative plasma with hall currents [DE93-617844] p 386 N94-10395
Wideband beamforming for a sparse nonuniform spaced sensor array [AD-A265909] p 133 N94-10660
Spatial helicon-wave echo in an inhomogeneous magnetized plasma [DE93-617845] p 389 N94-10885
Inverting ultrasonic data on solid/fluid mixtures for Biot-Gassmann parameters [DE93-011952] p 150 N94-11026
A symmetrical form for equations of a nonlinear spiral magnetic [DE93-621350] p 344 N94-11033
The influence of the propagation medium on the sensitivity and resolution of meter wavelength aperture synthesis systems p 134 N94-11062
The superresolution effect observed through a random medium p 136 N94-11069
Wave propagation characteristics of short-period crustal phases near ARCESS and NORESS [AD-A265959] p 275 N94-11102
Studies on the parametric decay of waves in fusion plasmas [DE93-621659] p 390 N94-11148
One-dimensional calculation of high-power microwave pulse compression by the earth's ionosphere [DE93-009517] p 137 N94-11466
Decay interaction of bulk and surface Langmuir waves [DE93-617843] p 393 N94-11477
Stability and dynamics of spatio-temporal structures [DE93-011374] p 401 N94-11610
Spaceborne SAR study: LDRD 1992 [DE93-011485] p 232 N94-11623
Results from a year-long auroral-E measurement campaign [AD-A265059] p 278 N94-11871
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
Trajectory curving in underwater propagation of light p 226 N94-12748

WAVE REFLECTION
Preliminary results on backscattering strength from a wind generated bubbly ocean surface [AD-A265006] p 287 N94-10490
Effects of energetic particle events on VLF/LF propagation parameters/1989 [AD-A265266] p 275 N94-11013
Acoustics of bubbly sediments [AD-A263726] p 288 N94-11299

WAVE SCATTERING
On the possible unobservability of the Wu-Yang phase factor in curved space [DE93-617645] p 411 N94-10831
Radiowaves propagation through inhomogeneous interstellar plasma p 134 N94-11061

WAVE-PARTICLE INTERACTIONS
Nonlinear analysis of a magnicon output cavity [AD-A265342] p 145 N94-12424

WAVEFORMS
On the coupling of electromagnetic radiation into cavities [DE93-011406] p 137 N94-11621

WAVEGUIDES
Nonlinear space charge effect of bunched beam in linac [DE93-612176] p 371 N94-10409
Non classical effects in planar waveguides p 376 N94-10574
About excitation of round waveguide by a point current source [DE93-621352] p 133 N94-11034
Linear antenna of an arbitrary orientation and position in cylindric screen [DE93-621353] p 134 N94-11035
Regular tensor Green functions of the round waveguide [DE93-621354] p 345 N94-11036
Asymptotic expressions for regular Green functions of a round cylindrical screen [DE93-621356] p 134 N94-11038
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p)) [DE93-621654] p 391 N94-11210
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay [DE93-620976] p 143 N94-11365
Acoustic waveguide characteristics of the Indian Ocean north of equator p 193 N94-11912

WAVELENGTH DIVISION MULTIPLEXING
An efficient medium access control strategy for high speed WDM multiaccess networks [MEMO-INF-92-74] p 131 N94-10165

WAVELENGTHS
Interference photocathode [AD-D015770] p 132 N94-10382

WAVES
FEFF5: An ab initio multiple scattering XAFS code [DE93-011000] p 367 N94-11470

WEAK INTERACTIONS (FIELD THEORY)
Discrete space-time symmetries [DE93-010199] p 341 N94-10259
Effective action in the gauged Nambu-Jona-Lasinio model [DE93-617654] p 409 N94-10405
Future high precision experiments and new physics beyond Standard Model [DE93-011004] p 373 N94-11618

WEAPON SYSTEMS
Selected upper-air wind speed distributions [AD-A264822] p 284 N94-10871

WEAR
Report of the IAEA Consultants' Meeting on Real-Time Nondestructive Monitoring of Wear and Corrosion Using the Thin Layer Activation Technique [DE93-617422] p 183 N94-10847
Titanium alloys milling assistance by high pressure lubricoolant jet [DE93-013302] p 82 N94-11008
Advanced model of gradual wear of viscoelastic surface film [AD-A265130] p 90 N94-11222
Properties of interfacial tribo-films [AD-A265591] p 182 N94-12374

WEAR RESISTANCE
Processing, properties, and wear resistance of aluminides [DE93-012186] p 83 N94-11141
Weld overlay coatings for erosion control [DE93-013592] p 84 N94-11816

WEAR TESTS
Report of the IAEA Consultants' Meeting on Real-Time Nondestructive Monitoring of Wear and Corrosion Using the Thin Layer Activation Technique [DE93-617422] p 183 N94-10847

WEATHER
A toolkit for building Earth system models [DE93-012147] p 276 N94-11138
Development of a graphical user interface and graphics display for the WIND system [DE93-011780] p 285 N94-11614
Wind system documentation [DE93-010381] p 285 N94-11664

WEATHER FORECASTING
Updated forecast of Atlantic seasonal hurricane activity for 1993 p 285 N94-11194
Rainfall-runoff estimation using digital radar [AD-A265390] p 286 N94-12408
Use of ERS-1 wind and wave products in operational meteorology p 250 N94-12502

Use of SAR-wave, altimeter, and wind-scatterometer data in an operational swell forecasting system p 250 N94-12503

Use of ERS-1 scatterometer winds in Canadian forecast centres p 250 N94-12504

WEATHERING

Carbon in weathered ordinary chondrites from Roosevelt County p 428 N94-12035

Chemical weathering on Mars: Rate of oxidation of iron dissolved in brines p 455 N94-12128

The rate of chemical weathering of pyrite on the surface of Venus p 477 N94-12246

Measuring and distinguishing compositional and maturity properties of lunar soils by remote VIS-NIR spectroscopy p 478 N94-12251

WEIBULL DENSITY FUNCTIONS

Selected upper-air wind speed distributions [AD-A264822] p 284 N94-10871

WEIGHTLESSNESS

Coupled thermovibrational and thermocapillary convection in liquid bridge (floating zone system) p 101 N94-10082

Separation of gravitational effects on the flow of suspension in tubes by measurements in weightlessness p 105 N94-10105

A study of the quasibinary Al-Mo-W system. Part 2: A physico-mechanical investigation of the system fabricated under the gravitylessness conditions p 119 N94-10212

Use of inert immiscible liquid for crystal separation out of its feeding solution in weightlessness p 124 N94-10242

Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557

Proceedings of the First Joint NASA Cardiopulmonary Workshop [NASA-CP-10068] p 308 N94-11991

Pulmonary function in microgravity: KC-135 experience p 309 N94-11994

Central circulatory hemodynamics as a function of gravitational stress p 309 N94-11995

Spectral analysis of resting cardiovascular variables and responses to oscillatory LBNP before and after 6 degree head dowm bedrest p 309 N94-11997

Effect of prolonged LBNP and saline ingestion on plasma volume and orthostatic responses during bed rest p 310 N94-11998

Fitness, autonomic regulation and orthostatic tolerance p 310 N94-11999

Hormonal regulation of fluid and electrolyte metabolism in zero-g and bedrest p 311 N94-12004

WEIGHTLESSNESS SIMULATION

Exercise countermeasures for bed-rest deconditioning [NASA-TM-103987] p 300 N94-11191

Project ARGO: Gas phase formation in simulated microgravity [NASA-TM-104762] p 125 N94-11235

Physiologic mechanisms of circulatory and body fluid losses in weightlessness identified by mathematical modeling p 312 N94-11557

Mechanistic studies on reduced exercise performance and cardiac deconditioning with simulated zero gravity p 310 N94-12001

Fluid compartment and renal function alterations in the rat during 7 and 14 day head down tilt p 310 N94-12002

Local fluid shifts and edema in humans during simulated microgravity p 311 N94-12003

WELDABILITY

Weldability of maraging steels p 59 N94-10028

WELDED JOINTS

Heavy-section steel technology program [DE93-009222] p 184 N94-10155

Advances in low carbon, high strength ferrous alloys [AD-A265264] p 85 N94-12532

WELDING

Weldability of maraging steels p 59 N94-10028

Weld overlay coatings for erosion control [DE93-013592] p 84 N94-11816

WETLANDS

Emissions of biogenic sulfur gases from Alaskan tundra p 268 N94-12455

Emissions of sulfur gases from wetlands p 269 N94-12458

Biogeochemical factors which regulate the formation and fate of sulfide in wetlands p 270 N94-12464

DMS emissions from Sphagnum-dominated wetlands p 271 N94-12466

Emissions of biogenic sulfur gases from northern bogs and fens p 271 N94-12467

Factors controlling sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12469

Sulfur gas exchange in Sphagnum-dominated wetlands p 271 N94-12470

WETTABILITY

Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends [DE93-013140] p 89 N94-11007

WETTING

Wetting effects on nylon spheres engulfment in ice p 115 N94-10189

Studies of critical point phenomena of fluids: Bulk fluids, fluids in pores, and at interfaces p 80 N94-10228

Determination of concentration profiles at interfaces and surfaces of partially miscible polymer blends [DE93-013140] p 89 N94-11007

Advanced soldering processes [DE93-009856] p 129 N94-11606

WHARVES

The flow structure around a cylindrical pier for the flow of transcritical Reynolds number p 169 N94-11944

WHEAT

Paint removal using wheat starch blast media p 128 N94-10627

WHEELS

Position and force control of a vehicle with two or more steerable drive wheels [DE93-012512] p 177 N94-10269

WHISKERS (CRYSTALS)

Tin whiskers in electronic circuits [AD-A265917] p 146 N94-12565

WHITE NOISE

DILUTE: A code for studying beam evolution under RF noise [DE93-011605] p 133 N94-10960

The limit of frequency estimation p 356 N94-11001

WIGNER COEFFICIENT

Wigner functions for nonclassical states of a collection of two-level atoms p 379 N94-10603

WIND (METEOROLOGY)

Stability model of the atmosphere p 32 N94-11500

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

Validation of ERS-1 wind and wave data by use of operational forecast models p 233 N94-11710

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

Availability of wind field over the North Pacific derived from data on ships-of-opportunity and analysis of long-term variabilities p 202 N94-11962

Impact of ERS-1 wind/wave/ice data on operational ocean forecasting p 250 N94-12500

A first assessment of the value of ERS-1 scatterometer winds for meteorological studies in the polar regions p 250 N94-12501

Field research of wind wave spectrum variability p 223 N94-12727

Observations of film slicks and internal waves with Ka-band scatterometer p 225 N94-12741

WIND DIRECTION

Dependence of oceanic microwave emission on wind direction p 201 N94-11957

WIND EFFECTS

Effects of wind-roughened sea surface on ocean color remote sensing: Noise derived from reflected light and whitecaps p 191 N94-11898

Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT p 194 N94-11918

A new expression for the production rate of sea water droplets on the sea surface p 195 N94-11920

Field research of wind wave spectrum variability p 223 N94-12727

WIND MEASUREMENT

US areal wind resource assessment [DE93-011905] p 262 N94-11051

Calibration and validation of the ERS-1 wind scatterometer p 232 N94-11706

The Grand Banks ERS-1 SAR wave spectra validation experiment p 232 N94-11708

ERS-1 scatterometer data characteristics and wind retrieval skill p 233 N94-11709

A C-band wind scatterometer model derived from the data obtained during the ERS-1 calibration/validation campaign p 233 N94-11711

The activity of the ERS-1 Venice (Italy) group on scatterometry p 233 N94-11713

Wind and surface features in SAR images: The Canadian program p 234 N94-11718

Preliminary analysis of circulations over the Indian Ocean and adjoining regions using ERS-1 surface winds in the NCMRWF data assimilation system p 234 N94-11719

Spatial scales of wave height p 244 N94-11782

Analysis of GEOSAT wind data p 207 N94-12636

WIND PROFILES

HF ocean radar system at Okinawa Radio Observatory p 139 N94-11902

Groundwave HF ocean surface radar p 139 N94-11906

Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911

Availability of wind field over the North Pacific derived from data on ships-of-opportunity and analysis of long-term variabilities p 202 N94-11962

Wind field estimate by using one hour GMS data p 202 N94-11963

The Pacific responses exhibited by an OGCM to various wind fields p 202 N94-11964

On an upwelling front, propagation of upwelling and vertical velocity in the eastern Arabian Sea during monsoon, 1987 p 206 N94-11987

Analysis of GEOSAT wind data p 207 N94-12636

SSMI wind speed variability over the Pacific Ocean p 207 N94-12637

Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

WIND SHEAR

On non-linear longitudinal stability of an aircraft in a dive in the presence of atmospheric disturbances p 31 N94-11492

WIND TUNNEL CALIBRATION

Overview of the 1989 Wind Tunnel Calibration Workshop [NASA-TP-3393] p 34 N94-11869

WIND TUNNEL MODELS

A unique facility to support cryogenic wind tunnel operations [ARA-MEMO-377] p 34 N94-12436

WIND TUNNEL NOZZLES

A CFD-based aerodynamic design procedure for hypersonic wind-tunnel nozzles p 9 N94-10458

WIND TUNNEL TESTS

An investigation on the effectiveness of the piping interference removal system for STOL aircraft wind tunnel tests [NAL-TM-647] p 2 N94-10350

Experimental results in aerodynamic stability and control of a TSTO configuration p 3 N94-10424

New hypersonic test methods developed at ONERA: The R5 and F4 wind tunnels p 4 N94-10429

Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431

Experimental and computational comparisons of Mach 6 high Reynolds number heat transfer and skin friction p 6 N94-10443

Joint computational and experimental aerodynamic research on a hypersonic vehicle p 6 N94-10445

Some experimental study and numerical simulation in wind tunnel flow p 8 N94-10457

Simulated wake characteristics of tapered annular wings by a discrete vortex method [NAL-TR-1156] p 13 N94-10855

Simulated and experimental aerodynamic characteristics of tapered annular wings [NAL-TR-1157] p 13 N94-10856

An experimental investigation of the sources of propeller noise due to turbulence ingestion p 358 N94-11057

A preliminary study on ice shape tracing with a laser light sheet [NASA-TM-105964] p 174 N94-11132

Supersonic airplane study and design [NASA-CR-193219] p 25 N94-11150

Boundary layer transition: Prediction and wind tunnel simulation p 32 N94-11498

Modeling nonlinear aerodynamic loads for aircraft stability and control analysis p 32 N94-11499

Computation of hypersonic nosetip heat transfer rates for an M829-like projectile [AD-A263226] p 16 N94-11870

Lift enhancement of a wing/strake using pneumatic blowing [AD-A265074] p 26 N94-11872

An investigation of small scales of turbulence in a boundary layer at high Reynolds numbers p 157 N94-12303

Plane mixing layer vortical structure kinematics p 159 N94-12313

A unique facility to support cryogenic wind tunnel operations [ARA-MEMO-377] p 34 N94-12436

WIND TUNNELS

Estimation of critical values and vibration characteristics on supersonic delta wings. Part 1: On-line time series analysis of stationary random response [NAL-TR-1153] p 2 N94-10363

The upgrading of the arc heated wind tunnel of the DLR (LBK) with respect to its effects on the material testing p 4 N94-10432

New aerodynamic information obtained from the solution of the inverse problem for aerofoils [NAL-TR-1172] p 14 N94-10860

Numerical wind tunnel project and computational fluid dynamics at National Aerospace Laboratory, Japan [NAL-TM-648T] p 149 N94-10861

Overview of the 1989 Wind Tunnel Calibration Workshop
[NASA-TP-3393] p 34 N94-11869
Superfluid turbulence p 158 N94-12307

WIND TURBINES
US areal wind resource assessment
[DE93-011905] p 262 N94-11051
Fatigue life prediction for wind turbines: A case study on loading spectra and parameter sensitivity
[DE93-011597] p 263 N94-11173

WIND VELOCITY
Preliminary results on backscattering strength from a wind generated bubbly ocean surface
[AD-A265006] p 287 N94-10490
Selected upper-air wind speed distributions
[AD-A264822] p 284 N94-10871
US areal wind resource assessment
[DE93-011905] p 262 N94-11051
A preliminary C-band scatterometer model function for the ERS-1 AMI instrument p 233 N94-11715
Wind and surface features in SAR images: The Canadian program p 234 N94-11718
Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724
Spatial scales of wave height p 244 N94-11782
Current structures in the western equatorial Pacific during JAPACS cruises p 193 N94-11911
The microwave backscattering from wind waves
p 201 N94-11959
On the variability of wind speeds in the North Western Pacific observed by altimeter/GEOSAT and SSM/I/DMSP p 201 N94-11960
Observation of wind and waves by GEOSAT altimeter
p 202 N94-11961
Availability of wind field over the North Pacific derived from data on ships-of-opportunity and analysis of long-term variabilities p 202 N94-11962
Analysis of GEOSAT wind data p 207 N94-12636
SSMI wind speed variability over the Pacific Ocean
p 207 N94-12637
Theory and oceanographic applications of satellite altimeter measurements p 208 N94-12641
Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740

WIND VELOCITY MEASUREMENT
Evaluation of two January - June 1992 ERS-1 AMI wind vector data sets p 235 N94-11724

WINDING
Tape winding of thermoplastic composites
p 60 N94-10035

WINDOWS (APERTURES)
Arcjet exploratory tests of ARC optical window design for the AFE vehicle
[NASA-CR-192655] p 34 N94-10930

WINDOWS (COMPUTER PROGRAMS)
An expert system shell for inferring vegetation characteristics: Prototype help system (Task 1)
[NASA-CR-193411] p 231 N94-11236
Development and implementation of a general purpose x-windows display program
[AD-A265306] p 332 N94-11860

WINDPOWER UTILIZATION
US areal wind resource assessment
[DE93-011905] p 262 N94-11051
Renewable energy sources 1991, part 2
[DE93-605634] p 263 N94-11506

WINDPOWERED GENERATORS
US areal wind resource assessment
[DE93-011905] p 262 N94-11051

WINDPOWERED PUMPS
Renewable energy sources 1991, part 3
[DE93-605594] p 263 N94-11505

WINDSHIELDS
Aircraft windscreens enhance visual search disruption produced by laser glare
[AD-A265167] p 26 N94-11892

WING NACELLE CONFIGURATIONS
Supersonic airplane study and design
[NASA-CR-193219] p 25 N94-11150

WING PANELS
Underwing compression vortex attenuation device
[NASA-CASE-LAR-14744-1] p 12 N94-10673

WING PLANFORMS
Ground vibration and flight flutter tests of the single-seat F-16XL aircraft with a modified wing
[NASA-TM-104269] p 26 N94-11233

WING PROFILES
New aerodynamic information obtained from the solution of the inverse problem for aerofoils
[NAL-TR-1172] p 14 N94-10860

WING SPAN
Simulated and experimental aerodynamic characteristics of tapered annular wings
[NAL-TR-1157] p 13 N94-10856

WING TIP VORTICES
Simulated and experimental aerodynamic characteristics of tapered annular wings
[NAL-TR-1157] p 13 N94-10856

WINGS
Navier-Stokes flowfield computation of wing/rotor interaction for a tilt rotor aircraft in hover
[NASA-CR-4532] p 13 N94-10758

WIRING
Specification and testing for power by wire aircraft
[NASA-TM-106232] p 46 N94-10765
Development and analysis of insulation constructions for aerospace wiring applications p 21 N94-10791

WORK CAPACITY
Glycerol-induced hyperhydration p 309 N94-11996

WORK FUNCTIONS
Squeezed states of electrons and transitions of the density of states p 370 N94-10593

WORKLOADS (PSYCHOPHYSIOLOGY)
Quantitative EEG patterns of differential in-flight workload p 317 N94-11528
Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529

WORKSTATIONS
System engineering concept demonstration, technology assessments, volume 5
[AD-A265471] p 323 N94-10494
A distributed version of the NASA Engine Performance Program
[NASA-TM-106208] p 327 N94-11231
RAMCAD (reliability, availability, and maintainability in computer-aided design)
[AD-A265143] p 331 N94-11679

X

X RAY ABSORPTION
X ray absorption spectroscopy of electrochemically generated species
[AD-A264749] p 77 N94-11265
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458
In situ XANES studies of the passive film on Fe and Fe-26Cr
[DE93-010869] p 84 N94-11459

X RAY ANALYSIS
New x ray scanning topographic approaches to nondestructive evaluation of composites
p 61 N94-10039
Interferometric and optical tests of water window imaging x ray microscopes
[NASA-CR-193369] p 375 N94-10506
High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA
[DE93-011892] p 393 N94-11677

X RAY APPARATUS
Interferometric and optical tests of water window imaging x ray microscopes
[NASA-CR-193369] p 375 N94-10506

X RAY DIFFRACTION
Symmetry lowering in crystalline solid solutions: A study of cinnamamide-thienylacrylamide by x ray and neutron diffraction and solid-state photochemistry
[DE93-010871] p 394 N94-10301
Tribological characteristics of hot-pressed self-lubricating composites
[NAL-TR-1160] p 66 N94-10858
The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682

X RAY FLUORESCENCE
Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165

X RAY IMAGERY
Development of microstrip gas chamber and application to imaging gamma-ray detector
[DE93-754294] p 34 N94-11041

X RAY LASERS
High power z pinches as x ray laser photopumps
[DE93-012842] p 173 N94-10746
High-order harmonic conversion efficiency in helium
[DE93-011714] p 364 N94-10753
Electron temperature measurements of x ray laser plasmas
[DE93-011874] p 389 N94-11074
Demonstration designs for optical-field-ionized plasma x-ray lasers
[DE93-009227] p 175 N94-11266
LCLS optics: Selected technological issues and scientific opportunities
[DE93-010953] p 175 N94-11468
Inexpensive capillary discharge x-ray laser driver
[AD-A265932] p 176 N94-12382
Spatial coherence of soft x ray lasers
[DE93-012497] p 176 N94-12590

X RAY SCATTERING
X-ray and neutron scattering studies of magnetic critical fluctuations in holmium
[DE93-010873] p 400 N94-11467
FEFF5: An ab initio multiple scattering XAFS code
[DE93-011000] p 367 N94-11470

X RAY SOURCES
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286
Physical optics modelling of Soft X ray Projection Lithography (SXPL) imaging experiments
[DE93-011556] p 374 N94-10339
Wavelength considerations in soft x ray projection lithography
[DE93-014115] p 381 N94-10651
Radiation hardness of Mo/Si multilayers designed for use in a soft x ray projection lithography system
[DE93-011879] p 143 N94-11273
Submicrosecond, synchronizable x ray source
[AD-D015745] p 176 N94-12337
HEAO-1 analysis of Low Energy Detectors (LED)
[NASA-CR-194087] p 424 N94-12574

X RAY SPECTRA
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch
[DE93-012674] p 384 N94-10157
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286

X RAY SPECTROSCOPY
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527
X ray and gamma ray spectroscopy of solids under pressure
[DE93-014847] p 76 N94-10653
Effect of surface cleanliness of bearing steel on adhesive strength and tribological properties of sputter-deposited gold films
[DE93-767974] p 82 N94-10732
Tribological characteristics of hot-pressed self-lubricating composites
[NAL-TR-1160] p 66 N94-10858
X ray absorption spectroscopy of electrochemically generated species
[AD-A264749] p 77 N94-11265
High resolution time- and 2-dimensional space-resolved x ray imaging of plasmas at NOVA
[DE93-011892] p 393 N94-11677
Remote sensing x ray fluorescence spectrometry for future lunar exploration missions p 462 N94-12165
Yohkoh Bragg Crystal Spectrometer light curves for Ca XIX (3.1631-3.1912A): 1 October 1991 - 30 September 1992
[AD-A266090] p 483 N94-12414

X RAY TUBES
Laser Synchrotron Source (LSS)
[AD-D015755] p 173 N94-10371

X RAYS
X ray production (approximately)130 (Angstrom) from laser-produced plasmas for projection x ray lithography applications
[DE93-009256] p 385 N94-10286
Needs for super-smooth surfaces
[DE93-012482] p 382 N94-11242
The x ray standing waves on surfaces
[AD-A265265] p 402 N94-11682

X-29 AIRCRAFT
X-29: Longitudinal instability at high angle-of-attack
p 33 N94-11504

X-30 VEHICLE
An environmental study of the National Aerospace Plane
[AD-A266071] p 25 N94-10945

XENON
Satellite structure of the xenon valence shell by electron momentum spectroscopy
[DE93-609993] p 360 N94-10327

XENON ISOTOPES
Nitrogen and noble gases in a glass sample from LEW88516 p 80 N94-12051
The Xe-Q in Iodranites and a hint for Xe-L. FRO90011 another Iodranite? p 432 N94-12239

XENON 129
Noble gases in LEW88516 shergottite: Evidence for exposure age pairing with ALH77005 p 80 N94-12082
Studies of the release of radiogenic Xe-129 from Bjurboele: Evidence against simple diffusion models
p 430 N94-12125

XI HYPERONS
Double-lambda compound nucleus and the formation of double hypernuclei
[DE93-754289] p 365 N94-11040

A generalized Bethe-Weizsaecker mass formula for strange hadronic matter
[DE93-011010] p 368 N94-11620

XV-15 AIRCRAFT
Determining XV-15 aeroelastic modes from flight data with frequency-domain methods
[NASA-TP-3330] p 25 N94-10935

Y

YAG LASERS
Nonlinear Dynamics in Optical Systems. Postdeadline papers presented at the Optical Society of America Conference
[AD-A264958] p 375 N94-10486
Thermal-optical switching of a silicon based interference filter
[AD-A265152] p 174 N94-11095
Short wavelength crystal fiber devices
[AD-A265716] p 176 N94-12402

YAW
Static internal performance of a single expansion ramp nozzle with multiaxis thrust vectoring capability
[NASA-TM-4450] p 12 N94-10675
Traveling disturbances appearing in yawed cylinder boundary layer transition p 166 N94-12632

YBCO SUPERCONDUCTORS
Microstructure and associated properties of YB2Cu3O(x) superconductors prepared by melt processing techniques
[DE93-010675] p 398 N94-11004
Texture analysis of high Tc superconductors
p 399 N94-11314
Apical Cu-O bond in YBa2Cu3O(7-delta) superconductors by XAFS
[DE93-010861] p 400 N94-11458
Synthesis and magnetic properties of novel La*2-x*M*x*CuO*4 equals y* compositions (La equals La, Pr, Nd, Sm, Eu, Cd; M equals Ca, Sr, Ba; O (less than or equal) x 0.2; -0.5 (less than or equal) y (less than or equal) 0.5)
[DE93-011359] p 403 N94-12363
Corrosion and passivation of high temperature superconductors
[AD-A265402] p 405 N94-12586

YIELD
Integration of ERS-1 data into the European project of agriculture statistics p 248 N94-12490

YIELD POINT
Damage thresholds of fluoride multilayers at 355 nm
[DE93-009523] p 90 N94-11230

YIELD STRENGTH
Collisions of small Spacewatch asteroids with the Earth p 430 N94-12157

YLF LASERS
A 1.94 micron laser apparatus, system, and method using a thulium-doped yttrium-lithium-fluoride laser crystal pumped with a diode laser
[AD-D015740] p 176 N94-12321

YUKON TERRITORY
Minor and trace element composition and age of Yukon probable-microtektites p 429 N94-12094

Z

ZEOLITES
Crystallization of zeolites in the microgravity environment of space p 119 N94-10210
Synthesis of molecular sieves from clear solution
p 124 N94-10245

ZERO POINT ENERGY
Uncertainty relations, zero point energy and the linear canonical group p 378 N94-10590

ZETA PINCH
Source to detector spectrum transformation and its inverse for the Pegasus Z-pinch
[DE93-012674] p 384 N94-10157
High power z pinches as x ray laser photopumps
[DE93-012842] p 173 N94-10746
Advanced concepts theory annual report 1992
[AD-A266132] p 393 N94-11474

ZINC COATINGS
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials
[DE93-008717] p 88 N94-10891

ZINC COMPOUNDS
Second and third order nonlinear optical properties of crystalline inorganic/organic complexes
[DE93-011883] p 173 N94-10755
Advanced zinc phosphate conversion and pre-ceramic polymetallosiloxane coatings for corrosion protection of steel and aluminum, and characteristics of polyphenyletheretherketone-based materials
[DE93-008717] p 88 N94-10891

ZINC SELENIDES
Investigation of ZnSe-coated silicon substrates for GaAs solar cells p 52 N94-11405

ZIRCONIUM ALLOYS
Structure and properties of an RS Al-Si-Ni-Mn-Zr alloy for high temperature applications p 64 N94-10063

ZIRCONIUM ISOTOPES
Progress in zirconium resonance ionization spectroscopy
[DE93-011881] p 76 N94-11075

ZIRCONIUM OXIDES
Microanalysis of directionally solidified cobalt oxide-zirconia eutectic
[DE93-013207] p 88 N94-10527

ZONAL FLOW (METEOROLOGY)
Updated forecast of Atlantic seasonal hurricane activity for 1993 p 285 N94-11194
Numerical simulations of thermal convection in rapidly rotating spherical fluid shells p 153 N94-11635

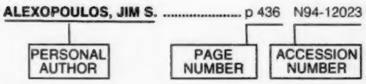
ZONE MELTING
Marangoni and buoyant convections in zone melting of GaAs with liquid encapsulation p 101 N94-10081
On shape of single crystals grown by FZM in microgravity p 102 N94-10084
Calculation of the effects of magnetic field damping in fluid flow: Comparison of magnetohydrodynamic models of different complexity p 103 N94-10089
Mission support for crystal growth experiments in Russian unmanned carriers p 111 N94-10139
Crystal growth in the Zone Melting Facility (ZMF)
p 119 N94-10213

ZOOPLANKTON
Automatic classification system for zooplankton
p 203 N94-11969
The seasonal change of phytoplankton size distribution using optical fiber sensor p 210 N94-12656

PERSONAL AUTHOR INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 1

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

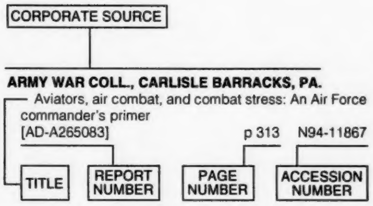
CORPORATE SOURCE INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 1

Typical Corporate Source Index Listing



ARMY WAR COLL., CARLISLE BARRACKS, PA.
Aviators, air combat, and combat stress: An Air Force commander's primer
[AD-A265083] p 313 N94-11867

Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

AACHENER CENTRUM FUER ERSTARRUNG UNTER SCHWERELOSIGKEIT E.V. (GERMANY).
Variations of the temperature profile in the gradient furnace GFQ within a cylindrical sample used for directional solidification p 114 N94-10181
Containerless processing of equiatomic Mn50Bi50 in a drop tube p 118 N94-10205

AASTRA AEROSPACE, INC., DOWNSVIEW (ONTARIO).
Smart structures at Aastra Corporation p 69 N94-11326

ACADEMIA SINICA, BEIJING (CHINA).
In situ observation of temperature dependence of concentration field during growth of KB5 crystals by holographic interferometry p 115 N94-10187
Solidification of undercooled Ni-32.5 wt percent Sn eutectic alloy p 86 N94-10194
Roles of the NEC and MC in the formation and evolution of the Equatorial Pacific Warm Pool p 206 N94-11990
Delineation of mesoscale features of ocean on satellite IR image p 214 N94-12675

ACADEMY OF SCIENCES, POTSDAM (GERMAN D.R.).
Operational ERS-1 orbit determination at D-PAF p 243 N94-11774
Quick-look monitoring of the sea surface with ERS-1 fast delivery altimeter data p 243 N94-11777
The Earth's gravity model for the ERS-1 commissioning phase p 243 N94-11778

ACADEMY OF SCIENCES OF THE AZERBAIJAN SSR, BAKU.
Exact and quasi-classical density matrix and Wigner functions for a particle in the box and half space p 350 N94-10600

ACADEMY OF SCIENCES OF THE MOLDAVIAN SSR, KISHINEV.
Two-phase flow heat transfer and hydrodynamics in an electric field p 103 N94-10093
Nonperturbative methods in the problem of multiphoton excitation of atom by squeezed light p 376 N94-10575

ACADEMY OF SCIENCES OF THE UKRAINE, KHARKOV.
Collective acceleration of ions in near-anode plasma of a strong-current relativistic diode [DE93-620977] p 387 N94-10541
Dynamics of ion acceleration in electron flux by a virtual cathode potential [DE93-620978] p 371 N94-10542
On the stability of stationary regimes in a distributed autovibration system with external feedback [DE93-620979] p 141 N94-10543
Scattering of modulated Ultra-Relativistic Electron Beam (UREB) by atmospheric plasma [DE93-620987] p 387 N94-10558
The intra-atomic motion of bound electrons as a possible source of a systematic error in electron beam polarization measurements by means of a Moeller polarimeter [DE93-620984] p 364 N94-10875
Nonlinear excitation in quasi-one-dimensional Peierls dielectrics with charge density waves [DE93-613827] p 398 N94-11025
Regular tensor Green functions of the round waveguide [DE93-621354] p 345 N94-11036
To the complexity of dynamic system problem [DE93-621355] p 134 N94-11037
Asymptotic expressions for regular Green functions of a round cylindrical screen [DE93-621356] p 134 N94-11038
Dissipative phase transitions in field theory models with spontaneous symmetry violation [DE93-621382] p 412 N94-11039
The influence of the propagation medium on the sensitivity and resolution of meter wavelength aperture synthesis systems p 134 N94-11062
Non-barrier tunneling in presence of dissipations [DE93-621381] p 412 N94-11086
Green-Schwarz superstrings in the generalized harmonical Newmann-Penrose formalism [DE93-621422] p 412 N94-11088
Calculation of Mercier stability criterium in stellarators [DE93-621599] p 389 N94-11091
Probability of particle trapping/detrapping in torsatrons [DE93-621641] p 390 N94-11121
The possibility of using carbon-graphite materials for microwave plasma diagnostics in large fusion devices [DE93-621609] p 66 N94-11143
Analytical description of the torsatron Uragan-2M magnetic configuration with account of plasma pressure and external correcting magnetic field [DE93-620983] p 391 N94-11174
Kinetic effects in stochastic topologically nontrivial field [DE93-621642] p 391 N94-11207
Simple kinetic model for plasma in stochastic helical field [DE93-621643] p 391 N94-11208
Elementary mechanism of electron beam dissipative instability development [DE93-621653] p 391 N94-11209
Dispersion of plasma waves in a finite magnetic field (omega(sub H) greater than omega(sub p)) [DE93-621654] p 391 N94-11210
Experimental investigation of wake field excitation in plasma by a periodic succession of relativistic particle clots [DE93-621655] p 391 N94-11211
Negative viscosity and generation of dissipative solitons and zonal dissipative structures by drift waves [DE93-621656] p 392 N94-11212
Spreading of Bimodulated Ultra-relativistic Electron Beam (BUEB) in Atmospheric Plasma Channel (APCh) [DE93-621658] p 392 N94-11213
Magnetic island suppression in torsatron configurations [DE93-621681] p 392 N94-11215
A method of influence regions in the theory of vacancy swelling of metals [DE93-620579] p 83 N94-11363
Non-linear dynamics of automodulation processes in coupled distributed autovibration systems with delay [DE93-620976] p 143 N94-11365

ACADEMY OF SCIENCES OF THE UKRAINE, KIEV.
On the relativistic string size at finite temperature [DE93-617658] p 409 N94-10394
Nonlinear MHD-waves in a dissipative plasma with hall currents [DE93-617844] p 386 N94-10395
General renormalized statistical approach with finite cross-field correlations [DE93-617846] p 386 N94-10396
Stationary spectra in a magnetized current-carrying plasma [DE93-617847] p 386 N94-10397
Effective action in the gauged Nambu-Jona-Lasinio model [DE93-617654] p 409 N94-10405
Stationary spectra in a plasma with a shear (renormalized statistical approach with non-zero eigenfrequencies) [DE93-617851] p 386 N94-10523
Optimization of break-down conditions in tokamak TOTUS [DE93-617863] p 386 N94-10524
The peculiarities of the spin glass state in Fe(x)Mn(1-x)TiO3 [DE93-617882] p 395 N94-10525
Stationary spectra in a finite-pressure current-carrying plasma [DE93-617848] p 387 N94-10538
Stationary spectra in a quasi neutral current-carrying plasma [DE93-617849] p 387 N94-10539
Stationary spectra in a sheared plasma (linear limit) [DE93-617850] p 387 N94-10540
Bound states of the N-dimensional Klein-Gordon equation with vector and scalar Coulomb potentials [DE93-617650] p 349 N94-10547
On local frame fields and fermion dynamics in space with nontrivial topologies [DE93-617657] p 349 N94-10548
P-matrix description of the two-particle interaction [DE93-617690] p 361 N94-10549
Studies of P-matrix formalism on the basis of the potential description of two-particle interaction [DE93-617691] p 362 N94-10550
Crossing-odd spin effects in the dipole model of hadron scattering [DE93-617692] p 362 N94-10551
Model for the pomeron [DE93-617693] p 362 N94-10552
Logarithmically rising cross section and the ratio sigma(sub el)/sigma(sub t) [DE93-617694] p 362 N94-10553
Detecting the odderon [DE93-617695] p 362 N94-10554
Fine structure of the Pomeron and the real part of the elastic scattering amplitude [DE93-617696] p 362 N94-10555
Coherence influence on the intensity of Bose-Einstein correlations and visible size of a source [DE93-617697] p 349 N94-10556
The determination of nucleon-nucleon scattering phases by the phase functions method [DE93-617729] p 362 N94-10557
On the doubling of hydrodynamic theorems in relativistic theory of superfluidity [DE93-617895] p 148 N94-10717
Quasi-relativistic effects in barrier-penetration processes [DE93-617730] p 410 N94-10721
Three-nucleon problem with phase equivalent potentials [DE93-617731] p 363 N94-10722
On the possible unobservability of the Wu-Yang phase factor in curved space [DE93-617645] p 411 N94-10831
Exact solutions of a many-anyon problem [DE93-617646] p 411 N94-10832
A new approach to the I/N-expansion for the Dirac equation [DE93-617647] p 349 N94-10833

Exact solution of the N-dimensional generalized Dirac-Coulomb equation
[DE93-617649] p 411 N94-10834
The multiplicity spectra of the (169)Tm(n, gamma) reaction
[DE93-617733] p 364 N94-10835
Monte Carlo algorithms in simulation of 2beta-decay and penetration of electrons through matter
[DE93-617741] p 364 N94-10837
The heat transfer by radiation between two media
[DE93-617820] p 149 N94-10838
The Langevin's approach to the statistical theory of bounded plasma
[DE93-617842] p 388 N94-10839
Stationary spectra of short-wave convective and magnetostatic fluctuations in a finite-pressure plasma and anomalous heat conductivity
[DE93-617852] p 388 N94-10840
On problem about nature of Portevin-Le Chatelier effect in irradiated aluminium alloys
[DE93-617200] p 82 N94-10842
The influence of irradiation conditions, type, and concentration of impurities on radiation defects characteristics in indium antimonide under electron irradiation
[DE93-617201] p 397 N94-10843
Radiation defect production in InAs crystals under electron irradiation
[DE93-617202] p 397 N94-10845
Spin characteristics of ion beams during the motion of electromagnetic elements
[DE93-617448] p 364 N94-10848
Monochromator SP-017. The results of the first experiments
[DE93-617463] p 372 N94-10849
All possible electroweak models from Z orbifold
[DE93-617656] p 411 N94-10880
Quantum solitons with cylindrical symmetry
[DE93-617659] p 344 N94-10881
Filamentation instability of hot quark-gluon plasma with hard jet
[DE93-617679] p 388 N94-10882
Gluon gas viscosity in nonperturbative region
[DE93-617680] p 397 N94-10883
Gauge independence of the A(sub 0)-condensate
[DE93-617681] p 397 N94-10884
Spatial helicon-wave echo in an inhomogeneous magnetized plasma
[DE93-617845] p 389 N94-10885
Distribution of charged particles near the plasma boundary in the presence of external electric field
[DE93-617862] p 389 N94-10886
The graphical library for technological process automatization
[DE93-621316] p 324 N94-11031
Structural and electronic properties of atomic chains
[DE93-617758] p 366 N94-11349
Decay interaction of bulk and surface Langmuir waves
[DE93-617843] p 393 N94-11477

ACADEMY OF SCIENCES (USSR), LENINGRAD.
Fast trigger algorithm for B-events selection
[DE93-621452] p 365 N94-11089

ACADEMY OF SCIENCES (USSR), MOSCOW.
Space and temporal behavior and control of the residual convection in microgravity p 104 N94-10099
Convective motion in a multi-layered system with a free surface p 120 N94-10219
Use of inert immiscible liquid for crystal separation out of its feeding solution in weightlessness
p 124 N94-10242
Harmonic oscillator interaction with squeezed radiation
p 376 N94-10571
An exactly solvable model of an oscillator with nonlinear coupling and zeros of Bessel functions
p 349 N94-10573
Correlated states of a quantum oscillator acted by short pulses p 380 N94-10609
Floquet operator as integral of motion
p 380 N94-10610
Quantum processes in resonators with moving walls
p 380 N94-10612
Russian space system for the Earth remote sensing
p 37 N94-10688
Radiowaves propagation through inhomogeneous interstellar plasma p 134 N94-11061
Generalization of Dyson criterion for the amplitude-phase fluctuations case and for the system of interferometers p 135 N94-11067
The possibility of image restoration under observation in a regime of strong scattering p 136 N94-11068
The superresolution effect observed through a random medium p 136 N94-11069
Use of satellite telecommunications for telemedicine
p 308 N94-11807
Observations of the fractal properties of the Japan sea surface temperature patterns p 205 N94-11984
Dispersion of the ratios of cosmogenic isotopes of noble gases in chondrites of different cosmic-ray exposure ages p 428 N94-12020
Peculiarities of distributions of the cosmic-ray exposure ages of H chondrite falls and finds p 428 N94-12021
Search for effects of a supernova explosion 30 to 40 thousand years ago in chondrites p 428 N94-12022
Vaporization by shock loading of albite, jadeite, and pyrex glass: Experimental study p 97 N94-12039
Shock transformations in quartzite p 97 N94-12040
Yana ring structure, North-Eastern Siberia: A possible counterpart of coronae on Venus p 282 N94-12121
Russia's contribution to regional geologic mapping of Venus p 454 N94-12122
Landscape and geomorphic survey of Zhamanshin area, Northern Kazakhstan: Preliminary report on 1992 field trip data p 282 N94-12123
The correlation of alkalis and aluminum during high-temperature volatilization of albite and nepheline
p 81 N94-12214
On the unique structure of the magnetic fields of Uranus and Neptune p 472 N94-12221
Precession of Uranus and Neptune and their magnetic field p 473 N94-12222
On high-temperature formation of iron-rich olivine in the early solar system p 432 N94-12225
Recondensation of chondritic material in the early solar system: Results of thermodynamic simulation
p 432 N94-12226
Moessbauer spectrometer for mineralogical analysis of the Mars surface: Moessbauer source considerations
p 476 N94-12242
Diamond thermoluminescence properties of different chondrites p 433 N94-12252
The unusual metallic particles in Krymka LL3.0 chondrite p 433 N94-12253
On possibility of diamond formations in radiation process p 433 N94-12254
The carbon isotopic composition of Novo Urei diamonds p 433 N94-12255
The fractionation of noble gases in diamonds of CV3 Efremovka chondrite p 81 N94-12256
Frontal zones in Pacific Ocean: Satellite and ship data analysis p 216 N94-12687
Polarisation of backscattering radiation at remote sensing of ocean with impulse laser beam
p 177 N94-12722
The method of investigation of the horizontal structure of the thermal fronts p 222 N94-12723
On a nonstationary dynamics of the north-west Pacific Ocean p 222 N94-12724
Turbulence generation in the Pacific undercurrent by shear p 223 N94-12730
A detailed investigation of the benthic regime in the Clarion-Clipperton province of the Pacific and a forecast of consequences of manganese nodule mining
p 224 N94-12733
Bottom currents and possibilities for near bottom layer environmental investigations in the Pacific by means of self contained bottom stations p 224 N94-12734
Autonomous self contained bottom pop-up stations for study of the benthic layer and seismicity of the ocean's bottom p 224 N94-12735
Remote sensing of light scattering coefficient of sea water vertical distribution by the means of airborne lidar
p 224 N94-12736
Verification of the atmosphere-ocean radiative transfer parametric models p 225 N94-12738
Optical transfer operator of the atmosphere-ocean system p 225 N94-12742
Variability of spectral reflectance in coastal waters near the river plumes p 226 N94-12744
Wind-wave and foam dynamics from optical and radar airborne observations p 226 N94-12745
Observations of surface signatures in the north-west Pacific Ocean with the spaceborne SAR
p 226 N94-12746
Radar observation of internal waves field in the north-west Pacific p 226 N94-12747
Coupled numerical model for altimetric data assimilation and velocity field analysis p 227 N94-12752
Study of the admixture diffusion in the sea using remote techniques p 228 N94-12759
Mixing of drifter ensemble by mesoscale currents
p 228 N94-12760
The algorithm of primary production determination
p 228 N94-12761
Problem of climate change predictability and satellite radiation budget observations p 229 N94-12766

ACADEMY OF SCIENCES (USSR), NIZHNY NOVGOROD.
Observations of film slicks and internal waves with Ka-band scatterometer p 225 N94-12741

ACADEMY OF SCIENCES (USSR), NOVOSIBIRSK.
Model of convective motion under low gravity
p 103 N94-10088
Controller of serial multiplex communication channel
[DE92-641157] p 336 N94-10544
The uncertainty principle and quantum chaos
p 379 N94-10602
Model of Kuroshio region circulation
p 229 N94-12765

ACADEMY OF SCIENCES (USSR), PERM.
Heat and mass transfer mechanisms of the polymerization under terrestrial and microgravity conditions p 103 N94-10092

ACADEMY OF SCIENCES (USSR), SAINT PETERSBURG.
Propagation of light pulses through a three-layer medium (cloud, pure air, and ocean water) p 222 N94-12725
Optimum selection of spectral channels in the problem of remote sensing of phytoplankton concentration in ocean water p 223 N94-12726

ACADEMY OF SCIENCES (USSR), VLADIVOSTOK.
The thermodynamics of the nonlinear shear flows
p 169 N94-12728
The acoustic arrangement for measuring vertical structure of sea current p 223 N94-12729
The Pacific Subarctic Frontal Zone: Structure and dynamics p 223 N94-12731
Laser photoheterodyne interferometers for oceanographic investigations p 177 N94-12732
Influence of the Kuroshio warm-core rings on hydrographic and fishery conditions off southern Kuril Islands p 224 N94-12737
Convective and dynamic instability in meridional trenches p 225 N94-12739
Spatial variability of the ocean underwater dynamic noise from satellite radar sensing data p 225 N94-12740
Cloud liquid water content over the Pacific Ocean tropical zone derived from ship microwave radiometric measurement p 225 N94-12743
DISTERM: A shipboard data system for satellite monitoring of ocean and atmosphere
p 226 N94-12749
Atmospheric correction for determination of average SST fields based on AVHRR data p 227 N94-12750
The structure of hydrophysical measuring systems of vertical sounding and self-contained stations
p 227 N94-12751
Complex (hydrodynamic, satellite) monitoring of dynamic structures in the western Pacific with the aim of forecasting the marine ecosystems behaviour p 227 N94-12753
Mesoscale dynamic structures of the Subarctic Frontal Zone in the Pacific Ocean p 227 N94-12754
A possibility to define the location of epipelagic fish concentrations with assistance of satellite sensing
p 228 N94-12757
High biological production of the tidal mixing zones on Japan Sea shelf p 228 N94-12758
Generation of internal waves near the shelf boundary
p 229 N94-12763
Experimental and theoretical investigation of undular bore formation upstream the bank p 229 N94-12764

ADVANCED FUEL RESEARCH, INC., EAST HARTFORD, CT.
A novel test method for fuel thermal stability
[AD-A265853] p 99 N94-12275

ADVANCED RESOURCE DEVELOPMENT CORP., COLUMBIA, MD.
Signal feature analysis using neural networks and psychoacoustics
[AD-A266048] p 340 N94-12398

ADVISORY COMMISSION ON INTERGOVERNMENTAL RELATIONS, WASHINGTON, DC.
Intergovernmental decisionmaking for environmental protection and public works
[PB93-176824] p 266 N94-11584

ADVISORY GROUP FOR AEROSPACE RESEARCH AND DEVELOPMENT, NEUILLY-SUR-SEINE (FRANCE).
Theoretical and Experimental Methods in Hypersonic Flows
[AGARD-CP-514] p 2 N94-10421
Environmentally Safe and Effective Processes for Paint Removal
[AGARD-R-791] p 126 N94-10613
A Recommended Methodology for Quantifying NDE/NDI Based on Aircraft Engine Experience
[AGARD-LS-190] p 28 N94-11022
Smart Structures for Aircraft and Spacecraft
[AGARD-CP-531] p 68 N94-11317
Stability in Aerospace Systems
[AGARD-R-789] p 31 N94-11489
AGARD highlights 92/2, September 1992
[AGARD-HIGHLIGHTS-92/2] p 497 N94-11820

AEC-ABLE ENGINEERING CO., INC., GOLETA, CA.
A high specific power solar array for low to mid-power spacecraft p 51 N94-11399

AERODYNE RESEARCH, INC., BILLERICA, MA.
Stratospheric aircraft exhaust plume and wake chemistry
[NASA-CR-191495] p 279 N94-12572

AERONAUTICA MACCHI S.P.A., VARESE (ITALY).
Design and production of insulated wind tunnel models of the Hermes shuttle for heat transfer measurements at hypersonic speeds p 4 N94-10431
AERONAUTICAL RADIO, INC., ANNAPOLIS, MD.
Design for testability and diagnosis at the system-level p 184 N94-11563
AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
Field evaluation of six protective coatings applied to T-56 turbine blades after 2500 hours of engine use
[ARL-TR-27] p 90 N94-11311
AERONAUTICAL SYSTEMS DIV., WRIGHT-PATTERSON AFB, OH.
An environmental study of the National Aerospace Plane
[AD-A266071] p 25 N94-10945
A comparison of head-up and head-down display formats during instrument flying tasks
[AD-A266140] p 316 N94-11642
Evaluation of the C/EC/KC-135 ground collision avoidance system (GCAS), Study 2
[AD-A265193] p 24 N94-11879
AEROSPACE CORP., EL SEGUNDO, CA.
Review of SHARC 2.0 O3 kinetics and spectroscopy
[AD-A265481] p 274 N94-10496
Data processing units for eight magnetospheric particle and field sensors
[AD-A264403] p 276 N94-11463
Crystallinity and dielectric properties of PEEK, a thermoplastic poly(ether ether ketone)
[AD-A266027] p 91 N94-11487
Light scattering from a spherical particle on a conducting plane. Part 1: Normal incidence
[AD-A265920] p 383 N94-12341
Lessons learned from the Long Duration Exposure Facility
[AD-A266026] p 44 N94-12394
Tin whiskers in electronic circuits
[AD-A265917] p 146 N94-12565
AEROSPACE CORP., SUNNYVALE, CA.
On-orbit servicing for USAF space missions: A phased development approach p 348 N94-11571
AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
Arterial gas emboli in altitude-induced decompression sickness p 312 N94-11543
A prototype urine collection device for female aircrew p 317 N94-11549
Effect of intermittent cold exposure on the fiber-type composition of selected skeletal muscles in rats
[AD-A265309] p 301 N94-11861
AEROSPACE MEDICAL RESEARCH LABS., WRIGHT-PATTERSON AFB, OH.
Psychophysiological measures of cognitive workload in laboratory and flight p 317 N94-11529
Visual Earth observation performance in the space environment. Human performance measurement 4: Flight experiments p 314 N94-11539
AEROSPATIALE, TOULOUSE (FRANCE).
Use of robots for aircraft dry stripping via plastic media blasting p 127 N94-10620
AEROSPATIALE AQUITAINE, SAINT-MEDARD EN JALLES (FRANCE).
High temperature composites in Aerospatiale activities p 64 N94-10062
AGENCY OF INDUSTRIAL SCIENCE AND TECHNOLOGY, TOKYO (JAPAN).
Japan's Sunshine Project
[DE93-767980] p 262 N94-10498
AIR-CONDITIONING AND REFRIGERATION TECHNOLOGY INST., INC., ARLINGTON, VA.
Theoretical evaluation of R22 and R502 alternatives
[DE93-014767] p 411 N94-10853
Measurement of viscosity, density and gas solubility of refrigerant blends
[DE93-014772] p 89 N94-11145
Accelerated screening methods for predicting lubricant performance in refrigerant compressors
[DE93-014773] p 89 N94-11146
AIR FORCE HUMAN RESOURCES LAB., WRIGHT-PATTERSON AFB, OH.
Crew chief p 335 N94-11564
On-orbit refueling p 38 N94-11565

FEDERAL AVIATION ADMINISTRATION, ATLANTA, GA.
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials
[DOT/FAA/CT-93/3] p 17 N94-10766
Aircraft material fire testing and the creation of an international working group p 21 N94-10790
Advanced aircraft materials research and development plan p 22 N94-10796
The future of aircraft cabin fire safety p 22 N94-10797

FEDERAL AVIATION ADMINISTRATION, ATLANTIC CITY, NJ.
Proceedings of the International Conference for the Promotion of Advanced Fire Resistant Aircraft Interior Materials
[AD-A266057] p 22 N94-12384

Analytical method for water vapor collection and analysis in aircraft cabin fires
[DOT/FAA/CT-TN93/33] p 22 N94-12575

FEDERAL AVIATION ADMINISTRATION, OKLAHOMA CITY, OK.
Head and face anthropometry of adult US civilians
[DOT/FAA/AM-93/10] p 315 N94-10806
SATORI: Situation Assessment Through the Re-creation of Incidents
[DOT/FAA/AM-93/12] p 38 N94-12567

FEDERAL AVIATION ADMINISTRATION, WASHINGTON, DC.
FAA air traffic activity
[AD-A266043] p 22 N94-12397
US civil airmen statistics for calendar year 1991
[AD-A266085] p 2 N94-12412
Federal Aviation Administration aviation forecasts
[AD-A265611] p 2 N94-12578

FEDERAL AVIATION AGENCY, OKLAHOMA CITY, OK.
Aviation accident risk for airmen with aphakia and artificial lens implants
[DOT/FAA/AM-93/11] p 303 N94-10813

FEDERAL COORDINATING COUNCIL FOR SCIENCE, ENGINEERING AND TECHNOLOGY, WASHINGTON, DC.
Machine translation technology: A potential key to the information age
[PB93-134336] p 421 N94-12385

FERMI NATIONAL ACCELERATOR LAB., BATAVIA, IL.
The three-point function as a probe of models for large-scale structure
[NASA-CR-193249] p 425 N94-11153
Upgraded D(O) calorimeter electronics for short Tevatron bunch space and the effect of pile-up on the W mass measurement
[DE93-013566] p 146 N94-12603
Top quark search in D(O) from the lepton + jets mode
[DE93-014027] p 370 N94-12781

FERRARA UNIV. (ITALY).
The uncertainty principle in resonant gravitational wave antennae and quantum non-demolition measurement schemes p 378 N94-10587

FIAT RESEARCH CENTER, ORBASSANO, TURIN (ITALY).
Possible applications of atomic frequency standards with an internal high resolution digital synthesizer
p 353 N94-10979

FIELD MUSEUM OF NATURAL HISTORY, CHICAGO, IL.
Distribution of vanadium and melting of opaque assemblages in Efremovka CAI's p 282 N94-12141
Metal-rich meteorites from the aubrite parent body
p 430 N94-12142

FIRST INST. OF OCEANOGRAPHY, QINGDAO (CHINA).
ADCP evidence for upper layer circulation in northeast of the South China Sea p 215 N94-12686

FLINDERS UNIV., ADELAIDE (AUSTRALIA).
Integrated cross sections for the ionisation of atomic hydrogen by electron impact
[DE93-610179] p 359 N94-10311
Calculation of the total ionization cross section and spin asymmetry in electron-hydrogen scattering from threshold to 500 eV
[DE93-610180] p 359 N94-10312
Satellite structure of the xenon valence shell by electron momentum spectroscopy
[DE93-609993] p 360 N94-10327
Convergent close-coupling calculations of electron-hydrogen scattering
[DE93-610049] p 360 N94-10328
Calculation of spin-dependent observables in electron-sodium scattering using the coupled-channel optical method
[DE93-610050] p 360 N94-10329
Distorted-wave calculation of He(e,2e) including core-exchange
[DE93-610072] p 360 N94-10330
Spin-dependent observables in electron-sodium scattering calculated using the coupled-channel optical method
[DE93-610073] p 360 N94-10331
Electron momentum spectroscopy of atoms, molecules and solids
[DE93-610148] p 360 N94-10332
Recent advances in electron momentum spectroscopy
[DE93-610149] p 361 N94-10333

FLORIDA AGRICULTURAL AND MECHANICAL UNIV., TALLAHASSEE.
Unsteady flow past a NACA 0012 airfoil pitching at constant rates
[AD-A265159] p 16 N94-11889

FLORIDA INST. OF TECH., MELBOURNE.
Electronic characterization of defects in narrow gap semiconductors
[NASA-CR-193568] p 397 N94-10819

FLORIDA SOLAR ENERGY CENTER, CAPE CANAVERAL.
Computation of photovoltaic parameters under lunar temperature variation p 53 N94-11411

FLORIDA STATE UNIV., TALLAHASSEE.
Variability of wind stress, and sensible and latent heat flux in the North Atlantic during SEASAT
p 194 N94-11918
A study of the Merritt Island, Florida sea breeze flow regimes and their effect on surface heat and moisture fluxes
[NASA-CR-4537] p 286 N94-12580

FLORIDA UNIV., GAINESVILLE.
Ionization potentials of small carbon clusters
[AD-A264379] p 67 N94-11260
Development of ultra-low noise, high sensitivity planar metal grating coupled 3 to 5 multiquantum well infrared detectors for focal plane array staring IR sensor systems
[AD-A265599] p 404 N94-12375

FLUID GRAVITY ENGINEERING LTD., WITLEY (ENGLAND).
Planetary entry vehicle design for planned and potential ESA missions to Titan, Mars, and Earth return (FGE TN 51/92) p 4 N94-10428

FLUIDTHERM ENGINEERING, BOULDER, CO.
SWIRL as a means of liquid management in low gravity
[NASA-CR-4545] p 412 N94-11523

FOKKER B.V., AMSTERDAM (NETHERLANDS).
Operational aspects of F.16 plastic media blasting, as carried out by Fokker Aircraft Services
p 126 N94-10619
Applications of continuous fiber reinforced thermoplastics in aircraft interiors p 18 N94-10775

FOKKER B.V., SCHIPOL-OOST (NETHERLANDS).
Design evaluation of GLARE laminate lay-ups
p 63 N94-10051

FOKKER SPECIAL PRODUCTS B.V., HOOGEVEEN (NETHERLANDS).
Application of advanced thermoplastics
p 60 N94-10033

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS, ROME (ITALY).
Combined analysis of ERS-1 SAR and visible/infrared remote sensing data for land cover/land use mapping in a tropical zone: A case study in Guinea
p 246 N94-12478

FOSTER-MILLER ASSOCIATES, INC., WALTHAM, MA.
Holographic multiplexing for 3D optical memory

ZURICH UNIV. (SWITZERLAND).
Techniques and applications of SAR interferometry for ERS-1: Topographic mapping, change detection, and slope measurement p 236 N94-11734
Monitoring of snowcover in high mountain terrain with ERS-1 SAR p 247 N94-12482

CONTRACT NUMBER INDEX

Typical Contract Number Index Listing

AF PROJ. 2306 .... p 92 N94-11866

CONTRACT NUMBER | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

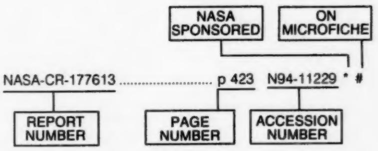
REPORT NUMBER INDEX

SCIENTIFIC AND TECHNICAL AEROSPACE REPORTS VOLUME 32 NUMBER 1

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *International Aerospace Abstracts (IAA). IAA* is issued on the 1st and 15th of each month and is available from the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, NY 10019.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

ATTN: Registration Services
NASA Center for AeroSpace Information
800 Elkridge Landing Road
Linthicum Heights, MD 21090-2934
301-621-0390

Organizations abroad should direct requests to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *IAA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

> **16 SPACE TRANSPORTATION**
>
> Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance*. For space suits see *54 Man/System Technology and Life Support*.

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum, Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 7514 Eggenstein-Leopoldshafen 2, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *IAA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
